Congress has tried to address the problem with a plan to give families a $250 tax credit for each member attending college. But the credits would be too small to help those with real need, and of little significance to those with large incomes.

We're more comfortable with the $1.46 billion program just outlined by President Carter, which would offer several kinds of assistance and be better targeted toward need. It features an automatic $250 grant, but only to families earning less than $25,000 a year. And it would put more emphasis on creating part-time jobs for students, adding 280,000 work-study slots.

Mr. Carter's plan is an improvement. There are other things we'd like to see in a Federal college-aid program, however. As far as practical, the work-study element should be expanded even further. Experience has shown us that a part-time job, with reasonable hours, gives a student a greater appreciation for the value of education.

Loans would be preferable to outright grants, we think. If a student realizes that the funds must someday be repaid—and that he is thus using his own money—they will be spent more carefully. Lent money can also be recycled once it's repaid, thus doing many times the service a single wave of grant funds could do.

In advocating an expanded loan program, we must take note of the failure of some past students to honor their obligations. One Federal loan program has suffered from default rates of up to 14 per cent, which irritated many taxpayers, including us.

Tighter monitoring over borrowers could help reduce the default rate, however. It's also likely that fewer students would renege if the costs and the terms of borrowing were clearly spelled out from the start. Apparently, loans made with only a vague understanding of when and how repayment is due are those most likely to go sour.

If a college education isn't to become a privilege only for the rich, Federal aid will have to be increased. We hope the form it takes will encourage initiative and self-reliance. Easy money, loosely spent, is a poor investment for both the student and the taxpayer.

TESTIMONY OF SECRETARY CALIFANO

Private Schools. President Carter is very concerned that, consistent with the Constitution, nonpublic school children receive their equitable share of funds provided under Federal elementary and secondary education programs. Although estimates in this area are quite rough due to poor record-keeping in the past, we estimate in Fiscal 1979 that private school students will receive between $100 and $250 million out of the $6.9 billion requested for Federal elementary and secondary programs. We also estimate that with appropriate legislative and administrative changes, nonpublic school students could receive from $100 to $250 million in additional funds in Fiscal 1980—funds to which they are legally entitled.

We must take all constitutionally appropriate steps to ensure that private school children receive the funds that are their due. Providing money to private school students through the existing programs—many of them on well-defined educational needs—is a far superior way of ensuring the diversity of education in America than the shotgun approach of a tuition tax credit. A $500 tuition tax credit under consideration by the Congress would, if enacted into law, deliver a devastating blow to public school education in this country. It is indiscriminate, affecting rich and poor alike. And it is inequitable—the Congress would, if private school families received the full benefit of the credit and if they received their full share of existing Federal programs, be providing about four times as much money per private school student as it presently provides per public school student.

For each private elementary and secondary school student, the Congress would provide the $500 from the tax credit, plus the approximately $60 per student that private school students could receive under existing Federal programs—all this for private school students—compared with only $128 per pupil for public school students under existing Federal programs. The proposal, in short, stands the American tradition of public education on its head.

By contrast, to ensure equitable treatment of private school students consistent with sound constitutional interpretation we propose the following legislative changes:

In Title I, require that spending for educationally deprived nonpublic school children is comparable, consistent with their numbers and education need, to spending for public school children; require that new Title I funds distributed through the Targeting and State Incentive provisions are subject to the same equitable standard; require that State plans contain monitoring and enforcement provisions concerning participation of nonpublic school children.

In Title IV, require States to develop a plan for ensuring equitable participation of nonpublic school students in all Federal programs.

Strengthen and clarify the "by-pass" authority which the Federal government may use to provide constitutionally permissible services directly to nonpublic school students if the States and localities fail to discharge their statutory obligations.

In addition, we have also taken, or will take, administrative steps to fulfill the President's commitment to private education:

We will establish a new Office for Nonpublic Schools within the Office of Education. This Office will coordinate all Federal education programs which call for the participation of private school students, obtain information about the level of non-public student participation in federally funded education programs, and process complaints.

We have already established a much more precise and systematic complaint process.

We will make sure that qualified representatives of private schools are placed on educational advisory committees.●

KIDNAPING OF FORMER ITALIAN PREMIER ALDO MORO

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. BIAGGI. Mr. Speaker, I rise to express my shock, outrage, and profound concern over the kidnaping last night of the former Premier of Italy and current President of the Christian Democratic

Party, Aldo Moro. It is a reprehensible and reckless crime committed by the deranged Red Brigade terrorists, capping their current reign of terror. This is the first kidnaping of an Italian political figure since the end of World War II.

The severe political turbulence which has rocked Italy in recent months has been fueled by a rash of political assassinations and kidnapings committed by Fascist-based terrorist organizations. The kidnaping of such a prominent figure as Aldo Moro, demonstrates to the people of Italy that the terrorists will stop at nothing to achieve their aims.

Beyond the personal tragedy involved, this kidnaping will have broad political ramifications in Italy. The most immediate concern is the impact it will have on the recent agreement worked out by current Premier Andreotti to give the Communists a role in government for the first time in 31 years. Moro played a key role in the development of this agreement. If this arrangement does not materialize, the tenuous fibers of Italian democracy could be worn to their limit.

Terrorism in the world has reached deplorable heights—or, rather, depths. The world community must unite against terrorism and crush it before it spreads any farther. In the event that my colleagues have not yet seen any of the news accounts of this brazen abduction, I now insert an article from this morning's edition of the Washington Star:

EX-PREMIER OF ITALY KIDNAPPED

ALDO MORO'S GUARDS SLAIN, RADICALS CLAIM RESPONSIBILITY

ROME.—Terrorists disguised as air force men ambushed and kidnapped former Premier Aldo Moro today, shooting down his police escort in postwar Italy's most daring terrorist attack.

Italy's Red Brigades terrorist group claimed responsibility for the abduction. A message from the group claiming responsibility was received in Turin, where a court is trying 49 accused members of the Red Brigades for murder and other terrorist crimes.

Police said four men of Moro's five-man police escort were killed by gunfire and the other was seriously wounded in the attack in the residential Camilluccia district.

The kidnapping of the 61-year-old Moro, premier from 1963 to 1968 and again from 1974 to 1976 came just as Italy's new government was about to be presented to parliament in an attempt to end Italy's two-month political crisis.

Police said Moro was driving to work in the morning, with two police guards in his car and three more following in another automobile, when a white station wagon with a diplomatic license plate blocked his way.

Moro's car came to an abrupt halt and the police automobile following it slammed into its rear.

Three men in air force uniforms jumped out of another car, pulled submachine guns from attache cases and began firing at the police escort without warning, police said. Still another gunman rode a Japanese motorbike.

Two policemen were killed in their car seats and two more on the pavement.

Officials said the gunmen bundled Moro into one of their cars and drove away.

A report that Moro was wounded and hospitalized proved inaccurate. Police said the hospitalized man was actually the wounded policeman.

It was the first kidnapping of a major politician since the end of World War II and it came only one hour before Premier Giulio Andreotti was to present his newly formed cabinet to parliament after a two-month political crisis.

Moro is president of Andreotti's Christian Democratic Party and he played a decisive role in bringing about an agreement under which the Communists will support Andreotti's minority government in parliament—the first such deal in 31 years.

Italy has been plagued by political instability and partisan violence in recent years.

The instability has stemmed from the country's inability to elect a government with a solid majority of the seats in parliament. The Christian Democrats and Communists received just about the same percentage of the vote in the last elections.

The political violence is coming from both the extreme left and right. The terrorists have staged attacks in Italy over the past few years at a frequency unmatched elsewhere in the world.

There have been dozens of bombings, kidnappings of minor officials and shootings, but Moro's abduction was the boldest to date.

The timing of the kidnapping—just as a new government was being installed—appeared to indicate that those responsible were attempting to continue the political crisis that has beset Italy.

Moro's name also has been mentioned as a likely candidate for the largely ceremonial office of president, now held by Giovanni Leone.

After the kidnapping at 9:15 a.m., Andreotti met with Communist leader Enrico Berlinguer and other leading politicians in an emergency session at the parliament building.

Telephone calls to ANSA—the Italian news agency—and local newspapers purporting to come from the Red Brigades, said: "We have carried an attack to the heart of the state. Moro is just the start."

The callers said Moro was a hostage but made no demands. It was assumed, however, that a demand would come soon for cancellation of the Turin trial. Two previous attempts to try the guerrilla leaders there have failed because terrorist attacks intimidated prospective jurors or defense attorneys.

The kidnapping was apparently well planned. The first reporters on the scene said telephone lines in the area were cut, apparently in an attempt to give the kidnappers get-away time.●

THREE-QUARTERS OF A MONOPOLY

Hon. Theodore M. (Ted) Risenhoover

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. RISENHOOVER. Mr. Speaker, waste by the Federal Government is almost as repugnant as undue involvement by the Federal Government in the affairs of private enterprise.

It should come as an offensive shock to my colleagues to learn that a venture of the Federal Trade Commission is both wasting tax money and interfering in the affairs of several major American businesses. This venture is a foolish law suit, brought by the Federal Trade Commission against our Nation's leading cereal companies.

The foolishness of this suit is documented in a Wall Street Journal editorial, published on March 6, 1978. I hope my distinguished colleagues will take a few minutes to read this editorial:

THREE-QUARTERS OF A MONOPOLY

What is good news for Quaker Oats Company must logically be good news for the other ready-to-eat cereal companies in the industry's almost eight-year struggle against the Federal Trade Commission.

Quaker last week won from Harry R. Hinkes, administrative law judge of the FTC, a dismissal as defendant in the agency's "shared monopoly" case. Quaker, he decided, was not sharing in the monopoly. What this leaves us with is the silly proposition that Kellogg, General Foods and General Mills now constitute three quarters of a monopoly. This confounds logic as much as the idea of a three-quarters murder, which suggests to us that the sooner the government dismisses the entire case the sooner it can wipe the egg off its face.

The whole concept of shared monopoly was a silly one from the start, the idea that when a few producers share a major portion of the market they can act as a monopoly even without conspiring or colluding. The government would have us believe the four companies would make believe they were competing, dividing up the market with winks and signals, rigging high prices and preventing new competition from coming in to beat these shared-monopoly prices by spending lavish amounts on advertising that the "little guy" can't afford.

Quaker, we see, gets off this twisted hook because it increased its market share to 9 percent in 1972 from 2 percent in 1960 and because it evidenced "more rivalry" than the others in seeking supermarket shelf space. Thus, says Mr. Hinkes in his dismissal, the "record fails to show that an order against Quaker is necessary to restore competition in the industry."

It does not take a Jesuit to figure out that it takes two to tango and at least two to compete for supermarket shelf space. And if indeed the other three companies were somehow sharing a monopoly, it is not much of a monopoly if it allows a competitor to quadruple its market share. If there is no case against Quaker there's no case against anyone. We think the FTC and even much of its staff must know it has been engaging in foolishness.

And very costly foolishness at that. Quaker etimated that "despite efforts to minimize costs by handling its defense 'in house' (we) estimate the direct cost to it alone to be $1,888,405 aside from the nonquantifiable disruptive effects to Quaker's business and the substantial expenditure of taxpayers' money by Complaint Counsel."

Indeed the FTC's staff architect of this effort, Michael Glassman, almost gave Judge Hinkes no other choice when he testified that relief against Quaker "was not essential and would do very little, only make a marginal contribution to increasing competition in the industry," and relief should be pursued only if "it could be obtained cheaply." Dropping Quaker, he said, "would save the public some money."

Does this mean that our bureaucrats in Washington are beginning to sense that their moments of whimsy, as with the concoction of the shared-monopoly theory, involve extraordinary expenses to the taxpaying and consuming public? FTC Chairman Michael Pertschuk says yes, from now on there will be a "cost-benefit analysis" of each FTC proceeding "to make sure consumers are better off than they were before as a result of our action."

But wait a minute! On the very day Quaker finally got out from under the shared-monopoly suit the Federal Trade Commission announced a brave, new proceeding. An inquiry would begin on whether

or not all television advertising aimed at children should be banned altogether. An incredible FTC bureaucrat named Tracy Weston appeared on the Today Show to announce, wild-eyed, that television commercials manipulate little minds and must be prohibited. "Parents are helpless," he said. "Government must help parents, who after all cannot police their children day and night."

Who buys those commercials? Cereal companies. Luther McKinney, Quaker's senior vice president who personally argued the Quaker case on the shared monopoly suit, thus did not get even one day to celebrate. "The advertising ban proceedings," he says, "may take four or five years." ●

TRIBUTE TO THE REVEREND ROBERT I. GANNON, S.J., A MAN OF GOD AND A LEADER IN EDUCATION

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

Mr. BIAGGI. Mr. Speaker, yesterday, in the heart of New York City, spiritual and educational leaders, brother and sister servants of God, dear friends and church brethren, gave a final temporal farewell to one of their own. They ushered to an earthly resting place the remains of a man who had given so much to their world through God's work. As those in attendance heard of the man and his work, prayed for him and those remaining behind, and offered their personal intentions is his name, they shared a special sense of fraternal loss. For Father Gannon, the leader who had guided them well, particularly as a spokesman, often in sermons for the renowned, was no longer directing them from a lectern. But they knew, as men of faith, that Father Robert Ignatius Gannon, former president of Fordham University and elder statesman of the Society of Jesus, had gone to his real home. How very special it must be when one of God's ministry reaches the goal of everlasting life. I am certain that this realization provided the solace at St. Ignatius Loyola Church yesterday. And I am very honored to share with you and my colleagues here today, this memorial salute to Father Gannon.

A native New Yorker, Robert Gannon was born in the city borough of Staten Island on April 20, 1893; he was one of several children in a family of Irish heritage.

In 1909, the young Robert graduated from Loyola Preparatory School in New York, and following which, as a young man, he went on to earn an impressive list of degrees from the outstanding educational institutions of Georgetown University, Woodstock College in Maryland, Gregorian University in Rome, and Christ's College in Cambridge, England. In addition, he was to pursue his studies at the Sorbonne, at Oxford, in Perugia, and Louvain.

The culmination of study and holy preparation was his ordination as an Apostle of Christ and Prince of the Church in 1926. But his work was only to begin.

Significantly, he was assigned in 1930 to reopen St. Peter's College in Jersey City, which had been closed since World War I. He remained as dean of that college until 1936, and during that time he also organized the Hudson College of Commerce and Finance in Jersey City.

It was in 1919 that Dr. Gannon's talents first were to lead him to Fordham University, where he became an instructor and then assistant professor of English and philosophy. It was also during those early years at Fordham that Father directed student dramatics and founded the Fordham playhouse. The Rev. James C. Finlay, the president of Fordham University, remembers him as, "an enormously charming person, a man of great talent and a fine speaker." President Finlay, who was a student at Fordham during Father Gannon's leadership, continues—

He was also a good musician, very much interested in the theater, and did a lot to foster the theater here on campus when he was President.

Father Gannon's presidency of Fordham began in 1936, when his predecessor, the Rev. Aloysius J. Hogan, was transferred to Georgetown University. He remained as head until 1949.

Upon his retirement from Fordham, he served as superior of the Mount Manresa Retreat on Staten Island, during the years 1949 to 952.

His personal attributes and abilities supported him during his terms as rector of two excellent academic schools in New York, the Loyola Prep School and Regis High School. During this same time, this very learned man was also to serve as a model to the flock in the work of a parish priest. Yes, Father Gannon was also pastor of St. Ignatius Loyola Church until 1958. It is a momentous occasion in the church when a leader in God's service assumes the awesome responsibility of directing part of His province and providing the way to the salvation of souls, which was Robert Gannon's sacred raison d'être.

Ultimately in his work as a church spokesman, Father Gannon, served for 6 years as superior of the Jesuit Missions House.

Very specially, Dr. Gannon was to return to Fordham as assistant to the president in the early 1960's to write the history of the great institution, which began as St. John's College in 1841. This work, entitled "Up to the Present," appeared in 1967.

A final mission for the church was his service as retreat master at the St. Ignatius Retreat House in Manhasset, Long Island. He remained at that post until about 6 months ago. He was 84 years of age at the time of his death.

An educator, a writer, and a witty outspoken orator, Dr. Gannon frequently addressed public and religious functions, and was much sought after as an after dinner speaker. He was the author of a well-received biography of New York's Francis Cardinal Spellman, a longtime friend for whom he delivered a televised eulogy in St. Patrick's Cathedral upon the cardinal's death in 1967. Dr. Gannon was also chosen to eulogize Pope Pius XII in the cathedral in 1958, and praised the late pontiff as a churchman who had devoted his life to the defense of civilization against fascism and communism. He also delivered the sermon for the late Frank S. Hogan, former district attorney of Manhattan, in 1974, at St. Ignatius Loyola Church. In one of his last such appearances, Dr. Gannon—still sprightly at 82 years of age—gave the funeral homily at St. Patrick's for James A. Farley in 1976.

Dr. Gannon was a traditionalist in education who did not believe that undergraduates should run a college or devise their own curricula. He outlined his views on the matter in an autobiographical work, "The Poor Old Liberal Arts," published in 1962. Collections of his speeches have appeared under the titles of "After Black Coffee" and "After More Black Coffee." He also wrote "The Technique of the One-Act Play," "The Ten Commandments," and numerous articles that have appeared in various publications.

Although a strong opponent of America's entrance into World War II, Dr. Gannon later changed his opinion, and won public praise in 1942 for declaring before students and faculty members alike:

Today it is humiliating, but many of us are ready to stand up in meeting, and confess, that we were wrong . . . It was our war from the first.

Such was the way of Father Gannon—the advocacy of principle and the courage to do so.

We are paying tribute today to a brilliant and holy man, who gave his example and his leadership to the church, the Society of Jesus, Fordham University, education, and so many that he moved in life. We are saluting a man of God who helped people be better people through the proper spiritual and educational training. We have the greatest respect for the memory of this humanitarian who enabled people to live out days of their lives as best they could. All who were touched by Father Gannon in life could be, through his intercession, truer to themselves, a credit to their particular community, and an important contributing factor to the success of God's service and His work here on Earth.

May Father Robert I. Gannon truly rest in peace. His work is done.

ST. PATRICK'S DAY

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. FARY. Mr. Speaker, March 17 marks a special day in the lives of millions of Irish and Irish-Americans, for it is on this day that those of Irish descent celebrate the feast of the patron Saint of Ireland, St. Patrick. The festivities of this day take many forms, but without a doubt. it is the St. Patrick's Day parade that is the most popular.

The Chicago St. Patrick's Day parade, of which I have been a participant for the past 20 years, draws thousands of spectators in the city of Chicago. The parades in the Chicago area were small neighborhood affairs until later when they were consolidated by the late Mayor Daley in 1956 and the parade route was changed to the world-famous State Street with each year's parade becoming larger and larger until today, Chicago's St. Patrick's Day parade is the biggest event of the year with different Irish societies and counties dressed in colorful uniforms with other ethnic groups joined in their native garb with a touch of green intertwined in their costumes.

Each year a committee of civic leaders coordinate the endeavors of the parade whose activities have grown from a single parade to a series of events including a colleen contest, a coronation ball, and many parade awards given in several categories.

I cannot lay claim to any Irish blood, but each year I have marched proudly in the Chicago St. Patrick's Day parade with my Irish friends. What impresses me most about the parade is the enthusiasm it generates among all the residents of Chicago—those of all ethnic backgrounds and of all ages.

Mr. Speaker, today parades such as the one in Chicago are being held in cities all over America and everyone is busy having a good time. But I wonder just how many people know who St. Patrick was or why he is celebrated in such grand fashion.

Born around 389 A.D. of Brittanic-Celtic origin, Patrick was captured by Galeic pirates in a coastal raid and taken from his father's estate on the west coast of England to Ireland, where he served as a shepherd slave. Escaping to France, he eventually entered the religious life. Sometime in 432, he obtained what had become his deepest desire: To carry the Gospel to paganistic Ireland. Consecrated Bishop of Auxerre, he traveled to Ireland with a company of Celtic monks and began his labors of nearly 30 years—baptizing, teaching, preaching, and founding churches and religious communities. Toward the end of his life, Patrick founded the Holy See of Armagh, which he held as Archbishop and Primate of Ireland until his death in 461.

Soon after his death, the inspiring reality of his life was embellished with many fictional and legendary wonders, reflecting the deep respect in which his memory was held among the people. This respect gradually assumed a two-fold special character which has marked the lives of the Irish people ever since: First, a sincere imitation of the great saint's life and deeds. At his famous shrines in Donegal and Mayo, he is not so much honored by services or prayers as by the hard and often heroic penances which devout men and women perform in imitation of St. Patrick's own life of fasting and prayers. Second, in the course of time, the respect paid to St. Patrick has become identified with the patriotic and national ideals of the Irish people so that eventually his feast became both a religious and national holiday.

Since this day represents the courage and faith of the Irish people, I can think of no better time to pay tribute to the sons and daughters of Ireland who contributed so relentlessly to the building of this great Nation. Of those who signed the Declaration of Independence, nine were of Irish descent and thousands more supported that declaration by fighting for its defense. A century later, Irish immigrants provided much needed manpower for the railroad and mining industries. Today, the talents of Irishmen and their descendents are abundantly evident in such diverse fields as politics, athletics, the arts, and religion.

The warmth and wisdom of the Irish life—indeed, in its very fiber. We can is apparent in every aspect of American only hope that these qualities will prevail in Ireland, and we wish for its people an end to violence, and the restoration of the principles to which St. Patrick himself was dedicated.

To our honorable Speaker, and you my colleagues in the House, and to the Irish-Americans of Chicago and to all those who celebrate this glorious day—a happy St. Patrick's Day.●

HEARINGS BY THE SELECT COMMITTEE ON AGING, DELAWARE COUNTY, PA.

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. EDGAR. Mr. Speaker, on Friday, March 3, the Select Committee on Aging, represented by Congressman MIKE BLOUIN and DAVE EVANS, held field hearings in my district to gather testimony regarding the Older Americans Act. I participated in these hearings which, in my view, were quite productive. For the past few days I have inserted into the RECORD portions of the testimony we received. The 11th and final section follows:

SELECT COMMITTEE ON AGING

Mr. Chairman, I do not plan to go into much detail about how the Older Americans Act should be amended. Mr. Bauer, Mr. Bradley, and others who work within the parameters of this law on a daily basis articulately addressed that issue. I would rather make some closing comments on what I feel was reflected in our deliberations here today.

The Older Americans Act of 1965 was enacted because of this nation's commitment to our senior citizens. This law has worked well, although it has been necessary to provide some fine tuning over the years. As you travel to different sections of the country to hold field hearings, I would urge you and other members of the Select Committee on Aging to remember the special problems of today's senior citizens. They encompass such broad ranging topics as housing, health care, and taxes.

Unfortunately, many people no longer can look forward to retirement. With constant increases in the cost of living and fuel shortages which have become more pronounced in recent years, retirement frequently becomes a question of survival.

Many of the people attending today's hearings saw this country through two world wars. All have experienced the hardships of the Great Depression of the 1930's. They sacrificed for this country, they sacrified for their children, and they sacrificed for themselves so that they could retire, not in luxury, but in security. The fact of the matter is that, for most, the security is not there.

Senior citizens find that today's taxes and utility bills are frequently higher than their mortgage payments ever were. I have here a letter from one of my constituents which is similar to a complaint that I hear more and more. He writes:

"Congressman Edgar, just why can't retired senior citizens receive a house tax break ... A man works hard toward retirement and saves a little so he can keep going on his own. All we ask is a little break to help us along. I have used my life savings and fear that unless something is done to help us, I will have to sell my home of 37 years."

I believe that if we look hard enough, there are ways that we can ease their burden. I have cosponsored a bill, introduced by Congressman Downey of New York, which would provide a tax credit for elderly property owners and renters for a portion of their property taxes.

When today's senior citizens were raising families, the members of their family felt a responsibility toward their parents and grandparents. They provided for them. The problem today is that many middle aged parents simply cannot afford to care for an older member of their family. A bill has been introduced in Congress by Congressman Scheuer of New York to provide a $250 tax credit for every taxpayer housing a relative who is 65 years of age or older in their home. I cosponsored this bill because I believe it will lessen the financial squeeze and allow families the choice of having an elderly relative with them.

Mr. Chairman, the special circumstances of today's world create unique emotional and psychological problems for today's elderly. Forced into retirement and a fixed income, they feel a loss of dignity and, for some, a loss of spirit. I was pleased to cosponsor a bill, authored by Congressman Claude Pepper who chairs the Select Committee on Aging, which amends the Age discrimination in Employment Act of 1967. This bill allows workers the option of retiring at age 65 if they so choose. It bans mandatory retirement in the federal government and extends protection from age-based mandatory retirement in the private sector to age 70. This bill has passed both the House and Senate and is currently before a conference committee where differences in the House and Senate version can be worked out. Although it does not help current retirees, they brought this issue to the attention of the country because they knew the absurdity of forced retirement based on age.

I have been working closely with retired members of the United Electrical Workers on a bill which I introduced, H.R. 4180. This legislation would provide that the duty to bargain collectively includes bargaining with respect to retirement benefits for retired employees. If this legislation is passed, unions will be able to bargain for cost-of-living increases for their retired members. Congressman Frank Thompson, Chairman of the Subcommittee on Labor-Management Relations of the House Education and Labor Committee, has assured us that his subcommittee will hold hearings on this bill sometime in March or April.

Mr. Chairman, we are beginning to recognize the problems of older Americans. The efforts of today's senior citizens will be beneficial to the next generation, just as their

past efforts are beneficial to us today. We have made inroads into solving some of the problems we face in this area. Obviously, much more work is necessary. The Older Americans Act is but one tool we can use to build a better quality of life for retirees.

We appreciate your coming to Delaware County to listen to our concerns, and we hope that the testimony you have heard today is helpful to you.●

PANAMANIAN OFFICIAL DISCUSSES THEIR ECONOMY

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. SIMON. Mr. Speaker, Dr. Nicolas Barletta, Minister of Development of Planning for the Republic of Panama, recently gave a speech in which he talks about the commitment of the Panamanian leadership to private enterprise and responsible management in that country.

I believe that particularly my colleagues in the Senate who are making an important decision regarding Panama, would find it of interest.

The statement follows:

STATEMENT BY DR. NICOLAS A. BARLETTA

It is really a very genuine pleasure and a deep honor for me to have this opportunity to hold a dialogue with you today about a subject which is so important to us and so dear to our hearts. I find very many knowledgeable people and friends here in the audience whom I have known for many years and who perhaps know more about the Panama situation than I; so I am sure that they are going to keep me honest. We think that this kind of communication, like the one we have and we are engaging in tonight, is of tremendous importance and that the exchange of correct information is very basic as we move toward a major change in our relationship—the relationship between Panama and the United States—toward one that would be put on a much more modern basis and much more equal basis as partners in the management and operation of the Panama Canal. It is obviously of utmost importance to our national development and to the consolidation of our identity as a people. Therefore we are grateful for your interest and your participation on this occasion. We think that we must behave as friends who understand each other and who respect each other even when in disagreement. A good deal of the issue, as we see it, is how to achieve our national goals, both the U.S. goals and Panama's goals, in friendship and dignity rather than through imposition of one upon the other. The subject matter reminds me of an experience I had back in 1961 in Chicago, on a winter day like today, when I was a student there. I was parking my car, on a snowy day, and from behind came another car and hit me on the left front fender and smashed it. I came out of the car, very mad, as did the other fellow, who was a black fellow, very mad, too. We began arguing right away about who had done it, and why, and who was at fault and all that. As this fellow heard my accent, he asked me where I was from, and I said, "Well, I'm from Panama," and he said, "Well, I'm from Panama, too." And at that very moment the whole climate changed. We laughed about the whole thing, we began to talk about it as friends, and we settled our problem on the issue. To a large extent, that is really the sort of thing we need to keep in mind as we solve the Panama Canal issue between our two friendly people.

Tonight, I will speak to you about the economic impact of the Treaty on Panama and about the use that Panama is planning to make of the area that will be returned to us almost immediately once the Treaty is ratified. But before we get into the subject matter, I think it would help us all if I give a little background about the Panamanian economy. For those of you who are not really familiar enough with it, the economy of Panama is one of a very small market of 1.75 million people. Our gross domestic product is about 2.2 billion dollars a year. The per capita income of Panamanians is around $1,200, the fourth highest in Latin America. Between 1957 and 1972, for fifteen years, on the average the rate of economic growth of Panama was 8 percent in real terms, the highest in the whole hemisphere for that period. However, that performance has not kept us from having a persistent level of inequality among our peoples, especially when we compare urban and rural standards or even when we compare some social groups within our urban areas. This is a typical problem we are all familiar with in developing countries. The nature of the country, then, is one of a small country and of a small market and that tells us that in order for Panama to continue to grow and develop successfully, it will need to do so as an open economy relating itself to larger markets within the area and, indeed, with the whole world. We are pointed in that direction, that is, our solution for improving our material level of well-being as a people needs to go the route of a Switzerland or a Sweden or a Belgium or a Holland, not only because of the small size of the market but because we have certain things in our favor; that is, our geographic location, which is really the subject we are talking about today as we talk about the Canal, and the history and tradition of Panama over the last 400 years. So we need, then, given this nature of the country, to achieve growth and distribution of the benefits of growth among our people under those circumstances, which are very special ones. We have now had two and a half years of economic recession, which is longer than it should have been. The main reasons for this recession, in our opinion, are the following:

First, because the sources of growth that were moving the Panamanian economy at such a rapid pace up to 1972 began actually to dry up after 1971, that is, the export of traditional goods and the substitution of primary industrial goods was beginning to lose dynamism as we entered the 1970's; secondly, the problem we all know about, the world-wide problem of an inflationary and recession cycle and the whole petroleum crisis; thirdly, some social legislation that our government approved as part of our desire to improve the participation of our people in our development, but which in the final analysis created enough friction in some areas that it also tended to make worse the whole situation that we were facing—legislation, for example, especially in the area of labor-management relations; and fourthly, and important in the last year of 1977, the whole uncertainty created among investors and producers, both domestic and foreign, with respect to whether Panama and the United States were going to come to a solution about the Panama Canal. In the midst of this situation, then, I think I can summarize and say that Panama over the last few years has engaged in three very major and very difficult and delicate objectives: one, to try to consolidate our country and integrate our country through the negotiation of a new canal treaty with the largest power in the world; second, to keep on as creatively as we could, transforming the social structure and the nature of our development pattern in such a way as to allow for the participation of all the Panamanians in the process of development; and third, to recover a rate of growth and diversify our economy in such a way that we may get ourselves back onto a path of growth and distribution that could be satisfactory to our needs. All of us, especially those engaged in economic affairs, can clearly see that for a small country like Panama, these three very ambitious objectives are difficult indeed and require, as we have tried to do over the last few years, a policy of achieving the maximum unity of purpose among our people so that we may be successful in achieving these goals.

I think it would be useful now for me briefly to point out to you Panama's performance in some of these areas, especially because recently we have heard that around the United States certain people are talking about some failures with respect to the Panamanian economy. In the social area, I think we can say that in the past nine years, Panama has increased educational facilities by 70 percent, especially in the rural areas and with special emphasis on the rural areas; we have increased our health facilities for all of our people by 65 percent; we have introduced nutrition programs for our children, especially in some of the poorest rural areas of the country; we have projected housing programs for low-income people that triple the rate of construction of this type of housing from what it used to be several years ago; we have carried on an agrarian reform program that has benefited 15,000 Panamanian rural families; we have increased by 500% agricultural credit, especially for small farmers in cooperatives and in small individual units; we have increased road constructions of the permanent kind and especially feeder roads by 45 percent; we have stimulated and organized small rural enterprises to increase the participation of these people in such a way that by their own efforts they could help improve themselves, and we have created a new political environment and a political system that tends to enhance the participation of people in the solution of their own problems, especially at the local level. I can also say that in the growth area or in things that tend to be related to growth, Panama is now engaged in the development of at least 14 major projects of quite substantial size for our dimensions as a country; these are an effort to open up our economy, to increase and diversify our exports, to open up new sources of growth where private investment could be profitable, and to generate employment for our people. There are in such areas as a brand new airport, which is almost finished; the construction of container ports, one of which we are ready to begin building; the construction of a fishing port; the completion of one hydroelectric plant and the beginning of the construction of two new ones; the construction of tourism infrastructure; the creation of an inter-American banking center of quite significant importance; the construction of the Darien highway, which is part of the Pan American Highway, opening up one third of our territory and the possibility of utilizing the forest resources there for our development, and the expansion of activity in the free-zone.

We are almost ready to make the final decision on the initiation of a copper project with an ore which is the fourth largest in the world. Still other activities include the construction of some sugar mills, which unfortunately, we must admit, have problems today because of the sugar market; the carrying-on of educational programs at the university level, at the polytechnical-institute level and in production schools, which is quite significant for the development of our people; the contracting of an oil transhipment facility where oil from Alaska is being transported and transhipped from large containers to smaller ones that will go through the Panama Canal. These are, then, some examples of the kind of things we are trying

to do for ourselves; they are all underway today and open up new opportunities and sources of growth for our economy. In short-term policy, to try to get out of the recession we have undertaken legislation that changed labor-management relations so as to enhance the opportunity for more productivity; we have introduced export and investment incentives; we have improved price policies that tend to help production in certain key areas; we have maintained a very high level of public investment to try to combat the recession; we have strengthened the financial infrastructure of the country by, among other things, creating a development bank, which was needed in our financial structure, and we have been able to bring down the inflation rate over the last three years.

But on top of all these things the truth of the matter is that the recession has continued beyond what its momentum should have been, largely because of the slow recovery of the rate of private investment, both domestic and foreign. It has been prolonged more than it needed to be and part of the reason for this, as I said before, has been the uncertainty with respect to whether Panama and the United States were going to come up with a new treaty that established the relationship on a new modern basis for the future. Since it became known in August that we had a treaty, since it was signed in September and ratified by Panama in October, and since recently the news seemed to suggest that prospects for ratification by the U.S. Senate are improving, we already see some reaction of investors with respect to several projects that we know they have been holding back.

In short, then, part of our strategy for development, which I am trying to summarize very briefly here, is important because everything related to the Canal and to the new Treaty fits into that picture. We are trying, then, to do four or five major things: first of all, to consolidate the economic benefits that Panama gets from the utilization of the geographic location—this will become evident with some slides I will show in a couple of minutes; secondly, to open up the utilization of new natural resources in some of the areas I have already mentioned to you; third, to take advantage of the real opportunities we still have in the area of agriculture and industry, and fourth, to concentrate a very significant effort in the development of human resources.

I would like, then, to concentrate now on the meaning of the geographic location for Panama, because that brings us close to the subject. The geographic location means to Panama the following: First of all, the export of services valued at the end of 1976 at $400,000,000. It is our impression that with the consolidation of many of the projects I am about to mention, we can double these exports of services for the Republic over the next 5 to 8 years, depending on our performance and how rapidly we get it done. The geographic location means basically two things. First, it means transportation systems. Foremost among them, of course, is the Canal; then there are the new airport, container ports in the Atlantic and Pacific, the railroad, the fishing port and the oil pipeline, which perhaps may come into being over the next 10 to 15 years. Secondly, it means the development around these transportation sytems, which give economic life to our geographic location by providing a service needed by the world, of complementary businesses closely related with those transportation systems.

Among those we have the following: the servicing of the ships that go through the Canal, of course, by selling them fuel and food and by providing ship repairs, maintenance and tourist goods; expansion of free-zone activity; industrial processing near the Canal site of goods that can be shipped back; businesses engaged in tourism; international banking businesses; creation of an insurance and reinsurance center for Latin America; communications services; Panama-based regional and subregional management offices of many international businesses that serve the area; the merchant marine and other such diversified commercial activities. This is then the setting in which we need to analyze the economic impact of the new Canal Treaty upon the development of Panama. We can summarize the economic impact in the very short run and medium run of the Canal Treaty in three points. The first one is the improvement of the expectations of investors and producers once they have seen that this major uncertainty has been settled between our two countries and they will be ready to begin moving—as I said they almost have begun in some cases—many projects that they have been holding back, waiting for the resolution of this problem.

Secondly, the revenues that Panama will be getting, according to the new Treaty, which are in recognition of what is due by virtue of the inputs that Panama has contributed to the Canal operation in terms of land, water and the geographic location itself, will help us to consolidate this very large and ambitious investment program that we have carried on for the last three years to open up these opportunities I have mentioned previously.

Thirdly, the utilization of the lands and waters that will be returned to Panama fit perfectly well in this area of the consolidation of the economic value of our geographic location. But I think I can make all of this far clearer to you and far more interesting if you will allow me to show you some slides of what we mean, so that we can see it in the area.

(Showing of slides—request to turn off the lights)

We are quite familiar, then, with the importance of our geographic location in the hemisphere and the world. This is a map of Panama. As you know here is the Panama Canal. The Canal Zone area, Panama City on the Pacific, Colon on the Atlantic. This is the area of the Canal and the Canal Zone as it stands today, and the Canal Zone borders. You can see the tremendous importance of the lake, which is the basis of operations for the Canal. As you know each boat that goes through the Canal takes 54 million gallons of fresh water and that is the basis for this lake. As you can see here a good deal of the watershed of the lake is in Panamanian territory under our jurisdiction today, on both sides; so the protection of this watershed is one of the key important elements of what we are trying to do today and what we will consolidate under one administration once the new Canal Treaties are ratified.

Let me show you that a little better. Here is the same idea. We will convert all this middle area that goes deep into Panama as it is today, outside the area of the Canal Zone into a huge park kept under forest for the protection of the watershed for the Canal. This is of tremendous ecological importance and helps protect the water sources for the Canal operation. So all this middle area we will hardly use for any other purpose except for the protection of the watershed for the Canal. The main economic value to us, then, is going to be in the areas around Colon City and Panama City, which I will show to you briefly. This map here shows you the borders of the Canal Zone today, on both sides, and how things are going to look once the Treaty is ratified. The pink area shown here is what will be kept for the next twenty-three years under U.S. administration of the Canal operation, which is the land absolutely necessary for the maintenance and operation of the Canal. The brown areas are for the defense areas that will be under the U.S. military also for the next twenty-three years, on both sides. The red areas are the areas where the American civilians operating in the operation of the Canal are living and will continue to live until their retirement over the next few years. The green areas are under joint administration and all the white areas, that is, 67 percent of the total land is being returned to Panama immediately.

Let me show you then a little bit in detail what we mean by that around Colon City and Panama City and how we are going to use it. Here is Colon City which as you can see is totally enclosed by the Canal Zone today. It is a city that has been stagnating for over two decades, among other things because we have not been able to keep on expanding the opportunities for economic activity around this area and for urban development in such a way that it could be a city more fully amenable to living and working. To take full advantage of some of the things I have mentioned to you before, let me show you a little bit more what we mean on the following map. Here is the summary of some of the plans we have ready to go as soon as the Treaty is approved. Here is Colon City, here is the Free-Zone in 40 hectares which are totally utilized today. We are ready to expand the Free-Zone right here, immediately. We are ready to build a container port right here, next to the Free-Zone; we have the financing and the plans and everything ready to go with a group of Canadian firms. We will use this airport area, which is totally unused today. By the way, all this land is totally unused today by the Canal Zone for anything related to the Canal or anything else. All of this will come to Panama right away. We will then use this area for location of industrial activity that could not only use the airport but the ships for the transportation of the goods. The yellow areas will be dedicated to urban expansion and housing programs for higher-income groups and lower-income groups and these dark areas will be used for recreational purposes, for the people of Colon City. Also here, these port facilities, which will be returned to Panama with the new Treaty, and the dry dock located right here which we can use for ship repair and maintenance—it is not used at all today except to some small extent, part of the time but very little, for the repair of the locks of the Canal—we can employ up to 1,000 to 2,000 Panamanians in ship repair and maintenance in these dry dock facilities. So in summary, around the Colon area then, we would be employing immediately, with the plans we have ready, some of the land for economic, commercial and industrial expansion for urban development and for recreational facilities.

Let me show you then a few pictures that present this case perhaps a little better. Here is Colon City today, which is a very crowded place; here is the Free Zone, which is totally occupied today; here is the area which is totally unused where as I said to you before the Free Zone will be expanded. Most of these buildings are empty and are not used; we are going to locate the container port right here; back in this area, which is totally unused, is where some of the residential land will be utilized.

This is another view, from the Port area; part of Colon City, the Free Zone right there, and the green unused area in the background where the Free Zone and the industrial area will be expanded, next to the container port. Part of the services that will be returned to Panama is the selling of bunker fuel to the passing boats, shown here.

Let me show you then a little bit more of the same around Panama City. Panama City is right here. It has had to grow long and narrow like a hot dog—most cities tend to grow round in order to save on location and transportation services. Panama City has grown in this way, far beyond its population size, because of the limits of the Canal Zone.

Let me show you then some of the things we are ready to do around Panama City as soon as the Treaties are ratified. Again, here is the city, expanding way out here to where the new airport is located. This is the area of the port facilities that will be returned to Panama. Here is where we are going to build a container port immediately; there is already demand for it by international shipping companies. Here are the dry docks that we will also use for ship repairs and maintenance, employing between 1000 and 2000 Panamanians. Here is Albrook Field, which is totally empty and unused today; we are going to use it as part of the area of industrial and commercial and service expansion around the port facilities, which together with the railroad, which goes right there, will communicate with the other container port and the two container ports with the railroad eventually, not immediately, but eventually will become a complementary system of transportation to the Canal giving access to larger boats that cannot use the Canal today. Also, urban expansion will take place in this area—the yellow area right here, allowing our city to develop in a more rational manner. Some recreational facilities will also be built; we are ready to build a 120-acre park right here—this is a forest—for the benefit of our population, to take their families out on weekends. These three islands here will also be used as park area at the entrance of the Canal; perhaps construction of a hotel will be allowed here. These are then some of the examples of how we are ready to carry on some of our plans right away, as soon as the Treaty is ratified, in the area of Panama City. Let me show you some pictures. Here is a view of Panama City; the entrance to the Canal over there and the growing Panama City here. Here is the entrance to the Canal. Just a view of part of modern Panama.

Then we can see here how congested some of Panama City area is against the land back here in the Canal Zone which is totally unused or very little used at all. These are some of the slum areas that we are clearing up by these kinds of buildings, which we can continue to build in some of these areas that will be returned to Panama. This is the same here. These are low-income housing built through financing by the public sector by private enterprises and they are sold to the people that inhabit them. This is medium-income housing that has grown tremendously over the last 10 or 15 years. Again here is area in the Canal Zone totally unused, where we can expand our urban development in a more rational manner.

This is part of the same here. There is Panama City, fairly crowded in some areas, and some of the empty land in the present Canal Zone which we will incorporate into our projects. The same here, the same thing. Here is Albrook field, which I mentioned to you, not used at all today; it goes all the way down to the port areas where we will locate, then, a whole area for industrial and commercial activity and service areas close to the ports and in connection with the railroad that goes up to Colon.

Again this is a little bit of the same. Here is Panama City and the empty areas in the Canal Zone which will be returned to Panama. Here is the bunkering area that is used for servicing the passing ships.

Here is the port area. Here is where we are going to build the container port, next to the port area, which is right here. These are the dry docks, a big one, a medium-size one, which we will utilize for ship repair and maintenance and where a good many Panamanians will be employed, right at the entrance of the Canal. Here is the first system of locks on the Pacific side. There is Panama City out there and a good deal of the green area, part of which will be returned to Panama. These are some of the areas that will be retained by the Americans living there today; the same thing here, part of the defense establishment. Those will remain pretty much as they are, but the empty areas over there will be returned for the purposes we have outlined before.

Let me just conclude this part before we open up to questions, by showing you a little bit of what we meant before. This map here, with all the sexy colors, tries to show you the results of a systematic analysis of the level of material well-being of Panamanians, done on a district-by-district basis, that is, the level of poverty in Panama. The darker the colors the greater the level of poverty of our people in those areas. The lighter the colors the higher the level of material well-being. The highest, of course, is in the areas of Panama City and Colon City.

We have used this information, then, to develop our programs for rural development, for education and health, and integrated rural development in recent years, which are now beginning to go into effect. And what I would like to show you in addition to that, on this other map, is how that is being partially done with the participation of all Panamanians. In this map, you have the total public sector investment program for 1976. Each one of these dots is an investment project. It may be a road, it may be a school, it may be an aqueduct, it may be any of those other small projects or larger ones developed through the whole country. I do not know if you can see it clearly, but the red dots, which are more than half of all these dots, are projects which have been constructed on the basis of the request to the people living there through their elected representatives; that is, a good deal of the investment program is prepared with the elected representatives of the people in all these areas, who consult their people about their needs and then all this is incorporated through our provincial plans which are then made part of the national plans. A good many of these projects are also done with financing partially contributed at the local level. We complement that financing with the national budget. Again, this is another example of some of the things I mentioned to you before.

But, then, this is taking us away from our central subject which has been how we are going to use the Canal area returned to Panama and the economic impact as soon as the treaties have been ratified. I think that for questions not only on these subjects but on other subjects where Dr. Lopez here present could help us, we would be very glad to give you some answers. We can turn the lights back on.●

LARRY WINN—ON THE SPACE PROGRAM

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. FUQUA. Mr. Speaker, Congressman LARRY WINN, the distinguished ranking minority member of the Subcommittee on Space Science and Applications of the Committee on Science and Technology, addressed the National Space Club on February 15, 1978. LARRY WINN has served diligently over the past 12 years as a member of the committee and has become highly knowledgeable on all aspects of our national space program. Because of the significance of his remarks, I am including them in the RECORD, for the benefit of my colleagues and the general public:

THE NATIONAL SPACE CLUB

Good afternoon, ladies and gentlemen. It is a pleasure to be here. I would like to take this opportunity to share some thoughts I have had regarding the long term future of science in general and specifically the U.S. space program.

In the past two decades, we have witnessed a virtual revolution in the areas of science and technology. A revolution that has been a fine display of what this nation is founded upon—technological innovation. It seems obvious that this is one of the most valuable and marketable commodities that this Nation has to offer to the world. This characteristic is founded within the moral fiber of the American public and can be traced to the very founders of this Nation.

Unfortunately, it appears that we are encountering a period when policy decisions are made that do not take that characteristic into account.

The most obvious example of this is the so-called national energy plan. This plan makes no attempt to exploit the innovativeness of this nation's engineers and scientists. In fact, that policy literally turns its back on the potential of this nation's technological capabilities by basing the plan on conservation. I don't have any qualms at all with emphasizing conservation. But conservation without an equitable balance of production is only prolonging the inevitable—depletion of our natural resources.

Every time I discuss this policy, I can't help but recall a cartoon I saw years ago in Readers Digest—

"The cartoon depicted a very frustrated husband attempting to pay the monthly bills. However, he is encountering one purchase after another that has been in response to some sort of sale. Save 20 percent here and 50 percent there. Finally, he throws his hands up in disgust and declares he cannot afford to save any more money."

The same situation exists with the energy plan—we cannot afford to continue depleting our energy resources without finding new sources of income.

I didn't come here to talk about the Administration's energy policy. I came here to share some of my views about the long term future of science and space. However, at this time in our history, I feel that the philosophy that is being expressed within the energy plan is reflective on the policy associated with the space program and consequently the future of science.

For several years now we have been groping for some well-defined direction to proceed with in our space program—if there is such a thing. But unfortunately, that direction does not seem to materialize. Every year brings a new set of problems that demand a major portion of the National commitment and every year we continue to waste away our most valuable National commodity—technology. This slackening in a total commitment invariably results in a new round of rationalization about how we are the world leaders in aerospace technology and how everyone has to tighten their belt and establish priorities.

The whole process reminds me of the race between the tortoise and the hare. We keep telling ourselves that we have plenty of time, we've got that tremendous speed, we can overtake the world whenever we want.

I don't mean to sound so negative about the Federal policy or appear overly critcial of this Administration (even if they do deserve it). This is a problem that every Administration has had. The technical programs seem to be the first to feel the tightening of the belt. From a fiscal point of view, it really seems a little ridiculous. The total research and development funding, both civilian and defense, represents less than 10 percent of the Federal budget, the civilian portion accounting for 1 to 2 percent. But we

continue to hear the same old arguments—the American public will not support a large space program.

In all good conscience though, I feel I must challenge that reasoning. If the American people are willing to accept a Health, Education and Welfare budget in excess of $200 billion I am quite certain they will support a sizable increase in the expenditures for science and technology.

In fact, as policy makers, I feel quite strongly that we owe it to the American Public to make that investment. The reason is quite simple—the only way we, as a society, are going to continue our prosperous existence is by investing a fair share in our future. I am not implying that we should begin spending $200 billion on R&D. I am saying that if, as policy makers, we do not recognize the significance of technology as a tool for solving societal problems and make reasonable commitments to the development of that technology, then we can count upon a continual decline in our standard of living.

Our investment in space or research and development should be viewed in the same fashion that an individual plans his personal retirement plan.

The individual is confronted with a dilemma when he begins to plan for his future. On the one hand he must cope with providing for the immediate needs of his family in the event of a crisis. On the other hand though, if he makes it to retirement then he must have some means to provide for a comfortable living.

Financially, the individual goes through three phases. The first phase is an infantile stage where the benefits of the program don't appear adequate to the individual to warrant the cost. The second phase represents the maturing stage. Here the individual recognizes the benefits of the program and makes a philosophical commitment to the framework but is just unable to pay for the total program. The significant aspect though, is that he has made a commitment. The ideal program would be made up of a nice whole life insurance policy that provides immediate short term protection, plus maximum long term benefits. Unfortunately, tihs cannot be afforded—the commitment is made, but it just is not financially practical. As a consequence, compromises must be made. Instead of buying all whole life the individual buys a combination of term and whole life. This provides the short term protection while holding onto the long term options at an affordable price.

The third phase would be characterized as a mature phase where the individual can afford to take advantage of the long term options that he guaranteed himself in phase two. Because of returns on the small investments he made in phase two, he can afford to exercise his options on the long-term benefits.

I hope by this time it is obvious that I am drawing an analogy between this insurance/retirement program and the United States' space program.

The first comparison that should be drawn is between the formulation of the program and the scientific community. In this case, I see the scientific community as the architects and salesmen of the program. The Congress and the American public being the customers. We have had these salespersons appear before the House Science and Technology Committee many times. I feel they have adequately formulated a broad based philosophical plan to provide for both the long and short term problems. The framework for that plan is represented in the Committee report entitled "Future Space Programs 1975" and I am certain a similar plan will arise from our most recent hearings on future Space Programs. For the short term it includes such things as remote sensing of Earth resources, space communications and space manufacturing. In the long term it includes such things as: space colonization, solar power satellites, and mining of the Lunar surface and asteroids.

Phase one of the financial dilemma, the infantile stage, can be related to the race for the moon. Here is where the customer has finally recognized the benefits of the program. He sees those benefits and utilizes them every day.

I sincerely feel that the American public is sold on those benefits. We live in a sophisticated, highly educated society and we are kidding ourselves if we don't believe this. Anytime you see farmers utilizing remote data links to central computers to control their irrigation systems and cattle feed rationing, it is obvious they can see the benefits of the total program.

That brings us to phase two of the financial dilemma. In the insurance plan the individual made the philosophical commitment to the plan or program and then proceeded to make financial compromises that maximized the short and long term benefits. This represents the problem we face today with the space program.

First, and I feel most importantly, we are not making the philosophical commitment to the plan. This may seem insignificant, but it is imperative to have a goal to shoot for. We all know that times and circumstances may warrant modifying those goals, but at least we have something we can focus on. It is important, when you are hoeing that very long row to be able to look at the end of the row and say,

". . . that's where I am going . . ."

and look back and say,

". . . that's where I've been."

Second, our plan seems to be leaning towards too much term insurance. In other words, we need more long term commitments. I don't want to sound like I'm condemning the space applications program. That is the furtherest thing there is from the truth. I have been crusading for space applications for years and I'm gratified to see the emphasis placed upon it. However, I am committed to the whole plan which must have a fair and reasonable balance between the short and long term aspects.

The third phase of the program is still in the future. But today was the future yesterday. We must prepare for the future today. I am firmly convinced that the continued prosperous existence of man is rooted within our technological capability. We as policy makers must recognize this if we are to plan properly for the future.

In summary, I would like to restate that there are two rudimentary problems which we as policy makers face regarding the space program.

First, and most important, we have not made a philosophical commitment to a plan. This commitment will provide a focal point for American technology and perhaps even smooth some of the economic peaks and valleys in the aerospace industry.

Second, in proportion to the Federal budget, we are not investing enough. I don't want to imply that there is a direct correlation between money and the accomplishment of the objectives of the plan. We must be realistic and recognize that the money must be spent in a way that maximizes its effectiveness. We can drive technology only so fast; it cannot be forced. This is my way of saying that I could not support arbitrarily making huge increases in the NASA budget. It must be accompanied by very sound, well-thought out planning.

What is the right amount of money to be investing? I don't think there is a unique number. It fluctuates depending upon the times. However, I am certain that the amount is considerably more than we are currently spending. In addition, we are fooling ourselves if we continue to think the public won't support an increase. Sometimes I think the public probably has a better perspective for these long term aspects than the policy makers. The public tends to be more removed from many of the nuts and bolts details and can see the big picture much better. It is like that proverb that says:

"When you are up to your neck in alligators, it is hard to remember the purpose was to drain the swamp."

Let me again say it has been a pleasure and honor to speak before you today.

Thank you very much.●

HEARINGS BY THE HOUSE SELECT COMMITTEE ON AGING—DELAWARE COUNTY, PA

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. EDGAR. Mr. Speaker, on Friday, March 3, the Select Committee on Aging, represented by Congressmen MIKE BLOUIN and DAVE EVANS, held field hearings in my district together testimony regarding the Older Americans Act. I participated in these hearings which, in my view, were quite productive. For the past few days I have inserted into the RECORD portions of the testimony we received. The 10th section follows:

HOUSE SELECT COMMITTEE ON AGING

Good morning. The Delaware County Office of Services for the Aging (known locally as COSA) is an office of County government and has been designated by the Office for the Aging, Pennsylvania Department of Public Welfare as the Area Agency on Aging for Delaware County.

As the Administrator of the Area Agency on Aging, or COSA, I have had the day-by-day responsibility for implementing provisions of the Older Americans Act. As such, I have seen the significant progress made in the three years COSA has been in existence, but I have also felt the frustration of senior citizens and those concerned for their welfare at the unmet needs in our communities and at the tremendous challenges that lie ahead.

Before addressing specific recommendations on the reauthorization of the Older Americans Act, I would like to outline the activities of COSA, the Area Agency on Aging in Delaware County. I do this because my perception of the Older Americans Act has been shaped by the experience in Pennsylvania and here in Delaware County and also because the Area Agency on Aging concept as it evolved in Pennsylvania is, at least in my understanding, significantly different than the development in most other states.

While there is great diversity among the 48 Area Agencies on Aging in Pennsylvania: Urban—Rural; Single County—Multi County; Public—Private non-profit; and Contract services—Direct service provision. there are certain common factors which I believe have contributed to the unique characteristics of Area Agencies on Aging in Pennsylvania and to the success we have had.

INTEGRATED FUNDING

Funds are allocated to COSA and other Pennsylvania Area Agencies from Title III (Community Services), Title V (Senior Centers), Title VII (Nutrition), and Title IX (Employment) of the Older Americans Act. In addition, funds reserved for aging in the State Plan for Title XX of the Social Security Act and State funds appropriated by the Legislature are included in this allocation

The allocation formula is based on the number of elderly poor in each Planning and Service Area.

This allocation process accomplishes two things: First, it allows for an equitable distribution of resources. More importantly though it channels all Older Americans Act funds and other dollars, Title XX Social Security Act and State appropriations, earmarked for aging programs through a single community agency, the AAA.

These funds, together with County and other local funds including senior citizen contributions, are combined in one central budget or "pot" at the Area Agency. They can then be mixed together and reallocated to service providers according to the needs of that particular service population.

One of the advantages of this approach is that Title XX Social Security Act funds can be mixed with Older Americans Act funds and spread throughout a variety of services. In so doing, no one program or service site is identified as a Title XX program. Rather, Title XX funds are distributed throughout most services with each service then requiring a percentage of its recipients to be eligible under Title XX eligibility guidelines. Due to the advocacy efforts of many senior citizen groups, the restoration of group eligibility contributed greatly to the effective use of Title XX funding for senior citizen services.

Centralized local administration of all Older Americans Act funds by the Area Agency and coordination with other available funding sources as demonstrated in Delaware County and Pennsylvania has resulted in expansion of services and the development of new services with minimal administrative costs. Consolidation and administration of these various Titles through the Area Agency has prevented the duplication of administrative functions that would have resulted if these funding sources were administered separately. Management functions such as planning, monitoring, reporting can be combined for all funding sources. In fact, the Area Plan and Contract serves as the single vehicle to encumber these funds. Previously, three separate proposals generating three contracts, invoices, reports, etc., had been required.

I think this experience has clearly demonstrated the efficacy of administering all Titles (III, V, VII, IX) of the Older Americans Act through the Area Agency on Aging. This strengthens the concept of the Area Agency as the focal point for coordinating other available funding sources and pooling resources, public or private, that are available to meet the needs of elderly in the Planning and Service Area.

The importance of pooling resources and access to funding other than the Older Americans Act is underscored by the fact that in Delaware County Older Americans Act funds represent less than half the budget of the area Agency. Collectively, the four Titles of the Older Americans Act represent 43 percent of our total budget. Title XX is our single largest funding source, larger than any single Title of the Older Americans Act, and represents 33 percent of our budget.

We have begun working with local agencies to attempt the coordination of other funds which are available for services to senior citizens. An example is Urban Mass Transportation Administration Sec. 16(b)(2) funds which are available for capital expenditures for transportation for senior citizens and the handicapped.

Non-federal funds available through COSA, the AAA, were used to provide the local match required for community non-profit agencies to obtain vehicles under UMTA Sec. 16(b)(2). Operating funds for some of these vehicles will be provided through Older Americans and Social Security Act funds allocated to COSA.

At the local level, we will depend increasingly on pooling resources in this manner to expand services.

INTEGRATION OF SERVICES

The consolidation of Older Americans Act funding in the Area Agency and the pooling of other resources as described above has allowed the development or expansion of services to proceed according to demonstrated community need rather than along categorical program lines. Since services were funded from a single source, the AAA, there was an immediate awareness of that program's relationship to other service providers. A higher degree of coordination among community programs was possible because of the central role played by the Area Agency in allocating resources.

While there is not necessarily a casual relationship, the ability to allocate resources certainly facilitates the ability of the AAA to develop a coordinated, comprehensive service system. If the mandate of the Area Agencies on Aging to develop a coordinated, comprehensive service system is to be renewed in the reauthorization of the Act, they must be given the clear authority and the resources to carry out that mandate. Consolidation of funding through the Area Agency is one important element needed to successfully carry out that mandate.

CONTINUUM OF CARE

The Older Americans Act requires that each Area Agency administer the development of a comprehensive, as well as coordinated, service system. Thus, a range of services have been made available to older persons in need in Delaware County. These services include:

Supportive Services: Information and Referral, Case Management, Protective Service, Transportation, Legal Services, Outreach.

In-Home Services: Homemaker Services, Chore Service, Home-Delivered Meals, Home Health Services.

Senior Center Services: Group Meals, Socialization/Recreation, Transportation, Nutrition Education, Counseling, Health Screening, Shopping Assistance, Volunteer Opportunities.

Extended Living Services: Foster Care.

Other services provided by COSA include a Senior Employment Program funded through a contract with the National Council on Aging which provides part-time employment and training for 50 senior citizens, a Foster Grandparents Program funded by ACTION which enrolls 70 senior citizens, and a Home Weatherization Program.

This continuum of care recognizes the diversity of need which exists among the elderly. Is the problem of isolation or loneliness which can be met through a senior center any less valued than a need for legal services, transportation, or homemaker service? Should our approach to services be prevention-oriented rather than treatment-oriented? The approach taken in Delaware County is to attempt to balance these approaches.

The development of a comprehensive, coordinated system requires the involvement and cooperation of local service agencies. Seventy-six percent of the funds encumbered in the 1978 Delaware County Area Plan have been allocated through contracts to community agencies for service delivery. Services will be provided through eleven separate contracts totaling in excess of $1.3 million dollars. The remaining services provided directly by the Area Agency include the supportive services excluding Legal Services and program administration. This mix of contract and direct delivery of services has worked well.

In 1977, this range of services was provided to 5674 separate individuals. Some persons may have received service only once during the year, while others received service on a daily or weekly basis. In addition, over 10,000 individual contacts were made by our Information and Referral Unit. Other services provided ranged from 170,000 congregate and home-delivered meals served, 40,000 hours of Homemaker service provided, 65,000 passenger trips in transportation, the opening of three new senior centers, to the successful placement of two persons in our new Foster Care program.

While we have seen major achievements in the provision of services to senior citizens in Delaware County during the last four years, one fact has been clear from the outset. That fact is that there does not appear to be any way in which COSA alone can meet all the needs of Delaware County's 95,000 senior citizens. Each small success is overshadowed by the reality of unmet need; unmet which we cannot hope to meet in the foreseeable future.

An Area Agency cannot meet the needs of all senior citizens directly and neither can the Older Americans Act alone resolve the problems of older Americans. What is made possible by the Older Americans Act and Area Agencies on Aging is the development, expansion and coordination of services for those most in need. Perhaps most importantly, the Area Agency on Aging will have to become a strong advocate for the elderly.

The Older Americans Act in its declaration of objectives in Title I set forth a ten-point program to provide older Americans opportunities for full participation in the benefits of our society. As stated in the Act, the objectives are to assist older people to secure the full and free enjoyment of:

1. An adequate income
2. The best possible physical and mental health
3. Suitable housing
4. Full restorative services
5. Employment without age discrimination
6. Retirement in health, honor and dignity
7. Participation in civic, cultural, and recreational activity
8. Community service
9. Immediate benefit from research
10. Freedom and independence

Clearly, these objectives have not been attained; however, this does not mean that the activities sponsored by the Act have been failures, or that the objectives need to be changed. These objectives set out goals which will require fundamental changes in our institutions. There has been progress toward these goals in the thirteen years since the Act's passage—progress which has been spurred by the existence of the Act.

While progress is being made toward these societal goals which will benefit all older Americans, we need to direct our attention to those older Americans who are most in danger of losing their independence—those persons who are most vulnerable.

It has become popularly known that a major transformation of our society is occurring. Popular magazines have termed it The Graying of America, or Growing Old in America. Simply put, there are more older Americans than ever before, and both their numbers and their percentage of the population is increasing significantly, particularly among the very old.

In Delaware County, we are rapidly approaching the point where the resources available to meet the service needs of senior citizens are exceeded by the demand for these services.

We can expect this demand to continue to increase as the population of older persons increases and as the availability of services becomes even more widely known. The 1970 Census established that there were 86,000 persons age 60 and over in Delaware County. An update furnished by the Administration on Aging estimated the 1975 population age 60 and over to be 95,000. The reality is that we will be unable to meet the needs of many persons who turn to us. With the advice of

our Advisory Council, we will have to attempt to identify those who are most in need.

The Act does not seem to recognize the problem of scarce resources. The 1973 Amendments make reference to full and special consideration for older citizens with special needs and that priority is to be given to the elderly with the greatest economic and social need, but does not provide any further definition.

In light of attempts by states such as Pennsylvania to develop a target population concept, and recently by the Federal Council on the Aging to develop a policy focusing on the frail elderly, it is appropriate and necessary for the reauthorization of the Older Americans Act to discuss and define those special needs to which we should give full and special consideration. The present lack of clarity regarding criteria of need and the increasing demand for service has led to unrealistic expectations for service. Criteria of need and the intent of Congress should be clearly spelled out.

SPECIFIC RECOMMENDATIONS

1. Administration of Older Americans Act Titles.—All titles of the Act should be administered through the Administration on Aging, the State Unit on Aging, and locally by the Area Agency on Aging. The Area Plan should be the vehicle through which these funds are administered at the local level. In this manner, the Area Agency will be a central focal point for coordinating all available public and private resources.

2. Local Decision-Making.—The responsibility of the Area Agency on Aging for determining the need for social services within the Planning and Service Area should be strengthened.

The Area Agency staff and Advisory Council are best able to identify local need and to develop an Area Service Plan to meet those needs. The Area Plan provides an opportunity for the State Unit on Aging to review the adequacy of such a determination of need.

Local discretion in determining need can best be strengthened by consolidating the Older Americans Act Titles into one comprehensive grant administered by the Area Agency. The Area Agency, working through its Advisory Council and utilizing public hearings, would make decisions on priorities based on local identification of needs.

3. National Priority Services.—The setting of national priority services within the Act seems inconsistent with the intent for local determination of need. National priority services should be eliminated and left to local discretion.

If national priority services are mandated, there should be no requirement that specific percentages of budgets be expended in those areas, but this determination be left to local discretion.

4. Non-Federal Matching Requirements — The matching requirement should be standardized at 90–10 for all Titles. This is especially true in Title III, where administration is funded at 75–25, while other services are funded 90–10.

While it is commendable to keep administrative costs down, Title III specifically provides that Area Agencies administer a service system. We should not be penalized by a higher matching requirement for doing what we are mandated to do.

5. Contributions.—Where the Area Agency has responsibility for administering programs receiving contributions from participants, the authority to decide on the disposition of this income should be with the Area Agency, subject to the advice of its Advisory Council. Said disposition shall be consistent with the objectives of the Act.

6. Area Agency Appeals Procedure.—State Units on Aging should be required to set forth specific appeals procedures for use by Area Agencies when: (1) Area Plans submitted by an approved Area Agency are not approved; and, (2) when a state acts to defund an officially designated and previously funded Area Agency on Aging.

7. Planning Cycle.—The Act should provide for a three-year planning cycle rather than the annual plan currently required. This will reduce the administrative workload required to submit an annual plan and will facilitate a comprehensive planning process.

8. Three-Year Funding Limit.—Authority to extend Title III funding of a specific program beyond the three-year limit should be granted to the Area Agency. This waiver would be included in the Area Plan and subject to review by the State Unit. The appeal procedure in effect for the Area Plan would apply.

9. Title IV–A.—The requirement that 70% of Title IV–A training funds need go to institutions of higher learning should be abolished. State Units and Area Agencies should have discretion in how to utilize these funds.

10. Title V.—

(a) Title V, Part B, Section 511, should be reauthorized, and amended to provide for staffing and operating costs for multipurpose senior centers.

(b) If no appropriate existing physical facility is available in an area for renovation, alteration or acquisition as a multipurpose senior center, the State Unit, or Area Agency on Aging where appropriate, should have the option of approving the use of funds for limited construction of new facilities.

(c) Part A, Sections 506 and 507 (Mortgage Insurance and Annual Interest Grants) should be implemented in order that this additional option of financial support is available at the local level.

Thank you for the opportunity to present my views on the reauthorization of the Older Americans Act.●

DISARMAMENT

Hon. John E. "Jack" Cunningham

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. CUNNINGHAM. Mr. Speaker, people who believe that the Soviet Union is a reasonable world power are apparently counseling the President to step up efforts to disarm our national defense.

The most ominous of these activities, of course, is seen in the SALT negotiations. Trends in those talks could lead to further expansion of the Soviet Union, the most power-hungry nation in the world and one of the premium violators of basic human rights of all of its citizens, particularly its Jewish citizens.

Recently, I obtained a fine summary of the adverse impact of the Comprehensive Test Ban Treaty, which is currently being proposed by some in the administration. I submit it for the RECORD and for the enlightenment of my colleagues:

COMPREHENSIVE TEST BAN SUMMARY

A. A comprehensive test ban (CTB) would result in a net U.S. disadvantage in regard to the balance of strategic deterrence.

1. A CTB adversely affects the reliability of the current U.S. weapon inventory. The U.S. deterrence capability vis-a-vis the Soviet Union is thereby decreased and the confidence of the U.S. allies in capability is weakened. Owing to their force structure, the Soviet problem is by far not the same, even of a CTB treaty could prevent them from testing and verifying weapon reliability in conjunction with their clandestine weapon tests or their "peaceful" nuclear explosion programs.

2. A CTB affects adversely the rationale and the cost of new United States weapon developments. This results from the constraints imposed on our development programs, the increased conservatism in our proposed new designs, and from the cost impact due to the less than optimal use of nuclear materials.

3. A CTB would prevent the U.S. from verifying, or establishing the criteria for, the hardness of U.S. weapon systems against nuclear weapons effects.

4. A CTB penalizes the U.S. R&D establishment far more than its Soviet counterpart. Under the constraints imposed by the test ban, the lack of intellectually challenging stimulus would add to the unavoidable shifts in funding emphasis to encourage the brightest U.S. scientific talent to leave the defense-oriented research establishments for more promising fields. The Soviets on the other hand are free to provide the combination of incentives and pressures required to maintain their scientific/technical manpower at the highest possible level of readiness independently of the CTB. This divergent trend would rapidly erode the current U.S. technology lead especially if we implement the ban unilaterally, and could have serious consequences if the Soviets intend to evade or abrogate the test ban.

B. A CTB will not accomplish the political objectives sought by the U.S.

1. A bilateral CTB between the U.S. and the U.S.S.R. would not affect the pressure for, or the restraints against, the proliferation of nuclear weapon capabilities.

2. A CTB would not increase the probability of reaching strategic arms limitation treaties favorable to the U.S. On the other hand, a CTB would increase the risks to the U.S. national security associated with strategic arms limitation treaties.

C. The implementation of a CTB is fraught with almost insuperable difficulties.

1. The peaceful nuclear explosions (PNE) can not, and should not, be exempted. There is no way to distinguish by remote means between "peaceful" and weapon explosions; military tests can be conducted under the disguise of PNE, or the result of "peaceful" tests can be used to military advantage.

2. Effective CTB verification techniques are not currently within the state-of-the-art; neither are they expected to be for many years in the future.

3. In order for a CTB to be effective and to meet the U.S. objectives associated with control of nuclear proliferation, all current and potential* nuclear powers must accept and ratify the CTB treaty.

BACKGROUND

Nuclear weapon tests are used to: (1) modify nuclear warheads so that they can fit into new weapon systems or to improve their performance; (2) investigate the effects of the explosion on military equipment: (3) ascertain that deployed weapons are in working condition. Weapons are like any other hardware (actually worse than most, because the materials are often chemically unstable or radioactive), past reliability and test results can not be conclusively applied to long-extended storage periods without frequent verification tests.

The U.S. has committed to the principle of banning some nuclear tests, in the Limited Test Ban Treaty (LTBT, 1963), the Non-Proliferation Treaty (NPT, 1968), and the Threshold Test Ban Treaty.* (TTBT, 1974).

In November 1961, the Soviet Union called for a Comprehensive Test Ban (CTB), although it would except nuclear explosions for peaceful (civilian) purposes from the ban. The Soviet motives may have been to help

* Not yet ratified.

turn world opinion against the Chinese, who are not currently part of any test ban treaty, or might have stemmed from the fact that the U.S. probably relies on advanced nuclear technology to a much greater degree than does the Soviet Union.

A. The comprehensive test ban (CTB) would result in a net U.S. disadvantage in regard to the balance of strategic deterrence.

1. Reliability of Current U.S. Weapon Inventory—A complete test ban would preclude the possibility of periodically testing operational warheads. Such testing of complex weapons is essential in the absence of operational employment over long time periods since past test and reliability data can not be projected into the future with the required confidence level. The absence of testing is eventually bound to result in a lowering of the confidence political leadership (not to mention the military) would have in the reliability of the U.S. strategic forces. The U.S. deterrence capability vs. the Soviet Union would be thereby decreased, both in reality and in perception. In addition, for the Western allied nations, who must also cope with the threat of large Soviet nuclear forces, anything which would cast doubt over the future viability of our central war deterrent forces or anything which would introduce an element of unreliability into our tactical nuclear forces would be viewed as a step away from the resolute support of our alliances. Such changes in attitude are adverse to the U.S. security interests.

The corresponding impact on the Soviets is far less severe. If the peaceful nuclear explosions (PNE) are exempted from the ban, in view of their large PNE program, they can divert the results to upgrade their military hardware with relative ease. Even in absence of PNE programs, the design of their nuclear weapons has in the past emphasized simplicity at the expense of cost in terms of weight and the use of nuclear materials. Thus, the U.S.S.R. requirements for continuous testing of sophisticated weapons in the operational inventory are less critical than those of the U.S.

2. Impact on New Weapon Developments—The commitment to weapon test ban policies was made by the U.S. at a time of unquestioned U.S. strategic supremacy. Today, rough equivalence is conceded by most U.S. analysts and while the unfolding trend in the strategic U.S./U.S.S.R. balance can not be reliably predicted, it appears to favor the Soviets. Very little is known of the purpose or the progress made in the Soviet nuclear weapon test and development program, thus the threat, which our weapons may be facing, is essentially unknown. New threats may suddenly appear, possibly jeopardizing the effectiveness of our strategic deterrent forces. The Soviets, with their ample throw-weight capability, can rely on much less testing since they can use warhead redundancy as protection against surprises. In contrast, the U.S. must rely on qualitative modifications to face new threat developments, especially when total throw-weight and number of warheads are constrained by arms limitation treaties. Intensive, continuous testing is then far more critical for the U.S. than it is for the U.S.S.R. in order to preserve the stability implied by the "rough equivalence" posture. A comprehensive test ban would prevent us from responding in time to technological surprises.

A sound weapon development program must thus comprise continuing improvements and changes. A nuclear explosive may fail to work as expected when seemingly slight design changes are made. Of course, under a test ban, changes in design of nuclear weapons would have to be made very cautiously (and, incidentally, would utilize more costly computing and non-nuclear test resources than at present). On the other hand, the nuclear weapons laboratories would be under continuous pressure to make design changes even in absence of new threat projections since even small changes in nuclear weapons have often a large impact on the cost, or effectiveness, or operational flexibility of the overall system.

If weapon tests are banned, our designers will have to be more conservative in terms of weapon effects hardening of our own devices, and use of weapon designs less efficient in terms of use of special nuclear materials. All this translates into additional cost and most likely, into the requirement for additional production of nuclear materials.

3. Hardening of Military Equipment Against Nuclear Weapons Effect.—In addition to nuclear weapons, the U.S. and allied military forces continually develop, test, deploy and exercise equipment aimed at strategic deterrence, conventional air, land and naval combat as well as non-conventional limited wars. Most missions envision nuclear combat environment. The ability to test against well-authenticated criteria in realistic (i.e. nuclear) test environment has essential bearing on the cost and the expected operational performance of newly developed components and systems.

4. Impact on the U.S. R&D Establishment—In the event of a CTB the U.S. nuclear weapons laboratories would severely, and quite probably, rapidly deteriorate in their effectiveness. It is most unlikely that the scientific and engineering talent now attracted to such laboratories could be retained in the long run in absence of significant level of new weapons development testing. Public opinion and budgetary considerations in the U.S. will soon cause significant attrition in the top technical talent pool indispensable for a sound, effective and continually evolving strategic posture. There is no way to restore this type of R&D base on short notice, should the need arise.

The corresponding problem does not exist to a comparable extent for the Soviet Union. The ability of the U.S.S.R. to direct its resources, including budgets, facilities and scientific talent to the tasks prescribed by the interest of the state would permit to maintain the Soviet nuclear R&D laboratories at a high state of excellence and readiness, even in presence of a CTB. In case of abrogation of the test ban, the Soviets would be in position to take rapid and effective advantage of the fully maintained R&D capability. They would also be in excellent position to make military use from test data covertly derived from "peaceful" nuclear explosions.

B. The CTB will not accomplish the political objectives sought by the U.S.

1. Nuclear Weapon Proliferation—The current CTB proposal is to commit bilaterally the U.S. and U.S.S.R. only. It is by no means clear that such a bilateral CTB would have a positive effect, from the U.S. point of view, on our broader political interests against nuclear weapon proliferation. Rather than reducing the prospects of proliferation, a CTB, unless it also commits all nations (currently or potentially nuclear-capable), might induce individual states to develop their own capability in the belief that they can no longer rely upon U.S. commitments.

Insecurity of nations in some form is in general the cause of nuclear proliferation. One source of insecurity is the presence, or the potential, of nuclear weapons in the hands of a nation viewed as an enemy. For this reason, the existing non-proliferation treaty (NPT) is valuable. But the desire to link the NPT to restrictions on U.S. nuclear tests, through understandable as an emotional and political reaction on the part of non-nuclear countries, has little rational basis. Few if any non-nuclear countries feel threatened by U.S. nuclear weapons. None are likely to be reassured by our taking on the operational handicaps which would flow from a complete nuclear test ban.

2. Strategic Arms Limitation Treaty—There is no guarantee that a CTB would have significant impact on improving U.S./Soviet relations, in particular with respect to strategic arms limitations. If the Soviet purpose was to preclude the U.S. from taking advantage of its technological superiority, a CTB would be one of the means of contributing signficantly to that purpose. By imposing constraints on the U.S. future weapon development programs, a CTB would render our negotiating position on stragetic arms limitation more difficult and more cautious.

Should the Soviets decide at a given point to take advantage of their growing superiority, a CTB agreement may in fact become a factor in destabilization. If the ban is maintained, we are precluded from responding to the emergence of a new threat. If we formally abrogate the test ban, that would offer an incentive to fast, decisive Soviet action, before we could benefit from the results of renewed testing.

C. The implementation of CTB is fraught with almost insuperable difficulties.

1. Peaceful Nuclear Explosions (PNE)—Peaceful nuclear explosions should not be exempted from any CTB, if one is ever considered. There is no way to verify the *purpose* of a nuclear explosion without a thorough on-site inspection. The Soviets have consistently rejected the principle of such inspection. Even if accepted in principle, inspection of this type would involve a detailed search of the site to confirm that measurements of military significance are *not* performed; a thorough examination of the test device to ascertain that it is *not* a weapon-compatible design. The plausibility of such intrusive inspection procedure being ever accepted is rather remote.

The Soviets, because of their belief in the possible economic utility of PNE's, because of the nature of their topography and possibly as a hedge in prevision of a CTB, have a considerable, long-range program involving many hundreds of nuclear explosions, of an aggregate yield reaching several tens of megatons. The U.S. has determined in the late 1960's that PNE's were not economically or environmentally attractive and therefore it has no planned activities involving nuclear explosives for peaceful purposes.

As stated previously, a well-maintained research establishment can derive significant military advantage of observations resulting from "peaceful" nuclear explosions.

On balance then, if PNE's are exempted from an assertedly comprehensive test ban treaty, such treaty would offer major advantages to the Soviets.

2. Verification—Improvements to the U.S. national technical means could reduce the probability of undetected tests. It is generally agreed that there is a threshold, estimated from 3.0 to 5.0 Richter magnitude above which earthquakes can be definitely distinguished from weapon explosions. Even though expert opinions differ, the monitoring of the Limited Test Ban Treaty (allowing underground explosions up to 150 KT) is, or may soon become, accessible to the verification state-of-the-art. On the other hand, while there is broad agreement that militarily meaningful results can be derived from much smaller nuclear explosions, the detection by "national technical means" (i.e. from remote distances) is contingent upon further major progress in the detection instrumentation and upon the continuing accessibility of monitoring sites contiguous to Soviet territory. Even with an aggressive program to improve the U.S. monitoring capabilities, it will be several years before improvements would be properly tested. In short, we may not have for quite a long time yet adequate means for verifying compliance in regard to very small explosions. Another pertinent question is what we would, or

could, do about suspicious events, except endless complaining. The possibility of unilateral advantage to the Soviets resulting from covert test activity should thus not be excluded.

3. A CTB Treaty Must Include All Nuclear Powers—Assuming that the U.S. and the Soviets can negotiate an equitable and enforceable CTB treaty (covering both military and peaceful explosions), they should not permit other potential competing nations, e.g., China, France, and India, to gain relative military advantage with respect to the currently existing situation. If this condition is not fulfilled, the stated purpose of a CTB would not be achieved. The same considerations prevail in regard to currently non-nuclear nations. If however the current nuclear powers fail to all agree on both CTB and non-proliferation treaties, the tendency toward further proliferation on the currently non-nuclear nations will persist or will even increase.

The probability of the current non-signatories of the non-proliferation pact acceding to a Comprehensive Test Ban treaty is rather slender.●

SPACE: INDUSTRY'S NEW FRONTIER

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. FUQUA. Mr. Speaker, the launch of the first Space Shuttle will occur in 1979, heralding the beginning of an era in space. Mr. Vernon Louviere, in the February edition of Nation's Business, describes well the value of the Space Shuttle to our Nation. I am including his article entitled, "Space: Industry's New Frontier" in the RECORD, so that my colleagues and the general public may better appreciate the significance of the program to our Nation's well-being.

The article follows:

SPACE: INDUSTRY'S NEW FRONTIER

(By Vernon Louviere)

(*Too low they build, who build beneath the stars.*—"Night Thoughts," Edward Young (1683–1765).)

Twenty years ago, the United States, stunned by the news of the Russian Sputnik, launched itself into the infant Space Age by rocketing a 30-pound satellite into low earth orbit.

Less than a dozen years later, the United States had overtaken and passed the Soviet Union, and the world witnessed one of the most dazzling exploits in history: Astronaut Neil Armstrong stepped out on the moon and proclaimed, "One small step for man, one giant leap for mankind."

In the years since that first landing on the moon, the United States has probed deeper and deeper into the mysterious reaches of outer space, with ingenious devices exposing the hidden secrets of Jupiter, Mars, Mercury, Venus, and beyond.

The lunar landing provided the high drama of America's first two decades in space. Less dramatic is the immense wealth of scientific knowledge that has been and continues to be accumulated as we hurl rocket after rocket toward the deep recesses of the universe.

THE COST OF LEADING THE WAY

For the United States to dominate the race into space has meant huge outlays of money that some detractors claim would be far wiser spent solving earthly problems. By and large, however, most Americans accept the fact that this heavy spending on space exploration pays off in terms of contributing to knowledge and helping the U.S. maintain military superiority, not to mention bolstering national pride.

Now America embarks on a new era—one of true space travel. Between this year and the end of the 20th century, U.S. scientists will seek to open highways to the heavens so they can convert new space knowledge into beneficial uses on earth.

This will be the age of the space shuttle. For the first time, the United States will have a reusable spacecraft, one that will loft men (and women, too) into orbit and let them return to earth in airplane style landings.

The pace shuttle—part airplane, part spacecraft—will pave the way for the beginning of space industrialization, a new industrial revolution bringing American business into solid partnership with space science. This marriage of technology and the marketplace is expected to improve old products and create new ones, vastly heighten the ability of people to communicate with one another, help uncover sources of oil, gas, and other valuable minerals, expand the science of weather forecasting, and set the stage for large-scale exploitation of solar energy.

HUGE REVENUES FOR BUSINESS

By the end of this century, some experts say, business in space will have generated revenues which could reach the neighborhood of a staggering $30 billion. Private enterprise, they predict, will take over more and more of an area now dominated by government, as the business community capitalizes on opportunities springing from industrialization.

In a sense, with the start of this new phase of space exploration, the United States stands at a crossroads similar to that of the 19th century when the railroads pushed across the western frontier, opening new industrial vistas and creating new wealth for this country and its people.

A small but growing number of American businesses already accept the space challenge, realizing that they are in the vanguard of business people entering an exciting era.

"As pioneering successes take place, you can expect much more of American industry to join the equivalent of a land rush into space," Paul Siegler, president of Earth/Space, Inc., a California space consulting firm, told Nation's Business.

The centerpiece of this unfolding second phase of space voyaging—the Model T, so to speak, of the expanding thrust skyward—is an ungainly looking flying machine with stubby body, stunted wings, and grotesque tail. This is the American space shuttle, whose prototype—the Enterprise—is now undergoing a series of test flight and landings.

Prime contractor for the shuttle—five are planned—is Rockwell International, the industrial giant that designed and built the lion's share of the Apollo lunar project, which culminated in six successful landings on the moon.

Sharing in the shuttle contract are such well-known aerospace firms as Martin Marietta, General Dynamics, Grumman Aerospace, Fairchild Republic, and Thiokol.

METAMORPHOSIS IN THE SPRING

Sometime in the spring of 1979, at Cape Canaveral, the squat, chunky shuttle will undergo a metamorphosis. Like its wingless forebears it will assume a vertical position on the launch pad. Two powerful solid-fuel rocket boosters and a huge propellant tank, all three resembling giant torpedoes, will be joined to the shuttle. Two astronauts will climb aboard, the two booster rockets and three liquid rocket engines on the craft itself will burst to life, and the world's first true space flying machine—now for the first time looking the part—will streak into the skies.

After two minutes of flight, the two boosters will burn out and drop off in the Atlantic to be picked up later and reused in future flights. A few minutes more, and the big external tank will be jettisoned over a remote part of the ocean. It will burn and break up into small pieces as it tumbles earthward. The external tank is the only expendable part of the operation.

Now the shuttle will be on its own, able to maneuver as its pilot wishes in the vast ranges of low earth orbit, a belt of space extending from 100 to 600 miles above the planet. On completion of this first manned test, scheduled to run from 54 hours to five days, the astronaut pilot will dip the craft's nose down and point it toward the desert runways at Edwards Air Force Base in California. By the fifth shuttle flight, landings will be at Cape Canaveral on the longest manmade runway in the world, a 15,000-foot stretch of concrete built especially for the shuttle.

A series of such flights are planned during 1979 and early 1980, according to the National Aeronautics and Space Administration. The turnaround time between flights can be as short as two weeks because of the shuttle's adaptability to quick overhaul and maintenance.

Starting in 1980, and for the next ten years, the space shuttle system will be fully operational, conducting a wide range of experiments—for industry; for government, including the military; and for foreign interests. Each of the five shuttles will be built to make 100 round trips, so, over the length of the program, as many as 500 missions may be accomplished.

A primary feature of the shuttle is that it can take a 65,000-pound payload into space and return to earth. The shuttle can accommodate seven people—three astronauts and four mission specialists who will handle experiments or engage in small-scale manufacturing—and they will live and work in a shirt-sleeve environment. Missions will run from seven to 30 days.

PAY AS YOU GO

For the first time, NASA has come up with a pay-as-you-go space vehicle. Over the ten years of the shuttle program, and the 500 or so flights planned the average cost of a mission will come to about $21 million, according to NASA computations. Whoever books space on the shuttle—a private business, a federal agency, or a foreign government—will pay the $21 million. If there are two users, they will split the cost.

There will be some exceptions to the amount charged. The European Space Agency, a consortium of ten Western European nations engaged in space research, is putting in $600 million to build the Spacelab that will be flown aboard the shuttle in the 1980's. So the agency will be billed on the basis of $18 million a flight.

The same goes for the Canadian government, which is contributing a $90 million manipulator arm that will be used for launching other spacecraft from the shuttle, for repairing communications satellites, and the like. NASA also will enjoy the lower rate, as will certain other federal agencies for special missions.

All the action won't be enjoyed by corporate giants and well-heeled governments. NASA has come up with a way for others to participate, to share in the thrill of this pioneering mode of transportation.

YOU CAN MAKE A RESERVATION

For as little as $3,000—$500 down—you can reserve space for a legitimate experiment aboard a shuttle flight. A number of small companies, universities, and even individuals have nailed down their reservations for what NASA calls its "Getaway Special" program.

After the lunar landings, it became apparent that the American space program was in danger of grinding to a halt. The drama and

the glamour were gone. Mounting economic problems and rising budget deficits would make it more and more difficult for Congress or the White House to generously approve requests for continued spending in space. In 1970, NASA began concentrating on the concept of reusable space vehicles where tangible, easily visible benefits would be immediate and costs would be held down significantly. Thus the space shuttle was born.

In terms of costs, the shuttle doesn't approach the Apollo project, which represented an outlay of about $21 billion from drawing board to the first lunar landing. The price tag for the whole shuttle program is expected to be in the neighborhood of $7 billion to $8 billion.

In terms of payload, the shuttle is a real bargain for the taxpayer. It cost $500,000 a pound to put a 20- to 30-pound payload aboard the Vanguard missile in the late 1950's. When the Thor missile came along in the 1960's, with payloads of little more than half a ton, the cost was reduced to $10,000 a pound. Payloads on the Saturn moon rockets came in at $600 a pound. With the shuttle, the cost drops to $150 a pound.

And when the next generation of space freighters comes along, with possibly as many as ten departures daily at Cape Canaveral's Kennedy Space Center, the price could drop to $20 or even $10 a pound.

NASA is counting on business to help keep the momentum going on space activity. Once space industrialization takes hold, NASA officials believe, space colonization will only be a matter of time. Those who favor space colonization point to the delicate ecological balance of the earth, its finite resources, and its burgeoning human population.

ALMOST WEARLESS MACHINERY

No man speaks more convincingly on space industrialization than George W. Jeffs, president of North American space operations for Rockwell. Industrialization, he says, "can utilize the unique properties of space—weightlessness, hard vacuum, limitless energy, and high vantage point—to produce large-scale benefits for all people."

Factories in space would feature almost wearless machinery. Without the physical constraints of gravity, workers and equipment would move about much more easily.

Individual productivity would increase because of lower energy expenditure. There would be few negative side effects such as pollution, congestion, and safety hazards. A big plus would be limitless nonpolluting energy from the sun, energy readily available outside the earth's atmosphere.

Mr. Jeffs's view is echoed by Dr. Robert A. Frosch, administrator of NASA, who told a congressional committee:

"While the shuttle is freqently discussed in terms of its ability to accomplish the things that we are already able to do in space, but in a more economical way, I believe its real significance lies in its ability to enable us to do new things in space that we cannot now do because of restrictions imposed by expendable launch vehicles.

"These new capabilities will begin to give us entirely new ideas for long-range projects."

Dr. Klaus Heiss, president of Econ, Inc., a Princeton, N.J., firm which has evaluated a number of NASA projects from the standpoint of costs, is unequivocal in predicting that the role of business in space will expand in the remaining years of this century. Looking further down the road, to the period starting about the year 2000, he says:

"Industrial space activities, with or without financial participation by government, will develop and sustain themselves entirely, based on pursuit of economic interests. Once this point is reached, the space program will have become truly irreversible. Economic self-interest, again and again, has proven to be the most lasting historical motivation for human activity."

HIGH-PRICED TOURISM

Earth/Space, Inc., the California consulting firm, has a contract with NASA to study the implications of space industrialization over the next 30 years. Paul Siegler, the president, predicts that transmission of information, solar power, and a fledgling tourist industry—all developed by the shuttle—will generate between $6 billion and $19 billion in revenues in the next two decades.

In addition, materials processing in space—metals, glass, medicines—will bring pioneering entrepreneurs $2 billion to $10 billion, he says.

"We're talking about things like wrist radios where people can communicate coast-to-coast for a few pennies, electronic mail, sophisticated national information services, and teleconferences where businessmen in several cities can get together as though they were around the same conference table," Mr. Siegler told Nation's Business.

He sees the first trickle of tourists coming on the scene near the end of the century.

"We're looking at people who would pay $50,000 for a few days in space," Mr. Siegler says. "In time, that could be cut to $5,000. I see a 100-room hotel up there in about the year 2000 ,when the tourist traffic really starts to move."

Mr. Siegler believes 1985 will be the turning point for American business to take the big plunge in space. At that time, he says, the two major stumbling blocks to business participation—companies' doubts that they can afford the investment and that they can turn out a marketable product or service—should fall by the wayside.

"As we proceed, government more and more will have to learn to speak the language of the marketplace, or we will have to get into the private space launching business," Mr. Siegler says. "Eventually, private enterprise will compete with NASA, and there will be increasing competition from abroad."

BOOST TO COMMUNICATIONS

Business investment in space actually has been under way for some time, considering the multiple uses being made of communications satellites—ranging from improved telephone service to remote telecasting from practically anywhere on earth.

Now it will be possible to launch from the high-flying shuttle even more complex satellites into even higher orbit and to repair, service and retrieve satellites already on station. This alone will add years to the life of such satellites, which are now lost forever if they develop malfunctions.

"Just to meet long-distance telephone requirements in the year 2000, we are going to need at least 50 more satellites," says retired Navy Capt. Chester M. Lee, NASA's space transport system director. "This means an increase in an already active field. The number of shuttle flights to repair and maintain these satellites will have to be stepped up. As with the airline industry, when you increase the number of flights, you reduce the costs of operation."

He adds: "When we look for customers for the shuttle, we will look at the business community."

SEEING THE UNSEEABLE

Several major communications firms already have booked space on early shuttle flights to launch a new generation of communications satellites. The firms include Western Union, Satellite Business Systems (a joint venture of IBM, Aetna Life & Casualty, and Comsat General) and the Communications Satellite Corp. Each has put up a nonrefundable $100,000 down payment.

Geologists hope the shuttle will add a new dimension to the ceaseless search for oil, gas, and other minerals. More than 100 major oil, gas, mineral, and engineering companies (Exxon, Bethlehem Steel, Kerr-McGee, Union Oil, U.S. Gypsum, and Phelps Dodge, to name a few) formed the Geosat Committee in 1976 to encourage NASA to incorporate special sensors in satellite designs. The sensors would help detect natural resources on earth from the vantage point of space.

The Geosat Committee's president, Dr. Frederick B. Henderson III, told Nation's Business the shuttle will make it possible to modify sensing devices on satellites while they continue to circle the globe. Today such equipment must operate in the same way from the time it is programmed before launch until the satellite burns out.

"We would like to have geologists aboard some of these shuttle flights because of the contributions they can make," Dr. Henderson says.

"Already, with satellites alone, we are seeing structural geological features we could not see before. In this business you're always looking for something that's buried. You're looking for clues."

Among other things, he explains, cameras could be launched from the orbiting shuttle that are more sophisticated than space cameras now launched from earth, enhancing the ability of geologists to uncover mineral riches in the ground and under the seas.

SAVING OF MILLIONS

Dr. Henderson says studies show that improved reconnaissance from the vantage point of outer space could shave $250 million off the $2.5 billion now annually spent looking for new mineral sources.

Obviously, there is no way of knowing what the shuttle, working with improved satellites, will turn up. But, Dr. Henderson says, "if only one copper deposit or one 100-million-barrel oil field is found, the cost of one of these space systems would be more than paid for."

One thing is sure, he adds: If these geological space tools had been around in 1901, spotting the immense riches of Texas's Spindletop, the greatest oil find in history, would have been a snap.

The minerals industries currently acquire their on-high geological data—though this is an infant science at best—from the two Landsat satellites that have been orbiting the earth for several years. But these satellites have been geared principally to study agriculture, water resources, and land planning. The Geosat Committee is pushing to have more geological sensing apparatus aboard future Landsat satellites.

Dr. Henderson believes that this, along with missions performed by the shuttle, has the potential for creating an earth resource and environmental information system that would give immense aid to the world geological community.

"Such a system will assist us in at least a partial solution to the dilemma of this nation's declining domestic nonrenewable energy and mineral resources," he adds.

SPOTTING TROUBLE ON THE FARM

Landsats already have proven themselves as far as agriculture is concerned. This is particularly true in the case of wheat farming. The satellites can often spot developing plant disease before the farmer himself. In time, scientists hope to be able to make precise, accurate predictions of wheat yields anywhere in the world. The impact this would have on future international wheat deals is obvious.

Last October, the St. Regis Paper Co. engaged NASA to use these satellites to monitor 1.7 million acres of valuable timber on company land in the southeastern United States. If the experiment is successful, the company says, it will provide information critically important to timber inventory. Sensing devices aboard the satellites will, for example, tell foresters how tree growth is progressing as well as provide clues to timber yield.

The ability of these and future satellites to help solve many problems on earth will be greatly improved with the emergence of the space shuttle.

Repairing satellites in space will be possible for the first time, resulting in tremendous savings. The shuttle will, after firing them into orbit, be able to provide maintenance for a variety of satellites involved in weather forecasting, energy, navigation, fishing, mapping, oceanography, environmental protection, and many other fields.

PRIVATE-PUBLIC PARTNERSHIP

Rockwell's George Jeffs believes that space industrialization will require a strong partnership of government and the private sector. He is equally convinced that the benefits will far outweigh the expense of these adventures in the world beyond.

"The new industrial revolution about to take place starting 100-plus miles over our heads in earth-orbital space may ultimately lead to unforeseeable payoffs," he says.

"As we begin to expand our capabilities through the space shuttle, more and more people on earth will become space beneficiaries."

Mr. Jeffs notes that space offers possibilities both in improving old products and producing new ones.

CAPTURING SOLAR ENERGY

Space industrialization, he says, can help lay the groundwork for the first massive capture of solar energy. The shuttle will make it possible to erect large structures in space, he says, and this will result, as technology is developed, in construction of the first solar power station high above earth.

"I don't think industry will take the lead here because of the huge costs involved," Mr. Jeffs says. "Government will have to lead industry by the hand in the initial phases. But when the time comes for industry to step in, industry will be ready."

A pilot project could be completed by 1990, about the time the current shuttle program is ending, Mr. Jeffs says.

"Before the century ends, we can be tapping solar energy with satellites," he says. "It won't solve all our energy problems, but the contribution will be meaningful."

He adds: "I believe that once the technical and enconomical feasibility of a space-power system has been demonstrated, even on a small scale, utility and other companies will participate in financing construction and operation of such systems."

DWARFING APOLLO

George Jeffs believes spin-offs from the shuttle program will dwarf those which came in the wake of Apollo. And those numbered in the thousands, bringing improvements in health, manufacturing, transportation, and many other fields.

"Apollo was an exploratory and learning phase," Mr. Jeffs says. "Now that we know we can operate in space, we will have to develop the technology to provide more for earth. This is not a hit-or-miss affair. We will be concentrating on larger payoffs for the public. That's what we're thinking about now."

Mr. Jeffs underscores the economy aspect of the shuttle when he says:

"We will be able to conduct an experiment on the shuttle without having to build a very expensive satellite around the experiment. Today, if we want to put on a $200,000 experiment in space, we have to wrap a $10 million satellite around it, and we get to use it only once."

The shuttle will enable scientists to conduct experiments of short duration as well as lengthy ones. Short-term experiments can be carried out on the shuttle itself. Longer experiments will be put aboard platforms built by shuttle workers and will be left in space.

"We can return to these platforms as often as necessary and tend the experiments just the way a farmer tends his crop," Mr. Jeffs explains.

Communications platforms, solar power satellites, meteorological and climatological platforms, and even satellites relaying vital lifesaving instructions—these all will come along with the advent of the shuttle.

THE NEXT GENERATION

Mr. Jeffs is eager for the United States to start thinking about the next generation of space shuttle travel, which he says will be in the magnificent heights of geosynchronous orbit—22,000 miles and above—rather than in the low earth orbit range of the pioneer shuttles. There are no plans for space shuttle operations in the 21,600 miles between these two orbit levels.

"I strongly believe," Mr. Jeffs told a congressional committee, "that we must be in a position, technically and operationally, by the end of the next decade to be able to make commitments necessary to have large operational space centers on line by the end of the second decade."

No less sanguine about the potentials of space industrialization is Econ's Klaus Heiss, who says:

"With the successful completion of the space shuttle system, a new era of space transportation, leading potentially to a full industrial use of the space environment, will set in."

Dr. Heiss also has this to say about what lies ahead:

"Of all the resources awaiting mankind out in space, energy clearly is the single most abundant and most important. The question is not if mankind will ever make use of this resource, but rather when and on what scale."

ACTIVE ROLE FOR BUSINESS

American companies will play an active role in the effort to capture the energy of the sun. NASA has let out contracts to a number of firms to come up with ideas on how this nondepletable source of energy can be transformed into usable electricity.

The Boeing Co., for example, has been engaged in research on solar power satellites since 1972. A satellite of this kind might be the size of a small city and be able to produce twice the power generated by Grand Coulee, the nation's largest hydroelectric dam. Forty-five such satellites could match the present total electrical generating power of the United States, freeing oil, coal, and their derivatives for other crucial needs.

Solar power satellites either would be constructed in low earth orbit for later shipment to the higher geosynchronous orbit or would be constructed directly at the higher orbit, according to Boeing.

Getting the men and equipment into space to build such a satellite would require a complicated transportation system. The construction equipment could be shipped aboard reusable large, unmanned freighters—heavy lift launch vehicles—and deposited at a space construction base. Work crews could travel to the construction site on a shuttle.

The costs, obviously, would be staggering. Likewise, the potential returns.

FUEL IS FREE

Boeing has worked out an arithmetical plan indicating that the revenue from one solar power satellite producing 10,000 megawatts of electricity, sold at a rate of 30 mills per kilowatt (the current average cost of electricity generated by new oil-burning generating plants), would be $78.8 billion in 30 years. Forty-five satellites would produce more than $3.5 trillion in revenues.

While solar power satellites would be expensive to bring on stream, the real payoff would follow. The sun's rays are free.

Dr. William Lenoir, one of the astronaut scientists who will fly the shuttle, told NATION'S BUSINESS:

"I think there is a great opportunity to capture solar energy. Now we have a chance to go up and learn more about it. The shuttle will give us the economics of what it will cost to build things in space."

GIANT ERECTOR-SET PARTS

Dr. Roger W. Johnson, the director of NASA/Civil Space Programs for Grumman Aerospace Corp., is considered an expert on space industrialization. He says the technology exists today to build five-by-eight-kilometer solar power satellites, each capable of producing 5,000 megawatts of power, and beaming the power to earth as microwave energy.

"We have the engineering, we have the paperwork behind us," he told NATION'S BUSINESS. "We can build a spacepower station by 1995 if we are prepared to spend from $15 billion to $25 billion. We're talking about an investment on the level of Apollo."

He adds: "The visionaries will have to look beyond the shuttle and assume this will happen."

Dr. Johnson predicts automated fabricating machines will be installed on space platforms that will turn out half-mile-long metal beams like giant Erector-set parts which technicians, working from the shuttle, will assemble into huge energy-gathering satellites.

"But remember, the kind of project we're thinking about is twice as complex as the Alaskan pipeline," he points out. "The energy crisis is not as acute as it has to be to force us to find these long-term solutions in space. That could come in another two or three years."

Experiences collected in the building of a solar satellite will make possible the development of the technology needed to start building factories in space, according to Dr. Johnson. "We will have learned more of what the productivity of man is like working in this kind of environment," he says.

Dr. Frosch, the NASA administrator, agrees that the shuttle will offer many challenges to industry, but he is not so sure how fast industry is willing to move.

WHAT ARE THE GROUND RULES?

"There is still a lot of uncertainty as to what the ground rules and risks are going to be," he explains, adding: "Until now, space has been largely a government-funded business, and the government took most of the risks."

Dr. Frosch does predict continued private investment in satellite communication because that has already proven itself. He says the next most promising area for private activity is commercial data services, where the market is wide open for development. He believes the big payoff for the shuttle will come when it begins to demonstrate its great flexibility and its ability to accomplish things never done before in space.

The merits of the shuttle aside, the NASA chief is convinced that the United States can only come out ahead with the high technology that will be developed as a result of space probing in the next decade or so.

LIFEBLOOD OF INDUSTRY

"The argument that high technology is a drain on the national economy is nonsense," Dr. Frosch asserts. "I have never seen a good case made for it.

"On the other hand, if you take a look at those industries in the U.S. that have turned their backs on high-technology spending in the past 25 to 50 years, you are looking at some dying industries or industries that are in deep trouble. If you want to kill off an industry, just let the technology remain static for a few years."

Econ's Dr. Heiss has no doubt that space exploration will result in colonization in the skies. He says:

"The establishment of space habitation will be an evolutionary outcome of the current United States space program. Mankind will achieve in the next 100 years the most significant accomplishment yet: true earth-independent, self-support systems which will lead to the establishment of a multitude of new, different, and enterprising civilizations."

NASA is not yet ready to ask Congress for money to start building space colonies. But the agency obviously watches with interest any serious discussion of the subject.

Probably the most serious scientific look to date at the concept of space colonization took place during the summer of 1975 at Stanford University and nearby Ames Research Center. For ten weeks, a group of engineers, physical scientists, architects, social scientists, and others met and designed a plan for creating a city in space to accommodate 10,000 people. Estimated cost: $190 billion.

Preposterous? A lot of serious-minded people don't agree.

The orbital space shuttle is being readied to take its place in the second chapter of space history. For the United States—indeed, for all mankind—it offers opportunities of tremendous scope.

A FANTASTIC MONOPOLY

Why a space shuttle? Perhaps the clearest answer is contained in a statement read to a congressional committee by George Jeffs, of Rockwell International. The statement, by Richard Lesher, president of the Chamber of Commerce of the United States and a former associate administrator of NASA, is as follows:

"Imagine that the year is 1492 and only one country in Europe has an oceangoing ship capable of making round trips to the New World. Consider what such a monopoly would have meant to that country.

"Now consider this: The year is 1977, and only one country has a spacecraft capable of making cargo-carrying trips into space and back. The country is the United States, the spacecraft is our new space shuttle, and the significance to my hypothetical European country on the eve of Columbus's famous voyage."●

A $100 BILLION DEFICIT?

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. McDONALD. Mr. Speaker, the Wall Street Journal of March 13 carried an editorial entitled: "A $100 Billion Deficit?" This editorial expressed great alarm over the direction of spending by President Carter. I share this concern. However, I feel the editorial made it too much of a partisan issue. For the past 40 years, both Republicans and Democrats have been guilty of contributing to the Nation's deficit and the weakening of our currency. This deficit spending at times has led to ruinous inflation and depressions in our economy. As the editorial points out, such a huge deficit as we may now be contemplating this year will soak up so much of the available capital that the private sector will be starved and stunted. As Presidential Advisor Harry Hopkins admitted in the 1930's, the new philosophy in Washington is to "tax and tax, spend and spend, elect and elect. The people are too damn dumb to understand."

The unconstitutional growth of government with the expanding price tags is responsible for the deficits, inflation, and currency destruction. Some administrations and Congresses have been more irresponsible than others but by and large it has been a bipartisan and continual policy—a policy whereby the new and main function of government is to be a redistributor of wealth and the inevitable leveler of society.

In reality this leads to a conflict society and finally chaos.

A $100 BILLION DEFICIT?

The more we study President Carter's fiscal 1979 budget the more our worst fears are confirmed. We had never believed it to be the "lean, hard" budget of White House description. But now we can see how near it is to lurching out of control.

Unless Congress awakens to this danger—and we can't summon much optimism—the economy faces serious trouble.

The President projected federal spending of $500 billion for fiscal 1979, up 8 percent from his revision of President Ford's 1978 budget. But if you use the Ford budget as a base, the Carter budget is up 13½ percent. Then if you count a proposed oil wellhead tax refund as an expenditure, as it should be, the increase becomes nearly 15 percent. But that is only a beginning.

The House Republican leadership has noted that proposed new budget authority, meaning money to be appropriated but not necessarily spent in the fiscal year, is rising even faster than proposed outlays. And the budget seems certain to produce larger outlays than the administration now predicts.

For one thing, Carterites have laid a trap for Congress. The administration budget is highly accommodative to the strongest lobbyists within the administration, people like Secretaries Califano and Adams, and to organized labor. The Labor Department gets a 44 percent boost, education 30 percent, mass transit 210 percent, etc. New spending is allotted for welfare "reform" and a bail-out for financially troubled HUD projects, for example.

To offset all this spending there are proposed "cuts." But they just happen to be cuts that either Congress certainly won't allow, such as water projects or veterans benefits, or reductions based on unrealistic estimates of future "uncontrollable" spending.

For example, the Republicans believe that the Carter budgeteers have underestimated prospective farm spending by $5.8 billion through too-optimistic predictions of the amounts that will be needed for such things as grain subsidies and disaster relief.

The Republicans also think the administration has highly exaggerated the expected budget "shortfall." This is the drop below expectations in actual outlays that has occurred in the last two budget years simply because of delays in spending appropriated funds. Such delays sometimes occur, for example, on long-term construction contracts. The Republican analysts think a shift in the mix of defense procurement towards items with a shorter lead time, such as trucks and jeeps, and away from ships and other things that take a long time to build, will make shortfalls less likely rather than more likely in the future.

The outcome of the Republican calculations is startling. If the Democrats in Congress reject the President's cuts and add, as they usually do, to his increases, the 1979 federal deficit could soar. Even the President forecasts a $60 billion deficit, which is dangerously high at the peak of an economy recovery. The Republicans think $80 billion to $100 billion would be more realistic.

Their estimates, moreover, take no account of the President's optimistic economic assumptions. If the economy grows at, say, the 3 percent historical average in 1979 instead of the near-5 percent rate the President predicts, you can add another $20 billion or so. And if it slumps, all bets are off.

Now, it may be that the Republicans are underestimating the will of the Democratic majority for whipping the budget into shape. But we're told the proposed revisions now flowing into the House and Senate budget committees do not encourage optimism. There are plenty of Congressmen with big spending visions of their own, for Humphrey-Hawkins bill jobs and national health, for example.

If the Democrats don't respond the implications are little short of horrendous. A federal deficit of $100 billion or so, plus another $50 billion in borrowing from "off-budget" agencies, would soak up half or more of the nation's total available capital. That leaves the Fed with the choice of starving the private sector and state and local government or inflating the dollar still faster. It doesn't take much imagination to guess what the Fed will do—inflation already is heating up, the dollar is weak, the markets are jittery.

The Democrats have until May 15 to draw up their first concurrent budget resolution for fiscal 1979. For the sake of the economy, we hope they give some serious thought to what it is they are facing.●

OBJECTION TO SBA'S ECONOMIC DISLOCATION PROPOSED REGULATIONS

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. OBERSTAR. Mr. Speaker, I would like to take this opportunity to bring to my colleagues' attention the Small Business Administration proposed rulemaking for the economic dislocation-economic injury loan program, Public Law 95–89.

The Small Business Administration's proposed rulemaking to implement the economic dislocation-economic injury loan program ignores both the letter of the law and the intent of Congress in enacting it.

The program was authorized by Public Law 95–89, the Small Business Act and Small Business Investment Act Amendments of 1977, which passed the House by a vote of 355 to 1. The purpose of the program is to help small businesses avoid insolvency caused by temporary conditions beyond the owner's control.

According to the proposed rulemaking, SBA has interpreted the law to exclude economic dislocation resulting from a strike as an eligible situation in which the law would apply. That interpretation is unecessarily restrictive. Nowhere in the law itself, or in the legislative history, is there any mention of exclusion of eligibility for this program because the economic dislocation arose out of a strike.

The law states the criteria very simply and very broadly: The term "economic dislocation" refers to "* * * extraordinary, severe, and temporary natural conditions or other economic dislocations as determined by the (Small Business) [1] Administration. Such economic dislocation must be of such magnitude that without the benefit of loans provided hereunder a significant number of otherwise financially sound small businesses in the impacted regions or busi-

[1] Words added.

ness sectors would either become insolvent or be unable to return quickly to their former level of operation."

A specific example of the type of situation that should be covered by the law is the 138-day-long strike in the iron ore mining area of my district, the Mesabi Iron Range. Iron ore mining is the mainstay of the economy in this area which, geographically, is roughly equivalent to the size of New England. The wages and salaries, purchase of goods and services generated by the iron ore mining industry is the economy of northeastern Minnesota. Without mining, there is very little else to generate income or stimulate other business activity. In short, northeastern Minnesota is a one-industry economy.

A strike in such an economy has devastating effect upon all other elements of the economy which are dependent on the major industry.

SBA, however, claims that strikes are a "generally recognized risk of doing business." This interpretation overlooks the necessary function of the small business sector in any community, and penalize independent small business operators who are helpless to prevent labor-management disputes in regions which are economically dependent on a single industry.

A strike in a single industry region can no more be considered a disqualifying factor as a "generally recognized risk of doing business" than could a lack of snow in ski areas. Lack of snow is a condition specifically cited in the legislative history by the conference committee as an "economic dislocation." The availability or lack of snow is one of the risks of doing business as a ski area. Lack of snow can be, and usually is, economically disastrous not only to the ski area itself, but also to the small business which depend on the economic activity generated by skiing. Congress considered lack of snow an unacceptable risk which should not be borne by small business alone and, therefore, one which should be protected by the economic dislocation program established by Public Law 95–889.

A strike is analogous to lack of snow. The strike itself is a matter totally beyond the control of all businesses other than the one being struck. Those businesses could not reasonably be expected to foresee the coming of a strike, which surely has far less predictability than the coming of snow. Once a strike is underway, those businesses have no legal means of influencing its outcome. A ski area, at least, can compensate for lack of natural snow by making its own.

Yet, even though a particular business is not the subject of a strike, it can feel very heavily the economic effect of a strike, and inevitably does in a one-industry economy.

In the Mesabi Range strike I have already described, a great many "otherwise financially sound small businesses" have "either become insolvent or unable to return quickly to their former level of operation," to quote the precise words of the law. Nowhere in the language of the law defining eligibility for the economic dislocation program do we find SBA's language that a strike is excluded because it is a "generally recognized risk of doing business." That interpretation is a pure fabrication by SBA, unintended by Congress, and nowhere even hinted at in the legislative history.

I will concede that it would be a questionable practice to allow the economic dislocation program to apply while a strike is in progress. This approach would be understandable application of a national policy of noninterference in the collective bargaining process.

However, it is quite a different matter when the strike has ended. No longer can there be any question of Government interference, aiding one or another party in a strike. If a region's economy has been adversely affected to such an extent that the effects continue after the strike has been settled and it is of such an intensity to qualify otherwise within the provisions of the law, then the fact that the economic dislocation has been caused by a strike should have no effect whatsoever upon the eligibility of businesses in that region for participation in the economic dislocation program.

Applying that principle to the Minnesota situation: In November 1977, Minnesota Gov. Rudy Perpich and I developed detailed documentation showing very clearly the adverse economic impact caused by a strike in the Mesabi Iron Range iron ore mining and processing industry. The impact on the small business sector was devastating: $44 million in lost earnings concentrated in 26 small communities having a total population of 85,305. Many millions more were lost in purchases of goods and services by the iron mining industry, permanently deferred during the period of the strike. Complete documentation of these and other effects of the strike is available in the SBA offices; I will not go into any further detail here. Clearly small businesses in that area qualify for assistance and ought to be covered.

Therefore, I recommend that SBA's proposed rulemaking be amended to permit coverage of economic dislocation resulting from a strike under the following conditions:

First. The strike occurs in an industry upon which the affected region is predominantly economically dependent.

Second. The strike is of a duration sufficient to certify "that small business concerns within the region have suffered substantial economic injury;"

Third. No designation may be made until the strike has been settled.●

PROBLEM OF SOLID WASTE DISPOSAL

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. EDGAR. Mr. Speaker, the problem of solid waste disposal is one that confronts virtually every community in the United States. The magnitude of the problem was touched upon during oversight hearings last week on the 1976 Resource Conservation and Recovery Act. I testified at these hearings on March 9 and would like to share my comments with my colleagues:

TESTIMONY OF CONGRESSMAN ROBERT W. EDGAR

Mr. Chairman, I appreciate this opportunity to testify at today's oversight hearings on the 1976 Resource Conservation and Recovery Act. Congressman Ambro, who is very knowledgeable about the solid waste problems in New York, is with me this morning and will have some brief comments to add at the conclusion of my testimony.

Prompted by a serious solid waste problem in my own district in Delaware County, Pennsylvania, two months ago I began to take a serious look at the federal government's solid waste program and its impact on state and local governments. As a relative newcomer to the solid waste arena, my comments this morning will be of a general, rather than specific, nature. Some of my concerns are touched upon in EPA's "Strategy for Implementation of The Resource Conservation and Recovery Act."

I have been impressed by the comprehensiveness of the Resource Conservation and Recovery Act (RCRA). The legislation reaches out to touch on almost all of the problems and issues that come to mind when we mention the term "solid waste." However, ambitious as the legislation may be, its application and effectiveness have been severely restricted because of the minuscule appropriations requested by EPA. Of $179 million authorized in FY 1978, less than $40 million was appropriated. The outlook for FY 1979 is not much improved, with only $56.9 million requested by the Administration. I have begun to seriously question whether hazardous and solid waste control are real concerns of the Administration. State and local governments are also questioning whether the federal government is serious in its intent to find solutions to these problems, or whether the government is simply developing more regulations and timetables to complicate ongoing state and local efforts to deal with these age-old problems. If EPA is to take its responsibilities under the Act seriously, it needs an effective funding base. I realize that the funding issue should more properly be addressed to the Appropriations Committee, but the issue has a place at these hearings as well.

The funding concerns of the Pennsylvania Department of Environmental Resources are typical of the concerns of many other state agencies with whom I have been in contact. The Department has a relatively well-advanced solid waste program of its own; however, the state does not have an effective hazardous waste program and recognizes the need to develop, administer, and enforce a hazardous waste program equivalent to the federal program outlined in Subtitle C of RCRA. However, the Department's budget has been so severely cut back in recent months that it cannot press for any new programs when existing ones are being curtailed. With the federal government failing to provide the modest amount of funds authorized under RCRA for state planning and implementation, Pennsylvania very likely will decide not to seek authorization for its own hazardous waste regulatory program, forcing the federal government to accept responsibility in this area. If other states take similar action, one of the most important goals of RCRA—to leave implementation and enforcement to the states—will be defeated. Another concern of the Department is that the federal funds for state planning are authorized for only a short two-year period, ending in FY 1979. This barely enables a state to get a plan underway before federal funds are cut off. Unless more funds are authorized and appropriated beyond FY 1979, state and local

governments will be unable to implement many of the programs outlined in the Act.

At the local level, where the solid waste disposal problems are most keenly felt, there is a great need for the $15 million in planning money authorized in Subtitle D, Section 4008(2)(C). Delaware County itself has a critical solid waste problem. Its incinerators are violating air pollution standards and therefore an alternative must be found. Acquiring additional landfills is a possibility, but suitable sites are very limited and, as in thousands of communities across the nation, both rural and urban, tremendous citizen resistance is unleashed when mention is made of siting a new solid waste facility in the community. Considerable interest has been shown in our County in a resource recovery facility, but no firm steps have been taken in this direction because of the many institutional barriers, risks, and high capital costs involved, and because there are no local funds for the feasibility studies, marketing studies, and other steps essential to consideration of a resource recovery facility. Without these basic studies, it is understandable that neither local governments nor private industries want to accept the responsibilities and risks associated with resource recovery technologies.

Let me illustrate some of the institutional barriers we have encountered. Delaware County is comprised of 49 municipalities, each of which has its own trash collection system, with the responsibility for disposing of the trash falling on the County. Many of these municipalities are unable or unwilling to enter into long-term agreements to supply their solid waste to a resource recovery facility. It has been suggested that a solid waste authority be established to fully look into the possibility of a resource recovery facility; however, state laws prohibit authorities from raising revenues. And perhaps the most difficult problem we face is the fact that the administrative and political machinery of most local governments is simply not geared to tackling the technicalities intrinsic to solid waste management.

I have heard complaints that the Resource Conservation and Recovery Panels set up under Subtitle B of RCRA are not as effective as they could be in helping state and local governments over these hurdles. In a number of cases, the panels have been slow to respond to the needs of communities. As the "salesman" of RCRA, these technical assistance teams must excel in their liaison work with state and local governments if the Act is to be effective. I am hopeful that the performance of the teams will improve as they gain experience and are called upon more often.

The lack of local planning money which I have discussed leads me to propose, in general terms, a change in the law to establish a "revolving fund" to provide planning money to communities considering resource recovery facilities or other revenue-producing systems to handle their wastes. These funds could be used for such purposes as feasibility studies, marketing studies, legal and consulting fees, and for the other purposes described in Section 4008(2)(A) of RCRA. If, as a result of the preliminary studies, a resource recovery or other revenue-producing system is built, the money would be paid back to the fund once the facility begins to make a profit. To be eligible for these funds, the applicant would have to agree that any final plan would adhere to all applicable provisions of RCRA. The federal government could not expect to recover all of the funds it lent out; some communities, as a result of the studies, would rule out attempting to develop revenue-producing solid waste systems as inappropriate to their needs. This is precisely one of the purposes of undertaking planning activities. Additionally, we must expect that some of the facilities constructed will not be as successful as anticipated, given the many risks and uncertainties of resource recovery, and perhaps will not prove profitable.

The benefit of a revolving fund is that it provides for an infusion of capital from the federal government at the planning stage when it is needed yet leaves the major financing of resource recovery outside of the federal government where, in my view, it belongs. If properly administered, the revolving fund concept would help to ensure that planning monies are available when communities are in a position to absorb them. By making planning money available indefinitely, rather than confining it to a one- or two-year period, we avoid the tendency to push communities into using money before they have determined how to make the best use of it. I submit my idea of a revolving fund as simply one possible means to provide planning money for resource recovery facilities. The important point is that if the federal government is going to fail in providing these funds, we will have to find other ways to make this money available.

It is clear that solid waste represents a potential source of valuable resources, including energy. Energy recovery from solid waste promises to meet a growing portion of our energy needs. It has been estimated that 1 percent of our nation's current energy demand could be met by recovering energy from just the municipal waste generated in urban areas. Energy recovery is a particularly attractive arrangement for urban areas with energy-intensive industrial bases. Solid waste when viewed as an energy source can act as an enticement to draw industries needing energy into urban areas, and just as importantly, can act as a stabilizing force to deter industry from leaving urban areas. Solid waste will become ever-more attractive as an energy source as the costs of traditional fuels continue to rise. Both our national energy policy and urban policy should address themselves to the energy-from-solid waste issue.

A number of uncertainties and unknowns exist regard the performance and economics of resource recovery systems. For example, how will the declining birth rate affect such systems? Will the rise in the plastics component of our waste stream continue, or will the federal government step in to reverse this trend? What impact will the current movement of people out of the cities to less populated areas have on the viability of resource and energy recovery facilities? The question arises as to how much we should factor in these and other trends when planning elaborate and costly resource recovery facilities.

EPA's strategy document points to the realization that even with agressive federal efforts toward resource recovery, most wastes will continue to be deposited in landfills for many years to come. Given the continued dominant role of land disposal in our solid waste management scheme, I believe that we must give more emphasis to developing small-scale, low-cost improvements to our current waste disposal operation. There is a need, for example, to take a closer look at our present collection and haul methods. These are the most costly phases of the solid waste disposal process. In 1976, it cost an average of $21 to collect a ton of discarded material as compared to $5 per ton to process and landfill it. Improving the collection system could mean substantial savings to local governments. There is also a need to give more emphasis to front-end separation, which is the separation of reusable materials at the source of generation. Incentives should be provided so that all materials which meet market demand will be separately collected before they become commingled with contaminated solid waste. If additional financial incentives were built into the Act, states would have more reason to take on the responsibilities for developing and managing solid waste plans as outlined in Subtitle D.

We must not overlook the underlying need to reduce the amount of our solid waste. I was disappointed to note that at one point the EPA strategy document for RCRA breaks down the term "resource conservation" into the terms "reuse" and "recovery." In my opinion, the concept of "nonuse," i.e., cutting down on our consumption of natural resources and material goods so that much of what is in the waste stream today is not there tomorrow, is equally at the heart of resource conservation. I believe that RCRA must give more emphasis to, for lack of a better term, the "nonuse" principle. We must avoid the temptation to look at resource recovery and RCRA itself as a panacea to our solid waste problems. They are certainly valuable and promising tools, but they won't solve the fundamental problem of our growing consumption of natural resources and materials.

This concludes my formal statement, Mr. Chairman. Thank you again for this opportunity to present my views.●

THE ABANDONED AMERICANS

HON. LARRY McDONALD
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. McDONALD. Mr. Speaker, the problems of Americans held as prisoners by the U.S.S.R. dates back many years. From the time the Communists assumed power in Russia, Americans have vanished under mysterious circumstances while visiting or working in the U.S.S.R. However, the problem became more acute during the last days of World War II.

The Red army was surging through Eastern Europe overrunning German prisoner of war camps as they came. The United States asked to send help by plane so that our men could have immediate medical aid and assistance. At first the Soviets agreed and then refused. Our men simply had to walk to Moscow or Odessa. Some didn't make it. Some may still be in the U.S.S.R.

As the cold war era developed there were kidnapings and other incidents along the Iron Curtain—more unaccounted for Americans. Then came the Korean conflict and many more unaccounted for Americans. To these were added many more as a result of our tragic policy in Vietnam. Evidence has been accumulated over the years that some Americans and even World War II Axis prisoners of the Red army are still being held at various isolated points in the U.S.S.R. The Herald of Freedom newsletter for January 27, 1978, wrote an excellent summary of this problem, which I would like to call to the attention of my colleagues at this time. These Americans must not be forgotten.

The article follows:

THE ABANDONED AMERICANS

After many denials it has finally come to light that part of the negotiations conducted by Henry Kissinger with the North Vietnamese Communists stipulated that we would provide North Vietnam with 2½ to 3 billion dollars in reconstruction aid, actually reparations. Whereas originally this was denied, now that the facts have become known it is claimed that this was not paid because

the North Vietnamese did not live up to their part of the peace-keeping treaty arrangements. As a means of forcing the payment of the billions of dollars in reparations, the North Vietnamese have refused to give any honest accounting of American prisoners of war still alive or servicemen missing in action. The Carter Administration, which still uses the services of Henry Kissinger—as for example, his touring the country promoting the Panama Canal giveaway—has done nothing to determine the number of Americans still held prisoners by the North Vietnamese, by the Cambodians and by the Laos Communist forces, to say nothing of the many missing in action and perhaps deceased whose remains still are in Communist hands.

In September of 1977 a suit was instituted in the U.S. District Court in Brooklyn, N.Y., on behalf of the families of twenty-one servicemen listed as missing in action in Southeast Asia, asking that a law used by Government officials to declare missing as dead is unconstitutional. In briefs filed by attorneys for the families of the missing servicemen argued that declarations of death have been based in the past on insufficient or inaccurate evidence. In using such evidence, the briefs claim, the Federal officials "diminished their efforts to obtain a M.I.A. accounting on the assumption that . . . lies, half-truths and misrepresentations will be accepted as truthful."

The suit alleges that declarations of death have been issued for MIA's in the past to eliminate "MIA problems through determinations of death without the effort, inconvenience, difficulty and disclosure of information which might be required if the legal and constitutional rights of the subject MIA's were not dishonored and ignored."

For a number of years Theodore R. Grevers, owner of an international private detective service, known as the "Fat Man," has been endeavoring to bring the truth to the American people concerning the MIAs and POW's. He first became interested in the subject through John Noble who had been an illegally held American citizen in Soviet slave labor camps over a period of years. Private detective Grevers of Grand Rapids, Mich., endeavored to get information from State Department official Frank A. Sieverts who, although he admits the North Koreans never gave an accounting of the American POW's, states that there is no indication that any Korean MIA's survived after 1953. This of course is completely false information. For example, Steve Kiba of Akron, Ohio, was released on August 4, 1955. Of particular interest is the fate of the crew of a U.S. Navy plane which was shot down by the Soviets over the Baltic Sea in 1950. The ten individuals, with their serial numbers, have been recorded in the Congressional Record by Rep. Larry McDonald and there is considerable evidence that these American flyers have been, and are still being held in the Soviet Union. A CIA document made public January 21, 1977, contains important information concerning these American Navy flyers.

Columnist Tad Szulc disclosed the details of one case where a prisoner, reported dead by the Soviets, turned out to be very much alive. Raoul Wallenberg, a Swedish diplomat who disappeared in Budapest in 1944 after the entry of Soviet troops, was reported by Moscow officials to have died in a Soviet prison in 1947. After many years of inquiries it was discovered that Wallenberg was in a mental hospital in Irkutsk in Siberia as late as 1975. Slave labor camps in the USSR contain not only Russians who have been convicted of some offense against the State but many persons of other nationalities, including Americans. These prisoners are used as unpaid labor in Soviet industry.

The U.S. Department of Commerce approved licenses for the export to the Soviet Union of equipment and machinery for the construction of the world's largest truck factory to be built at the Kama River Project located just over 500 miles east of Moscow. The total U.S. contracts, most of which are guaranteed by our government, for this project total approximately one billion 400 million dollars. While there is no large city near the Kama River project from which to draw the thousands of workers necessary to man the world's largest truck factory, there is, however, an enormous slave labor camp at Kazan, one of the nearest communities to the project. In the report of the Senate Internal Security Committee entitled "Contradictions of Communism" there appears a map (page 21) under the title "Slave Labor in the Soviet Union, a documented map of forced labor camps." The map shows over 170 separate slave camps, a number of which are located in the area adjacent to the Kama River truck project.

Very little has been reported concerning Americans who have been and still are imprisoned in Soviet slave labor camps. With the exception of John Noble, who has lectured from coast to coast, there are almost no Americans who have suffered such imprisonment and lived to tell the story. Noble and his father, both American citizens, were in Dresden, Germany during World War II when the Russians moved in, and they were eye witnesses to the rapes, robberies, and murders committed by the Soviet troops. Both were arrested without being charged and eventually wound up in Siberia, standard procedure for the Communists.

In a report of the Senate Committee on Government Operations on the "Communist Interrogation, Indoctrination and Exploitation of American Military and Civilian Prisoners." (Report 2832) 84th Congress, Second Session, testimony revealed that a political criminal, who is any person considered a possible threat to the Communist Party or to the State, is subject to the following system in Russia. The K.G.B., the state secret police, decides who is a potential danger to the party or the State. The person is arrested and there is no hope for acquittal or vindication since, under this system, judgment is made as to his guilt prior to his arrest. His case cannot be settled, however, until a confession has been signed by both the prisoner and the interrogating officer.

John Noble was released in 1955 after 9½ years of his life had been spent in slave labor camps during which time the Soviets had repeatedly denied that Noble was being held by them. A post card bearing his handwriting was smuggled out of Siberia and finally reached America and at least one American, other than his family, was interested. The late Alvin M. Bentley, congressman from Noble's home state of Michigan, after being completely satisfied that the post card contained Noble's handwriting, protested to President Eisenhower and the State Department. The end result of his efforts was that the Soviets, who had repeatedly denied holding him captive, finally released Mr. Noble. An entry made in Congressman Bentley's diary under date of Tuesday, January 18, 1955 reads: "Another 'Noble,' a young Noble came in this morning but the State Department grabbed him before I could get to him. He missed a luncheon date here and was half-an-hour late to an informal meeting of the Foreign Affairs Committee, which I had arranged. When he showed up, however, it was worthwhile. Afterwards we had a press conference with the Detroit correspondents." (Courtesy of an employee of the late congressman)

Robert S. Ball, Washington bureau representative of the Detroit News, interviewed John Noble and reported that Noble had been questioned by the State Department and had appeared before a Foreign Affairs Committee. An article by Mr. Ball in the Detroit News of January 19, 1955 stated that Noble had given information to government officials about conditions inside Russia, which "necessarily is classified." Reporter Ball quoted John Noble as having seen things and heard reliable reports during his ten years behind the Iron Curtain which would be of interest and value to not only the State Department but, presumably, the Defense Department, the Central Intelligence Agency, and other government units. He certainly did but none of his testimony has ever been released and his information seems to have gone the way of all anti-Communist data. . . . into the circular file.

After being questioned by the American intelligence authorities, Mr. Noble stated that, based on information he had obtained by himself and from others held in the Soviet Union, there were approximately 3,000 Americans being held in Soviet slave labor camps as of 1955. Other sources have estimated the number of enslaved Americans to be as high as 5,000. Most of these dated back to World War II and were American military personnel who had been in German prisoner of war camps when the Communists occupied parts of German territory. The Reds seized the Americans as well as the Germans, and shipped them all to Siberia. All Russan prisoners of the Nazis were considered to be guilty of "surrender" and were sentenced to 15–25 years in slave labor camps as punishment for the crime of allowing themselves to be captured. It is understood that the Communists considered American prisoners of war also guilty of surrender.

In his book, "I Was a Slave in Russia," John Noble states (page 119): "Many other Americans are still in the Soviet, working as slave laborers. I heard that an American engineer, seized while working for the Reds in Vladivostok, is still in Lubianka prison in Moscow. . . . A Yugoslav who had been imprisoned only a hundred miles from Vorkuta told me more startling news. 'I spoke with eight of your countrymen,' the Yugoslav told me. 'They said they were American officers who had been shot down by the Russians over the Baltic Sea. The Air Force has, of course, acknowledged that several B–29s and B–50s on routine missions were downed over the Baltic. One of them told me he was afraid they would never get back to America. The Russians had reported them dead, saying there were no survivors of the crash.'

"Prisoners being funneled into Vorkuta from camps in Tadzhik and Irkutsk in Soviet Asia, Omsk in Siberia, and Magadan in the Far East said there are many Americans, including veterans of the Korean War, both GIs and officers, and South Korean soldiers, working as slave laborers in their camps. From what I heard, they were PWs captured by the Communist Chinese and North Koreans who had been shipped to the Soviet for safe-keeping."

John Noble gave this information, including the names of a number of Americans, to our State Department and our intelligence services. Nevertheless, nothing has come of it. In answer to inquiries, the State Department replies that the Soviets deny holding any Americans and in fact they deny holding any foreign nationals except those they considered guilty of "war crimes."

Congressman Bob Price of Texas wrote to the State Department, inquiring about American servicemen still missing and unaccounted for since the Korean hostilities. In a reply dated October 17, 1972 David N. Abshire, the State Department's Assistant Secretary for Congressional Relations, stated in part: "After the Korean hostilities ended, the Communist side failed to give a satisfactory accounting for 944 United States servicemen who we believe might at one time have been alive in the hands of Communist forces.

"The number of Americans missing and unaccounted for was later reduced to 389. . . .

"Neither the Department of Defense nor the Department of State has ever received

any reliable information or intelligence to indicate that any of the 389 men may be alive and held prisoner by the Soviet Union, the People's Republic of China (PRC) or North Korea.

"In the absence of any evidence that any of these men might be alive, the Department of Defense made a finding of presumptive death for each of them."

Of course, this is blatantly false since the State Department did receive information about American servicemen being held in Soviet slave labor camps not only from the Korean War but also World War II. Congressman Bentley, who was personally responsible for bringing about the release of John Noble, had been a State Department foreign service career officer and he had absolute confidence in the integrity of John Noble and the accuracy of his information. However, if the Soviets deny holding Americans, the State Department accepts this as accurate information, in spite of evidence to the contrary. The fact is the Soviet Union had for nine years denied holding John Noble until Congressman Bentley presented positive proof to the President of the United States.

Homer Cox, another captive American whom Noble had met in Siberia, spent 4½ years in slave labor camps before his release in the latter part of 1954. Cox returned to his home in Laughton, Oklahoma and began lecturing in order to inform Americans about conditions in the Soviet Union. In less than a year he was found dead in a motel, his death listed as a possible suicide . . . a strange death for a man who survived the freezing cold, hard labor, literally starvation rations and mental if not physical torture in the Soviet Union. According to a reliable source, Homer Cox's mother was also threatened and she refused to discuss any of the detail concerning her son.

Other Americans imprisoned in slave labor camps were U.S. Army Private William Marchuk who had wandered across the Red border in Berlin, and Private William Verdine who had been kidnapped by the Soviets while on duty at the Berlin Demarcation line. There are still thousands of military prisoners and civilians held in the slave camps scattered across the Soviet Union with almost half a million at Vorkuta alone. A study which was prepared by the Library of Congress for the Senate Internal Security Committee revealed that compilations made on the basis of official Soviet statements regarding POW's from 1947 to 1950 indicate that the U.S.S.R. was holding or had failed to account for, approximately 1,950,000 German POW's in 1950. Out of this figure of almost 2 million German POW's the Soviets subsequently admitted to holding only 3,500 who, they claimed, were being held for "war crimes." Allied and Japanese authorities established that Japanese nationals, both military and civilian, were taken prisoner by the U.S.S.R. and that 376,000 nationals were unaccounted for. Others captured by the Soviets as POW's and never accounted for, according to the Library of Congress study, included 180,000 Rumanians, 200,000 Hungarians, 63,500 Austrians, 200 Dutch, 12,000 French and several thousand Spaniards.

Senator James Eastland, Chairman of the Senate Internal Security Subcommittee, in his introduction to the study of Communist Treatment of Prisoners of War, pointed out that many hundreds of thousands of Poles, Germans, Japanese and other prisoners taken by the Russian forces in World War II (according to some estimates the total figure exceeds 1½ million), were never released and never accounted for. Countless thousands have died in captivity, victims of starvation, brutalization, and overwork.

After the Korean War, investigations established that several thousand American prisoners died or were executed in POW camps and that many of them were the object of inhuman torture. Testimony was received that 6,656 POW's in the Korean conflict were members of the U.S. Army. Only 3,323 were repatriated to this country. The rest of the prisoners died, were murdered, or are still prisoners of the Chinese Communists (or the Soviets).

In the secret negotiations in Vietnam the North Vietnamese officials flatly refused to discuss the discrepancies between the official Hanoi list of American prisoners and their own propaganda statements and photographs showing others not on the list. Communist negotiators also balked at examining evidence gathered by U.S. agencies which clearly showed that the North Vietnamese had captured more than one hundred Americans not listed among the 373 they admitted holding. An example of Hanoi's duplicity as to the fate of the captured Americans was revealed to U.S. officials from an unexpected source—Henry M. Aronson, an American attorney, who was invited to visit North Vietnam in December of 1971.

In viewing a display in Hanoi called the "Commission for Investigation of U.S. Imperialists' War Crimes," Aronson noticed ten photographs and four I.D. cards of Americans the North Vietnamese claimed they had captured. Later when an official handed Aronson a copy of Hanoi's official list of POW's, he scanned it for the names that appeared under the photographs in the exhibit. Missing were the names of two Navy lieutenants. When questioned by Aronson about the discrepancy, the North Vietnamese officials refused to discuss it.

The failure of our government to pursue the matter of POW's diligently, its acceptance of the false statements of the Communists, means we have not only let down our POW's from South Vietnam and Korea but even those from World War II. Unless our government recognizes their existence, they well may spend the rest of their lives as prisoners of the Communists.

As the Senate Internal Security Committee study "Communist Treatment of Prisoners of War" pointed out, the North Vietnamese maintain that the Geneva Convention is not applicable to any part of the conflict in South East Asia because war was not ever declared. The North Vietnamese further assert that the Geneva Convention does not protect American military men who were shot down and captured in North Vietnam because these men are not prisoners of war, but are "air pirates" or "criminals" subject to punishment according to their laws. The North Vietnamese contend that the bombing of North Vietnam without a declaration of war constitutes a war crime and that prisoners prosecuted for such crimes should not enjoy the benefits of the provisions of the present Convention as provided in article 85. (POW's must be treated as required by the Convention even after they have been convicted by the detaining power for acts committed prior to capture.)

Not only is our government abandoning the men it sends to war, it is undermining the economic welfare of those who labor at home and make the U.S. a prosperous nation. Since the Kama truck complex was built by Americans and indirectly financed by our government, the following is pertinent. A report of the Select Committee on Communist Aggression, House of Representatives, 83rd Congress, page 36 states: "The Communist system of labor control is a direct menace to organized labor in the free world. Products produced by such labor can be sold in international trade at such prices as to make free competition almost impossible. Whenever a free nation engages in trade with any Communist nation, there is a grave danger of ultimate harm being done to the standards and welfare of its own labor groups." All labor in Communist countries is underpaid by American standards . . . slave labor is not paid at all.●

FUTURE IMPLICATIONS OF THE PANAMA CANAL SELLOUT

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. HANSEN. Mr. Speaker, the proposed Panama Canal treaties are only a signal of things to come. Next the United States will no doubt be forced to give up our naval base at Guantanamo Bay, Cuba, and retreat from other areas.

Recently, Mr. William J. Halterman of the Trans-World News Service wrote an interesting article entitled "Panama Canal Today—Guantanamo Tomorrow?" Many will scoff, but just let the canal go back to Panama and we will be seeing the truthfulness of this thinking.

I commend this article to my colleagues along with an analysis by Cmdr. Laud R. Pitt, USNR, retired, a former Latin American analyst in the Office of Naval Intelligence who speaks of the ultimate fall this Nation will experience if we do not change our attitude and direction.

PANAMA CANAL TODAY—GUANTANAMO TOMORROW?

PART I

These are not only the times that try our souls, they are also times which strain the intellect. It is time we recognize that the Panama Canal debate transcends American control there. The Panama Canal is only part of an ongoing debate which has inevitably led to the withdrawal of American influence and decline in our military power. Indeed, there is little which is sensible in American foreign policy at this time.

After the Panama Canal, will we next be asked to renounce an old ally, Taiwan, in exchange for diplomatic relations with the People's Republic of China? Will we then witness a "liberation" movement in the Virgin Islands. . . . Puerto Rico? Will this ongoing debate then move on to the subject of $3 to $5 billion in "reconstruction" aid for Vietnam? Or, will we next be asked to give up the American military presence at Guantanamo Bay?

Cuban Foreign Minister Isidoro Malmerca stated in Mexico City in January 1978 that "Cuba would back Panama military" if the Panamanians requested their assistance. How long will it take, if the Panama Canal treaties are ratified, for the "Panamanian people" or rather their leadership, to request Cuban "aid"?

This means, of course, that the U.S. could find itself in far worse shape militarily for having ratified the Canal treaties. We could well find ourselves fighting Cubans and the Panamanian dictatorship in another communist so-called "war of liberation." Nor is it likely that very many throughout the world will remember the present Panama Canal treaties and the magnanimous terms upon which the treaties advocates want to surrender the Canal. This is directly connected to the U.S. military presence at Guantanamo Bay, Cuba.

Fidel Castro has made clear his desire that the United States leave Guantanamo Bay. The U.S., through treaties signed in 1903 and 1934, has a right to stay at Guantanamo until both the U.S. and Cuba agree on the termination of those treaties. These treaties have no expiration date but a treaty is only a piece of paper and we Americans are already being asked to countenance the surrender of the Panaman Canal.

It was reported in the Diario Las Americas, a Miami based Spanish newspaper, that the Cuban Foreign Minister had "stated his 'dismay' at the presence of U.S. troops in Guantanamo and the possible intervention of the U.S. Navy in the Panama Canal." Yet, this is a portion of the Canal treaties, that the U.S. has the right to send our Navy ships through on a priority basis: that no other nation may establish a military presence in the Canal once the U.S. withdraws; that we have a right to protect the neutrality of the Canal Zone; that the U.S. has rights in the Canal Zone.

Ominous rumblings have already appeared in the media about U.S. rights at Guantanamo Bay. Castro is a master of the media knowing how to select, flatter and cultivate those influential Americans he needs to accomplish his purposes.

One can already hear the arguments that the U.S. should pull out of Guantanamo Bay because our presence is an affront to Cuban national pride, because our presence there is not in our national interest because pulling out will help our relations with Latin America. You don't have to be a prophet to "hear" the argument that we should pull out of Guantanamo Bay and fully recognize Cuba, even though Castro has an ailing economy which is costing the Soviets dearly and our end of Cuban-U.S. trade would possibly amount to $300 million per year. All of these reasons are fallacious but they will eventually be offered to the American public.

Why shouldn't the United States pull our military forces out of Guantanamo Bay? The reader will probably react with the thought that it is foolish to abandon our military facilities at Guantanamo Bay, Cuba. But it is also foolish to ratify the proposed Panama Canal treaties, and it seems that the Senate may do so.

The supporters of the Canal treaties are trying to sell the American public a phony bill of goods. Some are well-intentioned, others one must wonder about. Regardless, we can be certain that the Soviet Union has a master plan for further intervention in the Western Hemisphere. The United States Senate will be playing along with that plan if it ratifies the proposed Canal treaties. How long will it be before Taiwan goes, Guantanamo Bay, or the Virgin Islands and Puerto Rico? Where does it all come to an end? When will the worldwide advance of communism be brought to a firm halt?

The disarmament lobby, led by people such as George McGovern, Edward Kennedy, Frank Church, Morris Udall, Paul Warnke, Andrew Young and others, may be intelligent and charming people but when it comes down to brass tacks, they can be mightly stupid.

In the second of this series we will talk further about Castro's Cuba and the communist plan to gain control in Latin America.

PART II

A few years ago it would have been preposterous to speculate about the United States leaving our military installation at Guantanamo Bay. But in recent years we have spent billions on welfare while not maintaining military parity wth the Soviet Union. So, why not Guantanamo Bay next?

Cuba has an ailing and deteriorating economy, propped up largely at Soviet expense to who Castro owes billions. Castro needs new sugar markets as well as U.S. food and technology. Trade with Cuba would only serve to boost Castro's communistic economy, a boost at the very time when Castro's troops are flying MIG missions in Ethiopia and Soviets are flying MIG missions from Cuba for training. But training for what? It takes little intelligence to witness that the Soviets never have a monocausal plan of conquest.

That Castro wants the U.S. out of Guantanamo Bay is no secret. In a 1977 interview with Fernando Morais, the Assistant Editor of the Brazilian newsweekly *Veja*, Castro put the matter this way: "It's amusing—they demand that we remove our troops from Africa while right here in our own territory, at the Guantanamo base, thousands of American military are stationed without our consent."

The United States has spent approximately $250 billion on facilities at Guantanamo Bay. The Naval base there is considered one of the best, if not the best, training bases in the world. And it is the only American military base in communist territory, another considerable advantage. It is a military base which the Soviet Union would very much like to possess. They already have a submarine base at Cienfuegos.

The drive to get the U.S. military out of Guantanamo Bay will come in good time. We have only to listen to the Panama Canal debate to hear many of the "reasons" why the U.S. should give up Guantanamo Bay.

The Committee of Americans for the Canal Treaties Inc. claims that "all Latin American countries are united in support of a new deal for Panama. They see the Panama Canal Zone and the Canal itself as the last vestige of colonialism in the Western Hemisphere." First not all Latin American diplomats and citizens are in favor of putting the Canal under Torrijos' control. And if the Canal is seen as the "last vestige of colonialism in the Western Hemisphere" one can already hear the rhetoric from the Andrew Youngs concerning Guantanamo Bay the Virgin Islands or Puerto Rico. The game plan is endless, a communist masterplot to isolate and disarm the United States.

It is claimed that anti-U.S. Panamanian feelings over our control of the Canal could lead to guerilla attacks or sabotage. If the Canal treaties are ratified the disarmament lobby will make the same claims about the American presence at Guantanamo. We lease Guantanamo just as we lease the Canal: "Gitmo," as it is called by the military there, is not part of the U.S., just as the Canal is not part of the U.S.

Castro is a master of public relations and most persuasive. Thus, Sen. Frank Church, a member of the Senate Foreign Relations Committee, went to Cuba in 1977 and returned to insert the following statement in the Congressional Record on November 15, 1977. "The Castro revolution is no longer an experiment; it is an established fact. Any new U.S. policy must be based on that reality." This is a highly debatable point. Would the "reality" of Castro's revolution mean that Guantanamo Bay must also go, Sen. Church?

The more pressure we keep on Fidel Castro, the higher the cost to the Soviet Union. It is not in our best national interests to recognize or trade with Cuba. Yet, President Jimmy "I'll never tell you a lie" Carter, told Sens. George McGovern and James Abourezk last year that he was not opposed to exporting food and medicine to Castro. In return, the U.S. will continue to reap a harvest of of Cuban-inspired terrorism in Latin America and aggression in Africa.

At its elementary and unvarnished level there appears to be a rather well organized lobby of individuals and groups who believe that the United States should not be the richest and most powerful country in the world. The U.S. is losing influence, we are losing territory, we are diminishing in military power. The United States is well on the way to becoming a has-been among nations unless we check the spread of this "disease."

Let us not forget that Castro's government confiscated some $1.8 billion worth of U.S. property after he came to power in 1959. So we'll sell Castro food, technology, farm equipment and badly needed spare parts—probably on a thirty year payment "plan"—and then let him renege on the debt in five years. You would think that the U.S. would learn.

But, no, Castro knows how to charm American politicians and businessmen. That Castro wants the U.S. out of Guantanamo Bay is no news and hardly a surprise. Let us wait until the conclusion of the Canal debate and see which Americans in Congress, government and elsewhere also advocate giving up Gitmo. An integral part of the "logic" for giving the Panama Canal up is that it is in Panamanian territory and our presence is offensive to Panamanian pride. If the George McGoverns and Frank Churches can in good conscience give up the Canal, and both have already espoused closer links with Cuba, how far are we away from the liberal onslaught to surrender American military facilities at Guantanamo?

President Carter is correct when he states that the Canal treaties open "a new chapter in our relations with all nations of this hemisphere." The opening chapter ought not make this book a best-seller. I don't think we can afford to see the end of the book from which Carter draws his "new chapter."

WHY THE PANAMA TREATIES WILL BE THE BEGINNING OF THE END FOR THE UNITED STATES

(By Cmdr. Laud R. Pitt, USNR, Ret.)

The beginning of the end for the United States actually began with the emergence and growth of Soviet power following World War II. But handing over the Panama Canal to the Communists will bring the end much nearer.

When the treaties are ratified there will be tremendous rejoicing throughout the Soviet Union. There will be dancing in the Kremlin, members of the Supreme Soviet will be patting each other on the back. Vodka will flow like water and uproarious laughter will be heard from the sanctimonious walls of the Kremlin to the austere shores of Vladivostok. Floral wreaths will be placed on the biers of Lenin and Stalin.

The Russians will be saying to each other: "Can you believe it? Those stupid Americans! What idiots! They have given to us by a mere stroke of the pen a strategic waterway vital to their defense. We have split the hemisphere right smack in the middle—We have separated North from South America. Congratulations, Comrades! Our propaganda has worked! What an outstanding victory for our cause! Comrade Torrijos will soon nationalize the Canal, he will invite us in to build military bases, and Panama will become another Cuba. Any U.S. interference with this takeover will be brushed aside."

The Russians, indeed, will have good reason to rejoice. The Panama Treaties will go down in the books as the most fantastic giveaway in the history of the world. While the Americans are still in a giveaway mood, the Communists, gloating over their unbelievable success, will unleash their powerful propaganda machine, and aided by Communist agents and sympathizers in the United States demand the immediate return to Cuba of the American naval base at Guantanamo. Since they have convinced the American people that they "stole" the Panama Canal from the Panamanians, why don't they (the Americans) give up this base which they "stole" from Spain in 1898. It should be returned at once to its rightful owners, namely Castro's Communist Cuba. Slowly but surely America's enemies will obtain a stranglehold on America's defenses on its southern perimeter.

A great campaign will be waged to grant independence to Puerto Rico which we also "stole" from the Spaniards. The Communist aim will be to replace U.S. forces there with Soviet forces. From their position of strength in Panama, the Communists will have much easier going in taking over Co-

lombia and Venezuela, especially Venezuela, so that its oil will be denied the United States.

Agitation will begin for the return of the U.S. West to the American Indians and for the return of Alaska to the U.S.S.R. whose $7.2 million sale in 1867 was a despicable transaction perpetrated by that traitor Czar Alexander. In lieu of territory, the Communists will accept not less than 50 billion dollars. Many Americans will agree with this saying along with the Communists that our obtaining Alaska for less than 2 cents an acre is a disgrace and an outrage to the nation's honor and should be rectified as soon as possible.

For some time now the Russians have made great strides in their campaign to control the continent of Africa. Angola has fallen. Little Somalia had the gall to snub the great Soviet Union. Through Cuban and Russian aid to their enemy, Ethiopia, Somalia will soon pay for its insolence. A worldwide movement of great intensity is being centered upon South Africa. This campaign which is supported by many liberals, leftists, and Communist sympathizers in the United States, including the Communist infiltrated World Council of Churches and the National Council of Churches is aimed at forcing the South Africans to give up their homeland to their black populations because the latter are so many and the White South Africans are so few. But the South Africans will fight on the theory it is better to go down fighting than to be murdered later. There will be a great battle, but the South Africans will lose because the blacks will be aided by Cuban and Soviet firepower.

Once the blacks are in control of South Africa, the Communists will control it and you can rest assured that when the moment of crisis comes, not a single drop of oil will ever go by sea from the Mid-East around the Horn of Africa to the United States of America. And how can America wage a major war without Mid-East oil? Even more important are the extremely rich South African mineral resources of antimony, manganese, chrome, platinum, uranium and other minerals essential to waging war.

Do you think the present vilification of South Africa is to help the poor Negro? Bah! The Communists' sole purpose is to control strategic South Africa together with its valuable resources.

As the Russians survey the present world situation, they can smack their lips in satisfaction. They are winning almost everywhere. Granted, they had a couple of setbacks in Chile and Portugal, but these were only temporary and had no effect whatsoever on the security of the Soviet Union. It's a different story when a country like Czechoslovakia which borders on the Soviets dares to show an independent attitude. Then the Russians move in quickly.

From almost any perspective you may choose, political, economic, or military the Russians can plainly see that the U.S. is daily becoming weaker and weaker and they are becoming stronger and stronger. American armed strength is being constantly reduced by inadequate budgets, poor training and maintenance, lack of discipline, disorganization, and the nitpicking by members of Congress. U.S. Intelligence Agencies have been emasculated to the impotence of a Sultan's eunuch. The deterioration in American education, morality, religion, and politics shows the influence of Communist direction.

The sole unswerving aim of the Soviets is to conquer the United States. They know that their plans for world domination will never succeed without the complete destruction of American power. Remember in your history the Roman Senator who always concluded his speeches with: "Carthage must be destroyed! Carthage must be destroyed!" The Russians are saying the same thing, only "America must be destroyed!" The Russians will soon have control of all of Africa.

When the Russians make their blitzkrieg, there will be no fighting there. Can you think for one minute that the Communists will repeat the devastating debacle of Hitler who lost thousands of his elite Afrika Korps fighting on the hot sands of the Sahara Desert?

As a prelude to conquering the U.S., the Soviets must control the Mediterranean. They are making great headway toward this goal. Communists in Italy are so strong that they may even take control in the near future. Since the demise of Franco, Communists in Spain are making great strides. Soon the Communists, through pressure in the UN and elsewhere, will see that that unholy remnant of British colonialism, Gibraltar, is returned to Spain. In France Communists are so powerful that France in 1966 withdrew its military forces in NATO. And what is NATO? A loose confederation of Greeks, Turks, Italians, Portuguese, French, Belgians, Dutch, British and a few others who have joined up because no one wants to give up free U.S. military aid. But when the chips are down or when that aid ceases to come, NATO will fall like a house of cards and the centuries-old fears and animosities will pop up like mud pots in Yellowstone Park. What chance have they against the determined, dedicated and efficient powerhouse of a single united nation?

Some of our military leaders have already claimed that Russian power is strong enough now to overrun western Europe. Why don't they do it? Because they have no particular timetable, they can afford to wait, the longer they wait the stronger they will be. And the Russians don't want to get hurt—if they can win by infiltration, subterfuge and propaganda they will do it.

But when they are ready to make their blitzkrieg, it will be a blitzkrieg that will end all blitzkriegs. It will make Hitler's blitzkrieg look like a turtle's crawl. The invasion of Poland will seem like child's play. When the Communists are strong enough in Western Europe by infiltration of the armed forces, to seize or immobilize them, the Russians will strike. Under the guise of maneuvers and an unobserved military buildup, the Soviet Juggernaut of jets, paratroopers, tanks, rocket artillery, armored cars, and millions of well equipped and trained infantry will overrun Western Europe in a matter of hours. But get this. It will all be done by conventional weapons.

Global air waves will be jammed announcing the peaceful purposes of the Russian onslaught—that under no circumstances will they be the first to start a nuclear war. If the U.S. wants to do it, that's their business. As the news reaches the United States, great consternation will prevail, but as the minutes, hours, and then days pass, nothing will be done because American public opinion will never allow another Hiroshima. Besides the time for action will soon pass since an American nuclear attack would kill friends as well as enemies.

The Russians will now quickly consolidate their gains over Western Europe. The Strait of Gibraltar will be sealed as tight as the lid on Mama's cookie jar. The Mediterranean will be a Soviet lake. No American ship will get in and none get out.

Hundreds of Soviet submarines will line up in the North Atlantic. Communist aircraft will rule the skies. Soviet agents in the U.S. will alert the Russians of the departures of U.S. troop carrying planes. These will be shot down before or on arrival. An American convoy system will never see the light of the day. The British, with no hope of American aid, no Winston Churchill to inspire them and no desire to be bombed again will relunctantly pull down the Union Jack and hoist the Hammer and Sickle.

Israel will be a slight thorn in the Soviet's side, because even without American aid, the Israelis will put up quite a fight. To rid themselves of this nuisance, the Soviets will use one thrust of nuclear weapons to wipe Israel off the map. By this time nuclear weapons will be entirely legal. If this one thrust doesn't do the job, the Palestinians and other Arabs will put on the finishing touches so no Israeli man, woman, or child will remain alive. Israel will never rise again.

The Russians know that the Germans failed twice in the 20th century because they could not prevent huge quantities of American men and materials from reaching Europe. This the Russians will not allow to happen again.

Once their position is secure, the blood bath that will ensue will be horrendous. All the upper classes and most of the middle classes will be eliminated. Black clouds will hover over Europe. The 5th century scourge of Attila the Hun will seem mild compared to the slaughter of civilized man in the twentieth century. The Russians will devise more efficient and streamlined ways for eliminating populations than Hitler used at Dachau.

By now the situation in the U.S. will be extremely perilous. With a complete embargo imposed by the Soviets, trade and communication with Europe will be cut off and America will be completely isolated. No friends will be able to assist it. Soviet nuclear submarines will be transferred from the eastern to the western Atlantic. New missile sites will be installed in Cuba. Missile sites, if necessary to the Russians, may also be set up in Mexico whose cooperation will be obtained by a Soviet promise (as the Germans did in World War I) of returning to Mexico their provinces of New Mexico, Arizona, and California which the U.S. "stole" in 1848.

Now the Russians have the the U.S. exactly where they want it. Some time, when they are ready, the Russians will deliver an ultimatum to the American people to surrender under the threat of nuclear anihilation. They would prefer not to bomb us at all because they want all of our riches and resources left intact. By this time American backbone will have been dissipated entirely, and our leaders will succumb. The once proud United States of America has been brought to its knees. Khrushchev's raised shoe threat "We will bury you" has become a reality.

The blood bath that faces the American people will be even more disastrous than in Europe. Only a remnant of American citizens will remain to serve their Soviet masters. Millions of American young women will be spared and reserved for the special use of Russian soldiers. Small children also will be spared to form a nucleus for a new slave labor force.

But you say, how about the Chinese Communists? Won't they come in? Wishful thinking. Don't bank on it. They will step in after the Soviets defeat the United States. They will want to share in the spoils. What the two Communist great powers do to each other will be no concern of ours because we will all be dead. That's how it will be. Giving away the Panama Canal to the Communists will start the ball rolling.●

VIOLENT ABDUCTION OF ALDO MORO

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. MINISH. Mr. Speaker, the news today of the violent abduction of Aldo

Moro, Italy's most influential political figure, is a cause of great concern to me, and I am sure, to every Member of Congress.

A former premier of Italy, and one of the staunchest defenders of democratic principles, Aldo Moro is the probable leader of the next Italian Government.

Mr. Speaker, this despicable act by ruthless terrorists is not in the tradition of the Italian culture. Only an alien and irrational mentality could commit, much less take credit for, such an action. Swift and full punishment of the murderer is required if such acts are to be prevented in the future.

In addition, Mr. Speaker, this despicable act could not have come at a more inopportune moment in European, or world, history. As the nations of Western Europe unfortunately move ever closer to the political left, Mr. Moro and his Christian Democrat Party stand as a beacon of hope for the principles we hold so dearly.

While we all hope that everything possible is being done to insure Mr. Moro's return, we must also recognize the need for the United States to denounce and take action against terrorist behavior. All of the forces of democracy must unite to battle those of a totalitarian mind.

Mr. Speaker, this is indeed a time of mourning, but also a time of high resolve against the terrorists.●

DRUG REGULATION REFORM ACT OF 1978

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. ROGERS. Mr. Speaker, I am pleased today to introduce H.R. 11611, a mutual proposal of the House, the Senate, and the administration, the Drug Regulation Reform Act of 1978. I am particularly pleased that my good friend and colleague, Dr. Carter, the ranking minority member of the Subcommittee on Health and the Environment, has joined me in introducing this legislation. This bill has the potential to be one of the most important pieces of health legislation inacted in this decade. It holds the promise of bringing the benefits of promising new drug therapies more rapidly to people who desperately need them—without compromising safety or effectiveness—and of reducing the costs of drugs. It has the potential of a vastly better informed citizenry about the proper use and intended effects of drugs. Properly implemented, it can result in much safer use of drugs than is the case today. And with a substantially more open decisionmaking process, the Commissioner of Food and Drugs will be better able to explain his actions to the American public.

I am particularly pleased by the manner in which this proposed legislation was developed. The Department has made a sincere endeavor to reflect the concerns of those of us in the Congress who have long felt the need for substantive revisions in our Nation's drug laws. Certainly there was sincere and complete consultation with its cosponsors in the Senate and the House during lengthy meetings over the last 3 months.

Dr. Carter and I cannot agree with every provision of this proposed legislation. Both of us can agree, however, that it will give much needed impetus to the ongoing congressional effort to reform existing drug laws. I am delighted to join my colleagues in the Senate and our counterparts in the administration in this joint effort to enhance the health of the American people.

During lengthy subcommittee hearings, which will begin later this spring, my colleagues and I on the Subcommittee on Health and the Environment will closely examine the provisions of the Drug Regulation Reform Act of 1978. I look forward to an open and frank exchange of views on this legislation from all interested parties.●

THE PLIGHT OF ANATOLI SCHARANSKY

HON. ELIZABETH HOLTZMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 14, 1978

o Ms. HOLTZMAN. Mr. Speaker, I am pleased to have the opportunity to join my distinguished colleagues in calling attention to the plight of Anatoli Scharansky.

Today marks one full year since Anatoli's arrest. In flagrant violation of Soviet and international law, he has been held incommunicado, without family visits or benefit of counsel, for much of that time. The charges of "treason" and "espionage" which have recently been brought against him are patently without foundation. The only crime committed by Anatoli Scharansky is his desire to be reunited with his wife in Israel.

It is disheartening that the Soviet Union is still exercising repressive emigration policies and disregarding human rights. The brutal, unjust treatment of Anatoli Scharansky is further evidence of the Soviet Union's callous disregard of the Helsinki accords.

Because he was an articulate and forceful spokesman for "refuseniks" in the Soviet Union, Anatoli has become the target of a blatant attempt by Soviet authorities to paralyze the dissident movement. Anatoli often served as a translator for foreign correspondents and visiting dignitaries, including Members of Congress, and his arrest is clearly intended to discourage others from communicating their concerns to those outside the Soviet Union. Anatoli's case, which seems to be moving inexorably toward a "show trial," clearly represents a desperate effort by the Soviets to embarrass the United States and to abate the world's concern about oppressive human rights policies in the U.S.S.R.

Mr. Speaker, I had the pleasure of meeting Anatoli Scharansky on a trip to the Soviet Union and can attest to his personal courage, his pride in his Jewish heritage, and his sincere desire to emigrate. I hope that this expression of concern by the Congress will convince the Soviet Union how seriously the American people view Anatoli's plight and will induce the Soviets to reassess their treatment of him and their policy on human rights generally.●

THE GREAT HOPE OF SOCIETY

HON. JAMES P. (JIM) JOHNSON

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. JOHNSON of Colorado. Mr. Speaker, one of my constituents, Mrs. Sarah Morris of Fort Collins, Colo., has taken a look at our society and has come away with reason to hope and a direction for our efforts. Mrs. Morris is a well known author and prominent citizen of Colorado. I commend this article to my colleagues.

THE GREAT HOPE OF SOCIETY

(By Sarah Morris)

The great hope of society is individual character.—William Channing

Arnold Toynbee, the brilliant philosopher of history, sees Western civilization in a "time of troubles" which he says is the first stage of its disintegration. But he does not consider such a collapse inevitable. Surely the evidence of its approach seem clear: Crime, suicides, drug use, spiraling, student test scores falling, work-ethic eroding, political scandals mounting . . . and one of every five adult Americans unable to read or write. But if Toynbee feels there is yet time, shouldn't we be willing to consider some measures designed to stem and turn this seemingly relentless tide? Let's look at one possibility.

A PLAN FOR AMERICA'S FUTURE

There is a solution. It may require a drastic and costly reorganization of our society. But we must find a way to nurture in the members of our rising generation a vastly increased ability to deal creatively with the human challenges of our times.

What institution could provide this nurture? The family? In some cases, yes. But one of the saddest symptoms of society's sickness is the casual abdication of parental responsibility. The family seems hardly ready to step into the breach.

The church? Again in some cases, yes. But there is an amazing percentage of our population with no visible church connection.

What about the schools? Legally all children must attend school from the age of six to the age of sixteen. But our schools, as presently constituted, are apparently unable to handle the job. Yet education could take the lead, if a three-part program were followed:

Part 1. Only the most skilled and effective people should teach. There are yet enough magnificent people among us who could salvage this society. They would be people who could pass on the knowledge and develop the character and skills which a younger generation would need to revitalize our country. Of course, this could mean weeding out those not gifted in such teaching who are now a part of the educational system. It would also mean the freedom to engage, try out, keep or let go teachers until children are guided largely by people reminiscent of those rare

teachers each adult remembers nostalgically through the years. These teachers talented in helping each child reach his full potential should be paid what they are really worth, paid through local funds supplemented by national subsidies.

Part 2. There should be no more than fifteen children in a class. And increasing public enlightenment should insure that every child is a wanted child, with improved chances to realize his own and society's higher hopes.

Part 3. Schools should also be centers for adult education and family recreation. Parents of many children are afraid to go to "the school" and contact a person called a "teacher"—or worse yet, they are indifferent. But if "school" was a place where parents could bowl, or play volley-ball, learn woodworking or sewing and above all child-rearing, parents too would be part of a rebirth. Teachers, those remote figures of authority, could become friendly human beings, seen every day as part of center activities.

A recent five-year Carnegie study actually recommends giving families more government money to solve the problems of weak parental control of children. To parents who have abdicated? To parents who may be long on money and short on the ability to parent? No! That money should be used for this school centered program where a parent in a one-to-one relationship with "a teacher" or in a class, could gradually catch and develop the spirit and know-how of effective parental guidance. Change in people can only be nurtured through human contacts. Such change can't happen just because people are given more cash in hand—particularly when it is dependent on their having children. Look at what has happened to the Aid to Dependent Children program! The more children (often illegitimate) the more money. One recipient is earning her way through college by getting both pregnant and educated continuously!

ROAD BLOCKS TO ACHIEVING THIS LIFE-SAVING PROGRAM

1. In the first years, the cost of such a program would be astronomical, perhaps almost equal to the defense budget! However we would be spending money on the fundamental development of our most precious product, people. And as time went on, we would see the results in ever-increasing numbers of productive human lives.

2. Of course, this solution presupposes legislators farsighted enough to vote for it and deaf enough to ignore the cries of the dissenters.

So the heart of the plan is a vast and systematic rebirth—a yeasty revitalization of children and parents. But—TV would have to be in league with this plan. It couldn't continue to pipe into people's lives the distractions of a shoddy counter culture.

Could such a plan really come into being? Great things can happen if we are frightened enough, and if we realize that we are committing suicide as a civilization—at least that's what we're doing if we can believe Toynbee and the news in our newspaper headlines.●

PERSONAL EXPLANATION

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. KASTEN. Mr. Speaker, due to previous commitments in Wisconsin, I was unavoidably absent on Monday, March 13. I wish to state for the record, therefore, how I would have voted on those rollcall votes that occurred during the session:

"Yea" on H.R. 7814, authorizing Federal agencies to experiment with flexible employee work schedules;

"Yea" on H.R. 10126, the Federal Employees Part-time Career Employment Act;

"Yea" on H.R. 9146, providing for congressional review of changes in the operations of the Postal Service;

"Yea" on the motion to order the second on H.R. 6635, relating to the rate of interest on individual retirement bonds;

"Yea" on the motion to recommit House Resolution 1010 with instructions to allocate $300,000 of Judiciary Committee expenses for internal security investigations;

"Yea" on the motion to recommit House Resolution 956 cutting expenses for the Select Committee on Assassinations;

"Nay" on final passage of House Resolution 956, providing $2.5 million for the Select Committee on Assassinations.●

THE MX—A SURVIVABLE U.S. ICBM

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. BEARD of Tennessee. Mr. Speaker, the growing vulnerability of the U.S. land-based ICBM to a Soviet first strike is probably the most important strategic problem presently confronting the United States.

Administration witnesses in testimony before the Armed Services Committee, on which I serve, have told us that with or without a SALT II agreement, the number of Minuteman ICBM's we could expect to survive a surprise Soviet attack by the middle of the next decade would be unacceptably low.

Recognizing this critical problem, the chairman of the Armed Services Committee, the Honorable MELVIN PRICE, has been at the forefront of the congressional effort to develop a more survivable U.S. land-based ICBM. The Carter administration, however, has twice deferred entering full-scale development (FSD) of the proposed Minuteman follow-on system, the so-called MX missile.

In the fiscal year 1979 defense budget the administration has, again, failed to request full-scale development for the MX system. Secretary of Defense Harold Brown, however, has testified before the Armed Services Committee that the failure to request FSD was the result of technical uncertainties relating to the basing mode. These uncertainties are expected to be resolved this summer, at which time the Secretary of Defense has indicated the administration would be able to come to the Congress for a supplemental funding request.

Based on my experience with the Armed Services Committee, I believe such a request would receive the overwhelming support of the committee and the Congress.

I do not see how any responsible U.S. Government official could oppose efforts to develop and deploy a survivable land-based U.S. ICBM. Such a system would significantly contribute to U.S. national security, strategic stability, and arms control objectives.

While time does not now permit me to elaborate on this matter, I would like to take the opportunity to share with my colleagues an Air Force Association policy paper entitled "MX Advanced ICBM."

This Air Force Association paper was approved unanimously by AFA's national board of directors on March 4, 1978. The paper very eloquently and concisely highlights the requirement for the MX system.

Mr. Secretary, I request unanimous consent to insert the AFA paper in the RECORD at this time:

[Air Force Association Policy Paper]

MX ADVANCED ICBM

The United States, the Air Force Association believes, stands at the crossroads of a decision that, for years to come, could affect our ability to deter nuclear war and to resist nuclear blackmail. At stake is the future of our land-based intercontinental ballistic missile (ICBM) force, keystone of this nation's strategic deterrent and thus of US politico-military effectiveness in general.

Modernization of the Soviet ICBM force proceeds at a rate that is awesome and far in excess of reasonable national security requirements. Every year, the Soviet Union installs between 100 and 150 modern new ICBMs. Each of the new missiles has from three to seven times the throw-weight and can deliver up to twenty times the megatonnage of the most advanced US ICBM, Minuteman III. The silos housing the new Soviet missiles are almost twice as hard as our most modern silos and thus more difficult to attack.

The three new ICBM types now entering the Soviet inventory—the fourth generation since Russia began building ICBMs—are being followed by yet another, even more advanced and threatening family of intercontinental missiles. At least four medium and large ICBM types as well as a thoroughly modified smaller missile system capable of mobile deployment are now in development and make up the Soviet Union's fifth ICBM generation. The US Defense Department warns—we believe with good cause—of potential Soviet "war-winning capabilities." This means the Soviets might conclude at some future time that they could destroy this country to a degree that would preclude recovery within a reasonable length of time while the Soviets could survive our retaliatory strikes with their military, industrial, and population base impaired but still intact.

In AFA's view, the relentless and—when measured against that nation's limited economic base—exorbitant Soviet drive to expand their ICBM capabilities is ominous: Within the coming decade, Soviet offensive capabilities could reach a level where the US ICBM force, as presently constituted, might not be able to survive a Soviet first strike. Moreover, the rapidly increasing number of Soviet warheads and their steadily improving accuracy could support Moscow's belief that such an attack would tilt the balance of the two countries' remaining nuclear forces so far in the Soviet Union's favor that the United States would not dare to counterattack. Consequently, the Soviet strategic arsenal that remained after the strike—ICBMs kept in reserve as well as the full complement of submarine-based strategic missiles and strategic bombers—could be so overpowering that no rational US leader would retaliate. If he did, he could be certain that in the ensuing Soviet restrike most of the people of this country would be killed

and the bulk of the facilities that make us a viable society destroyed.

If the capability to do that—perceived or real—were to come within the Soviet Union's grasp, the consequence would be intolerable instability. Such a preponderance of Soviet nuclear might could invite attack or, at the least, promote an environment favorable to Soviet nonnuclear aggression and political coercion.

We realize that Minuteman force "survivability" of a certain kind can be obtained with the stroke of a pen, by categorically committing the nation to a policy of "launch under attack," or even "launch on warning." Such policies would assert that the United States will launch its strategic missiles in a massive retaliatory strike against the Soviet Union, either upon detonation of the first enemy warheads or upon concluding that a major attack is under way. The Air Force Association believes firmly that the US should not provide a potential aggressor with the aid and comfort of foreswearing launch under attack. But neither must the nation degrade its force structure to the point where that force must be used or lost—where the only response would be an indiscriminate spasm launch against civilian targets. A future President thus could be forced into a "hair-trigger" choice that the aggressor might assume he would not make.

Lastly, such a curtailment of US strategic capability would snuff out all hope of confining nuclear war to military targets, should deterrence fail. The difference between an attack on US strategic forces and one on US cities and industry could be ninety million American lives. It is our long-standing contention that any deterrent posture or doctrine that fails to dissuade Soviet attacks on the US civilian population is morally unacceptable as national policy.

Early in 1974, the Air Force started work on a weapon system to follow Minuteman—the "MX" advanced ICBM that would assure for decades to come the survivability of our land-based ballistic missile force, and provide the nation with the unique, vital deterrent capabilities that only such a force can furnish.

The advanced-technology MX would have four times the throw-weight and vastly greater radiation hardness than Minuteman III. With up to fourteen warheads—compared to three for Minuteman III—MX would be vastly more effective and survivable and thus could provide strategic stability even if only a limited number of weapons were deployed.

The MX ICBM's survivability—now undergoing rigorous examination and testing—stems largely from its basing mode. By combining mobility with a sharply increased number of "aimpoints" that an attacker must target—up to six times greater than for silo-based ICBMs—MX would be difficult to destroy.

The nation, in the view of the Air Force Association, stands to gain in three major ways from an operational MX force. With the advent of the survivably based MX, the already paid for Minuteman force—far less costly to operate than either the fleet ballistic missile or the strategic bomber/cruise missile components of our strategic triad—would gain, in effect, the same degree of survivability as MX. Obviously, no rational aggressor would attack Minuteman if he could not successfully attack MX.

Secondly, because the MX force would be survivable, such a weapon could make possible sharp reductions in the strategic arsenals of both the Soviet Union and the US, without endangering strategic stability and our national security.

Third, MX, with an accuracy equal to the improved Minuteman III, would retain for the US the option of confining nuclear war to damage-limiting military targets, without automatic escalation to wholesale attack on the otherside's civilian population. Such flexibility would greatly strengthen our deterrent across a spectrum of conflict.

Like all land-based ballistic missile systems, MX would force a potential aggressor to attack targets deep in US territory openly and with some advance warning—an act of utmost severity and thus likely to evoke a comparable response. The certainty of prompt retribution, therefore, increases the deterrent value of ICBM forces based in the sovereign territory of the defender.

In short, the intercontinental ballistic missile—with its speed, accuracy, low operational cost, constant high readiness, and short flight-time to target—will remain for the foreseeable future the principal means for fulfilling this nation's policy of deterrence through flexible, controlled response, and thus for terminating nuclear conflict below the level of massive assured destruction. The characteristics of MX in turn, assure the long-term survivability of the land-based force, and, by extension, the continued effectiveness of the US strategic triad.

The weapon system's basing—from an environmental point or view—will physically disturb no more than several hundred square miles of public land. The estimated cost of the new system is no more than the cost of modernizing either of the other two members of the strategic triad.

MX, in the view of the Air Force Association, must be advanced into full-scale engineering development, in line with USAF's proposed, conservatively paced scheduled. Otherwise, an atrophying land-based component of the triad could, from the mid-1980s on, provide the Soviet Union with strategic superiority by default and thereby increase the risk of nuclear blackmail or strategic war.●

CHRONIC INACCURACY

HON. BOB CARR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. CARR. Mr. Speaker, those of us in Government are accustomed to being taken to task by our relatively free press. Our form of Government thrives on our being called to responsibility in decision-making by the journalism profession. But we frequently forget that this responsibility is a two-way street. Yet, politicians and policymakers are reluctant to call the journalist to task for the same lack of responsibility. Why? We know all too well that the journalist always has the option of the last damaging word. In addition policymakers are usually more concerned with their press relations than journalists are with their political relations. As a result the accuracy and credibility of the media is rarely thoughtfully challenged as they challenge us.

But there comes a time when politicians and journalists alike recognize that inaccurate statements and the credibility of certain journalists becomes so grave as to warrant a public comment in the hopes that the offending journalist will be able to take corrective steps in this regard a militarily knowledgeable author, Alton Frye, has offered some constructive criticism for Rowland Evans and Robert Novak. From personal experience I can attest to the validity of Mr. Frye's piece published in the March 9 issue of the Tennessean. For my colleague's consideration I insert Mr. Frye's article:

[From the Tennessean, Feb. 26, 1978]

EVANS, NOVAK: READER BEWARE

(By Alton Frye)

(Mr. Frye, a native Nashvillian, is author of "A Responsible Congress: The Politics Of National Security.")

This is a citizen's arrest. Defendants: Rowland Evans and Robert Novak. Charge: chronic inaccuracy.

Like petty vandalism, Evans and Novak's frequent misdemeanors in print are generally too minor to warrant the effort to prosecute, and victims remain silent. Yet, collectively, their repeated errors are a clear and present danger to public understanding.

Having admired their early work together, I present this indictment more in sorrow than in anger. The Evans and Novak columns reveal a growing pattern of mistakes and distortions.

Item: Evans and Novak have incorrectly alleged that "secret computer studies show that the existing U.S. cruise missile would not have a chance of penetrating the Soviet Union's sophisticated defense system . . ." Even the most pessimistic studies do not support such a statement.

The Defense Department has been able to rebut the charge in detail, concluding that "The cruise missile, as presently designed, is capable of defeating the Soviet air defense system, as it is presently designed." Thorough inquiry would have shown Evans and Novak that not even a $50 billion crash porgram by the Soviets over several years could keep pace with the likely evolution of cruise missile technology.

The columnists were wrong in describing the Soviet SA-3 missile as "similar" to the U.S. Hawk against which the cruise missile will be tested; wrong in reporting that the "far more advanced Soviet SA-10 . . . is now guarding the Russian homeland"—such a missile does not exist except as the experimental SAX-10; and wrong in discounting the fact that, even if random interceptions were feasible, cruise missiles could saturate Soviet defenses.

Recently they have compounded these errors by alleging that a Jan. 28 briefing to Air Force Gen. David Jones contained "surprising new intelligence that the Soviet Union has started active deployment" of the SA-10. Never mind that this "alarming news" contradicts their own assertion months ago that the weapon was already deployed: General Jones received no briefing on the SA-10 and the missile has still been observed only in tests, not in operational deployment.

Item. By selectively quoting from classified documents, Evans and Novak conveyed the misimpression that the United States was seriously considering a basic change in NATO strategy. President Carter's advisers, reported the column of August 4, were presenting "a new defense strategy that secretly concedes one-third of West Germany to a Soviet invasion rather than seek increased defense spending . . ."

Evans and Novak's portrayal of options studied in Presidential Review Memorandum 10 neglected to point out that the options they chose to highlight were precisely those rejected by the administration in reaffirming the U.S. commitment to forward defense in NATO, including specifically the Federal Republic of Germany.

A second column ascribed to PRM 10 a contention it did not make, namely, "that removing U.S. troops from South Korea gives Washington 'flexibility' to determine whether or not to intervene against Communist invasion . . ."

Item: Evans and Novak manufactured the controversy over the so-called Sonnenfeldt doctrine. By mis-paraphasing an excerpt

from a leaked telegram describing U.S. policy toward Soviet domination of Eastern Europe, the column utterly distorted the actual direction of the Ford administration's policy.

State Department Counselor Helmut Sonnenfeldt had reiterated the U.S. policy "of clearly responding to the visible aspirations in Eastern Europe for a more autonomous existence within the context of a strong Soviet geopolitical influence," but Evans and Novak caricatured his position as one supporting "permanent 'organic' union between the Soviet Union and Eastern Europe."

"Organic" was his word; "union" was theirs. After weeks of diplomatic commotion and a House Committee inquiry, Stephen Rosenfeld summed up: "There was and is no 'Sonnenfeldt doctrine.' There was simply a newspaper column asserting there was one."

Item. Evans and Novak's use of leaks from the Senate Arms Control subcommittee has provoked Chairman Henry Jackson and others to deplore their reports as inacurrate in major respects.

A June column stated that the Soviet SS-19 missile was "untouched by the proposal'" made by the United States in SALT; that was untrue. It also erred in describing U.S. negotiators as "unconcerned that Soviet intermediate-range mobile missiles could be converted to long-range without anybody knowing it;" in fact, that danger has been an important element in American diplomacy.

A later column was flatly incorrect in charging that Sen. Sam Nunn tongue-lashed Secretary of State Cyrus Vance "for avowed ignorance of an alleged U.S. offer to renounce the neutron bomb." There was a confrontation in the subcommittee, but I am authoritatively told that the columnists were mistaken to depict Jackson "as a nearly certain opponent of a SALT II treaty." Henry Jackson is dedicated to making the country safe, not to making commentators look good.

Inflammatory errors of this type have bred an attitude toward the column typified by the insider's epithet, "Errors and No-Facts." It is surprising to find writers with a professed commitment to the nation's security rushing into print with uncorroborated stories which tend to undermine the morale of allies, to impugn quite recklessly American military capabilities, and to impede the cooperation between Congress and president on which true security must rest. This appalling record recalls H. R. Haldeman's dictum for leakers, "We could let Evans and Novak put it out."

This concern had crossed my mind, but it gained special force when I received a few misdirected barbs in the column. In comparison with other episodes, my own experience was inconsequential. Had they talked to me, Evans and Novak would have learned that, contrary to their implications, I have never so much as discussed with Sen. Howard Baker "a three-year limitation on the U.S. cruise missile." What I have said to others is that the Senate can and should make certain that, if there is such a limitation, Congress retains the final say on any extension beyond that period. In fact, my recent conversations with the senator have focused not on SALT, but on other matters about which he has invited my views precisely because I am a member of no "lobby'" on any subject. And far from being adversaries, Fred Ikle and I are old friends who try to understand, not to "eclipse," each other.

In considering whether to respond, I made a number of discoveries that bear reporting. More than two dozen interviews with members and close observers of the Washington press corps, including friends of Evans and Novak, reveal a sharp deterioration in the column's standing and credibility. Where they once enjoyed the esteem of journalists and politicians, they now elicit widespread contempt and mistrust.

Even the column's admirers apologize for its "sloppiness" and willingness to rely on single sources. Friends lament the writers' five-columns-a-week production rate. Evans and Novak are said to excuse their haste as the product of deadline pressures, and are extremely sensitive about charges of inaccuracies. Indeed, one is warned not to respond to their errors, lest they be aroused to further assaults. Intimidation will suffice, it seems, where investigation has failed.

Evans and Novak practice a kind of coercive journalism. They raise great alarms about officials who seek out differing opinions and imply deviousness when public servants elect to examine the evidence rather than to endorse the columnists' instant judgments.

Can Evans and Novak recapture their former diligence and skill? My purpose in arraying these cases is to challenge them to do so. For now, caveat lector: readers and editors alike must be wary of a column that tells more than it knows. We shall all judge whether Evans and Novak spend their energies lacerating their critics or earning the public's confidence. Watch these pages.●

WORLD HUNGER—FOOD OR ARMS AID?

HON. FLOYD J. FITHIAN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. FITHIAN. Mr. Speaker, an innate belief in human rights has been at the thrust of countless battles and issues for which America has gone to the fore. Our successes in this area, both historically and in a more recent context, have made us great.

Human rights begins in the stomach of man. This must be a basic premise of any human rights conviction. It amazes me, therefore, that we can now turn our backs on hundreds of millions of hungry people suffering from malnutrition. Well over 60 million of our fellow human beings die every year of starvation and the complications that arise from poor nutrition.

Over the last decade, our food for peace program (Public Law 480) has been seriously neglected. Our efforts in this arena are not simply a moral obligation. The intensive implementation of our food for peace program is potentially one of the most effective and humanitarian defense measures open to the United States. By permitting other nations to turn to us for agricultural commodities that they cannot grow themselves, we would strengthen our international relations immeasurably, while at the same time helping solve our agricultural surplus problems.

However, we have been "feeding" developing countries more in the way of military assistance to enable them to wage war, than food aid to keep them from dying from starvation and malnutrition. While President Carter's proposed 1979 budget allocates $5.5 billion in Federal aid and trust funds for foreign nations' defense, it requests only 15 percent of that, $805 million, for food assistance under Public Law 480.

In terms of actual exports under Public Law 480, figures reflect an astounding decrease. The value of agricultural products shipped overseas in 1968 was approximately $1.3 billion, and less than $1.2 billion in 1978. Although this would indicate a drop of only a little more than $100 million, this is considerably less in terms of quantity. Statistics show that between 1968 and 1972, the annual volume of Public Law 480 exports was 11 million metric tons. However, in 1977 there was a dramatic decrease in the annual volume to 6.5 million metric tons.

The U.S. supplies other food aid through the Agency for International Development (AID), in the Department of State. Total appropriations for fiscal year 1978 development aid were $3.8 billion. Only $515 million of this was set aside for food and nutrition programs.

In October of 1977, the United Nations listed 20 countries in danger of food shortages in the near future. Vast opportunities for mutually beneficial trade relationships lie in the undeveloped markets overseas—in Eastern Europe, the Middle East, Africa, and Latin America.

It was these concerns that compelled the House to pass the right to food resolution in the 94th Congress (H. Con. Res. 737). In that bill, we pledged to combat world hunger and to strive for a nutritionally adequate diet for all human beings by increasing our exports to countries in need of increased food production and more efficient distribution patterns.

This resolution was only one step in the long road to the conquest of world hunger. We cannot turn back because we are not hypocrites. We cannot delay because we are not cowards. We cannot fail to act because we are a caring and responsible nation. We have recognized and accepted a challenge, indeed a moral obligation. It is time to act.

As a cosponsor of the Agricultural Trade of 1978, I believe that this legislation is a natural followup to our passage of the right to food resolution and essential to the renewed success of our food aid programs. It would establish up to 25 new U.S. agricultural trade offices overseas. The primary functions of these missions would be to increase the effectiveness of agricultural commodities and to provide other services to assist Public Law 480 and other related programs.

In addition, the bill would make amendments to the Commodity Credit Corporation Charter Act, which would stimulate and maximize commercial sales of U.S. agricultural commodities by improving terms, conditions and availability of credit.

The Agricultural Trade Act would also recognize the importance of commodity programs to U.S. agriculture by establishing two new positions, Assistant Secretary for Commodity Programs and Under Secretary for International Affairs to replace the Assistant Secretary of Agriculture for International Affairs and Commodity Programs.

This legislation could enable the United States to reach into new markets for our farm commodities. It would benefit both the American farmer and the

hungry men, women, and children around the world.

If we are to retain credibility and respectability in our international relations and foreign policy, we must remain consistent in our campaign for human rights. We cannot deny a person's right to be fed. When a man is hungry, nothing else in the world matters to him.●

PAROLE PROGRAM FOR POLITICAL PRISONERS OF ARGENTINA

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. STUDDS. Mr. Speaker, the current situation in Argentina is saddening and discouraging to all. The human rights problem in that nation—which has been severe ever since the Videla regime took power 2 years ago—has been growing steadily worse.

It is my understanding, however, that the Argentine Government has expressed a willingness to allow a limited number of persons now being held in prison without formal charges—but clearly for political purposes—to accept exile in the United States. This decision has resulted in a State Department request to the Attorney General, asking permission to allow the issuance of 500 emergency parole visas to the political prisoners involved.

On February 22, I wrote to the Attorney General, urging him to grant this request to the fullest possible extent, consistent with his responsibilities under the law.

This request now appears all the more urgent in light of last Tuesday's massacre at the Villa Devoto prison outside Buenos Aires. In that incident, 45 people, all prisoners, were reportedly killed, and 70 injured. Outside observers believe that a substantial number of the Villa Devoto inmates were political prisoners, and many express doubts about the official Argentine explanation of the events at the prison. These suspicions were heightened by the apparent refusal of Argentine authorities to allow Red Cross pathologists to make an independent autopsy of the dead prisoners.

Mr. Speaker, many of the details surrounding this week's prison massacre in Argentina remain unclear. What is very clear, however, is that persistent and massive suppression of human rights is continuing in that country, and that the United States has an opportunity—through the emergency parole visa program requested by the State Department—to provide at least a small measure of relief.

The following is the text of my letter to Attorney General Bell on this subject:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 22, 1978.

Hon. GRIFFIN BELL,
Attorney General of the United States, Department of Justice, Washington, D.C.

DEAR MR. ATTORNEY GENERAL: It has come to my attention that your office is presently reviewing a request by the State Department that 500 parole visas be allowed for heads of families from Argentina, Chile and Uruguay, in order to allow at least a portion of the individuals now imprisoned solely for political reasons in these countries to enter the United States.

I would like to urge you to grant this request to the fullest possible extent consistent with your duties and responsibilities under the law. As a Member of the House International Relations Committee, I have followed events in these South American nations very closely, and I believe that allowing the entry of at least a portion of the political prisoners now being held would be fully consistent with the principles upon which our country was founded, and with the principles of justice to which you are dedicated.

Thank you for your consideration of this request.

Sincerely,

GERRY E. STUDDS.●

ABDUCTION OF ALDO MORO

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. RINALDO. Mr. Speaker, the kidnaping of Aldo Moro, the leader of the Christian Democratic Party in Italy, is of deep concern to all of Italy's many friends in the United States and throughout the world.

Mr. Moro is the latest victim of the anarchist movement that is threatening to undermine public confidence in democratic institutions in Western Europe. We should not view his kidnaping as an isolated act by the Red Brigade. They are among a group of terrorist organizations loosely linked together and spanning national boundaries. Many have been trained in the Mideast. In fact, intelligence agencies have found evidence of specific coordination between Arab, Latin American, European, and Asian terrorists in an organization known as the Junta De Cordinacion Revolucionaria. It includes the Red Brigade.

The potential of this terrorist front is alarming. They have attacked government officials in Germany, Italy, France, and elsewhere, and their aim is to create political anarchy.

The bloody kidnaping of one of Italy's most distinguished citizens should serve to remind the world community that we cannot have order, economic stability, and democratic freedoms in a climate of fear.

We have a moral imperative to organize a concerted effort through our international intelligence agencies and security forces to block all financial, political and material support for these groups. They must not be allowed safe sanctuaries in any country that wishes to continue good relations with the United States and our allies.

Until the world community organizes a more effective means of arresting and imprisoning leaders of the Red Brigade and other anarchist groups, we face the possibility that they may inevitably find the means to manufacture or steal a small nuclear warhead to blackmail or paralyze governments.

Mr. Moro's kidnaping should open our eyes to the danger faced by the world community.

In this respect, I propose the Congress and the President commit the resources of the Central Intelligence Agency in this international effort.

Furthermore, I urge President Carter to convene a meeting of international intelligence agencies to formulate a program to exchange information and to pursue all possible leads to uncover the international network of terrorist organizations.

Mr. Speaker, the kidnaping of Aldo Moro is an alert to the rest of the free world that we must muster the courage to take stern measures to deal with terrorists. I join the rest of my colleagues in expressing our unalterable resolve not to buckle to terrorist tactics, and in praying for the safe release of former Prime Minister Moro.●

IN RECOGNITION OF THE WESTMORELAND COUNTY BOROUGHS ASSOCIATION

HON. JOHN H. DENT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. DENT. Mr. Speaker; today I wish to recognize a group of elected officials who are dedicated to preserving and protecting the integrity of our small communities; the borough mayors of Westmoreland County, Pa.

These highly motivated public servants have unselfishly devoted their time and considerable talents to making their communities better places in which to live. Their tireless efforts have resulted in 37 strong and vibrant boroughs populated with a proud and confident people.

For some 28 years these borough governments have been jointed together in common cause through the Westmoreland County Boroughs Association. The purpose of this association is to assist its members in coping with all the problems common to small communities. Through its efforts and support, community development and rehabilitation programs have been initiated and promoted. As a result, a better quality of life has been realized in the boroughs.

Mr. Speaker; the Westmoreland County Boroughs Association has indeed made a substantial contribution to the welfare of our people. On April 15, 1978, the association will sponsor a banquet in honor of its outstanding members. I believe that it is fitting and proper that we too recognize the Association's achievements and good works. Thus, on behalf of this House of Representatives, I salute the Westmoreland County Boroughs Association for a job well done, and I wish its members all the best in the years to come.●

REMEMBERING THE IRISH

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. GILMAN. Mr. Speaker, as we near the celebration of St. Patrick's Day, I would like to take this opportunity to express my thoughts on several matters relating to the Irish, both abroad, and in our Nation. Many people join together on March 17 to wear buttons and march in the parades, commemorating the Irish contribution and spirit. Certainly, this show of gratitude and enthusiasm is welcomed by all, but in 1978, there are several sentiments which inevitably do not surface, and are not exhibited throughout the gaiety.

The Irish people have traditionally been a sad people, and 1978 is truly a year of sadness for them. Violence still scars the Northern section of their land, and a state of war is the best description of the present situation there. No longer is it a casual and internal matter: Photographs and first hand accounts depict the terror and fear that are the prevailing sentiments reigning in Ulster. Innocents are being slaughtered, young boys and children and women are being used as pawns in a dangerous and insidious show of force. Barbed wire and tanks have become objects that the citizenry accepts as "normal." Political parties are being destroyed by infighting and struggle.

Americans have shown a vivid, sympathetic interest in the Irish situation. The citizens of this Nation have watched the hopes for peace crumble and wane until further violence and destruction have become the way of life for the residents of Northern Ireland. And this interest has not gone unnoticed.

Within the last several months the Congress has formed an "Ad Hoc Committee on Irish Affairs" designed to provide a forum for discussion and public awareness of the problems in the North of Ireland, and to assess the role of the United States in bringing about a fair and equitable solution. The ad hoc committee is comprised of over 100 Members in the House, and is bipartisan, with members from most of the standing committees in the House. To date, the ad hoc committee has discussed several problems which have come to the attention of the American public: The problem of visas which have been withheld from Irish citizens asked to speak in the United States, economic problems relating to the struggle in Northern Ireland, and a long awaited declaration of intent.

This last matter has caused a great deal of concern among journalists, Irish leaders, and the American Congress. On my visit to Dublin in January of 1978, I had the pleasure of meeting with several of Ireland's leaders, including Prime Minister Jack Lynch. At that time, the leaders assured us that a declaration of intent was welcome, and necessary, and that the time had come for the British to announce its intent for their gradual withdrawal from Northern Ireland. In the past several weeks, however, the Prime Minister has spoken out against the ad hoc committee, and has indicated a lack of support for a declaration of intent.

This further underscores the need for a responsible policy concerning Northern Ireland, one which takes into account the delicacy of the problem and the intense desire for peace. The British cannot deny much longer the growing sentiment for withdrawal, and cannot continue sidestepping the issue.

Throughout our Nation on St. Patrick's Day, People of all nationalities and backgrounds will be joining together to honor the Irish, and all of the traditions that the Irish have brought to America. But the hostilities in Northern Ireland are a cloud of gloom hanging over the festivities, and there will be a fervent wish for peace. Let us not forget our brothers and sisters in Northern Ireland who cannot find jobs, enjoy their family life, and celebrate as we can.

As a Member of the House of Representatives, I pledge my support to the cause of peace in Northern Ireland, and as a member of the Ad Hoc Committee on Irish Affairs, I will continue to work toward the resolution of differences between the parties involved in this conflict.

Peace is the greatest gift that can be bestowed upon a people by their government. It is hoped that the residents of Northern Ireland will soon be able to have such a peace.●

THE OIL IMPORT FEE PROPOSAL

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. CONTE. Mr. Speaker, I rise to express my concerns over the comments made yesterday by the new Chairman of the Federal Reserve Board, Mr. G. William Miller. In his first appearance before the Senate Budget Committee, as the Chairman, Mr. Miller urged the immediate implementation of a program which has as its primary objective the reduction of our dependency on foreign oil. Thus, assisting in our efforts to combat the rise in inflation rates. This objective has been pursued by the Congress for years. I do not believe there is an individual here who opposes such a worthy goal. However, what disturbs me is the statement Mr. Miller made outlining the means of achieving this objective, namely the imposition of either oil import fees or quotas. He further refined his comments in a discussion with the press, at which Mr. Miller told them that he preferred the oil import fee because "it has simplicity and could be easily administered."

Mr. Speaker, while I strongly endorse the new Chairman's determination to assist the deteriorating dollar's position on the world's currency markets, and concurrently his resolution to combat inflation at home, I would suggest that the Chairman delve deeper into the impacts of levying such an import fee, apart from the simplicity of its administration. Such a hike in our oil costs, and the resultant increases in cost of product, will have its most disastrous impact on those areas that find themselves wholly dependent on foreign supplies, namely the New England region. Mr. Speaker, New England now imports more than 60 percent of its energy supplies, and pays dearly for this situation. Our energy prices are more than 25 percent higher than the national average. Now, the Chairman of the Federal Reserve Board is suggesting that, in addition to this heavy burden borne by the residents of New England, the Government is considering adding an additional financial milestone. Mr. Speaker, I suggest that this will only exacerbate the current economic conditions that currently exist in New England. Thus, the effect of such an import will be to saddle the New England consumers, who must rely on this import, with additional cost, while the rest of the country reverts to available domestic supplies. I should also mention, that through conservation, the residents of New England have already achieved substantial savings. Thus, any additional cost of imported oil will not result in substantial energy savings in New England.

Mr. Speaker, I would like to recommend that the equitable solution to this dilemma is, naturally, the passage of an effective and comprehensive National Energy Act. This would both induce domestic conservation and the development of alternative sources, while at the same time, boost our dollar abroad. In the immediate absence of such a proposal on the books, I recommend that the Administration thoroughly consider the effects the imposition of oil import fees will have on the American consumer. Mr. Speaker, I believe such a thorough analysis will conclusively demonstrate that the quota system is the proper means of distributing this increased burden equitably among the American Consumers. I will be watching for the results of such an analysis.

Thank you, Mr. Speaker.●

MASSACRE OF ISRAELI CITIZENS

HON. ANDREW MAGUIRE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. MAGUIRE. Mr. Speaker, The abhorrent, senseless massacre of 36 Israeli citizens—including women and children peacefully enjoying weekend outings—and the wounding of over 70 others by guerrilla terrorists of Al Fatah, are the most outrageous and heinous of crimes. They disgust all humanity.

These hideous crimes are even further amplified in their horror by the plain fact that they were coldly calculated to disrupt Middle East peace efforts on the eve of Prime Minister Begin's trip to Washington.

Terrorism is not sane politics—it is simply wanton murder. It has no place in international relations. Let us pray

that this unimaginably cruel, bloodthirsty, and calculated attack will not succeed in the objective of destroying prospects for peace.●

THE 60TH ANNIVERSARY OF LITHUANIAN INDEPENDENCE

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. GILMAN. Mr. Speaker, the 60th anniversary of Lithuanian independence has come and gone. However, it is important to acknowledge this brave nation's struggle over the years for freedom and the basic human rights that we, in the free world, enjoy so readily. Lithuania's people today, as in the past, are a living, breathing symbol of a desire for liberty that has gone unfulfilled for all too many years.

Except for a 22-year period between 1918 and 1940, Lithuanians have experienced few individual human rights. However, from the time of their independence in 1918 under the Treaty of Brest-Litovsk until reoccupation by the Soviet Union in 1940, Lithuania attempted to build a free and prosperous state. Just as she was on the brink of launching herself freely and independently, Lithuania had her liberty taken away right out from under her. This makes the extremely difficult struggles that the Lithuanian people have gone through all the more bitter and frustrating. To have tasted freedom and lose it all too quickly, particularly to the same country who had dominated her under the czars, made the new loss of independence all the more painful.

It is most unfortunate that Lithuania is not able to truly celebrate this most important 60th anniversary as a nation experiencing liberty and the individual human rights that symbolize the occasion. At a time when our Nation, a keystone of the free world, is attempting to strengthen our commitment for the basic rights of all human beings, it is imperative that we reaffirm our promise to all captive nations to continue our advancement of free and independent ideals for all people. We, as a nation, must never sanction the denial of simple individual liberty to Lithuanians, or any person in any captive land.

Let us not wait till we mark the occasion of our country's own independence to think about what Lithuania, and the other nations under Soviet domination, sacrifice and struggle with each and every day. Experiencing the freedoms that we, as Americans, do should only heighten our admiration for the Lithuanian people's fierce determination to regain the cherished ideals of liberty and independence. The historic preservation by Lithuanians in this country of their own personal rich ethnic culture, marked by unparalleled courage and resiliency, only reinforces this admiration. Adding to our recognition of this courage must be the observation that it seems the greater the denial of rights that the Lithuanian people must endure, the greater their determination to regain those rights becomes. The flames of their desires for dignity and independence burn ever brighter in the face of unwaivering oppression.

As we exercise our duties to preserve our proper place in the free world, let us pray for the eventual addition of Lithuania to the roster of free nations.

In congratulating Lithuania at this special time, let us hope that one day her people may experience once again the joy of liberation they had for an all too short 22-year period. We must keep alive the hope that Lithuania will someday be a part of the free world with all the dignity and human rights her people deserve.●

ROBERT EMMET'S FAREWELL ADDRESS

HON. JAMES A. BURKE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. BURKE of Massachusetts. Mr. Speaker, we all know that tomorrow is the day which is near and dear to the hearts of all Irishmen and Irishwomen. I thought that it would be very appropriate, considering the occasion, to present to my colleagues the most eloquent speech ever made in defense of human rights. It was naturally made by an Irishman, the noble patriot Robert Emmet. Emmet gave his life in defense of his countrymen against an oppressive foreign government, and his justification for his actions is one which should stir the hearts of Irish and non-Irish alike.

I call particular attention to the final few lines of Emmet's valiant speech; for they are most timely in this era of our focus on human rights. Robert Emmet was an Irishman, but he was also a man for all people:

SPEECH OF ROBERT EMMET, BEFORE RECEIVING SENTENCE OF DEATH

MY LORDS,—what have I to say that sentence of death should not be passed on me according to law? I have nothing to say that can alter your predetermination, nor that will become me to say, with any view to the mitigation of that sentence which you are here to pronounce, and I must abide by. But I have that to say, which interests me more than life, and which you have labored (as was necessarily your office in the present circumstances of this oppressed country) to destroy. I have much to say, why my reputation should be rescued from the load of false accusation and calumny which has been heaped upon it. I do not imagine that, seated where you are, your minds can be so free from impurity as to receive the least impression from what I am going to utter. I have no hopes that I can anchor my character in the breast of a Court constituted and trammelled as this is. I only wish, and it is the utmost I expect, that your lordships may suffer it to float down your memories untainted by the foul breath of prejudice, until it finds some more hospitable harbor to shelter it from the storm by which it is at present buffeted.

Were I only to suffer death, after being adjudged guilty by your tribunal, I should bow in silence, and meet the fate that awaits me without a murmur; but the sentence of the law which delivers my body to the executioner, will, through the ministry of that law, labor in its own vindication to consign my character to obloquy; for there must be guilt somewhere, whether in the sentence of the Court or in the catastrophe, posterity must determine. A man in my situation, my lords, has not only to encounter the difficulties of fortune, and the force of power over minds which it has corrupted or subjugated, but the difficulties of established prejudice; the man dies, but his memory lives. That mine may not perish—that it may live in the respect of my countrymen, I seize upon this opportunity to vindicate myself from some of the charges alleged against me. When my spirit shall have wafted to a more friendly port—when my shade shall have joined the bands of those martyred heroes who have shed their blood on the scaffold and in the field, in defence of their country and of virtue, this is my hope—I wish that my memory and name may animate those who survive me, while I look down with complacency on the destruction of that perfidious government which upholds its domination by the blasphemy of the Most High; which displays its power over man as over the beasts of the forest; which sets man upon his brother, and lifts his hand in the name of God, against the throat of his fellow who believes or doubts a little more than the government standard—a government steeled to barbarity by the cries of the orphans and the tears of the widows which it has made.

[Here Lord Norbury interrupted Mr. Emmet; saying, that the mean and wicked enthusiasts who felt as he did were not equal to the accomplishment of their wild designs.]

I appeal to the Immaculate God. I swear by the throne of Heaven—before which I must shortly appear—by the blood of the murdered patriots who have gone before me, that my conduct has been, through all this peril and through all my purposes, governed only by the convictions which I have uttered, and by no other view than that of their cure, and the emancipation of my country from the superinhuman oppression under which she has so long and too patiently travailed; and I confidently and assuredly hope that wild and chimerical as it may appear, there is still union and strength in Ireland to accomplish this most noble enterprise.

Of this I speak with the confidence of immense knowledge, and with the consolation that appertains to that confidence. Think not, my lords, I say this for the petty gratification of giving you a transitory uneasiness; a man who never yet raised his voice to assert a lie will not hazard his character with posterity by asserting a falsehood on a subject so important to his country, and on an occasion like this. Yes, my lords, a man who does not wish to have his epitaph written until his country is liberated, will not leave a weapon in the power of envy, nor a pretence to impeach the probity which he means to preserve even in the grave to which tyranny consigns him.

[Here he was again interrupted by the Court.]

Again, I say, what I have spoken was not intended for your lordships, whose situation I commiserate rather than envy—my expressions were for my countrymen; if there is an Irishman present, let my last words cheer him in the hour of affliction.

[Here he was again interrupted. Lord Norbury said he did not sit there to hear treason.]

I have always understood it to be the duty of a judge, when a prisoner has been convicted, to pronounce the sentence of the law; I have also understood the judges sometimes think it their duty to hear with patience, and to speak with humanity, to exhort the victims of the laws, and to offer with tender benignity their opinions of the motives by which he was actuated in the

crime of which he was adjudged guilty. That a judge has thought it his duty so to have done, I have no doubt; but where is the boasted freedom of your institutions? Where is the vaunted impartiality, clemency, and mildnesses of your courts of justice, if an unfortunate prisoner, whom your policy, and not your justice, is about to deliver into the hands of the executioner, is not suffered to explain his motives sincerely and truly, and to vindicate the principles by which he was actuated?

My lords, it may be a part of the system of angry justice to bow a man's mind by humiliation to the proposed ignominy of the scaffold—but worse to me than the proposed shame, or the scaffold's terrors, would be the shame of such foul and unfounded imputations as have been laid against me in this Court. You, my lord, are a judge; I am the supposed culprit; I am a man, you are a man also; by a revolution of power we might change places, though we never could characters. If I stand at the bar of this Court, and dare not vindicate my character, what a farce is your justice! If I stand at this bar and dare not vindicate my character, how dare you calumniate it? Does the sentence of death, which your unhallowed policy inflicts on my body, also condemn my tongue to silence and my reputation to reproach? Your executioner may abridge the period of my existence, but whilst I exist I shall not forbear to vindicate my character and motives from your aspersions; and as a man, to whom fame is dearer than life, I will make the last use of that life in doing justice to that reputation which is to live after me, and which is the only legacy I can leave to those I honor and love, and for whom I am proud to perish.

As men, my lords, we must appear on the great day at one common tribunal, and it will then remain for the Searcher of all hearts to show a collective universe, who was engaged in the most virtuous actions or attached by the purest motives—by the country's oppressors, or—

[Here he was again interrupted, and told to listen to the sentence of the law.]

My lords, will a dying man be denied the legal privilege of exculpating himself in the eyes of the community of an undeserved reproach thrown upon him during his trial, by charging him with ambition, and attempting to cast away, for a paltry consideration, the liberties of his country? Why did your lordships insult me? or rather, why insult justice in demanding of me why sentence of death should not be pronounced? I know, my lord, that form prescribes that you should ask the question—the form also prescribes the right of answering. This, no doubt, may be dispensed with, and so might the whole ceremony of the trial, since sentence was already pronounced at the Castle before the jury was empanelled. Your lordships are but the priests of the oracle, and I submit; but I insist on the whole of the forms.

[Here the Court desired him to proceed]

I am charged with being an emissary of France. An emissary of France! and for what end? It is alleged I wish to sell the independence of my country! and for what end? Was this the object of my ambition?—and is this the mode by which a tribunal of justice reconciles contradictions? No, I am no emissary; and my ambition was to hold a place among the deliverers of my country—not in power, not in profit, but in the glory of the achievement. Sell my country's independence! and for what? Was it for a change of masters? No, but for ambition! Oh, my country! was it personal ambition that could influence me? Had it been the soul of my actions, could I not, by my education and fortune—by the rank and consideration of my family—have placed myself among the proudest of my oppressors? My country was my idol; to it I sacrificed every selfish, every endearing sentiment, and for it I now offer up my life. O God! No, my lord; I acted as an Irishman, determined on delivering his country from the yoke of a domestic faction, which is its joint partner and perpetrator in the parricide, for the ignominy of existing with an exterior of splendor and a conscious depravity: it was the wish of my heart to extricate my country from the doubly-riveted despotism. I wished to place her independence beyond the reach of any power on earth—I wished to exalt her to that proud station in the world.

Connections with France were indeed intended—but only as far as mutual interest would sanction or require. Were they to assume any authority inconsistent with the purest independence, it would be the signal for its destruction; we sought aid, and we sought it as we had assurance we should obtain it—as auxiliaries in war, and allies in peace.

Were the French to come as invaders or enemies, uninvited by the wishes of the people, I should oppose them to the utmost of my strength. Yes, my countrymen, I should advise you to meet them on the beach with a sword in one hand and a torch in the other; I would meet them with all the destructive fury of war, and I would animate my countrymen to immolate them in their boats, before they had contaminated the soil of my country. If they succeeded in landing, and if forced to retire before superior discipline, I would dispute every inch of ground, burn every blade of grass, and the last entrenchment of liberty should be my grave. What I could not do myself, if I should fail, I should leave as a last charge to my countrymen to accomplish, because I should feel conscious that life any more than death is unprofitable when a foreign nation holds my country in subjection.

But it was not an enemy that the succors of France were to land. I looked indeed for the succors of France; but I wished to prove to France and to the world, that Irishmen deserved to be assisted; that they were indignant at slavery, and ready to assert the right and independence of their country.

I wished to procure for my country the guarantee which Washington procured for America. To procure an aid which by its example would be as important as its valor—disciplined, gallant, pregnant with science and experience; who would perceive the good, and polish the rough points of our character; they would come to us as strangers and leave us as friends, after sharing our perils and elevating our destiny. These were my objects—not to receive new taskmasters, but to expel old tyrants. These were my views, and these only became Irishmen. It was for these ends I sought aid from France, because France, even as an enemy, could not be more implacable than the enemy already in the bosom of my country.

[Here he was interrupted by the court.]

I have been charged with that importance in the efforts to emancipate my country as to be considered the keystone of the combination of Irishmen, or, as your lordship expressed it, "the life and blood of the conspiracy;" you do me honor over much; you have given to the solution all the credit of a superior. There are men engaged in the conspiracy who are not only superior to me, but even to your own estimation of yourself, my lord; before the splendor of whose genius and virtues I should bow with respectful deference, and who would think themselves dishonored to be called your friends; who would not disgrace themselves by shaking your blood-stained hand.

[Here he was interrupted.]

What, my lord! shall you tell me on the passage to that scaffold, with the tyranny of which you are only the intermediary executioner has erected for my murder, that I am accountable for all the blood that has and will be shed in this struggle of the oppressed against the oppressor? Shall you tell me this, and shall I be so very a slave as not to repel it?

I do not fear to approach the Omnipotent Judge, to answer for the conduct of my whole life, and am I to be appalled and falsified by a mere remnant of mortality here? By you, too, who, if it were possible to collect all the innocent blood that you have shed in your unhallowed ministry, in one great reservoir, your lordship might swim in it.

[Here the Judge interfered.]

Let no man dare, when I am dead, to charge me with dishonor; let no man attaint my memory, by believing that I could have engaged in any cause but of my country's liberty and independence, or that I became the pliant minion of power in the oppression of the miseries of my countrymen. The proclamation of the Provisional Government speaks for our views; no inference can be tortured from it to countenance barbarity or debasement at home, or subjection, humiliation, or treachery from abroad. I would not have submitted to a foreign oppressor for the same reason that I would resist the present domestic oppressor. In the dignity of freedom, I would have fought on the threshold of my country, and its enemy should only enter by passing over my lifeless corpse. And am I, who lived but for my country, and who have subjected myself to the dangers of a jealous and watchful oppressor and the bondage of the grave, only to give my countrymen their rights, and my country her independence—am I to be loaded with calumny, and not suffered to resent or repel it? No, God forbid!

If the spirits of the illustrious dead participate in the concerns and cares of those who are dear to them in this transitory life, O ever dear and venerable shade of my departed father, look down with scrutiny upon the conduct of your suffering son, and see if I ever for a moment deviated from those principles of morality and patriotism which it was your care to instill into my youthful mind, and for which I am now to offer up my life.

My lords, you are impatient for the sacrifice—the blood which you seek is not congealed by the artificial terrors that surround your victim; it circulates warmly and unruffled through the channels which God created for nobler purposes, but which you are bent to destroy for purposes so grievous that they cry to Heaven. Be ye patient! I have but a few words to say. I am going to my cold and silent grave; my lamp of life is nearly extinguished; my race is run; the grave opens to receive me, and I sink into its bosom! I have but one request to ask at my departure from this world; it is the charity of its silence! Let no man write my epitaph; for as no man who knows my motives dare now vindicate them, let not prejudice or ignorance asperse them. Let them and me repose in obscurity and peace, and my tomb remain uninscribed, until other times and other men can do justice to my character. When my country takes her place among the nations of the earth—then, and not till then—let my epitaph be written. I have done.●

CHALLENGES FACING OUR SCHOOLS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. DERWINSKI. Mr. Speaker, Chicago's WBBM Radio 78 has a very spirited, imaginative, and respected edi-

torial policy. In a hard-hitting editorial, broadcast on March 6, WBBM addressed the fundamental challenges facing our schools. The editorial follows:

BASICS OF EDUCATION

When we heard last week about President Carter's proposal to increase the federal funding for education by nearly twenty-five percent we had mixed emotions. At first it seemed like a terrific thing to do because, after all, there is hardly a cause more worthy of tax dollars than the education of our nation's children. The President obviously realizes they are the country's greatest natural resource and that's why he wants to see this money spent upgrading their basic reading, writing and math skills.

We certainly don't object to the idea of channeling more federal money into an effort to improve the youngsters' basic learning skills, but it raises a red flag that should cause all of us to take a closer look at the problem. What on earth is wrong with the educational process in this country, particularly in the cities? How could it have deteriorated to the point where the federal government has to pour additional millions of dollars into school systems because they have failed to teach children how to read, write and add? And why have parents allowed this to happen?

The federal money may help. But it seems to us that the real help must come from the basic source: The combined efforts of school administrators, teachers, parents and the children themselves. If they can work together, as some are learning to do in Chicago, to promote education as the essential thing it is, they can upgrade the quality of education. If they don't, no amount of federal money can help.

That's our opinion. We'd welcome a reply.●

NATIONAL PORT WEEK

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. MURPHY of New York. Mr. Speaker, I am pleased to introduce today legislation with our first 50 cosponsors for "National Port Week." The initial response by my colleagues demonstrates that they recognize the importance our ports have in expanding our national development. Presently, our ports spend substantial amounts of money on Federal requirements for environmental protection, employee health and safety, and cargo security. These are social and economic benefits which all Americans derive from port activities.

I thank these Members for their support and look forward to my other colleagues joining us in cosponsoring joint resolutions authorizing the President to proclaim the week of September 17, 1978 as "National Port Week." The list of our first 48 cosponsors follows:

Mr. JOHNSON of California; Mr. ADDABBO; Mr. AKAKA; Mr. ANDERSON of California; Mr. BEVILL; Mr. BONIOR; Mr. BONKER; Mr. BURGENER; Mr. PHILLIP BURTON; Mr. CARNEY; Mr. CLAY; Mr. CORRADO; Mr. D'AMOURS; Mr. DAVIS; Mr. DE LA GARZA; Mr. DE LUGO; Mr. DORNAN; Mr. EILBERG; Mr. FREY; Mr. GINN; Mr. HEFTEL; Ms. HOLTZMAN; Mr. HUGHES; Mr. JENRETTE; Mr. KAZEN; Mr. KETCHUM; Mr. LAGOMARSINO; Mr. LLOYD of California; Mr. LONG of Maryland; Mr. LOTT; Mr. MCCORMACK; Mr. MARKS; Mr. MITCHELL of Maryland; Mr. MICHAEL O. MYERS; Mr. NOWAK; Mr. OBERSTAR; Mr. RAHALL; Mr. ROBERTS; Mr. ROONEY; Mr. ROSENTHAL; Mr. ROSTENKOWSKI; Mr. TRIBLE; Mr. WEAVER; Mr. WHITEHURST; Mr. BOB WILSON; Mr. WOLFF; Mr. YOUNG of Alaksa, and Mr. ZEFERETTI.●

OTA STUDY OF ALTERNATE ENERGY STRATEGIES

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. OTTINGER. Mr. Speaker, along with my distinguished colleague from Maryland, Mr. LONG, I have today introduced legislation to direct the Office of Technology Assessment to conduct a major study of alternative energy strategies.

This proposal addresses itself to such questions as: Where are our present energy policies and programs taking us? Where would alternatives to those policies likely lead? If we should so decide, how would we change course?

For the past few years now, we have been seeking ways to produce energy in order to reduce our dependence upon oil and natural gas. I have become firmly convinced that our Nation can produce all of the energy it needs to grow and prosper from a number of different sources. Our attention must now also be turned toward the consequences of our energy programs and policies. The real question is no longer how to produce energy, but what economic, social, and environmental price are we going to pay.

The truth of the matter is that the policies put into effect in the next few years by the Federal Government will largely shape the future of our people. Because energy supply patterns were critically important to past growth, it is difficult to imagine a future in which the same will not also be true.

The joint resolution which we introduced today directs OTA to formulate, analyze, evaluate, and compare a broad and diverse spectrum of energy scenarios for the short-, mid- and long-term future. A scenario is a sketch of a technically possible future based upon a specific combination of assumed policy and technology goals and trends.

Nine scenarios are specified, ranging from intensive synthetic fuel development and enhanced oil recovery to maximum solar energy utilization. OTA is authorized to consider other possible futures, as they feel necessary. The scenarios span a range of growth patterns in energy use commonly associated with the supply options espoused by various political, scientific, and social groups.

The real heart of the proposal, however, is not in scenario modeling. In fact, OTA is directed to use existing scenario work where appropriate. The major purpose of this proposal is to answer the questions raised by sections 2 and 3; respectively, strategic planning and energy impact analysis.

These sections would provide Congress with a comprehensive social benefit/social cost analysis of alternative levels of energy growth of all relevant energy systems. Such an analysis would consider a broad list of economic, social, and environmental factors as well as the interrelationships between the energy systems themselves, for example, does accelerated coal development mean retarded nuclear development, what secondary impacts are generated due to such conflicts, and so forth.

The study which we are calling for today would provide Congress with the information necessary to make the debate over various energy paths one of intelligence and reason, rather than a contest between myths and propaganda.

During the extensive work which went into preparing this resolution, I requested comments from OTA regarding the appropriatness of this proposal. Former Acting Director, Daniel DeSimone, stated:

Enclosed is a list of studies of which we are aware. Within some of these studies are individual scenarios similar to one or more of those in the proposed resolution. However, in none of the studies are we aware of a focus on developing a series of policies to implement given strategies, assessing the impacts of the policies for each strategy and comparing the strategies so that national policy-makers can consider them.

An identical resolution has been introduced in the Senate by Senator WENDELL ANDERSON, along with Senators HART, BUMPERS, PERCY and CASE. Inquiries and cosponsorship requests about this proposal are being handled by Karl Gawell, telephone: 225-6506.

There being no objection, I ask that the text of this resolution follow my comments in the RECORD:

H.J. Res. 800

Joint resolution to direct the Office of Technology Assessment to undertake a comprehensive evaluation of energy policy alternatives

Whereas, the strength and stability of our economy, the nature and quality of employment opportunities, the latitude which the Nation will have in pursuing an independent foreign policy, the choices which individuals will have in styles of living, the degree of Federal control over private decisions, the quality of the natural environment, and the security and welfare of the Nation in the immediate and indefinite future will be affected by the energy policy choices of the Federal Government;

Whereas, previous Federal studies of our energy options are inadequate for the responsible formulation of public policy because they do not consider or adequately resolve a number of issues which are crucial to the determination of such policy, including the extent to which our Nation can reduce its growth in energy consumption and sustain balanced economic growth, the maximum and minimum of our strategic energy supply and demand options, the trade-offs which may be necessary in the future between environmental and energy goals, and the measures which would be necessary if for any reason the development of a key technology was constrained; and

Whereas, each plausible pattern of energy supply and demand development should be closely examined and compared systematically, and the potential impact and costs of the corresponding strategies of the Federal Government should be thoroughly evaluated before making a commitment to an energy policy which may be irrevocable and which may have widespread and long-lasting repercussions: Therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

STUDY

SECTION 1. The Office of Technology Assessment is hereby authorized and directed to study energy strategies and prepare and transmit to the Congress—

(1) within 9 months of the date of the enactment of this resolution, an interim report of its preliminary findings together with a summary of actions to be taken under this resolution; and

(2) within 18 months of such date of enactment, a final report in accordance with section 2 of this resolution.

CRITERIA

SEC. 2. (a) The report under section 1(2) of this resolution shall include detailed formulations, evaluations, and comparisons of a full range of energy policy strategies for the short-, mid-, and long-term future. Such strategies shall include—

(1)(A) one strategy based on a set of assumptions associated with (i) a level of gross national energy use of approximately 140 quads per year in the year 2000 and (ii) a maximum use of synthetic fuels and enhanced oil recovery techniques,

(B) one strategy based on a set of assumptions associated with (i) such a level of energy use and (ii) intensive electrification, and

(C) one strategy based on a set of assumptions associated with (i) such a level of energy use and (ii) rapid energy self-sufficiency,

(2)(A) one strategy based on a set of assumptions associated with (i) a level of gross national energy use of approximately 110 quads per year in the year 2000 and (ii) maximum use of solar energy,

(B) one strategy based on a set of assumptions associated with (i) such a level of energy use and (ii) limited use of power derived from coal, and

(C) one strategy based on a set of assumptions associated with (i) such a level of energy use and (ii) rapid energy self-sufficiency; and

(3)(A) one strategy based on a set of assumptions associated with (i) a level of gross national energy use of approximately 80 quads per year in the year 2000 and (ii) maximum use of solar energy.

(B) one strategy based on a set of assumptions associated with (i) such a level of energy use and (ii) a phaseout of nuclear power, and

(C) one strategy based on a set of assumptions associated with (i) such a level of energy use and (ii) rapid energy self-sufficiency.

(b) Strategies contained in such report—

(1) in the case of strategies described in paragraph (3) of subsection (a), shall be designed to conform energy equipment to end-use needs with respect to scale, geographic distribution, and energy quality;

(2) in the case of strategies described in paragraphs (1)(C), (2)(C), and (3)(C) of subsection (a), shall assume a cessation of imports of fossil fuels into the United States on or before January 1, 2000;

(3) in the case of the strategy described in paragraph (2)(B) of subsection (a), shall assume that the use of coal for producing power will not increase over the approximate level of use during 1990;

(4) in the case of the strategy described in paragraph (3)(B) of subsection (a), shall assume a cessation of use of nuclear powerplants within the United States on or before January 1, 2020; and

(5) in the case of each strategy described in subsection (a), shall specify the gross primary and delivered energy use per year within the United States, including the source, technology, and end use with respect to such energy.

(c) The report under subsection (a) shall include a strategic implementation plan corresponding to each strategy which shall include findings of—

(1) the principal institutional characteristics of commercially operating start-up, transitional, and full scale industries for each emerging technology;

(2) the policy options to meet commercialization requirements, estimating cost to the Government, timing, and rate of market penetration;

(3) the policy options to remove or mitigate actual or potential implementation barriers;

(4) the existing capacity for the manufacture of energy (and supporting) equipment and lead times necessary for the development of additional capacity;

(5) the possible roles of State and local governments and actions required by them to achieve the goals of each alternative; and

(6) the necessary Federal energy research, development, and demonstration program, including an estimate of the technology priorities, reorientation requirements, and budget level.

(d) The report under subsection (a) shall include analyses, evaluations, and comparisons of the international, national, and (as appropriate) regional and local impacts of each strategy with respect to—

(1) national security;

(2) economic prosperity (especially concerning growth, stability, resource availability, employment, income distribution, inflation, corporate profits, and balance of payments);

(3) environmental quality (especially concerning air and water pollution, solid wastes, and climate);

(4) social welfare and organization (especially concerning equity in sharing costs and benefits of energy programs, health and safety, occupational displacement, industrial infrastructure, and individual lifestyles);

(5) land use (especially concerning agriculture and urban design);

(6) politics (especially concerning interest groups which stand to gain or lose as the result of a particular energy strategy or any portion thereof);

(7) international economic development and stability; and

(8) any other aspect which the Office of Technology ssessment may deem to be relevant to the purposes of the report.

(e) The Office of Technology Assessment is directed to select and utilize the best available methodological, analytical, and evaluative techniques, and to include in the report under subsection (a) explanations of and justifications for the methodological, technical, environmental, economic, demographic, social, institutional, and other assumptions made in carrying out the provisions of this resolution.

(f) In preparing the report under this subsection, the Office of Technology Assessment shall use, to the extent it considers appropriate, information and analyses from any qualified source. Any such use shall be subject to the requirements of subsection (e).

DEFINITIONS

SEC. 3. For purposes of this resolution—

(1) the term "nuclear power" means power derived from the application of fission technologies;

(2) the term "quad" means one quadrillion British thermal units;

(3) the terms "short-, mid-, and long-term future" means the date of the adoption of this resolution through 1985, 1986 through 2000, and after 2000, respectively;

(4) the term "solar energy" includes all the meanings and technologies included within the definition of that term in section 3(1) of the Solar Energy Research, Development, and Demonstration Act of 1974 (88 Stat. 1431; 42 U.S.C. 5552) and also within the definitions of the terms "solar heating", "solar heating and cooling", and "combined solar heating and cooling" in sections 3 (1) and (2) of the Solar Heating and Cooling Demonstration Act of 1974 (88 Stat. 1070; 42 U.S.C. 5502); and

(5) the term "synthetic fuels" includes fuels derived from coal, oil shale, or biomass.

APPROPRIATIONS AUTHORIZATION

SEC. 4. There is hereby authorized to be appropriated such sums, not to exceed $2,000,000, as may be necessary to carry out the provisions of this resolution.●

TAX EXCLUSION FOR NATIONAL RESEARCH SERVICE AWARDS

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

Mr. CARTER. Mr. Speaker, today I am introducing legislation to clarify present tax law to provide a permanent tax exclusion for National Research Service Awards, which are federally funded awards to support biomedical and behavioral research training at both the predoctoral and postdoctoral levels. The National Research Service Awards program, which is authorized under section 472 of the Public Health Service Act, by title I of Public Law 93–348, represents the continuation of a longstanding congressional commitment of almost 50 years to provide Federal support for research training.

Under this program, the Secretary of HEW is directed to make awards to predoctoral and postdoctoral individuals and to institutions training such individuals. In fiscal year 1977, approximately 9,000 people received research training support under the National Research Service Awards program for a total of about $114 million. Awards were made through the National Institutes of Health, the Alcohol, Drug Abuse, and Mental Health Administration, and the Nursing Division of Health Resources Administration.

In return for such support, the award recipients are required to fulfill a service obligation, usually by engaging in research or teaching for 1 year for each year of support. In the past, recipients of research training stipends who were doctoral degree candidates have been allowed to exclude their awards from taxable income. Postdoctoral recipients of awards have been permitted to exclude up to $300 per month for a maximum of 36 months.

However, a recent Internal Revenue Service ruling has drastically affected the tax status of these awards. The IRS ruled in September 1977, that all research stipends paid under the National Research Service Awards Act of 1974 were and are fully taxable, thus imposing tax liability retroactively to 1974.

Recent testimony before the Health and Environment Subcommittee on which I serve has drawn attention to this problem and has documented the serious detrimental impact of this ruling on the future viability and attractiveness of the NRSA program. Moreover, it has been estimated that as many as 11,500 award recipients will have to pay unexpected retroactive taxes, unless Congress acts to amend the law. Clearly continuation of this new tax policy would impose a severe hardship on all recipients of these awards, and would undermine future recruitment efforts. To my knowledge, Congress did not intend to tax these awards when it established the program.

The legislation I am introducing would treat National Research Service Awards as tax-free scholarships or fellowships under section 117 of the Internal Revenue Code of 1954, which generally excludes such amounts from gross income, and thus from taxation. The effect of this bill would be to allow predoctoral award recipients to exclude the entire amount of their awards from gross income, as the law currently allows for most other scholarships programs. Also, the bill would allow postdoctoral award recipients to exclude up to $300 per month for a maximum of 36 months, as was the case under previous research training authority.

Mr. Speaker, the National Research Service Award program fills a unique and important national need, and I am deeply concerned that its future viability is threatened by this tax ruling I have described. Our Nations' continued excellence in the worldwide biomedical and behavioral research community depends upon a strong research training program. I urge adoption of the approach embodied in this legislation so that we can effectively carry out our commitment to attract and train outstanding researchers.●

TRAGEDY IN THE MIDDLE EAST

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Ms. OAKAR. Mr. Speaker, I am appalled and saddened by the recent violence and tragedy in the Middle East. Clearly, it was outrageous that certain Palestinian terrorists brutally killed 35 innocent civilians. This senseless killing is what we are told motivated the massive Israeli attack on southern Lebanon which devastated five villages and killed hundreds of people, including the senseless killing of civilians. The killing of these innocent men, women, and children in both instances is inexcusable and abhorrent. Our Government cannot remain silent. It is our obligation in our quest for human rights and dignity to speak out. We should let the world know that violence as a means will never insure a peaceful end.●

ERIN GO BRAGH

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. FOWLER. Mr. Speaker, tomorrow throughout the world those of Irish descent are celebrating one of our most glorious holidays, St. Patrick's Day. To Irishmen everywhere I say "Slinte" and request that this poem by William Butler Yeats be placed in the RECORD so that we may all appreciate the beauty that is Ireland.

TO IRELAND IN THE COMING TIMES

Know, that I would accounted be
True brother of a company
That sang, to sweeten Ireland's wrong,
Ballad and story, rann and song;
Nor be I any less of them,
Because the red-rose-bordered hem
Of her, whose history began
Before God made the angelic clan,
Trails all about the written page.
When Time began to rant and rage
The measure of her flying feet
Made Ireland's heart begin to beat;
And Time bade all his candles flare
To light a measure here and there;
And may the thoughts of Ireland brood
Upon a measured quietude.

Nor may less be counted one
With Davis, Mangan, Ferguson,
Because, to him who ponders well,
My rhymes more than their rhyming tell
Of things discovered in the deep,
Where only body's laid asleep.
For the elemental creatures go
About my table to and fro,
That hurry from unmeasured mind
To rant and rage in flood and wind;
Yet he who treads in measured ways
May surely barter gaze for gaze.
Man ever journeys on with them
After the red-rose-bordered hem.
Ah, faeries, dancing under the moon,
A Druid land, a Druid tune!

While still I may, I write for you
The love I lived, the dream I knew.
From our birthday, until we die,
Is but the winking of an eye;
And we, our singing and our love,
What measurer Time has lit above,
And all benighted things that go
About my table to and fro,
Are passing on to where may be,
In truth's consuming ecstasy,
No place for love and dream at all;
For God goes by with white footfall.
I cast my heart into my rhymes,
That you, in the dim coming times,
May know how my heart went with them
After the red-rose-bordered hem.●

SEVENTY PERCENT OF AMERICANS FAVOR A VOTE BY THE HOUSE OF REPRESENTATIVES ON THE GIVE-AWAY OF THE PANAMA CANAL

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. HANSEN. Mr. Speaker, I have just been informed of the results of a nationwide poll conducted by the Opinion Research Corp. of Princeton, N.J., from February 24 to February 27. Seventy percent of those Americans surveyed said that because of the clear-cut prerogatives contained in article IV of the U.S. Constitution, the House of Representatives should be involved in voting on whether or not to give away the Panama Canal. Only 17 percent of those surveyed did not favor a House vote.

The Senate Judiciary Subcommittee on Separation of Powers recently issued a report concluding that—

> Having studied thet issue of the authority of Congress to dispose of territory or property belonging to the United States as set forth in Article IV, Section 3, Clause 2 of the Constitution, (the Committee) finds that the said power of Congress is exclusive and that the Constitution requires that Congress (both Houses) authorize, by the enactment of appropriate legislation, any disposition of the property of the United States in the Isthmus of Panama.

To reaffirm these constitutional prerogatives I have introduced House Concurrent Resolution No. 345, which presently has 231 cosponsors, representing 47 States which is designed to prevent the transfer of any rights or title in the Canal Zone without an act of Congress. Other Members have also introduced resolutions similar to mine.

In view of the current Senate deliberations on the canal treaties, it is imperative that the will of the House, which has been consistently expressed on a score of previous occasions with respect to the disposition of U.S. property, be properly exercised again. Therefore, to my colleagues I say if you have not already cosponsored, I urge you to take this opportunity to be included among those of us who are asserting that only an act of Congress, involving both the House and the Senate, may dispose of the Canal Zone and related property.

My resolution calls for one thing—a chance for the House as well as the Senate to vote "yes" or "no" on transfer of canal property. This is a constitutional issue and not one of partisan politics. It is our duty as the elected representatives of the people to assure that their voice is heard. The Constitution calls for it—now we must assert ourselves and demand it. Our stand must be perfectly clear to the President and all of America—we cannot accept a transfer of a major U.S. asset without House as well as Senate consent. Neither can we permit the payment of major sums of money to Panama without explicit appropriations authority from the Congress as outlined in article I.

My resolution is currently before the Merchant Marine and Fisheries Commit-

tee and variations have been introduced and referred to the Armed Services and Veterans' Affairs Committees. The legislation which is in the Armed Services Committee is cosponsord by 33 of the 41 committee members, including the chairman and the ranking minority member, all Republicans and over half of the Democrats. The resolution in Merchant Marine Committee is cosponsored by 26 of the 41 members including the chairman and the ranking minority member and all Republicans and nearly half of the Democrats.

The bill, referred to the Veterans' Affairs Committee, introduced to prevent arbitrary and precipitous action, came as a result of information which I recently obtained revealing that 4,903 U.S. citizens, 909 of whom are veterans, are interred in the two cemeteries located within the Canal Zone. The administration has admitted to overlooking the disposition of the cemeteries in the negotiating of the proposed treaties. The Panamanians have said that they would prefer that all U.S. graves be consolidated in one cemetery. The administration which had loudly contended that no funds would need be appropriated to implement the Panama Canal giveaway has now conceded that there will be a cost, and in this one unforeseen project alone the expense will be approximately $350,000 to move some 1,500 graves from Mt. Hope Cemetery to Corozal Cemetery. This request has not been presented to the House Veterans' Affairs Committee.

Mr. Speaker, to further elaborate on matters of title and cost I include for the RECORD a paper prepared for the Merchant Marine and Fisheries Committee by Mr. W. M. Whitman concerning U.S. property in the Canal Zone. This material is extremely valuable in any considerations of the Panama Canal issue and I commend it highly to my colleagues:

PROPERTY OF THE UNITED STATES IN THE CANAL ZONE

Property of the United States in the Canal Zone includes 647 square miles of land and land under water and improvements acquired at a total cost of $1.6 billion, of which about $171 million represents the cost of the real property and about $1.4 billion represents the cost of improvements, principally the waterway and its adjuncts.

Real property—Title to the real property in the Canal Zone was acquired through (1) purchase of the assets of the French Canal Company, including 98% of the capital stock of the Panama Railroad; (2) grants by Panama in the 1903 treaty of Panama's reversionary rights in the real property owned by the French Canal Company and Panama Railroad Company, as well as grants in perpetuity of the use, occupation and control of other land in the Canal Zone for construction and operation of a transisthmian canal; and (3) purchase or expropriation pursuant to the 1903 treaty of the interests of private owners or claimants to real property in the Canal Zone.

Real property of French Canal Company—The real property acquired by purchase of the assets of the French Canal Company included (1) fee titles to land purchased from private owners by the Company; and (2) the usufruct of public lands granted to the Company by the Republic of Colombia in 1878 by a concessionary contract for construction of a ship canal across the Isthmus of Panama (Wyse Concession). Under the terms of the concession, the lands granted were to revert to Colombia 99 years after completion of the canal. Colombia's reversionary rights passed to Panama upon Panama's acquisition of sovereignty over the area, and as previously noted Panama granted such reversionary rights to the United States in the 1903 treaty. (Arts. VIII and XXII).

The area of the real property obtained through purchase of the assets of the French Canal Company, exclusive of Panama Railroad property was estimated in 1911 at 101 square miles. (Sen. Doc. No. 191, 62nd Con., 2nd Sess., Senate Committee on Interoceanic Canals, p. 256.)

The United States paid $40 million to the French Canal Company for its assets in 1904. Payments to Panama for the grants contained in the 1903 treaty include a lump sum payment of $10 million, annual payments through 1976 of $56.6 million, and transfers of real property with a total value of $34.7, a total of $101.3 million. In addition, the United States has paid to Colombia $25 million under a 1922 treaty for the settlement of differences arising out of the 1903 events involved in the construction of the canal in Panama. The total amount of all these payments is $166,289,686.

Panama Railroad Company.—The assets of the French Canal Company purchased by the United States in 1904 also included about 98% of the outstanding shares of stock of the Panama Railroad Company. The remaining stock was purchased from individual owners in 1905 for $150,000. The assets of the Panama Railroad Company in turn included the usufruct of public lands now included in the Canal Zone granted in 1850 by a concession from the Republic of New Granada (the predecessor of Colombia) for a period of 99 year ending August 16, 1966, full title to some 150,000 acres granted to the Railroad by the Republic of Colombia in 1866, and full title to lands on the Isthmus of Panama purchased from private owners. Article III of the 1903 treaty with Panama renounced and granted to the United States all rights, title and intrest in the lands or other property of the Panama Railroad Company, including reversionary rights which would have accured to Panama under the Panama Railroad Concession. In 1911, the area of land owned by the Panama Railroad Company in the Canal Zone was estimated at about 104 square miles. (Sen. Doc. No. 191, 62nd Cong., 2nd Sess., Hearing Senate Committee on Interoceanic Canals, p. 256.)

Private titles.—Articles II and VI of the 1903 treaty with Panama had the effect of authorizing the United States to purchase or expropriate privately owned land in the Canal Zone, and provided for payment by the United States of damages to owners of private lands as determined by a Joint Land ommission, provided for in Article XV.

Sec. 3 of the Panama Canal Act of August 24, 1912, now incorporated in section 331 of title 2 of the Canal Zone Code, authorized the President to declare by Executive Order that all land in the Canal Zone was needed for canal purposes and to extinguish all private title. Such an Executive Order was issued on December 5, 1912, and the Isthmian Canal Commission issued a notice of taking all privately owned lands in the Canal Zone, pursuant to the statute and Executive Order. In 1911 the area of land in the Canal Zone acquired by the United States by direct purchase or expropriation was estimated at about 83 square miles. (Sen. Doc. No. 191, 62nd Cong., 2nd Sess., p. 256)

The action of the oint Commission convened pursuant to Arts. VI and XV of the 1903 treaty on the claims of private owners based on the 1912 statute and Executive Order are set out in the final report of the Joint Commission.

The cost of acquisition of private titles to land in the Canal Zone is shown in the accounts of the Panama Canal Company as $4,728,889.

Improvements and other assets.—The acquisition cost of property other than real property, plant and equipment of the Panama Canal Company and Canal Zone Government is shown on the books of those agencies as $958,134,622. Other assets of the two agencies are valued at $103,913,359. (Annual Reports, Panama Canal Company and Canal Zone Government, 1976, pp. 26, 30, 138.) Appropriations for military construction in the Canal Zone from 1904 to 1974 are reported as $310,200,000, bringing the total original cost of U.S. Government property in the Canal Zone and the value of other assets to $1,062,047,971. (118 Cong. Rec. p. 13154; 120 Cong. Rec. p. 38294.)

The property, plant and equipment were acquired over the period 1904 to 1976 and the costs reflect the prices in effect at the time of acquisition. At 1976 prices the replacement cost would be several times greater. The Governor of the Canal Zone recently estimated that the replacement cost of the Panama Canal Company property, plant and equipment at today's prices would be about $3.5 billion. (Hearing, Committee on the Judiciary, Subcommittee on Separation of Powers, August 3, 1977.)

A significant element in the value of many of the properties of the Panama Canal Company is that they are elements of going business-type, revenue producing activities. The financial results of operation of such enterprises are set out in the Hearings of a subcommittee of the Committee on Appropriations on the Department of Transportation and Related Agencies Appropriations for 1978, at pages 686 et seq. A partial list of the categories of properties included in the total cost of property, plant and equipment is shown in Attachment 4.

PROPERTY OF THE UNITED STATES IN THE CANAL ZONE

Property	*Area*	*Cost*
Real property (sq. miles)	647	$171,018,575
Improvement and other assets:		
Panama Canal (1976)		1,062,047,971
Military construction (to 1974)		310,200,000
Total improvements		1,372,247,971
Total		1,543,266,546

REAL PROPERTY OF THE UNITED STATES IN THE CANAL ZONE

Derivation of Title or Interest

Type and Area Sq. Miles	
Fee titles from French Canal Company	101
Fee titles Panama Railroad Company	104
Private titles of miscellaneous owners	83
Usufruct in Public Lands of Republic of Panama	359
Total area	647

COST OF REAL PROPERTY OF THE UNITED STATES IN THE CANAL ZONE

Payments to	*Cost*
1. Republic of Colombia	$25,000,000
2. Republic of Panama	
Lump sum 1904	10,000,000
Annuity 1904–76	56,600,000
Property transfers	34,689,686
Total	101,289,686
3. New Panama Canal Company	40,000,000
4. Panama Railroad Company (included 3)	
5. Private titles	4,728,889
6. Public Lands (included, 1 & 2)	
Total cost	171,018,575

PROPERTY, PLANT AND EQUIPMENT OF PANAMA CANAL COMPANY AND CANAL ZONE GOVERNMENT

The property, plant and equipment of the two agencies include the following principal categories:

	Cost in millions
Panama Canal Company:	
Canal excavations, channels, etc.	$323.8
Locks	111.5
Vessel repair facilities	16.4
Dams and spillways	10.1
Marine bunkering facilities	9.2
Harbor terminals	19.5
Housing	52.2
Retail stores	11.4
Railroad	13.3
Electric power system	43.8
Water System	15.8
Communications system	8.6
Warehouses	2.2
Canal Zone Government:	
Schools	29.2
Roads, streets and sidewalks	21.5
Hospitals and clinics	17.3

●

COUNCILOR ROGER P. TACHE

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mrs. HECKLER. Mr. Speaker, the city of Fall River is fortunate to have among its newly elected councilors Roger P. Tache. I am honored to add my congratulations and best wishes to him, and am pleased to be able to count Roger as one of my dear friends.

Roger is a man who brings to the city council the benefits of his experience in both government and private industry. As an aide to our beloved former Governor and Ambassador John A. Volpe, Roger was noted for his integrity and his abilities. He is a man of proven compassion for his fellowman and has devoted endless hours of his time to the improvement of institutions such as the Fall River Home for the Aged, the Union-Truesdale Hospital, the American Cancer Society, and the Salvation Army.

He is certainly a man of deep commitment to the service of his community which is truly what politics is all about. As Andrew Oliver, a precolonial Lieutenant Governor of Massachusetts once said:

Politics is the most hazardous of all professions. There is not another in which a man can hope to do so much good for his fellow creatures. Neither is there any in which by a mere loss of nerve he may do so much widespread harm. Nor is there another in which he may so easily lose his soul. Nor is there another in which a strict and positive veracity is so difficult. But danger is the inseparable companion of honor and with all the temptations and degradations that beset it, politics is still the noblest career that any man may chose.

Roger Tache has chosen to add an unlimited dedication to the people of Fall River as a public portion of his career. In him the voters have made an admirable choice. I welcome Roger Tache as a colleague in Government and offer my warmest wishes to Roger and Nancy and the Tache family for every success in this important new phase of their lives.●

ALASKANS SUPPORT H.R. 39

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. UDALL. Mr. Speaker, the House Committee on Interior and Insular Affairs is currently completing debate and mark-up on H.R. 39, the "Alaskan National Interest Lands Conservation Act." This legislation is perhaps the most important conservation initiative since President Teddy Roosevelt created our great National Forests at the turn of the century. The widespread support this legislation has received is clearly documented in the committee's extensive hearing records. Well over 2,000 Americans from all walks of life testified at the various hearings scheduled throughout the "lower 48" and Alaska. Unfortunately, many opponents of this legislation have tried to convey the mistaken impression that a majority of Alaskans oppose this legislation. Nothing could be further from the truth; the following letter from Fairbanks Assemblyman Keven Harun should help set the record straight.

FAIRBANKS NORTH STARBOROUGH,
March 7, 1978.

DEAR CONGRESSMAN UDALL: I want to dispel accusations made (particularly those made by Representative Meeds) that Alaska's economic development and position as America's energy breadbasket may be hindered by the Subcommittee's proposed D2 legislation. Furthermore as a public official elected at large from Fairbanks, Alaska's second largest municipality, I wish to give some greater insight into how many Alaskans view this legislation.

As one who has observed great developmental pressures in Alaska, I believe that we urgently need to direct and channel economic growth such that noneconomic values are protected. I see protection afforded by proposed D2 legislation as a balance to the inevitable developments which are already changing the face of Alaska.

To be sure, the issue at hand is not one of growth versus no growth. Just recently I met with members of the Anchorage Municipal Assembly (representing Alaska's largest city). Here in Anchorage the debate is now centered on whether Anchorage will attain a population of 700,000 or one million residents within the next twenty to twenty-five years. Already Anchorage has well surpassed the 200,000 population mark, and with the capital move slated to within 50 or so miles of Anchorage, urban sprawl from Anchorage to this capital site already seems a fact of life. Anchorage is pressuring for a Knik Arm Crossing to link the Municipality of Anchorage with the other side of the inlet. Already a road has been extended on the other side of this inlet, along with sprouting subdivisions, to meet this anticipated crossing. And are you aware that an 18 lane New Seward highway has been proposed for Anchorage? (Yes, believe it or not.)

Anchorage is only one source of pressures upon Alaska. This fall Alaskans will vote on an initiative to dispose of 30 million acres of "free land" to resident individuals with per capita amounts based upon length of residency in Alaska. Needless to say, if this so-called Beirne initiative passes and becomes law, one-tenth of Alaska in total and one-third of all state land (roughly) will revert to private ownership and subsequently to speculation and exploitation. Considering that including the Alaska Native Land Claims Act allocations, Alaska will have the highest per capita amounts of land in private ownership of any state, this initiative may serve as a magnet to attract people to free land in Alaska. Thirty million acres of additional acres in private ownership is a heck of a lot of land for 425,000 people.

The initiative serves to illustrate the tremendous political pressures for development already existing upon state government in Alaska. For instance, I recently walked into a district office of the State Department of Transportation and there, sprawled along an entire wall were plans for the proposed Road to Nome which is to link the interior with western Alaska. This road is only one of a proposed spider web of possible new roads across Alaska. Already the legislature has voted to begin funding a railroad link from interior Alaska to the lower-48. Preliminary studies are now under way for the Susitna River Dam Project, which incidentally will be larger than the Aswan Dam. There are many pressures upon the state to open up the Haul Road (pipeline) all the way to the Arctic Ocean.

Here in my own community of Fairbanks, plans are being made to use North Slope natural gas for a multi-billion dollar world scale petrochemical complex. Other petrochemical complexes and refineries are slated for south-central Alaska.

Let us not forget the Native Corporations and their impact upon the economic development of Alaska. These corporations possess or will possess 4 million acres of private land. Under the land claims act of 1971 taxes are due on these holdings in 1992, and already the development schemes are emerging. And then there's the many large federal energy projects in Alaska: OCS developments, pipelines etc. We shouldn't forget either, the vast amounts of revenues which will accrue to the State of Alaska through royalty payments, taxes, and land/lease disposals.

I have mentioned only the tip of the iceberg in probable/possible economic developments. The point I am trying to make is that Alaska's economic viability is not at stake in the Subcommittee's proposed legislation. Our state already possesses the economic potential: the richest of oil and gas lands, agricultural lands, and mineralized areas. What is needed is planned, careful utilization of these resources and protection for a large portion of Alaska's lands as a balance. As I see it unless certain federal lands are protected from random easements and easy exploitation we're going to see random exploitive types of development across Alaska. Certain lands should also be free from extensive mineral exploration unless it can be demonstrated that these lands contain minerals of clear national need. The wilderness values in Alaska are very precious and we should therefore proceed with caution on at least a portion of Alaska.

The Meeds' amendments do not go nearly far enough in providing this balance to economic developments. The sheer amounts of proposed wilderness (only 33 million acres out of 365 million) are far too small. Furthermore, Southeast Alaska deserves some protection.

Congressman Meeds has stated that he doesn't "think the current (subcommittee) bill is fair to the people of Alaska" and that "the environmentalists are more interested in stopping growth and development rather than preserving the land." Clearly, the Subcommittee proposal will not bring a halt to economic development in Alaska. As far as Alaskans feel about D2, I believe most want to see some protection for federal lands. Unfortunately, politics in Alaska tends to be dominated by developmental interests. And many Alaskans who would otherwise be supportive of protection of the land (1)

don't like the idea of federal meddling and (2) have been led to believe that the proposed legislation will wipe out their way of life or their dreams of a wilderness cabin or homesite. Still, many Alaskans do support protection as is most recently evidenced by the Rowan poll released last week by the State Steering Council for Alaska lands. According to this report, 61% of all Alaskans agree that "certain public lands in Alaska deserve receiving permanent protection as national parks and wildlife refuges even though (they) may not be able to visit all of them". This sentiment was also shown during the Subcommittee's hearings in Alaska last summer.

I wish to add that Alaska is really different from the lower-48. We need flexibility with the Wilderness Act of 1964 provisions so that we can continue to use motorized vehicles and aircraft for access. Hunting and trapping are essential to the survival of many Alaskans and there should be guarantees of flexibility even within the existing management systems.

In conclusion Congressman, I urge you to support the Subcommittee on General Oversight and Alaska Lands' proposal and likewise reject the Meeds' amendments.

Very Sincerely,

KEVIN A. HARUN,
Borough Assemblyman.●

OUTER CONTINENTAL SHELF RESOURCES

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. BIAGGI. Mr. Speaker, this past week I had the rewarding opportunity of addressing the sixth annual meeting of the National Ocean Industries Association here in the Nation's Capital.

This event was particularly timely in view of recent actions by two of the three branches of our Federal Government—that of the U.S. Supreme Court in the case of *Ray* v. *Arco*, 76–930, and in House action by the passage of H.R. 1614, the Outer Continental Shelf Lands Act Amendments of 1978.

These combined actions have the effect of improving the process of Outer Continental Shelf oil and gas development of and approving the exploitation of our vitally needed domestic offshore oil resources, especially along the eastern seaboard. We must now proceed with all dispatch in performing the monumental tasks that lie ahead in this national effort.

I enclose for the RECORD what I consider are some important words on the vital roles played by industry, the executive branch, and the Congress—constituting a working partnership in the promotion and attainment of universally desirable goals such as safety, health, and environmental protection. In order to reach my colleagues and the public whom we all serve, I am submitting my remarks for inclusion in the RECORD:

OUTER CONTINENTAL SHELF RESOURCES

Good afternoon. While reading some National Ocean Industries Association literature, I came across a quote from former President Theodore Roosevelt that aptly summarizes why you, the members of the offshore industry, are here today. He said:

"Every man owes a part of his time and money to the business or industry in which he is engaged. No man has a moral right to withhold his support from an organization that is striving to improve conditions within his sphere."

The members of this organization must have taken this maxim seriously, carrying your message as far as the U.S. Supreme Court.

To this I would add my own philosophy on the inter-relationship between business and government. I see it as a three-way partnership among industry, the executive branch (in this case, the U.S. Coast Guard), and the Congress.

Lacking the experience of personal participation on the Ad Hoc Select Committee on the Outer Continental Shelf, as well I have no preconceived views on the prospect of offshore oil exploration and exploitation on the eastern seaboard. I am convinced that Georges Bank and Baltimore Canyon oil and gas, if discovered, must be produced.

Representing an area that has suffered the loss of almost a million jobs since 1969 (the same year as the Santa Barbara oil spill), it hardly needs repeating that your industry and the nation have come a long way in our thinking. Prophetically, Continental Oil Company's first well in this area is to be drilled by the semi-submersible rig "new era".

The northeast and the oil and gas industry can both benefit from a commercially recoverable find off our coast. In fact, the race is now on among the Mid-Atlantic States to locate staging and support facilities for OCS operations. By the American Petroleum Institute's own estimates, at stake are 28,000 jobs, $177 million in annual income, and capital investment exceeding $300 million.

While we welcome you as a region, we have legitimate concerns which, as a member of the northeast delegation and as chairman of the Subcommitee on Coast Guard and Navigation, I will address today.

At our recent hearings on the annual Coast Guard budget authorization, these concerns were mirrored in discussions of marine safety and environmental protection of our coastal zone. It is clear that the members of my subcommittee look to the Coast Guard to preserve and protect these interests as we proceed to explore and develop offshore oil resources in the Atlantic frontier areas.

Complementing this, the Coast Guard's OCS marine safety program is presently expanding and will encompass:

(1) Inspection and certification of the design and operation of new U.S. flag mobile offshore drilling units, including jack-up and semi-submersible rigs and drill ships used in offshore oil exploration. These new responsibilities utilize existing Coast Guard authority and were developed in cooperation with the national offshore operators industry advisory committee. These proposed regulations will be presented to IMCO to form the basis for an international code for offshore drilling units.

(2) Adequate manning and inspection of the offshore supply industry, including those operators carrying passengers and equipment for hire.

(3) Safety of artificial islands and fixed structures on the OCS. Comprehensive revisions to the Outer Continental Shelf Lands Act of 1953 have now passed both Houses of Congress. Both S. 9 and H.R. 1614 contain language extending Coast Guard supervision over production platforms from the requirement for maintenance of minimum safety-of-life-at-sea equipment to the inspection and certification of design, construction, and operation of platform. Presumably, this review would extend to subsea completions as well.

(4) Maritime occupational safety and health of employees working on rigs and platforms on the OCS. Since last I spoke on this subject before the Associated Diving Contractors, OSHA's authority over the OCS has been subordinated to increased Coast Guard responsibility for occupational safety and health under the language of H.R. 1614, as passed. In addition, a new joint OSHA/Coast Guard program to resolve disputes, develop standards, and share capabilities in maritime occupational safety and health has been submitted to OMB. Commercial diving would be the first subject of regulation governed by the provisions of this agreement.

(5) The last area of maritime safety of concern to us is the avoidance of collisions between vessels and fixed or mobile structures on the OCS. I have requested a GAO study of the present devices used to demarcate offshore oil and gas operations and major shipping lanes. GAO is looking into approaches that involve predesignation of shipping lanes while permitting the requisite flexibility to accommodate the exploitation of major oil fields once discovered.

I am glad the "out of sight, out of mind" characterization of Atlantic OCS operations—predicated upon aesthestics—has been dropped. The simple fact is that nobody wants a major oil spill threatening East Coast beaches. While statistically such a catastrophic spill is likely, we must be vigilant and ready to respond to such an event.

My subcommittee added additional monies to the Coast Guard budget for marine inspectors, earmarked for OCS operations. I sponsored an amendment to add $5 million to the Coast Guard R&D budget, with the first priority for expenditure of these funds to improve the state of the art of high seas oil cleanup.

In contrast, the only resources given the Coast Guard by the administration to supplement its increased responsibilities in OCS safety and marine environmental protection—now extended by the Clean Water Act Amendments of 1978 to 200 nautical miles—was the addition of two high seas oil recovery packages to the Coast Guard inventory.

In terms of cleanup, I note the recent adoption of a new agreement between the U.S. Geological Survey and the Coast Guard governing OCS operations. The Geological Survey is charged with the cleanup of operational spills in the vicinity of rigs and platforms, while the Coast Guard is tasked with the responsibility to respond to major operational and accidental spills posing threats to land and the marine environment.

Most distressing is the fact that my super fund bill, H.R. 6803, which passed the House overwhelmingly last September, with industry's support, is now stalled in the Senate.

My last area of concern—which I mention with some hesitation—involves the security of fixed structures on the OCS. I am sure you are all aware that President Carter recently established our first anti-terrorist armed force, code named "Operation Bluelight." This is a sobering reminder of the state of global politics with the potential for spill-over into acts of political violence.

In the future, I see increasing emphasis on shared responsibility for security on the OCS—with the operator responsible for fixed structures, and the Coast Guard tasked with water-area surveillance. Recent possible instances of sabotage involving the Alaskan pipeline and a propane tank car derailment in Tennessee underscore this point.

Elaborating on my earlier comments on Government/industry partnership, I feel responsibilities exceed parochial concerns. I feel this constitutes a collective duty to im-

prove the quality of life for ourselves, our employees, and the Nation as a whole.

In this view, I offer the following requests for your consideration:

(1) I urge your continued support to effect the passage of the super fund legislation, covering all types of oil spills from all sources in a single liability and compensation scheme.

(2) I seek your support for the Biaggi amendment to improve high seas oil spill cleanup and recovery.

(3) I need your input. I have opened a new dialogue between the subcommittee and the Coast Guard. I now desire to expand that to include you, the third member of the partnership. Without this, we cannot effectively legislate, oversee agency operations, or respond to your concerns.

(4) On behalf of my constituents on City Island, Bronx, and on behalf of Staten Island, the shipyards, port facilities, and ancillary business in and around New York Harbor, I ask you to consider us as you choose staging areas, supply and repair bases, and contract for support services as offshore operations proceed. You'll love New York!!!

Thank you.●

SPILLOVER EFFECT OF A NEW YORK CITY BANKRUPTCY

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. MOORHEAD of Pennsylvania. Mr. Speaker, the Subcommittee on Economic Stabilization of the Banking Committee, as Members know, has been examining the question of further financial assistance to New York City following expiration of the present seasonal loan program at midyear. We have reached no conclusions. However, I do think that we have established beyond reasonable doubt one extremely important point: That a default or bankruptcy of New York City would have significant consequences beyond the City itself, primarily in the capital and foreign exchange markets. Among other things, every State and municipality in the country might suffer the effects in higher borrowing costs as a consequence of the "spillover" effects—perhaps mainly psychological but nonetheless real—on the municipal bond market.

I realize that some people have suggested that a New York bankruptcy has long been discounted and that its effects would therefore be contained and relatively minor for the rest of the country. This line of thought, while sincere, is almost certainly mistaken and dangerous. A New York bankruptcy would be very serious indeed.

To illustrate this point, I am inserting in the RECORD letters I have received in recent days from two men of great financial experience and impeccable credentials. One is Robert V. Roosa, the former Under Secretary of the Treasury for Monetary Affairs and now a partner in the banking firm Brown Brothers Harriman. The other is Richard D. Hill, chairman of the board of the first National Bank of Boston and recently chairman of the Federal Reserve Board's advisory council. Their letters are brief but unequivocal. I urge that my colleagues read and digest them. When Mr. Hill, for example, speaks of the possibility of a closing of the capital markets, we can all understand the magnitude of the risks.

The letters follow:

NEW YORK, N.Y.,
February 28, 1977.

Hon. WILLIAM S. MOORHEAD,
Chairman, Subcommitee on Economic Stabilization of the Committee on Banking, Finance and Urban Affairs, Washington, D.C.

DEAR BILL: This letter is a delayed reply to your letter of February 17 concerning the New York City situation. In the purely "hypothetical case of a city bankruptcy or insolvency," the destabilizing influence throughout the markets for municipal securities would be difficult to gauge, but certainly would be even more extreme than those occurring during the 1975 City crisis.

You ask specifically, though, that I concern myself with the implications for the foreign exchange markets. I have been canvassing a number of my contacts during the period since your letter arrived. The almost universal response is to say that this would rank in significance—as a further depressing influence on the dollar in the principal foreign exchange markets—with the impact of the enormous balance of payments deficit the United States has already incurred, so largely as a consequence of the country's $45 billion bill for imported oil last year. Various elements of a possible attack on the energy problem are, of course, of key importance. But I would stress that the impact of a collapse of New York City's finances could reopen the wounds in our external economic position even if real gains were to have been achieved in legislation and in physical results on the energy front.

As you suggested, I am excluding any reference to the question of Federal aid, but am commenting only on the "financial impact of a New York bankruptcy." The foreign exchange markets have become infused with fear, partly because the country has not taken strong measures to cope with the dollar problem. The disillusionment with American performance would become outright despondency in the event of a New York bankruptcy. The markets have reached a stage now where they have produced exchange rates for the dollar that are far beyond any relationship that would be indicated by comparative economic performance either in real or in price terms. Because of this overlay of confidence factors that has developed, a financial collapse in New York would have greatly magnified results, far beyond those that might otherwise be associated with such an event. It would imply to foreign observers, as it has to the dozens of financial and business figures abroad with whom I have now spoken, that even the "financial capital of the United States," cannot avoid insolvency.

I realize that this is not an expression in specific numerical terms. But in the present circumstances only the qualitative judgments of rather close observers can be meaningful. If there are aspects of this broad question on which any further comment of mine might possibly be useful, I hope you will ask Mr. Dale to get in touch with me again.

Meanwhile, with all good wishes in your endeavor,

Sincerely,

ROBERT V. ROOSA.

THE FIRST NATIONAL BANK OF BOSTON,
March 3, 1978.

Hon. WILLIAM S. MOORHEAD,
Chairman, Subcommittee on Economic Stabilization of the Committee on Banking, Finance and Urban Affairs, Washington, D.C.

DEAR MR. MOORHEAD: We have given your letter of February 17 careful thought and feel that a New York City bankruptcy or insolvency would have widespread repercussions in all capital markets, with particular impact on the municipal market and to some extent on corporates. In fact, we would not be surprised if municipal and possibly corporate markets closed temporarily to give investors time to assess the extent of the damage. There would, furthermore, be lasting damage not only for New York City and New York State but all public securities would feel the adverse reaction because the marketplace would interpret this as meaning that the contractual obligations of public bodies in the U.S. could not be completely relied upon. Furthermore, it should be pointed out that bankruptcy on the part of a major city in the U.S. could have unexpected side effects in both the political and economic areas.

This atmosphere certainly would not foster confidence in the U.S. dollar and, in the eyes of foreign traders, would be one more compelling reason to view the dollar with distrust.

The bankruptcy of New York City might cause the foreign exchange markets to react severely with substantial selling of the dollar taking place. The credibility of the entire U.S. banking system could be severely strained and foreign banks, for credit reasons, might hesitate to conduct foreign exchange business with American banks, particularly those based in New York. This, of course, would bring into question the whole subject of the extent to which the dollar should be used as an international reserve asset.

Finally, we feel that New York City represents the most serious example of a major urban problem facing this country. Rather than try to sweep the problem under the rug, by evading the fundamental issue through bankruptcy, we suggest that the State and Federal Governments join forces to solve the problem, possibly by convening a special commission which in effect would oversee the City's finances as a "de facto" receivership.

In view of the foregoing, we obviously feel that bankruptcy or insolvency of the City of New York should be avoided at all costs. Admittedly, my remarks may err on the side of "cataclysm" but we are living in very uncertain times and the confidence of investors, lenders and other risk takers in our institutions is fairly low.

Sincerely,

RICHARD D. HILL,
Chairman of the Board.●

HAVING REGAINED MY SENSES

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. STARK. Mr. Speaker, I was startled to discover that the CONGRESSIONAL RECORD of Wednesday, March 15, records me as voting "aye" on the Kemp/Quie amendment to the Humphrey-Hawkins bill, roll call No. 155.

In my opinion, that amendment not only sought to effect bad tax policy through an inappropriate legislative vehicle, but threatened to strike the very heart of the legislation now before us.

The only explanation I can find for this vote is that the preceding arguments in support of the amendment left me so confused that I was unable to push the right button. I apologize to the Speaker and my colleagues for giving them ample reason to believe that I had taken leave of my senses.●

PLO TERRORISM IN ISRAEL

HON. PAUL S. TRIBLE, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. TRIBLE. Mr. Speaker, last evening I joined several hundred of my constituents in a memorial program at the Rodef Sholom Temple in Hampton, Va., to honor the memory of the innocent Israeli citizens slain by the PLO in Israel last weekend.

This act of terrorism must be condemned by all mankind. This vicious destruction of innocent lives is a tragedy that heightens the pain and suffering of the people of Israel and of their friends around the world.

These events are further proof that the PLO is an organization of extremists dedicated to terrorism, death, and destruction. Clearly, the underlying motive of the attack was to destroy the current peace negotiations.

Peace in the Middle East hangs by a tenuous thread. It would be a tragic irony if the PLO by murdering Jews and Egyptians frustrated peace and thus prevailed. It is a heavy burden on Prime Minister Begin and President Sadat. They must redouble their efforts to assure that peace and decency prevail over terror and evil.

Although the PLO's attack has aroused anger and indignation throughout the world, there has been silence in many quarters—and even endorsement in some. It has been reported that Saudi Arabia has called the terrorist attack a courageous operation with a noble aim. No Arab State except Egypt has condemned this action. The Russians, who supplied the weapons used in the attack, harrassed those who demonstrated against the brutality in Moscow.

The PLO attack underscores the harsh realities of the Middle East. The PLO is not a voice of moderation, but rather a terrorist organization dedicated to the destruction of the State of Israel. Israel has real and legitimate security concerns with respect to the West Bank and Gaza Strip regions from which it is being urged to withdraw. In the face of Arab hostility, Israel cannot be expected unilaterally to give up land crucial to her security. Nor should Israel be expected to countenance a strengthening of Arab air power.

A neighboring state ruled by PLO gunmen is clearly too much to ask Israel to accept. It is clear to me that a state animated by the PLO or its purposes would pose a serious security threat not only to Israel but also to its Arab neighboring states. For it was this organization that provoked a civil war in Jordan in 1970 and is now engaged in a bloody civil war in Lebanon. Given a position of control in a state of its own on the West Bank or the Gaza Strip, the PLO would only continue such activity.

The tragedy of this past weekend emphasizes that the time has now come for the United States to reassess its policy toward the Middle East.

On February 15, the administration notified the Congress and the American people of its intention to submit letters of offer for the sale of 60 F–15 fighter bombers to Saudi Arabia, 50 F–5E fighters to Egypt, and 75 F–16's and 15 F–15's to Israel. The administration at the same time indicated, and subsequently has insisted these letters of offer would be a package deal, all planes to all countries or no planes to any.

I am unalterably opposed to the sale of these weapons of war to Egypt and Saudi Arabia. This package arrangement is wrong and it marks a major shift in our U.S. foreign policy.

Most Americans applaud our success in past years in gaining the confidence of the moderate Arab States. We have succeeded in undermining Soviet influence in the Mideast. We have played an instrumental role as mediator, fostering direct negotiations, while maintaining a special relationship with the democratic state of Israel.

If you will recall the 1973 Yom Kippur war, it was the United States that negotiated the Israeli pullback from the West Bank of the Suez Canal—preventing the inevitable encirclement and destruction of the Egyptian first and third armies. It was the United States that successfully negotiated the Israeli withdrawal from the strategic Giddi and Mitla Passes in the Sinai, in addition to the return of the Sinai oil fields to Egypt.

Each of these moves was taken at no cost to the Egyptian Government, but at increased security risks for Israel. These added security risks were compensated for by an American promise of the sale of advanced military aircraft to Israel. Israel's original request, which was made over 2 years ago, called for the sale of 150 F–16's—which will not even be available until 1981—and 25 F–15's. The Carter administration has cut the request in half, while at the same time bolstering the armed forces of Israel's potential adversaries.

In addition to cutting Israel's plane requests in half, the administration has disapproved the sale of concussion bombs to Israel, denied the sale of Israeli aircraft to Equador, called for the establishment of a homeland for the PLO, and issued the disturbing joint communique with the Soviet Union of 1977. In sum, this spells a major shift in our Nation's historic Middle East policy.

While the decision to sell Egypt American offensive weapons would be questionable at any time, a decision to sell these aircraft when a state of war still exists, and when peace negotiations are at a crucial state, makes such a decision more troubling.

There are those who suggest that the United States must show the Egyptian people that America appreciates the efforts of Anwar Sadat. I submit that President Sadat has done quite well since his severance of ties with the Soviet Union and the warming of relations with the United States. For—in addition to saving his armies, negotiating an Israeli pullback and restoration of the Sinai oil fields since the 1973 October war—Egypt has received over $4 billion in U.S. economic aid and a supply of radar, jeeps, trucks, and cargo planes. So the issue, is not that Egypt received anything, but whether we should leap from the nonlethal to lethal aid.

If the award of 50 F–5E fighters is viewed as a symbolic gesture of thanks from a grateful America—a reward for negotiations as yet uncompleted—it is carrying gestures too far. Such offensive weaponry clearly threatens the defense posture of Israel.

Next we come to the sale of 60 F–15 fighter bombers to Saudi Arabia. Sixty of our most advanced fighter bombers—more than the Saudis requested and 50 percent over what our Department of Defense thought they might need. Such a sale can only be destabilizing—heightening tensions in that troubled area. This is particularly true when it is realized that Saudi Arabia is building a major airfield at Tabuq—only 120 miles from Israel's southern Port of Eilat.

Nor are the Saudi's poor in armament. In the past few years, they have purchased over $12 billion in military equipment. As a result, Saudi Arabia is fast becoming a fourth confrontation state on Israel's border, and the acquisition of the proposed 60 F–15's will materially enhance that position.

There is, it seems, a misconception about Saudi Arabia in this country. Some seem to believe that they have never participated in past mideast conflicts. Yet, during the 1973 October war, Saudi troops fought along side the Syrian forces. Due to its great wealth from oil, the Saudi's—through massive grants and aid to the confrontation states—are and have been the bankers—the ones advancing the money to Syria, Egypt, and other confrontation states.

I believe a continued military relationship with Saudi Arabia is in the best interests of the United States. But, such a relationship has perimeters. Is it possible to justify this arm's sale to Saudi Arabia as a reward for its moderate policies in oil pricing and as an inducement to continued moderation? I hardly think so—it is a strange reward for the country which led the oil embargo against the United States in 1973, and whose influence with the oil exporting countries has resulted in the quadrupling of oil prices. Furthermore, Saudi investments in the United States and her own self-interest will determine oil prices and production volume.

The question arises, then—why not reject all the letters of offer? This, too, is unacceptable. All other countries in the Mideast can purchase arms from a

number of countries. Israel, alone, is dependent upon the United States and we must stand by her.

The President should not consider these letters of offer as a package. This Nation must honor its commitment to Israel as agreed to by the Ford administration following the Sinai II negotiations.

I would like to see the policy of our Government return to that of seeking peace in the Middle East. Selling large quantities of highly sophisticated aircraft to Egypt and Saudi Arabia is like throwing gasoline on the embers of a fire. Arms sales do not enhance the prospects of peace.

The President should be reminded of the statement he made on April 1, 1976,

I do not believe arms sales make lasting friends. I am concerned with the ways in which our country, as well as the Soviet Union, Britain, and France, have poured arms into certain Arab countries far beyond their legitimate needs for defense—five or six times more than Israel receives. This heady rush for weapons increases the chance of war. It postpones peace negotiations. It erodes security.

How true are those words.

This is a significant time for the State of Israel. In May of this year, Israel will be celebrating its 30th anniversary.

The world has watched as Israel changed a barren tract of land in the desert to a thriving progressive nation of well over 3 million people. In the world of nations, Israel remains young and vulnerable. Memories of the pain and suffering of her people as they struggled to maintain her existence are still fresh in our minds.

It was exactly 30 years ago this month, on March 20, 1948, that David Ben Gurion, proclaiming to the world Israel's independence, said:

We are masters of our own fate. We have laid the foundations for the establishment of the Jewish state and we will establish it. . . . we will no longer accept foreign rule in whatever form, and we will devote ourselves even more intensely to defending ourselves. The Jewish State exists and will continue to exist if we are able to defend it. The Jewish state will find a way to achieve mutual understanding with the Arabs . . . ."

That message has particular importance today. Almost immediately following Israel's declaration of independence, President Harry Truman recognized the State of Israel, and established as U.S. policy a moral and political commitment to the survival of Israel. That commitment must always be honored by the American people.●

A TRIBUTE TO JAMES Q. WESTBROOK OF WHITFIELD COUNTY, GA.

HON. ED JENKINS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. JENKINS. Mr. Speaker, I wish to take this opportunity to recognize and honor an outstanding citizen of Whitfield County, Ga., Mr. James Q. Westbrook. On October 25, 1977, Mr. Westbrook, trained in Red Cross first aid, was at work when a fellow employee began to choke on a piece of candy. The emergency was called to his attention by other workers who had failed to dislodge the obstruction. Mr. Westbrook then applied life-supportive first aid measures and the candy was dislodged, allowing the victim to breathe. Without doubt, the use of first aid by Mr. Westbrook saved the victim's life.

Mr. Westbrook had been trained by the American Red Cross in cardiopulmonary resuscitation, and he used this valuable training in his gallant efforts.

For this act, Mr. Westbrook was awarded the highest honor bestowed by the Red Cross—the Certificate of Merit. This award is given to a person who saves a life by using skills learned in a Red Cross first aid, small craft, or water safety course.

The certificate bears the signatures of President Carter, who is the honorary chairman, and Frank Stanton, who is chairman of the American Red Cross.

Mr. Speaker, this selfless and humane action on the part of Mr. Westbrook is appreciated by all.

Thank you.●

JOURNALISM IN CHAINS

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. UDALL. Mr. Speaker, recently the respected editor of U.S. News & World Report, Marvin L. Stone, spoke before the American Association of State Colleges and Universities on the occasion of his being the recipient of the Distinguished Alumnus Award by the organization. Mr. Stone chose this occasion to voice his concern about some of the alarming trends taking place in journalism today.

I found Mr. Stone's views to be entirely consistent with my own in this area and commend his address to the attention of my many colleagues who have indicated their own concern about concentrated ownership of newspapers and other communications media.

Mr. Stone's speech follows:

JOURNALISM IN CHAINS

(By Marvin L. Stone)

If educators and journalists have a common ancestor, so to speak, it surely must have been Thomas Jefferson, who valued with equal ardor the virtues of education and the merits of a free press. It was Jefferson, you will recall, who wrote these lines, enshrined in the heart of every editor:

"Were it left to me to decide whether we should have a government without newspapers, or newspapers without a government, I should not hesitate a moment to prefer the latter."

Those are the lines we all remember. But there was a subsequent, almost forgotten, sentence in that letter to Edward Carrington in 1787. Jefferson had added: "But I should mean that every man should receive those papers, and be capable of reading them."

That was the heart of his philosophy—that a free press must be circulated among the mass of people sufficiently educated to profit from this information and opinion. He felt that one would suffer without the other, that one was as necessary as the other: educated citizens and an unfettered press.

I wonder, if he were alive today, what Jefferson would say both about the state of education and the state of the press—or media, as it is resoundingly hailed in today's world.

You will have to draw your own conclusions about the state of education. I will speak a bit about the state of the press.

And frankly, I am concerned about it. I am concerned about a trend that, if it continues to its ultimate, will leave us all the poorer.

Journalism is cyclical in its nature. What is fashionable in one era becomes passe in the next; only to become fashionable, once again, many years later.

Gossip, gore, sex and titillation are riding high today. They were staples of the yellow journalism of an earlier era. They flourished for many years. Then, they fell on hard times. Now, they are making a comeback. The magazine rack in your local store is powerful testimony to that.

There are other examples of journalism's cyclical nature. The exposes of the muckrakers were a mainstay of the press in the early part of this century. But as the Progressive Era gave way to more smug times, the raking of muck went out of fashion. Yet, today, it is once again a journalistic staple—only it is called investigative reporting.

These trends are significant, their cyclical nature notwithstanding. They have a marked impact on the quality of journalism. It matters enormously whether the front page of a newspaper is devoted to serious coverage of local, national and international affairs or whether it is filled with froth, gore and sex.

Yet, as important as these trends are, they are overshadowed by another development—one that does not appear to be cyclical. It does not seem likely that it will wane. It gives every sign of having staying power. It has come into its own and has continued unabated for almost two decades. The trend of which I speak is the swallowing up of independent journalistic enterprises by chains and conglomerates.

This trend has become epidemic. Hardly a week goes by without some big fish swallowing a smaller one.

Just since the beginning of the year CBS has added a second paperback publishing house—Fawcett—to its TV, magazine and book publishing enterprises. With that, CBS gained control of 15 to 20 per cent of the mass paperback market.

Time Inc., publisher of magazines and books, and owner of a TV station, a TV production company and a cable television system, is in the process of buying the Book-of-the-Month Club. That raised a fuss because Time Inc. already owns the trade publisher Little, Brown. The Authors Guild felt Little, Brown might have an unfair advantage when it came to selling titles to the club.

Capital Cities Communications, which owns newspapers, television stations and special newspapers such as Women's Wear Daily added the Kansas City Star and morning Times to its holdings.

The sums involved in these transactions are enormous. For example, Capital Cities paid $125 million for the Kansas City papers.

The wave of acquisitions has led the head of one major book publishing firm to say that he can foresee the day when his industry will be dominated by seven giant corporations, much as the "seven sisters" dominate the oil industry.

That is a disturbing prospect. This nation was built on diversity. In no realm is diversity more important than journalism. The Founding Fathers enacted the First Amendment in large measure to protect journalistic

diversity from government enroachment. But diversity may now be imperiled, and, ironically, not by government but by the dynamics of the marketplace. Great and venerable publishing enterprises are under pressure to join chains or conglomerates for a safer existance alongside goods ranging from rental cars to rugs.

Some may say the trend in the media merely is the same as that in other businesses-concentration. But the media are not just another business. They play a special role in American society. They are the primary sources of opinion and information for an educated public.

In the best of all possible worlds, a shopper can browse in the media marketplace and pick and choose from an enormous variety of information that is on display. At the moment, the stalls in the marketplace are owned by many merchants. But the day may be coming when most stalls are in the hands of a relatively small number. If that happens, I wonder whether the goods available will be as diverse as when ownership was less concentrated, when the "bottom line" of profit margins was not the supreme factor, when the men in the counting house took a back seat to editors whose profit was psychic—derived from excellence and responsibility to the public.

I am fully aware that journalistic enterprises need to make money to stay in business. That is not the issue. The question is: Do you strike a reasonable balance between profits and quality, or does profit become the be-all and end-all, with quality tossed out the window.

It is to be feared, as journalistic enterprises are swallowed up by larger and larger corporations, that quality might take a back seat to profit except in those instances where quality makes money—and all too often this is not true in publishing—or where a management has a strong commitment to first-class journalism.

One need look no farther than television to see where extreme concentration and emphasis on profits can lead.

As we know, the three networks dominate the electronic medium that has reshaped American society. Admittedly, it takes vast resources to bring a moonwalk into our livingrooms. Small, independent television enterprises could not offer much of the excellent news and public affairs programing the networks provide. Yet the networks also give us much inferior fare. There is little choice for viewers outside the offerings of the Big Three.

As far as the networks are concerned, quality is secondary to profits. They worship at the altar of the Ratings God—and, as a result, all too often what they pipe into our homes is raw sewage, polluting our minds.

The networks are all part of giant conglomerates, which might help explain their bottom line emphasis. RCA—which owns NBC—and CBS Inc. and the American Broadcasting Companies Inc. rank 31st, 102nd and 170th respectively on the Fortune 500 list of the largest U.S. industrial corporations. The three conglomerates earned a total profit of $823 million last year. Network earnings accounted for about one third of that sum.

The interests of these conglomerates is diverse. RCA's holdings include: Hertz car rentals, Banquet frozen foods, Coronet Carpets and a number of book-publishing houses.

CBS is involved in everything from tools to toys, retail stores to book publishers, from magazines to musical instruments.

American Broadcasting owns amusement parks, more than 250 movie theatres and magazines—and that by no means exhausts the list.

Is it desirable for these firms—whose most important mission should be to inform the public—to have interests that could come into conflict with that mission? Is it good for society to have networks owned by large conglomerates which treat TV as just another product to be merchandised? Does it make sense to have television dominated by only three corporations? I do not propose to answer these questions. I pose them for you to consider.

Now let me turn to the print media, to the publication of books, magazines and newspapers.

Book publishing, once regarded as a cottage industry, is a big business and getting bigger. In recent years there have been more than 300 corporate mergers and acquisitions in the book-publishing industry. Hardback publishers are buying publishers of paperbacks. Companies with movie and TV interests are buying both hardback and paperback houses. As a result, the number of major independent publishers is in decline.

The acquisition trend is generating concern that quality is becoming less important to publishers than what the public will buy in volume. One literary agent tells me that many young editors reject quality manuscripts they like because they fear losing their jobs if the manuscripts do not turn a profit.

Independent publishers find themselves at an increasing disadvantage in negotiating with authors unless they have a paperback subsidiary. Before they can bid on a sought-after book they often have to find a paperback partner so they can come up with enough money to stand a chance in the bidding. But most major paperback firms are now owned by corporations that also own a hardback publishing line—and this gives them a leg up in the bidding.

There is yet another disturbing trend in book publishing: Many companies with roots in the movie and television industries now are in the business. CBS, Warner Communications, Paramount, which is owned by the Gulf & Western conglomerate, and Universal, which is owned by the conglomerate MCA, are in book publishing. RCA alone owns Random House/Knopf/Pantheon/Ballantine/Vintage, and Modern Library, These giant firms can turn a book they own into a movie or TV series without ever leaving corporate headquarters. The process can also work in reverse, with these firms turning their movie scripts into books.

Consider the potential power these firms wield to shape American culture.

If diversity in the book-publishing field diminishes, and profits come to be the overriding consideration, American society will be the loser. Literary works of value almost surely will have an increasingly difficult time getting published.

Will we be seeing more and more of what Roger Straus calls "phony books" to turn a quick profit? Says this independent publisher of quality literature: "I cry for the trees that have been chopped down to make the paper for these books."

Turning now to magazines. The acquisition trend is not yet as pronounced here as in the book industry.

Nonetheless, conglomerates and chains are busily at work in my branch of publishing.

MCA, which owns Universal pictures, Putnam books and the Berkeley paperback line, has just announced plans to enter the magazine business by purchasing New Times. Thus, MCA will join such conglomerates as CBS, Time Inc. and the New York Times Co. in the magazine field.

CBS publishes more than 60 magazines which cater to specialized interests.

The New York Times Co. produces seven.

Times Inc. owns five.

And remember these firms have many other business interests besides their magazines.

I should note, by the way, that U.S. News & World Report is the only one of the three news magazines which is independently owned. We are the property of our employes.

Newsweek is owned by The Washington Post Co., which also has television and newspaper holdings. Time is owned by the mammoth conglomerate whose properties I mentioned earlier.

Now let me turn to newspapers, the area of print media where the impact of chain and conglomerate ownership is most dramatic. (Incidentally, a study by my office shows that 190 AASCU members are located in cities or town with only one newspaper, and 91 in localities where there are no papers at all. You need not feel alone. Ninety-seven percent of the 1,544 cities in which dailies are printed are one-owner towns. Critics make a point of which you may be aware: that a monopoly publisher, if so inclined, can put out an inferior product without effective challenge.)

In 1960, chains and conglomerates controlled 30 percent of the nation's newspapers. Today, just 17 years later, chains and conglomerates own about 60 percent of the nation's papers. Not only have they doubled the proportion of papers they control, but chain papers now account for 71 percent of newspaper readership.

The 10 largest newspaper chains alone have a daily readership of more than 22 million—more than one-third of total daily newspaper circulation.

These chains are not only busy gobbling up independent papers, they are also starting to purchase smaller chains. Newhouse Newspapers recently purchased the Booth chain, which is Michigan-based. Gannett bought the Speidel chains and Knight Newspapers merged with Ridder, creating a chain with the largest circulation in the nation. These developments demonstrate that chains are big and getting bigger. Their potential power is immense.

Papers like The New York Times and The Washington Post—both part of communications conglomerates—already have immense power because of their reputations and their supplementary news services, which many papers use.

Those who are given to extolling the virtues of conglomerates and chains in journalism point to the Times, the Post and Knight-Ridder as examples of excellence. They argue that bigness is not bad. But how do they rationalize a John McGoff? McGoff is head of the Panax chain, which publishes 8 dailies and more than 40 weeklies. He recently ordered his editors to publish two stories that some of his editors felt were irresponsible. Two of McGoff's editors refused to publish these stories and were fired or forced to resign by the press lord. Or how do you explain a Rupert Murdoch, the Australian publisher who has entered the U.S. market with his racy melange of shock, gossip, sex and journalistic voyeurism?

How many McGoffs and Murdochs will it take until a free press is undermined by those in control of corporate headquarters? The McGoff and Murdoch models are every bit as likely an outcome of chain ownership as the Knight-Ridder model.

Even in the best chains there are disturbing trends.

There is a tendency toward homogeneity, as publishers in one city try what has worked in another. Corporate leadership leads to blandness, as editors play it safe in their climb up the corporate ladder.

There is also the danger that chain papers will lose touch with their communities, as editors and publishers are shuttled in and out of cities every few years. In the past, if a newspaper lost touch with its community it would probably lose readers and ultimately go out of business. But today, in an age of newspaper monopolies, it is difficult for a paper to do such an inept job that its franchise is imperiled.

Because most newspapers are monopolies, they have great investment appeal to entrepreneurs. Owning a monopoly paper—in the words of one irrepressible chain owner—is "a license to steal money forever." Newspaper profit figures should be the envy of most industries. Chains and conglomerates whose stock is publicly traded average after-tax profits of 10 percent last year.

If newspaper owners view their properties primarily as profit centers, then the future of quality newspaper journalism is bleak indeed. If profits go down, corporate managers looking for places to cut costs are likely to turn first to the newsroom, which is not a revenue producer. Only those entrepreneurs with a strong commitment to journalistic quality are likely to resist bottom line pressures.

Why is there this trend toward concentration of ownership in the newspaper business? The reasons are complex, but several stand out.

Many independent owners are selling to chains or conglomerates because the younger generation in their families is uninterested in journalism. One editor told me that not one of his three children had the slightest desire to get into newspapering, so he sold to a chain rather than leave the future of the paper up in the air when he passed on.

Even those individuals who want to keep a newspaper in the family face a major obstacle—an onerous inheritance tax that many families cannot pay without selling the paper. Rep. Morris Udall of Arizona, who is concerned about the growth of conglomerate journalism, understands the impact of estate tax laws on newspaper ownership. He wants to change the laws to make it easier for families who own newspapers to pay these taxes.

The tax laws contribute to chain ownership in other ways. They make it more profitable for chains to invest their rising income in new properties, rather than to hold on to earned income and pay taxes on it.

Finally, newspapers are worth more to new buyers than to the old owners because of tax regulations governing tax depreciation. This depreciation factor tends to spur the turnover of more and more newspaper properties.

Some owners with strong commitments to journalistic excellence manage to hang on, even though the cards are stacked against them. A few have even traded their stock publicly, while maintaining control. They accomplish this by establishing two classes of stock—voting and non-voting. A majority of the voting stock remains in family hands. The New York Times is such property.

There is some talk in Congress of looking into the "state of competition" in several basic industries, including publishing.

But those who look to the antitrust laws as a possible obstacle in the way of the acquisition trend are bound to be disappointed. As long as newspaper buyers avoid acquiring a paper in competition with one they already own, they are home free.

Antitrust lawyers consider the main competition among newspapers to be in the field of advertising. The potential for reduced news coverage, for homogenization, for abuse of power—these are not the concern of the antitrust lawyer.

So where does that leave us?

I'm afraid the long-range prognosis is not encouraging. Additional acquisitions lie ahead. Ownership will continue to become more and more concentrated. Chains and conglomerates will grow. Diversity will diminish.

As journalism becomes more and more of a corporate enterprise, the counting house will play an ever larger role, the editor's office an ever smaller one.

I don't know what the solution is to the problem of concentration. In fact, I'm not sure there is a solution.

But those who view journalism as more than a balance sheet must remain steadfast in their dedication to quality, despite pressures to the contrary.

I opened with a reference to Thomas Jefferson. Now I leave by the door wherein I entered. Jefferson wrote, in the Virginia Declaration of Rights of 1776, that:

"The freedom of the press is one of the great bulwarks of liberty, and can never be restrained BUT by despotic governments."

But Jefferson lived in a simpler age, before the age of chains and conglomerates.

Only owners who value free expression more, and the dollar less, will enable us to survive this coming age of chain journalism.

Let us be certain that these chains are not the chains of bondage.●

DRIFT OF U.S. FOREIGN POLICY

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. BROYHILL. Mr. Speaker, in a recent issue of Newsweek magazine, February 13, 1978, there was a thoughtful article authored by Meg Greenfield, outlining the drift in U.S. foreign policy in recent months. Conclusions reached in this article should be of sobering concern to all Americans. I commend this article to my colleagues for careful study:

DRIFTING WITH THE TIDE

"So what are you going to do about it?"—it is the classic bully's taunt, the menacing reminder from the big kid on the block that in fact there's nothing his victim can prudently do. I bring up this painful echo from our common schoolyard past because something like it is resonating through the diplomatic chambers where our foreign policy is conducted. Only here's the switch: we are, at least by conventional measures, the big kid on the block; but it is the others, including some of the world's most notorious economic and military runts, who are issuing the taunt.

So what are we going to do about it—if the rulers of Cambodia embark on a policy of national genocide, if the Cubans take up (Soviet) arms in Africa, if the Saudis lower production or increase the price of oil, if Southern Africa moves toward all-out racial war, if the Indians continue to build nuclear explosives, if the Western Europeans vote Communists into office? Is there anything we can do in an era in which we have even been admonished for expressing the hope that Italy remain a democracy If that is regarded as an act of aggression, it tells you something about our role as a "superpower" in the post-Vietnam world.

DIMINISHING CONTROL

I am not about to seek sympathy for the "pitiful, helpless giant" of Richard Nixon's imagining, the much-preyed-upon, immobilized nation he told us we could become. No one feels sorry for giants anyway. The point is that this country, for a variety of reasons, seems to have less control of events around the world than at any time in the past generation. It is a circumstance that sits oddly with our vast economic resources and nuclear arsenal and one that seems to be generating a lot of anxiety in the county—just as it is generating a bitter political argument in Washington. Today Panama, tomorrow SALT—the question is whether the U.S. Government is accommodating wisely to change it cannot prevent or simply succumbing to pressures it needn't put up with.

The first thing to be said is that a large part of what we have lost was not so much power to control events as the illusion of such power. In Budapest, in Vietnam, in the United Nations—indeed, in the Atlantic alliance itself once Charles de Gaulle got into the act—it became plain that defying the American will did not necessarily have fatal consequences. Even so, the myth of American omnipotence continues to thrive in some quarters of our political life. I have in mind (1) the would-be interveners and bombers of the right, who believe we can shoot and scare our way to what we want and (2) the condescending left which holds that all human behavior outside the United States is merely a reaction to our own and that we can determine events elsewhere by behaving in a certain goodhearted way.

If you want to know how far history and circumstance have brought us from a time when any of this was true—if it ever was—then consider the American condition vis-a-vis the Horn of Africa. What has changed is practically everything. It wasn't all that long ago after all that we wouldn't have especially cared what the Ethiopians and the Somalis were doing to each other; that to be crude about it, we would have "bought" or "replaced" a government that gave us too much trouble there; that such governments, in any case, would have been plenty nervous about provoking our ill will, and that the Russians and Cubans would have been incapable of injecting a military presence into the scene.

Now we care—and our oil-producing friends in Iran and Saudi Arabia care even more. Our "control" of the situation including even our control of our own attitude toward it has been altered and diminished by a whole gaggle of circumstances and events. We (and our European friends) need oil; the American Government is nowhere near so free as it once was to manipulate foreign governments through "covert action" intelligence operations; the Soviets have developed a physical capacity to intervene in places around the world where they could not before, and to move directly against them and their Cuban proxies in the Horn would involve getting other countries to cancel overflight rights, imposing some kind of blockade and taking similar steps that could rapidly inflate to a full-fledged crisis.

FLAILING FOR LEVERAGE

Or so it is argued in some parts of the Administration anyway. We don't need to get into tactical disputes now going on in Washington concerning the proper moment and method of intervention. The point is that, messy as it is, the Horn of Africa provides a kind of model of the current American foreign-policy dilemma around the world. And in this situation, people seem to be flailing about foolishly in search of new levers of power. Some of these, in my judgment, amount to little more than collective threats to hold our breath until we turn blue if some nation or other will not do our bidding.

Examples of this self-defeating and self-destructive type of gesture abound. There is the Speaker of the House's threat to curtail military aid to South Korea unless its government cooperates in his Korean payoff investigation—never mind that U.S. aid to Korea presumably serves some independent and essential strategic purpose. Or there are the proposals to show our displeasure with the racial policies of the South African Government by removing our diplomatic presence from the country, never mind that the U.S. Embassy has served as an invaluable contact point with precisely those blacks and/or dissidents we are trying to encourage and help.

LIVING WITH CHANGE

Zbigniew Brzezinski, Jimmy Carter's national-security adviser, has made something of a point, if not in fact a career, of analyzing the manner in which the world is altering in its political, cultural and economic make-up. He argues that it is the

function of an American Administration to try to affect, not halt, that change and that to do so does not require sinking into a fatalistic what-can-be-done-about-it attitude. Others believe that this Administration has in fact accelerated the slipping away of control, taking "far out" rhetorical positions and encouraging all sorts of insurrectionary activity that polarize the countries we are dealing with and make our chances of influencing their governments even slimmer.

My own sense of it is that we are at a point where we have become keenly aware of our own dependence on the economic behavior of others; where we have, in a passion of correction and reform, sharply limited the capacity of our executive branch to act overseas, and where our military and technological strength seems particularly ill-suited to backing up our values and interests around the world. We can no longer say we don't care what happens in the Horn—and we can no longer act forcefully or directly if we do. This disjunction between ends and means is the principal problem of our foreign policy.●

DR. EASYSCORE: KILLER

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. DORNAN, Mr. Speaker, on April 25 of last year I read into a RECORD a Reader's Digest article, "New Kings of Heroin." At that time, I noted that there are over one half a million full-time addicts in our country and the number is growing. The profits to the pusher are immense and they are virtually tax-free. The risks are minimal because the courts—through some distorted sense of protection of criminals—do not hand out stiff sentences when pushers are caught.

As frightening as is the flood of smuggled heroin into this country, there is another even more insidious source of drug addiction. It is more insidious because it is based inside our country and is represented by a fraction of those whom we trust with our lives; our physicians. People who have taken the famed Hippocratic Oath.

I am sad to report to the House that the most blatant examples of doctors who dispense drugs where there is no need, are to be found in my own state of California, particularly in or adjoining my district. Although less than 1 percent of California doctors are involved in writing prescriptions for anyone who can pay the fee, they account for about 90 percent of the illegal supply of pharmaceutical drugs on the street.

The Los Angeles Times has recently run an expose of the drug-pusher doctors, the "Dr. Easyscores", who pollute our streets with pharmaceutical drugs for an easy filthy buck. I ask that it be included in the RECORD today and I urge my colleagues to read it carefully. It should open some eyes and, I hope disgust enough of us to stimulate some action on the part of the pharmaceutical companies and the medical associations in order to cut off this source of death in our streets. Will the Congress again be sticking its long nose into the market place? This time with rare good cause. Physicians heal thyselves, and this time let us see some bums, some murderers who masquerade as doctors, going to jail.

I cannot commend highly enough the two social-minded and courages reporters, Mr. George Reasons and Mr. Goodman, for this superb series of dynamic reporting. What honor they have brought to themselves and their families, to realize that they can retire each night with the absolute knowledge that they are saving lives because of their hard-hitting writing. Keep hammering away, men.

[From the Los Angeles Times, March 2, 1978]

CALIFORNIA'S NEW DRUG PUSHERS—EXPERTS SAY 1 PERCENT OF DOCTORS PROVIDE MUCH OF ILLEGAL STREET SUPPLY

(By George Reasons and Mike Goodman)

Hundreds of California doctors have become the main illegal supplier of dangerous drugs to thousands of young people across the state, The Times has found.

The president of the state's Division of Medical Quality estimates there are "between 500 and 1,000 of these drug-pusher doctors" in California.

They are illegally giving out close to a million pills a day, and they do it by writing prescriptions for anyone who can pay their fees.

They operate in almost every community.

"Many doctors know who they are but will not expose them," said Dr. Eugene Feldman, president of the Division of Medical Quality.

"It's the brotherhood code: turn your back or get sued," he told The Times.

Although it is estimated that less than 1 percent of the state's doctors are involved, they now illegally supply about 90 percent of all pharmaceutical drugs on the street, according to narcotics experts.

Some of these doctors earn $1,000 a day writing illegal prescriptions for anybody who can pay the $10 to $20 fee, preferably in cash.

If it's not cash, it's Medi-Cal, and the taxpayer foots the bill.

"A doctor with a pencil and prescription pad has a ticket to a fortune," one narcotics agent said. "He works great hours and makes no house calls, doesn't need medical equipment or medical employees."

These doctors are found in fancy quarters in Beverly Hills and Century City and in storefront offices in Watts, in West Los Angeles, Hollywood and the San Fernando Valley.

The drugs they deal in are powerful narcotics that can transform young men and women into helpless addicts whose drug tolerance grows along with their drug dependence.

The drugs they deal in are extremely dangerous. The Physicians Desk Reference, the drug manual for members of the medical profession, warns over and over of the danger to patients who use the drugs without careful supervision. The most sought-after pills on the high school and college campuses across the nation all carry warnings such as this statement on Quaalude, a popular "party drug."

"Illicit use of the drug or abuse of the drug for nontherapeutic purposes may lead to severe psychological or physical dependence."

In extreme cases, another terse warning appears over and over. "Death may result."

Amphetamines (speed) to soup up the user and barbituates to knock him down. Powerful narcotic pills with the punch of heroin. Or codeine to carry him through when his hands shake and he doubles up in withdrawal pain.

Many are swallowed by the handful, but often they are dissolved and injected into the bloodstream with hypodermic needle and syringe, known as "outfits."

The outfits sometimes are supplied by pharmacists who work closely with the "scrip" doctors, cashing thousands of their prescriptions a week for up to 100 percent profits. There are dozens of these pharmacies in Los Angeles.

The trend began about five years ago when new federal laws cut off illegal pharmaceutical drugs from Mexico. Doctors became the best source for the drugs, and narcotics agents agree they filled the void well.

In Los Angeles County alone, The Times has evidence of more than 100 doctors who have been writing "scrips" for several hundred thousand dangerous pills a day.

Many high school students can rattle off the popular names of the pills—"reds, rainbows, black beauties"—and the local doctors to get them from.

One member of the "doctor scene" told The Times how his family physician first accidentally got him hooked on drugs at 16.

Joe (not his real name) said the doctor cut him off when he realized what he had done.

But by then he had discovered that "scoring" drugs from doctors was much easier and safer than buying pills from street pushers.

By the time he was 19, Joe boasted, he had become an expert at conning doctors out of drugs.

"I had it down to a science—an art form," he said.

I was not into street drugs at all—strictly pharmaceutical—getting them from the doctors you really can't get busted.

"I don't even know if they make street pills anymore—that's how long since I've seen them."

Joe has been off the streets for several weeks now, undergoing treatment for barbiturate (downer) addiction, considered by experts as the worst kind of addiction.

A few months ago, however, Joe said, he was working at least 20 local doctors.

He rattled off a dozen names. Some have been convicted, some indicted, and a few are under investigation. The rest apparently have yet to be discovered by law enforcement officials.

"Within my group everyone was into drugs from doctors," he said. "At least 200 people in the (San Fernando) Valley that I knew were living off doctors."

Joe said he maintained a detailed notebook, or "bible," containing each doctor's name, address, phone, kind of drugs he gave out and how easy it was to score.

The pages of the notebooks were an extremely valuable commodity to be copied and traded one page at a time for drugs, money, or names of other scrip doctors, Joe said.

"Anybody could score from a scrip doctor," Joe said, but it took preparation to get drugs from a family doctor.

Joe said he researched the latest drugs and the ailments they were given for so that he would know what symptoms to fake.

Then, clean-shaven, hair combed, he would shyly enter the doctor's office.

"Act soft-spoken and a little on the stupid-side. Mispronounce the name of the drugs, be naive and you'd be surprised what you can con a family doctor out of," he said.

Sometimes, Joe said, he would hit a bonanza by discovering that the family doctor was really a "Dr. Easyscore." A new scrip doctor had been uncovered.

Joe would round up his buddies and reveal the doctor's name if they agreed to give him half of the drugs they got on the first visit.

Joe said he used most of the drugs he got himself, but several of his friends made their living selling the stuff on high school campuses such as Taft High School, Reseda High School and Birmingham High School.

Or you could always go down to "Topanga Beach and get rid of anything."

Joe said it took the death of a friend recently and his own deteriorating physical condition to realize that the scrip doctors were "killing people," including himself.

A favorite among Joe's subculture was Dr. Wendell J. Mellor who practiced in Hollywood for almost 30 years and was on the staff of Hollywood Presbyterian Hospital.

According to court records developed in criminal proceedings against the doctor, Mellor was beset by financial problems. In 1976 he lost substantially in the stock market and owed state and federal income taxes amounting to thousands of dollars.

Mellor's prescriptions for dangerous pills began showing up in large numbers in pharmacies in West Los Angeles and Hollywood in 1976.

Many of them were written to "known drug users," according to narcotics agent who opened an investigation.

Mellor, 70, recognized he was running a risk, according to court records.

The first undercover agent who visited Mellor got one prescription for Quaaludes, but the doctor balked at giving her a second one for Desoxyn. (Desoxyn is a powerful stimulant sometimes taken intravenously.)

"He said it was not likely that the inspectors would check him but he didn't want to take any chances," she wrote in her report.

She went back several weeks later for a refill and the doctor told her:

"You understand, dear, this is very serious. I just got a phone call an hour ago and a doctor we thought was on vacation was actually in jail." He told the agent the doctor was arrested for writing scrip, and that it was too dangerous to write for Quaaludes, uppers and downers.

So, she said, he gave her a prescription for emperin-codeine. (Emperin-Codine is classified as a narcotic and is used by addicts to supplement heroin or Dilaudid habits.)

Mellor told a second agent who visited him in July that "he could not give him Quaaludes any more; that he was under surveillance by federal and state agents and had to be careful," the agent reported.

He gave him a powerful downer instead.

Mellor told a third agent "he was being watched by narcotics agents and for that reason he had stopped writing Quaaludes," the agent said. He gave him a downer, too.

Mellor was arrested a short time later and was found guilty of five drug counts.

As a rule scrip doctors run assembly-line operations.

Waiting rooms are jammed with addicts, pushers and teen-agers. Long lines spill out into the street, like a line "waiting to see 'Star Wars,'" one agent reported.

Some doctors pass around a sign-up sheet and take people in numerical order. There's a desperate scramble because more people are waiting than the doctor can see in a day.

Bodyguards often are hired to keep order.

The doctor's office becomes a meeting place for the drug culture. Those awaiting their turn—often an all-day vigil—make their wait a social event by swapping information on new scrip doctors and "easy" pharmacies, trading prescriptions and pills and selling marijuana and sometimes heroin.

The doctor's waiting room was a second home to Dennis, who told The Times he worked his way through UCLA by selling narcotics and dangerous pills supplied to him by numerous local physicians.

"I was living off the doctors. A lot of my friends were, too," recalled the 25-year-old son of a Los Angeles area executive.

The doctors, Dennis said, also helped him become a junkie. They kept him well supplied with the powerful narcotic pain-killer Dilaudid, knowing that he was shooting it up and selling it.

Dennis said he was shooting up 10 to 12 Dilaudid tabs a day while attending classes at UCLA. He was graduated with high grades last year.

He said he would carry his "outfit" (syringe, needle and drugs) in his backpack with his books.

Dennis said that when he needed a fix, about every two hours, he headed for a special campus bathroom where the toilet stall doors closed tightly so no one could see him "tie off" his arm with cord to make the veins stand out.

"I would crush the tablet, drop the powder into the spoon, put some water on top, fire underneath, cook it, draw it and fix. It took four or five minutes."

Then once a week Dennis performed the all-important ritual of visiting his main "Dilaudid doctor," a Los Angeles area physician now under indictment on drug charges.

"I was getting 18 to 20 (Dilaudid) tabs a day from the doctor," Dennis said. What tabs he didn't shoot he sold for $10 apiece on the street, he said.

A prescription for 50 Dilaudid cost only about $12 from the pharmacy, and Dennis' doctor charged another $20 for writing it.

"He knew I was selling it. A lot of people made some fortunes," said Dennis, particularly if they weren't addicts" and didn't shoot up the profits. Any junkie feels it's just as good as heroin."

Every few weeks Dennis would visit four or five other doctors for a variety of other pills such as "black beauties" (uppers), and downers such as Quaaludes, "reds" (seconal) and "rainbows (tuinal)."

At one point, Dennis said, he was getting 700 to 800 pills a month from the doctors.

"If I wasn't into using them they were easy to sell. Sometimes I'd make $800 a month plus keeping my habit."

Dennis said that his drug habit grew until it was all he thought about. It consumed his life. He said, he didn't care about eating and lost 40 pounds.

He spent most of his spare time searching for drugs. He said he sometimes had to get up at 2 a.m. to get a good spot in line at the office of Dr. Leroy Demery, 6213 S. Main St.

The office of Demery, who is awaiting sentencing after his conviction on 35 drug counts, often was a wild scene.

One undercover agent testified that 20 people already were in line when she arrived at the doctor's office at 8:10 a.m.

"Pandemonium broke out" when the door opened, she said. "Several people shoved and pushed ahead of me."

She said Demery's bodyguard told her "no matter how hard he tried . . . he couldn't do anything to control it.

"The doctor sees only 60 people a day and they get frantic to get in there because they might not get seen," the bodyguard told her.

It took the state Division of Medical Quality almost two years to discipline Demery after he was arrested. During that period he continued practicing and prescribing the same kind of pills.

In late 1977, the division's ruling allowed Demery to continue practicing, on probation.

"They (the board) didn't even pull his pill-prescribing privileges," said Robert Rowland, executive secretary of the board, comprised largely of doctors.

"The board blew it," remarked another medical board official.

The medical board, which has 45 investigators, rarely originates an investigation of a pill doctor, Rowland said.

In March, 1975, state and federal narcotics agencies formed the Diversion Investigation Unit comprised of 10 agents in Los Angeles and San Francisco. They deal exclusively with the illegal diversion of pharmaceutical drugs.

Since then, at least 100 doctors statewide have been arrested, convicted or forced to retire by DIU and police agencies.

Many others are under investigation but the special unit's 10 agents are spread thin.

"The pressure is so great—we've got so many cases it's unreal," said S. E. Kapelson, DIU investigator in Los Angeles.

One doctor's impact can be staggering, according to court records which show pills prescribed here sometimes wind up in the hands of large-scale dealers in Las Vegas, Seattle, Chicago, New York and Miami.

Examples:

—A Los Angeles doctor working with a criminal syndicate wrote prescriptions for more than a million pills, delivered to his confederates by the boxload.

—Nearly 200,000 pills were seized in the office of an Oakland doctor who confessed to "indiscriminately and recklessly dispensing huge quantities of dangerous drugs" over 2½ years.

—A San Francisco doctor was caught driving a panel truck loaded with 1.7 million amphetamines destined for the street.

—A West Los Angeles doctor sold thousands of prescription blanks to a dealer who filled them out, got the drugs and sold them to criminal syndicates in Las Vegas and New York.

—A second San Francisco doctor wrote 5,017 prescriptions for 130,442 pills in a 90-day period according to a federal study of 13 San Francisco pharmacies.

The study, which was obtained by The Times, illustrates the impact of a handful of doctors.

The 13 pharmacies filled 20,651 prescriptions for dangerous drugs written by 900 doctors in a 90-day period.

A tally of the prescriptions disclosed that only seven doctors wrote 53 percent of them.

Pharmacists sometimes go beyond filling prescriptions.

Barbara, a teen-age addict, told The Times of an unexcepted bonanza she received when she visited a Santa Monica pharmacy to fill her first prescription—for Desoxyn, "the Cadillac of speed."

It was the first time she had scored from a scrip doctor on her own. One of the big moments in her life.

"I was excited, I was patting myself on the back," said the daughter of a top California law enforcement official.

Now she had to get an outfit to inject the Desoxyn into her arm. Shooting up Desoxyn produces a much stronger "rush" than taking it orally, she said.

Barbara recounted how she and a girlfriend went to the pharmacy which catered to drug addicts and street people.

Her girlfriend—a speed freak—was a regular at the pharmacy and the druggist knew what his new customer, Barbara, would do with the Desoxyn.

With a wink, she said, he handed her the bag with the pill vial. The bag felt heavy. Barbara peeked inside. To her delight, she found a hypodermic needle and syringe.

"My own outfit!"

"Me and my girlfriend went right to my house. It was the first time we did it on our own. This was my project. My thing."

Three pills were sliced with a razor and soaked in a glass bottle of boiling water until the plastic coating on the pills worked loose and the water turned yellow with the drug, she said.

When the solution cooled, Barbara said, "I tied myself off so the vein would show and then I fixed. I would fix daily. Sometimes twice a day.

"When I got spaced out I would take some Tuinal to bring myself down," she said.

"After a while I could just call in the prescription (Desoxyn, Tuinal, Quaalude).

"It went on for four or five months. I just burned out. I was shaking so bad I couldn't fix myself. I must have poked myself 20 times. I had little holes up and down my arm.

"I overdosed and I broke my nose. I had gotten into a self-pity bag. I kept on taking pills, passed out and didn't wake up for three days," Barbara said.

Now in a rehabilitation center, Barbara said her drug abuse stemmed from her desire to "be grown up. I thought that was the way to be grown up." She also said she wanted attention from her parents.

"My mom would take pills—diet pills and Valium. I would tell her mine was OK too because I got them from the doctor," Barbara said.

"If I left here I could get to a doctor easy. It's so easy to do it. There are so many doctors making it OK for people to ask for scrips."

Barbara said she paid $15 to $20 a visit but many doctors deal in bulk and charge hundreds of dollars.

Dr. Werner Hugo Liechti of Berkeley wrote prescriptions to undercover agents for hundreds of dangerous pills at a time. His fees ranged from $100 for 60 uppers and 60 downers to $700 for 28 prescriptions bought on one visit by one agent and made out under eight different names.

The agent testified he got his first prescriptions from Liechti for Quaaludes and amphetamines simply by declaring "I like them."

Liechti, who pleaded guilty to illegal prescribing, was the city physician for Oakland from 1970 to 1972 and was an associate physican for the University of California Student Health Service at Berkeley from 1963 to 1973, records show.

Shortly after leaving UC Berkeley in April 1973, the court record shows, Liechti started prescribing massive amounts of Dilaudid, powerful morphine-like tablets known as "drug-store heroin."

He prescribted more than 30,00 Dilaudid tablets to four persons in about two years, according to state medical board records. The Dilaudid had a street value of more than $300,000.

Lois, 21, was a Dilaudid addict and a drug user since she was 14. She desperately needed scrip doctors to supply her with pills, but she despised them.

"If anybody knows what drugs can do it's doctors. They've seen the worst—babies born strung out from the mother's addiction.

"Most of them knew I was a dope fiend,"

"They'd take my blood pressure and see my tracks. I had them all over my arms," she said.

"I got the impression that as long as you could give them some kind of story you could get what you needed. They just wanted to hear a story and get the money."

Lois said she didn't care what kind of person the doctor was as long as she got her drugs, especially Dilaudid. "I was doing 15 Dilaudid a day—shooting three or four (tabs) at a time."

"It's the only thing you concentrate on. How, where and when are you going to get it. All my energy was into how I was going to get it from the time I got up to when I went to bed."

If she ran out of Dilaudid, or couldn't buy heroin from a street pusher, Lois said, she would go to a scrip doctor and get some pills to hold her over rather than trying to kick her habit.

"I'd take a handful and pass out somewhere."

Like several heavy drug users interviewed by The Times, Lois had built up a huge tolerance to drugs. Swallowing a dozen or so pills a day was routine.

Lois has been "clean" for two months now in a halfway house, but she admitted, "If I were to leave tomorrow, I might try and find a scrip doctor I know a few who are still doing their thing. You know it's going to be good dope if you get it from a doctor "

Some doctors deal in drugs for sex as well as money. Court records and investigative reports show the following:

Dr. Mahlon McKay of Long Beach pleaded guilty to two counts of illegally prescribing drugs to an addict and to an undercover agent, and he pleaded no-contest to charges that he prescribed a powerful sleeping pill to an emotionally disturbed woman who took an overdose and died. Twelve other charges against McKay were dismissed last year.

The addict said she received Demerol, a narcotic, from the doctor "for sexual favors and money," court records show.

A state undercover agent said she overheard one female patient warn another: "Don't let him get you on the examining table.'"

After his arrest, McKay went to work at another clinic but was fired after a patient complained that the doctor tried to arouse her sexually during an examination, court records show.

In the death of Diane Peurrung, records show she had been admitted three times to Stanton Community Hospital for drug ingestion.

Dr. Jack W. Johnson, her psychiatrist, said she was "suicidal and heavily dependent on drugs."

Johnson, a second physician and the women's father, Clarence H. Metzger, all had contacted McKay and asked him to quit prescribing for her, according to court records.

McKay agreed but Metzger said he didn't keep his promise According to Meztger, McKay prescribed more than 200 Carbrital (sleeping) pills for her in the 30 days before her death of an overdose.

In his anguish, her father later wrote a newspaper, "Those doctors who give out pills should have to attend the funerals and see the agony and suffering that the families go through "

"PATIENT" CALLS SHOTS, DOCTOR PRESCRIBES

A Times employe found out a few weeks ago how easy it is to get dangerous drugs from doctors.

The young employe, let's call her Linda, heard about a physician in the San Fernando Valley who was earning a reputation as a "Dr. Easyscore."

The one requirement was that "you had to bring cash."

Asked to check out the doctor, Linda found herself in a tiny waiting room with several other young people.

"Are you here for what everybody else is here for?" giggled another "patient."

They swapped names of other "pill doctors." Linda was told about a physician in North Hollywood whose medical examination consisted mainly of "having you stick out your tongue."

When Linda was finally ushered into the doctor's examining room, she discovered that another doctor had replaced "Dr. Easyscore," who, she was told, had gone on an indefinite leave of absence.

The new doctor, however, turned out to be very cooperative.

After a cursory examination, Linda told the doctor that she couldn't sleep.

He suggested Valium.

She said she didn't like Valium and wanted Quaalude, a powerful and "potentially addictive" relaxant known as the "love drug" because of its alleged aphrodisiac qualities,

"Anything else?" the doctor asked as he wrote out a prescription for 30 Quaaludes.

Linda said she had cramps, but that her gynecologist would only allow her to take aspirin.

This doctor, however, prescribed 50 pain pills containing codeine, an addictive narcotic.

He wrote the Quaalude prescription on a blank belonging to another doctor "who used to work here," Linda was told.

Then the doctor made sure that Linda went to a certain pharmacy by phoning in the orders himself. "They will be filled and waiting for you," he said.

She paid the doctor $25 and the pharmacy $19.60 for the pills. Their street value is about $200.

As she left the doctor's office, Linda asked when she should come back.

"Call me when you run out," the doctor replied.

TWO PHARMACISTS SUSPENDED IN SAN FRANCISCO

SAN FRANCISCO.—Two San Francisco pharmacists have been suspended for six months for illegally furnishing "massive" amounts of dangerous drugs to addicts.

The pharmacists—Dennis Wong, owner of the Safety Pharmacy, and Howard Wong, unrelated coowner of the Mandarin Pharmacy—were ordered suspended effective March 29 and placed on five years' probation. In addition, the Safety Pharmacy will be closed for 30 days and the Mandarin Pharmacy closed for 15 days.

Dennis Wong, a prominent Chinatown businessman, is vice president of the Chinese Chamber of Commerce and former president of the Chinese Six Companies.

Administrative Law Judge Robert S. Kendall found the pair guilty under a state law which says druggists share responsibility with doctors in providing drugs.

Kendall said an audit revealed that during 1974 the two pharmacists sold 256,000 tablets of Desoxyn, a stimulant and Dilaudid, a narcotic; and on April 1, 1974, filled more prescriptions for the two drugs than normally occur in a month.

The state Board of Pharmacy said most of the prescriptions were written by an Oakland doctor, Thomas Gates, whose license was subsequently suspended, and the prescriptions were filled at "short intervals" by the same individuals.

The board said the purchasers were people the druggists "knew or should have known were drug abusers."

Dennis Wong said he had not received written notice of the ruling and would have no comment.

DOCTORS FIND DRUG CULTURE CATCHING

Doctors who deal in drugs before long begin to act and talk like the street people they deal with.

Such was the case of Dr. J. J. Pontier who pleaded guilty to drug charges last October in Federal court in San Francisco.

"Dr.. Pontier conducted himself no differently than a street pusher" U.S. Atty. Lawrence Edelman told the court in urging a prison term for the doctor.

To support his position Edelman submitted the transcript of a conversation between the doctor and two undercover agents Pontier believed to be drug users.

The conversation began after the doctor got into a car with the two agents outside his office in Richmond.

PONTIER. . . . How many of these bastards (prescriptions) do you want?

AGENT. Uhm I've got a hundred dollars.

PONTIER. Oh . . . Better save some. (laughter).

Who is this to?

AGENT. Make the . . . make the first one to Geri Cross. We were just thinking of some really good names. We were looking down here Aida Band (laughter). Aida Band and uh Harry Merit.

PONTIER. That's pretty smart. It's Dec. 2, isn't it?

PONTIER. What's the address for this gal?

AGENT. 615 Central in San Francisco.

PONTIER. Is it benzedrine or Dexedrine you get?

AGENT. Biphetamine.

SECOND AGENT. You won't give us any Ritalin.

PONTIER. I can't. They're on my ——— on it, you know what I mean. I think that they're, uh, they're monitoring all these guys that are writing any kind of, for Ritalin and Eskatrol . . . Quaalude's the worst.

SECOND AGENT. Yeah, nobody wants to give you Quaalude, anymore.

PONTIER. Well, where did you get it before, did you have anyone who would give it to you?

AGENT. Sure, used to be able to get it all the time. Doctors would give you that instead of Seconal cause they'd say it wasn't as strong and then when the word got out that they were good for what they were good for (aphrodisiac), then all of a sudden you can't get 'em anywhere now.

POKTIER. Yeah, but all these ——— . . . soon as the Quaalude prescription hits the ——— . . . they they . . . they monitor the ———.

(Pontier then tells of a doctor whose office has red, blue and green lines on the floor to guide patients who want different kinds of pills. He says the doctor has lines around the block. Then he turns back to the two agents' prescriptions.)

PONTIER. How many did I give you? Thirty or 40, what was it?

SECOND AGENT. Can we get 50?

PONTIER. ———, it's too ——— high.

SECOND AGENT. OK, 40. (laughter).

PONTIER. I mean, you got to play it safe.

(Pontier writes out several prescriptions and then waits to be supplied another name.)

AGENT. OK, uhm, Harry Merit. I like that one.

PONTIER. How about D. Merit? (everyone laughs).

AGENT. D-E-E.

PONTIER. What's the address?

AGENT. 720 Jones.

SECOND AGENT. You're not really writing for Dee Merit, are you? (laughter).

PONTIER. This is it? (meaning the last prescription)

AGENT. That's it.

PONTIER. I better get to work before they come out and raise hell. (laughter)

SECOND AGENT. How about a hundred dollar bill? (He hands Pontier the bill.)

PONTIER. That's OK.

SECOND AGENT. Otherwise we got to get ones and fives.

PONTIER. Did you bring that film? You didn't, did you?

SECOND AGENT. I didn't have one. Next time.

PONTIER. Bring one. I'd just like to see it. That's all. All that porno stuff doesn't turn me on at all. (laughter)

PONTIER. It doesn't really.

SECOND AGENT. Really?

PONTIER. Oh, honest, that, that crappy . . . some of that stuff is so bad. I mean if it's cleverly done, it's fine, you know . . .

AGENT. Oh, yeah.

PONTIER. But anyway, good luck.

AGENT. Have a good day.

PONTIER. OK. See you later.

AGENT. OK. Bye-bye. Thank you.●

ST. PATRICK'S DAY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. RODINO. Mr. Speaker, this weekend my district will join many cities throughout the United States in celebration of the holiday we call St. Patrick's Day. I have marched in the Newark St. Patrick's Day parade for many decades, and this year I will march with the parade's grand marshal, Bill Morley. I believe it is a tribute to those great Americans of Irish descent that people from all backgrounds participate in this yearly celebration.

The Irish are very proud of their patron saint, and rightly so. His story serves as a lesson to us in the 20th century. When Patrick arrived in Ireland in 431 A.D., he was in the dangerous situation of preaching a new faith to a foreign population. Nonetheless, he was fearless in doing good works, preaching his beliefs. and setting up many schools and churches. When he died on March 17, 493, he was no longer a stranger in a strange land, but a beloved friend of an entire people and an entire country which continues to honor his name.

Mr. Speaker, let us hope that the spirit of St. Patrick will inspire social justice in Ireland and throughout the world. It is only through a renewed commitment to social justice that those living in strife will know peace.

Mr. Speaker, I am proud to march with my brothers and sisters of Irish heritage on St. Patrick's Day, and I salute the strong faith of the Irish people in the hope of obtaining peace one day soon.●

BROOKLYN NEWSPAPER WINS SIX AWARDS

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. RICHMOND. Mr. Speaker, I am proud to share with my colleagues the noteworthy achievements of a neighborhood newspaper in my Brooklyn, N.Y., district, the Phoenix. Its staff has just earned six statewide awards in the 1977 Better Newspapers Contest, conducted by the New York State Press Association.

Although the Phoenix is "small" in circulation—that is, it only caters to an audience of Brooklyn residents—it is indeed a great newspaper.

I am proud to share with my colleagues the Phoenix's accomplishments because they are examples of journalistic excellence. In the past, the Phoenix has thoroughly covered the many major issues that affect its neighbors. Additionally, the Phoenix has been a dynamic voice in articulating community needs.

I applaud the Phoenix for its unequivocal journalistic achievement in Brooklyn and for being among the best newspapers in New York State.

The article follows:

[From the Phoenix, March 9, 1978]

PHOENIX GETS SIX AWARDS IN STATEWIDE NEWSPAPER COMPETITION

The Phoenix won six statewide awards, including two first place prizes in the 1977 Better Newspaper Contest of the 350-member New York State Press Association, the group announced at its annual meeting in Albany March 5.

The awards include First Prizes for Best Special Section and Best Editorial Cartoon, as well as a Certificate of Excellence for ranking first among member newspapers in an evaluation of the newspaper's design and content. Other awards were a second place for Best Feature Story in the state during the year and prizes for In-Depth Reporting and Best Front Page.

"For the fourth year that we have been a member of this state-wide group, The Phoenix has been rated among the best newspapers in New York State," said Michael A. Armstrong, Publisher. "We are proud of this honor from our peers, but this independent evaluation is also important because it is testimony we are serving our Brooklyn readers well—and that's the most important goal for any newspaper."

The six awards last week follow 12 other awards earned by the newspaper in the previous three years, including prizes for General Excellence and Best News Story in 1974, awards for Best Coverage of Local Government, Editorial Excellence, Best Column and Best Special Section in 1975, and prizes in 1976 for Best Community Service, Best Editorial Page, Best Editorial Cartoon, Best Special Section, Best Feature Story and Best Advertising Idea.

For the past year's competition, The Phoenix Waterfront Issue, published in November 1976 was judged the Best Special Issue in the state. "Brooklynites reading this special section can't help but know more about their locale and what they can look forward to," said Judge Wilson Barte of the Trenton (N.J.) Times who judged this category.

Best Editorial cartoonist in the state for the past year was Phoenix cartoonist Gene Suchma, who also won a prize for his work the previous year. Suchma now produces the weekly "Inklings" strip which also is published in The Villager in Greenwich Village, sister paper of The Phoenix. Judges singled out a Suchma work on redlining as a particularly praiseworthy example of the originality, technique and * * *.

Redlining was also the basis of the award of a Certificate of Excellence to the paper and to News Editor Jon Ciner for In-Depth Reporting for the August 25, 1977 special Redlining Report, researched, written and edited by a team of reporters headed by Ciner. The report was a 12-page special section analyzing local mortgage investment policy of Brooklyn-based savings institutions.

Second prize for Best Feature story in the state went to the paper and to writer Ed Moran for "Solar Energy—the (Heat) Wave of the Future Hits Brooklyn," a special four-page report on solar energy and how it works.

In evaluating the design and content of The PHOENIX, Professor Mario R. Garcia of Syracuse University said: "You do a very good job of bringing the news to your readers in a concise, objective and attractive manner. Graphic and content organization prevail throughout; consistency in the arrangement of graphic elements is one of your strongest points. Good newspaper!" Garcia also praised The PHOENIX Community Forum section. Only five newspapers in the state rated a Certificate of Excellence from the state association, and issues of The PHOENIX edited by Judy Linscott and Jon Ciner ranked first among these.

"The new rounds of awards is a testament to the outstanding reporters and writers working under the leadership of Managing Editor Judy Linscott who put The PHOENIX together every week," said publisher Armstrong. "Those people—some with us today and others no longer on our staff—do the hard work of conceptualizing, reporting and producing news and features on one of the most exciting communities in the state. The paper is the blood and sweat of these people."

Armstrong gives special praise to former PHOENIX Editor Eileen Blair, now Editor of The VILLAGER, who produced and edited the 1976 Waterfront issue that won a first prize and the Solar Energy section that received the Best Feature Story award. "Blair created the style and spirit that made these issues tops in their class, and the look and editorial approach of the present-day PHOENIX. Our awards this year are part of the mark her verve and style left on our newspapers." Blair was PHOENIX editor from March 1974 to April 1977.●

TAXES

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. COLLINS of Texas. Mr. Speaker, the top 25 percent of 1975 taxpayers included all people who earned $15,898.

These people paid close to 75 percent of the tax bill. It is this same $16,000 a year breadwinner who has been called on to provide additional unemployment benefits through Humphrey-Hawkins to pay a prevailing wage to a man on relief. He is the one who has to bear the burden of increased social security taxes. He is the one President Carter has asked to pay most of the energy costs.

Today the Government takes through taxes 44 cents out of every dollar earned.

In the past 20 years, Government spending has risen 340 percent causing inflation. Corporate profits have increased 105 percent which does not meet inflation.

The answer is less taxes by less Government, so we can give the hard-pressed taxpayer a chance to make a living.●

THE ACCOMPLISHMENTS OF ASSEMBLYMAN GUY BREWER

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. RANGEL. Mr. Speaker, the New York State Assembly could never be the same without the clear articulate voice of Guy Brewer, the distinguished gentleman from Queens County. And certainly, Guy's record as a vigorous, hard working assemblyman speaks for itself.

Guy and his wife Marie are no strangers to rough goings and Guy once again is taking hard times to the mat.

In the following article taken from "Newsday," Dick Zander salutes the accomplishments of Assemblyman Guy Brewer. I would like to share this fine article with you:

A LAUGHING MAN RECALLED

Mention the name of Guy Brewer to anyone who knows him and the first thing that happens is a smile. What comes next is a question, "How's he doing?"

The smile is because Guy Brewer, the assemblyman from Queens' 29th district, is a wit, certainly one of the sharpest in the recent history of the Legislature. The recollection of his quips is certain to cause smiles.

And why the question? Brewer has cancer. "It's only a matter of time," he told his colleagues in the Assembly last July.

Brewer hasn't been spending much time in Albany this session. He has been hospitalized, most recently in Roosevelt Hospital. But the short, dapper lawmaker from Jamaica has not been forgotten. He was honored by the Black and Puerto Rican Caucus at its annual dinner a couple of weeks ago in Albany. The plaque spoke of his "noteworthy contributions on behalf of poor people in the State of New York."

New York City Clerk David Dinkins, the chairman of the Council of Black Elected Officials, accepted the award for Brewer. Dinkins said that everyone knew of Brewer's wit, but did they know of his courage in his fight against cancer? Dinkins said he hoped that Brewer would be present next year to thank the caucus personally for its award. Brewer has served as chairman of both the legislative caucus and the statewide council.

Even on the most serious of subjects, Brewer added humor. His announcement to the chamber that he had cancer came during a debate on a bill to legalize Laetrile. He said he supported the bill, although personally he didn't think that the controversial drug was worth a tinker's dam. "If this gives somebody a ray of hope, for God's sake let him have it," Brewer said. Then he added, "I'm not going to use it. For my curative, I'd rather use a little gin."

Brewer, who won't divulge his age but is believed to be in his 70s, didn't enter the Assembly until January, 1969. He had served as assistant to the Queens borough president and as a delegate to the 1967 Constitutional Convention. It was while he was a Con Con delegate that he broke the racial barriers of the WASPish Fort Orange Club in Albany, becoming is first black member. Later, Brewer helped State Sen. Joseph Galiber (D-Bronx) become the second nonwhite to gain admittance to the club.

Several years ago, the Assembly was debating an election bill. Brewer angrily lambasted an unnamed Queens elections official who had given him a difficult time over designating petitions, as "that bum." His Republican colleague, Al DelliBovi of Richmond Hill, called on Brewer to identify the bum.

"I don't think I better do that, Brewer said. "The gentleman no longer is on the law committee. He has since ascended to the bench."

The New York Red Book, a compendium of state officials, lists Assemblyman Brewer as "a journalist and consumer education consultant" with offices at 107-35 170th St., Jamaica. His efforts as an advocate journalist appeared for more than seven years in an interracial weekly, The Voice, published in Flushing. Brewer was as outspoken in his column as he was in debate in the Assembly. "You never had to worry about figuring out just where Guy Brewer stood," said Ken Drew, publisher of the paper.

Indeed, Brewer always has been a strong partisan. But this Democrat, this representative of the poor, has maintained a relationship—indeed, a friendship—with the likes of Perry B. Duryea Jr. of Montauk, the Assembly minority leader and GOP gubernatorial aspirant. For a number of years, Brewer maintained a summer home in East Hampton Town, and he and Duryea would kid each other over whether Brewer was Duryea's constituent.

It seems almost certain that Guy Brewer will not run for re-election next year because of his health. And that's too bad. Official Albany, for all its sham, sound and fury, is a sentimental place, and when Brewer returns, even for a brief visit, the corridors will echo with applause and cheers.●

SENATE—*Friday, March 17, 1978*

(Legislative day of Monday, February 6, 1978)

The Senate met at 11 a.m., on the expiration of the recess, in executive session, and was called to order by Hon. JAMES B. ALLEN, a Senator from the State of Alabama.

PRAYER

The Reverend Dr. Charles A. Trenthan, pastor, First Baptist Church, 1326 16th Street NW., Washington, D.C., offered the following prayer:

Eternal Father, draw near to us and grant us such communion with the heart and mind of God that we may think as You think and love as You love.

Let no barriers of prejudice, greed, or hatred hide Your face from us.

Hold before us a clear vision of those who depend upon what we say and do here.

Deliver us from the sins of pride and arrogance. Let us not be different for the sake of being different. Teach us the difference between steadfastness and stubbornness.

Keep our ears open to the voices of others, but let us not surrender our own best thoughts for the sake of being popular.

And when this day is done, let us lie down in the assurance that our world is more like the home which You want for all humankind.

In the strong and ever blessed name of Jesus. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 17, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable JAMES B. ALLEN, a Senator from the State of Alabama, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. ALLEN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Chair recognizes the distinguished Senator from West Virginia.

NOMINATIONS

Mr. ROBERT C. BYRD. Mr. President, if the minority leader has cleared on his side the nominations beginning with Department of State, on page 2 of the Executive Calendar, and going through the International Communication Agency, up to Department of Agriculture, I would then ask unanimous consent that the Senate proceed to the consideration of those nominations.

Mr. BAKER. Mr. President, I advise the majority leader that this calendar shows that the five nominations—meaning all the nominations under Department of State—and the other nominations that he identifies on pages 2 and

3 of the Executive Calendar have been cleared for consideration and disposition on this side, and we have no objection to such request.

Mr. ROBERT C. BYRD. I thank the minority leader.

Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the nominations.

There being no objection, the Senate proceeded to consideration of the nominations.

DEPARTMENT OF STATE

The assistant legislative clerk read the nomination of Alice Stone Ilchman, of Massachusetts, to be an Assistant Secretary of State.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The assistant legislative clerk read the nominations of David Eugene Boster, of Ohio; Lawrence S. Eagleberger, of Florida; Donald B. Easum, of Virginia; and Thomas O. Enders, of Connecticut, to be career ministers.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed.

INTERNATIONAL ATOMIC ENERGY AGENCY

The assistant legislative clerk read the nomination of Roger Kirk, of the District of Columbia, to be the Deputy Representative of the United States of America to the International Atomic Energy Agency, with the rank of Ambassador.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

INTERNATIONAL COMMUNICATION AGENCY

The assistant legislative clerk read the nominations of John E. Reinhardt, of Maryland, to be Director; Charles W. Bray III, of Maryland, to be Deputy Director; and Alice Stone Ilchman, of Massachusetts, to be an Associate Director of the International Communication Agency.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move to reconsider en bloc the nominations that have been confirmed.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider en bloc the confirmation of the nominations.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Does the distinguished minority leader desire recognition?

Mr. BAKER. I do not, Mr. President.

The ACTING PRESIDENT pro tempore. Under the previous order, the Chair recognizes the distinguished Senator from Colorado (Mr. HART) for not to exceed 15 minutes.

Mr. JACKSON. Mr. President, will the Senator yield?

Mr. HART. I yield.

OUTER CONTINENTAL SHELF LANDS ACT AMENDMENTS OF 1977

Mr. JACKSON. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 9.

The ACTING PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 9) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes.

(The amendment of the House is printed in the RECORD of Feb. 2, 1978 beginning at p. 2094.)

Mr. JACKSON. Mr. President, I move that the Senate disagree to the amendment of the House of Representatives and request a conference with the House on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Chair appointed Mr. JACKSON, Mr. CHURCH, Mr. JOHNSTON, Mr. ABOUREZK, Mr. BUMPERS, Mr. HANSEN, Mr. MCCLURE, and Mr. BARTLETT conferees on the part of the Senate.

VIOLENCE IN NORTHERN IRELAND

Mr. HART. Mr. President, it was with both pride and sorrow that I joined my distinguished colleagues in signing the joint statement on Northern Ireland—with pride because I am of Irish descent, and with sorrow because of the continuing violence which makes such a statement necessary.

While we go about our daily lives—distracted and concerned from time to time by outbreaks of violence in the Middle East, in the Netherlands, or Northern Ireland—the people of Northern Ireland never escape the threat of violence. It has become their way of life.

While we worry about our children being exposed to violence on television, an entire generation or two of Irish children have been immeasurably scarred by anxiety, fear, and exposure to sudden, violent death—not the death of imaginary characters on television, but of their mothers, their fathers, and their brothers and sisters.

It is intolerable that this atmosphere of violence and death should continue year in and year out. It is intolerable that another generation of Irish children be allowed to grow up in the shadow of death. It is intolerable that anyone—be he Irish, American, or British—support the insanity of extremism over the sanity of moderation.

I remind any in this country who are still providing assistance to the enemies of peace in Northern Ireland of the words of the Prime Minister of Eire, Liam Cosgrave, when he spoke before a joint session of Congress 2 years ago:

> Let me tell such people in the most categorical manner possible what they are doing, whatever their motives, that every penny, dime, or dollar they give thoughtlessly for such purposes, is helping to kill or maim Irish men and women of every religious persuasion in Ireland.

I would also reiterate the appeal made in our joint statement to the leadership and community of Northern Ireland and to the British Government for a more genuine commitment and more effective leadership to achieve a settlement fair to Protestants and Catholics alike.

We must all support and encourage the efforts of those who, with courage and dedication, are working for the day when to be Irish will once again be only a source of pride and not also of sorrow.

We will have overcome what Yeats called "the fascination of what's difficult" and will have restored peace once again to that fine land.

Mr. President, in the remaining time I have allotted, I turn to another equally important, perhaps equally immediate subject, and that is the question of the pending negotiations on strategic arms limitation.

CLARIFYING LANGUAGE TO INSURE SALT PROTOCOL EXPIRES UPON ITS TERMS

Mr. HART. Mr. President, there are few enterprises facing us as a nation that call for more persistence and self-confidence than bringing the SALT II negotiations to a successful conclusion. Recent observations by members of the administration that Soviet policy in the Horn of Africa inevitably has repercussions in other areas of United States-U.S.S.R. relations, underscores the complexity of the task. Similarly, the events of a few weeks ago, with the expression of concern in the Russian press about American positions on issues still under discussion in Geneva, remind us once again that these are bilateral discussions: That the doubt and suspicion that characterize our perceptions of the Soviets may also prevail in their view of our motives and intentions.

But the difficulty of reaching agreement only underscores the need for doing so.

In my visits to the SALT talks as a congressional adviser, I have been deeply impressed by the professionalism and tenacity of the American negotiating team. I have also become aware of the added difficulty they bear, paradoxically, because they represent a free and open society. The intensity of our public debate, even on a treaty still under negotiation that touches on the most sensitive issues of national security, is a phenomenon not easily understood by others. This debate must not be perceived as a failure of the collective national will.

(Mrs. HUMPHREY assumed the chair.)

Mr. HART. Madam President, on several occasions, I have expressed concern about those critics who have condemned

SALT II accords that are still being shaped. A piecemeal attack on a single provision, viewed in isolation, may seem telling, yet prove to be of little weight in the context of the treaty as a whole.

Certainly all of us in the Senate have learned in the course of our deliberation on the Panama Canal treaties that full knowledge and information are essential to sound judgment. This will be even more true in weighing the yet more sober and difficult issues implicit in a strategic arms agreement.

On February 24, Senator SPARKMAN, chairman of the Foreign Relations Committee, presented to the Senate and to the American people the first full and unclassified status report on agreements to date in SALT II. This is a welcome development which should make possible a more informed and open discussion of the issues still to be resolved.

Much past criticism has centered on the agreement of May 1977 to divide the SALT accord into two parts: an 8-year treaty that will embody the key numerical limits, and a protocol of 3 years' duration or less to cover some qualitative controls affecting new systems still under development.

Although the limits of the protocol are widely viewed as advantageous to the United States, critics have quickly branded the strategy as a "distinction without a difference." They argue that, once an agreement is reached, it will automatically persist, even though it expires by its own terms on a date certain. Even more distressing, they charge that this position was deliberately conceived to avoid airing the most difficult and controversial issues before the Senate and the American people.

The division of the accord into treaty and short-term protocol is a superb negotiating strategy that warrants commendation and support instead of criticism. It provided a way to segregate issues on which there was promise of early agreement from other more long-term issues. Those longer term issues involve systems still under development, which pose special problems of counting and verification, at least under today's groundrules.

The difference between treaty and protocol is not, therefore, a cosmetic one. It is a separation of issues that are inherently different in both technical and political implications. It is not a diplomatic dodge, a concession to the Soviets, or political eyewash. In a very real sense, resolution of problems treated in the protocol may point the way to SALT III.

The fact that this line of demarcation between protocol and treaty is substantive adds to the importance of maintaining the distinction. I do not accept the blanket charge of some critics that the mechanism provides a way for the administration to avoid addressing the tough issues with the Senate, with our European Allies, or with the American public. But I would not wish to see essentially tentative and temporary decisions embodied in the protocol slide, by simple fact of their existence, into permanence.

If these constraints ultimately become part of the treaty, there must be a positive decision to that effect; it must not occur by default. For this reason, I am prepared to offer, at the appropriate time in the process, clarifying language to the resolution of ratification, in form similar to the following:

Before the period at the end of the resolution of ratification, insert a comma and the following: "subject to the understanding that nothing in the Protocol shall bind either of the Parties after the date of the termination of the Protocol, unless the Parties otherwise agree and approve such agreement, in accordance with their constitutional processes.

The purpose of this clarifying language will be to confirm, in unmistakable terms, the limited nature of the protocol; and to insure that any commitment to extend or alter the protocol or any of its provisions is reached through the full, unconstrained process of negotiation and approval.

Because of the gravity and complexity of the matters at issue in the SALT protocol, I believe that such an unequivocal understanding is vital on several counts:

It is vital that the Soviet Union understand that these issues are not permanently resolved, and that serious negotiation must continue to seek mutually acceptable answers;

It is vital that our European allies be reassured that we understand their special concerns, and that we will not unilaterally foreclose options of importance to them;

It is vital that the Members of the Senate be assured that our exercise of the constitutional responsibility and prerogative will not be impeded; and

Perhaps most important, it is vital that the American people have confidence that the public process will run its full course, and that they will, accordingly, have an opportunity to take part in those deliberations.

In addition to the intrinsic value of these reassurances, I would hope that they also serve to shift the debate from its present unproductive focus on matters of form to an examination of the substance of the negotiations.

First, this treaty allows us to get on with the crucial matter of limiting systems in being, in particular, the MIRVed heavy Soviet ICBM's, which pose the most immediate threat to peace and security.

Second, this protocol allows for our continued development and testing of new systems. Clearly, this right extends to both sides, but it is particularly important to the United States—because M–X, GLCM, and SLCM are at critical points in development, but are still some years short of full operational readiness.

Third, the timing of the protocol provides a point of leverage to secure Soviet agreement to reductions or constraints on other systems, including the possibility of securing some meaningful breakthroughs on theater weapons issues in the mutual balanced force reduction talks.

Fourth, the protocol buys time—time to attempt to find ways of dealing with the counting, verification and control problems introduced by mobile systems and by small weapons such as cruise missiles.

In sum, then, the protocol offers much-needed breathing space. We can institute the absolutely fundamental numerical and other limits embodied in the SALT II treaty. We can strengthen our position in other arms control negotiations in progress. We can try to deal with problems of compliance monitoring and verification introduced by new technologies. And if we fail, we retain the right ultimately to deploy these weapons. For these reasons, I believe the protocol to be a welcome development which, on its merits, will deserve our support.

In this context, let me stress again the nature of the language I propose. It would apply first of all, to the resolution of ratification, not to the treaty itself. It would not alter the treaty in any way, or call for any action or reaction on the part of the Soviet Union. It would not interfere with the process of negotiation now underway. It would impose nothing beyond that which we will already have committed ourselves to do; namely, to limit some elements of the accord to a shorter time span than others. Its purpose is, simply, to confirm—to assure and reassure.

But it will do something else as well. It will hopefully help refocus the debate on the sober, compelling considerations inherent in a treaty between the Soviet Union and the United States dealing with a subject no less important than national security and survival. The real issues are sufficient in and of themselves. There is no need to invent them.

Much of the recent argument about the "automatic permanence" of the protocol is just such a manufactured issue. It is charged that any concession inevitably persists to condition and limit subsequent negotiations. Thus, for instance, the critics argue that the limitations on deployment of ground- and sea-launched cruise missiles for the duration of the protocol are really permanent. The Soviets, they say, implacably resist any alteration or amendment of treaties that does not materially and unilaterally enhance their own position. Implicit in this argument, though rarely stated, is the corollary charge that the United States, having made a temporary concession, inevitably lacks the will or tenacity to pursue the issue.

Any reasonable reading of recent history belies such arguments. The 1972 Treaty on the Limitation of Anti-Ballistic Missile Systems was amended just 2 years later to further reduce the number of allowable sites. Similarly, the Vladivostok Accords of 1974 posit a reduction of numerical limits from the 1972 SALT interim agreement. The accords require the Soviets to accept numerical symmetry—a concession that critics of SALT I argued would never occur. Even the decision by the United States and U.S.S.R. to continue to abide by SALT I limits after the expiration of the accord, pending the completion of SALT II, is brandished as proof of Soviet duplicity and American naivete. It ignores the fact that only the Soviets have had to make actual force reductions under SALT I, dismantling ICBM launchers as a tradeoff for submarine launchers, and that the Soviets are at a stage in weapons production which

could, at the moment, be more rapidly escalated than our own if SALT I limits were suspended.

Thus, I find this train of thought both inaccurate and superficial. More important, though, it is irrelevant. It is not possible to prove a negative. No one knows what will—or even what should—become of the terms of the temporary accord of the protocol. And a debate that is comprised of assertions that they will or would not become permanent ignores the real issues at hand.

There will be issues enough—real and vital issues—to occupy our energies when SALT II comes before us. Let us dispense with surrogates and prepare for the real debate that is ahead.

I call on my colleagues to consider the course I propose. I invite their comments and, in due time, their support.

Madam President, I yield back the remainder of my time.

THE PANAMA CANAL TREATY

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of the pending business, Executive N, 95th Congress, 1st session, Calendar Order No. 2, the Panama Canal Treaty, which the clerk will state.

The assistant legislative clerk read as follows:

Calendar Order No. 2, Executive N (95th Congress, 1st session), the Panama Canal Treaty.

The Senate proceeded to consider the treaty.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that there be a brief period for the transaction of routine morning business, as in legislative session, not to extend beyond 10 minutes, with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 2760—REGULATION GOVERNING OPERATIONS

Mr. DOLE. Madam President, about a year ago I offered a half-dozen amendments to Public Law 480—the food-for-peace legislation—designed to help prevent program abuse such as is now being revealed to have occurred in past years as the Korean influence scandal investigations proceed. My amendments were accepted by my congressional colleagues and became a part of the Food and Agriculture Act of 1977.

PUBLIC LAW 480 PROGRAM ABUSES REGRETTABLE

Public Law 480 has functioned since its inception in 1954 with strong bipartisan support. Over $30 billion worth of food assistance has been provided hungry and malnourished people through this worthwhile program. It is regrettable that there have been efforts by a few to limit competition and to obtain contracts under the program through the use of political influence rather than on the basis of the merit of their services or products supplied.

As the investigations of the Korean influence scandals reveal more and more evidence of wrongdoing, it appears that Public Law 480 rice money was passed and certain political favors were rendered.

MY ADOPTED AMENDMENTS WILL HELP

My amendments, which became law, eliminated Public Law 480 sales agents. According to allegations, it is through this means that much of the influence buying money was generated. Another of my amendments, which is now law, requires that Public Law 480 regulations be rewritten to require the removal of conflict of interest situations between participating countries, their shipping agents, commodity exporters and suppliers of transportation. The USDA is now completing the revision of new regulations. However, the Public Law 480 regulations need further tightening.

FURTHER TIGHTENING NEEDED

Among the allegations under current investigation by the Department of Justice and appropriate congressional committees is one that there was political intervention to get top officials of some Public Law 480 countries to contract with specific shipping agents who arrange for ocean transportation for the commodities supplied under the program to destination countries.

The bill that I am introducing today would require each Public Law 480 program country that uses the services of a shipping agent to certify that political influence was not a factor in the selection of the agent and that the agent's capability to perform a service was the criterion used for his selection. My bill includes a penalty for false certification.

This requirement is needed not only because of longstanding allegations of abuse in this area but new allegations have recently been made that some shipping agents, in seeking conrtacts with Public Law 480 program countries, are claiming that they "have the most political influence." We must strengthen the competitive factors in the Public Law 480 program. Products and services must be contracted for on the basis of competition and merit—not on who has the "most political influence."

Madam President, I ask unanimous consent that my bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2760

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 408 of the Agricultural Trade Development and Assistance Act of 1954, as amended, is amended by adding at the end thereof a new subsection (f) as follows:

The regulations governing the operation of Title I and III of this Act shall require each program country that uses the services of a shipping agent to nominate the agent selected to the U.S.D.A. for approval. Each nomination shall be accompanied by a certification stating that the shipping agent being nominated was selected in accordance with the following criteria:

(1) The selection for nomination was made on the basis of merit; i.e., the agent's capability to perform the required shipping agent and/or purchasing agent functions; and

(2) That political influence was not a factor in the agent's selection for nomination.

This certification shall be required when each P.L. 480, Title I program country either enters into a new contract with a shipping agent or renews their existing contract.

False certification shall result in nonpayment of ocean freight differentials to the program country during the period of service covered by the false certification.

EMERGENCY FARM LEGISLATION

(The following proceedings occurred during discussion of the Panama Canal Treaty and are printed at this point in the RECORD by unanimous consent.)

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. ALLEN. Yes, I will be glad to yield without losing my right to the floor.

Mr. MELCHER. I thank the Senator from Alabama for yielding.

As in legislative session, I note that we have agreed in the Senate by unanimous-consent agreement that there will be a time limitation of 6 hours each on two bills that have been reported out of the Senate Agriculture Committee.

Because there is a real crisis in agricultural prices, it is obvious that the Senate should act as quickly as possible upon those bills, and do it in a timely fashion so that grain farmers, cotton farmers, and other agricultural producers will know where they are, at the time of planting.

While the unanimous-consent agreement does not set a date certain for taking up the bill, and while the bills are subject, one of them, to the concurrence or at least the release by the Agriculture Committee, and both of them are subject to waivers by the Budget Committee, both committees which are meeting today, it is my understanding on consideration of these two bills that it is obvious we need to take up this legislation on Monday of this coming week.

Would the Senator from Alabama agree with me that it is absolutely vital that we set aside consideration of the Panama Canal Treaty to take up those bills and for the Senate to act on them?

Mr. ALLEN. Yes. I certainly agree with the distinguished Senator.

Mr. President, I ask unanimous consent that this colloquy, the remarks of the distinguished Senator from Montana and my own remarks, appear as in legislative session at a place other than in between my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SARBANES. Will the Senator from Alabama yield on that point so that the colloquy can be conducted in the appropriate place?

Mr. ALLEN. Yes.

Mr. SARBANES. I was very interested in the Senator's response. It would seem to me implicit in it was the possibility that we could arrive at an agreement on how and when we will consider the Panama Canal Treaty and bring it to a final vote, either up or down, in the Senate.

The Senator from Montana, of course, has on previous occasions made this

same point concerning the serious issues facing our Nation and I have on previous occasions risen to agree with him that there are other important matters pending before the Nation, in addition to the canal treaties, which the Senate needs to get to.

It seems to me we really ought to try very hard in view of this concern, I know it is shared by others, to arrive at a time certain for the consideration of the Panama Canal Treaty so that the Senate and the country will know that at some definite point there will be a vote, just as we were able to do with respect to the neutrality treaty on which we voted yesterday, and which, of course, was approved by a margin of 68 to 32.

So I would hope that in view of the response of the distinguished Senator from Alabama that sometime in the near future, in the next few days, we would be able to arrive at such an arrangement so that we would know, the Members of the Senate and the country would know, that the treaty that is now before us will, at a certain time, be acted upon.

We could then, of course, plan the rest of the business of the Senate which is also pressing and needs to be dealt with.

Mr. ALLEN. I thank the Senator for his suggestion.

Now, let me return to the distinguished Senator from Montana.

I say to the distinguished Senator from Montana that these are emergency measures. This Panama Canal Treaty is not an emergency measure. I am hopeful that in the 3 or 4 days we have next week prior to the recess we will be able to take up these emergency farm bills.

I am told that action must be taken on them prior to the Easter recess if they are to do any good because both of them have to do with a needed set-aside of acreage; that is, not putting in production certain acreage, portions of their holdings, to withhold certain acreage from production.

Obviously, in the next 2 to 3 weeks they must, of necessity, make a decision, in possibly 10 days they must make a decision of how much of their land they are going to plant.

So time is of the essence with respect to the emergency farm legislation. I do not see that the agreement on taking up the farm bill should be held hostage to any demand that a time limit or time for voting be set on this important issue.

We are getting more information all along that the White House will give us this exchange of correspondence. It might have a tremendous influence on the outcome of this treaty.

Mr. LUGAR. Will the Senator yield?

Mr. ALLEN. Yes, in a moment I will yield to the Senator from Indiana.

Mr. MELCHER. Will the Senator yield?

Mr. ALLEN. Yes.

Mr. MELCHER. I thank the Senator for yielding.

Time, indeed, is of the essence, because the effect of legislation, if passed in the Senate on Monday evening, or sometime on Tuesday, is to get over to the House in time for them to give it some consideration on next week, so that agricultural producers in this country can know now how much land they are going to put into cultivation, how much of their crops they are going to put into the ground in spring planting, and have some idea to make a judgment on how much crops they want to plant this spring, with some projecting prices which are also inherent in the bill. They need to know this very promptly.

The ships will go through the canal next week and the week after. World commerce will not be interfered with. The number of amendments at the desk at this point in the Panama Canal Treaty I am advised is 51. There may be scores more. It cannot be cleared up promptly.

This is one of the vital industries of this country that is waiting on action here in Congress, the agriculture industry, to see what we are going to do about the amount of land that will be set aside and not put into crops, or what will be the price projected for various crops, wheat and corn, and other feed grains, as well as cotton, so that farmers in America can make some determination of what they are going to plant at this time.

So, indeed, time is of the essence. It is vital for the country.

I am extremely hopeful that the Senate will agree to take up the unanimous-consent agreement on hours for these two bills on Monday, and we will proceed to address one of the serious problems here in our own economy in the United States.

I thank the Senator for yielding to me.

Mr. ALLEN. I thank the distinguished Senator from Montana for bringing up this matter. It is of greatest urgency. I assure him that I will not stand in the way of bringing up the farm bills. As a matter of fact, I will urge that they be brought up the first thing Monday morning.

With a 6-hour limitation on both bills, I would be willing to stay until both bills are disposed of on Monday, Monday night, or Tuesday—whatever time it takes. I would be willing to work right on through, to get these bills over to the House.

I believe the Senator from Montana has rendered a great service to the country in pointing this out.

I hope—as a matter of fact, I am confident—that the leadership will allow these bills to be brought up; because, very definitely, this treaty is not going to be approved next week. As the Senator says, ships are going to continue through the canal.

I yield to the distinguished Senator from Indiana (Mr. LUGAR).

Mr. LUGAR. Mr. President, I thank the distinguished Senator from Alabama and the distinguished Senator from Montana, both of whom serve on the Agriculture Committee. They have been heavily involved this week in the important action taken by the Agriculture Committee of the Senate.

I simply wish to affirm the request by the Senator from Montana (Mr. MELCHER) and the words of the Senator from Alabama (Mr. ALLEN) and to confirm this, at least in a bipartisan way. I, too, think it is imperative that we act on Monday or, at the latest, on Tuesday on these bills, for which all three of us have evidenced support in the Agriculture Committee and which are of an emergency nature.

I believe that a large majority of our colleagues in this body who have not been a part of the Agriculture Committee deliberations, but at the same time are sensitive to the problems of farmers throughout this country, will want to take this action and do so promptly before the recess; because the planting season is at hand and, if we are going to take these steps, we must do so in a timely manner.

I appreciate the consideration of the Senator from Alabama in yielding this time to me.

Mr. ALLEN. I thank the distinguished Senator from Indiana for his remarks.

It is a bipartisan matter and certainly does not smack of politics in the slightest.

I do not regard the Panama Canal issue as being anything other than bipartisan advocacy and opposition; both. I think it is a healthy situation that it is not a party issue.

I notice that 10 Democrats on yesterday voted against the treaty. Considering the number of Democrats and Republicans, that was not too bad a ratio. The opposition is bipartisan, and the advocacy position is bipartisan.

I yield to the Senator from Utah (Mr. HATCH).

Mr. HATCH. I thank the distinguished Senator from Alabama.

I agree with the Senator from Montana, the Senator from Alabama, and the Senator from Indiana that we have to do something about this farm problem and the crisis we have in America. Last evening, I met with 50 farmers from Utah who are here doing everything they can to see that something is done about this national emergency.

I do not know of any nation which has survived which has not had consideration for its farmers. Especially since I think the farm business is one of the two largest producers of the gross national product in America, we have to do something to alleviate the extraordinary suffering farmers are undergoing as a result of the economic crisis in this country.

So I commend the distinguished Senator from Montana and my wonderful friend from Alabama and others who are pushing as hard as they can to get some justice for the farmer in America. I support this.

I think that, important as the Panama Canal treaties are, the 6 hours reserved for this matter certainly is not an inordinately long time. We can interject it in what is happening here and get the problem resolved and benefit our farmers in this country. So I certainly back these Senators in their request. I also would be willing to stay as long as it takes to resolve these farms conflicts, not only in order to expedite the farm conflicts but also to get back on the Panama Canal Treaty.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. ALLEN. I yield.

Mr. ROBERT C. BYRD. Let me put

this matter at rest, after hearing all things said and seeing all kinds of things.

Yesterday, the leadership secured a unanimous-consent agreement on both farm bills. The Budget Committee is not ready to take up that bill. They plan to take it up on Monday, for good reasons. The Senate Budget Committee has some responsibilities, too, not only in connection with the farm bill but also other bills. The Budget Committee is seeking information so that it will be prepared to make various judgments in connection with the farm bills.

So it is anticipated that by next Tuesday or Wednesday, the bills will be taken up and disposed of on the same day, if there is no objection to taking them up. We have the time limitation on them; and if there is no objection to taking them up on next Tuesday or Wednesday, they could be taken up; the Panama Canal treaties could be set aside for that one day, and those two measures could be disposed of.

UNANIMOUS-CONSENT AGREEMENT—H.R. 6782

Mr. President, I ask unanimous consent that on next Tuesday, at 9 a.m., the Senate proceed to the consideration of the bill reported by the Agriculture Committee, H.R. 6782; that upon the disposition of that measure, the Senate proceed to the consideration of S. 2481.

I have not cleared this request with the minority leader. I ask unanimous consent that he may be authorized to enter his approval of the request. I have not cleared it with Mr. TALMADGE or Mr. MUSKIE, nor have I cleared it with Mr. MAGNUSON. The Appropriations Committee has had to deal with this matter, also. So I ask that the request be conditioned upon the approval of those Senators.

Let it not be said that the debate on the Panama Canal treaties has to stand in the way of action on these two measures. I have said from the very beginning that any measure of an emergency nature would be taken up.

So, while the leadership is a convenient whipping boy for a lot of flogging and laying the heavy wood on, I hope the leadership will be dealt with tenderly in this case.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Mr. CURTIS. Mr. President, reserving the right to object, I say to the distinguished majority leader that I hope he will include in his request a limitation of time, so that both bills can be completed on Tuesday.

Mr. ROBERT C. BYRD. They will be.

The PRESIDING OFFICER. The Chair advises that there is already a limitation of time on those bills.

Mr. CURTIS. But the vote will come on Tuesday?

Mr. ROBERT C. BYRD. No question about it, yes.

Mr. LEAHY. Mr. President, reserving the right to object, does the distinguished majority leader know that the complete committee reports of both the Agriculture Committee and the Appropriations Committee would be available by Tuesday? We are dealing with legislation. While we all understand that there are some very serious problems facing the agricultural community of this country, we are also talking about some very substantial appropriations involved. At least to this Senator, who is a member of the Agriculture Committee and the Appropriations Committee, it would be very helpful if those reports were available prior to voting.

Mr. ROBERT C. BYRD. Mr. President, will the Senator from Alabama yield?

Mr. ALLEN. I yield, on condition that I do not lose my right to the floor. I think that is understood.

Mr. ROBERT C. BYRD. Mr. President, the Appropriations Committee has just met and ordered reported H.R. 6782 without recommendation. As to whether the printed report would be available I do not know but I am quite sure it would be available by Tuesday, and I have no knowledge upon which I can base a response to the Agriculture Committee, but I feel it would be available and I will ask the Policy Committee staff to contact the Government Printing Office to urge that every effort be made that those reports be made available as soon as possible.

Mr. LEAHY. It is my understanding, also, then, from the distinguished majority leader's request, that both the chairman of the Appropriations Committee and the chairman of the Agriculture Committee would have opportunity today to interpose objections if they want to.

Mr. ROBERT C. BYRD. To the request.

Mr. LEAHY. Yes.

Mr. ROBERT C. BYRD. Yes, along with the distinguished minority leader and Mr. TALMADGE.

Mr. LEAHY. I have no objection.

Mr. ROBERT C. BYRD. I think I already cleared this with Mr. DOLE earlier.

Mr. LEAHY. I have no objection.

Mr. DOLE. Mr. President, reserving the right to object, first let me say that I thank the leadership for their efforts to cooperate. We have been discussing this for some, I guess, a couple of days now, and there has been every effort by the distinguished majority leader to work out some satisfactory time. I appreciate that very much.

The only reservation I would have is there is sort of an unwritten agreement between the Senator from Kansas and the Senator from Georgia that both bills be cleared and both bills be on the floor. On that basis, there will be no objection. We just did not want to lose one in the Budget Committee or the Appropriations Committee and not have an opportunity to vote on both bills on the same day. I guess that would be implicit in the unanimous-consent request.

Mr. ROBERT C. BYRD. Yes.

The PRESIDING OFFICER. The Chair will advise that was included in the original request for unanimous consent.

Mr. DOLE. So I think we can scale back the time. Six hours on each bill would be more than adequate. I would hope we could go back to 4 hours on each and that way finish in the early afternoon.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? If not, the unanimous-consent request is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield for one further request?

Mr. ALLEN. I yield.

Mr. ROBERT C. BYRD. I ask unanimous consent, Mr. President, that the time of 6 hours on each of the two bills, H.R. 6782 and S. 2481, be reduced to 4 hours in accordance with the suggestion made by the distinguished Senator from Kansas (Mr. DOLE), conditioned on the approval of Mr. MUSKIE, chairman of the Budget Committee, Mr. MAGNUSON, Mr. TALMADGE, and again the minority leader, Mr. BAKER.

The PRESIDING OFFICER. Is there objection?

Mr. LEAHY. Mr. President, reserving the right to object, and of course I never do, on both of these bills may that be amended to reserve 5 minutes on each bill to the Senator from Vermont?

Mr. ROBERT C. BYRD. Mr. President, that is the easiest request I have heard in a long time. I include that request.

The PRESIDING OFFICER. That is included. Is there further objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, if the distinguished Senator from Alabama will yield further, so that I might be sure of this, it has now been ordered that at 10 o'clock on next Tuesday morning——

The PRESIDING OFFICER. Nine o'clock.

Mr. ROBERT C. BYRD. Nine o'clock on next Tuesday, yes—I am an 8 o'clock fellow with a 9 o'clock time—9 o'clock next Tuesday morning, the Senate will proceed to the consideration of that first farm bill; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. Mr. President, did I not include in that request that upon the disposition of that bill the Senate will take up the second one?

The PRESIDING OFFICER. That was in an earlier unanimous-consent request already agreed to.

Mr. ROBERT C. BYRD. Yes, that was last evening.

Mr. President, may I assure the Members of the Senate that the Senate will come in and will proceed to the consideration of the first farm bill, dispose of it, go to the second one and dispose of it on next Tuesday subject to the condition that those Senators whose names were mentioned may waive the order.

The PRESIDING OFFICER. For the Chair's clarification here, is it the Senator's intention that we will go to the Senate bill or the House bill first?

Mr. ROBERT C. BYRD. Go to the House bill, H.R. 6782, first.

The PRESIDING OFFICER. I thank the Senator for clarifying that.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. ALLEN. I state this to the distinguished Senator from West Virginia, our distinguished majority leader. He expressed some concern that the Senator from Alabama, to use his words, was making a whipping boy of the leadership with respect to bringing up the farm

bills. I state to the distinguished majority leader that, on the contrary, the Senator from Alabama said—and I use the same exact words—that I was not only hopeful but confident that the distinguished majority leader would bring up the farm bills. And my remarks about not allowing the farm bills to be held hostage to the canal treaties was occasioned by a question from the distinguished Senator from Maryland (Mr. SARBANES) who stated in connection with the comment of the distinguished Senator from Montana that in a short while we should agree on a time limit on the canal treaties, and I saw no connection between the two and so stated. But I did not state that the leadership was withholding the consideration of the farm bills at all. I expressed the contrary view, I might say.

Mr. ROBERT C. BYRD. Mr. President, in my use of the phrase "whipping boy" I did not attach that to the Senator from Alabama's name.

Mr. ALLEN. I thank the distinguished Senator.

Mr. ROBERT C. BYRD. Nor did I name any other Senator in the use of that phrase.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. ALLEN. I yield.

Mr. SARBANES. I appreciate the Senator yielding. The point I made was really to underscore the importance of the issue the Senator from Montana had brought before the Senate in terms of dealing with the pressing issues facing our Nation's farmers. In fact, I made the unanimous-consent request last night with respect to establishing the time limitation for the farm bills in order to enable us to go forward with considering these farm bills.

The distinguished Senator from Alabama, in responding to the Senator from Montana, agreed with the point that there are a number of pressing issues, and the only point I then wished to make was it seemed to me that it would be very helpful to all Senators and to moving forward with the Senate's business, not that we should dispose of the Panama Canal Treaty by next week, because I understand the Senator from Alabama and other Senators have a great number of issues they wish to discuss, but simply in the near future we should try to reach some understanding on a date beyond that point when we would, in fact, finally deal with this treaty matter by an up or down vote just as an understanding was reached with respect to the treaty that was voted on yesterday.

I fully understand and intend that a reasonable time will intervene between the time understanding and the date for the vote during which consideration will take place of the various matters that are pending with respect to the Panama Canal Treaty. But it seems to me a very worthwhile objective in terms of transacting and planning the business of the Senate if we could soon reach some understanding that at some time on a date certain the Senate would act. Otherwise, we are left in the position of simply facing the prospect of going on for ever and ever when there are other matters also that the Senate needs to get to. It would seem to me that reasonable men should be able to arrive at an understanding as to what constitutes a reasonable period of time for the consideration of the issues involved with the Panama Canal Treaty. Reaching that time understanding, and it should not be too difficult to do, would give us a date for a final vote. We have already, of course, responded to the immediate problem of the farm bills. There was no suggestion whatever in terms of holding any issue hostage and, in fact, I have recognized and urged prompt action on the farm problem. Indeed, I have supported the comments that on occasion have been made from the able Senator from Montana with respect to the need to deal with other pressing issues. It seems to me that for the orderly planning of the business of the Senate we ought to reach an understanding as to a date when we will act finally on the Panama Canal Treaty. That was the thrust of my comments to the able Senator from Alabama, who is extremely skilled in matters on the floor of the Senate and in the Senate's business and who, of course, can play, if he wishes to, an enormously constructive role in helping the Senate to set a reasonable time framework in which to consider debate on the Panama Canal Treaty and action on the amendments and other changes which Members may have.

I would hope that in the next few days the Senator would be willing to join in an effort to try to arrive at some fixed timetable for dealing with this treaty which would be fair to everyone. I am not suggesting it should be of such short duration that people do not have a chance to fully express themselves, but we at least ought to understand what the ground rules are and the time framework in which we are operating, and I would think the Members of the Senate and the country would want to be assured that this matter could not drag on forever.

Mr. ALLEN. I thank the distinguished Senator from Maryland for making these comments.

Certainly there is no disposition on the part of the Senator from Alabama to unduly prolong the discussion on this treaty. But I call attention to the distinguished Senator from Maryland that we have had this treaty before the Senate for only an hour and a half, and we are talking about, worrying about, setting a time limit. That hardly seems to place this bill in a position where it is being unduly debated.

Not a single amendment has been brought up, and the Senator from Maryland says, "Let us set a time to vote." That is a little bit precipitate, it would seem to the Senator from Alabama.

I will assure the Senator from Maryland after the recess—I underscore after the recess—and several days' consideration thereafter, I feel sure that the opponents of this treaty would make a bona fide effort, as we did on the other treaty, and I heard no one say that matter was unduly prolonged. A time was set well in advance. All amendments anybody cared to offer were offered, and I feel confident that a time can be agreed upon.

But I think the country has a right to consider the action of the Senate and to weigh this matter and be assured that the issue is still before the Senate, that the action of yesterday really is not going to count at all if the Senate defeats the Panama Canal Treaty. That action would just be wiped out because one treaty cannot go into effect without the other. So I hate to see the distinguished Senator from Maryland, who certainly has done an outstanding job steering to approval the Neutrality Treaty, I would hate to have him seek to put the Senator from Alabama in a position where he is holding up final action on this treaty when we have not had it under consideration for but an hour and a half. It is too important to cut off that soon or to set a date for final action.

Yes, I yield.

Mr. LEAHY. I would just like to make a comment. I do feel, as I said from time to time on the floor, that the Senate should have ample time to debate these treaties. I think we have done a great service to the country, both those Senators who were opposed to the treaties and those who favored the treaties.

I cannot speak with the years of experience of the Senator from Alabama, but certainly in the short while I have been in the Senate I know of no issue that has received such full and complete debate, and one made so public. I think that is good for the country, and I have said that as a compliment both to Senators who opposed the treaties and Senators favoring them.

Mr. ALLEN. I thank the Senator.

Mr. LEAHY. I would hope at some point a time certain will be set, because while the issues should be brought out, while they should be fully debated, there is a broad concern around the country, as there is in my own State of Vermont, that we face a number of other equally pressing areas, whether it is farm bills, energy legislation, or tax legislation to be discussed.

I was reminded by some people in Vermont recently, some in favor and some against the treaties, that when we debated the treaty setting up the NATO alliance, probably the most significant military alliance in recorded history, that the debate on that was either 12 or 14 days in the U.S. Senate.

I am not unmindful of that, and certainly the Senator from Vermont is willing to start early and go late to expedite this matter. But I know the people in my State, while they are very interested, both those for and those against, they hope that at some time on a date certain the matter will finally be resolved and voted upon.

Mr. ALLEN. I feel sure the Senator's wishes will be complied with and a date will be set and it will not be an unreasonable date.

The point I am making is that after the treaty has been under debate for an hour and a half efforts are being made to indicate that the Senator from Alabama should agree on a time certain to vote on this treaty. I do not know what is going to come up.

The distinguished Senator from Michi-

gan just a moment ago called attention to the fact that there was an exchange of correspondence between Dictator Torrijos and President Carter in the last 2 days of consideration of the Neutrality Treaty, and the distinguished Senator from Michigan stated—I do not have personal knowledge of this but merely repeat in essence what he said—that while assurances were being made here on the floor of the Senate that these reservations to the resolution of ratification meant something that assurances were being made to dictator Torrijos that they did not change anything.

If that is in fact true—and I do not aver that it is, I merely state that that statement was made here on the floor of the Senate by a highly ethical and reputable Senator whose veracity I respect and believe that that circumstance does exist, and I stated in the absence of the leadership I would hope that the leadership would use their connections with the White House and their frequent contact with the White House to get that exchange of correspondence and make it available to the Senate.

I yield to the distinguished minority leader (Mr. Baker).

Mr. BAKER. I would like to say three things, if I may. I thank the distinguished Senator from Alabama for yielding.

He is correct, it was necessary for me to leave the floor briefly, and I was not here when the colloquy the Senator identified occurred. I will address that in just a moment.

I also was not here at the time of the propounding of the unanimous-consent request with respect to the farm bills, consideration of the farm bills. It is my understanding that the unanimous-consent request was put subject to the right to waive that agreement by the minority leader and certain others.

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I wish to tell the Chair and my colleagues that that agreement was cleared with me in advance and discussed with the Senator from Kansas (Mr. DOLE). It is a good agreement. I expressed my appreciation to him, the Senator from Georgia (Mr. TALMADGE) and the Senator from Alabama (Mr. ALLEN) for agreeing for us to proceed with these farm bills under the very difficult circumstances to occur, and there is no need for me to have that right to waive that agreement, and I will relinquish it herewith.

(This concludes proceedings which occurred during discussion of the Panama Canal Treaty.)

SUN DAY

Mr. DOLE. Mr. President, on Tuesday the Senate passed a resolution to proclaim May 3 as a national day to celebrate solar energy. This event, if followed through, will certainly help to make people aware of the potential for solar energy.

As preparations are made for Sun Day, I think that all of us realize that there are still enormous hurdles yet to be overcome before most solar technologies are ready for the marketplace. We all realize that besides a celebration, May 3 should carry the message to "keep working." We have yet a long way to go. On May 3, we should equally emphasize the Nation's need for talented people to become interested in the problems and to help the country move toward a future based on inexhaustible supplies.

THE PROBLEMS

For many of the new ideas involving solar, we have yet to show that they are economical. This is a problem of our engineers and scientists. There are also difficult problems to solve in removing the institutional barriers to getting solar energy into our economy. We have yet to prove to ourselves that we know how to accept new and innovative ideas, even after the technology has been developed.

These are problems for lawyers and social scientists. It would seem that the challenge of solar energy provides intriguing problems for a broad range of talent in this country.

Much of the problem however, lies with the scatter-gun approach this administration has taken in getting solar energy implemented in the United States. On the part of the Government, what is needed is a program to inform our citizens of the facts regarding solar, and an active program to identify the institutional barriers that preclude solar energy from being considered in many cases.

GETTING THE FACTS

At the present time, it is nearly impossible to determine the important facts about a piece of solar equipment. Solar collectors are available over a wide price range. Some solar panels are simple; others are very sophisticated. Some use air; others use liquid. This system is "active"; that system is "passive." Every vendor will tell you absolutely for certain that his model is worth the extra price.

But only one fact is certain. There is no way that the consumer has to compare the different products. There is no widely accepted standard to help the consumer decide which is the "better" system. In addition, it is not at all clear that solar heat is competitive with gas heat in many parts of the country. A consumer needs to know the cost of the alternatives as well as the cost of solar equipment. While we favor a future that includes widespread use of solar energy, still today we owe it to the consumer to help him make rational choices.

A valid role for Government is to provide this needed information. I have seen no indication that the Energy Department is preparing to get this kind of information out where it will do some good.

INSTITUTIONAL PROBLEMS

The second problem with solar energy is that there are institutional barriers. It is no secret that we are pretty slow to accept new ideas. A good example of this kind of problem was brought up in a letter I received from Mrs. Donald Bressler of Hoisington, Kans. She and her husband put a lot of money into a house that used the sun to satisfy 60 percent of their energy needs. They felt that the savings in fuel would offset the added expense of putting solar collectors on their house. They were then shocked to find that their taxes were twice as high as their neighbors. These tax laws and other barriers are being gradually removed, but progress is slow.

Here again, the Government can take a leading role in identifying the problems and in investigating the possible solutions that would be compatible with our other national goals. Today I would doubt that we even know what most of those institutional problems are.

GOVERNMENT HINDERS INNOVATION

Meanwhile, our Government, the Department of Energy in particular, has obviously yet to learn how to accept new ideas. Let me give you a final example.

We all know that wind energy is solar energy, and that electricity from windmills is pretty expensive by today's standards. Some of my friends from Kansas had what I think was a reasonable approach to making wind energy useful, especially for rural areas. They wanted to allow people to sell wind-produced energy for local use to help defray the cost of the windmill. This would also mean that the owner would not have to buy a gadget to store the energy.

It is an understatement to say that DOE rejected the idea. They never even considered it. Within a week after the idea was proposed to them, they returned all the material relating to the subject. At this point, if you asked the DOE what they did about this idea, they would probably have no record of ever having received it. You may find this hard to believe, but they even sent back the calling cards of the people who proposed the idea.

It is easy to get upset at how DOE treats people, but that is not directly the issue. The larger issue is that there is a disturbing lack of interest in solar energy on the part of the agency that we created especially to work on new energy ideas. They are discouraging innovation, instead of encouraging it.

MORE THAN A 1-DAY CELEBRATION

In closing, I would recommend much more than a 1-day celebration. I would like to see Sun Day become the beginning of a real Government effort to get to work on solar energy.

I am very much aware of the problems yet to be solved. Both my staff and I have spent a lot of time on these issues. We have also been continuously dismayed that the DOE can do so little with so much money. For the agency at least, I do not think they deserve to take a day off to celebrate. They should have much too much work for that.

The Sun Day resolution calls upon the President to "direct all appropriate Federal agencies to cooperate with and participate in the celebration of Sun Day."

The Congress recognizes that although we can proclaim a special day, it is really up to the agency to make that day a success.

So the real question is, what can we expect from the DOE on May 3. Will we see the unveiling of a major new program in solar energy. Will we see the beginnings of a unified R. & D. effort to get the price of solar electricity down? Or will we only see lipservice, cosmetics, and a little Madison Avenue?

I look forward to May 3, as a day that

will provide yet another opportunity for the DOE to demonstrate its ability, and its commitment to solving the Nation's energy problems. In spite of their past performance, I feel that the message must be apparent to them by now. Thus I feel hopeful that on May 3, we will see the agency rise to the challenge. The Senator from Kansas looks forward to learning of several new solar initiatives that will be announced on May 3.

MAKING BULLETS OUT OF DEPLETED URANIUM

Mr. DOLE. Mr. President, an article appeared in the Washington Star on March 14, reporting that the Pentagon is about to start using depleted uranium to produce bullets. They seem to have chosen this material for bullets because uranium metal is dense, and because depleted uranium is cheap. Needless to say, I find this proposal shocking.

On the one hand this shows a complete lack of sensitivity to a general fear of using radioactive materials. On the other hand, only a strange set of policy decisions could have made this material so cheap that anybody would consider using it for bullets.

RADIATION HAZARD

First of all, uranium is dangerous. If the DOD decides to pursue this project, much will be said during the next few months about the hazards of working with this material. If they do go ahead with this project, it will imply that the DOD is willing to subject their personnel to a new source of gamma radiation. Just when concerns are being expressed about the effects of low level radiation, this project implies that the DOD already has all the answers.

But without minimizing the importance of health and safety, I would like to bring up another side of this issue. One important fact has not been mentioned in the press. It is a fact that the depleted uranium, instead of being used for bullets, could be used eventually to produce electricity.

At a time when we continually hear of an increasing energy crisis, it seems to me that the energy content of the uranium should at least be considered before anyone decides that uranium is only useful because it is heavy.

DEPLETED URANIUM

Depleted uranium is the material left over after fuel is made for commercial reactors. The name is somewhat misleading, however, because there is an enormous amount of energy in this material.

To get that energy out, the material would have to be processed in a breeder reactor. In such a reactor, the material would be transmuted into plutonium and it could then be used as reactor fuel.

ENERGY CONTENT

Last night I did a little calculation to see just how much energy we were talking about putting into those bullets. It is remarkable. The Pentagon is talking about 3 ounces of uranium in each bullet. If that material were used as nuclear fuel, it would have the energy equivalent of about 700 barrels of oil—in each bullet.

The news report also talks about a program to make 730,000 of the bullets. That is the equivalent of 510 million barrels of oil. That much energy could substitute for 85 days worth of oil imports. Yet the proposed program completely disregards the fact that the uranium might have other uses besides being shot from guns.

WHY MAKE BULLETS

Mr. President, it is very interesting why the Pentagon should come up with uranium when they looked around for a material for bullets. Depleted uranium is dense, but so are many other metals, like tungsten. The reason uranium looks so good is that it is cheap.

And why is it cheap? It is cheap because this administration has decided to defer indefinitely, the development of a commercial breeder reactor. And if we do decide to do without the breeder, we will essentially waste the energy content of the 270,000 tons of depleted uranium that we already have available in this country.

Again, let me tell you how much energy we are talking about. The depleted uranium that is already above the ground, that 270,000 tons, represents more energy than all the coal yet to be mined in this country. It is a truly astounding amount of energy.

But at this point, the Pentagon is right. The metal is practically worthless. We should keep in mind however, that it is not worthless because it has no real value. It is worthless because the administration has decided that the United States is not going to exploit the energy in this material.

STILL HOPE TO BRING ON NEW SOURCES OF ENERGY

Mr. President, we all recognize that the future of the breeder reactor is somewhat in doubt at this point. But there are those of us who have not given up hope that our Government will finally see that more energy supplies are the only real solution to our energy problems. When that time comes, a new decision will be made and I am confident that this country will move ahead with an aggressive program to develop and commercialize breeder reactors.

But in the meantime, the country continues to accumulate depleted uranium as it makes fuel for ordinary reactors. The question is whether we will save this extremely valuable material for use later, or whether we will think of it as useless in the near term, good for nothing except making bullets.

It seems to the Senator from Kansas that there is only one possible choice. We have now realized that fossil fuels will not last forever. It is folly to waste fuel that we might need in the future. While this administration calls conservation the "cornerstone" of its energy policy, they must realize that their proposed use of depleted uranium would deny that fuel to future generations.

Mr. President, I would urge the administration to adopt realistic and consistent policy toward nuclear power and nuclear fuel.

We need to bring on all the alternative sources of energy that we can develop in this country. Breeder reactors are one alternative.

While we are still developing that technology, it is folly to treat uranium as though it is a worthless metal, suitable only for making bullets.

(Routine morning business transacted and additional statements submitted are printed later in today's RECORD.)

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

THE PANAMA CANAL TREATY

The Senate continued with the consideration of the Panama Canal Treaty.

ARTICLE I

ABROGATION OF PRIOR TREATIES AND ESTABLISHMENT OF A NEW RELATIONSHIP

1. Upon its entry into force, this Treaty terminates and supersedes:

(a) The Isthmian Canal Convention between the United States of America and the Republic of Panama, signed at Washington, November 18, 1903;

(b) The Treaty of Friendship and Cooperation signed at Washington, March 2, 1936, and the Treaty of Mutual Understanding and Cooperation and the related Memorandum of Understandings Reached, signed at Panama, January 25, 1955, between the United States of America and the Republic of Panama;

(c) All other treaties, conventions, agreements and exchanges of notes between the United States of America and the Republic of Panama, concerning the Panama Canal which were in force prior to the entry into force of this Treaty; and

(d) Provisions concerning the Panama Canal which appear in other treaties, conventions, agreements and exchanges of notes between the United States of America and the Republic of Panama which were in force prior to the entry into force of this Treaty.

2. In accordance with the terms of this Treaty and related agreements, the Republic of Panama, as territorial sovereign, grants to the United States of America, for the duration of this Treaty, the rights necessary to regulate the transit of ships through the Panama Canal, and to manage, operate, maintain, improve, protect and defend the Canal. The Republic of Panama guarantees to the United States of America the peaceful use of the land and water areas which it has been granted the rights to use for such purposes pursuant to this Treaty and related agreements.

3. The Republic of Panama shall participate increasingly in the management and protection and defense of the Canal, as provided in this Treaty.

4. In view of the special relationship established by this Treaty, the United States of America and the Republic of Panama shall cooperate to assure the uninterrupted and efficient operation of the Panama Canal.

The PRESIDING OFFICER. Are there amendments to article I?

Mr. ROBERT C. BYRD. Madam President, will the Chair recognize me?

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. I had promised the distinguished Senator from Alabama that nothing would occur until he entered the Chamber.

Mr. ALLEN. The Senator is here.

Mr. ROBERT C. BYRD. I wanted recognition to keep my commitment, so the Senator is here now. The Senator and I are both here.

Mr. ALLEN. I thank the Senator.

Does the Senator desire recognition?

Mr. ROBERT C. BYRD. No. I only wanted recognition in order that I might take a little time until the Senator came into the Chamber.

Mr. ALLEN. I thank the Senator.

May I pose a parliamentary inquiry?

Mr. ROBERT C. BYRD. Yes, I yield the floor.

Mr. ALLEN. Madam President, are we now in the Committee of the Whole for the purpose of considering the Panama Canal Treaty?

The PRESIDING OFFICER. The Senate is considering the treaty as in Committee of the Whole.

Mr. ALLEN. I did not understand the Chair.

The PRESIDING OFFICER. The Senate is as in the Committee of the Whole.

Mr. ALLEN. I thank the Chair. That would mean then that shortly we will start considering the Panama Canal Treaty which, I might say, many people throughout the country think was approved on yesterday. But we will start considering the Panama Canal Treaty article by article shortly, is that correct?

The PRESIDING OFFICER. We are considering that treaty article by article right now.

Mr. ALLEN. Very well. We have article I before us?

The PRESIDING OFFICER. Article I is before us.

Mr. ALLEN. I thank the Chair.

Madam President, as we consider article I of the treaty, I think it might be well to take stock of just where we stand with respect to the two treaties that have been submitted to us by the President of the United States, resulting from negotiations between the Panamanian Government and our Government with respect to the disposal of the Panama Canal, the transfer of the canal to Panama, which would take place at the end of this century, and then the approval of the so-called Neutrality Treaty, which really provides for the defense of the canal starting in the year 2000.

Yesterday the Senate, with one vote to spare, did approve the Neutrality Treaty. What, then, was the effect of the approval of the Neutrality Treaty? That vote gave tentative approval to the Neutrality Treaty. It provides that if the Panama Canal Treaty is approved by the Senate, and notes of ratification are exchanged by the two Governments, the treaties will not go into effect, I believe, until 6 months after the exchange of the notes of ratification. Therefore, such rights as might be conferred by the Neutrality Treaty are inchoate rights; they have not sprung into being as yet. They are more or less in a state of suspended animation awaiting further action by the U.S. Senate and the executive department.

This is a strange situation, and it really comes about as the result of the decision of the leadership to place the Neutrality Treaty ahead of the Panama Canal Treaty in Senate consideration of the two treaties.

I urged that the leadership not do that; that that was putting the cart before the horse. We ought first to decide whether are are going to give the Panama Canal away, and under what conditions, before we talk about defending it in the year 2000.

Madam President, I made a motion to that effect, and we had a rollcall vote here in the Senate on it. The Senate decided by a vote of 67 to 30 to abide by the leadership decision and consider the Neutrality Treaty first.

I pointed out to the leadership, both privately and on the floor, that going the route of considering the Neutrality Treaty first would deprive many Senators of the privilege of voting for the Neutrality Treaty. I urged that we decide first the basic question, the question of whether or not we are going to give the canal away, before we worry about defending it in the year 2000.

I pointed out that if the Panama Canal Treaty were being considered first, and that treaty was approved by the Senate, there would probably be five, six, or seven amendments offered to the Neutrality Treaty, but that in the final analysis, having already agreed on the Panama Canal Treaty—if this had been the case—there would probably have been a well nigh unanimous vote for the Neutrality Treaty.

No one objects to the defense of the canal. The chief objection raised here on the Senate floor has not been to the ultimate approval of the Neutrality Treaty, if the decision is first made to give the canal away, but to strengthening amendments that were sought to be added to the treaty by Members of the Senate giving the right to continue to maintain troops in the Panama Canal Zone if it were necessary for the defense of the canal.

But, no, the leadership wanted to leave the provisions of the treaty just as they were, requiring full withdrawal of our troops, the abandonment of all of our bases, by the year 2000.

I pointed out to the leadership, both privately and on the floor, that going the route they were going would take more time than going the route of considering the basic question first. I suggested a difference of a week in the ultimate timing of action on both treaties.

I pointed out, too, that if the Panama Canal Treaty had first been approved, many Senators who felt on yesterday that it was necessary to oppose the Neutrality Treaty, because it was and is part and parcel of the Panama Canal Treaty, would have been glad to have voted for a strong defense treaty. If the other treaty had been acted upon first, I daresay the defense treaty, the Neutrality Treaty, could have been acted upon in not over 2 or 3 days.

No, they said they had to act on the Neutrality Treaty first because some of us cannot vote for the Panama Canal Treaty unless we have a Neutrality Treaty first.

Well, of course, they knew that the same provision is in the Panama Canal Treaty as is in the Neutrality Treaty, that each one goes into effect simultaneously with the other, no matter which is considered first. Furthermore, the leadership amendment was cosponsored by some 78 or 80 Senators, so there was no doubt but what the Neutrality Treaty would be approved and, furthermore, one could not go into effect without the other.

Because of the choice of the leadership we now have the basic question, the propriety of giving up the Panama Canal, still undecided—and very much undecided, I might add.

I assume, Madam President, that that was part of the strategy of the leadership. They are very wise and very astute; they are great Senators, with over 60 Senators following their recommendations on questions before the Senate. I have to take that back: On one amendment we received 41 votes, on an amendment I offered. I guess really they are in command of only 59 Senators on any question concerning the treaties which might come up.

The effect of the leadership action in putting the wrong treaty first has left us, after 5 weeks of debate, with the basic question, the only real question which is in dispute aside from the adequacy of the defense rights given us under the Neutrality Treaty. The only real question in dispute is, Shall we give the canal away, and under what circumstances?

That still remains to be acted upon.

Madam President, the main thought I wish to get across, not only to the leadership and the Members of the Senate but to the people of the Nation, is that this fight is just the beginning; that no momentum has been built up that is going to move like a steamroller to the approval of the Panama Canal Treaty. If there is any thought of a buildup of momentum, let me disabuse the thinking of those who feel that that is the case. No momentum has built up, because we have not even started considering the basic and fundamental issue.

Madam President, it is rather strange that all of this effort we have gone through with respect to these treaties, including the approval by the Senate of the Neutrality Treaty, the defense treaty, will have been nullified and held for naught unless the Panama Canal Treaty is agreed to. What good would the Neutrality Treaty be if the canal stays the property of the United States or, to word it more accurately, if the 1903 treaty remains in full force and effect?

Madam President, we have a situation that I would say is somewhat analogous to two baseball teams, shall I say, playing two games, the first game being an exhibition game, not part of the regular season play of that league; then the next game being part of the regularly scheduled season between the two teams. The only game the outcome of which would be considered in the averages of the season would not be the exhibition game, which counts for nothing in the standing of the team. The only game that would have any standing in the league averages would be the regular season game. So, carrying that analogy one step farther, what we have done thus

far is something of a preliminary action, an exhibition game, a straw vote, as it were—a very high level straw vote, I might say, a vote of 68 to 32. That is the way the Senate voted on the Neutrality Treaty; but unless the Panama Canal Treaty is approved by a two-thirds majority in the Senate, this action taken on yesterday will be in effect vitiated, held for naught.

If we had gone the other route and considered it first, as I had stated, I would feel we would have had a wellnigh unanimous vote for the Neutrality Treaty. So the battle has yet to be won. The battle lies ahead.

The basic and fundamental issue, the transfer of the canal—some Senators object to the use of the words "giveaway of the canal," so I am going to try, as often as I can, to refer to this as the transfer of the canal, since it is not pleasing to some Senators to say the giveaway of the canal. But the basic and fundamental issue before the Senate is, shall the canal be transferred to Panama; shall conditions be set up that would change this nonprofit operation by the United States of the canal into a profitmaking operation which the United States carries on for 22 years for Panama and, thereafter, Panama would carry on for itself; and is the American taxpayer going to be called on to pay tens and hundreds of millions of dollars?

Assurances have been given by the President himself, by the way, in his fireside chat, that payments to Panama are going to come out of Panama Canal tolls. So I think we want to write that—I might say also that statement has been made here on this floor time and time again. So I think, in the interest of the American people and in the interest of the taxpayers of the United States, we are going to want to write that into the treaty—not merely add it to the treaty in some reservation.

By the way, these reservations—I have not listened to the radio or TV this morning; I have not read the morning paper, as a matter of fact. I heard other Senators say this morning that Mr. Torrijos is saying he does not much like these reservations. I say to the distinguished Senator from North Carolina (Mr. HELMS), who is listening attentively here, that I consider that an act. I do not think he has any doubt at all that he is going to accept these reservations and be overjoyed at doing so. I have said here on the floor that I believe he would accept 100 amendments. This is the opinion of the Senator from Alabama; I am not stating this as a fact. I believe he would accept 100 amendments to this treaty to get that $100 million a year start rolling in down in Panama to bolster his dictatorial regime, I say to the distinguished Senator from North Carolina.

Mr. HELMS. Will the Senator yield?

Mr. ALLEN. Yes, I yield.

Mr. HELMS. Not only is the dictator Torrijos acting, I would say there are a number in the Senate and others downtown who would qualify at least for an Academy Award, I say to the Senator from Alabama.

Mr. GRIFFIN. Will the Senator from Alabama yield?

Mr. ALLEN. Yes, I yield.

Mr. GRIFFIN. The Senator from Alabama may well be correct in his appraisal of the reaction by General Torrijos. However, a matter that disturbs this Senator very much relates to an exchange, within the last 48 hours, of telephone calls and an exchange of letters between the President and General Torrijos relating to the reservations that were being considered in the Senate. I now find, by reading the morning papers—not from any information provided by the White House—that a letter was received at the White House yesterday from General Torrijos, apparently in response to a letter sent by President Carter to General Torrijos on Wednesday, and that these letters pertain directly to the matter under discussion in the Senate. Despite the fact that this Senator, early in the debate on yesterday, following a CBS report by Phil Jones, called upon the White House to provide us with a report as to previous telephone conversations and the letter sent by President Carter, no information was provided to the Senate.

I suppose some would say, "Well, now, Senator GRIFFIN, did you call up the President and make that request personally?" No, I did not. But, of course, I know that Hamilton Jordan has the radio on down at the White House. At least, I read that he does. At the White House, they have turned off the music and are listening to the debate in the Senate. At the White House, they know what we are saying up here. I have no doubt about that.

I find it rather disturbing that the exchange of letters between the two heads of Government was not made available to the Senate yesterday before the vote. I do not know precisely what was in the letters. In the news reports this morning I find strong indications that the President apparently was seeking to assure the Panamanians that the reservations and amendments being adopted in the Senate are meaningless and will not change the treaty.

Mr. ALLEN. Is the Senator talking about the amendments to the resolution of ratification?

Mr. GRIFFIN. And certain reservations, particularly the one offered by Senator DECONCINI.

Mr. ALLEN. In other words, agreeing to something here that he was assuring Torrijos did not mean anything, is that right?

Mr. GRIFFIN. Obviously, until we see the letters, it is difficult to say what is in them.

Mr. ALLEN. Yes.

Mr. GRIFFIN. But there is every reason to be concerned that while Senators were being assured, on the one hand, that their amendments were meaningful, in order to get their vote, there were assurances being given to the Panamanians or General Torrijos that the same amendments would not change anything.

Mr. ALLEN. That is a very interesting circumstance.

Mr. GRIFFIN. I should like to see the letters.

I also learned by reading the papers that the exchange of correspondence I am referring to was read over the radio in Panama on yesterday. In other words, the letters are not a secret down in Panama, but they are a secret in the U.S. Senate. Is that not an interesting situation?

Mr. ALLEN. Yes; I might say to the distinguished Senator from Michigan (Mr. GRIFFIN) that that is the pattern that they apparently have had down in Panama. The Senator will recall that when the President and the dictator entered into this so-called memorandum, as quickly as Torrijos got back to Panama he put an entirely different interpretation on what the memorandum meant from what our people up here were saying it meant. That very same interpretation was carried forward into the leadership amendment, because the leadership amendment was in fact the memorandum between the President and the dictator.

So just following the same pattern, if what the distinguished Senator says is correct about it being broadcast down in Panama, do I understand him to say that the President's letter was broadcast over the Panamanian radio?

Mr. GRIFFIN. That is my understanding from reading the various press reports this morning: The letter of President Carter to General Torrijos on Wednesday, and a response from General Torrijos to the President, which was delivered to the White House before yesterday's vote, were both read on the Panamanian radio yesterday. Apparently—and I wish to emphasize that I do not know the contents of the letter yet—apparently the purpose was to assure the Panamanian people that the amendments and reservations being adopted in the Senate after being "accepted" by the President, really would not change the treaty.

I take it that was the purpose of it.

Mr. ALLEN. And the Senate is the last to know about what is going on, really.

Mr. GRIFFIN. We were.

Mr. ALLEN. Between them.

Mr. GRIFFIN. We are entitled to know what was in the exchange of correspondence, which was not provided to us or to the American people.

Mr. ALLEN. Did the Senator request it of the White House?

Mr. GRIFFIN. Well, I did not know, of course, at the time I did not know there was a letter from General Torrijos to President Carter. I thought the Senate should be advised in a report provided to the Senate concerning the communications in recent days between the President and General Torrijos.

I was aware, because of a report by CBS yesterday morning, that on Wednesday the President had talked personally with General Torrijos on the telephone about these matters of concern involving the DeConcini reservation, and also that there was a letter from the President to General Torrijos.

Now, despite the public request to the President and to the White House to provide that information to the Senate it has not been forthcoming. In addition, the situation is compounded by the fact that later in the day, but before the vote, there was a letter, according to press reports, from General Torrijos to the President. I think that letter would have been

very important information for the Senate to have had on yesterday.

Mr. ALLEN. Yes.

Mr. GRIFFIN. Would not the Senator agree?

Mr. ALLEN. I would certainly agree.

As soon as some of the leadership people come in—I rather imagine, possibly, they are listening to the proceedings over the radio or over the various squawk boxes that we have or some Senators have. I do not have one myself. They are probably listening to this. I should say that I feel what the distinguished Senator from Michigan feels, that would be appropriate, not only to have these letters, the correspondence between the President and Torrijos as to the amendments under consideration in the Senate—and when I say, "amendments" I mean not only amendments to the treaty, but amendments to the resolution of ratification. I think that would really have an important bearing on the bona fides of the whole operation. It would seem to me if the Senate is being assured that the reservation means something and if—and I do say "if," because I do not know if a different connotation is being placed on these amendments in assurances to Panama. I think we would need to know about that. There is nothing we can do about the action on the treaty because the action has already been sought to be reconsidered by the leadership as a parliamentary move, and then that motion has been tabled; but certainly if that is the manner that they have of treating amendments, saying here in the Senate that it means something and saying to the dictator that they do not mean anything, I think it is highly important that that correspondence come in, and along the same line, that the telephone conversations come in.

I would vote to call right now on the leadership, in their contact with the White House—and I assume they are in daily contact with the White House; the Senator from Alabama is not, but I imagine that they are—or in one of their victory celebrations, it could be brought up at one of those sessions that some Senators here would like to have this same correspondence; and I am calling on the leadership at this time, over the weekend, to obtain for the Senate this information to which the distinguished Senator from Michigan (Mr. GRIFFIN) has alluded, and I think it is very important to find out under what circumstances and what differing interpretations of language we were proceeding on yesterday, and then the weight that we are going to give to amendments offered here in the Senate under the assurance to us that they mean something, while assurances are being given to the other party that they mean nothing.

I am assuming that that is the thrust of what the distinguished Senator is saying.

Mr. GRIFFIN. The Senator from Alabama is precisely correct. And, of course, one could only engage in speculation at this point, without having those letters before us and being able to read them, but certainly one must wonder, if that information had been available to the Senate yesterday, whether the vote would have been the same.

Mr. ALLEN. Well, I think it might be well to put a time, not only a date, but a time for the dispatch of the President's letter or communication or phone call, the time of day as well as the date itself.

Would the Senator join in the request of the Senator from Alabama that those letters and a log of those phone calls be made available to the Senate on Monday?

Mr. GRIFFIN. Oh, well, I would hope that the White House——

Mr. ALLEN. Or possibly today.

Mr. GRIFFIN. This is the Senate of the United States. We are a coordinate, equal branch of the Government with a responsibility of high order. I would think the President would immediately provide those letters to us upon request. I will be surprised and shocked if that is not the case. I do not understand why this information was not provided yesterday before the vote.

Mr. ALLEN. The distinguished Senator seems to think they might have sent it up by limousine within the hour, possibly.

Mr. GRIFFIN. I would hope so, if the White House staff is listening on the radio down there, as I am sure they are. Of course, they may not be quite as interested in the debate this morning.

Mr. ALLEN. Well, they had better start taking an interest, because, as the distinguished Senator from Michigan knows, the battle is just now getting started.

Mr. GRIFFIN. Before I forget, I ask unanimous consent that various articles which appeared principally in the New York Times and the Washington Post providing the background from which I am speaking be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 17, 1978]

PANAMA HAILS VOTE; SENATE RESERVATION MAY CAUSE TROUBLE

(By Karen DeYoung)

PANAMA CITY.—The Panamanian government yesterday called the U.S. Senate's ratification of the Panama Canal neutrality treaty "a historic moment for the country," but warned that it would study carefully a reservation the Senate approved in its action on the treaty.

The reservation authorizes the use of U.S. military force in Panama, and the government here said it will determine if that alters the treaty objectives or violates Panamanian sovereignty or integrity.

In a radio address to the country minutes after the Senate vote, chief treaty negotiator Romulo Escobar Betancourt said that Panamanian head of state Gen. Omar Torrijos sent a letter to President Carter yesterday outlining possible problems with the reservation.

Panama, the Torrijos letter said, will find "unacceptable any reservation that dishonors the national dignity, that changes the objectives of the treaty, or is intended to impede the exercise of Panama's sovereignty over all of its territory or the U.S. military withdrawal on December 31, 1999."

A government spokesman said the letter referred primarily to the reservation proposed by Sen. Dennis DeConcini (D-Ariz.) and approved by a 75–23 vote preceding the ratification approval.

The reservation authorizes both Panama and the United States independently to use military force in Panamanian territory should the canal be closed or its operations interfered with, even after the 1999 withdrawal date.

Panama has long objected to any provision of the neutrality treaty that would authorize a U.S. military presence here without Panamanian permission.

Torrijos was believed to be greatly angered by the proposed reservation. It puts him in the difficult position of explaining to the Panamanian people a possible eventuality—U.S. invasion of Panama should canal operations be interfered with—that he had promised them would not occur.

Escobar said Torrijos had received a letter Wednesday and a telephone call yesterday afternoon from President Carter explaining the additional provision and the probability of its passage.

A lengthy radio explanation of the reservation, including a full reading of the texts of the Carter-Torrijos letters, was apparently an attempt to head off anticipated criticism here of the DeConcini provision and circumvent the need for an additional Panamanian referendum to approve it.

While pledging that the issue would be carefully studied, Escobar said that, in principle, the government considered the reservation "allowable" since it did not affect the "essence or content" of the treaty itself.

Specifically, he said, the reservation did not affect the scheduled 1999 closing of U.S. bases and complete withdrawal of U.S. troops stationed here.

Torrijos spent the day closeted with his Cabinet in the downtown house of a friend. Reporters converging on the scene after the Senate vote were told that Torrijos had "nothing to say" in addition to the Escobar statement.

While anticipated large-scale anti-treaty demonstrations did not occur, a small group of University of Panama law students paraded on the campus with banners reading, "No to the Right of Yankee Intervention in Panama." Students said the turnout—no more than 30—was low because the university is currently in spring recess.

A spokesman for a group of Panamanian attorneys who have been outspoken treaty opponents said they would meet to compose a protest statement.

"We think [approval of the DeCorcini reservation] was an elegant way for the Senate to reject the treaty," he said. The attorneys maintain, and the spokesman said the senators are aware, that the additional provision will require another referendum on the treaties here.

A referendum, required by Panamanian law, was held here last October and showed that 66 percent of the population approved the treaties. The lawyers said that the "wording of the referendum question did not say anything about changes on reservations," and thus new provisions require a new vote.

In the U.S.-controlled Canal Zone, most ignored the final Senate debate until the last moment, when they turned on their radios to hear the live Southern Command Network broadcast. Canal company spokesman Al Baldwin said he "never saw [the Canal Zone] so quiet in my life."

While the predominantly antitreaty Zonians took the news of passage of the treaty in relative silence, the radio perhaps expressed the sentiment of some.

A country music broadcast following the end of the debate and vote began with a mournful song entitled "You can take this job and shove it, I ain't working here no more."

[From the New York Times, Mar. 17, 1978]

PANAMANIANS RELUCTANTLY INDICATE THEY ACCEPT PACT'S RESERVATIONS

(By Alan Riding)

PANAMA CITY, March 16.— With evident reluctance, the Panamanian Government indicated tonight that it would accept the last-minute reservations attached to the new Panama Canal neutrality treaty before it was ratified by the United States Senate today.

In a nation-wide radio broadcast immediately after the Senate vote, Panama's chief treaty negotiator, Romulo Escobar Betancourt, said that "the fundamental objectives sought by Panama in the treaty have not been affected by the reservations."

He said that Panama's chief of government, Brig. Gen. Omar Torrijos Herrera, had ordered that the various amendments and reservations attached to the neutrality treaty this week be carefully studied by officials here before a formal response is made to the United States.

But Dr. Escobar added: "In principle, we consider that these reservations are very digestible since they do not touch the foundations, essence or content of the neutrality treaty, above all such basic provisions as the [United States] military withdrawal by Dec. 31, 1999."

Diplomatic sources nevertheless indicated that General Torrijos and the Panamanian negotiating team were particularly distressed by the reservation adopted by the Senate today granting the United States the right to send troops into Panama after the year 2000 if the canal were closed, even by a strike.

STORM OF PROTEST EXPECTED

But rather than reject the reservation out of hand or risk defeat of the treaties in a new Panamanian plebiscite, General Torrijos has apparently decided to try to ride out the storm of protest that is expected to follow the spelling out of the American right to intervene here after 2000.

Leftist and Nationalist opposition groups that campaigned against Panamanian ratification of the treaties last October are now expected to begin a new offensive, contending that Panama has been forced to make too many concessions to Washintgon. "At the very least, we should have another plebescite," said a spokesman for the left-of-center Independent Lawyers' Movement.

A small group of leftist students held a brief demonstration against the treaties on the university campus here this afternoon, but few young people attended because high schools and the university are closed for vacation. When classes reopen next month, however, more protests are planned.

To forestall an angry reaction by the Panamanian Government to the reservations, the Carter Administration has maintained close contact with General Torrijos over the last four days of Senate debate, with a top American treaty negotiator, Ambler Moss, Deputy Assistant Secretary of State for Congressional Relations, sent to explain the reservations to senior officials here.

President Carter also wrote to General Torrijos yesterday morning and had a telephone conversation with him later in the afternoon. In his letter, according to Dr. Escobar, Mr. Carter indicated that "everything possible to insure that the reservations are in accordance with the general objectives of the treaty" had been done.

In his response to President Carter, sent last night, General Torrijos expressed gratitude for Administration efforts to insure Senate ratification of the treaties and indicated that Panama would study the reservations with great care.

"Our study will be guided by the following principles," he told Mr. Carter. "For Panama, any reservation will be unacceptable if it affects national dignity, distorts or changes the objectives of the treaty or is aimed at impeding the effective exercise of Panama's sovereignty over all its territory, the handover of the canal or the military withdrawal by Dec. 31, 1999."

ANY MOVE AT 'INTERFERENCE' REJECTED

General Torrijos said that the Panamanian people would not accept "words or ambiguous phrases that imply or mean perpetual occupation or interference in our internal affairs disguised as neutrality."

The key reservation adopted by the Senate this morning had the effect of dampening any immediate celebration over the United States ratification of the neutrality treaty that, with the new canal treaty that is still awaiting final American approval, should eventually replace the 1903 treaty that gave the United States control over the canal and the Canal Zone "in perpetuity."

After his broadcast speech, Dr. Escobar told reporters that today's vote was "a great triumph." But General Torrijos, ensconced with his advisers in a well-guarded house in a residential district of Panama City, refused to speak to the press.

Asked by reporters if Panama was angered by the last-minute reservations, Ernesto Solis, the general's spokesman, said: "We have never been angry, we have always been expecting justice from the United States." Asked if Panama had now obtained justice, he added: "We hope we will get it."

U.S. WORRIED OVER PANAMANIAN REACTION

WASHINGTON, March 16.—The Carter Administration was concerned tonight about Panamanian acceptance of the amendments and reservations to the Neutrality Treaty.

In particular, Administration officials feared the reaction of General Torrijos to the reservation proposed by Senator Dennis DeConcini, Democrat of Arizona, that in effect would give the United States the right to send troops to Panama to reopen the canal or restore operations on the waterway, if such actions should ever be deemed necessary, after Panama takes control.

Mr. GRIFFIN. Will the Senator yield me 30 seconds more?

Mr. ALLEN. Yes.

Mr. GRIFFIN. I have a little bit of additional information to add to our colloquy.

I do not have available the complete letter from General Torrijos to President Carter which was delivered on yesterday, but there is now available from an authoritative source the fact that the letter from General Torrijos to President Carter included this sentence:

In your letter and your conversation—

And that refers to the telephone conversation—

you informed me the Senate will introduce some reservations, but that they do not alter or lessen the contents of what was agreed to in the Neutrality Treaty or in our statement of October 14, 1977.

Mr. ALLEN. Very interesting.

Mr. GRIFFIN. Yes. I hope the letters will be provided so we can see exactly what it was President Carter wrote to General Torrijos.

Of course, it would be even more interesting if we could have a transcript of the telephone conversation as well—all of which was pertinent and important information and should have been available to the U.S. Senate as we were proceeding yesterday to a vote on the treaty.

The fact that a public request had been made for the information and that it was not provided is very disturbing to this Senator.

Mr. ALLEN. I feel the information will be made available. I have that much confidence in the administration and the openness of this administration. But I feel sure that will be forthcoming.

(A colloquy concerning emergency farm legislation which occurred at this point is printed earlier in today's RECORD, by unanimous consent.)

Mr. BAKER. On the matter of the alleged exchange of correspondence between the White House and General Torrijos, I would tell my friend from Alabama that I have no knowledge of that. I have not been informed of such letters. I do not know of such letters. I heard of them first this morning.

Mr. ALLEN. It may not have been letters but communications in other forms.

Mr. BAKER. I do think on that score I would say that on yesterday I was advised by the Vice President's office that the Panamanians have expressed concern about the DeConcini reservation. But no mention was made to me of letters, and if there are letters, I must say I think the Senate is entitled to those letters.

Mr. ALLEN. I thank the Senator.

Mr. BAKER. I joined with the opponents of this treaty in insisting, for instance, that we have full access to the implementing legislation for these treaties. That is unprecedented. I am told no other administration has ever submitted implementing legislation for treaties in advance of the vote on ratification.

But as the Senator from Alabama may know, in response to a request made by the distinguished Senator from South Carolina (Mr. THURMOND) and others on my side, I wrote to the Secretary of State and insisted that we have a full draft of the implementing legislation proposed for these treaties before we voted on them, and that was done.

I am pleased it was, because I have been insistent that every Member of the Senate on my side of the aisle, indeed, every Member of the Senate, for or against the treaty, have every scrap of information which is relevant to our intelligent determination of these issues. I think these letters, if there are letters, fall in the same category. I herewith express my support for any request for such letters, or copies of those letters, if they exist. If they do not exist, of course, it is a different matter.

My only motivation is to see that the Senate have all the facts and all of the relevant detail and material, all the documentation, necessary to make an intelligent, reasoned and rational decision on these treaties. Nothing should be withheld.

Mr. ALLEN. I thank the distinguished Senator.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. ALLEN. Let me answer and then I will yield.

I have never stated other than I have great admiration for the distinguished Senator (Mr. BAKER), our distinguished minority leader. I have confidence in his openness, his fairmindedness, his candor, and his willingness—not only

his willingness but his determination—to ascertain the facts. I appreciate his attitude. I have certainly not in any sense been critical in the slightest of the Senator.

Mr. BAKER. If the Senator will yield, I did not believe the Senator from Alabama had been critical. I simply wanted to reiterate what I am sure the Senator already knew, that I insist the Senate have every document, whether it helps or hurts the treaties, that we have every document and every bit of information.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. ALLEN. I yield.

Mr. ROBERT C. BYRD. Mr. President, did I understand the distinguished Senator to say that he felt we would arrive at an agreement which would include a vote on the resolution of ratification within a reasonable length of time?

Mr. ALLEN. Yes.

Mr. ROBERT C. BYRD. But that it would be after the Easter nonlegislative period before we could reach such an agreement?

Mr. ALLEN. Yes. I would like to suggest that is not unfair. The distinguished majority leader has already scheduled two bills which have 6 hours each on them, starting on Tuesday, with leave to amend. They might well take the entire remaining period that we have prior to the recess. I would hope the distinguished majority leader would not think it was unreasonable to allow us to get back from our recess, assess the situation, debate the matter for possibly 2 or 3 days and then sit down and seek to come to a reasonable agreement on a time certain to vote. We did work that out on the Neutrality Treaty. I am confident we can do it again.

Mr. ROBERT C. BYRD. I appreciate what the Senator has said. I do not understand what he means when he says that the consideration of the farm bill would be continuing to the beginning of the Easter nonlegislative period.

Mr. ALLEN. It is possible that it might. I thought both bills had 6 hours with leave to amend.

Mr. ROBERT C. BYRD. It has been reduced to 4 hours each, with the understanding that any motions, appeals, and so on, would come out of those 4 hours.

Mr. ALLEN. That would take 1 full day, then.

Mr. ROBERT C. BYRD. It would take 1 full day.

Mr. ALLEN. I misunderstood the time.

Mr. ROBERT C. BYRD. I hope that the Senate will be able to enter into an agreement before the nonlegislative period for the observance of Easter, which would lay down a definite date at some point following that nonlegislative period when the Senate could reach a final decision on the resolution of ratification for the Panama Canal Treaty. My thought was if we could agree to a date during the week of April 10, that would allow us 5 days before the nonlegislative period, and it would allow us up to 10 days, not including Saturdays, and we could utilize Saturdays, following the nonlegislative period. It would make a total of something like 15 days which would seem to me to be adequate in view of the fact that we actually have been debating this treaty into the 23d day. While the Senate was considering the Neutrality Treaty, it was also debating the Panama Canal Treaty.

As the distinguished Senator from Alabama has so correctly stated, both of these are one package and the debate has been rather frequently far reaching. There has been no attempt to confine the debate on the Neutrality Treaty.

Actually, with the treaties having been debated for 22 days prior to today, I do not think it is unreasonable for the majority leader to express the hope that before next Thursday evening at the close of business when we begin the nonlegislative period which was scheduled previously and announced to run from the close of business on Thursday, March 23, until Monday, April 3—that nonlegislative period had been laid out for Senators so they could schedule engagements in their home States—we could reach an agreement which would assure the Senate that it would dispose, one way or the other, up or down, of this Panama Canal Treaty.

I think we should have every reason to hope that after 5 days, beginning today, and concluding those 5 days next Thursday, and then taking the first 5 days when we return, and the second 5 days, into the week of April 10, there would be 3 weeks of debate on this treaty. It seems that would be a very reasonable suggestion. I hope the distinguished Senator from Alabama will give this his consideration over the weekend. We might arrive at an agreement one day next week.

Mr. ALLEN. I appreciate the courtesy and graciousness of the distinguished majority leader. Certainly, I can find no fault with what he has suggested. I believe we could reach pretty much the same end result if we did wait until after the recess. I am certainly not trying to prolong the debate. I do not know what it is going to encompass before we get into it. That is the reason I would like to debate it for the rest of this week, or until the recess, and then take an assessment of the situation soon after we come back.

I point out that no dilatory tactics have been used with respect to the first treaty. Senators were ready and, as a matter of fact, standing in line most of the time in order to speak. There were no quorum calls of any large number which were requested.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senator will suspend. Will Senators wishing to carry on conversations please retire to the cloakrooms?

Mr. ALLEN. I will say that fewer than 10 quorum calls have been called for during this debate. The Senator from Alabama did not make a single request for a quorum call until the last day of the debate, at a time when he felt a quorum call was appropriate.

I assure the distinguished majority leader there is going to be no effort to use dilatory tactics. There will be no filibuster by amendment. Only legitimate amendments will be offered. There will be an effort made, however, to protect the interests of the United States and to protect the interests of the taxpayers of the United States. I know the distinguished majority leader wants to accomplish the same end result. I think in time we can work out a very fair and reasonable agreement. It might not take the length of time the Senator suggests.

Mr. ROBERT C. BYRD. Mr. President, what the Senator says encourages me. I hope that it will be possible, after the nonlegislative day period, to reach an agreement which would bring about a final vote earlier than the date which was included in my suggestion. However, I think that, unless we are able to reach an agreement before the evening of next Thursday—and I do not rule that out; I hope the distinguished Senator from Alabama will give further thought to it over the weekend and during next week, and talk with others who are on his side in this matter. I hope that we could still reach an agreement.

Mr. ALLEN. I hope the Senator will not proceed further than that, because if the Senator is getting ready to say what I fear he is getting ready to say, I do not believe that would be conducive to reaching an agreement. I hope he will leave it where he has now stopped.

Mr. BAKER. Mr. President, will the Senator yield for just a moment?

Mr. ROBERT C. BYRD. Will the Senator allow me to regain my composure? [Laughter.]

I think that this is about the first time that I can recall that I have been left completely disarmed, speechless, and helpless. He anticipated what I am going to say and cut me off at the pass.

Well, I shall not proceed to say what I was about to say. In good humor, may I say that I have been encouraged by what the Senator from Alabama has said.

May I just close on this St. Patrick's Day by saying that if we can reach agreement, we will not get to that sad state of affairs to which the poet alluded when he said:

There once was two cats from Kilkenny.
Each thought there was one cat too many.
So they quarreled and they fit;
They scratched and they bit;
'Til barrin' their nails
And the tips o' their tails,
Instead of two cats, there weren't any.

I hope that the two sides will not proceed to the point that there is nothing left but their nails and the tips of their tails.

Mr. PERCY. Will the Senator yield?

Mr. ALLEN. Yes, I am going to yield the floor in just a moment. I shall be delighted to yield at this time to the distinguished Senator from Illinois.

Mr. PERCY. May I have the attention of the distinguished majority leader?

Mr. ALLEN. If the Senator will excuse me, I shall yield the floor.

Mr. ROBERT C. BYRD. Will the Senator yield to me for just a moment?

Mr. ALLEN. Yes. I yield to the distinguished majority leader.

Mr. ROBERT C. BYRD. Mr. President, I have in my hands a letter dated March 17, 1978, which is this date, addressed to me by Douglas J. Bennet, Jr., Assistant Secretary for Congressional Relations, which reads as follows:

DEPARTMENT OF STATE,
Washington, D.C., March 17, 1978.

Hon. ROBERT C. BYRD,
U.S. Senate.

DEAR SENATOR BYRD: You may wish to share with the Senate the exchange of correspondence between President Carter and General Torrijos which occurred in connection with the Senate's vote on the Neutrality Treaty. Copies of both letters are enclosed.

With best wishes,

Sincerely,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

Mr. President, I shall make arrangements to see that all Senators have copies of these letters. I ask unanimous consent that they be printed in the RECORD.

Mr. ALLEN. The cover letter is dated today. Would the Senator mind saying the date of the letters enclosed?

Mr. ROBERT C. BYRD. I have not had opportunity to read them. As I look at them now, they are dated March 15.

Mr. ALLEN. I see.

The PRESIDING OFFICER. Did the Senator from Alabama object to the unanimous-consent request?

Mr. ALLEN. No; I have no objection.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MARCH 15, 1978.

MY DEAR GENERAL: As you know, the Senate is now approaching the end of its debate on the Neutrality Treaty. Although we expect the final vote to be close, we remain hopeful about the result.

We have made good progress since last September when you and I signed the Treaties. The Senate Foreign Relations Committee endorsed the Treaties by an overwhelming vote. In the Senate debate, we have fortunately been able to prevent any amendments to the Treaty other than the so-called "Leadership" amendments to Articles IV and VI. These incorporate exactly the terms of the Statement of Understanding published after our conversation of October 14.

In considering its Resolution of Ratification of the Treaty, the Senate will almost certainly attach a number of reservations, conditions or understandings reflecting certain of its concerns. We have made every effort and have been successful to date in ensuring that these will be consistent with the general purposes of our two countries as parties to the Treaty. I hope you will examine them in this light.

After approving the Neutrality Treaty, the Senate will move immediately to consider the basic Panama Treaty. While there will be problems, I am hopeful that the outcome will again be favorable, and that the two Treaties combined will gain for our countries the advantages we had envisaged when we signed them last September.

I know that the long public discussion of the Treaties in the United States has involved difficulties for you and your country. It has been a necessary element in informing the American public of the reasons for negotiating the Treaties and the benefits they bring to both parties. We have made notable progress in this regard.

Thus, as matters stand today, we are approaching an important milestone. If all of us can continue to work patiently and constructively for the achievement of our objectives, I believe we can achieve the outcome we both desire—sound and equitable Treaties in our common interest.

JIMMY CARTER.

MARCH 15, 1978.

DEAR PRESIDENT CARTER: In your kind letter of this date, as well as in the conversation which we had this afternoon, you expressed to me, among other things, your hope concerning a positive vote in the United States Senate on the Neutrality Treaty. I understand and I perceived the great efforts which you, as head of a great nation as well as those of numerous distinguished Senators, have carried out to create a consciousness in the rest of the Senate and in the American public for the need for a new relationship between Panama and the United States.

After intense and difficult negotiations we signed the resulting Treaties in Washington. Subsequently, and on account of certain confusion with respect to two articles of the Neutrality Treaty, we proceeded to release a Memorandum of Understanding which clearly interpreted the unilateral capability of each one of our countries to protect the regime of neutrality against threats, attacks, or a closing of the Canal, priority passage for warships in case of emergency and non-intervention in the internal affairs of Panama as well as a respect for territorial integrity and political independence of my country.

In this manner we perfected treaties which have received, because of their balance and equity, the support of practically all the countries of the world.

In your letter and conversation you informed me that the Senate will introduce some reservations, but that they will not alter nor detract from the content of what was agreed upon in the Neutrality Treaty and in our Declaration of October 14, 1977. In this respect, I wish to inform you that the Government of Panama will proceed to study carefully these reservations and will take its position once the Senate has voted on both Treaties. The situation is thus because in the plebiscite held in Panama the Panamanian people voted for the two Treaties together and not in separate form.

I do wish, nonetheless, to point out that such a study will be based on the following concepts: For Panama any reservation would be unacceptable which blemished our national dignity, which altered or changed the objectives of the Treaty or which were directed at hindering the effective exercise of Panamanian sovereignty over all of its territory, the transfer of the Canal, and military withdrawal on December 31, 1999. For that reason, I received with great gratitude your words that these objectives will absolutely not be changed by means of amendments or reservations. This reaffirms my estimate concerning the great morality and honesty which characterizes you as a political leader and as a person.

The Panamanian people would not accept words, misplaced commas or ambiguous sentences which had as their objective, or which might signify, occupation in perpetuity disguised as neutrality or intervention in their internal affairs.

President Carter, we both know the difficulties which we must overcome to achieve a new attitude in our two countries. But the expressions which you have made to me reveal the intimate truths of a man of great integrity. We believe that the American people elected you precisely for these qualities. Therefore, with the frankness which has characterized our relationship, I must tell you that we must face all of these difficulties about the Treaties with true courage.

The great power of conviction which you have must reach the true and upright men of your Senate. In your country there exists great proof of this fact by virtue of men who have never considered arrogance or threats as normal standards of conduct in the United States in its relations with the various sectors of its own people and in its relations with other countries. For that reason Lincoln, Franklin Delano Roosevelt, Kennedy and other great American Presidents hold a place in the history of the United States and serve as an inspiration to other peoples of the world.

It is obvious that not only Panama but the entire world anxiously awaits the decision which the Senate will make tomorrow. The Canal, as an international public service, is of interest to all humanity. For that reason, we see in the Treaties which we signed the peaceful solution which guarantees access to the Canal on an equal basis to all its users. Panama has made its great sacrifice: to wait 22 long years to achieve its decolonization. We have demonstrated maturity and patience. We are confident that the Senate will not disappoint the world.

Let me take this opportunity to express my highest esteem.

OMAR TORRIJOS HERRERA,
Chief of Government of the Republic of Panama.

Mr. ALLEN. I was just wondering, I say to the distinguished majority leader, if the letters were dated the 15th, it might have been of some benefit to the Senate to have had them up here on the 16th. They might have influenced a vote.

Mr. ROBERT C. BYRD. Mr. President, that could be said both ways. We could say what might have been.

Mr. ALLEN. I doubt if it would have made votes for the treaty.

Mr. ROBERT C. BYRD. I beg the Senator's pardon?

Mr. ALLEN. I doubt if the letters would have made votes for the treaties. Possibly they would have.

Mr. ROBERT C. BYRD. I do not know. I have not read them yet. I have tried to secure them for the Senator because of his interest. Of all sad words of tongue or pen, the saddest are these: "It might have been."

I do not know. They might have made votes. But I have not read them. I have asked that they printed in the RECORD because I wanted the Senator to know that the leadership wants to cooperate in every way to get the information that he and Senator GRIFFIN had expressed interest in.

Mr. ALLEN. I appreciate that. I might say that it is further indication of the power of the leadership, because only 30 minutes ago did we request the leadership to furnish these documents. Now we have them and they are before the Senate.

Mr. ROBERT C. BYRD. Mr. President, there is a time for every purpose under heaven: a time to speak and a time to keep silent. I shall choose to keep silent.

Mr. BAKER. Will the Senator yield to me?

Mr. ALLEN. Yes.

Mr. BAKER. Mr. President, I have just been handed copies of the letters of March 15, to which the majority leader referred, by a representative of the Vice President's office. I only want to take this opportunity to express my appreciation to the administration for very promptly acceding to the suggestion or the request that these letters be supplied: I am happy that they are now part of our official record.

Mr. ALLEN. Before yielding the floor, I wonder if I may glance at one copy.

Mr. ROBERT C. BYRD. Mr. President, let us just read the letters.

Mr. ALLEN. Fine; I yield for that purpose.

Mr. ROBERT C. BYRD. If the Senator will yield, I read first the letter by President Carter dated March 15, 1978, addressed to General Torrijos as follows:

MY DEAR GENERAL: As you know, the Senate is now approaching the end of its debate on the Neutrality Treaty. Although we expect the final vote to be close, we remain hopeful about the result.

We have made good progress since last September when you and I signed the Treaties. The Senate Foreign Relations Committee endorsed the Treaties by an overwhelming vote. In the Senate debate, we have fortunately been able to prevent any amendments to the Treaty other than the so-called "Leadership" amendments to Articles IV and VI. These incorporate exactly the terms of the Statement of Understanding published after our conversation of October 14.

In considering its Resolution of Ratification of the Treaty, the Senate will almost certainly attach a number of reservations, conditions or understandings reflecting certain of its concerns. We have made every effort and have been successful to date in ensuring that these will be consistent with the general purposes of our two countries as parties to the Treaty. I hope you will examine them in this light.

After approving the Neutrality Treaty, the Senate will move immediately to consider the basic Panama Treaty. While there will be problems, I am hopeful that the outcome will again be favorable, and that the two Treaties combined will gain for our countries the advantages we had envisaged when we signed them last September.

I know that the long public discussion of the Treaties in the United States has involved difficulties for you and your country. It has been a necessary element in informing the American public of the reasons for negotiating the Treaties and the benefits they bring to both parties. We have made notable progress in this regard.

Thus, as matters stand today, we are approaching an important milestone. If all of us can continue to work patiently and constructively for the achievement of our objectives, I believe we can achieve the outcome we both desire—sound and equitable Treaties in our common interest.

JIMMY CARTER.

Mr. President, as I read that letter, I am reminded of the tempest in the teapot. From what I have heard said today, there has been much ado about nothing. I see nothing in that letter—nothing. I think it was a very diplomatic, very factual, very articulate presentation of the situation as it existed and, as the President said:

We have made every effort and have been successful to date in ensuring that these will be consistent with the general purposes of our two countries as parties to the Treaty.

Mr. President, I congratulate the President of the United States on the letter. I think it laid out to General Torrijos in concise and succinct terms what the situation was. I hope that will put the matter to rest.

Now if the Senators would like for me to read the response—I suppose it is a response—by General Torrijos to the President's letter, I will be glad to do that.

Mr. SPARKMAN. Do it.

Mr. ROBERT C. BYRD. Let us do it. All right.

The letter is dated same date, March 15, which I believe has been recognized for centuries as the ides of March.

MARCH 15, 1978.

DEAR PRESIDENT CARTER: In your kind letter of this date, as well as in the conversation which we had this afternoon, you expressed to me, among other things, your hope concerning a positive vote in the Unted States Senate on the Neutrality Treaty. I understand and I perceived the great efforts which you, as head of a great nation as well as those of numerous distinguished Senators, have carried out to create a consciousness in the rest of the Senate and in the American public for the need for a new relationship between Panama and the United States.

After intense and difficult negotiations we signed the resulting Treaties in Washington. Subsequently, and on account of certain confusion with respect to two articles of the Neutrality Treaty, we proceeded to release a Memorandum of Understanding which clearly intepreted the unilateral capability of each one of our countries to protect the regime of neutrality against threats, attacks, or a closing of the Canal, priority passage for warships in case of emergency and non-intervention in the internal affairs of Panama as well as a respect for territorial integrity and political independence of my country.

In this manner we perfected treaties which have received, because of their balance and equity, the support of practically all the countries of the world.

In your letter and conversation you informed me that the Senate will introduce some reservations, but that they will not alter nor detract from the content of what was agreed upon in the Neutrality Treaty and in our Declaration of October 14, 1977.

Mr. ALLEN. Would the Senator mind reading that sentence over? I think it is significant.

Mr. ROBERT C. BYRD. I will read it over when I finish. I may have some comment.

Mr. ALLEN. I thank the Senator.

Mr. ROBERT C. BYRD. I would like to read the rest of the letter. Will you allow me to read the rest of the letter?

The Senator does not mind if I proceed.

Mr. ALLEN. I did not say I minded. I made a request of the distinguished Senator.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

In this respect, I wish to inform you that the Government of Panama will proceed to study carefully these reservations and will take its position once the Senate has voted on both Treaties. The situation is thus because in the plebiscite held in Panama the Panamanian people voted for the two Treaties together and not in separate form.

I do wish, nonetheless, to point out that such a study will be based on the following concepts: For Panama any reservation would be unacceptable which blemished our national dignity, which altered or changed the objectives of the Treaty or which were directed at hindering the effective exercise of Panamanian sovereignty over all of its territory, the transfer of the Canal, and military withdrawal on December 31, 1999. For that reason, I received with great gratitude your words that these objectives will absolutely not be changed by means of amendments or reservations. This reaffirms my estimate concerning the great morality and honesty which characterizes you as a political leader and as a person.

The Panamanian people would not accept words, misplaced commas or ambiguous sentences which had as their objective, or which might signify, occupation in perpetuity disguised as neutrality or intervention in their internal affairs.

President Carter, we both know the difficulties which we must overcome to achieve a new attitude in our two countries. But the expressions which you have made to me reveal the intimate truths of a man of great integrity. We believe that the American people elected you precisely for these qualities. Therefore, with the frankness which has characterized our relationship, I must tell you that we must face all of these difficulties about the Treaties with true courage.

The great power of conviction which you have must reach the true and upright men of your Senate. In your country there exists great proof of this fact by virtue of men who have never considered arrogance or threats as normal standards of conduct in the United States in its relations with the various sectors of its own people and in its relations with other countries. For that reason Lincoln, Franklin Delano Roosevelt, Kennedy and other great American Presidents hold a place in the history of the United States and serve as an inspiration to other peoples of the world.

It is obvious that not only Panama but the entire world anxiously awaits the decision which the Senate will make tomorrow. The Canal, as an international public service, is of interest to all humanity. For that reason, we see in the Treaties which we signed the peaceful solution which guarantees access to the Canal on an equal basis to all its users. Panama has made its great sacrifice: to wait 22 long years to achieve its decolonization. We have demonstrated maturity and patience. We are confident that the Senate will not disappoint the world.

Let me take this opportunity to express my highest esteem.

OMAR TORRIJOS HERRERA,
Chief of Government
of the Republic of Panama.

Now, I will read, at the request of the Senator from Alabama again this sentence in General Torrijos' letter.

In your letter and conversation you informed me that the Senate will introduce some reservations, but that they will not alter nor detract from the content of what was agreed upon in the Neutrality Treaty and in our Declaration of October 14, 1977.

Mr. ALLEN. I thank the Senator.

The PRESIDING OFFICER. The Chair recognizes the Senator from Alabama.

Mr. ALLEN. Mr. President, I am glad to receive these letters, which were mentioned first on the floor here by the distinguished Senator from Michigan (Mr. Griffin). I am wondering if there was a reply by the President to this letter.

Is there a reply to the letter of March 15?

Mr. ROBERT C. BYRD. Pardon?

Mr. ALLEN. I am wondering if there was a reply to the letter of March 15 from Torrijos to the President.

Mr. ROBERT C. BYRD. Well, Mr. President, I will immediately dispatch a call to the President of the United States or to one of his aides and inquire.

Mr. ALLEN. I thank the distinguished Senator.

Mr. ROBERT C. BYRD. I will attempt to get the answer for the Senator as to whether or not there was a reply to General Torrijos' reply to the President's letter.

Mr. ALLEN. I thank the Senator. The

significant sentence here, it would seem, is in the dictator's letter to President Carter, starting with the fourth paragraph of that letter of Torrijos to President Carter.

In your letter and conversation you informed me that the Senate will introduce some reservations, but that they will not alter nor detract from the content of what was agreed upon in the Neutrality Treaty and in our Declaration of October 14, 1977.

It looks as if Torrijos got the impression that the reservations, though here on the floor we were of the opinion that they did alter or detract from the content of what was agreed upon in the Neutrality Treaty and our declaration of October 14, 1977. Though, if we did not do something, what was the use of offering them?

I am also somewhat puzzled by the identical dates on the letters. I am wondering if Mr. Torrijos was in town or at the White House at the time and they exchanged their letters. I am not an expert, but it looks like the letters may have been written on the same typewriter.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. ALLEN. Yes.

Mr. ROBERT C. BYRD. Does the Senator want to go out over the airwaves of this country with this kind of subtle accusation? I do not believe the Senator wants to do that.

Mr. ALLEN. I merely asked.

I would ask the majority leader, if Mr. Torrijos was in town on March 15. Both letters are dated on that day.

Mr. ROBERT C. BYRD. Oh, they are both dated on that day, but we do not live in the age of Samuel F. B. Morse. We live in the age when communications are rather fast. One speaks and in the same instant people hear him halfway around the world. I hope the Senator will not imply that because two letters are dated the same date, they may have been written on the same typewriter, and so on. I do not believe the Senator wants to leave that impression.

The Senator first suggested that the leadership get the letter that was written by the President and the response. Now I have got them and I have read them.

Mr. ALLEN. Very well. I appreciate that. I thank the distinguished majority leader.

Mr. ROBERT C. BYRD. I thought it was the Senator's understanding to begin with that they were of the same date.

Mr. SPARKMAN. May I respond?

Mr. ROBERT C. BYRD. In further response to the Senator's question.

Mr. ALLEN. Obviously, they are copies and could well have been prepared in the same place.

Mr. ROBERT C. BYRD. I would hope they would be bona fide.

Mr. ALLEN. I am sure.

Mr. SPARKMAN. Will the Senator yield?

Mr. ROBERT C. BYRD. May I further respond to say, and I will not proceed further, in answer to the question the Senator just asked, I am informed that there was no further communication, no further letter written in response to General Torrijos' letter.

Mr. ALLEN. I thank the Senator.

Mr. ROBERT C. BYRD. Which was in reply to the President's.

Mr. SPARKMAN. Will the Senator yield to me?

Mr. ROBERT C. BYRD. Yes.

Mr. SARBANES. Will the Senator yield to me?

The PRESIDING OFFICER. Senator ALLEN has the floor.

Mr. ALLEN. Yes, I yield to my distinguished senior colleague.

Mr. SPARKMAN. I understand, preceding the writing of this exchange of letters, they had telephone conversations.

Can the Senator tell me if that is right? That is my understanding.

Mr. ROBERT C. BYRD. I do not know. I do know we live in a world in which countries exchange letters by cable. That does not require 24 hours always to respond to a communication between these two countries.

I just take some umbrage, the implication that these two letters which were requested by the leadership after the charge was made on the Senate floor and in partial response——

Mr. ALLEN. No charge was made.

Mr. ROBERT C. BYRD. I did not say a Senator made the charge. I said a charge was made on the Senate floor which left the inference to be drawn that there was some kind of hocus-pocus, or something, that went on between President Carter yesterday and General Torrijos that should be kept hidden, that has been kept unrevealed, and that if revealed it might have changed the votes on yesterday.

Now, I have secured the correspondence. I hope that Senators will not imply that these letters have been manufactured.

Mr. ALLEN. I make no such charge.

Mr. SPARKMAN. I think I can clear that up.

Mr. ROBERT C. BYRD. All right. I hope the Senator can.

Mr. SPARKMAN. If we note in the letter to President Carter, General Torrijos says:

Your kind letter of this date, as well as in the conversation which we had this afternoon.

So there was an exchange over the telephone that was on the same date.

Mr. ALLEN. Yes.

Mr. SPARKMAN. The same day as that letter was written.

Mr. ALLEN. I wish the Senator would continue reading that.

Mr. SPARKMAN. Yes. I have read the whole letter.

Mr. ALLEN. Yes.

Mr. SPARKMAN. I have read the whole letter. I want to mention one thing that Senator DECONCINI said on yesterday, I believe it was, when his reservation came up.

Mr. DECONCINI said:

It is my interpretation and judgment it does not affect a major change in the treaty, but it is a condition precedent to the treaty taking effect, which means it has to be accepted or not contradicted by the Panamanians before the treaty is effective.

It seeems to me that has, certainly, some bearing on the interpretation.

Mr. ROBERT C. BYRD. In any event, Mr. President, both letters have been laid on the record for everyone to see.

Mr. ALLEN. I say to the distinguished majority leader, the only significant sentence I find here is the sentence in the Torrijos letter in which he says:

In your letter and conversation you informed me that the Senate will introduce some reservations, but that they will not alter nor detract from the content of what was agreed upon in the Neutrality Treaty and in our Declaration of October 14, 1977.

I think that is a significant sentence.

With that, I am ready to close the issue.

Mr. ROBERT C. BYRD. Well, Mr. President, that sentence alludes to this sentence in the President's letter: "We have made every effort and have have been successful to date in insuring that these"—meaning reservations, conditions or understandings, in my words—"will be consistent with the general purposes of our two countries as parties to the treaty."

The President of the United States did not misrepresent the situation at all. He said:

In considering its Resolution of Ratification of the Treaty, the Senate will almost certainly attach a number of reservations, conditions, or understandings reflecting certain of its concerns. We have made every effort and have been successful to date in ensuring that these will be consistent with the general purposes of our two countries as parties to the Treaty.

Now, that is all that I see in the Presidents' letter. That is the only verbiage I see that could possibly have been addressed by General Torrijos' sentence which the distinguished Senator from Alabama mentioned.

Mr. ALLEN. The word "conversation."

Mr. ROBERT C. BYRD. Now, the Senator talks about conversations, but he says, "In your letter and conversation."

So we have half of it in front of us. The letter is here. I do not have the President's conversation.

Mr. ALLEN. Yes, I understand.

Mr. ROBERT C. BYRD. If the Senator wants me——

Mr. ALLEN. I do not intend to contend any further with the Senator. I am willing to let the matter rest.

Mr. ROBERT C. BYRD. I take the letter on its face. I think it speaks for itself.

I am delighted to have had the opportunity to present it to the Senate.

Mr. SPARKMAN. Will the Senator yield?

Mr. ROBERT C. BYRD. I do not have the floor.

Mr. ALLEN. I yield to my distinguished colleague.

Mr. SPARKMAN. I simply want to bring out the point that Mr. DECONCINI—and remember, the President was talking about what had been accomplished by the reservation—in his reservation said exactly the same thing.

Mr. ROBERT C. BYRD. Yes.

Mr. SPARKMAN. That it made no major changes.

Mr. ROBERT C. BYRD. Precisely.

Mr. SPARKMAN. That it was a clarification.

Mr. ROBERT C. BYRD. Exactly.

Now, the senior Senator from Alabama is chairman of the Foreign Relations Committee of the Senate. Is it not true these communications between nations will usually be cabled and that——

Mr. SPARKMAN. Either that or telephoned.

Mr. ROBERT C. BYRD. And that these cables are then typed up, and even if both these were typed on the same typewriter, what would that indicate? Would that indicate any sinister, ulterior——

Mr. SPARKMAN. In fact, it is saying it makes no changes, does not affect the terms that have been agreed upon.

Mr. ALLEN. Mr. President, I yield the floor.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. SPARKMAN. I thank the Senator.

Mr. ALLEN. I thank my distinguished senior colleague (Mr. SPARKMAN).

I yield the floor, Mr. President.

The PRESIDING OFFICER. What is the will of the Senate?

The Senator from West Virginia (Mr. ROBERT C. BYRD).

Mr. ROBERT C. BYRD. Proceed to article II, if there are no——

The PRESIDING OFFICER. If there are no amendments?——

Mr. ALLEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I have asked the White House to send up the cables; and they, likewise, will be made available to Senators, so that there will not be any question as to the letters and as to the apparent similarities in the type in the two communications which were of the same date.

(Subsequently Mr. ROBERT C. BYRD supplied the following material for the RECORD:)

WASHINGTON, D.C.,
March 17, 1978.

Hon. ROBERT C. BYRD,
U.S. Senate.

DEAR SENATOR BYRD: I understand some Senators have expressed a wish to see the cables containing the exchange of correspondence between President Carter and General Torrijos, copies of which I sent to you earlier today. Copies of the two cables are enclosed. These copies are identical to the original cables except that they have been declassified, as indicated by the words "class change and deletion of caption."

You may wish to inform Senators that the original copy of President Carter's letter is now on its way to General Torrijos, and that the original copy of General Torrijos' reply is now on its way to President Carter. It has become a normal diplomatic procedure to exchange copies of such correspondence by means of telegram in the interest of speed.

The copies of the letters I supplied you this morning were transcribed from the attached telegrams in an effort to supply as quickly as possible the information Senators had requested. This explains the phenomenon, noted by Senator Allen, that the copies of the letter appear to have been typed on the same machine.

I will be happy to supply an authoritative transcript of General Torrijos' letter as soon as the original is received.

Sincerely,

DOUGLAS J. BENNET, Jr.

[Incoming telegram pass White House for President Carter]

GENERAL TORRIJOS LETTER TO PRESIDENT DATED MARCH 15, 1978

1. Have just received following letter (unofficial translation from General Torrijos for President Carter:)

PANAMA,
March 15, 1978.

DEAR PRESIDENT CARTER: In your kind letter of this date, as well as in the conversation which we had this afternoon, you expressed to me, among other things, your hope concerning a positive vote in the United States Senate on the Neutrality Treaty. I understand and I have perceived the great efforts which you, as head of a great nation as well as those of numerous distinguished Senators, have carried-out to create a consciousness in the rest of the Senate and in the American public for the need for a new relationship between Panama and the United States.

After intense and difficult negotiations we signed the resulting treaties in Washington. subsequently, and on account of certain confusion with respect to two articles of the Neutrality Treaty, we proceeded to release a memorandum of understanding which clearly interpreted the unilateral capability of each one of our countries to protect the regime of neutrality against threats, attacks, or a closing of the canal, priority passage for warships in case of emergency and non-intervention in the internal affairs of Panama as well as a respect for territorial integrity and political independence of my country.

In this manner we perfected treaties which have received, because of their balance and equity, the support of practically all the countries of the world.

In your letter and conversation you informed me that the Senate will introduce some reservations, but that they will not alter nor detract from the content of what was agreed upon in the Neutrality Treaty and in our declaration of October 14, 1977. In this respect, I wish to inform you that the government of Panama will proceed to study carefully these reservations and will take its position once the Senate has voted on both treaties. The situation is thus because in the plebiscite held in Panama the Panamanian people voted for the two treaties together and not in separate form.

I do wish, nevertheless, to point out that such a study will be based on the following concepts; for Panama any reservation would be unacceptable which blemished our national dignity, which altered or changed the objectives of the treaty or which were directed at hindering the effective exercise of Panamanian sovereignty over all of its territory, the transfer of the canal, and military withdrawal on December 31, 1999.

For that reason, I received with great gratitude your words that these objectives will absolutely not be changed by means of amendments or reservations. This reaffirms my estimate concerning the great morality and honesty which characterizes you as a political leader and as a person.

The Panamanian people would not accept words, misplaced commas or ambiguous sentences which had as their objective, or which might signify, occupation in perpetu- in their internal affairs.
ity disguised as neutrality or intervention

President Carter: We both know the difficulties which we must overcome to achieve a new attitude in our two countries. But the expressions which you have made to me reveal the initimate truths of a man of great integrity. We believe that the American people elected you precisely for these qualities. Therefore, with the frankness which has characterized our relationship. I must tell you that we must face all of these difficulties about the treaties with true courage.

The great power of conviction which you have must reach the true and upright men of your Senate. In your country there exists great proof of this fact by virtue of men who have never considered arrogance or threats as normal standards of conduct in the United States in its relations with the various sectors of its own people and in its relations with other countries. For that reason Lincoln, Franklin Delano Roosevelt, Kennedy and other great American presidents hold a place in the history of the United States and serve as an inspiration to other peoples of the world.

It is obvious that not only Panama but the entire world anxiously awaits the decision which the Senate will make tomorrow. The canal, as an international public service, is of interest to all humanity. For that reason, we see in the treaties which we signed the peaceful solution which guarantees access to the canal on an equal basis to all its users. Panama has made its great sacrifice: To wait 22 long years to achieve its decolonization. We have demonstrated maturity and patience. We are confident that the Senate will not disappoint the world.

Let me take this opportunity to express my highest esteem.

OMAR TORRIJOS HERRERA,
Chief of Government of the Republic of Panama.

[Outgoing telegram for Ambassador Jorden]

PRESIDENT'S LETTER TO GENERAL TORRIJOS, DATED MARCH 15, 1978

(Please deliver to General Torrijos soonest today following letter from President Carter, of which text follows:)

MY DEAR GENERAL: As you know, the Senate is now approaching the end of its debate on the neutrality treaty. Although we expect the final vote to be close, we remain hopeful about the result.

We have made good progress since last September when you and I signed the treaties. The Senate Foreign Relations Committee endorsed the treaties by an overwhelming vote. In the Senate debate, we have fortunately been able to prevent any amendments to the treaty other than the so-called "leadership" amendments to Articles IV and VI. These incorporate exactly the terms of the statement of understanding published after our conversation of October 14.

In considering its resolution of ratification of the treaty, the Senate will almost certainly attach a number of reservations, conditions or understandings reflecting certain of its concerns. We have made every effort and have been successful to date in ensuring that these will be consistent with the general purposes of our two countries as parties to the treaty. I hope you will examine them in this light.

After approving the neutrality treaty, the Senate will move immediately to consider the basic Panama treaty. While there will be problems, I am hopeful that the outcome will again be favorable, and that the two treaties combined will gain for our countries the advantages we had envisaged when we signed them last September.

I know that the long public discussion of the treaties in the United States has involved difficulties for you and your country. It has been a necessary element in informing the American public of the reasons for negotiating the treaties and the benefits they bring to both parties. We have made notable progress in this regard.

Mr. LAXALT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I should like to make just a general comment on the amendments to the Neutrality Treaty that were adopted before the resolution of ratification was approved yesterday by the Senate.

I had said before that without Senate adoption of the two major amendments which assure the United States the unilateral right to defend the canal beyond the year 2000 and to send its warships and auxiliary vessels to the head of the line in time of need or emergency, I could not have voted for the treaties as signed by President Carter and General Torrijos. I think the adoption of those amendments was absolutely essential to ratification of the Neutrality Treaty.

The Senator from Illinois is concerned about one other aspect of the treaties, and it reflects not only a personal concern but also one reflected in conversations I have had with a great many constituents in Illinois.

While the amendments we have adopted have materially strengthened the Panama Canal treaties, I believe we must now work to minimize the burden on American taxpayers of the estimated $758 million it will cost to implement the treaties. Consideration of legislation to implement the treaties after they are ratified will provide an opportunity to confront the costs over the next 22 years associated with the takeover of control of the canal.

I would propose that we have higher canal tolls up to a level of, say, 50 percent, to recover such costs as lost annual interest payments from the Panama Canal Company to the U.S. Treasury, and such costs as civil service early retirement for hundreds of workers.

In addition, higher tolls would help insure legitimate payments to Panama under the treaties.

We have a responsibility to find ways to recover as much of our costs as possible. In the implementing legislation, we can require the new Panama Canal Commission to set tolls to meet many of these costs.

I intend either to offer a measure or support a measure to require Senate confirmation of the nominations of the U.S. members of the Board of the Commission, so that we can monitor their efforts to recover the costs.

Mr. President, at a time when we are trying to balance the budget—and the distinguished Senator from Virginia for a long time has been a proponent of this and a fighter for it—we must work toward that objective. We cannot just look lightly at these anticipated costs in connection with these treaties.

We have not run the canal on a businesslike basis in the past. We have run it in fine shape, but we have done it in many respects by offering a service to the users of that canal at rates that are less than commercial rates. When these treaties are ratified and we move toward the 22-year period when we will eventually turn over control of the canal, I believe we have a duty and an obligation to our own taxpayers to run the business of the canal like a business, to maximize its income. Certainly, that is not inconsistent with the partnership we intend to establish with Panama.

So, I simply wish to serve notice at this time that during the course of the next week's debate I will introduce the subject which, I think, already has been addressed in part by the Armed Services Committee and the Budget Committee. They have rendered a valuable service in bringing out in the testimony their estimates of the costs involved in these treaties. We can try to recover that cost and bring down to an irreducible minimum the impact on the American taxpayer and the U.S. Treasury, to see that the ships of the 70 countries that use the canal actually bear the cost that will be involved.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. PERCY. I am happy to yield.

Mr. ALLEN. Mr. President, I am encouraged by the comments of the distinguished Senator from Illinois (Mr. PERCY) about the membership of the Panama Canal Commission, which, upon the approval of the Panama Canal Treaty, is to take over the operation of the Panama Canal from the Panama Canal Company which now operates the canal.

I understood the distinguished Senator to say that he was going to offer an mendment that would require the nominations of five of the nine members of the Cmmission to be confirmed by the U.S. Senate. Is that correct?

Mr. PERCY. That is correct; during consideration of implementation legislation, I will either support it or submit it myself. But I do feel that the nominations of the American appointees should be confirmed by the Senate of the United States.

Mr. ALLEN. The Senator realizes, of course, that there will be four Panamanians on the Commission and that the United States has no power or direction over approving these Panamanians. The Panamanian Government makes up a list of four and hands it to the United States—I assume it is going to be the Secretary of the Army, because he presently makes the appointments—and we have no option or discretion, as I read the treaty.

Therefore, any Panamanian, whether of good moral character, whether under indictment, whether of bad reputation, as I read the treaty, we have to appoint.

This is not a joint commission. This is not a United States-Panama commission. This is an instrumentality of the U.S. Government for the next 22 years. Why would not the four Panamanians need to be confirmed by the U.S. Senate? Will the Senator kindly enlighten me on that?

Mr. PERCY. The whole issue, of course, that we have been dealing with in these treaties is a question of national pride and sovereignty. I really could not envision calling before a Senate committee foreign nationals and subjecting them to a confirmation proceeding of the U.S. Senate. I know of no precedent for that in any international body.

Mr. ALLEN. The trouble is they are members of the U.S. Commission. Why should they not be confirmed?

Mr. PERCY. I just put the shoe on the other foot. Could we envision Amercain citizens being subject to a confirmation proceeding by some other legislative body in some foreign country? I think this would be a difficult thing.

Mr. ALLEN. Yes. If they are members of the commission of that foreign country, yes. This is not a joint commission. This is a U.S. agency and every member thereof should be confirmed by the U.S. Senate in the judgment of the Senator from Alabama.

Mr. PERCY. The Senator from Alabama is perfectly free to offer a substitute, if he would care to, and provide for confirmation of all. The Senator from Illinois has thought it through as carefully as he can. The Senator from Illinois determined that it would simply lead to a great deal of complication, that it would not be worthy of the effort, and that it would really subvert, in a sense, the pride of sovereignty that we are trying to nurture in the partnership we are establishing with Panama. Certainly we would have sufficient oversight if five of the nine members were subject to Senate confirmation. That is the majority of the board to start with and that would be enough. It would be enough, probably, if we just confirmed the chairman. But in this case we would have all five American members. That would constitute the majority of the board, and it would seem to the Senator from Illinois that would give adequate oversight. It would not be necessary to call nine members before us as long as we knew that we, in the confirmation proceeding, would demand to know of the nominees whether or not they would assent to return to the Senate and appropriate committees any time for questioning on the operation of the canal.

Certainly, in the confirmation proceedings we could ask them then these pertinent questions. Do you intend to run the canal as a business or do you intend to subsidize for the next 22 years the 70 nations that use this canal, as we have really in the past, or do you intend to maximize revenue so that we cover all of the obligations that we have to the U.S. Government, to U.S. taxpayers and our own Treasury, as well as to our partners in Panama? Take into account that we cannot be and would not be unreasonable, because you reach a point of diminishing return. When you get the toll revenue up too high you lose enough tonnage so your net income is going to be less than it was before. That is why I say use good business judgment, and we want people who have that background and experience.

Mr. ALLEN. I thank the distinguished Senator, and I am very much pleased he is going to be insisting on the commission being operated on a businesslike basis.

I might also suggest to the distin-

guished Senator that whereas on the Neutrality Treaty the argument was made, of course, that that involved national pride, sovereignty, and dignity of the Panamanian Government and Panama and therefore we would not have any amendments—I believe the distinguished Senator from Illinois voted against all amendments—I am led to be hopeful by the attitude of the distinguished Senator from Illinois now that as we turn to the Panama Canal Treaty we are not dealing with something that has a whole lot of national pride involved; we merely have a business arrangement involved along with the gift of the canal by the United States to Panama.

I am glad to see the distinguished Senator wanting to tighten up on that business arrangement a little bit to protect the American taxpayer. And I assure the Senator amendments will be offered that would have that desired result. I am looking forward to having the very fine support of the distingiushed Senator from Illinois on amendments of that sort.

I thank the Senator.

Mr. PERCY. I thank my distinguished colleague, and I will advise him ahead of time when I intend to take the floor to begin this debate. I will certainly invite members of the Armed Services Committee and Budget Committee who have had hearings on this matter and I feel that we will have a good deal of support for this principle on the floor of the Senate.

The Senator from Illinois has supported, right from the outset, amendments to these treaties that the Senator from Illinois felt absolutely essential and crucial, and I said I would not have voted for these treaties as signed by the President and General Torrijos if they were not amended in some respects. The Senator from Illinois has supported some reservations. I now indicate that I will introduce legislation to require Senate confirmation of the American appointees to the Board of the Panama Canal Commission and would welcome my distinguished colleagues' comments at that particular time in debate when we have that piece of legislation under way.

Mr. ALLEN. I thank the Senator.

The only thought that occurs to me on it is that with a U.S. commission it would seem a little bit strange to have a hybrid-type membership, five Americans and four Panamanians sitting side by side around the great big mahogany table, with five of them having been confirmed by the U.S. Senate and four being Panamanians of uncertain origin or reputation. I just hope that the Senator would be willing to extend his thinking along this line to the extent of requiring all of these members of this American commission to be confirmed by the U.S. Senate. I hope the Senator will reflect on that and reach that conclusion.

Mr. PERCY. I thank my distinguished colleague.

Mr. President, I yield the floor.

Mr. LAXALT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LAXALT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HODGES). Without objection, it is so ordered.

Mr. LAXALT. Mr. President, one of the vital items involved in the course of these various debates involves the matter of sovereignty. We have had extended discussions concerning these matters for these several weeks. We have been debating this matter and, of course, there are conflicting opinions that have been voiced on this floor in respect to sovereignty, as to the legal effect one way or the other, as to whether it really makes any difference at all.

I would like to for the next few moments read into the RECORD what I consider to be one of the better discussions of the legal situation in Panama overall and, in particular, the observations of an eminent American, an exceedingly fine lawyer, and one who probably more than anybody else, from firsthand knowledge, experienced the legal situation in Panama and, more particularly, through extensive research, would give us the benefit of his analysis on the question of sovereignty.

I speak of the Honorable Guthrie F. Crowe, who is a retired judge and who served in that capacity for a long while in the country of Panama.

In testimony before the Subcommittee on Separation of Powers, which was conducted under the chairmanship of the very able Senator from Alabama (Mr. ALLEN) several weeks ago, Judge Crowe appeared and testified. I would like for the next several minutes to have the record indicate, even though it is contained in the report, have the record formally indicate what his observations to the committee at that time were:

Judge CROWE. I am retired and I have no secretary or staff, so my comments today will be off the cuff. I retired because of old age. I am somewhat like the old judge I heard at the judicial conference, who said that old age made him a lot more moral than the Methodist Church ever did. So I am in that position.

I am very happy to be here and to be able to present something about my experience in the Canal Zone, I was there for 25 years as judge. I was appointed for an 8-year term by President Truman, and then reappointed by President Kennedy. Then no one was appointed to take my place, so I stayed on under operation of the statute until my successor was appointed and qualified. That was not done by President Nixon nor President Ford.

I resigned as of the 30th of April after, as I say, serving 25 years.

We have a number of good lawyers who are Members of the U.S. Senate. We have had a number of good international lawyers give us varying opinions concerning the basic issue of sovereignty. But I must say that of all those I have been exposed to in one form or another during extensive debates and deliberations in this matter, I doubt if we have anybody in this entire country who has had more personal experience in connection with the legal situation in Panama than does Judge Crowe, as he has indicated here in his testimony. He has served for 25 years and served in a very distinguished manner.

Now, why do I make reference to his testimony? For two purposes: One is to give my colleagues through the RECORD the benefit of his views concerning sovereignty which I consider to be a vital matter.

It seems to me the considerations we have in connection with the main Panama Canal Treaty as to whether we turn over this facility stock free, with additional payments amounting to several million dollars on top of it, the considerations relating to that transaction are far different if we have sovereignty than if we do not.

Obviously, if we are in some legal capacity short of ownership, in a tenant capacity, our legal relationship to the facility and its value and all the rest of it are far different than if we do own it. I happen to be one of the many Members of the U.S. Senate who feels that from the very outset, from the provisions of the various documents, we have purchased the 10-mile buffer zone known now as the Canal Zone. I feel history supports that view. I feel that the law supports that view.

In addition there are other values in hearing from Judge Crowe and in making his testimony part of the RECORD, and that is the fact that we have thousands of Americans who presently live in the Canal Zone who, under the terms of these treaties, very quickly will be subjected to the legal jurisdiction of Panama.

So it seems to me that it is terribly vital for all of us in consideration of these overall treaties to try to determine what type of legal system we are going to be subjecting our own to in addition to the vital question of where we are in relation to the legal issue of sovereignty.

I proceed now to read further from his testimony:

I entered on duty there in August of 1952. I had a very varied experience. I learned to speak Spanish while I was there and got to know a lot of Panamanian people. I think that many of them are splendid people. I am a great admirer of many of them, and I feel that many of them are quite competent.

There have been several discussions during the course of the debates here that those of us who are opposed to these treaties are insensitive to the Panamanians; that we were something less than humanitarian in seeking to preserve our own property.

We have attempted many, many times on this floor, all of us, to indicate that that is not our wish, it is not our desire, it is not our attitude. The fact is that we do relate to the Panamanians. The fact is that we do appreciate them. The fact is that they have been reliable allies for some 75 years. The fact is that we have had a good working relationship with them, politically and otherwise. The fact is that 75 percent or more of the employees working for us in operating the canal are Panamanians—good, loyal, competent employees.

The reason why I make this observation is to indicate the statement being

made here by the Federal judge, Guthrie F. Crowe, indicated that by virtue of his experience, which apparently is favorable in this regard, he has basically the same attitude and position that we have.

Going back to his testimony:

There was a good deal of discusssion this morning as to whether or not they would be able to operate the canal. Of course, there are some men who have been educated in the American schools and who have high competency. Whether or not as a nation they could operate the canal, of course, is a matter of considerable speculation.

Emphasis is on the words "as a nation."

We have never entertained any serious doubt that the Panamanians could physically manage the facility. I had some reservations before the beginning of these debates, but I am satisfied from what has been adduced here during the many discussions on the floor that there is ample expertise among the Panamanians within a period of 22 years to actually manage and operate the facilities.

But that is not the issue. The issue really is whether or not as a nation, whether or not politically, they can properly operate this facility.

As my colleagues will remember, during the course of debates on the Neutrality Treaty Senator GARN, the very able Senator from the State of Utah, spoke at length on this subject from his experience as a former mayor and a former executive.

He expressed concern about the lack of stability on the part of the Panamanian Government, and certainly that has been the history. Since we became involved in 1903, as I remember it—and I will stand corrected if I am wrong in this—there have been some 50 changes in the Panamanian Government over all that period of years. It has been stable for the last several years, that is true. Why? Because since 1968 it has been run by a dictator who runs the country with an iron hand, who took control at the point of a gun, who maintains control today at the point of a gun. It is a rigid dictatorship.

If that is the kind of stability that we want, and I do not believe it is, I think we have entered into a sad course of events in this country.

The point I want to make is that we have had a history of unstable government in Panama. We are now asked, as Senator ALLEN indicated before, to enter into a business arrangement. That is what the Panama Canal Treaty is all about: Whether or not it is to our business interests to turn over this facility. In any business consideration, if we are talking about entering into a partnership—and that is basically what we are going to be doing—an obvious question is, how stable is the partner?

I happen to be a lawyer by profession. One of the first inquiries you would have when a client would come in thinking in terms of entering into a partnership is, what is his prospective partner like? How solvent is he from a financial standpoint? How stable is he? How honest is he?

During the course of this debate I was frankly quite disappointed, particularly when we had our secret hearings, when there was substantial evidence developed here that the Torrijos family and associates had been involved in extensive drug trafficking of serious drugs, such as heroin. There was additional evidence indicating that there is an abundant amount of corruption in Panama. Many of our colleagues not only did not pay any attention to it, but stated on this floor during the course of the session that it was irrelevant.

How in the world can entering into a partnership with an unstable partner, who admittedly has been engaging in drug trafficking, with all that that involves, possibly be irrelevant? I personally cannot believe the American people would ever subscribe to that kind of standard. I cannot believe that they would not hold the Senate to a standard of decency. That is basically what we are talking about.

We are told that we have no choice; that we take the government as we find it; that we take the dictatorship as we find it.

We are told that all the rest of them are about the same; that they all engage in one degree or another in drug trafficking; that they all are afflicted to one degree or another with corruption, so it really does not make any difference.

But does it? The distinction, in my mind at least, which is shared by many of my colleagues, is that this is not a typical foreign aid transaction. We are not being asked here, as a Government, as a Senate, to dole out millions of dollars to a given country. We are asked here, and we will be asked here in the weeks to come, to make a judgment as to whether we turn over a vital international facility to this Government of Panama.

To that extent it seems to me it is highly relevant for us to seriously examine whether or not the government in question is a stable one, is one that we can rely upon and trust to faithfully and properly manage this facility from a political standpoint after the year 2000, in our interests, in their own interests, and certainly in the interests of our various allies.

Those are questions, Mr. President, that I think are highly relevant and that we should once again probe very closely during the course of the continuing debate of this matter.

May I proceed further with the discussions of Judge Crowe?

I want to bring to the attention of this committee the condition of the court at present. I think it might emanate from the fact that the Department of State is advising the President to the contrary. That is the need for a judge.

Since I resigned there has been no appointment of a judge, although there are a number of applicants. They have been using a distinguished judge from Florida, Judge Mertens, who has been sitting in criminal cases only. He has only been able to go 2 or 3 days at a time periodically.

As a consequence, the civil side of the docket has been completely unattended to. The people are suffering a great deal by reason of the fact that there is no judge there.

We have a pretty good sized court. As a matter of fact, it was the largest docket of any single judge in the Federal system under the American flag. There were about 400 criminal cases a year and 400 civil cases.

That is a rather astounding load when you consider the limited number of people there are in that particular area.

The fact that there is no judge, of course, leaves the people in considerable difficulty.

I might remark upon the Admiralty situation in the event that the Congress or the Executive with the treaty powers decide to transfer the canal to Panama.

The Admiralty jurisdiction of that court is equivalent to the Admiralty jurisdiction of a district court in the United States, although it is a territorial court and the judge is not a title III judge. He comes under title IV and is only appointed for a term of years. He has equivalent Admiralty jurisdiction under the Canal Zone Code, with judges in the United States.

Panama has no Admiralty courts nor any case law concerning Admiralty. Whenever a question in Admiralty arises it is decided under what is called a Panamanian Commercial Code. This means that the Admiralty bar of the world, whose members are accustomed to appear before courts that recognize the agreements adopted by international Admiralty conventions, would be at a disadvantage and the causes of their clients would suffer.

He has then many observations relating to the conditions of the courts. Let me proceed now to some salient portions which affect the interests of our Americans living in Panama, and the effect that turning over our court system and its jurisdiction to the Panamanian courts would have:

Americans who have lived in the zone for many years feel that American citizens who are caught and charged with crimes in Panama are dealt with more harshly than Panamanians, due to the strong feelings that have grown up over the years. There is no reason to think that this will change if and when Panama is in control of law enforcement in the zone area.

Small wonder, Mr. President, that our own citizens are terribly concerned about this feature of the treaty. We have many, many thousands of Americans living in that Canal Zone who very quickly, if these treaties are ratified, will become subject to the jurisdiction of the Panamanian courts and subject to the type of unequal treatment of which Judge Crowe speaks. Small wonder, Mr. President, that they are very apprehensive as to that feature of the treaty.

It is planned or discussed that a number of Americans will, of course, have to reside there because of their expertise in handling the Canal Zone and the engineering problems and the shipping difficulties. If those people are there they will be exposed, of course, to this type of jurisdiction of which I speak.

Again, Mr. President, let me remind those listening and for the purpose of the RECORD that these are the words of the Honorable Guthrie F. Crowe, retired judge, who served in Panama for a distinguished career of 25 years. He is speaking now of his great concern about the effect of imposing the Panama legal system upon our own citizens in the event that this treaty is passed:

In civil cases in the Canal Zone we use the Federal rules of civil procedure and the Canal Zone Code, especially drafted by Congress for the zone. Great attention is paid to the service of process. The greatest of diligence is used to see the rights of the parties are safeguarded. The court is open for the filing of cases and the issuance of needed process 24 hours a day, 7 days a week.

Obviously, it is a very efficient court:

In Panama there are no civil jury trials. I am advised that all cases are by deposition, taken in such a way that there is no opportunity for confronting witnesses and conducting a fruitful cross-examination. Criminal and civil liability in actions in tort are interlocked so that there is no civil liability unless there is criminal liability.

Think of the drastic differences there are in impressing the Panamanian system of law upon our citizens in these respects. Small wonder, Mr. President, that they are concerned about this as well:

Law enforcement in the Canal Zone is by a highly trained, carefully selected police force that is completely separate from the military. I suspect that Governor Parfitt touched upon that this morning. Unfortunately, I missed part of his statement. It is a fine organization of men who are well qualified, as well as women now. They have some excellent women on the police force.

We are talking about the police force, our police force, who are presently operating and have been for a number of years, within the Canal Zone:

There are, of course, military police drawn from the military units assigned to the zone. These people police the military encampments and military personnel only.

In Panama there is no separate constabulary. It is a military dictatorship. All policing is done by members of the Guardia Nacional—that is, the Panamanian Army.

So remember that in Panama—and again, we are subjecting our own people to this system—they do not have a police force as we know it in this country. The rights, the assets, the liablities—whatever may be touched by the rule of law—would be governed thereafter by military police under the authority and under the domination of a dictator:

Each one of the members of the army has full powers of arrest just as though he were a civil constable or a police officer.

There has been discussion here about how we would feel if a number of these conditions were imposed upon us. I wonder how a number of the citizens and residents, say, of the good State of Idaho, to whom we have had frequent reference, would feel if a system were imposed upon them that their police laws were administered and regulated, not by trained policemen but by military persons, amounting to martial law. Yet, that is precisely what is going to happen to our Americans in Panama, because the day that we ratify these treaties, the day that they become effective in this respect and we have the turnover, our Canal Zone Americans will be subjected to this kind of police activity.

This is the judge once again speaking, and he is speaking, now, of the Panamanians:

They also do have a secret police organization called the "Deni."

The 10,000 or 11,000 soldiers of Panama have full powers of arrest and law enforcement throughout the country.

I submit, Mr. President, that would be akin to having 10,000 or 12,000 National Guard people here in the District of Columbia, or in the State of Texas, or the State of Utah or the State of Nevada, with full powers of arrest without any conditions, supporting martial law. That is the situation we presently have in Panama, as attested to by Judge Crowe:

The general said this morning that there were only about 8,000 in the military. Panamanians whom I know and with whom I have talked on many occasions seem to think that there are many more—that there are about 10,000 or 11,000.

There are no sheriffs, no city police, nor State police, nor anybody of that nature. Political prisoners are not uncommon and exile has been used against prominent citizens without trial.

That is the type of law enforcement that you will find.

I submit, Mr. President, that is the type of law enforcement, if we approve these treaties, that we are going to subject Americans to:

I have a clipping here which is very interesting, on that particular score, that appeared in the Miami Herald recently. It was reported on Tuesday, May 24, 1977 concerning one Eisenman. Mr. Roberto Eisenman and 10 others were critical of the method that the Government of Panama was using in handling the beef situation. These people were raising beef and went up into the interior and protested against this method.

They are not unlike the hundreds and thousands of good farmers and agricultural people we have had all over this town and through these buildings in protest of their particular difficulties. These people are basically doing the same thing. They are protesting policies of the Government which are affecting them adversely as beef producers.

All right, what happened to them in Panama?

Those people were immediately arrested and handcuffed and exiled from the country without trial. They were sent to Ecuador, as this committee may already know. Mr. Eisenman charged that the Panama dictatorship is alive and well due to the support of the United States. He said this in Miami just recently.

Now, it has been stated time and time again on the floor of the Senate that this is the just due of the Panamanians. I do not subscribe to that. I think history reveals that there is no country that has ever been treated better in every way than we have treated Panama from its inception. It is my view that Panama would not be the Panama of today if it were not for the U.S. generosity over the years, and certainly not without the Panama Canal.

Let me proceed further with the statement:

In that meeting there were a number of people. The audience reaction generally appeared to be antitreaty . . .

I am speaking again of Judge Crowe in his testimony before the Subcommittee on Separation of Powers of the Committee on the Judiciary of the U.S. Senate:

In that meeting there were a number of people. The audience reaction generally appeared to be antitreaty, although the luncheon debate was cosponsored by the Council of the Americas, representing some 220 U.S. firms doing business in Latin America which has publicly endorsed the negotiations.

I have sat in the court, as I say, for 25 years. I have had occasion to study the history of the acquisition of the Canal Zone area. It has been gone over pretty thoroughly this morning. I am no expert on the question of separation of powers. Cases of that kind have not arisen in my court. I am familiar with the *Alabama* case and the *Fitzgerald* case and the different ones that were alluded to by Mr. Leonard this morning.

I believe thoroughly that the Congress must sit in the disposition of property that is the property of the United States.

Now, why is that important? Because we have had extensive debate and discussion in these last several weeks, on this floor and otherwise, as to whether or not the Constitution requires the approval of the House of Representatives in the disposition of Federal property. It has been said time and time again by the proponents of the treaty that that is not necessary, that that is a function of the executive that, upon approval of the treaty here, will be self-executing.

We know that well over a majority of the House of Representatives do not subscribe to this view. They have recently signed statements indicating that it is their judgment, on a bipartisan basis, Democrats and Republicans alike, that it is the constitutional responsibility of this body and the President to transfer this matter to the House of Representatives for approval before it is finally concluded.

Mr. LEAHY. Will the Senator yield for a moment on that point?

Mr. LAXALT. I certainly will. I am happy to yield to the Senator from Maine.

Mr. LEAHY. Vermont.

Mr. LAXALT. I apologize. These are long days. My apologies to the able Senator PATRICK LEAHY, from Vermont.

Mr. LEAHY. Maine is a beautiful State also. We also have been among those traveling up to those Northern States on occasion.

I have heard my good friend from Nevada discuss the question of allowing the House of Representatives to vote on this issue. My good friend from Utah did the same again last night. I have also heard a number of Members of the House of Representatives say that they would like to have a vote on it, at least publicly, and I have heard some of the same signers of the letter right here yesterday chuckling a little bit in the back of the hall during our vote on it, saying "It is a good thing you guys are the only ones voting on this."

I would love to have every one of them vote on the Panama treaties, but I think we are somewhat constrained by the Constitution in that regard.

With all due respect to our friends in the other body, I recall last year when the matter of major controversy was a pay raise—which I voted against twice here in this Chamber, I hasten to add—but the matter of controversy was a pay raise, and I recall Members of the other body being polled as to their feelings about it. An overwhelming majority said that if they were allowed to vote they would vote against the pay raise.

Of course, when suddenly by accident they were allowed to vote on it, as we all know, they voted for the pay raise. That may or may not be a matter of some concern here, but the fact is that the Constitution very clearly states that on

treaties of this nature, the Senate alone will vote. This was done on the first treaty and will be done on the second treaty.

Now, on the question of implementation: Whenever the implementation legislation comes up, naturally both Houses vote on that. As members of the Senate Appropriations Committee, for example, we have an inflexible analysis of the Constitution. I would be delighted to start a few appropriation bills over here rather than in the House. Maybe the Senator from Nevada, the Senator from Utah; and I could get together on a resolution asking the House of Representatives if, in return for us forgoing the Constitution and letting them vote on the Panama treaties, they would let us initiate appropriation bills on this side of the Capitol.

Would the Senator from Nevada like to join such a resolution?

Mr. LAXALT. I might not have any difficulty with that, Senator LEAHY. I wondered, though, if I could address a question to the Senator from Vermont in this whole general area.

There is a split of opinion as to whether or not the House of Representatives must pass on the disposition of property, admittedly. As a matter of fact, this whole matter now is the subject of litigation.

Mr. LEAHY. I ask my friend from Nevada, because there is a split of opinion, and because very learned constitutional lawyers have stated that they feel that it must be thus. There are precedents for it, and the matter is the subject of litigation.

If it has the urgency that many in the other body feel it does, is it not a fact, would not the Senator from Nevada agree, that such a matter, if pushed with diligence by those who claim that they feel a great urgency on it, could be through the appellate process, could have been before the U.S. Supreme Court, and could have been determined by now?

Mr. LAXALT. It has not been, though I assume they are pushing it with due diligence, and I understand that they are.

Mr. LEAHY. I look at other matters within the past few years that have gone quickly to the U.S. Supreme Court and have quickly been disposed of. During the Watergate time there were questions regarding the Watergate tapes. The ownership of the Watergate tapes is probably an example that we can all recall where the matter went very quickly to the U.S. Supreme Court and, of course, was disposed of.

I suggest that while it is very nice for Members of the other body to join in a lawsuit to seek a determination of this question, the U.S. Supreme Court is the one place where final determination could be made. Would the Senator agree on that?

Mr. LAXALT. Yes, I would.

Mr. LEAHY. I would suggest that if the Members of the other body are really that concerned and really that eager to have the treaties come over to the other side, to the other body, for a vote, I would suggest, considering the time at which their litigation was begun, that the matter could be much farther along than it is now. Steps could have been taken to have assured a decision within the U.S. Supreme Court, if not by now, certainly by the time we finish voting on these treaties.

Mr. LAXALT. Will the Senator suspend for just a moment?

Mr. LEAHY. Certainly.

Mr. LAXALT. Without discussing further the legal ramifications here, we are fortunate in having on the floor the very able Senator from Utah (Mr. HATCH), who probably, as much as anybody in the entire U.S. Senate, has been involved in the legal features.

Let me discuss with you for just a moment or two, Senator LEAHY, the question beyond the legal problems, as to whether or not it would not be just good political sense to have the House pass on these treaties.

Mr. LEAHY. I think that the U.S. Constitution has clearly set out that the treaties' ratification should be voted on within the Senate. I would not want, for the sake of political science or political expediency, to ask to have the other body act on them.

As a member of the Appropriations Committee, I find it very frustrating to have to wait for the other body to act first on appropriation matters, but that is clearly within the Constitution, and I have to forestall that frustration and wait for it to come over. Certainly, if the U.S. Supreme Court ruled in this case that this treaty, contrary to what many legal experts have advised and what appears to be the constitutional background to it, if the U.S. Supreme Court said that the House also should vote on it, then I would say "Fine. Let them vote on it. Let them vote on it." But I certainly would not want to pass it over there as a matter of political expediency.

Mr. LAXALT. I would not deem it to be a matter of political expediency. I would feature it to be almost a matter of political necessity.

I will tell you why. We have had Senator after Senator stand up on this floor and say that despite the fact that they may have a 10-to-1 majority against this treaty, they do not feel that they are bound by their constituencies.

Well, I will agree that we cannot be automatically sure. We cannot run the affairs of the U.S. Senate by simply looking at a poll; but I would say that if we do not pay heed to the people out there, and we have a situation where it is 10 to 1 or 15 to 1 or 20 to 1, as it may well be in some of these States, that we are not being as responsive as we might be in this Senate if we do not listen to that, and at least, make it a considerable factor even not conclusive.

Mr. LEAHY. I would agree with the Senator from Nevada on that. I happen to enjoy the luxury of representing a State where the latest polls show that the opinion is split 50–50—right down the middle on the treaties as of today.

Mr. LAXALT. All right.

Mr. LEAHY. But I will ask the Senator one further question.

If a U.S. Senator feels in his own conscience that his particular position is right, can he vote against his conscience, no matter what polls or constituents might say?

Can our form of government continue to exist if we have people on the floor of the U.S. Senate voting contrary to their consciences?

Mr. LAXALT. Of course not. But I must say this to the Senator from Vermont: We could pass on a thousand matters here on the floor of the U.S. Senate and there might be one of those thousand which may be a matter of conscience.

Mr. LEAHY. And I contend that this one is.

Mr. LAXALT. All right. So be it.

Mr. LEAHY. As I said yesterday on the floor of the Senate, I feel that the vast majority of Members of the Senate, those who vote both for and against the treaties, have voted the way they feel in their consciences is right and in the best interests of the United States.

Again, I do not think the vast majority of the Members of this body have voted in the way they think will get them the most political mileage, one way or the other. I say that both for proponents and opponents of the treaty. They have voted instead what they feel in their minds and in their consciences, is in the best interests of the United States.

I say this because it is the only way, especially in a matter of such significance. This is the only way the final decision can be made.

Certainly, everybody should do as I have done. I am sure they have gone to their own State, talked with their own constituents, studied the matter as deeply and as carefully as they know how.

The ultimate result was that most voted by their own consciences, because no U.S. Senator owns a seat in the U.S. Senate. No U.S. Senator, once having gotten here, has some kind of lifetime tenure, and no U.S. Senator——

Mr. FORD. Will the Senator yield at that point?

Mr. LEAHY. Can I finish?

Mr. FORD. Who owns the seat then if the Senator does not own it? Who really owns the seat and who sends the Senator here to warm the seat?

Mr. LEAHY. The people of the State. The people of the United States do.

When they send us here, they send us to exercise our best judgment, to represent them as well as we know how.

But they do not own you. They do not own your conscience. Nobody—nobody—in the country owns your conscience.

In the final result the Senator, when he casts his vote, must cast the vote that is consistent with his own conscience.

Mr. FORD. The Senator has been arguing the Constitution ever since I walked into this Chamber. Will the Senator yield to me for half a minute?

Mr. LAXALT. Yes.

Mr. LEAHY. The Senator from Nevada has the floor.

The PRESIDING OFFICER. The Senator from Nevada still has the floor.

Mr. LAXALT. I am happy to yield to the Senator from Kentucky.

Mr. FORD. The Senator has been arguing the Constitution ever since I walked in this Chamber, and how important the Constitution is. The Senator says the treaty should not go the House and be voted on in the House because that is what the Constitution says.

Alexander Hamilton in about 1825, in framing the Constitution, said to us and to the world that this is where the people's voice is heard. I repeat, this is where the people's voice is heard.

Now, I do not think we ought to just throw our conscience out the window and not have a conscience, but if we are truly going to reflect the voice of the people, somewhere along the way we have to say what they are saying.

I think the voices out there today are saying, "Big brother, listen to us. Why should we be interested in the political arena?"

That is why there is less than a 50-percent vote in an election, because they say their vote does not count, or their voice is not heard, and they are tired.

Mr. LEAHY. I think it is unfortunate if the Senator has less than a 50-percent vote in his State. In my State we have usually been in the top of the country for percentage of votes. Maybe that is why in our State, where opinion is split down the middle on this issue, the vast majority of people have come down and told their Senators that they exercised their input to us and they expect us to use our best judgment and vote our conscience.

Mr. FORD. If it is 50–50, you can fall on either side then, and your conscience will be clear.

Mr. LEAHY. No, I disagree with the Senator. I could not fall on either side and my conscience be clear because my conscience will tell me one side, and that is the only side I could go on, irrespective of what the poll might be.

Perhaps it is fortunate that in my State it is split 50–50. But no matter how it might be split, in the end result, like all Senators from Vermont before me, in the end result my conscience must be the guide.

Now, I would do everything possible to make sure, in reaching that conclusion and molding that conscience, that the people of my State have the ability to involve themselves. Fortunately, being from a small State, I can read every piece of mail, and do, that comes from Vermont. I can, several times a month, be in my home State and have town meetings. I am probably the only Senator in the country that has a listed home phone number, in both Vermont and Washington.

Mr. LAXALT. Mr. President, who has the floor?

The PRESIDING OFFICER. In this situation, may we have a more orderly debate?

The Senator from Nevada continues to have the floor.

Mr. LAXALT. The only point I want to make is that I will not argue with Senator LEAHY that when a given issue is a matter of conscience he follows it. Of course he does.

But the point the Senator from Kentucky (Mr. FORD) raises is also valid. We are here in a representative capacity. I cannot help believe the reason why the Congress and this body, in terms of public approval, are down to a rating of less than 20 percent is because of the fact that millions of Americans in this country do not think we listen any more. They think we talk to ourselves. We form our own conclusions in an ivory tower and we are not responsive.

Believe me, this is certainly true of our consideration of the Panama Canal treaties.

I personally believe, and that is the reason why I raised the point in issue, that one of the valid reasons for having the House pass on these treaties is that they run every 2 years and are far more responsive to the people.

I suggest to the Senator from Vermont that if every Senator who voted yesterday was running for office this year, instead of 34 votes we would have gotten twice that many.

Several Senators addressed the Chair.

Mr. LAXALT. I am happy to yield to the able Senator from Hawaii.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. MATSUNAGA. I thank the Senator from Nevada for yielding.

As the Senator well knows, I served for 14 years in the House of Representatives prior to coming to the Senate. In those 14 years that I was there I learned this much: Generally speaking, Members of the House, as well as Members of the Senate, may be divided into two general classifications. One would be the issue-oriented, and the other the constituent-oriented.

The constituent-oriented, I found, would check the mail on any issue and say, "Well, today I received a thousand letters; 800 were opposed to the bill"—or whatever was before the House—"and only 200 supported it. So I will vote against it."

Mr. LAXALT. They voted by mail.

Mr. MATSUNAGA. Well, this, they feel, expresses the opinion of the constituents.

Mr. LAXALT. If that is spontaneous mail, as long as it is not fully automatic, is that harmful?

Mr. MATSUNAGA. If the Senator from Nevada will let me make my point, in the event a shift in public opinion is reflected by letters, now, I suppose those who voted against the treaty yesterday would say, "Now, my mail shows 800 for the treaty and 200 against. So I will now vote for the treaty."

On the other hand, we find the issue-oriented Members of Congress who would go by what they believe to be the right thing to do, the fair thing to do, not by how many letters they receive for or against a particular bill or treaty, as in this case; but by having the facts before them, they are better able to make a judgment on the issue than are their constituents. The constituents do not have the facts the Member of Congress has before him. He can make his judgment on the facts before him and decide on that basis, fully confident that he can go back to his people and lay the facts before them, explain his vote, and even win the majority of his constituents to his views.

Mr. FORD. Mr. President, will the Senator from Nevada allow me to question the Senator from Hawaii?

The PRESIDING OFFICER. As the Chair understood the Senator from Nevada, he was only yielding temporarily to the Senator from Hawaii.

Mr. LAXALT. I would be happy to yield to the Senator from Kentucky if the Senator from Hawaii has concluded his statement.

Mr. MATSUNAGA. Will the Senator permit me to conclude my statement?

Mr. LAXALT. Certainly.

Mr. MATSUNAGA. I hope that in the consideration of the Panama Canal Treaty, we will have more of the Senators here who will go on the basis of what Edmund Burke was trying to tell his people. Of course, it has been repeated here over and over. The Senator from Vermont (Mr. LEAHY), who sits next to me, did a beautiful job yesterday.

Mr. LAXALT. When was that statement made by Mr. Burke? It was in the 1800's, was it not?

Mr. MATSUNAGA. In the 1800's.

Mr. LAXALT. Before television, before electronic communication, before the high level of education we have in this country, before we had an electorate as well informed as they are on the Panama Canal.

Mr. MATSUNAGA. The Senator has the floor and can cut me off at any time.

Mr. LEAHY. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Will Senators follow normal procedure? The floor is held by the Senator from Nevada.

Mr. MATSUNAGA. I will yield back the floor to the Senator from Nevada, so that he may yield to the Senator from Vermont.

Mr. LEAHY. Will the Senator yield 30 seconds?

Mr. LAXALT. I yield to the Senator from Vermont for a question, for 30 seconds.

The PRESIDING OFFICER. The Senator has yielded for a question to the Senator from Vermont.

Mr. LEAHY. Is the Senator from Nevada suggesting by what he has said that because now we have television, with the quality of television coverage in this country, that it should be the determining factor for us?

Mr. LAXALT. No, of course not.

Mr. LEAHY. I think he has taken a total about-face from statements I have heard him make earlier. When I sit here, for example, in the Senate, and sometimes spend all day long in a hearing, not leaving the room once, and then watch the same coverage of that on television at night, I sometimes wonder if it is the same hearing, it is changed so. I hope we do not rely on the television networks in this country to be the educating factor for our people.

Mr. LAXALT. Of course not.

The only point I make is this: I have heard Mr. Burke quoted time and time again on the Senate floor. I suggest to my colleagues that the situation then existing was far different from the situation that now exists. At that time, he was representing a constituency that was largely uneducated, uninformed, and very often reacted emotionally. Surely, his standard of care was different from ours, when the electorate of this country, by reason principally of a higher level of education, by reason, since

Watergate, of a far higher sense of political interest, are well informed. I suggest that there are millions of Americans out there who are far better informed concerning the Panama Canal treaties than we are.

I suggest that on this point, the Burke matter of substituting our judgment, in that ivory tower, and imposing our judgment on all those poor masses, those uninformed masses, is the poorest standard of all.

Mr. LEAHY. I suggest to the Senator from Nevada that he is restating what I had to say either yesterday or today. He is restating it in an entirely different form from the way I did then. I quoted my own announcement for the Senate, in which I said at that time that in any vote, the ultimate determinant is going to be my conscience and my judgment—a matter that I repeated at every campaign stop I made from then until the time I was elected.

Mr. LAXALT. I understand perfectly.

Mr. LEAHY. The discussion has gone off the basic subject we were talking about before. But with respect to the House voting on these treaties, my interpretation of the Constitution is that they cannot. However, if the Supreme Court said otherwise and if the House Members are really anxious to have a chance to vote on them, they will push the case as quickly as possible before the Supreme Court; and if the Supreme Court says they should, they will. In any event, the implementation legislation is before us, and since it contains appropriations, the House will have a chance to vote on it.

Mr. LAXALT. The only point I make, before yielding to the Senator from Kentucky, is this: The reason why I injected this into the debate, in the matter of the House of Representatives passing upon these treaties so far as the transfer of property is concerned, is that I do not think we are as responsive to the American people as are the Members of the House of Representatives, because they have to run for office every couple of years.

Numerous suggestions have been proposed that we should have a national referendum on these treaties. Obviously, that is not practical, and it probably is not good political science. But I suggest that in this type case you have the conflict situation where the House of Representatives, more accurately reflecting the sentiment of the American people, should pass on this question. It is for that reason, separate and aside from the law, that I think it makes good political science.

I now yield to the Senator from Kentucky for an observation or two.

Mr. FORD. I thank the Senator for yielding.

Each of us, in our own way, has to answer to his own conscience.

I think that the education of the people of this country, as the Senator has stated, by those who are for and against the treaties, has been extensive. Each of us has to represent his or her State as we see best.

With respect to the knowledge and the change of emotions as related to the general constituency, I can only speak for my State. We received in our State, with open arms and delight, the Secretary of State, Mr. Vance, at a large meeting in our largest community. People from all over the State were there, and he expresesd his support of the treaty and answered questions.

Ambassador Bunker came and made several statements in our State, meeting with large groups of people, stating the pros of the treaties and answering questions. Former Governor and former Ambassador Harriman was there and made many visits around the State. A distinguished former colleague of this body, Senator Cooper, made his statement and has written letters by the hundreds to people of my State. We have had groups from the State Department, from the committee that was formed in favor of the treaties, all over our State—civic clubs, schools, colleges, universities. I think our people understand. Those were all protreaty people I have talked about.

Then, those who were opposed to the treaties have been getting their message over. I think the people of my State are well-informed through the electronic media, television, radio, newspapers, visits, and the so-called townhall meetings. The percentage has been higher in opposition to the treaties as they have learned about them.

I wanted to vote for the treaties. I said that to the VFW, the American Legion, and everyobdy else. But I could not go against the people I represent, and they are knowledgeable, in my opinion. So if it is lack of conscience that I represent the people of my State as to what I think they are saying to me, then I will yield to having no conscience. But I think I am their conscience when I vote what I think they want me to do.

Mr. LAXALT. I thank the Senator from Kentucky.

The Senator from Nevada has shared the same experience. Our State has been flooded by representatives of proponents of the treaty, by various appeals, through literature and otherwise.

I find that the people of my State, particularly since these debates have started, are exceedingly well informed. In all the years I have been in this business, I have not seen a higher quality of mail. I do not mean the highly orchestrated, postcard kind of mail, but thoughtful mail, exploring the aspects and facets of this treaty that did not even occur to me.

I learn a lot from my mail, as I suspect all of our colleagues here have. The point I make is I do not think the situation we now have, in really shunting aside our constituency in terms of our substituting our judgment for theirs, is any longer relevant in considering the treaty.

Mr. MATSUNAGA. Mr. President, will the Senator from Nevada yield?

Mr. LAXALT. I yield.

Mr. MATSUNAGA. This has already been inserted into the record, but in the light of what has been said by the Senator from Kentucky—I am sorry he had to leave, but I had him read this before he left the floor—I might point out that in the October CBS-Time survey, after a second question was asked relative to whether or not the people favored the ratification of the treaties, the question was put "Suppose you felt the treaties provided that the United States could only send in troops to keep the canal open to ships of all nations, would you approve of the treaties?"

The result showed a complete reversal from opposing the treaties by 49 to 29 percent to favoring them by 63 to 24 percent.

So, public opinion definitely has shifted and, in the light of the fact that we did adopt this so-called leadership amendment, the DeConcini reservation, and the Hayakawa understanding, I would think that public opinion in the United States today would support ratification of both treaties.

Mr. LAXALT addressed the Chair.

Mr. MATSUNAGA. If the Senator from Nevada will permit me to continue, in the January NBC news survey this followup question was asked: "Would you favor or oppose approval of the Panama Canal Treaty if an amendment were added specifically giving the United States the right to intervene if the canal is threatened by attack?" Again the results, abruptly reversing the original percentages, showed 62 to 28 percent opposed to the treaties among those who had heard or read about the treaties. But the second question, after it had been put to those who, again, had heard or read about the treaties, produced a result of 65 to 25 percent in favor of the treaties.

So the actual polls which have been conducted indicate what the proponents have been saying here, that after the people listen to what is being debated here on the floor they tend to even go further and are even more against the treaties, is not true. These polls which were conducted were scientific polls and they show that the more the people of America learn about the treaties the more they become supportive of the treaties.

Mr. LAXALT. Mr. President, I must suggest to the Senator from Hawaii, and he has been in this business I think even longer than I, that there are polls and there are polls. I would think that probably standing fairly low on the totem poll of credibility of the polls are the type the Senator described, not because they are improperly done but because they are not scientifically done.

I would suggest that the recent poll conducted by Opinion Research from Princeton is scientific, it is credible and over the years has had as high degree of credibility as any polling detail firm has. We have here the Senator from Utah (Mr. HATCH), who is familiar with the results of this poll, and I would like to have him read into the RECORD, if he will, the results recently of a scientifically conducted poll on the issues relating to the Panama Canal treaties.

Mr. HATCH. Mr. President, I thank the distinguished Senator from Nevada.

When we talk about polling sources and polling people we have to hold the Opinion Research Corp. of Princeton, N.J., very high in the overall understanding of polling.

This poll taken by Opinion Research is fairly dramatic, and it was taken just recently—actually, I think, after the polls cited by the distinguished Senator from Hawaii.

The interviewing in this poll was conducted during the period of February 24 through February 27, 1978.

This poll supports the argument of the distinguished Senator from Nevada, who has asserted that the people are not as dumb as some of our colleagues in this great body believe they are, because, according to this poll, their awareness of these negotiations has risen markedly over the years, from 18 percent in June 1975, to 69 percent currently.

Over the same period of time, the majority of the public have favored continued U.S. ownership and control of the Panama Canal. Currently—and that is toward the end of February, just a few weeks ago—72 percent of the people hold this view. There has been a significant increase in the number of persons who support Panamanian ownership and control of the canal. It is now 19 percent. It used to be only 8 percent; so that has increased also. When those who favor turning over the canal to Panama are presented with an alternative proposal, namely that the United States continue ownership but improve the canal and provide economic benefits to Panama, the large majority continued to favor ownership. However, 78 percent, or three-quarters of the total public, would favor continued U.S. ownership under this alternative plan. They also conclude that there is considerable support, 68 percent, for a treaty amendment that clearly guarantees the right of the United States to defend the canal without the permission of Panama. Only 18 percent of the public believed that the present clarification, which states that the United States can defend the canal but not interfere in the internal affairs or territory of Panama, is a satisfactory defense position.

Keep in mind that 69 percent of the people have great awareness of the problem according to the poll. Three-fourths of the people believe that the military facility on Galeta Island should continue under U.S. ownership even if the rest of the Canal Zone is turned over to Panama. My distinguished friend from North Carolina, Senator HELMS, brought that out very strongly with his amendment on the Galeta Island controversy. Three-quarters of the public do not want us to give that up, but nevertheless it was shot down in the Neutrality Treaty.

There is a majority opposition, 55 percent of the American people, to the treaty provisions that would cost the United States $100 million a year until the year 2000, with most of those costs involving payments to Panama.

Most people are unaware, this poll concludes, that the treaties require the United States to have the consent of Panama before we can build a new canal. Almost half the public, 47 percent, would favor an amendment removing the requirement for Panama's consent, although 36 percent believe this requirement to be all right.

According to the Opinion Research poll, a poll without peer in the polling business and recognized all over the world as one of the great polling sources right out of Princeton, N.J., they conclude that 7 persons in 10 believe the treaties should be sent to the House of Representatives for consideration under the terms of the Constitution that state that Congress, not just the Senate but Congress, shall have the power to dispose of territory or other property belonging to the United States.

Even those who favor Panamanian ownership of the canal are largely in favor. Sixty-seven percent of those who are for these treaties are largely in favor of sending the treaties to the House of Representatives.

I could go on and on with this poll. It certainly shows there is a considerable disparity between the various polls in this country. But this poll, I think, has fairly shown that the American people are not as dumb as some of our friends and colleagues in the Senate seem to think they are.

I can tell you I know they are not that dumb. I know very well the American people understand these issues and they are concerned.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. HATCH. I am delighted to yield to the distinguished Senator from North Carolina (Mr. HELMS).

Mr. HELMS. Mr. President, what the Senator has said is true, and I would add the further comment that the attitude of the public opposition to these treaties has prevailed despite what many believe to be an almost unconscionable bias in the coverage of these debates.

Mr. HATCH. The Senator is not talking about the radio coverage?

Mr. HELMS. No; I refer to the major news media which so carefully select material supporting their posture in favor of the Panama Canal giveaway.

Mr. HATCH. Right.

Mr. HELMS. As the Senator knows, I come from the news media, and I was especially interested in a comment one afternoon a week or so ago, when the distinguished Adm. Tom Moorer came by for a visit. He said he had been involved in many public events of some controversy throughout his career.

Mr. HATCH. He was the former Chairman of the Joint Chiefs of Staff, from 1970 to 1974.

Mr. HELMS. That is right. Admiral Moorer said he had never before seen such one-sided coverage by the major media of this country. Now, Mr. President, I am not talking about the local television and radio stations, or the local newspapers; I am talking about the New York Times, the Washington Post, and others. With all due respect for their right to publish and broadcast as they please, I believe they nonetheless have a duty to present both sides of this issue. But they are not alone in their bias.

The President of the United States has been on national television twice, 30 minutes or more on each occasion; Ronald Reagan was granted time for response by one network.

I recall the President in a fireside chat stating various reasons why, in his mistaken judgment, these treaties should be approved.

It occurred to me at the time that the President of the United States, no doubt based on information supplied him by the State Department, delivered about five or six misconceptions—to be charitable in describing them—in about 60 seconds. For example, he said the United States had never owned the Canal Zone property and does not now own it. Well, the able Senator from Utah, who is a distinguished member of the Subcommittee on Separation of Powers of the Judiciary Committee, knows that last Saturday a hearing was held on this very question, and that misconception was blown out of the water.

Mr. HATCH. That is correct.

Mr. HELMS. The Senator knows that three enormous crates were delivered by uniformed officers. These sealed crates were opened at that hearing, and therein were several thousand deeds representing the purchase of the Canal Zone property. So it is absolutely correct that the American taxpayers bought and paid for that property.

It was interesting to me that the most coverage this hearing received was about a 30-second clip on one of the networks. The Washington Post did not carry one syllable about it. Nor did the New York Times.

Mr. HATCH. That is in spite of the fact we have had Senators on this floor trying to say these agreements were leases, temporary agreements, anything but a transfer of title and all the right of sovereign ownership.

Mr. HELMS. Not only have they said it——

Mr. HATCH. And ownership.

Mr. HELMS. They have literally shouted it for the benefit of the radio broadcasts going out across the Nation. But it still is a misconception that has no doubt misled many people.

Then repeatedly it has been contended, beginning with the President of the United States, that we will not be loved in other South American countries if we do not give this dictator in Panama the canal belonging to the people of the United States.

Nothing could be further from the truth, even if it were relevant—which it is not. The able Senator from Utah just the other day laid that to rest on this floor. I think he referred to a visit to South America by this Senator at this Senator's own expense. I did not go under the aegis of the State Department. I did not use any public funds. I went, as the saying goes, on my own nickel, and I arranged my own itinerary. That just happened to include visits with the heads of state in each of several countries representing three-fourths of the population, the gross national product, and the land area of South America.

Each of these heads of state said, in effect, "Don't give Torrijos your canal."

Then I recall the distinguished Senator from Alaska who, during the debate on the Neutrality Treaty, declared in his eloquent fashion, and certainly very loudly, that the canal is obsolete, that

all it would accommodate were "a few old rust buckets," as I believe he called them, accommodating one drop of oil apiece.

Well, that was reductio ad absurdum on its face. The Senator from Alaska was colorful. But he was contending, in effect, that the canal is obsolete and we were not doing Panama any favor by giving the canal to Panama.

Well, the fact, is as the Senator from Utah knows, that 98 percent of the vessels afloat in this world can go through the Panama Canal, can transit it. The only vessels that cannot transit it are the supertankers and the larger aircraft carriers. The Senator from Utah knows that the aircraft carriers would not use the canal anyhow because aircraft carriers are not intended to move from the Atlantic to the Pacific or vice versa. You build one for the Pacific, you build one for the Atlantic. Supposedly we have a two-ocean Navy, which we actually no longer have. We have at best a one-and-a-half-ocean Navy.

As for the supertankers, there would be no place for them to dock even if they went through the canal. So that is another misconception the proponents of the treaty have repeatedly stated on this floor and elsewhere.

I am a little bit amazed, I would say to my able colleague from Utah, that despite the deluge of misconceptions distributed by those who favor these treaties, the American people have instinctively understood what is afoot on this floor in the discussion of these treaties. I am very proud of the American people for not having been any more misled than they have been.

Mr. MATSUNAGA. Mr. President, will the Senator yield?

Mr. HELMS. I would be glad to. However, I do not have the floor. The Senator from Utah yielded to me, and I am sure he will yield to the Senator.

Mr. MATSUNAGA. Mr. President, a parliamentary inquiry. Who has the floor?

The PRESIDING OFFICER. The Senator from Utah has the floor.

Mr. MATSUNAGA. I thought the Senator from North Carolina had the floor.

The PRESIDING OFFICER. No, the Senator from Utah yielded the floor. I understand the Senator from Utah has yielded for a commentary to the Senator from North Carolina. Has he completed it?

Mr. HELMS. No, not quite, Mr. President. I shall be through in just a moment.

In summation, as I was saying, I am very proud of the people of the United States for not having been misled by the misconceptions that have been published and broadcast. The people understand what is at stake here. They understand that this is a facility that was bought, built, and paid for with the resources and sacrifices of the American people; a facility that is vital not merely to the best interests of the United States but to the entire free world; a facility that is by no means obsolete; and a facility which leaders throughout South America fervently hope will remain in the hands of the United States of America.

I compliment the Senator for his discussion on the Opinion Research Corp. findings. I would just add this footnote: I doubt that the Senator from Utah can find one mention in the major news media of that poll.

Mr. HATCH. I have looked for it and I have not been able to find anything; and yet it is the most significant poll taken to date, with the fairest questions and from all angles, and I have to agree with the distinguished Senator from North Carolina. I have not seen anything, which is not to say that it has not been printed; I just have not seen it.

I have looked, and I certainly have looked in some of the media sources that the distinguished Senator has commented about here today.

Mr. HELMS. I thank the Seantor for yielding.

Mr. HATCH. I appreciate the remarks of the distinguished Senator from North Carolina.

Mr. MATSUNAGA. Mr. President, will the Senator from Utah yield?

Mr. HATCH. Without losing my right to the floor, for a question.

Mr. MATSUNAGA. I thank the Senator for yielding.

As the Senator from Utah (Mr. HATCH) has stated, there are those who have said they would oppose and oppose and oppose. I take it that in the view of the Senator from Utah the Gallup poll is a reliable poll?

Mr. HATCH. No, it is not.

Mr. MATSUNAGA. It is not?

Mr. HATCH. Because some of the questions were carefully calculated to produce and evoke a certain response. I will agree to this extent, that with regard to other issues I have found him to be emintently qualified. With regard to this issue, it is another matter. I think the questions were geared to get the desered responses.

Mr. MATSUNAGA. Will the Senator yield further?

Mr. HATCH. I will yield for a question, but I want to get back to the original question raised by the distinguished Senator from Vermont. It involved the contitutional issues here. If the Senator has a question he wants to ask, I will yield for that purpose.

Mr. MATSUNAGA. I would like to read into the RECORD the latest Gallup poll, inasmuch as the Senator from Utah read into the RECORD a poll conducted by another research group.

Mr. HATCH. How much time does the distinguished Senator from Hawaii wish?

Mr. MATSUNAGA. No more than 2 minutes.

Mr. HATCH. That is fair, and I yield for that expressed purpose.

Mr. MATSUNAGA. I thank the Senator for yielding.

The result of a poll, as the Senator knows, depends on how the question is phrased. While we did not use the type of question asked in the opinion research study, the Gallup poll, which was conducted in February of this year, showed that the American opinion was 48 to 40 percent in opposition to the treaties. The last survey showed that 45 percent were in favor and 42 percent opposed.

The important finding of this survey was that the more the Americans were informed, the more they tended to favor the treaties, and the better informed, as determined by the ability to answer three questions about the treaties, expressed being in favor of the treaties by 57 percent, and those better informed opposed the treaty only by 39 percent, while 4 percent held no opinion or refused to express one.

We find that Americans who are better informed about the treaties tend definitely to favor the treaties. I would say to the distinguished Senator from Utah that in my own experience, among my own constituents, I have found this to be true, that those who are better informed favor the treaties. Believe me, I have spent many, many hours convincing those who were opposed to the treaties, not by being an advocate but by merely being a conveyor of facts. I have been able to convert opponents to proponents of the treaties. I thank the Senator for yielding.

Mr. HATCH. I am very interested in the remarks of the distinguished Senator from Hawaii. He just points up what Senator LAXALT said. There are polls and there are polls and there are polls. Let me say this: I suppose the ultimate poll will be at the election box next election, and the election after that election and the election after that. I suspect if the American people are so much in favor of this hardly anybody voting for the treaties has anything to fear. But my experience, as I have gone all over this country, and have talked to all kinds of groups, is that almost everybody is overwhelmingly against these treaties.

I have, in a sense, conducted my own polls with thousands and thousands of people. All I can say is we will have to wait until the elections to see how angry the American people are.

I think the real issue which was brought up was a question involving, why do we not let the Supreme Court decide this issue, whether or not the House of Representatives should have the privilege of voting on this transfer of $10 billion of American property?

Of course, that question arises out of article IV, section 3, clause 2 of the Constitution, which reads as follows:

The Congress—

Not the Senate but the Congress, which means both Houses—

shall have the power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States;

I do not intend to go into that in great detail today, but probably on Monday or Wednesday of next week I will go into it in great detail, what type of territory the Panama area was and is to the United States, which will prove, I think, through constitutional law, that both houses should vote on this transfer of $10 billion of American property.

The point was raised here, why not let the Supreme Court do it?

Well, one reason is because the Supreme Court will not do it prior to the end of this debate, which means that if we wait until the end of the debate and we deny the House of Representatives the right to pass or reject the transfer of

American property, which is the only issue they would have a right to vote upon under article IV, section 3, clause 2 of the Constitution, then the fait accompli will have occurred. There is not much we can do about it, if we ratify these treaties, whether or not the Supreme Court ultimately determines that the constitutional issues are as maintained by those of us who sit on the Separation of Powers Subcommittee, and I sit on the Constitutional Law and Amendments Subcommittee of the Judiciary Committee.

Mr. LEAHY. I did not understand the point the Senator made.

Mr. HATCH. Would the Senator like me to yield?

Mr. LEAHY. Just so I may ask him to clarify one thing. Is the Senator from Utah speaking of the House voting on both of the treaties?

Mr. HATCH. No. I am speaking about the House voting on one issue, the transfer of American property, which is what is covered under article IV, section 3, clause 2.

Mr. LEAHY. Is the Senator, insofar as the discussion before and the vote of the Senate on the treaties, suggesting that the House vote on the same treaties that are to be voted upon here?

Mr. HATCH. No. The issue is: Under article IV, section 3, clause 2, I will requote it, "The Congress," not the Senate alone, "shall have the power to dispose of and make all needful rules and regulations respecting the Territory or other Property belonging to the United States."

To respond directly to the question, why not let the Supreme Court decide this for us, I think what we ought to consider is some of the ramifications surrounding that particular statement.

Before examining the issue of Congress rights under the treaty, we need to be mindful of our duties under the Constitution. It has been suggested by some Members that because this is a constitutional issue involving the powers of both the President and the Congress, the proper place for its resolution is not the floor of the Senate but the Supreme Court of the United States of America.

Such a view, Mr. President, represents a gross distortion of our constitutional duties, and I hope that Senators will not be persuaded to abdicate their responsibilities by this sort of reasoning. It is true, of course, that the Federal courts may ultimately be required to give their opinion on this issue. Whether they will or will not, I do not know. Whether there will be a judicial determination depends in large measure on the action we take here and on technical matters relating to the question of standing and the so-called political question doctrine.

Certainly, the issue is settled if we accept this amendment and require the House of Representatives to join with the Senate in the decision to transfer the Canal Zone to the Government of Panama. That would be the end of the issue, the end of the question.

The growth of judicial power in this century, usually at the expense of Congress and the several States, suggests that the Senate has, however, already seriously weakened our separation of powers by refusing to exercise its powers, by giving the courts a free hand to roam at will and make laws throughout the country, and by abandoning the field, so to speak, and inviting the courts to step in where legislators fear to tread, in such manner does the Senate avoid a difficult vote that might anger the people back home. This may seem prudent to those who have no desire other than to be reelected, but it is nevertheless politically and constitutionally irresponsible. As a matter of sound constitutional policy, Senators should face constitutional problems squarely. Otherwise, we might just as well close up shop and turn over the whole Government to the courts.

Over and above these considerations is the Constitution itself, which states in no uncertain terms that we must, in order to serve as Members of this body, take an oath to uphold the supremacy of the Constitution. I fail to see how we can live up to our oaths of office if we disregard the Constitution during the course of our deliberations because it is easier to throw the yoke and the burden upon the Supreme Court. To meet our obligation, we must keep an eye on the Constitution especially in this case. It is the light which guides us through the legislative process. It sets the rules and the standards by which we judge the legitimacy of legislation and the propriety of our actions. We cannot legislate in a vacuum. The first test of every measure we consider is the constitutional test. Is this bill constitutional? If it is not, we abandon it, whether it is a good bill or a bad one.

Legislative construction, in other words, is one of our primary duties. If we are mistaken, if we erroneously interpret some provision of the Constitution, then the courts are free to declare our action null and void. But the possibility of judicial intrusion does not relieve the President of his duty to interpret the Constitution when he is called upon to enforce it or to sign a bill into law. All three branches of this Government, in fact, must interpret the Constitution in order to determine the legitimacy of their actions. It is not limited strictly to the Supreme Court of the United States. As a matter of fact, the Congress has asked them many times to determine what is to be done in a given situation, and certainly here.

This is not to say that our interpretation must be final, but only that the Constitution contemplates that all three branches of the Government have a constitutional role to play, and that our system would be reduced to utter confusion if every decision, in the first instance as well as the last, were to be made by nine men who are neither elected to office nor are responsible to the people of this country, as we are.

This question of our duty to interpret the Constitution first arose in 1789, in the first Congress. It was answered and put to rest by James Madison, one of the men who drafted our Constitution, and I believe his words bear repeating today.

The issue was whether the President had the power of removal. The Constitution expressly provides that the President may appoint principal officers, but it contains no instructions for the removal of officers except in instances where impeachment is appropriate. Members of the House considered at length whether Congress may decide the question of constitutionality and specify a removal process and a statute creating an executive department.

In response to the argument made by Representative Alexander White, of Virginia, back in 1789, that Congress ought not to interpret the powers of the President, Madison rose and addressed the matter in these words:

> It has been said by one gentleman that it would be officious in this branch of the legislature to expound the Constitution so far as it relates to the division of power between the President and Senate.
>
> It is incontrovertibly of as much importance to this branch of the Government as to any other, that the Constitution should be preserved entire. It is our duty, so far as it depends upon us, to take care that the powers of the Constitution be preserved entire to every Department of government; the breach of the Constitution in one point will facilitate the breach in another; a breach in this point may destroy that equilibrium by which the House retains its consequence and share of power; therefore we are not chargeable with an officious interference . . .
>
> But the great objection drawn from the source to which the last arguments would lead us is, that the Legislature itself has no right to expound the Constitution; that wherever its meaning is doubtful, you must leave it to take its course until the Judiciary is called upon to declare its meaning. I acknowledge, in the ordinary course of Government, that the exposition of the laws and the Constitution devolves upon the Judiciary. But I beg to know upon what principle it can be contended that any one department draws from the Constitution greater powers than another, in marking out the limits of the powers of the several Departments? The Constitution is the charter of the people to the government; it specifies certain great powers as absolutely granted, and marks out the departments to exercise them. If the Constitutional boundary of either be brought into question, I do not see that any one of these independent departments has more right than another to declare their sentiments on that point.

That statement by James Madison is found in the annals at page 500.

Mr. President, James Madison's explanation of our constitutional duties of legislative interpretation is no less valid today than it was some 189 years ago. We have a right and a duty to declare our sense of the meaning of the Constitution. Either we honor the Constitution now or never. But I reject the view that we honor it only in the breach.

The reason the Founding Fathers wanted the House of Representatives to vote on the transfer of American property is that they did not want any President of the United States or anybody else, for that matter, unilaterally making a decision to transfer American property without the consent of those Representatives of the Government in the legislature. Not just the Senators, who are elected only every 6 years, but those who have to go back to the people every 2 years, because those are the people who are going to realize, first and foremost, what the feelings of the populace really are.

The Founding Fathers wanted them to vote, because those 435 Representatives, as well as the 100 Senators, speak for the people in legislative matters—or at least should, I say, should speak for the people in legislative matters.

As I look at what has been happening to this country over the last number of years, I do not think they speak very well for the people in legislative matters. As a matter of fact, I think we have gone through some problems in this country that would never have arisen were it not for the fact that one philosophy has been ruling for the last 41 years. We are in the dilemma and plight we are in today strictly because some of our colleagues in the Congress have not done their duty or done their job.

In this case, we have 231 Members of the House of Representatives—Congressmen, if you will—elected by the people every 2 years, who have demanded the right to vote on the transfer of $10 billion of American property. I, for one, think they ought to have that right. I think the Constitution means what it says when it says that the Congress shall make that decision, not just the Senate.

Let me say this: If we want to do what is right here—I do not know how Congress is going to go. I do not know whether, if we gave them this right, they would vote for these treaties or not. I know one thing: I would feel a lot better whichever way they go knowing they had the opportunity to vote in this very important, specific area. I think it is almost crucial to this Government that we do not extend Executive power beyond where it is right now.

If we allow the President, through the representatives of the Department of State, the Ambassadors and others, to ignore the House of Representatives in this matter, since they have at least demanded it and the Constitution mandates it, I think we are going to be in trouble. I think we will allow the President in one fell swoop to extend his powers in violation of the separation of powers doctrine of the Constitution, to the detriment of the House of Representatives and, I think, the whole Congress. And we, as Senators, would have abdicated our responsibility to stand up and do what is right in this matter to insist on the protection of the rights of the House of Representatives as well as the Congress.

I might add that the 231 Congressmen are a bipartisan group. They are not just Republicans, they are not just Democrats. They are from both parties. And they are not all against the treaties. A number of them are for the treaties. But they know what is at issue here.

What is at issue here is one of the most important constitutional issues in the history of the country because it involves the very balance in the separation of powers. The Founding Fathers said that we have three coequal branches of Government, and not just one President who can ride roughshod over the other branches of Government.

To be frank, when Raoul Berger, that great authority on executive privilege, was backing those who wanted to attack Nixon for some of the things they said he did—and he should have been attacked—he was the hero of America. Everybody was talking about Raoul Berger, the great constitutional expert, because he was showing the way to impeach a President, in delicate matters of first impression. I think his opinion should be interesting to know, because I agree with Senator HELMS: I agree with him that the media, the major news media in this country, have not covered this constitutional issue, and it is the most significant issue in this whole debate.

I can tell you this: You will be interested to know that Raoul Berger, who, himself, would vote for these treaties if this problem were cleared up, has come out in definitive statements and made it very, very clear that, under the Constitution, the House should vote on this issue, and if the Senate refuses to allow it, the Senate is participating in extending the President's power over and above that of a coequal branch of the Government, meaning the U.S. Congress.

Now that is what is involved here, and it is no small issue. As I have said, it is one of the most important constitutional issues in the history of the country regarding the powers of the President and the scope of the treaty power.

Let me read what Professor Berger had to say, the eminent constitutional authority, formerly from Harvard University, when he testified before Congress a few weeks ago:

> You have invited me to comment on the relation between the Article IV, § 3(2) power of Congress to dispose of property of the United States and the treaty power. Although I am in favor of the Panama Canal Treaty, I share your solicitude for the preservation of constitutional boundaries and your concern lest the function committed to Congress be diminished. I have long held the conviction that all agents of the United States, be they Justices, members of Congress, or the President, must respect those boundaries. No agent of the people may overleap the bounds of delegated power, or encroach on power granted to another. That is the essence of constitutional government and of our democratic system.

That is what we mean by a separation of powers. That is the hallmark of American constitutional life, that we do not have any one of those coequal branches more powerful than the other. At least, they are supposed to be equal, even though at times some through power of leadership do rise above the other.

There is no question that the Senate could rise much above the administration of leadership if they would just recognize the House of Representatives.

In any event, he said, in essence, this is a balance of powers, this is a separation of powers, these are three coequal branches of Government. This is the essence of constitutional government and of our democratic system:

> The effect of these hearings ranges beyond the Panama Treaty, for the Panama cession will constitute a landmark which, should the State Department prevail, will be cited down the years for "concurrent jurisdiction" of the President in the disposition of United States property. For it needs constantly to be remembered that a succession of Presidents have circumvented Senate participation in treaties of gravest import by resort to Executive Agreements. Acquiescence in such claims spells progressive attrition of Congressional powers. Your insistence on respect for constitutional boundaries will warn the Executive against encroachments on the powers of Congress; it will alert foreign nations to the fact that treaties for the cession of United States property must be subject to the consent of the House as well as the Senate.

What he was saying there is that Presidents have already ignored the Constitution by bypassing the Congress, knowing that they could not get treaties through because of the coequal power of Congress and enacted and executed executive agreements, so that they did not have to go through this constitutional process of proving that the treaties are meritorious enough to get 67 votes.

The fact is, he said, that this is recognized above all in the Panama Canal decision. We are talking about the hallmark issue of constitutional government, the thing that makes this country the greatest in the world.

He goes on to say that:

> The President, "by and with the advice and consent of the Senate", may make treaties. But Article IV, § 3(2) provides that "the Congress shall have power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States." How are the two provisions to be accommodated? For present purposes the question whether the United States has "sovereignty" over the Panama Canal need not detain us because, in my judgment, the grant of "use and occupation . . . in perpetuity" constitutes "property" no less than the familiar lease of realty for 99 years. Then there are the installations that cost billions of dollars. Disposition of these no less requires the consent of Congress that does that of territory. In 1942, the President, by Executive Agreement, promised to return certain installations to Panama subject, however, to Congressional approval.

The precedents of the past with regard to Panama calls for congressional approval before we transfer property, and the reason they do is because the Presidents of the United States knew at that time that this principle rises above—transcends—the right of a President to transfer property without the consent of Congress:

> A similar provision is to be found in the Treaty of 1955.
>
> Involving the Panama Canal.
>
> These executive constructions are confirmed by established canons of interpretation.
>
> First, there is the settled rule that "where there is in an act a specific provision relating to a particular subject, that provision must govern in respect to that subject as against general provisions in other parts of the act, although the latter, standing alone, would be broad enough to include the subject to which the more particular provision relates."

And he is quoting directly from a Supreme Court case:

> In other words, "a broad statutory provision will not apply to a matter specifically dealt with in another part of the same act." Restated in terms of the present issue, the specific power of disposition, in which the

---

Footnotes not printed.

House of Representatives must concur, governs the general provision authorizing the President and Senate to make treaties.

Second, there is the canon that express mention signifies implied exclusion, which the Supreme Court has employed again and again: "When a statute limits a thing to be done in a particular mode, it includes the negative of any other mode." [5] The grant of the disposition power to Congress, in other words, excludes its exercise by Senate and President. The rule was invoked by the Founders; for example, Egbert Benson said in the First Congress, in which sat many Framers and Ratifiers, that "it cannot be rationally intended that all offices should be held during good behaviour, because the Constitution has declared [only] one office to be held by this tenure." [6] Under these rules it is of no moment that Article IV contains no express exclusion of "concurrent jurisdiction" under the treaty power. Having given Congress the power to dispose of public property, it follows that the President and Senate were impliedly excluded therefrom. Although this particular exclusion was not before the Court, it tacitly ratified the application of the foregoing rules of construction when it stated that Article IV *"implies an exclusion of all other authority* over the property which could interfere with this right . . ." [7]

Attorney-General Griffin B. Bell conceded in his statement before the Senate Foreign Relations Committee, September 25, 1977 (hereafter cited as A.G.), that "the specific powers granted to the House of Representatives and Congress in fiscal matters (Article I, section 7, clause 1, and Article I, section 9, clause 7, money bills and appropriations power) preclude making treaties self-executing to the extent that they involve the raising of revenue or the expenditures of funds. Were it otherwise, President and Senate could bypass the power of Congress and in particular of the House of Represenatives over the purse-strings."

The Attorney General went on to say:

Now Sections 9 and 7 are couched in quite dissimilar terms. Section 9(7) is framed in terms of flat prohibition: "No money shall be withdrawn from the Treasury but in consequence of appropriations made by law. . . ." Section 7(1), however, merely provides that "All bills for raising revenue shall originate in the House." Yet the Attorney General reads § 7(1) to preclude the President and Senate from "bypass[ing] the power of Congress and in particular of the House of Representatives over the pursestrings." What is there that distinguishes "All bills . . . shall originate in the House" from the Congress shall have power to dispose . . ."? The impalpability of the distinction is underlined by the State Department's concession that "treaties may [not] impose taxes." [8] Nothing in the Article 1, § 8(1) "The Congress shall have power to lay and collect taxes" distinguishes it from the Article IV "The Congress shall have power to dispose."

If the President may not by treaty "bypass" the power of the House to originate revenue-raising bills, or the power of Congress to tax, no more may he "bypass" its "power to dispose" of the property of the United States.

In their testimony before the Congress, Herbert J. Hansell, Legal Advisor, Department of State, and Ralph E. Erickson, Deputy Assistant Attorney General, cited a string of cases in support of "The power to dispose of public land . . . by treaty." For the most part they fall under boundary treaties or treaties with Indian tribes which, as will appear, turn on circumstances peculiar to themselves. Preliminary consider Hansell's citation of *Missouri* v. *Holland*, 252 U.S. 416 (1920). It arose out of a State challenge to the treaty with Great Britain for the protection of migratory birds which annually traversed parts of the United States and Canada. Justice Holmes, addressing the argument that the treaty infringed powers reserved to the States by the Tenth Amendment, stated:

"Wild birds are not in the possession of any one, and possession is the beginning of ownership. The whole foundation of the States' rights is the presence within their jurisdiction of birds that yesterday had not arrived, tomorrow may be in another State, and in a week a thousand miles away."

The Indian treaty cases constitute one of the pillars of the argument for "concurrent power"; and Attorney General Griffin B. Bell referred to them as "a substantial body of Supreme Court decisions dealing with Indian tribes which holds that a treaty may dispose of property belonging to the United States without implementing legislation under Article IV, section 3, clause 2".

To begin with *Jones* v. *Meehan*, 175 U.S. 1 (1899), both Hansell and Erickson quote, "It is well settled that a good title to parts of the lands of an Indian tribe may be granted to individuals by a treaty between the United States and the tribe, without any act of Congress, or any patent from the Executive authority of the United States." This was because the treaty merely *reserved* certain individual tracks from the cession to the United States. It "set apart from the tract hereby ceded [by the tribe] a reservation of six hundred and forty acres" for an individual Indian, and the issue was what kind of title did he take. The Court quoted from an opinion of Attorney General Taney, destined before long to succeed Chief Justice Marshall:

"These reservations are *excepted* out of the grant made by the treaty, and *did not therefore pass with it*; consequently the *title remains as it was* before the treaty; that is to say, the lands reserved are still held under the original Indian Title."

Which, of course, distinguishes that case and does not make it a case at all for the State Department.

The Court held that "the reservation, unless accompanied by words limiting its effect, is equivalent to a present grant of complete title in fee simple." That explanation presumably responded to the fact that tribal lands were generally held in common; individual titles were all but unknown, so that such title had to be secured to an individual through the machinery of the treaty. But that is far from a disposition of government land because, as Taney explained, the "reserved" title remained in the Indians. Many, if not most, of the Indian treaty cases involve just such "reserve" provisions.

We might dismiss *Holden* v. *Joy*, 84 U.S. 211 (1872) because, as Attorney General Bell noted, "The Court conceded that the question was immaterial in the case at bar because Congress had actually implemented and ratified that particular treaty." A.G.9.

In other words, Congress did exactly what we are saying should be done here.

Nevertheless, the Court, in what he terms a "strong dictum", stated that "there are many authorities where it is held that a treaty may convey to a grantee a good title to such lands without an Act of Congress conferring it. . ." I was at pains to study each of the cases cited by the Court for this assertion, and abstracted them in an appendix attached to my statement before the Senate Subcommittee on Separation of Powers. There you may see for yourself that half of the cases thus cited are entirely irrelevant.

I should add, these were cited by the State Department and the Attorney General—and were entirely irrelevant.

and that the rest concern "reserves" under which, as Taney observed, no title had passed to the United States, but remained in the given Indian. In considering such dicta, it is well to bear in mind Chief Justice Taney's statement that the Court's "opinion upon the construction of the Constitution is always open to discussion when it is supposed to have been founded in error, and that its judicial authority should thereafter depend altogether on the force of the reasoning by which it is supported."

By that standard the *Holden* dictum is no authority at all.

As to other treaties, Hansell tells us, "the precedents supporting the power to dispose of property by treaty alone can be found in the boundary treaties with neighboring powers, especially in the treaties between the United States and Great Britain in 1842 and 1846 for the location of our northeast and northwest boundaries. . . ." Settlements of boundary disputes are not really cessions of United States property. The Oregon boundary dispute proceeded from an extravagant claim: "Fifty-Four Forty or Fight"; the British, on the other hand, claimed land down to the forty-second parallel. Only when the dispute was settled by negotiation at 49 degrees could either party confidently assert that it had title. As a respected commentator, Samuel Crandall, observed, "a treaty for the determination of a disputed line operation not as a treaty of cession, but of recognition."

Among other examples of alleged treaty transfers of property, Hansell instances the return to Japan of the Ryukyu Islands. By Article III of the 1951 Treaty of Peace with Japan, the United States received the right to exercise "all and any powers of administration, legislation and jurisdiction over the territory and inhabitants of those islands . . ." While Japan renounced in Article II "all right, title and claim" to various territories, it made no similar renunciation with respect to the Ryukyus. Quoting the Legal Advisor of the State Department, that "sovereignty over the Ryukyu Islands . . . remains in Japan," a District Court stated that sovereignty over a territory may be transferred by an agreement of cession, but it concluded that there had been no cession. The Fourth Circuit Court of Appeals quoted a statement by Ambassador John Foster Dulles, a delegate to the Japanese Peace Conference, that the aim was "to permit Japan to retain residual sovereignty," and it held that the treaty did not make "the island a part of the United States, and it remains a foreign country for purposes of" the Federal Tort Claims Act.

In sum, Messrs. Hansell and Erickson have failed to make out a case for the President's "concurrent jurisdiction" with Congress in the disposition of United States property.

It remains to consider the arguments advanced by Attorney General Bell before the Senate Foreign Relations Committee. He cited *United States* v. *Percheman*, 32 U.S. (7 Pet.) 51, 88–89 (1833) to prove that "the Court held self-executing certain clauses of the Florida Treaty with Spain which related to the regulation of property rights in newly acquired territory." A.G.10. At the cited page it appears that Article 8 of the treaty provided, "all the grants of land made before the 24th of January 1818, by his Catholic Majesty . . . in said territory ceded by His Majesty to the United States, shall be ratified and confirmed to the persons in possession of the lands. . . ."

This article, Chief Justice Marshall held, "must be intended to stipulate for that security of private property which the laws and usages of nations would, without express stipulation have conferred."

In other words, the treaty provided that prior Spanish grants to *private* persons

---

Footnotes not printed.

should be ratified and confirmed, a provision far removed from presidential "regulation" of *public* territory. Such regulation is confined to Congress, as *Foster* v. *Neilson*, 27 U.S. (2 Pet.) 253, 314–315 (1829) held with respect to the self-same provision: the ratification and confirmation which are promised must be by the Act of the Legislature," i.e., Congress.

REMARKS IN THE LEGISLATIVE HISTORY OF THE TREATY POWER

Before discussing the legislative history adduced by the Attorney General, permit me a few words of explanation and apology. When his statement before the Senate Committee reached me late of a Saturday afternoon, as appears in my own Senate statement, I had only about two days to prepare my comments before having them typed and forwarded to the Senate Committee. Pressure of time conduces to oversights, and I was mistaken respecting a time sequence, and in following the Attorney General's erroneous identification of a motion made by Williamson and Spaight with one he attributed to Sherman and Morris. Leisure for reflection and further research has since enabled me to correct such inaccuracies and to sharpen my analysis. And it has strengthened my conviction that the treaty power was not designed to diminish the Article IV power of Congress.

For the most part the Attorney General's citations have reference to settlement of boundary disputes by treaties of peace which, as we have seen, do not involve cessions. He begins with a remark of George Mason in the Constitutional Convention, an *in terrorem* statement during a debate on whether the Senate could share in originating revenue-raising bills. Speaking for exclusion of the Senate, Mason stated that the Senate "could already sell the whole country by means of treaties," and then toned down this extravagant overstatement to that quoted by the Attorney General: "the Senate by means of a treaty might alienate territory, etc., without legislative sanction." A.G.6, 2 Ferrand 297. Mason spoke *before* the Article IV progenitor was even proposed and referred to the Committee on Detail, 2 Farrand 321, 324, and of course before the resultant "disposition" provision was debated, id 466. Manifestly his earlier remark hardly expressed the view that the treaty power overrode the as yet unborn "power to dispose."

The Attorney General's other citations will be considered seriatim.

We will go into those more as we continue this debate on these most important issues on Monday.

All I am trying to say is that we have initiatives right here and now which involves the balance of powers of our Government, our constitutional separation of powers doctrine. It is lightly overlooked and lightly regarded, not only by the administration and the State Department and the Ambassadors in this case but also even by Members of this august body, who should be most interested in protecting the rights their fellow Members in the House of Representatives and of the Congress.

I think we should not reject the opportunity and reject the demand of the House of Representatives to approve the transfer of American property.

There is one thought I would like to finish with, and it is this: I do not think it is right for us to abdicate our responsibility to adjudge constitutional issues in these treaties by saying, "Let the Supreme Court take care of it," when we know they may never take care of it, by sliding off the issue on a political question basis. I do not see how the Supreme Court could slide off it on a political question basis when one-half of Congress would not have any say at all, if the Senate fails to recognize its right to vote on the transfer of $10 billion of American property. So how can that be a political question? If they had some right to say we do, then maybe it would be a political question. But they would be deprived of their rights and I think they would be injured. Their constituencies would be deprived of their rights to have Members of Congress stand up and be counted on this issue of transferring American property.

As I said yesterday the most significant thing that occurred yesterday was that, for the first time in I think 14 years, the American people know which Senators voted for these treaties and which Senators voted against these treaties. It is significant, whichever way the ball bounces, that they know this.

I know one thing: The people in the United States of America are starting to realize that that was just the first battle, because the Neutrality Treaty is not worth anything unless the Panama Canal Treaty, which we are presently debating, and which we will debate well into the next number of weeks, is ratified.

If the Panama Canal Treaty is not ratified, if those who share my view consist of 34 Senators, 3 or 4 weeks from now, or whenever these debates come to a close, then the Neutrality Treaty will not be of much moment or value.

I might mention, also, that it is important to note that those who brought the Neutrality Treaty forth first knew that it was much more likely that it would be ratified than the Panama Canal Treaty, which is filled with ambiguities, filled with mistranslations between the Spanish version and the English version, unprotective of the United States, costly to the United States, and is much inferior to the bad treaty that the Neutrality Treaty was.

I think it is important for the people to know that those 32 votes we received yesterday were very significant, because we need only two more votes in order to defeat the Panama Canal Treaty.

Although the debate in the last 22 or 23 days has been extremely important, it is not anywhere near as important as the debate in the future on the Panama Canal Treaty.

Much of the future of this country depends on what we do during the next few weeks as we debate the second treaty. I, for one, hope that some of the ambiguities, the translation errors—there is a whole paragraph in the English version that is left out of the Spanish version, and it is substantive—will not involve the same stonewalling that we saw in the Neutrality Treaty.

I think the most significant statement that was made right before we voted on the treaty yesterday was that if these reservations and understandings, which everybody was so eager to make a deal on and get into the resolution of ratification—if they were so binding or so important, why did not we have the courage to put them into the treaty as amendments? Conversely, if the amendments were so bad, as they were stonewalled and shot down one after another, why do we have to go to the bother of trying to correct them with reservations and understandings, which, as a number of people in this Chamber know, are not legally binding on Panama, not by principles of international law and not by their own constitution?

I believe it is important for the people, as they see their Senators during the next weekend or during the Easter recess, to express their point of view. If you think this battle is over, it is not. The big battle is before us; because if the Panama Canal Treaty goes down, the people's wishes, in my opinion, will have been heard, and the Neutrality Treaty will not be of any moment.

So then it becomes incumbent upon us to try to negotiate treaties that will be fair not only to Panama but fair to this country and protective of our interests.

I say to the American people, as these men come home to chat with you, if they tell you, "Why, I protected you by getting you a reservation or understanding," you might as well know that since they are not legally binding either under international or Panamanian constitutional law they have not done anything except to protect themselves, so that they would have an argument when they get home that they have been working to try to do what is right for you.

I think it will pay everyone in America to look at the quality of the amendments that were put forth one right after the other by sincere, dedicated, insightful, and intelligent Senators, who were fighting for the American people and were stonewalled and shot down by the very same people who claim that their reservations and understandings were protective of their interests.

Why would they not vote for the amendments to the treaty itself instead of trying to put these reservations and understandings in?

The answer to that is because the President has said that if he does not get those treaties in exactly the way they are written, as bad as they are, Torrijos will not take them. I submit to you that Torrijos will take whatever we send to him as long as it is basically fair. He has to, not because of the use of force, but because he himself knows that these amendments are fair. If we do not enact some amendments to the Panama Canal Treaty we are going to be in deep trouble.

Let me just run quickly through a list of some of the substantive and highly meritorious amendments which have been defeated, voted down by these very same people who are pushing the reservations and understandings that are not protective of the American people but would like the people to believe they are. Listen to some of the meritorious amendments that almost all of these people shot down time after time, amendments that they themselves know would make the Neutrality Treaty a much better treaty and much more protective of the United States of America.

These meritorious amendments were defeated because of the leadership's wish to avoid troubling the dictator of Panama with another election. This list

is by no means exhaustive but it does give an idea of what the Senate has rejected during the course of this debate. To me these are not by any means "killer" amendments, but they are substantive improvements without which the treaty is deplorable.

On February 27, by Mr. ALLEN, an amendment allowing a continued U.S. military presence in Panama until the year 2019, if the President certified as to its necessity.

On March 7, by Mr. HELMS, an amendment allowing continued U.S. maintenance of the highly sensitive Galeta Island communications base, which is extremely important to us.

On March 8, by Mr. STEVENS, an amendment prohibiting transit through the canal of vessels of war and auxiliary supply vessels of nations engaged in armed conflict with, or belligerent to, the United States.

On March 9, by Mr. DOLE, an amendment guaranteeing the United States authority to intervene militarily when the United States alone determines that the neutrality of the canal is threatened.

You would think that that would certainly be acceptable.

On March 10, by Mr. HELMS, an amendment setting up procedures for peaceful resolution of disputes but, in the event a threat to the neutrality or security of the canal could not be resolved by peaceful methods, each party would have the right to take, unilaterally, the measures its deems necessary.

On March 10, by Mr. DOLE, an amendment allowing for continued U.S. military presence by mutual United States-Panamanian agreement after termination of the Panama Canal Treaty.

On March 13, by Mr. DOLE, an amendment allowing the United States, independence of Panama, to declare the existence of an emergency which would permit our warships head-of-the-line passage.

I could go on and on. There were a lot of amendments.

We pointed out the translation difficulties between the two, where they take their Spanish translation to mean one thing which is very favorable to them and unfavorable to us.

Do not tell me that these amendments were not stonewalled; do not tell me they were not protective of the United States; and do not tell me they were "killer" amendments. They were amendments that any red-blooded person should have passed because they would protect this country without injuring Panama.

I go back to the original point that was made by the proponents of the treaty here, and that is this: I think that what is really involved here with the stonewalling is that the proponents of these treaties really do not seem to believe in democracy. They talk about democracy but they do not want the Panamanians to vote. They are unwilling to protect this country and force another plebiscite so they can vote on whether to accept the provisions that we have tried to put into these treaties.

Mr. LEAHY. Mr. President, will the Senator yield at that point?

Mr. HATCH. If I could finish, then I will be delighted to yield.

Mr. LEAHY. I wonder if I understood the Senator correctly that he is suggesting, because some of these amendments were defeated by very large majorities of Senators——

Mr. HATCH. Almost all were defeated that way.

Mr. LEAHY. That U.S. Senators who voted against them do not believe in democracy—is that what he is suggesting?

Mr. HATCH. That is not what I said. If it came out that way I certainly will correct it. I am asking, do they believe in democracy? My question is: Do the United States Senators who have stonewalled these amendments—now that might exclude the distinguished Senator from Vermont and it might exclude many others—really believe in democracy? By stonewalling these amendments, which are protective of the United States and which almost everyone I have talked to, including proponents and opponents, has admitted are protective, do they believe in democracy? Is it democratic to deny the Panamanians a chance to vote on amendments to the treaty? Is it democratic to deny the House of Representatives an opportunity to approve the transfer of property?

Mr. LEAHY. I might suggest to the Senator from Utah that any time someone has voted contrary to an amendment that I proposed I might have questioned that Senator's judgment, I might have prayed for his soul and redemption, but I have never ever questioned his belief in democracy or his belief in the United States of America.

Mr. HATCH. I have not named any Senators. I am saying this: I am asking a question, do they believe in democracy?

How about this matter of the House vote? The 435 representatives of the people, according to the leadership, are going to be denied their right to appear and vote on these matters, vote on the transfer of American property, as I said, $10 billion worth of American property. I think that we should be pretty solicitous of our brethren over in the House of Representatives because it goes right to the heart of the separation of powers doctrine.

What I am saying is, are we protecting our brethren in the House of Representatives? Are we projecting our own democratic and constitutional rights?

Do we understand that the Panamanian people deserve to vote even on some of these issues; and is not our duty, our highest sworn duty to uphold the Constitution and also to protect the people of the United States first?

And back to the major point: The fact that the Supreme Court might or might not be able to resolve this difficulty does not negate or take away the responsibility or the obligation of Senators in the U.S. Senate to determine constitutional questions.

I think we owe it to our bretheren in the House of Representatives, and I for one am going to argue that they should have that opportunity. I think they have made some pretty strong arguments as they have testified before some of the committees; and it was interesting to me, if you look at the list of the 232 Congressmen who have demanded the right to vote on these matters, that they comprise the chairman and ranking minority members of an awfully large number of committees over in the House of Representatives. These people are not stupid and these people do not like to be prohibited from voting on the transfer of American property, whether they are for or against the treaties; and some of them are said to be for and some of them are against.

I think our first consideration is to determine what is best for America, what is the best for our people and still, at the same time, keeping in mind what is fair to Panama, what is moral, just, and right to Panama.

As my colleagues know, I have never advocated that we should stick with the 1903 treaty, not from the beginning of this controversy until now. I have always said we need to at least upgrade that treaty, even though it has been upgraded twice in the 1936 and 1955 amendments to it.

I think we certainly should improve upon these treaties if we can, get rid of the imbiguities and the difficulties so that future problems, which we can foresee now, will not rise up and cause us greater difficulty and discord than we are already undergoing.

I think that is the danger we are facing in this matter. We have not begun to scratch the surface of the constitutional issue, and I suppose we will be into that issue on Monday.

It is my understanding we are going to discuss two agricultural bills on Tuesday, so I suppose it will take Monday, Wednesday, and maybe longer because there is a lot of feeling on this issue in the Senate.

I would just like to encourage my colleagues in the Senate on the other side of this issue that regardless of whether they want the treaty or not, they ought to seriously consider not abdicating our power and giving it to the President through an extension of power which he presently does not have under the Constitution.

I did not take time today to go through some of the other statements of eminent authorities in this area who happen to agree that the House should vote in this particular area, but we will not go into those. We will go into whatever the necessary cases are as we discuss this great constitutional question in the future.

I think it is important, however, to ask the questions of what are we here to do. Are we here to rubberstamp a treaty in favor of Mr. Torrijos? Are we here to please Mr. Torrijos? Or are we here to please the people of the United States of America?

I personally feel that the reservations and understandings charade was exactly that. The only reason we went through that basic charade was in order to get some argument settled with respect to certain Senators who were very concerned about their constituencies. If those things are important for the treaties, let us get them in as amendments so they are binding on both nations.

If the amendments are not important we can vote them down. But as we present decent amendments we ought to at least consider voting on what is right, and as we consider the constitutional issues I hopefully urge my colleagues in the Senate to consider them as deeply as they can and to consider with everything they have the rights of the full Congress in this matter, the specific language of the Constitution, the case law of the past, and the rights of our brethren over in the House.

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I expect we will not be here much longer this afternoon, and I would hope, notwithstanding the fact that it is St. Patrick's Day and, perhaps, some share ancestry with me, some of the people in this country who share ancestry with me, might have found their loyalties torn this afternoon between certain celebrations that are known to take place in the country on March 17 and their overriding desire to sit by their radio and listen to every word of our debate today, that it is conceivable that we may not have a total radio population left at this point on Friday afternoon, and that maybe a percentage, possibly even a significant percentage, of the American people are not dropping everything right at the moment to listen to every word of our debate.

But for those possibly dwindling numbers who are still there, I think it is a fact that they should know that the Senate is well aware of the Constitution, is well aware of the history of the Constitution, is well aware, as is the Senator from Vermont well aware, of the fact that the Senate advises and consents to treaties, not the House of Representatives, but that the Senate advises and consents to treaties and has in this case and will continue to do so in this case. But for those who have been listening to the debate today, who are at home concerned, perhaps almost overridden with fear, that the House of Representatives will not have a chance to vote on this issue, and those Members of the other body who maybe have had nothing on their minds in recent weeks but their grave and overwhelming disappointment that they also would not get a chance to vote on the treaties, I say that there is a light for them and that they could put aside to some extent their fears and join with those of us who have an Irish ancestry in celebrating our favorite saint's feast day today because, Mr. President, they will have a chance to vote on some aspects of this.

All the implementation legislation will have to be voted on in the House. I know that this will come as a great relief to the Members of the House because I know how eagerly every one of the 435 Members wants a chance to vote either for or against the Panama issue, and when implementation legislation reaches there, they will vote on it with an eagerness probably surpassed only by a chance to vote on the pay raise.

As I stated earlier, if you will recall the person-by-person poll last year of the House of Representatives when it looked as if they would not have a chance to vote on the pay raise, when it was, as a result of that poll, found that the pay raise would lose, I think it was by a 4- or 5-to-1 margin, then somehow something slipped up and they got a chance to vote on it, and the pay raise was passed. And those of us who had voted against the pay raise were by that action forced, obviously forced, against their wills to accept the pay raise.

So I say that even though I suspect that most Members of the other body have been unable to enjoy St. Patrick's Day for fear that they might not get a chance to vote on the Panama issue, they will indeed get to vote on it on the implementation, as will we all, for that matter. Those of us who, like myself, serve on the Appropriations Committee, will get a chance to vote on it twice, both in committee and on the floor.

Mr. President, that is all I have to say today, and I yield to my distinguished colleague from Maryland, Mr. SARBANES.

Mr. SARBANES addressed the Chair.

The PRESIDING OFFICER (Mr. MATSUNAGA). The Senator from Maryland (Mr. SARBANES) is recognized.

Mr. SARBANES. I want to thank the very able Senator from Vermont (Mr. LEAHY) for giving us St. Patrick's Day here on the floor of the Senate.

Mr. President, I am not going to take the time of my colleagues in any extended fashion, but I do want to make some observations about the Panama Canal Treaty.

The treaty concerning the permanent neutrality and operation of the Panama Canal having been advised and consented to on yesterday by the Senate by a vote of 68 to 32—and I am always struck by the treaty requirement and the extraordinary majority it makes necessary in the Senate of the United States, for every vote against the treaty it is necessary to have two votes for the treaty. A 68 to 32 vote on any issue of difference or controversy is a very considerable margin, but it does not exceed by all that much what is required to pass a treaty, so the treaty requirement, the two-thirds requirement, is really a very heavy burden to carry.

I think it reflects well on the merits of the substantive provisions of the treaty that the Neutrality Treaty commanded a 68 to 32 margin. That having been concluded we now move to the Panama Canal Treaty, which is now pending before the Senate, which we will have to deal with in a similar fashion, as article by article it is opened for amendments. I understand there are a number of amendments pending at the desk. Is the information readily available, Mr. President, as to how many amendments there are pending to this treaty?

The PRESIDING OFFICER. There are 51 amendments, reservations, declarations, and understandings at the desk, a total of 51.

Mr. SARBANES. How many amendments are there to the text of the treaty? Is it 40?

The PRESIDING OFFICER. The Chair will determine. There are 38 amendments to the treaty.

Mr. SARBANES. I thank the Chair.

Mr. President, in the course of considering this treaty, the 14 articles which make up the Panama Canal Treaty, I am sure we will discuss many of the provisions in some detail. I simply want to underscore, since this is the treaty which applies to the 22-year period between now and the end of this century, that some of the provisions which are in this treaty accord very extensive rights to the United States.

Under the treaty, the United States is granted rights necessary to regulate the transit of ships through the Panama Canal and to manage, operate, maintain, improve, protect, and defend the canal. Those are rights which the United States will have.

Among those rights in article III, which is the article which discusses the canal operation and maintenance, it is stated:

In carrying out this function of managing, operating, and maintaining the Panama Canal, its complementary works, installations, and equipment, and to provide for the orderly transit of vessels through the Panama Canal, the United States may do a number of things, including the following:

Use for the aforementioned purposes, without cost except as provided in the Treaty, the various installations and areas (including the Panama Canal) and waters, described in the Agreement in Implementation of this Article as well as such other areas and installations as are made available to the United States under this treaty and related agreements.

Second, the United States can make such improvements and alterations to the aforesaid installations and areas as it deems appropriate consistent with the terms of the treaty;

Third, the United States can make and enforce all rules pertaining to the passage of vessels through the canal and other rules with respect to navigation and maritime matters;

Fourth, the United States can establish, modify, collect, and retain tolls for the use of the Panama Canal, and other charges, and establish and modify methods of their assessment;

Fifth, the United States regulates relations with employees of the U.S. Government; and

Sixth, the United States will provide supporting services to facilitate the performance of its responsibilities.

Those are rather extensive rights, and those are the rights, among others—because the treaty goes on to set out some general provisions—which the United States will have over the next 22 years in the operation and the management of the Panama Canal. Of course, once we reach the end of the century, the transition will be accomplished with the operation and management of the canal then being done by the Republic of Panama.

The treaty further provides that in carrying out this function of managing and operating the canal it shall be done by a U.S. Government agency to be known as the Panama Canal Commis-

sion. Nine members, five of them Americans and four of them Panamanians, will comprise the Commission.

They will be the board which will supervise the work of the Panama Canal, five of whom shall be nationals of the United States and four of whom shall be Panamanian nationals proposed by the Republic of Panama for appointment to such positions by the United States of America in a timely manner.

So the majority, five, will be Americans and the remainder, four, will be proposed by Panama to the United States for appointment.

The treaty also provides that the United States shall have primary responsibility to protect and defend the canal. There is an agreement, comparable to a status-of-forces agreement, which has been negotiated to cover the rights of our military people and their dependents. We will have the primary responsibility to protect and defend the canal.

To facilitate cooperation of the Armed Forces of both countries in the protection and defense of the canal—and this is an effort to work out a cooperative relationship between the United States and the Republic of Panama—there will be a combined board established by the United States and the Republic of Panama comprised of an equal number of senior military representatives of each party. These representatives shall be charged with consulting and cooperating on all matters pertaining to the protection and defense of the canal, and with planning actions to be taken in concert for that purpose.

So there is a combined board that will consult and advise and plan.

The treaty goes on to provide that such combined protection and defense arrangements shall not inhibit the identity or lines of authority of the Armed Forces of the United States of America or the Republic of Panama.

While we have this combined board for the purposes of consultation, for the purposes of advice, the lines of authority of our Armed Forces are not inhibited. Of course, as I mentioned earlier, under another provision of this treaty the primary responsibility to protect and defend the canal is in American hands.

I think it is clear under these two articles I have been quoting, article III and article IV, that both in terms of operating and managing the Panama Canal and in terms of protecting and defending the Panama Canal, it is the United States which is given the powers and authorities under this treaty to meet those responsibilities.

Other provisions in the treaty provide for a shared effort in trying to protect the environment in the Republic of Panama, something important to both countries. The United States, of course, depends, as do all countries who seek to use the canal, on the watershed contained in the Republic of Panama to produce the water to make it possible for the canal to function.

There are also in article VIII very extended provisions giving the United States certain privileges and immunities in the course of our operations.

Let me just read a couple of those so we can have some appreciation of the range and extent of the privilege and immunities which the United States will have.

Agencies and instrumentalities of the Government of the United States of America operating in the Republic of Panama pursuant to the treaty and related agreements, shall be immune from the jurisdiction of the Republic of Panama.

There is also a provision that installations owned or used by the agencies or instrumentalities of the United States of America operating in the Republic of Panama pursuant to the treaty and related agreements, and their official archives and documents, shall be inviolable.

So there is an effort here, recognizing the responsibilities which the United States will continue to have over the next 22 years, almost a quarter of a century, with respect to operating, managing, protecting, and defending the Panama Canal, to give to us a grant of rights sufficient to carry out those responsibilities. I think that grant is very important. I think that many people do not fully appreciate how extensive and extended those grants of authority are in terms of giving the United States the ability to continue to meet is responsibilities with respect to the Panama Canal.

There are other provisions in the Panama Canal Treaty that deal with the transition over to Panama of various functions in the Canal Zone. Under the treaty the zone will cease to exist as a corridor of land dividing the Republic of Panama in two and, in effect, will become part, just like any other part, of the territory of the Republic of Panama. Certain rights will be reserved for the operations of American Government agencies and certain protections provided for American employees, military and civilian, and their dependents and families, who are involved in the Republic of Panama in helping to carry forward the operation, management, protection, and defense functions with respect to the Panama Canal. But the zone dividing the country into two will be gone. So that situation, an American extraterritorial presence, will no longer be the case.

Now, at one point in the debate, someone suggested that only a small portion of the population of Panama was on one side of the Canal Zone, that most of the population was on the other side; and therefore, they suggested it really should not matter very much to the Panamanians that their country was divided by this zone. Mr. President, how can we overlook the sensitivity of any people to another power controlling a strip of land through their country and thereby dividing their nation. I can understand the sensitivity that any people would have—I think we in the United States would be extremely sensitive in the reverse situation. In fact a good percentage of the population of the Republic of Panama is located on either side of this Canal Zone and it really does therefore in every sense, divide the country into two. Panamanians, when traveling through the zone are in effect, traveling through another jurisdiction. They are subject, then, to different courts and different police, and so forth. One of the things that will take place under the treaty is that there will no longer be a zone dividing the Republic of Panama into two, with all of the problems that have come with that situation.

Mr. President, there are some very careful provisions contained in this treaty with respect to employment: First of all, an effort to protect those people already working on the Panama Canal and their particular rights; and second, an effort to give an opportunity to include the Panamanian people more and more in the work of the Panama Canal; so that, over time, they, in effect, will gain the experience and the training that will be necesesary to manage, conduct, operate, and maintain this important facility when at the end of the century they assume full responsibility. There are some very careful provisions that have been worked out to accomplish this, I think reflecting a great deal of concern, for those who are already working there and also a concern that the people of Panama should have an opportunity to participate in making this canal work. In a sense, it is a great opportunity to show the benefits of mutual cooperation and a great opportunity for young people and not-so-young people in the Republic of Panama to develop the skills that will enable them to operate this major facility.

Almost 80 percent of the work force today on the Panama Canal are Panamanians. It has grieved me greatly, in the course of some of the debate that we have had on this issue, to have it suggested by some on the floor of the Senate that the Panamanians may not be capable of operating the canal, that they do not have the capacity to conduct this major facility. I think that is nonsense. The work of the canal today is largely carried on by Panamanians.

On a visit to Panama, meeting with employees who work on the canal, one of the inquiries that was made was how effective the Panamanians were as employees. The response we received was that they were the equal in every respect to other employees, Americans or others, who were working on the canal. I think it is clear that the capacity is there.

What is needed is the opportunity. These treaties hold out an opportunity to the people of Panama to move increasingly into higher positions and to assume, more and more, the responsibility for the operation of this canal.

In that sense, it is a great opportunity, not only for them but for the United States, working with the people of Panama in order to assure the efficient and effective operation of this canal indefinitely into the future.

Mr. President, there are other provisions in the treaty which I am sure we will discuss at much greater length—a provision for a sea-level canal and the provisions for Panama's economic participation in the canal, in which the tolls will provide certain payments to the

Republic of Panama, which, of course, will then bring them a return on their greatest natural asset commensurate with what they have devoted to this international waterway.

In short, Mr. President, the treaty now before us, the Panama Canal Treaty, that we are now considering, having approved the other treaty 68 to 32, offers the opportunity to develop between the United States and the Republic of Panama and between the peoples of our two countries a cooperative relationship which can be an example to the whole world. At the same time, it insures certain grants of rights to the United States which will fully enable us to meet our role to operate and manage the canal and our role to protect and defend the canal, since we will have the direct responsibility for both of those functions for the balance of this century, for almost another quarter of a century.

I submit, Mr. President, that this treaty, just like the one that has been approved, is a treaty that well serves important basic American interests and ought to command the approval of this body.

Mr. SARBANES. In the days ahead I know we will consider some 40 amendments, or those, at least those that will be called up that are pending at the desk. I hope we will be able to proceed, as I have indicated earlier in the debate, in an expeditious way to do that.

Someone said earlier today that the first treaty was like an exhibition game and that this was the real game. I differ with that. It is really like a doubleheader. You know, we have had just a brief pause in between and we are now into the second game of the doubleheader.

I must say, if you talk about cooperation between the United States and Panama, referring to baseball, I end on this note: A major sport in Panama is baseball. They are close to us in so many ways and this is but another example. Rod Carew who is such an extraordinary performer in this country and as I think many people know, he is a Panamanian citizen. He has been the batting leader in the American League now for a number of years with an extraordinary average, almost .400 last year, and I only bring that up at the close of this afternoon to underscore once again how much, in so many ways, we share as two peoples; and I hope that the debate that we have had over the course of the past weeks will not in any lasting way do anything to harm the relationship or weaken the friendship which has existed between the people of this country and the people of Panama.

It has been a special friendship. I hope that we will move ahead to approve this treaty, and that we will do it in such a way that the strength of the ties between our two countries will develop and increase.

Mr. PROXMIRE. Mr. President——

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I ask unanimous consent to be allowed to proceed for 2 minutes, as in legislative session.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

WHY WE MUST RATIFY THE GENOCIDE TREATY

Mr. PROXMIRE. Mr. President, I ask the Senate's consideration of an admittedly unpleasant scenario. Assume that somewhere in the world, a group of individuals perpetrates the brutal mass murder of another group because of racial hatred. Not unreasonably, there would be an overwhelming call for the punishment of this group. I would expect Americans to be among those who speak out for such retribution.

Now consider how other nations would react to our condemnations. For nearly 30 years, we have consistently refused to ratify a treaty, the Genocide Convention, which condemns these very actions. Would it be unreasonable for other nations to label our disapproval hypocritical? I doubt it.

Of course, I am aware that countless groups within this country have supported the treaty. Every President since the drafting of the treaty has given the same support. And I would assert that the great majority of Americans feel the same way. Yet, the fact remains that through the Senate's failure to ratify the treaty, the United States has officially failed to condemn acts of genocide. This reluctance has not been unnoticed by the rest of the world.

Failure to ratify the treaty also places us in a difficult position with any genocide trials which might result. The Genocide Treaty prescribes what does and does not constitute genocide. This insures that there is no de facto punishment. It is a fair method for trying those accused of genocide; by failing to ratify the treaty, we have failed to endorse this sound procedure.

To prevent the embarrassing situation I have presented, it is necessary for us to ratify the Genocide Treaty. Eighty-three countries have gone on record as being unalterably opposed to this abhorrent crime. Let us be included in this group.

PARAQUAT-CONTAMINATED MEXICAN MARIHUANA POSES SERIOUS HEALTH RISK TO MANY AMERICANS

Mr. PERCY. Mr. President, recent reports have come to my attention, and have now been made available to the public, indicating that more than 20 percent of the samples of marihuana seized at the Mexican border are contaminated with the herbicide, paraquat; that when analyzed, these samples are showing increasingly higher amounts of paraquat residues; that tests now conclusively established that the highly toxic paraquat is in fact found in the smoke of sprayed marihuana which is inhaled into the human body; and that such inhalation, particularly with prolonged exposure, may seriously impair the ability of the lungs to absorb oxygen—a condition known as fibrosis.

The U.S. Government has provided the Government of Mexico with millions of dollars—some $40 million over the last 3 years—for equipment and technical assistance related to the spraying of poppies with herbicides. Much of the funds have gone toward the purchase of planes and spraying equipment, the training of personnel, and repair and maintenance expenses—all, in turn, used by the Mexica Government not only for poppy eradication, but also for the spraying of marihuana fields. Mexican marihuana, which comprises about 60 percent of the hundreds of tons of marihuana brought into this country annually, is being sprayed with paraquat.

In May 1977, I requested information from Secretary of State Vance concerning the spraying of Mexican marihuana and the U.S. involvement in such programs. Pursuant to this request, an interagency meeting was held under the auspices of the White House Office of Drug Abuse Policy (ODAP), which included representatives from the National Institute on Drug Abuse (NIDA), the Department of State, the Drug Enforcement Administration (DEA), the Food and Drug Administration (FDA), the Environmental Protection Agency (EPA), and the Department of Agriculture for the purpose of developing a plan for paraquat testing. The meeting was chaired by Dr. Peter Bourne, the very able Director of ODAP and Special Assistant to President Carter.

As an outgrowth of that session, tests were designed to determine if the smoking or consumption of paraquat-tainted marihuana posed a serious health hazard to a portion of the 13 million regular marihuana users in this country.

Now, 10 months later, these tests, conducted by the National Institute on Drug Abuse, have produced definitive and highly disturbing results. In a March 12, 1978 release, HEW Secretary Joseph Califano, Jr., reported that, based upon samples actually seized, approximately 21 percent of the marihuana now coming into this country is contaminated with paraquat. The maximum level of contamination which EPA currently allows in this country is 0.05 parts per million. Yet, the NIDA reports disclose that some paraquate residues on Mexican marihuana are above 2,200 parts per million—one batch tested at as high as 2,264 ppm. That is 40,000 times the EPA tolerance level. The average approximated 450 ppm.

Surely, the hazards of such levels of paraquat in marihuana, and the associated risks affecting so large a segment of the American public, including millions of its younger citizens merit an immediate response by this Government.

Secretary Califano issued a warning that marihuana contaminated with the herbicide paraquat could lead to permanent or irreversible lung damage for regular and heavy users of marhauna, and conceivably for occasional users as well. The new findings clearly indicate the need for swift action on the part of this Government to insure the health and welfare of a significant number of our citizens. These citizens are endangered as a result of our own Government's involvement, however direct or

indirect, in Mexico's program to spray marihuana fields with paraquat. The health risk is evident and it is serious: we cannot afford to wait for another protracted period before doing everything possible to induce the Mexican Government to terminate the use of paraquat in its spraying program, or to substitute a safer herbicide.

Such a safer herbicide does not now appear to be available. To wait any length of time before one is identified—without in the interim doing anything to urge Mexico to suspend its current paraquat spraying program—could needlessly endanger a large segment of our population. This administration, through the Department of State, should do everything possible to get the Mexican Government to act responsibly and with dispatch in this respect. Having met yesterday morning on this matter with administration officials, I am not persuaded that, as a government, we have done or are doing everything we can.

On the other hand, having received a response 2 days ago from Secretary of State Cyrus Vance to my letter of last week, I am hopeful that his own expressed concern for the problem and his assurance that he "will do everything possible to resolve it" signals that corrective action is forthcoming. I trust that his message will get through to all segments of the State Department and the administration which may have a role in addressing this concern. I was most disturbed, last Friday evening, March 10, 1978, to hear Secretary Vance's special assistant for narcotics matters tell a nationwide NBC-TV audience that she felt the Department had no responsibility to deal with this matter since the drug involved, marihuana, was illegal anyway. This would seem to overlook reality. To Secretary Vance's credit, his direct response acknowledges the responsibility of the United States in this regard, and his personal expression of concern belies the earlier position taken by his aide.

Mr. President, so that the background of this problem is clearly stated, I ask unanimous consent to have printed in the RECORD the following materials relevant to this matter: My correspondence with the Department of State and with the White House Office of Drug Abuse Policy; the warning issued last week by DHEW Secretary Joseph Califano, upon being apprised by NIDA of the new, disturbing test results; the preliminary report of DHEW, entitled: "Contamination of Marihuana with Paraquat"; a White House press release dated December 9, 1977, which dealt with the problem.

I also ask unanimous consent to append to my remarks a copy of an article by Jeffrey Smith, from the February 24, 1978, edition of Science magazine, entitled, "Spraying of Herbicides on Mexican Marihuna Backfires on U.S.". This excellently researched article provides considerable information on the herbicide paraquat, the history of its use, and important background on this subject. And finally, I also include a fine article by Ken Bode from the March 18, 1978, edition of the New Republic magazine, entitled "Poisoned-Marihuana."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HEW NEWS

HEW Secretary Joseph A. Califano, Jr. today warned that marihuana contaminated with herbicide Paraquat could lead to permanent lung damage for regular and heavy users of marihuana, and conceivably for other users as well.

The Secretary issued the warning based on preliminary studies conducted by HEW's National Institute on Drug Abuse. Paraquat is a herbicide which is sprayed on marihuana plants in Mexico to destroy them, under a program operated and funded by the Mexican government. The contaminated marihuana, which may be disguised for street sales by mixing it with other marihuana, is not easily detected by the average user.

Secretary Califano said, "The report's preliminary findings suggest that if an individual smokes three to five heavily contaminated marihuana cigarettes each day for several months, irreversible lung damage will result. The report cautions, however, that there could also be a risk of lung damage for individuals who use marihuana less often or in smaller amounts. Although these results are preliminary, the report concludes that Paraquat contamination may pose a serious risk to marihuana smokers."

Secretary Califano indicated that a report on the preliminary findings has been sent to the White House Office of Drug Abuse Policy, the Departments of State, Justice, and Agriculture, and the Environmental Protection Agency, to permit these agencies to investigate whether there might be alternative herbicides which might be considered as potential substitutes for Paraquat.

Marihuana sprayed with Paraquat can be quickly harvested before the plant dies and in such cases harvested marihuana contaminated with Paraquat may find its way into this country. Roughly 60 percent of marihuana in the United States is illegally imported from Mexico. During the past year, concern has been expressed by the public over the health hazards posed by Paraquat contaminated marihuana.

In chemical analyses of 63 marihuana samples confiscated in the Southwestern United States by the Drug Enforcement Administration from October 1976 through late 1977, the National Institute on Drug Abuse found 13 samples (21 percent) to be contaminated with Paraquat with an average level of 450 parts per million.

Paraquat has been used in this country since the early 1960s for agricultural purposes. However, it does not persist in the soil and presents little hazard when used in the amounts precribed for agricultural crops. The maximum level of contamination that is permitted for domestic uses is 0.05 parts per million, which is far below the levels found in the marihuana samples tested.

CONTAMINATION OF MARIHUANA WITH PARAQUAT: PRELIMINARY REPORT

MARCH 11, 1978.

Since 1975, the Mexican Government has operated a marihuana eradication program. The principal herbicide employed in this program is Paraquat 1,1′ dimethyl-4,4′ bipyridinium dichloride, a chemical patented in England and manufactured in this country and in Mexico. Paraquat is sprayed from aircraft onto marihuana plants, and the herbicide interacts with sunlight to cause the plants to die within the course of roughly forty-eight hours. This eradication program is operated and funded by the Mexican Government.

Paraquat has also been used in this country since the early 1960's for agricultural purposes. The most common use of Paraquat is as a means of cleaning the seedbed before planting crops, but it is also employed for such purposes as weed control in fruit orchards and as an aid in harvesting mature plants such as cotton and soybeans. Paraquat does not persist in the soil and presents little hazard when used in prescribed amounts. It is one of 23 herbicides which the Environmental Protection Agency (EPA) is proposing to restrict only to trained farmers and users. The use of Paraquat on food crops as a direct harvesting aid is not recommended by the EPA. Use in orchards for weed control can result in some contamination of the fruit, but this contamination must not exceed 0.05 ppm prior to marketing.

Paraquat in concentrated form is highly toxic and has been responsible for at least 25 deaths in the United States due to accidental poisoning. It tends to concentrate in lung tissue whether it is ingested or inhaled The toxic reaction with the lung produces a condition called fibrosis, which reduces the capacity of the lung to absorb oxygen. Inhalation of Paraquat creates a greater risk of lung damage than ingestion of an identical amount.

During the past year, concern has been expressed about the possibility that Paraquat-contaminated marihuana was entering the United States and might pose a health hazard to marihuana users. Marihuana sprayed with Paraquat can be quickly harvested before the plant dies and in such cases harvested marihuana contaminated with Paraquat may find its way into this country. Roughly 60 percent of marihuana in this country is imported from Mexico.

As a result of this concern, a study was initiated last summer at the National Institute on Drug Abuse to answer two specific questions: (1) Is contaminated material entering the country in any significant amount; and (2) What are the chemical constituents of the smoke from Paraquat-contaminated marihuana which might create health risks beyond those presently associated with marihuana smoking.

STUDY RESULTS

These studies have provided the following data:

1. One hundred samples of marihuana confiscated by the Drug Enforcement Agency have been chemically analyzed for Paraquat. The average weight of the seizures from which these samples were taken was 699 lbs. All of the samples which were tested for Paraquat came from the Southwest United States, the area where contaminated samples are most likely to be found.

Thirteen of these were unambiguously identified as contaminated with Paraquat. All were confiscated after October 1976, and constitute 21% of the 63 samples tested that were confiscated after that date. The contamination ranged from three to 2,264 parts per million (ppm), with an average contamination of 452 ppm. This level far exceeds the 0.05 ppm level that is tolerated for domestic uses.

Since the sampling was not random in a statistical sense, no clear extrapolation of this data can be made to estimate the total amount or distribution of Paraquat-contaminated marihuana in the United States. No attempt was made to design a statistically valid random sample selection since the intent was only to answer the question of whether contaminated material was entering the country and the approximate level of its contamination.

2. Marihuana plant material which was treated with a Paraquat solution in order to produce a "contamination" level of approximately 10,000 ppm was burned in an apparatus designed to collect all the smoke produced. This artificially high concentra-

tion was prepared to expedite the analytical procedures. The apparatus is constructed of glass and allows the plant material to burn in an air atmosphere at a temperature similar to that of a marihuana cigarette. Although this method of burning is not exactly the way marihuana burns in a cigarette, it is sufficiently analogous to provide data which can be generally related to the real smoking situation.

The smoke was subjected to chemical analysis and it was determined that the major compound in the smoke resulting from the presence of Paraquat was a compound called bipyridine, which is formed from the chemical breakdown of Paraquat when it is burned. Bipyridine is a compound found in tobacco smoke, and is not itself likely to contribute significantly to the toxic effect of marihuana smoke.

However, it has also been determined that a small amount of Paraquat is carried in the smoke, although the exact amount of Paraquat resulting from the burning of plant material at a specific contamination level has not yet been determined. Efforts to obtain more exact determinations are in progress. However, rough estimates from the data in hand suggest that approximately 50 to 250 nanograms of Paraquat can be expected to be present in the smoke from a single marihuana joint contaminated at 450 ppm Paraquat. Analysis is also being carried out on the smoke from Mexican-variety marihuana grown at the United States Department of Agriculture and treated with Paraquat under simulated field conditions. Only when this analysis is complete will it be certain that the conclusions from the 10,000 ppm material discussed above are completely valid.

PRELIMINARY CONCLUSIONS

1. Considering the low-dose, chronic studies done in animals, it appears that the oral administration of marihuana treated with Paraquat (e.g., in brownies) probably creates little hazard. An individual would have to ingest approximately two full ounces of marihuana every day for two years (at contamination levels of 2,000 ppm) to reach the lowest dose level where cell damage has been observed in animals.

2. Smoking marihuana containing paraquat presents the greatest potential hazard. Studies of animal inhalation and of agricultural workers engaged in repeated spraying of Paraquat, when combined with other evidence, suggest that there exist certain risks to the marihuana smoker.

First, heavy users of marihuana run a possible risk of fibrosis which could be clinically measurable if the marihuana they smoke is contaminated with Paraquat. A rough estimate can be made that an individual who smokes three to five marihuana cigarettes each day could suffer measurable lung impairment after several months if the marihuana contained at least 450 ppm of Paraquat. It is less likely, though not inconceivable, that clinically measurable damage could be suffered by individuals who consume marihuana in smaller quantities, less regularly, or with lower levels of Paraquat-contamination. These risks of suffering fibrosis—which is an irreversible condition—must be considered against the use patterns of marihuana in this country. Recent surveys conducted by the National Institute on Drug Abuse suggest that nearly nine million Americans have used marihuana over 100 times in their life. Thus, contamination of marihuana with Paraquat may pose a serious additional risk for marihuna smokers.

Second, adverse effects on the lungs from the tar in marihuana smoke have been documented in the scientific literature. It is possible that the effects are increased by the contamination of marihuana with Paraquat, but there are no clear data presently available on this point.

There is no evidence at present that Paraquat is carcinogenic to lung tissue, but studies in this area are incomplete.

A final report of the technical details of these studies will be prepared within the next four to six weeks and provided to the Departments of State, Justice, and Agriculture, the Environmental Protection Agency, and the Office of Drug Abuse Policy.

THE SECRETARY OF STATE,
Washington, D.C., March 15, 1978.

Hon. CHARLES H. PERCY,
Ranking Minority Member, Subcommittee on Investigations, Committee on Governmental Affairs, U.S. Senate

DEAR SENATOR PERCY: Thank you for your letter of March 9 in which you expressed your concern that Mexican grown marijuana illegally entering the United States and sprayed with the herbicide paraquat in the Mexican eradication program could be harmful for users of marijuana in the United States.

In response to your letter to me of May 6, 1977, on this potential danger to American marijuana users, the Department indicated that it shared your concern that the means employed to control illicit drug abuse and international narcotics traffic do not result in individual suffering or ecological damage.

An interagency inquiry into the problem was authorized by the White House in May 1977. As you know, Secretary Califano released the preliminary findings of the study on March 11. The report concludes that paraquat contamination may pose a serious risk to marijuana smokers. Secretary Califano is sending copies of the report to the Departments of State, Justice, and Agriculture, and the Environmental Protection Agency to determine what action they might take in regard to reducing the health hazard of paraquat being sprayed on marijuana.

In view of the conclusions of the interagency study, the findings will be made available promptly to the Government of Mexico. Additionally, information concerning alternative herbicides which might be substituted for paraquat in the Mexican eradication program and which pose less of a health hazard will be passed to the Mexican Government.

On the basis of the excellent cooperation demonstrated by the Mexican Government in carrying out its international treaty obligation in narcotics control, we can assume that Mexico will examine the results of the new HEW study carefully with appropriate consideration for any health hazards that may affect its citizens or citizens of any other country.

The Mexican Government's decision in November 1975 to use aerially sprayed herbicides followed a careful study of the herbicides selected, 2-4-D against opium poppies and paraquat against marijuana, with consideration that the herbicides should be safe for man and environment, as well as effective in destroying the illegally grown plant.

As you know, the Governments of Mexico and the United States are parties to the Single Convention on Narcotic Drugs of 1961, which specifies in Article 22 as amended, that a party prohibiting cultivation of the opium poppy or the cannabis plant shall take appropriate measures to seize any plants illicitly cultivated and to destroy them. Thus, Mexico has taken seriously its obligation to destroy narcotics plants, but its Government has made it clear that in attempting to alleviate the harmful effect of illicit drugs, it also intends that its narcotics control efforts would be carried out in a manner that would avoid an adverse effect on the ecology or the health of its citizens.

The primary interest of the U.S. Government in supporting the Mexican eradication program through international narcotics assistance is to reduce the movement of illicit heroin entering the United States. The Mexican eradication effort against opium poppies is showing a significant reduction in heroin in the United States based on declining heroin overdose deaths, increased price levels, and declining purity levels based on hercin seizures. Consequently, the program is reducing drug abuse in the United States. This progress, which is obviously in our best interests, must be maintained along with efforts being made to reduce the health hazard of paraquat contamination of marijuana.

You may be assured that I personally share your concern with this problem and will do everything possible to resolve it.

Sincerely,

CYRUS VANCE.

COMMITTEE ON GOVERNMENTAL AFFAIRS, SENATE PERMANENT SUBCOMMITTEE ON INVESTIGATIONS,
Washington, D.C., March 9, 1978.

Hon. CYRUS R. VANCE,
Secretary, Department of State,
Washington, D.C.

DEAR MR. SECRETARY: Recent reports have come to my attention indicating that more than 20 percent of the samples of marijuana seized at the Mexican border are contaminated with the herbicide paraquat; that when analyzed, these samples are showing increasingly higher amounts of paraquat residues; that tests now conclusively establish that the highly toxic paraquat is in fact found in the smoke of sprayed marijuana which is inhaled into the human body; and that such inhalation, particularly with prolonged exposure, may seriously impair the ability of the lungs to handle oxygen—a condition known as fibrosis.

I wrote you on May 6, 1977, requesting information on the United States' involvement in the spraying of the toxic herbicide, paraquat, on Mexican marijuana fields. On July 18, 1977, I wrote Dr. Peter Bourne, Special Assistant to the President, urging him to expedite the conduct of tests aimed at determining the health risks associated with paraquat-treated marijuana. By December, the White House reported that samples seized at the border showed "about 50 parts per million (ppm)" of paraquat. The White House release further stated "The absolute maximum amount of paraquat likely to be found on plant material is about 500 parts per million." But Dr. Richard Hawks—the official-in-charge of the paraquat study being conducted by the National Institute for Drug Abuse—has recently reported that current samples are showing up to 655 ppm; and that with each batch of new samples, the amount of paraquat-contamination appears to be increasing. Informally, reports have reached me indicating that government-seized Mexican marijuana coming into this country has been found to contain as high as 2,200 ppm of paraquat contamination. Surely, the hazards of such levels of paraquat in marijuana, and the associated risks involved for a large segment of the American public, merit immediate and high-level response. Yet it has now been more than ten months since I first brought this problem to your attention and almost eight months since my July letter to Dr. Bourne urging that the government's inquiry into the paraquat problem be expedited because of the potential for serious harm to American citizens. With each passing day, the matter takes on more distressing proportions.

According to Dr. Hawks, we still do not know of the precise risk such marijuana contamination poses, but the potential risk is serious. My office was informed late last week that toxicity reports on paraquat-treated marijuana, when inhaled through smoking, are not conclusive and a more refined test was required. I have been informed as of today that subsequent testing indicated that paraquat traces are indeed trans-

mitted in the smoke. At the same time, it appears that studies conducted on paraquat-treated marijuana which might be consumed report only what doses would be lethal. Clearly, sub-lethal doses might well cause permanent damage—e.g., to the brain or lungs—to some proportion of the 13 million Americans who, by government estimates, are regular marijuana users. Yet, according to Dr. Hawks, none of the tests currently being conducted or which could be conducted will be able to tell us anything about the sub-lethal risks involved when persons consume marijuana contaminated with the highly toxic paraquat. Whatever information we still do not have, as a result of recent findings, we now know that no research will be able to tell us that paraquat is not a hazard to human health.

Whatever the reasons, we now know that more paraquat-tainted marijuana containing increasingly higher levels of paraquat residues are entering the United States and being sold to unsuspecting users and that there exists a clear risk to human health, of our own making. And yet, no action is being taken to induce the Mexican government to halt the use of paraquat in its spraying program, or to substitute a safer herbicide.

In light of recent developments, I believe that the United States Government should undertake immediately to safeguard the health and welfare of a significant number of our citizens who may be endangered as a result of this government's involvement, however direct or indirect, in Mexico's program to spray marijuana fields with paraquat. Without question there is a duty owed to those citizens when our government is acutely aware of hundreds of tons of marijuana crossing the border from Mexico and has lent behind-the-scenes assistance to the spraying effort which causes the marijuana to be a risk to human health.

Parenthetically, I believe that the Government of Mexico may well want to reconsider its paraquat program in view of the possible risks of lung damage to peasant farmers, and to officials in the spraying program itself who are handling this substance.

I would like your immediate response to ascertain why, in the face of an unknown but possibly serious health risk, this government has not, to date, acted with reasonable dispatch to eliminate the risk, and what actions you propose to take at this critical time.

Sincerely,

CHARLES H. PERCY,
Ranking Minority Member.

COMMITTEE ON GOVERNMENTAL AFFAIRS, SENATE PERMANENT SUBCOMMITTEE ON INVESTIGATIONS,
Washington, D.C., May 9, 1978.

Hon. PETER G. BOURNE, M.D.,
Special Assistant to the President, The White House, Washington, D.C.

DEAR DR. BOURNE: Recent reports have come to my attention indicating that more than 20 percent of the samples of marijuana seized at the Mexican border are contaminated with the herbicide paraquat; that when analyzed, these samples are showing increasingly higher amounts of paraquat residues; that tests now conclusively establish that the highly toxic paraquat is in fact found in the smoke of sprayed marijuana which is inhaled into the human body; and that such inhalation, particularly with prolonged exposure, may seriously impair the ability of the lungs to handle oxygen—a condition known as fibrosis.

On July 18, 1977, I wrote urging you to expedite the conduct of tests aimed at determining the health risks associated with paraquat-treated marijuana. By December, your office reported that samples seized at the border showed "about 50 parts per million (ppm)" of paraquat. The White House release further stated "The absolute maximum amount of paraquat likely to be found on plant material is about 500 parts per million." But Dr. Richard Hawks—the official-in-charge of the paraquat study being conducted by the National Institute for Drug Abuse—has recently reported that current samples are showing up to 655 ppm; and that with each batch of new samples, the amount of paraquat-contamination appears to be increasing. Informally, reports have reached me indicating that government-seized Mexican marijuana coming into this country has been found to contain as high as 2,200 ppm of paraquat contamination.

Surely the hazards of such levels of paraquat in marijuana, and the associated risks involved for a large segment of the American public, merit immediate and high-level response. Yet it has now been more than ten months since I first brought this problem to the attention of Secretary of State Cyrus Vance and almost eight months since my July letter to you urging that the government's inquiry into the paraquat problem be expedited because of the potential for serious harm to American citizens. With each passing day, the matter takes on more distressing proportions.

According to Dr. Hawks, we still do not know of the precise risk such marijuana contamination poses, but the potential risk is serious. My office was informed late last week that toxicity reports on paraquat-treated marijuana, when inhaled through smoking, are not conclusive and a more refined test was required. I have been informed as of today that subsequent testing indicated that paraquat traces are indeed transmitted in the smoke. At the same time, it appears that studies conducted on paraquat-treated marijuana which might be consumed report only what doses would be lethal. Clearly, sub-lethal doses might well cause permanent damage—e.g., to the brain or lungs—to some proportion of the 13 million Americans who, by government estimates, are regular marijuana users. Yet, according to Dr. Hawks, none of the tests currently being conducted or which could be conducted will be able to tell us anything about the sub-lethal risks involved when persons consume marijuana contaminated with the highly toxic paraquat. Whatever information we still do not have, as a result of recent findings, we now know that no research will be able to tell us that paraquat is not a hazard to human health.

Whatever the reasons, we now know that more paraquat-tainted marijuana containing increasingly higher levels of paraquat residues are entering the United States and being sold to unsuspecting users and that there exists a clear risk to human health, of our own making. And yet, no action is being taken to induce the Mexican government to halt the use of paraquat in its spraying program, or to substitute a safer herbicide.

In light of recent developments, I believe that the United States Government should undertake immediately to safeguard the health and welfare of a significant number of our citizens who may be endangered as a result of this government's involvement, however direct or indirect, in Mexico's program to spray marijuana fields with paraquat. Without question there is a duty owed to those citizens when our government is acutely aware of hundreds of tons of marijuana crossing the border from Mexico and has lent behind-the-scenes assistance to the spraying effort which causes the marijuana to be a risk to human health.

Parenthetically, I believe that the Government of Mexico may well want to reconsider its paraquat program in view of the possible risks of lung damage to peasant farmers, and to officials in the spraying program itself who are handling this substance.

I would like to meet with you as soon as possible to ascertain why, in the face of an unknown but possibly serious health risk, this government has not, to date, acted with reasonable dispatch to eliminate the risk, and what actions you propose to take at this critical time.

Sincerely,

CHARLES H. PERCY,
Ranking Minority Member.

THE WHITE HOUSE,
Washington, December 9, 1977.

In response to recent concern that Mexican marihuana plants which have been sprayed with Paraquat might be harvested and imported into the U.S., the Office of Drug Abuse Policy has issued the following statement.

While we do not at present time see any major health hazard associated with Paraquat-treated marihuana, we have directed the National Institute on Drug Abuse to conduct research to determine if marihuana contaminated with Paraquat is being imported and, if so, whether its use could cause injury to marihuana users.

Samples of marihuana confiscated in the Southwest Region of the United States by the Drug Enforcement Administration were analyzed by the National Institute on Drug Abuse. Out of 45 samples, six were found to be contaminated with Paraquat. These samples, presumed to be from Mexico because of both the chemical analysis and their nearness to the border, averaged 900 pounds in weight.

Lee Dogoloff, Deputy Director, said "We wish to make this issue public. Marihuana which has been sprayed with Paraquat appears damp, yellowish and sickly looking, and may have spots similar to burn holes. Once manicured and mixed with untreated material, it becomes difficult to recognize and has no characteristic smell."

Since late 1975, the Mexican Government has been using Paraquat to destroy illegal marihuana fields. While the U.S. has provided both equipment and technical assistance to the Mexican Government for the eradication of illegal poppy fields, it is not participating in the marihuana eradication program. The Paraquat for this program was purchased by the Mexican Government in Europe.

Studies by the National Institute on Drug Abuse on the smoke from marihuana sprayed with Paraquat are still being conducted with preliminary results due in January 1978.

BACKGROUND

Paraquat is a commonly used herbicide which has been employed by the U.S. and Mexico since the early 1960's and has been approved by the EPA for several purposes. The most common application of Paraquat is as a means of cleaning the seedbed before planting crops, but it is also employed for such things as weed control in fruit orchards and as an aid to harvesting mature plants such as cotton and soybeans. Paraquat does not persist in the soil and presents no hazard when used in prescribed amounts. It is one of 23 herbicides which the EPA is proposing to restrict to trained farmers and users only.

Paraquat is highly toxic, can be fatal if swallowed in concentrated form, and has no known antidote.

There has been concern recently that some of the Mexican marihuana plants which have been sprayed with Paraquat might be harvested and imported into the U.S. before the herbicide has destroyed the plants. This concern has led the Office of Drug Abuse Policy to conduct research to determine if marihuana contaminated with Paraquat is being brought into the U.S., and, if so, whether it could cause harm to marihuana users.

Samples of marihuana confiscated in the Southwest Region of the United States by the Drug Enforcement Administration (DEA)

were analyzed by the National Institute on Drug Abuse (NIDA). Out of 45 samples, six were found to be contaminated with Paraquat. These samples, presumed to be from Mexico because of both the chemical analysis and their nearness to the border, averaged 900 pounds in weight.

Studies by the National Institute on Drug Abuse on the effects of ingested Paraquat have shown the following:

The absolute maximum amount of Paraquat likely to be found on plant material is about 500 parts per million (ppm). The amounts actually found on the confiscated marihuana were about 50 ppm.

At a rate of 500 ppm, a person would have to consume one pound of marihuana within a few hours for it to be fatal; at a level of 50 ppm, ten pounds would have to be ingested over a short period of time for fatal results.

Studies by NIDA on the smoke from marihuana sprayed with Paraquat are now being conducted. Included in the studies will be the analysis of smoke for the presence of toxic substances which might result from burning or smoking the Paraquat-laced marihuana. While previous studies on Paraquat sprayed on plants such as alfalfa found that the herbicide is not present in the smoke, it is not known whether this is true of marihuana. Smoking studies in rats will begin shortly to determine what, if any, toxic reactions occur with Paraquat-treated marihuana.

QUESTIONS AND ANSWERS ON MARIHUANA AND PARAQUAT

Q. If marihuana treated with Paraquat is eaten, in brownies for example, will it be fatal and how much will it take?

A. Since the amount of marihuana which has to be eaten for a lethal dose is between 1 and 10 pounds, it is unlikely that anyone could possibly ingest a lethal dose in food. If, for instance, one ounce of marihuana were used to prepare 2 pounds of brownies, 32 to 320 pounds would have to be eaten within a short period of time to cause death.

Q. What are the effects of smoking Paraquat-treated marihuana?

A. At the present time little is known about smoke toxicity. Studies conducted by ICI (the manufacturers of Paraquat) have shown that no Paraquat is detectable in the smoke collected from burning Paraquat-treated field crops.

The National Institute on Drug Abuse (NIDA) is at present conducting studies of smoke collected from burning marihuana treated with Paraquat. The question remains to be answered whether the Paraquat is being converted by the heat of burning into other toxic substances. NIDA hopes to have preliminary study results in January.

Q. How can street marihuana that has come from Paraquat-treated fields be recognized?

A. When Paraquat is applied to plants they quickly turn yellow and dry out. Sometimes spots similar to burn holes are noticeable on the leaf. This process only takes 1–3 days so the marihuana must be harvested soon after spraying and before the plants become so dry as to be unmanageable. Material coming into the country in large lots therefore appears damp, yellowish, and sickly looking.

Recognizing Paraquat-treated marihuana in street samples is more difficult since by this time the material may have been manicured considerably and possibly mixed with untreated material. No characteristic smell is associated with Paraquat so this is not a means of detection.

Q. What symptoms might be noticed after smoking or eating marihuana containing Paraquat?

A. No information is at present available concerning human symptoms to be expected after smoking Paraquat. Symptoms to be expected after oral ingestion would probably only be manifested if the pure herbicide were swallowed.

Q. Why was Paraquat originally chosen as the herbicide of choice to be used to eradicate marihuana fields?

A. Studies conducted in the early 1970's demonstrated that Paraquat was highly effective in quickly killing marihuana plants and presented a minimum of environmental consequences.

THE WHITE HOUSE,
Washington, August 2, 1977.

Senator CHARLES H. PERCY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PERCY: Thank you for your letter of July 18 concerning research on Paraquat toxicity. Please be assured that we share your concern and consider this an important research issue. I would like to detail for you the steps which have been taken and are planned to develop this project.

It was decided at our May 27 meeting to attempt to resolve certain questions concerning Paraquat's potential danger to marijuana smokers. To this end, I requested that the National Institute on Drug Abuse (NIDA) prepare a research plan which could be implemented to settle some of these concerns. The plan was presented on June 3, and I subsequently, discussed the project with Mr. Dodson of your office on June 6. I decided, in view of the potential danger to U.S. citizens, that the project should be implemented and this decision was communicated to NIDA on June 7.

The research timetable called for an 18-week project to arrive at preliminary conclusions concerning the pyrolysis products of Paraquat on marijuana leaf—those chemical entities which appear in the condensed smoke after a marijuana cigarette is smoked. If safety cannot then be adequately addressed, toxicity studies in rats will be conducted on Paraquat-treated marijuana to assess the potential toxic effects. If necessary, these studies would take an additional 12–14 weeks.

The timetable presented by NIDA is the period of time necessary to complete the project after all the individual stages have been arranged. Any delay is an unavoidable aspect of the need to supplement ongoing contract funding to cover this work, coordinate with the U.S. Department of Agriculture (USDA) for plant-growing and treatment aspects of the project, and to work out the exact details of the experimental procedures necessary to carry out the work. If these details and plans are not carefully formulated at this initial stage, more questions than answers will result from such a project.

You might be interested to learn that scientific representatives of USDA, NIDA, and the Environmental Protection Agency have agreed to the type of marijuana to be used on the experiment and the methods of application and quantity of Paraquat to be applied. Initial experimental details have been worked out and sources established for actual homegrown Mexican marijuana which is necessary for the project. It has also been agreed that Chevron Corporation will supply the Research Triangle Institute with radio-labeled Paraquat for the project.

The appropriate contractual proposals have been solicited and the seeds (Mexican varieties), which were obtained from the University of Mississippi after agreement was reached on varieties of plants necessary and numbers of plants required, planted.

Two modifications have been made to the project as originally conceived at our May 27 meeting. The first is that the confiscated material will be analyzed at the University of Mississippi for the presence of Paraquat. Depending on the amount of Paraguat that is detected on this random screening of marijuana samples from all over the United States, the potential of exposure to Paraquat by a U.S. smoker can be assessed in preliminary fashion. Secondly, the pyrolytic experiments to be carried out will be done initially on manicured (harvested) plant material after application of Paraquat to it. This is not growing plant material, but presumably the data collected on its pyrolysis will carry over to the live plant situation. Since this material is available now, initial data can be generated prior to the availability of the mature grown plants.

To summarize where we stand at this moment:

1. Plants are growing which should be ready for harvest by the end of August.

2. Chemical analysis of the confiscated samples at the University of Mississippi will commence as soon as chemical supplies arrive (2 weeks from now), and some data should be available on these analyses by the end of August with a total of 200–300 analyses completed by the end of September.

3. The contractual arrangements with the Research Triangle Institute of North Carolina are in negotiation, and their full efforts should begin in about 2 weeks.

Thank you for your interest in this important project. If I can be of further assistance, do not hesitate to call me.

Sincerely,

PETER G. BOURNE, M.D.,
Special Assistant to the President.

COMMITTEE ON GOVERNMENTAL AFFAIRS, SENATE PERMANENT SUBCOMMITTEE ON INVESTIGATIONS,
Washington, D.C., July 18, 1977.

PETER G. BOURNE, M.D.,
Director, Office of Drug Abuse Policy, The White House, Washington, D.C.

DEAR DR. BOURNE: Over ten weeks ago, members of the staff of the Senate Permanent Subcommittee on Investigations, of which I am ranking minority member, called to my attention the possible hazards associated with the use of the herbicide "paraquat" on Mexican marijuana fields. The potential seriousness of this problem was immediately apparent. As you know, thousands of pounds of marijuana cross the Mexican border every month, and there is good reason to believe that a large portion of this marijuana, destined for consumption by U.S. citizens, may be tainted with this highly poisonous chemical. Although I do not condone the use of illegal drugs under any circumstances, I feel that the United States government has a responsibility to ensure that its actions do not forseeably endanger the health and safety of any of its citizens, drug users included.

I understand that, under your direction, a meeting was held at the White House on May 27, to discuss possible means of resolving the uncertainties of paraquat use on drug crops. The outcome of this meeting was a decision to begin certain tests on paraquat and paraquat-treated marijuana, to be conducted under the auspices of the National Institute on Drug Abuse. On June 10, my office received assurances from the Deputy Director of ODAP that these tests would begin "immediately."

On July 8, Subcommittee staff contacted your office to check on the progress of these experiments. Staff was informed that the actual experiments had not yet been started and would not commence for another two weeks, even though six weeks had already passed since the decision to implement this effort.

It is most difficult for me to understand an eight-week delay in such a simple task as the planting of marijuana for test purposes, especially in view of the six to eight-week lead time required to grow the plants to maturity, which is a necessary first-step in this test effort.

I know you share my concern for the health and safety of all Americans. No one should be inadvertently poisoned through the actions or inaction of the United States government. In view of the delays in this project to date, I urge you to do whatever is necessary to expedite the conduct of these important experiments.

Sincerely,

CHARLES H. PERCY,
Ranking Minority Member.

DEPARTMENT OF STATE,
Washington, D.C., May 13, 1977.

Hon. CHARLES H. PERCY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PERCY: Thank you for your letter of May 6 to Secretary Vance in which you asked for specific information and documentation about the Mexican Government's eradication program in which opium poppy and marihuana fields are sprayed with herbicides.

I have been informed that the Office of the Senior Adviser for Narcotics Matters has been in touch informally with members of your staff concerning these questions. While an initial response has been prepared by that office, a few of your questions will require more time to provide a sufficient reply.

The Department of State shares your concern that the means employed to control illicit drug abuse and international narcotics traffic do not result in individual suffering, or ecological damage. President Carter stated in his message to the U.N. Commission on Narcotic Drugs in February . . . We must combine deep compassion for the victims of addiction with a vigorous attempt to eliminate the world supply of illicit drugs through international cooperation . . .

The Mexican narcotics control effort is directed and controlled by the Mexican Government. The United States Government provides the Mexican Government assistance which includes equipment and technical advisory services, since success in the Mexican program will help reduce the supply of illicit narcotics for the United States market.

You requested a description of the U.S. Government's oversight of the Mexican spraying operations. In addition to oversight provided by the U.S. Embassy in Mexico and the Department's Office of International Narcotics under the Senior Adviser for Narcotics Matters, inspection of the program in Mexico is conducted by the General Accounting Office, the Inspector General of Foreign Assistance, the Drug Enforcement Administration, periodic audit by the Agency for International Development and various concerned Congressional committees.

The oversight definition varies from group to group. The Department of State is concerned with the effectiveness of the program as it relates to the use of the U.S. assistance provided to the Mexican Government, i.e., whether the program is helping to reduce the flow of illicit drugs into the United States. The spraying operation is the core of the eradication effort. All supplementary efforts are directed at insuring effective spraying of the poppy fields, which the Mexican Government has given priority over marihuana fields. Spraying of marihuana takes place primarily during the summer period between the normal harvests of poppies.

The role of the American advisers in the actual spraying operation consists of helping identify the location of poppy fields by the Drug Enforcement Administration's TDY personnel flying reconnaissance flights with Mexican pilots and spotters; U.S. contract flight instructors; maintenance and repair instructors; aviation systems advisers; and support advisory services in operation of multi-spectral poppy field identification systems. Concerning your question of surveillance of the operations, American advisers infrequently accompany Mexican spray flights and often accompany Mexican personnel on subsequent verification missions.

Independent audits of the program are conducted frequently and often overlap. At the present time, representatives of the Congressional Budget Office and the Inspector General's Office for Foreign Assistance are reviewing the program in Mexico. The Department's Inspector General's review of the program begins in a few weeks and the A.I.D. audit should begin in June. The extent to which each of the groups may focus on the detailed technical aspects of the type of herbicide used will vary.

Dr. Walter A. Gentner of the U.S. Department of Agriculture visited Mexico in 1976 when the transition phase between the outgoing and incoming administration took place. His recommendations have been passed to the new administration. To date, the new Attorney General has not desired U.S. technical assistance in developing the use of herbicides which he has stated must be effective in eradication, ecologically safe, and safe for the personnel who participate in the spraying.

Herbicides are selected for the program after these criteria have been examined by specialists from various ministries within the Mexican Government. The herbicides presently employed in the program have been approved by the Mexican Department of Agriculture and are used commercially in agriculture in various parts of Mexico. The United States does not have direct influence over the choice of herbicides.

We have provided technical advisers to consult with the Mexican Government on herbicides and current planning exercises with the Mexicans may result in additional consultation. The Mexican Government purchases and procures the herbicides used in the program. No reimbursement arrangements exist to cover this cost. The United States cannot and does not set standards and specifications for the purchase and handling of herbicides by the Mexican Government. In response to a Mexican request for guidelines to assure safe handling of herbicides, general instructions were prepared on one occasion by the Narcotics Assistance Unit at the U.S. Embassy in Mexico City.

The U.S. Embassy reports that the chemical, paraquat, has been used in 1976 and 1977 only against marihuana, while 2,4-D is used only against opium poppies. We have been advised that in the future, only 2,4-D will be used against both poppies and marihuana because tests showed it was more effective and safer to handle. We will look into this issue further and will advise you.

We only know of the use of 2,4-D and paraquat in the program. It is possible that other herbicides or chemical variations have been used for limited testings.

We are making inquiries regarding the Environmental Protection Agency's position on paraquat. The U.S. Department of Agriculture has advised us informally that handling paraquat in its concentrated form can be harmful. This advice was passed on to the Mexican Government.

The possible toxic consequences of paraquat being accidentally sprayed on Mexican food crops, appears to be a remote possibility. The marihuana fields are located generally far from food crop fields. Reports from the Embassy indicate that marihuana sprayed with herbicides disintegrates quickly into a fine powder rendering it useless for smoking.

The State Department believes that herbicides used in any eradication effort should be safe for man and environment as well as effective in destroying the illegally grown plants. Some evidence is available that paraquat can be harmful to those who prepare and apply paraquat; therefore, we have supported informally the reported decision of the Mexican Government to use in the future only 2,4-D. We shall make inquiries on the progress of this decision and advise you.

Concerning your request for all State Department correspondence, cable traffic, agency memoranda, and other documents, from January 1975 to the present, covering the use of herbicides on drug crops in Mexico, we will begin the search immediately and provide the documentation within a matter of days.

Sincerely,

DOUGLAS J. BENNET, JR.,
Assistant Secretary for
Congressional Relations.

COMMITTEE ON GOVERNMENTAL AFFAIRS SENATE PERMANENT SUBCOMMITTEE ON INVESTIGATIONS,
Washington, D.C., May 6, 1977.

Hon. CYRUS R. VANCE,
Secretary of State, Department of State,
Washington, D.C.

DEAR SECRETARY VANCE: For the past few years, the Permanent Subcommittee on Investigations has actively monitored the efficiency and effectiveness of federal drug law enforcement. As ranking minority member of this Subcommittee, I have taken a special interest in this subject.

In conjunction with the Subcommittee's continuing oversight of federal efforts to halt the flow of illegal drugs across the Mexican border, the Subcommittee is interested in the joint United States-Mexican program to cut off drug supplies at the source by spraying Mexican marijuana and poppy fields with chemical herbicides. In this regard, I would appreciate your providing me with the following information and any documentation pertaining thereto:

1. Please describe the United States government's oversight of the Mexican spraying operations. What role do American advisers play in the actual spraying operations and in the surveillance of those operations? How often are independent audits of this program conducted and when is the next such investigative trip scheduled? Specifically, does the State Department plan a review of the program by a multidisciplined team of experts, as recommended by Dr. Walter Gentner of the U.S. Department of Agriculture in the report on his Fall, 1976, study of the program?

2. How are the herbicides used for the program selected? What influence does the United States have over the choice of herbicides? Does the United States set standards and specifications for the purchase and handling of herbicides by the Mexican government?

3. Is the chemical herbicide paraquat (also known as gramoxone) still used in Mexico on opium poppy plants If not, when and for what reason was its use halted?

4. Is paraquat still used for spraying purposes on marijuana plants? If not, when and for what reasons was its use halted?

5. Have any types of herbicides other than paraquat and 2,4–D been used in this program? Specifically, has 2,4,5–T been used on Mexican drug crops? If other herbicides have been used, why was their use halted?

6. Does the EPA currently consider paraquat safe for use in this program? Has the EPA shifted paraquat to its "rebuttable" list, indicating that there may be some reason to believe that it should not be registered for use in the United States? Has the U.S. Department of Agriculture strongly urged the United States and Mexican governments to discontinue use of paraquat on drug crops? If so, what action has been taken or is contemplated?

7. Has the U.S. government considered the toxic consequences of paraquat sprayed (1) on non-target Mexican food crops intended for local consumption or for export to the U.S. or elsewhere? and (2) on marijuana plants which are harvested after spraying.

illegally exported into the United States, and subsequently smoked or consumed by American users of the drug?

8. What is the present position of the State Department on the use of paraquat in this program by Mexican authorities? Has the State Department made any effort to stop or urge discontinuance of the use of this chemical by the Mexican government? If so, please describe these efforts and the Mexican government's response to them.

Please transmit all State Department correspondence, cable traffic, agency memoranda, and other documents, from January 1975 to the present, concerning the use of herbicides on drug crops in Mexico. This should include but not be limited to all correspondence with the Department of Agriculture and the Mexican government.

Your prompt assistance and reply by Friday, May 13, 1977, will be greatly appreciated. Mr. Stuart M. Statler, Chief Counsel to the Minority, is available to provide all necessary assistance to your staff and can be reached at 224-9157.

Warmest personal regards,

CHARLES H. PERCY,
Ranking Minority Member.

[From Science magazine, Feb. 24, 1978]

SPRAYING OF HERBICIDES ON MEXICAN MARIJUANA BACKFIRES ON U.S.

In the mountainous, inaccessible regions of Mexico, over an area that comprises more than one-fourth of the national territory, Mexican farmers carefully cultivate fields of opium poppies and marijuana. Each year, more than 2500 tons of that marijuana and 5000 pounds of heroin, an opium derivative, find their way across the border into the hands of pot smokers and heroin addicts in the United States. Customs officials here will admit frankly that they are powerless to prevent it, and authorities in Mexico have fought a notoriously losing battle with farmers who are skillful at locating fertile ground hundreds of miles from highways—and do not hesitate to shoot at soldiers and narcotics agents. In a country where the average yearly income in rural areas is in the range of $200, the modest farmer of opium and marijuana can have an income of $5000.

In the spring of 1975, the Mexican government and their advisers in the U.S. drug enforcement establishment came up with a bright idea: Herbicides, which were successfully used to defoliate large portions of the Southeast Asian jungle during the Vietnam war, could be sprayed on the opium and marijuana fields by Mexican pilots in sophisticated American helicopters. Infrared aerial photography, another high-technology development of the Vietnam war, could be used by fixed-wing aircraft to track down and pinpoint the location of the fields. By this method thousands more acres and thousands more fields could be wiped out than through the older, slower, ground method of search-and-destroy by burning.

After a brief period of trials and demonstrations before a variety of Mexican and American officials, the program began with the use of a variety of agricultural herbicides, including 2,4,5-T, 2,4-D, and paraquat (Gramoxone by its trade name). Later, paraquat was accepted as the most effective herbicide to use on marijuana, and 2,4-D was judged the most effective for use on opium poppies. Last year, according to government officials, poppy fields covering 14,000 acres and marijuana fields covering 9500 acres were destroyed by airborne spraying. This prompted one U.S. official to pronounce it "the most effective and cost efficient means of decreasing the flow of drugs such as heroin into the United States."

What has followed this comparative success, however, has been a growing criticism of the program by American environmentalists, an exacerbation of existing tensions between the United States and Mexico, and in the words of an American senator, outrage over the fact that no steps were taken to ensure the health of millions of Americans who might be using marijuana harvested immediately after it had been dosed with herbicide.

Concerns about the safety of the paraquat-sprayed marijuana—first expressed in the underground press—have led to a federally funded study of the safety. A warning about paraquat-contaminated pot has been issued by the Office of Drug Abuse Policy in the White House. Dogging the whole affair has been a series of contradictory statements by the State Department, which has tried at nearly every opportunity to minimize the ecological and health risks associated with the program, as well as the American involvement in it.

"What we're dealing with here is a very sensitive issue within the framework of relations between the United States and Mexico," a State Department official told *Science*. "Right now, they are spending an inordinate amount of their resources on a project [the spraying] that essentially benefits the United States. We don't want to disturb that. Moreover, anything that makes it appear that the United States is in any way controlling or directing the program is damaging to the stability of the Mexican political environment. The closer their government is to the United States, the worse it looks in the eyes of the Mexican people and press."

When the office of Senator Charles Percy (R-Ill.) began inquiring about the herbicide-spraying program in May 1977, after a member of his staff saw references to it in the underground press, the State Department was mindful of the diplomatic problem. In its responses to Percy and to the later inquiries of the National Organization for the Reform of Marijuana Laws (NORML), department officials pointed out that "the Mexican narcotics control effort is directed and controlled by the Mexican government." The State Department also asserted that the herbicides used in Mexico—after having been selected by the Mexicans with complete independence—do not pose any environmental or human health risks: "Reports from the [American] embassy indicate that marihuana sprayed with herbicide disintegrates quickly into a fine powder rendering it useless for smoking." Even the White House drug abuse office, in a statement released on 9 December 1977, asserted that "while the U.S. has provided both equipment and technical assistance to the Mexican government for the eradication of illegal poppy fields, it is not participating in the marihuana eradication program."

However, these claims appear to be contradicted by the scope of U.S. assistance to the program and by the contents of several State Department documents relating to to herbicide spraying. Although the U.S. claims, for example, that the herbicide program is Mexican-directed and controlled, it seems clear it could not function as it does without American approval: Since 1973, this country has provided $40 million in direct funding for the program, most of which has been used to purchase 41 American-made Bell helicopters and 35 Cessna single- and twin-engined fixed-wing airplanes.

Mexican personnel are trained by flight instructors, maintenance and repair instructors, and aviation systems advisers under contract to the United States. Employees of the Drug Enforcement Administration accompany the Mexicans on flights to identify the fields and assure that they have been destroyed. Four government agencies oversee the operation: the State Department, through the U.S. Embassy in Mexico, and its Office of International Narcotics; the Drug Enforcement Administration; the General Accounting Office; and the Agency for International Development.

This participation and oversight, moreover, clearly has extended to the marijuana eradication program: A report filed by John Ford, an employee of the State Department who was sent to help set up the spraying program, contains several references dated October 1975 to observations he made and advice he provided on the spraying of paraquat on marijuana fields.

The importance of the contradictions in the activities and public statements of the government lies in the influence that the State Department's denial of a U.S. role had in delaying an investigation of the environmental and human health effects of the herbicide-spraying program. Concern over those effects first arose simply because of paraquat's inherent toxicity to humans and plants. As the label on it states, "one swallow can kill," and there is no known antidote. Ingestion or inhalation of one-tenth of an ounce is sufficient to damage major internal organs and result in a painful death after 24 hours. In fact, more than 100 persons in the United States have died from ingesting paraquat by accident or to commit suicide. Most of the deaths have occurred in Texas and California, where paraquat has been used to kill weeds and clear land, according to a scientist at the National Institute of Drug Abuse.

Despite its toxicity to humans, paraquat does not persist in the environment—it breaks down when it contacts soil—which made it initially attractive to the Mexicans. To the American critics of its use on marijuana, however, that major attribute is more than offset by the way it acts to destroy plants. When sprayed in the air, paraquat sticks to the leaves of plants, desiccating them through a chemical reaction with the leaves' surfaces, with sunlight as the catalyst. Thus, for the plant to be completely destroyed, it must sit for a day and probably two in bright sunlight. The potential hazard to users of marijuana is created whenever the crop is harvested by the farmer on the same day it is sprayed. Once harvested and pressed into bricks for shipment across the border, the leaves are out of the sun, the plant stops its deterioration, and the herbicide remains largely intact on the marijuana.

STATE DEPARTMENT DENIAL

Initial inquiries from Percy and NORML about the possibility of this occurring or having occurred were deflected by the State Department with a denial of any responsibility for the program. Eventually, in response to persistent inquiries by Percy, the White House drug abuse office convened a meeting in May 1977 of representatives of eight federal drug enforcement and health agencies to discuss the issue. Then a different obstacle arose. Several of the officials balked at the idea of investigating potential risks associated with use of a contraband substance. According to Percy, they said in effect: "So who cares, what responsibility does our government have for dope smokers who might be poisoned by paraquat?" Although Percy himself had carefully expressed his disapproval of "the use of illegal drugs under any circumstance," he firmly expressed his belief that "the United States government has a responsibility to ensure that its actions do not foreseeably endanger the health and safety of any of its citizens, drug users included."

This view was shared by presidential assistant Peter Bourne, the director of the Office of Drug Abuse Policy, who pointed out that any intake of paraquat-treated marijuana by U.S. citizens would be a direct result of the

U.S.-supplied spraying operation. Following the meeting, Bourne directed the National Institute on Drug Abuse (NIDA) to conduct a $35,000 study to determine if marijuana contaminated with paraquat actually was being imported, and if so, whether it could cause injury to those who used it.

To answer the first question, NIDA obtained 71 samples of marijuana confiscated during major drug busts in the southwestern region of the United States and had them analyzed by researchers at the University of Mississippi. Richard Hawks, a chemist at NIDA who is directing the research, makes no claims that the samples are representative of all the marijuana that comes across the border, but he said that researchers found paraquat on 10 percent of the samples, and "by itself, that was positive proof that paraquat-laden marijuana is being imported."

For the second portion of the study, marijuana plants were grown by the Department of Agriculture at a laboratory in Beltsville, Maryland, where they also were treated with paraquat. Scientists at the Research Triangle Institute in North Carolina then burned the marijuana and subjected the smoke condensate to chemical analysis. The researchers already knew that a hazardous amount of the herbicide was unlikely to be inhaled by the user as a part of the smoke, but it was unclear whether or not the heat of the burning converted paraquat into another toxic substance. Tests of the smoke condensate using mass spectrometry have yet to be carried out, but the preliminary results of tests using a slightly less accurate method indicate that the herbicide is broken down into bipyridine, which commonly exists in tobacco smoke and will not hurt the user, according to Hawks.

According to NORML, however, the government cannot be sure that paraquat-laden marijuana poses no health hazard unless a study is made of the effects of eating small amounts of it baked in cookies or brownies—a means of administration employed by a small but essentially unknown proportion of the estimated 15 million regular marijuana users in the United States. Using several rather arbitrary statistical measures of the concentration of the herbicide in imported marijuana and the distribution of marijuana in a batch of brownies, NIDA has calculated that a person would have to consume 32 pounds of brownies—containing 1 pound of the sprayed marijuana—over a short period of time to ingest a lethal dose of paraquat. But the agency does not know whether eating a portion of that amount would have less than fatal but still toxic results, according to Hawks. "We have no plans whatever to look at the effects of ingesting a sublethal dose," Hawks added.

One indication of the potential toxicity of ingesting it may be the fact that the concentrations of paraquat found on the imported samples analyzed by NIDA were between 3 and 650 parts per million. These concentrations uniformly exceed the tolerance levels set for the Environmental Protection Agency for paraquat on foodstuffs, which are in the range of 0.05 to 0.10 part per million. Moreover, "because of paraquat's inherent toxicity and studies that indicate it can cause birth defects," the EPA has placed it on a list of candidates for hearings that may lead to those tolerance levels being reduced, or to a removal of the herbicide from the U.S. market for use in connection with agricultural commodities, an EPA spokesman told *Science*.

Keith Stroup, the director of NORML, believes that NIDA should study not only the hazards of eating paraquat-laden marijuana, but that it should also look into the possibility that heroin may be coming across the border laden with toxic amounts of the herbicide 2,4-D. The chemical works by interfering with the normal growth cycle of a plant, causing it to wither in 36 to 48 hours. Although it is not considered to be as toxic as paraquat, it also has been placed on a list of candidates for hearings that may lead to use restrictions or to its removal from the market; studies have indicated that it may cause mutations and cancer. So far, NORML has been the only group to express any interest in the possibility that it has contaminated imported heroin; ensuring that addicts do not face such a hazard does not seem to be a popular cause. The State Department responds confidently that "because heroin is already injurious to health, we don't consider that [the possibility of herbicide-laden heroin reaching users in this country] to be a problem."

NORML believes that a first step toward changing State Department support of the herbicide-spraying program would be to force the department in federal court to file an environmental impact statement, placing the ramifications of the spraying program on the public record. Impact statements are required under the National Environmental Policy Act (NEPA) for "major federal actions significantly affecting the quality of the human environment" in the United States. The State Department contends that no statement is required for the herbicide program because it is outside the U.S., under the formal control of the Mexicans, and bereft of any direct U.S. subsidy for the herbicides themselves.

Many Washington environmentalists, on the other hand, believe that such a statement is required. Their view is based partly on a 1975 suit by the Environmental Defense Fund that forced the Agency for International Development to file the statements on its pesticide programs in foreign countries because of their potential impact here. Moreover, the herbicide-spraying program in Mexico appears to be a prime example of the type of issue that impact statements are designed to illuminate. The State Department from the start knew, for example, that marijuana treated with paraquat was likely to be harvested quickly by the Mexicans; reports filed by John Ford noted that some of the plots that had been selected for the initial trials were harvested in the same day they were sprayed. The State Department also knew that paraquat is an extremely hazardous herbicide with which to work. In early 1975, an official of the Agricultural Research Service in the Department of Agriculture wrote to the State Department to express his concern over the intention of the Mexicans to use the herbicide, because of the hazards present for those who administered it. If a statement had been filed at the inception of the program, the State Department would have been forced to consider these ramifications and explain them in a public document, critics have pointed out.

Despite the apparent strength that these arguments would have in court, there is some reluctance by the environmentalists to take the case there. Currently, they are engaged in a running battle with agencies of the federal government that oppose a proposal by the Council on Environmental Quality, a White House office, to extend the NEPA requirements for filing impact statements to U.S.-supported actions that will have an effect only *within* the environment of a foreign country. Bringing a federal agency to court over an existing NEPA requirement in a case that hinges primarily on concern for the welfare of U.S. pot smokers and heroin addicts, at the same time a battle is taking place over proposals to extend those requirements, apparently is not considered sound strategy. Some groups also feel that the two issues—concern for U.S. pot smokers and the need for broader use of impact statements—should be kept apart.

Whatever the reason, this lack of action leaves unsolved several confusing mysteries that surround the affair. One is whether or not the State Department actually has exerted any pressure on the Mexicans to substitute another herbicide for paraquat. Richard Dugstad, a policy officer in the State Department's Office of International Narcotics, was quoted recently in the Washington Post as saying, "We have done nothing to discourage the use of paraquat by the Mexican government." But this contradicts what the State Department, in a letter to Senator Percy dated 13 May 1977, said: "We have supported informally the reported decision of the Mexican government to use in the future only 2,4-D" on marijuana plants. Dugstad now states that he was quoted out of context by the Post. The letter to Percy also states that "we have been advised that in the future, only 2,4-D will be used against both poppies and marihuana because tests showed it was more effective and safer to handle." Dugstad recently told Science, however, that "the Mexicans are staying with the present system of using paraquat on marijuana and 2,4-D only on opium poppies," because of continuing experience that shows each herbicide to be most effective on the plants that are sprayed with it now. He added a rhetorical question that prompts greater uncertainty: "Is it really appropriate for the U.S. to direct another government to use one chemical instead of another?"

Another unanswered question is whether the Mexicans are using herbicides besides paraquat and 2,4-D on opium poppies and marijuana. A report filed in 1976 by Walter Gentner, an employee of the U.S. Agriculture Department who went to Mexico to observe the operation, states that he saw the herbicide 2,4,5-T, a toxic chemical that may cause cancer, in a shed where other herbicides were stored. He suggested then that a special investigation be initiated, but up to now none has been conducted. Dugstad said that "to the best of our knowledge, no herbicides besides paraquat and 2,4-D are being used by the Mexicans."

In a sense, the uncertainty of this statement is understandable. The State Department has been caught between the proverbial rock and a hard place in this affair, which is fraught with international political complications and the potential for exposure of an error in U.S. policy. To admit at the start that paraquat-laden marijuana posed a health hazard for users in the United States would have been to admit that the Mexicans had not made the wisest choice of chemicals and, moreover, that despite the best application of American ingenuity and good intentions, heroin and marijuana are continuing to flow across the border in quantities that pose a hazard to U.S. citizens. What seems clear now, however, is that unless the State Department immediately places all of its cards on the table for everyone to see, its own credibility and wisdom, and possibly its good intentions, will remain in question.

[From the New Republic, Mar. 18, 1978]

POISONED MARIJUANA

Every year more than 2,500 tons of Mexican marijuana finds its way into the United States, accounting for perhaps 70 percent of the total consumed here. In analyzing samples of marijuana seized in major drug busts in the southwest since October 1976, the National Institute for Drug Abuse has discovered that more than 20 percent is contaminated by a chemical called paraquat, which is a toxic defoliant.

Where the chemical is coming from is no secret. It is traceable directly to a program jointly conceived by the Mexican government and U.S. drug enforcement advisers under which opium and marijuana fields in Mexico are sprayed from helicopters with paraquat and other agricultural herbicides similar, and in some instances identical, to those used to defoliate the jungle during the Vietnam war. As in Southeast Asia, hidden

marijuana and opium fields are located by infrared aerial photography.

The program was originally designed to destroy Mexican opium, which is the source of about 5,000 pounds of heroin each year. According to the State Department, spraying marijuana as well was entirely the idea of the Mexicans. To be sure, the chemical paraquat is highly effective in eradicating marijuana—if the plants are allowed to sit in the sunlight and open air for a day or two after spraying while the herbicide does its work. But the Mexican peasants who cultivate the stuff in inaccessible mountain fields are inspired by a stiff entrepreneurial spirit. After the helicopters depart, they simply hustle out and harvest the freshly sprayed plants, immediately squeezing the leaves into bricks before decomposition can begin. Thus more and more frequently the marijuana that is sold in this country has the poisonous chemical in it.

It's not clear just how harmful marijuana laced with paraquat is. According to the February 24 issue of Science magazine, which has carried the most thorough examination of the problem to date, the paraquat label states that one swallow can kill and there is no known antidote. According to Science, "ingestion or inhalation of one-tenth of an ounce is sufficient to damage major internal organs and result in a painful death after 24 hours."

However, NIDA testing of paraquat-laden marijuana—ordered by President Carter's Special Assistant for Health Issues, Peter Bourne—indicated that at the levels of concentration initially found on the imported samples, no hazardous amount was likely to be inhaled as part of the smoke from a marijuana cigarette nor a lethal amount ingested by eating marijuana cookies or brownies. But levels of paraquat concentration have increased dramatically in dope from recent seizures—up from six to 50 parts per million to highs of 2,000 per million. Furthermore, no one really knows whether there is any harmful effect from ingesting amounts too small to make you ill on the spot. The Environmental Protection Agency has warned that the chemical can cause birth defects, and all the concentration of paraquat turned up in the Mexican marijuana greatly exceed the tolerance levels set by that agency.

Dr. Lester Grinspoon of Harvard Medical School, the author of Marijuana Reconsidered, points out, "There's no way for a consumer to know that his grass is poisoned or by how much. Nor is there any way to complain about it, because the government is putting the poison in. Whatever needs to be done to reverse this should be done immediately. The Drug Enforcement Agency should move to stop the spraying program."

Peter Bourne of the White House takes a more casual view. "I'm not sure there's any demonstrable health hazard of any consequence," he says. "People who disagree with that do so on a largely emotional basis without any scientific substantiation. I mean, we have nobody coming into hospital emergency rooms with toxic effects."

People also disagree about how much the U.S. government is responsible for the marijuana spraying. The official State Department position is that the entire operation is Mexican and it is important for their local politics that it be perceived to be so. We provide funds only for opium eradication. The Mexicans extended it to marijuana on their own, almost as a favor to us, it would seem. "Right now they are spending an inordinate amount of their resources on a project that esentially benefits the U.S.," a State Department official told Science. "We don't want to disturb that." State also insists that we have no direct influence over the choice of herbicides used in the program.

On the other hand, over the past five years, the U.S. government has provided $40 million in direct funding for the program, most of which has gone for the purchase of helicopters and other aircraft for spraying and reconnaissance. We've also trained aviators and mechanics, actually operating the infared photographic equipment and advised in the use of chemicals. Drug Enforcement Administration officials often accompany Mexicans on the flights. The State Department has asserted that we allow the Mexicans to use the helicopters to spray marijuana only because we would have to maintain them in the poppy offseason anyway.

Opinions differ about what obligations the U.S. government now has in all this. The National Organization for Reform of Marijuana Laws (NORML) believes that all U.S. involvement should be stopped until it is conclusively proved that the chemicals used in both the poppy and marijuana programs are not putting poisons into grass or heroin consumed in this country. Illinois Senator Charles Percy, who has kept a constant pressure on government drug enforcement authorities for nearly a year takes a similar, if softer, position. Percy says, "The United States government has a responsibility to ensure that its actions do not foreseeably endanger the health and safety of any of its citizens, drug users included."

At the other end of the spectrum, some US drug enforcement officials believe that the government has no obligations whatever: marijuana is illegal and the government has no responsibility to assure that illegal activities are safe. But if there is some danger, it is the direct result of US-supported spraying operations. That much even Peter Bourne is prepared to concede. Does that imply any further obligation? "I don't think so," Bourne says. "If the risk exists the guy still has the option not to smoke the grass to begin with."

As far as the Carter White House is concerned, the little matter of poisonous paraquat on Mexican marijuana is "not a policy question." The US government does not intend to suspend the spraying program, or even to recommend to the Mexicans that safer chemicals be used. It has done little to publicize the potential danger since it was discovered. Bourne says, "It's a health issue comparable to cigarettes, and we have instructed HEW accordingly."

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the Senate return to executive session, and I suggest the absence of a quorum.

The PRESIDING OFICER. The Senate is automatically back in executive session. The clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

(Routine morning business transacted and additional statements submitted are as follows:)

COMMUNICATIONS

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC–3096. A communication from the Secretary of Transportation, transmitting the third annual report of activities related to the Deepwater Port Act of 1974, covering the fiscal year October 1, 1976 through September 30, 1977; to the Committee on Commerce, Science, and Transportation, the Committee on Environment and Public Works, and the Committee on Energy and Natural Resources, jointly, by unanimous consent.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a communication transmitted by the Secretary of Transportation, relative to the third annual report under the Deepwater Port Act of 1974, be referred jointly to the Committee on Commerce, Science, and Transportation, the Committee on Environment and Public Works, and the Committee on Energy and Natural Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

EC–3097. A communication from the Under Secretary of Defense, transmitting, pursuant to law, a report of Independent Research and Development and Bid and Proposal costs; to the Committee on Armed Services.

EC–3098. A communication from the Under Secretary of Defense, transmitting, pursuant to law, Contractor IR&D and B&P Advance Agreements Negotiations completed during Government FY 1977 and Independent Research and Development and Bid and Proposal Costs incurred by Major Defense Contractors in the Years 1976 and 1977; to the Committee on Armed Services.

EC–3099. A communication from the Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Army's proposed Letter of Offer to Korea for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–3100. A confidential communication from the Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Army's proposed Letter of Offer to NATO for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–3101. A communication from the Deputy Assistant Secretary of Defense (Installations and Housing), reporting, pursuant to law, on 33 construction projects to be undertaken by the Army National Guard and the U.S. Army Reserve; to the Committee on Armed Services.

EC–3102. A communication from the Chairman, Board of Governors of the Federal Reserve System, transmitting, pursuant to law, the third Annual Report of the Board of Governors of the Federal Reserve System on its functions with respect to Section 18(f) of the Federal Trade Commission Act; to the Committee on Banking, Housing, and Urban Affairs.

EC–3103. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the Act of July 19, 1940 to authorize additional appropriations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC–3104. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report on the utilization of the authority granted in 14 USC 475(a), (b), (c) and (d), to designate and rent inadequate quarters, lease housing, and hire quarters; to the Committee on Commerce, Science, and Transportation.

EC–3105. A communication from the Acting Secretary of Commerce, transmitting a draft of proposed legislation to amend section 406 of the Fishery Conservation and Management Act of 1976 to extend the authorization for appropriations for fiscal years

1979 and 1980; to the Committee on Commerce, Science, and Transportation.

EC–3106. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Federal Railroad Safety Act of 1970 and the Rail Passenger Service Act to authorize additional appropriations and for other purposes, and to amend other rail safety Acts, the Railroad Revitalization and Regulatory Reform Act of 1976, and the Department of Transportation Act; to the Committee on Commerce, Science, and Transportation.

EC–3107. A communication from the Comptroller of the currency, transmitting, pursuant to law, the Annual Report of the Consumer Affairs Division of the Comptroller of the Currency for calendar year 1977; to the Committee on Commerce, Science, and Transportation.

EC–3108. A communication from the Chairman, Interstate Commerce Commission, transmitting, pursuant to law, a report on the effectiveness of the Rail Passenger Service Act of 1970 (Public Law 91–518); to the Committee on Commerce, Science, and Transportation.

EC–3109. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend section 2632 of title 10, United States Code, to provide the Secretary of the department in which the Coast Guard is operating with the authority to transport Coast Guard employees to and from certain places of employment; to the Committee on Commerce, Science, and Transportation.

EC–3110. A communication from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend Section 5(a) of the Wild and Scenic Rivers Act by designating a segment of the North Umpqua River in Oregon and its tributary Steamboat Creek for study as potential additions to the National Wild and Scenic Rivers System; to the Committee on Energy and Natural Resources.

EC–3111. A communication from the Acting General Counsel, Department of Energy, reporting, pursuant to law, notice of a meeting related to the International Energy Program; to the Committee on Energy and Natural Resources.

EC–3112. A communication from the Administrator, Energy Information Administration, Department of Energy, transmitting, pursuant to law, a report of monitored changes in the refiner distribution and market shares of the statutory categories of refined petroleum products; to the Committee on Energy and Natural Resources.

EC–3113. A communication from the Acting Administrator, United States Environmental Protection Agency, transmitting, pursuant to law, a report on actions taken by the Environmental Protection Agency and other Federal agencies to regulate sources of halocarbon emissions; to the Committee on Environment and Public Works.

EC–3114. A communication from the Chairman, National Professional Standards Review Council, Public Health Service, Department of Health, Education, and Welfare, reporting, pursuant to law, on the National Professional Standards Review Council (NPSRC); to the Committee on Finance.

EC–3115. A confidential communication from the Director, Defense Security Assistance Agency, transmitting, pursuant to law, a report on the impact of United States foreign arms sales and transfers on United States defense readiness and national security; to the Committee on Foreign Relations.

EC–3116. A communication from the Administrator, Agency for International Development, Department of State, transmitting, pursuant to law, a report regarding activities carried out under Section 121 of the Foreign Assistance Act of 1961, as amended, on the Sahel Development Program; to the Committee on Foreign Relations.

EC–3117. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, international agreements other than treaties entered into by the United States within sixty days after the execution thereof; to the Committee on Foreign Relations.

EC–3118. A confidential communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on major issues of the FFG–7 Guided Missile Frigate Shipbuilding Program; to the Committee on Governmental Affairs.

EC–3119. A confidential communication from the Comptroller General of the United States, transmitting pursuant to law, a report on the next-generation aircraft carrier: the CVV and other alternatives; to the Committee on Governmental Affairs.

EC–3120. A secret communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the major issues of the Stinger Surface-to-Air Missile Program; to the Committee on Governmental Affairs.

EC–3121. A confidential communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the major issues of the Advanced Attack Helicopter Program; to the Committee on Governmental Affairs.

EC–3122. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, a Department of the Navy proposal, with supporting documentation, to alter two existing Navy record systems; to the Committee on Governmental Affairs.

EC–3123. A communication from the Administrator, Health Care Financing Administration, Department of Health, Education, and Welfare, transmitting, pursuant to law, a report on a new system of records, "Medicare Second Surgical Opinion Experiments HEW–HCFA–OPPR–09–70–0001"; to the Committee on Governmental Affairs.

EC–3124. A communication from the General Counsel, Foreign Claims Settlement Commission of the United States, transmitting, pursuant to law, a report of its compliance with the Government in the Sunshine Act (Public Law 94–409); to the Committee on Governmental Affairs.

EC–3125. A communication from the Acting Staff Director, United States Commission on Civil Rights, transmitting, pursuant to law, a report on its administration of the Freedom of Information Act for calendar year 1977; to the Committee on the Judiciary.

EC–3126. A communication from the Director, United States Information Agency, transmitting, pursuant to law, a report on its administration of the Freedom of Information Act; to the Committee on the Judiciary.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions, which were referred as indicated:

POM–538. A resolution adopted by the Legislature of the State of Massachusetts; to the Committee on the Budget:

"RESOLUTION

"Whereas, The domestic needs of our nation will never receive the major attention they deserve, or the financing they require, until there is a re-ordering of our national priorities; and

"Whereas, The amount of expenditures for the Pentagon is excessive, and unrelated to our actual foreign policy and defense needs; and

"Whereas, The attitude exists among some in the administration and Congress that Pentagon expenditures, regardless of their size and merit, must be reduced; and

"Whereas, If we eliminate the items which are fixed by law and contractual obligation, including such items as social security and railroad retirement, which are financed by separate payroll taxes, unlike defense expenditures and which come out of general revenues, and eliminate fixed costs such as interest payments or pensions, we find that only twenty-six per cent of the national budget is subject to appropriations controlled by Congress as reported by the budget office of the United States Congress; and

"Whereas, Of that twenty-six per cent, eighteen per cent goes to the military, including military foreign aid, and only eight per cent for domestic civilian needs; and

"Whereas, Responsible policy requires that if we advocate increased domestic and social spending, we must indicate where such funds must come from; now therefore, be it

"*Resolved*, That the Massachusetts Senate urges Congress to redress the imbalance between domestic expenditures and expenditures for the Pentagon by recognizing that the social defense of this nation is at least as important to the national defense as is our military defense, and by supporting the transfer of funds from military spending to human needs programs through the congressional budget process; and be it further

"*Resolved*, That copies of these resolutions be transmitted forthwith by the Clerk of the Senate to the President of the United States, the presiding officer of each branch of the Congress, and to the members thereof from the commonwealth."

POM–539. A resolution adopted by the Legislature of the State of Pennsylvania; to the Committee on Foreign Relations:

"RESOLUTION

"Whereas, For over six decades through two world wars and an intense civil war to hold back communism, Greece has been a fighting ally and friend of the United States, and is now an indispensable ally and the symbol of democratic government in Eastern Europe; and

"Whereas, Greece is essential to the security of the United States and the Free World in the Mediterranean area and is essential for the safeguarding of the Sixth Fleet in the Mediterranean; and

"Whereas, Turkey has attacked, seized and continues to occupy the independent island nation of Cyprus, by illegal use of United States supplied military weapons in violation of the United States Foreign Military Assistance and Sales Acts, and in violation of four United Nation Resolutions; and

"Whereas, The humanitarian crisis on Cyprus, involving 200,000 Cypriot refugees, grow's increasingly more desperate, as the prospects for a negotiated settlement appear dim; and

"Whereas, President Carter has declared that the United States foreign policy shall be committed to the protection of human rights, and he has proceeded to withdraw United States aid from nations which have persisted in violation of human rights, such as Turkey has committed, and is continuing to commit, against the people and the nation of Cyprus; now therefore be it

"*Resolved*, That the Senate of the Commonwealth of Pennsylvania urges the President and the Congress of the United States to exert their best efforts towards a just resolution of the Cyprus conflict, to effectuate a removal of all foreign troops from Cyprus, to restore the 200,000 suffering Cypriot refugees to their homes, and to restore to the people of Cyprus the right of self-determination; and be it further

"*Resolved*, That the Senate of the Commonwealth of Pennsylvania urges the Presi-

dent and the Congress of the United States to give generous support to the Cypriot refugees, and to continue to support Greece by annual aid authorizations and to continue the embargo on arms to Turkey until such time as Turkey acts to resolve the Cyprus conflict; and be it further

"Resolved, That copies of this resolution be transmitted to the President of the United States and to the presiding officer of each House of Congress of the United States and to each Senator and Representatives from Pennsylvania in the Congress of the United States."

POM–540. A concurrent resolution adopted by the Legislature of the State of South Dakota; to the Committee on Human Resources:

"HOUSE CONCURRENT RESOLUTION NO. 1016

"Whereas senior citizens are a valuable resource to the communities of this country because they are capable of providing vital services to all the citizens of the community; and

"Whereas, in the golden years of their lives, these citizens can convey their experiences for the benefit of the entire community;

"Whereas, the Retired Senior Volunteer Program is a federally and locally funded action program providing a dual benefit to the community by creating meaningful retirement roles to senior citizens through community volunteer services and providing needed volunteer help to the community; and

"Whereas, there are 1,800 volunteers serving in the nine Retired Senior Volunteer Programs in this state; and

"Whereas, this state has received 327,566 hours of volunteer service in one year from these programs; and

"Whereas, this assistance would have impacted state and local governments in the amount of $753,401.80 had they been required to hire such services;

"Now, therefore, be it resolved, by the House of Representatives of the Fifty-third Legislature of the state of South Dakota, the Senate concurring therein, that the state of South Dakota deeply appreciated the contributions of the Retired Senior Volunteer Program and requests that the Congress support full funding for such program; and

"Be it further resolved, that copies of this Resolution be sent to President Carter, the Chief Clerks of the United States House of Representatives and Senate, the South Dakota Congressional Delegation, and Jo Ann Eisenbeisz, Director of the South Dakota Retired Senior Volunteer Program."

POM–431. A memorial adopted by the Legislature of the State of Arizona; to the Committee on the Judiciary:

"HOUSE MEMORIAL 2002

"Whereas, each year thousands of persons are sentenced by state courts to prison for the commission of crimes; and

"Whereas, the current habeas corpus actions in federal court allow each defendant to demand an individual reexamination of each issue in a case and there is no requirement that all such issues be raised in one appellate action; and

"Whereas, the court system of this country is deluged with thousands of cases on appeal; and

"Whereas, the backlog of cases causes hardships on victims and defendants alike; and

"Whereas, excessive appeals result in the expenditure of millions of dollars in legal investigative and court costs and tend to thwart and defeat justice.

"Wherefore your memorialist, the House of Representatives of the State of Arizona, prays:

"1 That Congress give its most earnest consideration to the prompt enactment of legislation to require the consolidation of issues based on habeas corpus relief into one appeal.

"2. That the Secretary of State of the State of Arizona transmit copies of this Memorial to the President of the United States, the President of the United States Senate, the Speaker of the House of Representatives of the United States and to each Member of the Arizona Congressional Delegation."

REPORTS OF COMMITTEES SUBMITTED DURING THE RECESS

Pursuant to order of March 16, 1978, the following reports of committees were submitted during the recess:

Mr. DOLE, from the Committee on Agriculture, Nutrition, and Forestry, without amendment:

S. Res. 417. An original resolution waiving section 303(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2481. Referred to the Committee on the Budget.

S. Res. 418. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2481. Referred to the Committee on the Budget.

By Mr. DOLE, from the Committee on Agriculture, Nutrition, and Forestry, with an amendment and an amendment to the title:

S. 2481. A bill to provide wheat, feed grain, and cotton producers the opportunity to receive parity prices for the 1978 crop (Rept. No. 95–704).

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MAGNUSON, from the Committee on Appropriations, without recommendation:

H.R. 6782. A bill to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion (Rept. No. 95–705).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. LONG, from the Committee on Finance:

Herbert L. Chabot, of Maryland, to be a Judge of the U.S. Tax Court.

(The nomination from the Committee on Finance was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. CANNON, from the Committee on Commerce, Science, and Transportation:

Elwood Thomas Driver, of Virginia, to be a member of the National Transportation Safety Board.

James B. King, of Massachusetts, to be Chairman of the National Transportation Safety Board.

(The nominations from the Committee on Commerce, Science, and Transportation, were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. WILLIAMS, from the Committee on Human Resources:

The following-named persons to be members of the Board of Directors of the Legal Services Corporation:

Cecilia Denogean Esques, of Arizona;
Steven L. Engelberg, of Maryland;
Hillary Diane Rodham, of Arkansas;
Richard Allen Trudell, of California; and
Josephine Marie Worthy, of Massachusetts.

The following-named persons to be members of the National Commission on Employment and Unemployment Statistics:

Bernard E. Anderson, of Pennsylvania;
Glen G. Cain, of Wisconsin;
Jack Carlson, of Maryland;
Michael Harold Moskow, of Illinois;
Rudolph Alphonsus Oswald, of Maryland;
Samuel L. Popkin, of California;
Mitchell Sviridoff, of New York; and
Joan Lawson Wills, of Virginia.

The following-named persons to be members of the Board of Regents of the National Library of Medicine, Public Health Service:

Thomas C. Chalmers, of New York;
Kelly M. West, of Oklahoma;
Samuel Richardson Hill, Jr., of Alabama;
Doris H. Merritt, of Indiana;
Cecil George Sheps, of North Carolina;
James Franklin Williams II, of Michigan; and
Nicholas Edward Davies, of Georgia.

(The nominations from the Committee on Human Resources were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. DOLE:

S. 2760. A bill to revise Public Law 480 Regulations Governing Operations; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DOMENICI:

S. 2761. A bill to delegate power to the States, through their State legislatures, to disapprove certain specified activities licensed by the Nuclear Regulatory Commission, and for other purposes; to the Committee on Environment and Public Works.

By Mr. GRAVEL:

S. 2762. A bill to provide for the development of aquaculture in the United States, and for other purposes; to the Committee on Commerce, Science, and Transportation and the Committee on Agriculture, Nutrition, and Forestry, jointly, by unanimous consent.

By Mr. BARTLETT:

S. 2763. A bill to amend the Employee Retirement Income Security Act of 1974, and the Internal Revenue Code of 1954 to improve the administration and fairness of provisions relating to employee benefit plans; to the Committee on Finance and the Committee on Human Resources, jointly, by unanimous consent.

By Mr. BAYH:

S.J. Res. 123. A joint resolution proposing an amendment to the Constitution to provide for election of the President and Vice President of the United States by the national bonus plan; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DOLE:

S. 2760. A bill to revise Public Law 480 regulations governing operations; to the Committee on Agriculture, Nutrition, and Forestry.

(The remarks of Mr. DOLE when he introduced the bill appear earlier in today's proceedings.)

By Mr. DOMENICI:

S. 2761. A bill to delegate power to the States through their State legislatures, to disapprove certain specified activities licensed by the Nuclear Regulatory Commission, and for other purposes; to the Committee on Environment and Public Works.

STATE CONCURRENCE IN SITING OF NUCLEAR WASTE STORAGE

● Mr. DOMENICI. Mr. President, I am today introducing legislation relating to the crucial issue of state concurrence in the siting of nuclear waste storage facilities. Legislation in this area is both timely and necessary, and I am hopeful that my Senate colleagues will give this matter their prompt and careful attention.

Mr. President, the rapidly intensifying interest in solving the problems associated with permanent disposal of the accumulated radioactive nuclear by-products from our defense programs and from operation of commercial light water nuclear reactors has put enormous pressure on the Federal Government to locate and develop safe and environmentally sound long-term storage facilities at the earliest possible date. Release this week of a report by the Department of Energy Task Force for Review of Nuclear Waste Management, headed by John M. Deutch, Director of DOE's Office of Energy Research, has further heightened this interest. Among its key recommendations, the task force emphasized the need for development of away-from-reactor interim storage of spent fuel rods, early demonstration of satisfactory long-term storage techniques for spent rod assemblies, timely development of the waste isolation pilot plant planned for storage of certain defense wastes in an area near Carlsbad, N. Mex., and expanded licensing authority for the NRC. All of these recommendations bear heavily on the role and responsibilities of individual States in the nuclear waste field.

The legislation I am introducing today will establish beyond any doubt the right of a State to say "no" to the location within its boundaries of facilities intended for the long-term storage of radioactive nuclear waste materials. This right is limited only by the restriction that the proposed facility be licensable by the NRC. Companion legislation, to be introduced next week, will greatly expand the NRC licensing authority to cover all waste disposal facilities except certain limited activities at facilities associated with the national defense research and development program.

My bill also sets out a step-by-step procedure by which a State can exercise this veto power. The Governor and the State legislature would be promptly notified of the Nuclear Regulatory Commission's decision to allow development of a long-term waste disposal facility in the State. The State would then be given a minimum of 120 days, including 30 days during which the State legislature is in session, to either veto the facility or impose a 1-year moratorium on the project. If the State adopted a moratorium of the project, it would retain the right to veto the facility at any time during the moratorium period. The specific means for exercising the State veto under the bill would be left to the State legislature.

My bill also assures that the State will be given full and timely information on the proposed waste disposal facility and that the State legislature or its representative will have every opportunity to participate in any NRC licensing proceeding concerning development of the facility and to give its advice to NRC on the proposed project. Both the Governor and the State legislature must be given at least 6 months' advance notice of the proposal before any application may be filed with the Nuclear Regulatory Commission. During this period, the State must be given access to all information relevant to the proposal.

The bill also gives the Governor and the State legislature or its representative the opportunity to independently review this information. The scope and form of any reviews by either the Governor or the State legislature would be left to their discretion. In order to carry out its review function, the State legislature would be eligible for funding by the Nuclear Regulatory Commission. An authorization of $500,000 for fiscal year 1979 has been included in the bill for this purpose.

Finally, any advice or findings by the State legislature or its representative based upon its review could be forwarded to NRC where it would be included in the Commission's environmental impact statements on the project. Taken together, these provisions give the States the resources, information and opportunity to participate in the planning, siting and licensing of these waste disposal facilities and to share in the decision-making responsibility for the project.

Mr. President, from the point of view of a State faced with the possibility of Federal action to construct and operate a nuclear waste repository within that State's boundaries the protection offered by this legislation is essential. This is particularly true when the proposed facility is to be located on Federal land where, under current law, the States have limited authority to directly influence Federal actions. The history of nuclear waste repositories in this country is less than exemplary. With current technology we can and must improve upon this record, and, in the process, restore the confidence of our citizens in this Nation's technical capability to solve this critical problem.

Mr. President, under current law the final decision regarding siting of many of these nuclear waste disposal facilities is made by Federal officials who in truth may be more interested in solving a problem quickly and with minimum fuss, rather than in locating the best site. This situation is even more likely to be true today as the pressure on Federal officials to find a solution for nuclear waste disposal intensifies. My legislation will assure that the Federal Government remains honest and open in its dealings with States in this critical area and will assure that the States will have a meaningful role in these decisions.

Mr. President, I would ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the purposes of this Act are:

(a) to recognize the interests of the States in the siting of facilities to be licensed by the Nuclear Regulatory Commission (hereinafter referred to as the "Commission") for long term storage and disposal operations, including research, development and demonstration operations, for high level radioactive wastes, irradiated nuclear reactor fuel, non-high level transuranium contaminated wastes, or low level radioactive wastes;

(b) to permit a State, through its State legislature, to fully participate in the process for planning, siting, and licensing any such facility to be located in that State; and

(c) to authorize the State, through its State legislature, to disapprove the site selection of any such facility to be located in that State.

SEC. 2. At least six months prior to filing an application with the Commission, any person proposing to apply for a Commission authorization to develop a facility for long term storage and disposal operations, including research, development, and demonstration operations, for high level radioactive wastes, irradiated nuclear reactor fuel, non-high level transuranium contaminated wastes or low level radioactive wastes must publicly notify the Governor and the presiding officers of the State legislature for the State in which the facility is to be located of its intent to file the application. Upon providing any notice of intent required by this section, such person must make available to the Governor and to the State legislature or its designated representative on a continuing basis all information, recommendations, and findings developed by it which are relevant to the intended application. The Commission may not accept any such application from a person who fails to comply with the requirements of this section. Upon receiving any notice of intent required by this section, the Governor and the State legislature or its designated representative may conduct such reviews of the information, recommendations, and findings made available to them as they deem appropriate.

SEC. 3. The Commission shall promptly notify the Governor and the presiding officers of the State legislature upon receipt of any application for a Commission authorization to develop a facility for long term storage and disposal operations, including research, development and demonstration operations, for high level radioactive wastes. irradiated nuclear reactor fuel, non-high level transuranium contaminated wastes, or low level radioactive wastes. The State legislature or its designated representative shall be afforded the opportunity to participate in any Commission proceeding on the application. Such opportunity to participate shall include reasonable opportunity to offer evidence, interrogate witnesses, and advise the Commission regarding the application without requiring the

State legislature or its representative to take a position for or against the granting of the application. The State legislature or its designated representative may also submit advice, recommendations or findings to be included in any environmental impact statement on the application which is prepared by the Commission pursuant to the National Environmental Policy Act of 1969, as amended.

SEC. 4. The Commission shall promptly notify the Governor and the presiding officers of the State legislature upon the issuance of any Commission authorization to develop a facility in that State for long term storage and disposal operations, including research, development and demonstration operations, for high level radioactive wastes, irradiated nuclear reactor fuel, non-high level transuranium contaminated wastes, or low level radioactive wastes. Any such authorization by the Commission shall not take effect for a period of at least 120 days, including at least thirty days during which the State legislature is in session, after the date of the Commission's notification. During such period, the State may (1) by majority vote of the State legislature, postpone the effectiveness of the Commission's authorization to develop the facility for a period of one year from the date of the legislature's action, or (2) in accordance with procedures adopted by the State legislature, immediately disapprove the Commission's authorization to develop the facility. Prior to the expiration of any one-year postponement adopted under this section, the State, in accordance with procedures adopted by the State legislature, may disapprove the Commission's authorization to develop the facility. Any such Commission authorization to develop the facility which is disapproved by a State in accordance with this section shall not take effect.

SEC. 5. The Commission is authorized to make annual grants and to provide other assistance, in accordance with rules and regulations promulgated by the Commission, to any State legislature which elects to conduct reviews of an intended application pursuant to section 2 of this Act. There is authorized to be appropriated to the Commission for this purpose for fiscal year 1979 to remain available until expended $500,000.

SEC. 6. As used in this Act, the term "person" means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency, any State or political subdivision thereof any political entity within a State, or any other entity.●

By Mr. GRAVEL:

S. 2762. A bill to provide for the development of aquaculture in the United States, and for other purposes; to the Committee on Commerce, Science, and Transportation and the Committee on Agriculture, Nutrition, and Forestry, jointly, by unanimous consent.

NATIONAL AQUACULTURE ORGANIC ACT OF 1978

● Mr. GRAVEL. Mr. President, I am introducing today legislation to focus national attention on the long neglected activity of aquaculture.

Aquaculture is the controlled cultivation of aquatic plants and animals. It is practiced in various degrees of intensity throughout the world and the time is now right for concerted action in the United States.

By introducing the National Aquaculture Organic Act of 1978, I hope to promote the concept of aquaculture by encouraging increased and coordinated activity in this area by public, private, educational, and almost any other seriously interested party.

AQUACULTURE—AN OVERVIEW

The world activity in aquaculture is wide and varied. China has been cultivating fish for over 2000 years. Japan now produces more than 10 percent of its seafood needs through aquaculture. And Russia has been giving aquaculture increased attention.

The United States has been dabbling in various forms of aquaculture for a considerable period of time, but a Library of Congress report (aquaculture—1976—serial No. 94-31) indicates that aquaculture in the United States has grown insignificantly compared to such activities in other parts of the world. The species which are presently receiving the most attention in the United States are salmon, catfish, trout, oysters, crawfish, clams, and shrimp. The potential for increased production of these species, as well as the production of species heretofore uncultured in the United States is very promising.

My home State of Alaska has been involved in the cultivation of fin fish since the late 1800's. With more than 50 percent of the entire U.S. coastline located within the State of Alaska, one can understand why my interest in aquaculture is great. The potential for marine aquaculture development within Alaska is truly incredible, not to mention the vast possibilities for future freshwater-cultivation.

AQUACULTURE—MARKET POTENTIAL

World fishery resources were once thought to be practically unlimited. This has been clearly shown not to be the case. The world resources are now estimated by some experts to be capable of yielding a maximum global harvest of 100 to 150 million metric tons per year. More conservative estimates rarely exceed 100 million metric tons, including that of the National Oceanic and Atmospheric Administration, which estimates that the 100 million metric ton figure will be met by 1980. This suggests that a world shortage of fish products is possible in the foreseeable future.

World per capita fish consumption has increased over the past several years and in the United States alone has risen to a present level of 12.9 pounds per person per year. Reliable estimates project American consumption to increase to 15.2 pounds by the year 2000. A Library of Congress study has predicted that in the same period of time overall demand for seafood products in the United States, both edible and industrial, is expected to increase by a full 80 percent.

All these indicators suggest that the demand for fish products will only continue to increase in the years to come. With wild fish stock exploitation reaching maximum levels, per capita consumption of fish products on the rise, and the world population expected to increase from a level of 4 billion today to 6 billion by the turn of the century, aquaculture must be viewed as a promising possibility in helping to meet these food demands.

AQUACULTURE—ECONOMIC POTENTIAL

For a nation practically surrounded by water and replete with possible sites for raising inland fish species, fishery imports into the United States are surprisingly high. In 1976 the United States imported 4.6 billion pounds of edible fishery products valued at $1.7 billion, and 1.6 billion pounds of industrial fishery products worth $.5 billion. This adds up to $2.2 billion of American money sent abroad to purchase fishery products. The U.S. fishery exports in 1976 amounted to 241 million pounds, valued at only $330 million.

This leaves a net annual trade deficit of practically $2 billion for foreign fish products. Stated another way, close to 65 percent of fish consumed in the United States is imported from foreign countries.

The studious application of aquaculture techniques could help to reverse this unfavorable balance of trade situation. A promotion of aquaculture will result in the creation of many new jobs, fishery employment on a year-round rather than a seasonal basis, and an overall stability to the historical boom or bust fishery economy.

NATIONAL AQUACULTURE ORGANIC ACT—INTENT

Mr. President, the National Aquaculture Organic Act of 1978 will provide long overdue impetus to the promotion of aquaculture in the United States. My desire is to encourage the development of aquaculture of all types in all parts of the United States. This would include encouraging aquaculture for marine, as well as fresh water, species; for aquatic plants, as well as aquatic animals; for presently cultured species, as well as species as yet untested by the techniques of aquaculture; and for the rehabilitation and enhancement of public fisheries, as well as the promotion of commercial enterprises.

To accomplish these goals, my legislation designates the Department of Commerce as the agency with ultimate responsibility. The Commerce Department will, however, operate in close conjunction with the Departments of Agriculture and Interior, as both those Departments have proven themselves expert in many important aspects of aquaculture.

There are many facets to aquaculture, and I believe no single agency can or should be named the exclusive authority. The better approach is to tap the existing expertise of the several Departments and coordinate all aquaculture efforts through the Department of Commerce.

An Interagency Committee on Aquaculture will be formed to facilitate and coordinate information and activities among the three Departments, as well as all other agencies and parties involved.

My legislation also provides for the formulation of a national aquaculture development plan. This plan, to be drawn up in the year following enactment, will embody concrete suggestions on specific directions and priorities to pursue in the development of aquaculture in the United States.

A grant program will encourage participation in what is generally considered a rather expensive enterprise. These grants will allow the private entrepreneur to get involved in a venture that would otherwise, by virtue of prohibitive startup costs, be reserved for large corporations or the individual of great wealth.

A Federal aquaculture assistance fund is created for three purposes: First, to facilitate aquaculture financing by guaranteeing loans made to aquaculture operations since such loans have historically been unreasonably difficult to obtain; second, to make disaster loans for aquaculture stocks which are destroyed by unavoidable diseases; and third, to provide insurance coverage to aquaculture operations in those instances where insurance is not otherwise available.

NATIONAL AQUACULTURE ORGANIC ACT—COMPARISON TO OTHER AQUACULTURE LEGISLATION

Mr. President, the bill I offer today is in many respects similar to other pieces of aquaculture legislation already introduced in the Senate. S. 1043, introduced by Senator BENTSEN and of which I am a cosponsor, and S. 2218 and S. 2582, introduced by Senators STONE and WEICKER, respectively, all make numerous points which coincide with the proposals I have here. H.R. 9370, a House aquaculture bill that just recently passed that Chamber by a vote of 234 to 130, is also similar in many regards to this piece of legislation.

There are, however, three important new areas which my bill emphasizes, and I should like briefly to explain them.

First, unlike the other aquaculture legislation, I would require that the national aquaculture development plan be formulated at the regional level in advisory subcommittees and finalized at the national level by the National Advisory Committee. In a country as large as ours, with aquaculture interests as varied as they are, regional input for this national plan is an absolute necessity.

To insure adequate input from interests as diverse as shrimp farmers in Florida, salmon ranchers in Alaska, oyster raisers in Maine, and catfish farmers in the Midwest, information must be gathered on a regional basis. Only persons intimately familiar with the regional needs and conditions of the various parts of this country can provide such particularized data.

Second, I add the enhancement and rehabilitation of traditional publicly owned fish stocks as a major goal to be addressed by this legislation. It seems obvious that in addition to encouraging development of commercial aquaculture for the private sector, we should not overlook the desirability of rehabilitating the numerous depleted fish stocks which are of vital importance to the public sector.

The third and final issue of importance is the problem of land and water access for aquaculture facilities. I believe the contributions which aquaculture can make in helping to meet nutritional needs, stimulating commercial activity, and enhancing existing fisheries warrant its being given due consideration in land and water use management deliberations.

Aquaculture is certainly an activity that has been neglected in this country for too long. The numerous benefits to be gained—commercial, nutritional, and conservational, among others—have not yet been fully appreciated. Passage of this legislation will be a positive step toward translating these benefits into tangible realities.

Mr. President, I ask unanimous consent that the text of this bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2762

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Aquaculture Organic Act of 1978".

SEC. 2. FINDINGS, PURPOSE, AND POLICY.

(a) The Congress finds the following:

(1) The world production of seafood has declined since 1970 and the harvest of some populations of fish and shellfish has exceeded levels of maximum sustainable yield.

(2) Certain stocks of fish and shellfish of importance to the United States are depleted, or are declining, and such depletion or decline has an undesirable impact on both commercial and recreational fisheries.

(3) There is an extensive market for seafood in the United States, but the United States imports in excess of 50 percent of its fish and shellfish for human consumption (which imports are ten times the level of exports), and this dependence on imports as a source of protein makes it difficult to insure continuous supplies and suggests that alternatives such as aquaculture be developed.

(4) Many segments of the world population are now facing serious nutritional deficiencies and food shortages due to adverse climatic conditions and the steady growth of population. These problems will become more severe, and the resulting demand for increased food production will have to be met chiefly through the application of scientific and technological advances from research on aquaculture and other food production systems.

(5) Aquaculture is contributing significantly to world food supplies with production equal to 10 percent of current landings of seafoods and has the potential for increase by a factor of five before the end of this century.

(6) Less than 3 percent of current United States fisheries production results from aquaculture but there is a good potential for expanding production from aquaculture to equal or exceed the worldwide average, thereby helping to provide United States consumers with stable supplies of high quality aquatic foods.

(7) Growth of aquatic plants is a source of food for human and animal consumption as well as a source of industrial materials and energy. The Congress recognizes the importance of developing aquaculture of both plant and animal species.

(8) The stocking of advanced life stages of fish and shellfish produced by aquaculture is a means of rebuilding and augmenting fish and shellfish populations and establishing new fisheries.

(9) The application of aquaculture technology offers opportunities for the recovery of wasted thermal energy, nutrients, and other resources and may be a more efficient use of these resources for food production culture.

(10) Where water, whether fresh, brackish, or marine is suitable for aquaculture, appropriate consideration should be given to the utilization of such water for aquaculture along with the other uses of such water.

((11) Where land-use management policies may inhibit the development of aquaculture facilities in areas suitable for aquaculture, appropriate consideration should be given to the utilization of these areas for aquaculture along with the other uses of such areas.

(12) Current efforts to develop aquaculture in the United States are highly diffuse, and a strong commitment by the Federal Government will make aquaculture more efficient and competitive, thereby stimulating public and private investment and development.

(13) While many scientific and technological problems are unsolved, there is sufficient knowledge to further the development of aquaculture production systems for many species of fish and shellfish.

(14) The development of aquaculture in the United States has been limited by the inability of producers of aquatic species to obtain adequate capital and a reliable source of seed stock.

(15) Aquaculture in the United States has traditionally concentrated on a few aquatic species, but many others have a potential for commercial and other culture. However, the culture of additional species may include a higher degree of risk than the culture of traditional species, especially during the initial stages.

(16) Government programs that help to reduce the risks associated with production of agricultural commodities have not been generally available to producers of those aquatic species in which the risk is high.

(17) The rehabilitation and enhancement of the publicly owned fish and shellfish resources are desirable applications of aquaculture technology as a means to increase the general public benefits to be derived from the utilization of these common property resources.

(18) Extensions of jurisdiction over marine resources by numerous nations have resulted in the exclusion of many fishing nations from traditional fishing areas and created a demand in those nations for aquatic food-stuffs. Aquaculture could supply this new demand.

(19) The Select Committee on Nutrition and Human Needs of the Senate has recommended an increase in the fish consumption of the American family. Aquaculture can help to carry out this recommendation.

(b) The purpose of this Act is to promote aquaculture in the United States by—

(1) declaring a national aquaculture policy;

(2) establishing and implementing a national plan for aquaculture; and

(3) developing programs and encouraging activities:

which will result in the coordination of domestic aquaculture efforts, the conservation of existing aquatic resources, the rehabilitation and enhancement of the publicly owned fish and shellfish stocks, the encouragement of commercial aquaculture activities, the creation of new industries and job opportunities, and other national benefits.".

(c) Aquaculture has a high potential for augmenting existing commercial and sport fisheries, thereby increasing the supply of aquatic protein for both human and animal consumption and assisting the United States in meeting its future food needs and contributing to the solution of world food problems. It is, therefore, in the national interest, and it is the national policy, to encourage the development of aquaculture.

SEC. 3. DEFINITIONS.

As used in this Act—

(1) The term "aquaculture" means the propagation and rearing of aquatic species in controlled or selected environments, including ocean ranching.

(2) The term "aquaculture facility" means any land, structure, or other appurtenance, if such land, structure, and appurtenance is located within the United States, which is

used for aquaculture, including, but not limited to, any laboratory, vehicle, hatchery, rearing pond, raceway, pen, incubator, or other equipment.

(3) The term "aquatic species" means any species, native or introduced, of finfish, mollusk or crustacean or other aquatic invertebrate, amphibian, reptile, or aquatic plant, other than any such species which is primarily used for ornamental purposes.

(4) The term "Fund" means the Federal Aquaculture Assistance Fund established by section 11.

(5) The term "person" means any individual who is a citizen or national of the United States and any corporation, partnership, association, or other entity (including, but not limited to, any community development corporation or fisherman's cooperative) organized or existing under the laws of any State.

(6) The term "Secretary" means the Secretary of Commerce.

(7) The term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, and any other Commonwealth, territory, or possession of the United States.

(8) The term "United States", when used in a geographical context, means all States.

SEC. 4. NATIONAL AQUACULTURE DEVELOPMENT PLAN.

"(a)(1) Before the close of the 1-year period beginning on the effective date of this Act, the Secretary, after consultation with the Secretary of the Interior and the Secretary of Agriculture, shall prepare a National Aquaculture Development Plan (hereinafter in this Act referred to as the 'plan').

"(2)(A) The Secretary shall, after consultation with the Secretary of the Interior and the Secretary of Agriculture, establish an advisory committee for the purpose of assisting the Secretary in formulating a plan responsive to the various regional needs, interests, and approaches to the concept of aquaculture.

"(B) Such advisory committee shall be composed of regional subcommittees. The subcommittee regions shall be established as follows:

"(i) Eight regional subcommittees shall be created which correspond in geographical composition to the eight regional divisions created under section 302(a) of the Fishery Conservation and Management Act of 1976.

"(ii) Other regional subcommittees shall be created by the Secretary to represent the remaining non-oceanic States which are not a part of the regional subcommittees created by clause (i) of this subparagraph. Such other regional subcommittees shall be established on the basis of the following criteria:

"(I) geographical proximity of States to one another,

"(II) similarity of States in aquacultural activities and potential, and

"(III) other revelant factors.

"(C) Membership of the regional advisory subcommittee from any region must include representatives of at least the following groups, where such groups exist in that region:

"(i) State fish and game department;

"(ii) commercial fishermen;

"(iii) fishfood processors;

"(iv) private sector aquaculture organizations;

"(v) regional fishery management councils;

"(vi) Federal fish and wildlife agency;

"(vii) recreational fishermen; and

"(viii) educational institutions.

"(D) The governors of the various States shall appoint members to the regional advisory subcommittees.

"(E) The members of the regional advisory committees established under subparagraph (B), while away from their homes or regular places of business in the performance of services for the committee, shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.

"(b) The plan shall be formulated at the regional level and coordinated and finalized at the secretarial level. The final plan shall—".

(1) identify those aquatic species (hereinafter referred to in this Act as "priority aquatic species") which the Secretary determines to have a potential for culturing on a commercial or other basis, which determination shall be made by the Secretary after taking into account—

(A) the extent of commercial aquaculture, if any, currently being carried out with respect to such species, and the projected biological and economic feasibility of culturing such species;

(B) the extent to which aquaculture research and development have been undertaken, within the public and private sectors, with respect to such species;

(C) the time and resources which will be required to develop aquaculture technology to the point where such species can be cultured on a commercial or other basis; and

(D) such other factors as the Secretary determines to be appropriate; and

(2) contain an aquaculture development program, prepared by the Secretary, for each priority aquatic species.

(c) The aquaculture development program contained in the plan for each priority aquatic species shall set forth those actions which the Secretary determines should be undertaken, and the period of time within which each such action should be completed, to provide for the culture of each such species on a commercial or other basis. Such actions, with respect to each priority aquatic species, shall include—

(1) such research and development, technical assistance, demonstration, extension education, and training as may be necessary and appropriate regarding—

(A) aquaculture facility and operation,

(B) water quality management,

(C) utilization of waste products (including thermal effluents),

(D) nutrition and the development of economical feeds,

(E) life history, genetics, physiology, and pathology and disease control (including research regarding organisms which may not be harmful to fish and shellfish but are injurious to humans),

(F) processing and market development, and

(G) production management and quality control;

(2) research with respect to the effect of the culture of such species on estuarine and other water areas;

(3) the identification and analysis of any legal or regulatory constraints which may affect the culture of such species;

(4) the development of adequate supplies of seed stock;

(5) the construction, purchase, lease, or acquisition of necessary developmental aquaculture facilities; and

(6) such other actions relating to research and development, technical assistance, demonstration, extension education, and training as such Secretary deems necessary and appropriate.

(d) In preparing an aquaculture development program for any priority aquatic species, and in reviewing any such program pursuant to subsection (f), the Secretary shall, to the extent practicable, take into account any significant action which has been, or which is proposed to be undertaken by any other Federal agency, any State agency, or any person, and which may affect the accomplishment of the program.

(e) Each action under each aquaculture development program prepared under this section for a priority aquatic species shall be implemented, either individually, jointly, or collectively, by the Secretary, the Secretary of the Interior, or the Secretary of Agriculture, as specified by the Secretary in the program on the basis of—

(1) responsibilities vested in the respective Secretaries by law or any executive action having the effect of law (including, but not limited to, Reorganization Plan Numbered 4 of 1970); and

(2) in cases where paragraph (1) does not apply, the experience, expertise, and other appropriate resources which the department, over which the Secretary concerned has jurisdiction, may have with respect to the action required under the program.

(f)(1) The Secretary, in consultation with the Secretary of the Interior, the Secretary of Agriculture, and the chief executive officer of any other Federal agency, any appropriate Regional Fishery Management Council, and any State agency which has significant functions which relate to aquaculture, shall review on an annual basis—

(A) each aquatic species not identified as a priority aquatic species; and

(B) the aquaculture development program established under the plan for each priority aquatic species to determine whether the actions specified in the program are being accomplished on a successful and timely basis.

(2) If as a result of the review conducted pursuant to paragraph (1)(A), the Secretary determines, after taking into account the criteria set forth in subsection (b)(1), that any aquatic species has a potential for culturing on a commercial or other basis the Secretary shall by regulation amend and plan to identify such species as a priority aquatic species and prepare an aquaculture development program for such species pursuant to subsection (c).

(3) If as a result of the review conducted pursuant to paragraph (1)(B), the Secretary finds that—

(A) any action so specified should be revised, the Secretary shall make such revision to the program as he deems necessary and appropriate; or

(B) sufficient progress is not being made with respect to any such program or that actions taken under any such program indicate that culture of the priority aquatic species concerned is doubtful, the Secretary shall cancel the program.

The Secretary shall by regulation amend the plan whenever any revision or cancellation is made pursuant to this subsection.

SEC. 5. FUNCTIONS AND POWERS.

(a) In implementing the aquaculture development program prepared under section 4 for any priority aquatic species, the Secretary, the Secretary of the Interior, or the Secretary of Agriculture, as the case may be, shall—

(1) provide advisory, educational, and technical assistance (including training) with respect to culture of the species to interested public and private organizations and individuals, but in providing such assistance shall, to the maximum extent practicable, avoid duplication of like assistance provided by other Federal agencies;

(2) consult and cooperate with interested persons, Federal, State, and local government agencies, regional commissions, and educational institutions regarding the development of aquaculture technology;

(3) produce, under the authority of section 4(c)(4), and sell at cost seed stock for

the priority aquatic species when privately produced seed stock is unavailable, unreliable, or not sufficient to meet production needs;

"(4) encourage the implementation of aquaculture technology in the rehabilitation and enhancement of the publicly owned fish and shellfish stocks, as well as the promotion of private commercial aquacultural enterprises;

"(5) assist the development of aquaculture by requiring that in areas where multiple land and water uses exist, aquaculture should be viewed as an important use which should be given appropriate consideration; and".

(6) prescribe such regulations as may be necessary to carry out such program.

(b) The Secretary, the Secretary of the Interior, or the Secretary of Agriculture may, incident to such Secretary's implementation of any aquaculture development program—

(1) for the purposes of assessing the biological and economic feasibility of any aquaculture system—

(A) conduct scale tests of the system, and, if necessary for the conduct of any such test, construct, operate, and maintain developmental aquaculture facilities, including, but not limited to, pilot plants for testing laboratory-scale results; and

(B) conduct such other tests or analyses as may be necessary;

(2) develop methods to enhance aquatic species stocks by aquaculture;

(3) carry out such studies and research with respect to aquatic species as may be appropriate regardless of whether such species is or has been identified as a priority aquatic species; and

(4) take such other actions as such Secretary deems necessary and appropriate.

(c) In addition to carrying out such other functions as are required under this Act, the Secretary shall—

(1) establish and maintain an aquaculture information center which shall function as a national clearinghouse for the collection, selection, analysis, and dissemination of scientific, technical, legal, and economic information relating to aquaculture;

(2) conduct appropriate surveys, in coordination with other agencies, of public and private aquaculture being carried out in the United States with respect to each aquatic species for the purpose of acquiring information on acreages, water use, production, culture techniques, and other relevant matters;

(3) arrange for the mutual exchange of information relating to aquaculture with foreign nations; and

(4) conduct a continuing study to determine which existing capture fisheries could be adversely impacted in the marketplace by competition from products produced by commercial aquaculture enterprises significantly aided under this Act, which study shall include an assessment of economic impact by species and by geographical region, and recommended measures to ameliorate any adverse impact. The Secretary shall report to Congress on the findings made under such study no later than 2 years following the effective date of this Act and every 2 years thereafter.

Any production information submitted to the Secretary by any person under paragraph (2) shall be confidential and shall not be disclosed except to the Secretary, the Secretary of the Interior, or the Secretary of Agriculture, as the case may be, for purposes of carrying out this Act, the advisory committee which may be established under section 4(a)(2)(A), or when required under court order. The Secretary shall by regulation prescribe such procedures as may be necessary to preserve such confidentiality, except that the Secretary may release or make public any such information in any aggregate or summary form which does not directly or indirectly disclose the identity or business of any person who submits such information.

(d)(1) The Secretary, the Secretary of the Interior, and the Secretary of Agriculture are each authorized to accept any gift, temporary donation, or devise or bequest of real or personal property, or the proceeds therefrom, or interests therein, for use in carrying out any function that such Secretary may have under this Act. Any such acceptance may be subject to the terms of any restrictive or affirmative covenant, or condition of servitude, if such terms are deemed by the Secretary concerned to be in accordance with law and compatible with the purpose for which acceptance is sought.

(2) Any gift or bequest of money, and any proceeds from the sale of other property received as a gift or bequest under this subsection, shall be deposited in a separate account in the Treasury and shall be disbursed upon the order of the Secretary concerned.

SEC. 6. COORDINATION OF FEDERAL AGENCY ACTIVITIES REGARDING AQUACULTURE.

(a)(1) There is established the Interagency Committee on Aquaculture (hereinafter in this section referred to as the "Committee") which shall be composed of the following officers or their designees:

(A) The Secretary, who shall be the Chairman of the Committee.

(B) The Secretary of the Interior.

(C) The Secretary of Agriculture.

(D) The Administrator of the Environmental Protection Agency.

(E) The Administrator of the Energy Research and Development Administration.

(F) The Commissioner of Food and Drugs.

(G) The Administrator of the Small Business Administration.

(H) The Chief of Engineers.

(I) The chief executive officer of any other Federal agency and any Regional Fishery Management Council which the Secretary finds to have significant functions which relate, or may relate, to the development of aquaculture.

(2) The functions of the Committee shall be—

(A) to ensure that there is a continuing exchange of information among the agencies represented on the Committee with respect to the nature and status of the programs or projects being carried out by such agencies which relate, or which may relate, to aquaculture in general or to the implementation of the plan; and

(B) to review on a continuing basis the relevant programs and projects of all Federal agencies to determine whether they are being carried out in compliance with subsection (b).

(b) Each Federal agency which has any function or responsibility with respect to aquaculture or has jurisdiction over any activity which affects, or may affect, the achievement of the purposes of this Act, shall, in consultation with the Secretary and to the maximum extent practicable, carry out such function, responsibility, and activity in a manner which is consistent with the purposes of this Act.

(c) Nothing in this Act shall be construed to amend, repeal, or otherwise modify the authority of any Federal officer or any Federal agency to carry out any functions relating to aquaculture which are authorized under any other provision of law.

SEC. 7. CONTRACTS AND GRANTS.

(a) The Secretary may carry out any function under this Act, and the Secretary of the Interior or the Secretary of Agriculture may carry out any function relating to any aquaculture development program which he is specified to implement under the plan, through grants to, or contracts with, any other Federal agency, any agency of any State and, subject to the approval of the State, any agency of any political subdivision thereof, any regional commission, any educational institution, or any other person.

(b) Any contract entered into, or any grant made, pursuant to this section shall contain such conditions and limitations as the Secretary concerned shall by regulation prescribe as being necessary and appropriate to protect the interests of the United States; except that no contract may be entered into, and no grant may be made, pursuant to this section unless the applicant submits with his application therefor a certification from each appropriate State agency and each appropriate local government agency stating that nothing in the laws administered by such agency prevents the carrying out of the project to which the contract or grant will be applied.

(c) The amount of any grant made pursuant to this section may not exceed one-half the estimated cost of the project for which the grant is made.

(d) Any person who receives a grant or contract under this section shall make available to the Secretary concerned and to the Comptroller General of the United States, or any of their authorized representatives, for purposes of audit and examination, any book, document, paper, and record that is pertinent to the funds received by such person under such grant or contract.

SEC. 8. GUARANTEES OF OBLIGATIONS ISSUED FOR AQUACULTURE FACILITIES.

(a)(1) The Secretary may, subject to the provisions of this section, guarantee, or make a commitment to guarantee, the payment of interest on, and the principal amount of, any obligation issued by an obligor for any of the following purposes:

(A) The financing of the construction, reconstruction, or reconditioning of any aquaculture facility (including the financing of the purchase cost of any aquaculture facility to be reconstructed or reconditioned); except that no obligation may be guaranteed under this section later than 2 years after the date of the completion of the construction, reconstruction, or reconditioning of the aquaculture facility involved.

(B) The acquisition of stocks of aquatic species for any aquaculture facility.

(C) The financing of the initial operating expenses of any aquaculture facility.

(D) The financing of marketing operations exclusively for aquaculture products.

(E) The refinancing of any existing obligation issued for any of the purposes specified in subparagraph (A), (B), (C), or (D), whether or not guaranteed under this section, including, but not limited to, any short-term obligation incurred for the purposes of obtaining temporary funds for refinancing. Guarantees and commitments to guarantee may be made under this section without regard to section 3679(a) of the Revised Statutes of the United States (31 U.S.C. 665(a)).

(2) The full faith and credit of the United States is pledged to the payment of all guarantees made under this section with respect to both principal and interest, including any interest, if provided for in the guarantee, which may accrue between the date of default under a guaranteed obligation and the payment in full of the guarantee.

(3) Any guarantee, or commitment to guarantee, made by the Secretary under this section shall be conclusive evidence of the eligibility of the obligation for such guarantee, and the validity of any guarantee, or commitment of guarantee, so made shall be incontestable.

(4) The aggregate unpaid principal amount of all obligations guaranteed under this section and outstanding at any one time shall not exceed $500,000,000.

(b)(1) Obligations guaranteed under this section—

(A) shall have an obligor approved by the Secretary as being responsible and possessing the ability, experience, financial resources, and other qualifications necessary for the adequate operation and maintenance of the aquaculture facilities;

(B) shall be in an aggregate principal amount which does not exceed 87½ percent of the actual cost involved or the depreciated actual cost, as determined by the Secretary;

(C) shall have maturity dates satisfactory to the Secretary, but not to exceed 25 years;

(D) shall provide for payments by the obligor satisfactory to the Secretary; and

(E) shall bear interest (exclusive of charges for the guarantee and service charges, if any) at rates not to exceed such percentage per annum on the unpaid principal as the Secretary determines to be reasonable, taking into account the range of interest rates prevailing in the private market for similar loans and the risks assumed by the Secretary.

(2) In guaranteeing any obligation under this section, the Secretary shall give preference to any person with 40 or fewer employees which, together with its affiliates, is primarily engaged in the business of aquaculture or commercial fishing for aquatic species.

(3) No obligation shall be guaranteed under this section unless the obligor conveys or agrees to convey to the Secretary such security interest as the Secretary may require to reasonably protect the interests of the United States.

(c)(1) The Secretary may charge a fee for any obligation guaranteed under this section, the amount of which shall be established by the Secretary by regulation but which may not exceed one-half of 1 percent per annum of the outstanding principal balance of the obligation. Fee payments shall be made by the obligor to the Secretary when moneys are first advanced under a guaranteed obligation and at least 60 days before each anniversary date thereafter.

(2) The Secretary shall charge and collect from the obligor such amounts as he may deem reasonable for the investigation of the application for any guarantee, for the appraisal of properties offered as security for any guarantee, and for the inspection of such properties during construction, reconstruction, or reconditioning; except that such charges shall not aggregate more than one-half of 1 percent of the original principal amount of the obligation to be guaranteed.

(3) All fees and other amounts received by the Secretary under the provisions of this subsection shall be deposited in the Fund.

(4) Obligations guaranteed under this section, and agreements relating thereto, shall contain such other provisions with respect to the protection of the security interests of the United States (including acceleration and subrogation provisions and the issuance of notes by the obligor to the Secretary), liens and releases of liens, payments of taxes, and such other matters as the Secretary may prescribe.

(d)(1) In the event of a default, which has continued for 30 days, in any payment by the obligor of principal or interest due under any obligation guaranteed under this section, the obligee or his agent shall have the right to demand, at or before the expiration of such period as may be specified in the guarantee or related agreements, but not later than 90 days from the date of each default, payment by the Secretary of the unpaid principal amount of said obligation and of the unpaid interest thereon to the date of payment. Within such period as may be specified in the guarantee or related agreements, but not later than 30 days from the date of such demand, the Secretary shall promptly pay to the obligee or his agent the unpaid principal amount of the obligation and unpaid interest thereon to the date of payment; except that the Secretary shall not be required to make such payment if before the expiration of such period he finds that there was no default by the obligor in the payment of principal or interest or that such default has been remedied before any such demand.

(2) Payments required to be made by the Secretary under paragraph (1) shall be made by the Secretary from the Fund.

(3) In the event of any payment by the Secretary under paragraph (1), the Secretary shall have all rights in any security held by him relating to his guarantee of such obligations as are conferred upon him under any security agreement with the obligor. Notwithstanding any other provision of law relating to the acquisition, handling, or disposal of property by the United States, the Secretary may, under such terms and conditions as the Secretary prescribes or approves, complete, recondition, reconstruct, renovate, repair, maintain, operate, or sell any property acquired by him pursuant to a security agreement with the obligor.

(4) After any default referred to in paragraph (1), the Secretary shall take such action against the obligor or any other parties liable thereunder that, in his discretion, may be required to protect the interests of the United States. Any suit may be brought in the name of the United States or in the name of the obligee and the obligee shall make available to the United States all records and evidence necessary to prosecute any such suit. The Secretary may accept a conveyance of title to and possession of property from the obligor or other parties liable to the Secretary and may purchase the property for an amount not greater than the unpaid principal amount of such obligation and interest thereon. In the event the Secretary receives through the sale of property an amount of cash in excess of any payment made to an obligee under paragraph (1) and the expenses of collection of such amounts, he shall pay such excess to the obligor.

(5) Whoever, for the purpose of obtaining any loan or advance of credit from any person with the intent that an obligation relating to such loan or advance of credit shall be offered to or accepted by the Secretary to be guaranteed, or for the purpose of obtaining any extension or renewal of any loan, advance of credit, or mortgage relating to an obligation guaranteed by the Secretary, or the acceptance, release, or substitution of any security on such a loan, advance of credit, or for the purpose of influencing in any way the action of the Secretary under this section, makes, passes, utters, or publishes, or causes to be made, passed, uttered, or published any statement, knowing the same to be false, or alters, forges, or counterfeits, or causes or procures to be altered, forged, or counterfeited, any instrument, paper, or document, or utters, publishes, or passes as true, or causes to be uttered, published, or passed as true, any instrument, paper, or document, knowing it to have been altered, forged, or counterfeited, or willfully overvalues any security, asset, or income shall be punished by a fine of not more than $5,000, or by imprisonmrent for not more than 2 years, or both.

(e) The Secretary shall promulgate such rules and regulations as may be deemed necessary or appropriate to carry out the purposes and provisions of this section.

(f) For purposes of this section—

(1) The term "actual cost" of an aquaculture facility, as of any specified date, means the aggregate, as determined by the Secretary, of—

(A) all amounts paid by, or for the account of, the obligor with respect to such facility on or before that date; and

(B) all amounts which the obligor is then obligated to pay from time to time thereafter, for the construction, reconstruction, or reconditioning of such facility.

(2) The terms "construction", "reconstruction", or "reconditioning" include, but are not limited to, designing, inspecting, outfitting, and equipping of the aquaculture facility involved.

(3) The term "depreciated actual cost" means the actual cost depreciated on a straightline basis over the useful life of the property involved as determined by the Secretary.

(4) The term "obligation" means any note, bond, debenture, or other evidence of indebtedness issued for one of the purposes specified in subsection (a).

(5) The term "obligee" means the holder of any obligation.

(6) The term "obligor" means any person primarily liable for payment of the principal of or interest on any obligation.

SEC. 9. DISASTER LOANS.

(a)(1) The Secretary may make one or more loans from the Fund to any person if—

(A) an aquaculture facility, or stock of aquatic species at the facility, or both, that is owned by such person is damaged or destroyed as a result of a natural disaster; or

(B) the stock of aquatic species at an aquaculture facility owned by such person is damaged or destroyed by disease, pollution, or contamination (caused by reasons other than a natural disaster or the willful or negligent action of such person).

The purpose of any loan made by the Secretary under this section shall be to accomplish one or more of the following objectives:

(i) The repair, rehabilitation, or replacement of such facility.

(ii) The replacement of aquatic species stock.

(iii) To continue aquaculture operations while any such repair, rehabilitation, or replacement is in progress.

(iv) The purchase, construction, or reconstruction of an aquaculture facility at another location if the Secretary finds that—

(I) the damage to the facility is to extensive that its repair or rehabilitation is impracticable;

(II) the replacement of the destroyed facility at the same location is impracticable; or

(III) the pollution or contamination referred to in subparagraph (B) is likely to persist for such period of time that continued aquaculture operations at the same location are impracticable.

(v) To meet payments of principal and interest on any obligation of such person with respect to the facility or stock so damaged or destroyed for such period of time as the Secretary deems appropriate, taking into account the degree of such damage or destruction.

(vi) To retire in full any such obligation.

(2) No loan may be made under this section for any damage or destruction—

(A) which is fully compensated for by insurance (including insurance paid under section 10) or otherwise; or

(B) for which assistance is available under any other Federal disaster assistance program.

(b) Any loan made pursuant to this section shall—

(1) mature in not more than 20 years;

(2) bear interest at a rate not less than the rate determined by the Secretary of the Treasury taking into consideration the average market yield on outstanding Treasury obligations of comparable maturity;

(3) be approved only upon the furnishing of such security or other reasonable assurance of repayment as the Secretary may require; and

(4) be subject to such other terms and conditions as the Secretary may require to protect the interests of the United States.

(c) The Secretary may consent to the

modification of any term or condition of any loan made under this section, including, but not limited to, reduction of the rate of interest, deferment of any installment of principal or interest, or change in any security requirment.

(d) All payments of principal and interest on loans made under this section shall be deposited into the Fund.

(e) For purposes of this section, the term "obligation" means any note, bond, debenture, or other evidence of indebtedness issued for the purpose of financing (1) the construction, reconstruction, or reconditioning of an aquaculture facility, (2) the initial operating expenses of any such facility, and (3) the acquisition of stock of aquatic species for any such facility.

(f)(1) Whoever makes any statement knowing it to be false, or whoever willfully overvalues any security for the purpose of obtaining for himself or for any applicant and loan under this section, or extension thereof by renewal, deferment of action, or otherwise, or the acceptance, release, or substitution of security therefor, or for the purpose of influencing in any way the action of the Secretary under this section, or for the purpose of obtaining money, property, or anything of value under this section, shall be punished by a fine of not more than $5,000, or by imprisonment for not more than 2 years, or both.

(2) Whoever, with the intent to defraud, knowingly conceals, removes, disposes of, or converts to his own use or to that of another, any property mortgaged or pledged to, or held by, the Secretary pursuant to this section shall be punished by a fine of not more than $5,000, or by imprisonment for not more than 5 years, or both.

(g) No loan may be made by the Secretary under this section for any damage to, or destruction of, any aquaculture facility or stock of aquatic species which occurs on or after the close of the 5-year period beginning on the effective date of this Act.

SEC. 10. INSURANCE AGAINST CERTAIN LOSSES INCURRED IN AQUACULTURE FACILITY OPERATIONS.

(a) As used in this section, unless the context otherwise requires—

(1) The term "direct insurance" means any insurance described in paragraphs (2), (3), and (4).

(2) The term "essential liability insurance" means insurance against all sums which the owner of an aquaculture facility becomes legally obligated to pay as damages because of bodily injury or property damage caused by the aquaculture facility, the operation of such facility, or the aquatic species cultured at such facility.

(3) The term "essential property insurance" means insurance against direct loss of, or direct damage to, the real or personal property of an aquaculture facility caused by perils as they are defined and limited in standard fire policies and extended coverage endorsments thereon as approved by the State insurance authority, and insurance against loss of, or damage to, the real or personal property of an aquaculture facility from such perils as the Secretary by regulation shall specify, including, but not limited to vandalism, malicious mischief, burglary, and theft.

(4) The term "essential stock insurance" means insurance against loss of, or damage to, any aquatic species being cultured at an aquaculture facility due to unavoidable or natural causes, including, but not limited to, drought, pollution, hail, frost, wind, winterkill, freeze, lightning, fire, excessive rain, flood, snow, wildlife, hurricane, tornado, insect or parasite infestation, disease, and such other unavoidable or natural causes as the Secretary by regulation shall specify.

(5) The term "insurer" includes any insurance company or group of companies under common ownership which is authorized to engage in the insurance business under the laws of any State.

(6) The term "owner" means any person having an insurable interest in an aquaculture facility or aquatic species stock.

(7) The term "pool" means any pool or association of insurers in any State which is formed, associated, or otherwise created for the purpose of making insurance more readily available.

(8) The term "reasonable premium rate" means that premium rate determined by the Secretary, which would permit the purchase of any direct insurance coverage by a reasonably prudent person in similar circumstances with due regard to the costs and benefits involved.

(b) The Secretary may by regulation define any technical or trade term necessary in the administration of this section, insofar as any such definition is not inconsistent with the provisions of this section.

(c)(1) The Secretary shall conduct, within 6 months after the effective date of this Act, and annually thereafter, a study to determine whether direct insurance is generally available to owners at reasonable premium rates, through insurers, pools, or a suitable program adopted under State law.

(2)(A) If the Secretary finds, as a result of the study referred to in paragraph (1), that essential property insurance or essential liability insurance is not available at reasonable premium rates in any State and such insurance has not been provided by State action, the Secretary may establish a program to provide such insurance in such State, if the Secretary considers the issuance of such insurance necessary and appropriate to carry out the purposes and policy of this Act.

(B) Any essential property insurance or essential liability insurance issued by the Secretary under this paragraph shall be subject to such terms and conditions, and to such deductibles and other restrictions and limitations as the Secretary deems appropriate; except that the Secretary may not provide essential property insurance or essential liability insurance with respect to—

(i) any aquaculture facility or stock of aquatic species which the Secretary determines to be uninsurable due to the failure of the owner to follow established principles for operating aquaculture facilities or culturing aquatic species, as the case may be; or

(ii) any aquaculture facility which the Secretary determines to lack reasonable protective measures to prevent loss or damage.

(3)(A) If the Secretary finds, as a result of the study referred to in paragraph (1), that essential stock insurance is not available at reasonable premium rates in any State and that such insurance has not been provided by State action, the Secretary shall establish a program to provide such insurance in such State.

(B) Any essential stock insurance issued by the Secretary under this paragraph shall be subject to such terms and conditions and to such deductibles and other restrictions and limitations as the Secretary deems appropriate; except that the Secretary may not provide essential stock insurance with respect to any stock of aquatic species if the Secretary determines such stock to be uninsurable due to the failure of the owner to follow established principles for culturing aquatic species or due to the lack of reasonable protective measures at the aquaculture facility concerned to prevent the loss of, or damage to, the stock being cultured.

(d)(1) In determining the premium rate for any direct insurance offered from time to time under subsection (c) (2) or (3), the Secretary shall consult with persons knowledgeable and experienced in insurance, including, but not limited to, State insurance regulatory authorities, and may take into consideration with respect to the insurance concerned, the nature and degree of risk involved, the protective devices employed, the extent of past and anticipated losses, the prevailing rate for similar coverages, the economic importance of the insurance, and the relative abilities of the particular classes and types of insureds to pay the actual premium for such coverage.

(2)(A) The Secretary may not establish the premium rate for any direct insurance at less than 50 percent of the actual premium rate for such insurance.

(B) For purposes of subparagraph (A), the actual premium rate for any direct insurance offered under this section shall be determined as follows:

(i) If insurance of the same kind is generally offered by insurers or pools in the State concerned, the actual premium rate shall be that rate which the Secretary determines to be the median premium rate for all such insurance so offered.

(ii) If insurance of the same kind is not generally offered by insurers or pools in the State concerned, the actual premium rate shall be that rate which the Secretary determines to be the rate at which insurers or pools in such State would offer such insurance, taking into account actuarially sound principles applicable to the elements making up such rate, including, but not limited to, claim losses, general administrative expenses, acquisition expenses, taxes, license fees, and profits.

In making determinations under clauses (i) and (ii), the Secretary shall consult with the insurance regulatory authority of the State concerned and any rate advisory organization licensed by such State.

Nothing in this section shall be construed to prohibit or require either the adoption of uniform national rates or the periodic modification of the currently estimated reasonable premium rates for any particular coverage, class, State, or risk on the basis of additional information or actual loss experience

(e)(1) The Secretary may enter into any contract, agreement, treaty, or other arrangement with any insurer or pool to provide reinsurance coverage with respect to any direct insurance issued by such insurer or pool, in consideration of payment of such premiums, fees, or other charges by insurers or pools which the Secretary deems to be appropriate, after consultation with persons knowledgeable and experienced in insurance.

(2) Reinsurance issued under this subsection shall reimburse an insurer or pool for its total proved and approved claims for covered losses resulting from providing the direct insurance concerned during the term of the reinsurance contract, agreement, treaty, or other arrangement, over and above the amount of the insurer's or pool's retention of such losses, as provided in such reinsurance, contract, agreement, treaty, or other arrangement entered into under this section.

(3) Such contracts, agreements, treaties, or other arrangements may be made without regard to section 3679(a) of the Revised Statutes of the United States (31 U.S.C. 665 (a)), and shall include any terms and conditions which the Secretary deems necessary to carry out the purposes of this section. The premium rates and terms and conditions of such contracts, agreements, treaties, or other arrangements with an insurer or pool shall be uniform in any one year throughout the country.

(f)(1) All premiums received by the Secretary under this section shall be deposited into the Fund.

(2) The Secretary, in a suit brought in the appropriate United States district court, shall be entitled to recover from any owner, insurer, or pool the amount of any unpaid premium lawfully payable to the Secretary by such owner, insurer, or pool under any

direct insurance or reinsurance issued under this section.

(3) No action or proceeding shall be brought for the recovery of any premium due the Secretary, or for the recovery of any premium paid to the Secretary in excess of the amount due, unless such action or proceeding is commenced within 5 years after the right accrued for which the claim is made; except that, if the insurer has made or filed with the Secretary a false or fraudulent statement or other document with intent to evade, in whole or in part, the payment of premiums, the claim shall not be deemed to have accrued until its discovery by the Secretary.

(g) In order to provide for maximum efficiency in the administration of the insurance and reinsurance program provided under this section, and in order to facilitate the expeditious payment of any claims under such program, the Secretary may enter into contracts with any insurer, pool, or person, for the purpose of providing for the performance of any of the following functions:

(1) The estimation or determination of any amounts of payments for reinsurance or direct insurance claims.

(2) The receipt, disbursement, and accounting for funds in making payments for reinsurance and direct insurance claims.

(3) The auditing of the records of any insurer, pool, or person to the extent necessary to assure that proper payments are made.

(4) The establishment of the basis of liability for reinsurance or direct insurance payments, including the total amount of proved and approved claims which may be payable to any insurer, pool, or owner, and the total amount of premiums earned by any insurer or pool in the respective States from direct insurance or reinsurance.

(5) The provision of assistance in any manner provided for in the contract to further the purposes of this section.

(h) The Secretary may, with the consent of the agency concerned, accept and utilize, on a reimbursable basis, the officers, employees, services, facilities, and information of any Federal agency with respect to any insurance matter which is within the purview of this section.

(i) The Secretary may prescribe regulations establishing the general method or methods by which proved and approved claims for losses are paid under any direct insurance or reinsurance issued under this section. Proved and approved claims shall be paid from the Fund.

(j) The Secretary, in providing any direct insurance or reinsurance under this section may adjust and pay all claims for proved and approved losses covered by such insurance and, upon the disallowance by the Secretary, or upon the refusal of the claimant to accept the amount allowed upon any such claim, the claimant, within one year after the date of mailing of notice of disallowance or partial disallowance of the claim, may institute an action on such claim against the Secretary in the United States district court for the district in which the insured owner or reinsured insurer or pool resides or principally conducts business, and jurisdiction is hereby conferred upon such court to hear and determine such action without regard to the amount in controversy.

(k) The face amount of direct insurance and reinsurance coverage outstanding and in force at any one time under this section shall not exceed $1,000,000,000.

(l) No direct insurance or reinsurance may be issued by the Secretary under this section after the close of the 5-year period beginning on the effective date of this Act.

SEC. 11. FEDERAL AQUACULTURE ASSISTANCE FUND.

(a) There is established in the Treasury of the United States a Federal Aquaculture Assistance Fund. The Fund shall be available to the Secretary as a revolving fund for the purpose of carrying out, and administering, sections 8, 9, and 10. The Fund shall consist of—

(1) any sums appropriated to the Fund;

(2) any fees received by the Secretary in connection with any guarantee made under section 8;

(3) recoveries and receipts received by the Secretary under security, subrogation, and other rights and authorities under sections 8, 9, and 10;

(4) payments of principal and interest received by the Secretary under any loan made under section 9;

(5) premiums paid to, or recovered by, the Secretary for any direct insurance or reinsurance issued by the Secretary under section 10; and

(6) moneys deposited pursuant to the last sentence of subsection (b).

All payments made by the Secretary to carry out the provisions of sections 8, 9, and 10 (including reimbursements to other Government accounts) shall be paid from the Fund, only to the extent provided in appropriation Acts. Sums in the Fund which are not currently needed for the purposes of sections 8, 9, and 10 shall be kept on deposit or invested in obligations of, or guaranteed by, the United States.

(b) If at any time the moneys in the Fund are not sufficient to pay any amount the Secretary is obligated to pay under section 8(d)(1) or any direct insurance or reinsurance claim under section 10, the Secretary shall issue to the Secretary of the Treasury notes or other obligations (only to such extent and in such amounts as may be provided for in appropriation Acts) in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury prescribes. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of such notes or other obligations. The Secretary of the Treasury shall purchase any notes and other obligations to be issued hereunder and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under such Act, as amended, are extended to include any purchases of such notes and obligations. The Secretary of the Treasury at any time may sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as public debt transactions of the United States. Moneys borrowed under this subsection shall be deposited in the Fund and redemptions of such notes and obligations shall be made by the Secretary from the Fund.

SEC. 12. REPORT AND RECOMMENDATIONS.

Before the close of the 90th day after the close of the 3-year period beginning on the effective date of this Act, the Secretary shall review the operation and effectiveness of the disaster loan program provided for under section 9 and the insurance program provided for under section 10 and shall submit a report thereon to the Congress, together with the recommendation of the Secretary as to whether or not either such program should be continued and, if the Secretary recommends continuation, such suggestions as the Secretary may have for improving the operation and effectiveness of such program.

SEC. 13. AUTHORIZATION OF APPROPRIATIONS.

(a) For purposes of carrying out the provisions of this Act (other than sections 8, 9, or 10), there are authorized to be appropriated, notwithstanding any authorization for appropriations in any other Act in effect before the date of the enactment of this Act—

(1) to the Department of Commerce, not to exceed—

(A) $4,000,000 for the fiscal year 1979,

(B) $15,000,000 for the fiscal year 1980, and

(C) $17,000,000 for the fiscal year 1981;

(2) to the Department of the Interior, not to exceed—

(A) $2,000,000 for the fiscal year 1979,

(B) $7,500,000 for the fiscal year 1980, and

(C) $8,500,000 for the fiscal year 1981; and

(3) to the Department of Agriculture, not to exceed—

(A) $2,000,000 for the fiscal year 1979,

(B) $7,500,000 for the fiscal year 1980, and

(C) $8,500,000 for the fiscal year 1981.

(b) There are authorized to be appropriated, without fiscal year limitation, to the Fund such sums as may be necessary and appropriate for purposes of carrying out sections 8, 9, and 10; but not to exceed $500,000,000 for the purposes of section 8 and not to exceed $250,000,000 for the purposes of section 9.

SEC. 14. EFFECTIVE DATE.

This Act shall take effect October 1, 1978.●

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the bill introduced by Senator BARTLETT to develop aquaculture be referred jointly to the Committee on Commerce, Science, and Transportation and the Committee on Agriculture, Nutrition, and Forestry.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. BARTLETT:

S. 2763. A bill to amend the Employee Retirement Income Security Act of 1974, and the Internal Revenue Code of 1954 to improve the administration and fairness of provisions relating to employee benefit plans; to the Committee on Finance and the Committee on Human Resources, jointly, by unanimous consent.

EMPLOYEE RETIREMENT INCOME SECURITY AMENDMENTS

● Mr. BARTLETT. Mr. President, during the 93d Congress, the Employee Retirement Income Security Act was signed into law and heralded as a major innovation to protect workers from the loss of pension benefits. Since ERISA became law, we have all become aware of the "nightmare" of paperwork and cross interpretations that have been created. The obvious effect has been the ever-increasing number of businesses dropping their pension plans. These figures most graphically describe the chaotic effect of the legislation. Mr. President, I ask unanimous consent that a table be printed in the RECORD which reflects the number of pensions started and number of pensions terminated during the years 1970 through December of 1977.

This data is provided by the Internal Revenue Service and reflects the detrimental effects of what was purported to be one of the most beneficial pieces of legislation in recent years.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Retirement plan creations and terminations

Calendar year	Starts	Terminations
1970	32,570	2,306
1971	40,664	3,335
1972	49,335	3,550
1973	59,605	4,130
1974	59,919	4,604
1975	30,043	8,276
1976	25,821	15,859
1977	35,416	15,815

NOTE.—Corporate plans only, self-employed plans would add to totals.

Source: Internal Revenue Service.

Mr. BARTLETT. Mr. President, the obvious nature of the problem, and the comments I have received from Oklahomans, led me to request inputs from attorneys, certified public accounts, business people, and insurance agents for possible development as amendments. The result of these comments is the bill I am introducing today.

The bill addresses the more pervasive problems noted by the groups with which I consulted. It is introduced with the intention of easing the burden on business, but not jeopardizing the protection needed for the employee. The following is a brief description of each section, including its effect and the need for the particular amendment:

Section 1. This section raises the limit of plan assets that may be in one investment from 10 percent to 30 percent. A limit of 10 percent of plan assets in one investment may not create difficulties for a major national firm with a pension plan. However, a small employer who contributes from $3,000 to $5,000 a year to a plan finds it extremely difficult to find profitable investment opportunities for blocks of $300 to $500. The only alternative is to allow the plan assets to accumulate over several years until there is an adequate supply of money to make a reasonable investment.

Section 2. This section eliminates the requirement for payment of plan termination insurance to the Pension Benefit Guarantee Corporation for those plans funded entirely by insurance. The Pension Benefit Guarantee Corporation has no liability for insurer guaranteed benefits as the insurer provides the necessary guarantee. Payments of the premium to the Pension Benefit Guarantee Corporation for such fully insured persons is a waste of plan assets.

Section 3. This section authorizes the Secretary of the Treasury to issue a regulation under which insurance company deferred annuity contracts may be exempt from funding provisions. Employers who fund pension benefits through a deferred annuity contract are faced with a possible tax problem. The problem arises out of the requirement in the minimum funding standard and funding standard account provisions that experience credits to the plan be amortized over 15 years.

Under deferred annuity contracts, no turnover assumptions are made in setting premium rates. The reason for this is that the employer purchases individual annuities from the insurance company for benefits as they accrue. Zero turnover is the basis on which premium rates are set. When an employee for whom deferred annuity purchases have been made on a continuing basis terminates employment, his nonvested deferred annuities are cancelled.

The employer contributions released by the cancellation are reflected as a withdrawal credit. This withdrawal credit, according to IRS requirements, must be applied in full toward premiums next becoming due under the plan before any further employer contributions are so applied. Similarly, experienced credits declared by the insurance company because of favorable mortality, interest, and expense results, must be applied against the premium next becoming due.

The problem is that while the credits must be applied in one lump sum against premiums next becoming due, ERISA requires that the credit be amortized over 15 years for funding standard account purposes. Thus, only one-fifteenth of the credit may be applied in the year declared and each year thereafter to determine whether there is a funding standard account deficiency, and if so, how much has to be paid by the employer to abate the deficiency and avoid a deficiency tax assessment. The deduction for the 14/15 for tax purposes must be deferred until future years on a carryforward basis. This aggravates cash flow problems and creates an inappropriate tax result.

Section 4. This change provides that a plan which meets vesting requirements under section 411 of the act will be treated as meeting the requirements of section 401 unless there has been an actual pattern of abuse.

Section 411 has been interpreted to apply an additional rule of vesting if certain turnover tests are not met. These tests cannot be met by a vast majority of employers, and deleting this particular section permits plans to meet the minimum vesting standards under section 411.

Section 401(a)(4) provides that contributions or the benefit under the qualified plan cannot discriminate in favor of officers, shareholders, or highly compensated employees. With these requirements, there is no need for the additional, and somewhat different, requirement found in section 411(a)(1)(B). This section added the requirement that, "there have been, or there is reason to believe there will be, an accrual of benefits or forfeitures tending to discriminate in favor of employees who are officers, shareholders, or highly compensated."

Section 5. This section exempts plans with less than 100 participants from the notification to interested party requirements with respect to advance determination requests. Before an advance determination letter regarding the qualification of pension, profit-sharing, stock bonus plan, a trust which is part of a plan, or an annuity bond purchase plan may be issued, the applicant must provide evidence that each employee who qualifies as an interested party under the regulations has been notified of the application for such determination. All present employees of any employer qualify as interested parties, and if the plan amendment affects the contributions for, or benefits to, any former employee, all former employees who have a nonforfeitable right to an accrued benefit under the plan, are interested parties and must be notified.

The notice has proved of no practical use whatsoever to any employee. Not only is it of little use, it requires a great deal of ability and expertise to comment on whether or not the plan meets the requirements for qualification.

The cost of preparing and making the requisite notification properly with regard to plans covering a small number of employees has, in some instances, been equal to 10 percent of the cost of establishing the plan initially, or amending the plan.

Section 6. This language provides for the separate treatment of certain plans maintained by employers within multiemployer groups.

The existing code section, and regulations, effectively mean that all the substantive qualification requirements of the Internal Revenue Code are applied to a commonly controlled group to determine if any plan maintained by any of the entities within the group qualifies under the Internal Revenue Code. For example, if a subsidiary of a parent corporation, which meets the control tests, maintained an employee-benefit pension plan prior to ERISA which qualified on its own in relation to the subsidiary entity, then the plan, if it is to continue to be qualified under ERISA, must meet all the qualification requirements considering the entire controlled group as the relevant employee population. In effect, in order to continue the plan, the parent corporation is forced to either adopt a comparable plan or include all employees of the control group in the subsidiary corporation's plan. This requirement distorts the employee pension benefit plan concept in many instances. Termination of the "problem" plan is often easiest and the most beneficial alternative.

Contributing employers to multiemployer plans have potential liabilities over which they have no control, and such liabilities may arise even though the contributing employer fulfills the requirements of its agreement with the plan. When the Pension Benefit Guarantee Corporation provides benefits for a terminated plan, then an employer becomes liable to the PBGC for 100 percent of the unfunded liabilities in the terminated plan. The employer's liability may be up to 30 percent of the employer's total net worth.

Thus, voluntary termination of the plan could occur without the agreement or knowledge of the contributing employer, and consequently the contributing employer could become subject to the PBGC underfunded termination liability.

A contributing employer to a multiemployer plan who has funded his portion—based on his employees—correctly and adequately should not be liable to

the PBGC or any employee over which he had no direct control.

Section 7. This section exempts an insurance pooled separate account under a group annuity contract issued to a plan from the fiduciary or party in interest provisions of the act.

Regulation of insurance company operations by State authorities affords protection to a plan participating in the insuror's pooled separate accounts which are effectively like those a plan would enjoy in participating in a mutual fund through ownership of mutual fund shares.

The act already excludes mutual funds and the rationale behind this exclusion applies equally to insurance company pooled separate accounts. These accounts are regulated by a State insurance department, and are broadly held.

The existing provision makes operation extremely difficult because of the extra recordkeeping, clerical, and reporting needs of the various fiduciary responsibility requirements of ERISA. The net result is extreme cost.

If pooled separate account assets are considered plan assets, then a large number of transactions involving pooled separate accounts, which would be prohibited transactions under ERISA, could occur inadvertantly. For instance, a direct bond placement or mortgage loan might be made from a pooled separate account to an employer who, unknown to the insurance company, is a participant in the pooled separate account by virtue of being an affiliate of the insurer contract holder. Likewise, directly negotiated short-term lending by the insurer to a corporate obligor which, unknown to the insurer, participates in the separate account, could be a prohibitive transaction if the 25 to 50 percent of the assets test used in defining "marketable obligations" is not met when taking into account other such borrowing by the obligor from other sources of which the insurer has no knowledge.

There are numerous other such similar situations, but it is obvious to establish the necessary tests within the system would be financially prohibitive.●

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the bill introduced by Senator BARTLETT amending ERISA be referred jointly to the Committee on Finance and the Committee on Human Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL COSPONSORS

S. 258

At the request of Mr. RIBICOFF, the Senator from Minnesota (Mrs. HUMPHREY) was added as a cosponsor of S. 258, the Children and Youth Camp Safety Act.

S. 2323

At the request of Mr. PERCY, the Senator from Michigan (Mr. GRIFFIN) was added as a cosponsor to S. 2323, a bill to prevent illegal traffic in lost, stolen, forged, counterfeit, and fraudulent securities.

S. 2354

At the request of Mr. DOMENICI, the Senator from Delaware (Mr. BIDEN) was added as a cosponsor of S. 2354, the equal access to the courts bill.

S. 2732

At the request of Mr. PERCY, the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 2732, the Small Scale Energy Technology Programs Reorganization Act.

SENATE RESOLUTION 414

At the request of Mr. PERCY, the Senator from Minnesota (Mr. ANDERSON), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Arizona (Mr. DECONCINI), the Senator from Maine (Mr. HATHAWAY), the Senator from New Mexico (Mr. SCHMITT), and the Senator from Ohio (Mr. GLENN) were added as cosponsors of Senate Resolution 414, to study the feasibility of installing a solar energy system in the extension of the Dirksen Office Buildings.

SENATE CONCURRENT RESOLUTION 72

At the request of Mr. CASE, the Senator from Idaho (Mr. CHURCH), the Senator from Indiana (Mr. BAYH), the Senator from Missouri (Mr. DANFORTH), the Senator from Maine (Mr. HATHAWAY), and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of Senate Concurrent Resolution 72, regarding efforts to counter international terrorism.

AMENDMENT NO. 1702

At the request of Mr. PERCY, the Senator from Kentucky (Mr. FORD) was added as a cosponsor of amendment No. 1702 intended to be proposed to H.R. 7200, a bill to end welfare abuse by aliens.

NOTICES OF HEARINGS

DEPARTMENT OF EDUCATION HEARINGS

● Mr. RIBICOFF. Mr. President, the Committee on Governmental Affairs will resume consideration next week of S. 991 and related legislation to establish a separate, Cabinet-level Department of Education in the Federal Government.

The hearings will begin at 10 a.m. on Monday, March 20 and on Tuesday, March 21 in room 3302 of the Dirksen Building. There will not be a hearing on Wednesday, March 22, as previously announced. The administration is scheduled to present its views on the creation of the new Department to the committee on Friday, April 14.

Witnesses appearing before the committee include:

MONDAY, MARCH 20

Panel I

Ms. Barbara H. Kemp, President, A.F.G.E. Local 2607 (HEW Education Division).

Mr. Lawrence S. Zaglaniczny, Executive Director, Coalition of Independent College and University Students.

Mr. Joel Packer, Legislative Director, National Student Association/National Student Lobby.

Panel II—Child nutrition

Ms. Faith Gravenmier, Chairwoman, American School Food Service Association Legislative Committee.

Ms. Dorothy Van Egmond, Director of School Food Services, Fairfax County Public Schools.

Mrs. Dorothy L. Finch, Supervisor of Food Services, Granview, Washington School District.

Ms. Helen B. McGee, Nutrition Coordinator, Oklahoma State Department of Education.

TUESDAY, MARCH 21

Panel I—State and local representatives

The Honorable Frank Logue, Mayor, City of New Haven, Connecticut.

Dr. Joseph M. Cronin, Illinois State Superintendent of Education.

The Honorable Helen Wise, Member, Pennsylvania State House of Representatives.

A Representative of Education Commission of the States.

Panel II

Mr. Albert Shanker, President, American Federation of Teachers.

Monsignor Wilfred Paradis, Secretary, Department of Education, U.S. Catholic Conference.

Panel III—Higher education representatives

Mr. Charles Saunders, Director of Government Relations, American Council on Education.

Dr. Helena Howe, Board of Directors Chairwoman, American Association of Community and Junior Colleges.

Dr. James A. Norton, Ohio Board of Regents Chancellor, representing State Higher Education Executive Officers.

Dr. Elias Blake, Chairman, National Advisory Commission on Black Higher Education and President, Clark College.

Dr. Alfred Sumberg, Associate Secretary, American Association of University Professors.●

SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION, AND FEDERAL SERVICES

● Mr. GLENN. Mr. President, I wish to announce that the Subcommittee on Energy, Nuclear Proliferation, and Federal Services of the Governmental Affairs Committee, has scheduled hearings on the issue of nuclear terrorism in conjunction with S. 2236, the Omnibus Antiterrorism Act of 1977. The hearings will be held on Wednesday, March 22, and Thursday, March 23 at 10 a.m. in room 4221 of the Dirksen Senate Office Building. For further information regarding the hearings, please contact the subcommittee staff at 224–2627.●

ADDITIONAL STATEMENTS

"WILDLIFE NEEDS YOU" IS THE THEME OF 40TH NATIONAL WILDLIFE WEEK

● Mr. RANDOLPH. Mr. President, President Carter has designated the week of March 19–25 as National Wildlife Week. This annual observance, initiated 40 years ago by President Roosevelt, provides Americans with the opportunity to reflect on and appreciate the value of our diverse and abundant wildlife in our daily lives. As chairman of the Committee on Environment and Public Works, which has jurisdiction over fish and wildlife legislation, I am acutely aware of the significance of this commemoration.

"Wildlife Needs You" is the theme for National Wildlife Week 1978 and is a thought which should be taken to heart by Members of the Senate. As national policymakers we have an impact on the Nation's fish and wildlife and other natural resources when we enact laws regu-

lating or otherwise influencing activities ranging from agriculture to energy development. Accordingly, we have an important responsibility and a unique opportunity to serve as stewards of this national treasure.

To effectively carry out this stewardship, we must educate ourselves regarding the needs of this resource and take positive action to promote and protect these needs. One very basic requirement of all plants and animals is habitat—the places where they not just survive but flourish. Indeed, destruction of habitat is the primary reason that over 170 species of native American fish and wildlife are faced with extinction today. The draining of wetlands for recreation and housing development; the need to provide greater domestic supplies of oil, gas, and other energy sources; and the use of imprudent agricultural techniques have all taken their toll on our natural world. Unless we reverse this trend by conducting these needed activities in a more intelligent, more environmentally sensitive manner, they may ultimately have a far greater effect on us. This realization has been at the very heart of the clean air, clean water, and other environmental protection legislation from the Environment and Public Works Committee over the years.

A second very basic need of fish and wildlife is management. In the days that our forefathers settled this country it might have been true that the best form of wildlife management was none. Over the last 200 years, however, we have drastically changed the face of this Nation so that, in many instances, husbandry by man is actually essential to the survival of a species. A good example is this year's National Wildlife Week "poster animal" the peregrin falcon. During the early 1960's this bird was nearly extinct in the United States as a result of eggshell thinning caused by the prevalence of DDT in the environment. Through research, captive breeding programs, and Government action severely limiting the use of the chemical, this species is beginning to make a comeback. While its situation is still critical, had it not been for the efforts of professional wildlife managers, the peregrine falcon might have well already gone the way of the passenger pigeon.

Congress can have a vital role in assuring the continuation of good wildlife management in this country by providing the experts at the Federal and State levels with the funds and basic statutory authority necessary to continue and enhance their work. This year our committee will act on several measures to improve the management of our Nation's fish and wildlife, including the Natural Diversity Act and the Federal Aid to Nongame Fish and Wildlife Act.

We are grateful for the guidance we have received in formulating these proposals from Federal and State conservation officials and members of national conservation organizations. Particular thanks is due the National Wildlife Federation and its State affiliates, which have sponsored National Wildlife Week 1978.

Mr. President, I emphasize that the theme for National Wildlife Week 1978 is "Wildlife Needs You." A more appropriate theme might actually be "We Need Wildlife." The protection of our plants and animals is not just an esthetic exercise to enable us to enjoy them in their native habitats. They are vital to the health and welfare of our people. Aldo Leopold made this point quite poignantly in the famous passage from his "Sands County Almanac" when, speaking of this legacy to his children, he said:

I hope to leave them good health, an education and possibly even a competence. But what are they going to do with these things if there be no more deer in the hills, and no more quail in the covets? No more snipe whistling in the meadow, and no more piping of widgeons and chatterings of teal as darkness covers the marshes . . . And when the day wind stirs through the ancient cottonwoods, and the gray light steals down from the hills over the old river sliding past its wide brown sandbars—what if there be no more goose music?

I hope we will all take a few minutes this week to reflect on the special significance of National Wildlife Week to us and our constituents. Furthermore, I hope that we will continue to work steadfastly to protect our irreplaceable fish and wildlife for generations of Americans to come.●

SMALL SCALE HYDROELECTRICITY

● Mr. PERCY. Mr. President, I am a strong advocate of rehabilitating small dams to produce electricity. I was most pleased to see a superb overview article by Lee Lescaze in the Washington Post on Saturday, March 11. In order to share Mr. Lescaze's observations with my colleagues, I ask unanimous consent that his article, "Little Dams Being Revived as Power Source," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LITTLE DAMS BEING REVIVED AS POWER SOURCE; BIG UTILITIES BALK

(By Lee Lescaze)

NEW YORK.—What may be the fastest-growing alternative energy source in the Northeast is one that is natural, renewable, non-polluting, native, and being resisted by some very large power companies. It's called water.

Henry Griffin of Collinsville, Conn., is working to restore a hydroelectric power plant that he helped chop up into scrap metal a dozen years ago.

In West Carthage, N.Y., Mary Jane Hirschey wants to generate power from her dam on the Black River that was producing electricity until 1963.

The 10,000 citizens of Springfield, Vt., have voted to spend $58 million to restore the generating capacity of six dams and to form a municipal power company and take over distribution from the investor-owned utility.

Water power built New England and made it prosperous. But over the last 60 years, the advent of cheap oil and gas and giant utility companies that had no use for small hydro projects killed off New England's small power station.

"Now we're returning to the river," says Vermont State Sen. Chester Scott, one of the backers of the Springfield project.

The 1973 oil embargo, quadrupled oil prices, two severe winters and depressing economic conditions in the Northeast have revived interest in small hydroelectric sites that would have been considered uneconomical 10 years ago.

The Department of Energy has earmarked $10 million for study and development of "low head" hydroelectric projects this year, and if the energy bill passes Congress it would provide $100 million a year for three years for renovation of existing dams. By the federal government's definition, low-head dams are those less than 64 feet high, with a production capacity less than 15 megawatts.

Some of the dams being looked at are as low as the four-foot one at Helen Winter's Grist Mill antique store at Farmington, Conn. It could light and heat only one building, while others could light a town.

"This is what created the industrial revolution in New England. We had sawmills, grist mills, every kind of factory—and they all ran on water," says Griffin.

New England and New York have many abandoned hydropower sites because they were settled early when water and wood were the only sources of power.

"These existing dams are pretty well confined to the original 13 colonies," Lawrence Falick of the Department of Energy said.

For years, utility companies concerned with vast power grids and with huge plants like the nuclear ones that produce 1,000 megawatts have scorned little dam sites as an obsolete technology.

Officials of all the northeastern state energy offices describe the large utility companies as less than enthusiastic about developing small hydroelectric projects—even ones that they own.

"They destroyed our dam so that there would be no competition from small sources," Griffin says bluntly. "I don't think the papers were signed a minute before they were in there cutting up the generators."

Griffin signed on for $50 to help the scrap metal company cut up the generators at the Collinsville dam after the Hartford electric company bought it. Now, as a member of the town conservation commission, he is seeking one of the Department of Energy grants to study the feasibility of reviving the dam.

Donham Crawford, president of the Edison Electric Institute, representing the nation's investor-owned utilities, denies that power companies oppose developing small sites.

"We have no desire to do anybody in," Crawford said. "We're all for hydro, but the question is whether it's economic or not."

Edison Electric represents about 200 companies that produce over 75 percent of the nation's electric power.

"It's my feeling that the large, investor-owned utilities will pay a lot of lip service to small hydro and basically fear it," said Bob Mauro, esergy research director of the American Public Power Association, which represents publicly owned companies.

The fear is that a community with a dam will divorce its power company and form a municipal utility, as Springfield is trying to do.

The Vermont community has spent more than $500,000 preparing its move, and part of the plan may be decided in court. In addition to activating the dam, the town wants to seize the distribution sytem now operated by the state's largest electric utility, Central Vermont Public Service Corp.

"We're going to sit down with them for what I call the waltz of the partridges," Sen. Scott said. "We'll flap our wings and see if there's anyone who can't stand to be in the room. I'm cautiously optimistic, but we've been disappointed by them before."

John Mullen of Central Vermont Public Service said, "We're not interested in having them take over our distribution system. It'll end in litigation." Central Vermont believes

that Springfield's engineering studies overstate the potential of its dams and that the town's project is headed for financial disaster, Mullen said.

Scott said Springfield was motivated by the worldwide shortage of energy:

"This energy bind is going to get worse, and the only resources we've got up here are water and wood. When the real crunch comes, we don't kid ourselves that tiny Vermont is going to be able to swing a very big axe in Washington. We better take care of ourselves."

Springfield shares a problem with many other places interested in developing hydroelectric power from existing dams.

"Some of us feel that we are victims of an unfair pricing structure," Scott said.

Typically, utilities buy power cheap and sell it dear. What they pay to anyone offering to feed power into their grid is the cost to them of throwing another shovel of coal on their fire, not the total cost of the power.

A man with excess power from a small dam might be offered half a cent per kilowatt hour by a utility that is paying larger suppliers five times that, according to Falick of DOE. At such prices, it doesn't pay the man to put his dam into production.

Similarly, a small businessman who wants to use electricity he generates most of the time but also wants to keep the local utility as a back-up finds that the utility will charge almost as much to stand by without selling him power as it bills him now for the power he uses.

Crawford explains that the utility has to maintain the equipment and capacity even if it isn't being used against the time the stand-by customer needs power and that the utility needs to be compensated for its trouble.

"I don't now of any solution, because it's a question of economics," he said.

In Collinsville, Conn., promoters of the dam hope to use the power to cut the town's $200,000 annual bill for street lighting and municipal buildings. Mary Jane Hirschey hopes her hydropower can be used by nearby industries or for a new community that could be built on Tannery Island, where the power plant is.

No one is certain what sort of agreement can be reached with utility companies.

Griffin believes that because of the world's energy shortage the courts are going to tell utilities, "Look, you've got to cooperate."

"All of us lawyers will be kept pretty busy," joked Alan Johnson of the Massachusetts energy office, in discussing the many issues likely to reach litigation in one place or another as low-head hydro develops.

At some places it is not clear who owns water rights or other rights. Elsewhere, questions arise whether a private individual selling power is thereby a utility and must be regulated by the government. The government is likely to have to consider whether it can say to utilities that it wants hydropower and therefore it wants utilities to buy such power at reasonable rates.

No one claims that low-head hydroelectric power is the answer to the energy crisis. The Army Corps of Engineers forecasts maximum potential from such sites at 26,000 megawatts, which would be the rough equivalent of 26 nuclear power plants.

But each dam is a very small fraction of the total. Hirschey's would produce 2 megawatts, for example.

According to a study by the federal Energy Regulatory Commission, 228 small hydro plants were abandoned in New England over the last 30 years. These presumably would be the easiest to bring back on line.

"I think small hydro definitely has arrived," said Richard McDonald of DOE.

No one knows exactly how many dams there are around the country, but 50,000 is a generally accepted guess. States like New York that take hydropower seriously are taking a census. Record keeping has been so sloppy that people have had to travel out to sites to see what sort of dam was there and whether it ever produced electric power.

Allis-Chalmers also believes small hydro has arrived. After 20 years of making small turbines and other parts only as replacements, the company has a new line of 10 standardized turbines ready for what general manager Goertz Pfafflin foresees as a strong demand. The much smaller Leffel Co. in Springfield, Ohio, is another U.S. manufacturer.

In addition to saving fuels, hydroelectric power has the potential to revive some New England towns that have fallen into decay, Susan Barney of the Connecticut energy office said. If old manufacturing and mill towns have a cheap local source of power, as they did when they flourished in the 1800s, they might attract new industries.

"Small hydro is an all-winning thing," said J. D. Brown, deputy executive director of the American Public Power Association. He said that a small dam might keep one industry open for a few extra weeks in a situation like the coal strike.

He would like to see the federal government go beyond its present support for restoration of existing dam sites and help fund construction of new dams.

"The government's been negative—at least cautious—about new hydro," Brown said. "They seem to be saying, 'It's a good thing but let's not let it happen any more.'" ●

THE MARINE CORPS MARATHON, 1977

● Mr. WILLIAMS. Mr. President, I would like to pay a belated, but well-deserved tribute today to the U.S. Marine Corps for staging the Second Annual Marine Corps Reserve Marathon here in the Nation's Capital last November. By noon that Sunday, November 6, more than 2,600 competitors had accepted the challenge of the traditional 26-mile, 385-yard course which wrapped its way around the city. While about 40 percent of the entrants were from the greater Washington metropolitan area, the field included representatives from 32 States, Canada, the United Kingdom, and Australia. This was by no means an event restricted to men in the military services—three out of four competitors had absolutely no connection with the service, and, it is important to note, 120 women chose to demonstrate their prowess in this grueling endurance contest. In fact, one of these woman athletes, 21-year-old Cindy Patton, a student at Boston University, finished the entire course in a wheel chair.

What is exciting and remarkable about this venture is that it has taken the Marine Corps just 2 short years to create a sports event which can now take its place among the premier marathons in this country. Indeed, the competition last November was the third largest ever held in the United States.

The Marines have once again rendered a genuinely worthwhile service to our Nation's Capital by organizing this magnificent marathon. Of course, it is extremely fitting that the Marines be involved in such activity, considering the military circumstances that gave rise to the original Marathon in 490 B.C. But today's marathon, far from being a military activity, is a true community happening.

The winner of the marathon was 27-year-old Kevin R. McDonald, of Columbia, S.C., who completed the course in 2 hours, 19 minutes, and 36 seconds. Second place went to Lt. Phil Camp, of Pensacola, Fla., who is a Navy helicopter pilot. Third went to Max White, of Alexandria, Va., a teacher at nearby Alexandria Episcopal High School. The British Royal Marines were represented in fourth place by Lt. B. C. Heath. Susan Mallory of Arlington, Va., who was first among the women competitors with a time of 2 hours, 54 minutes, and 12 seconds.

Mr. President, I am also proud to report that 28 youngsters, 15 years old and under, ran in the marathon as well. Ten-year-old Keith Griffler of Virginia Beach finished the course in 3:39:34, averaging just over 8½ minutes per mile, while 12-year-old Christian Moores of Augusta, Ga., finished in 3:35:35 and 13-year-old John Forehand of Rockville, Md., ran a blistering 3:07:27. It seems to me that the accomplishments of these young Americans bode well for our Nation's athletic performance in future international competitions.

In the short 2-year history of this event, Col. James L. Fowler, USMCR, who first initiated the marathon concept here in Washington, has been the race director. Colonel Fowler and his fellow Marines should be strongly commended for developing this great competition which seems to have already become a traditional part of the Washington autumn. I look forward to next year's race.

Mr. President, I ask unanimous consent that an article on the Marine Corps Marathon, which first appeared in the Marine Corps Gazette, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WITH A LITTLE MORE EFFORT YOU CAN RUN A MARATHON

(By Col. R. T. Lawrence)

Six November 1977 is the date for the Second Annual Marine Corps Reserve Marathon (held in the Washington, D.C.-Northern Virginia area), which got off to such a fine start last year with over 1,200 participants. Local AAU officials attribute much of the success of their marathoners at Boston on 18 April 1977 to the Marine Corps Reserve Marathon. It is certain to become a popular event for local runners and should be the Mecca for Marine marathoners all over the world, as is the Boston to international marathoners.

The purpose of this article is to encourage Marines to participate, who may think that 26 miles and 385 yards are beyond their capacity, while advising others who rashly enter the race without proper preparation to do some planning, coupled with training, in order to have a successful run.

There are several objectives in running a marathon. First is to finish the race. Second is to finish the race without being in a state of exhaustion. The third is to finish in the required time by age group or sex to qualify for the Boston Marathon. For men thirty-nine and below, the qualifying time was three hours this year. For men forty and above and all women, the qualifying time was three and one-half hours for the 1977 Boston.

The distance of 26 miles and 385 yards may either intimidate or be looked on as a snap by many of those uninitiated to the harsh demands of a marathon. For those Marines

who are jogging or running fifteen to thirty miles a week, be encouraged, because the gradual jump to the number of miles necessary a week to prepare for a marathon isn't that difficult to attain. For those rash Marines who feel that the thirty to forty miles a week they are running today will be sufficient to allow them to line up and run a marathon tomorrow, a word of warning. You may finish the marathon but it will be nearly impossible to do it within three or three and one-half hours, according to sex or age group. You will probably be sick for a week nursing yourself back to health, if you don't listen to your body and stop before you collapse.

The editors of Runner's World and their various Booklets of the Month or Runner's Book have published many articles to assist an individual to prepare for a marathon. Joe Henderson's "Training for the First One" in the February 1977 issue of Runner's World is a fine instruction which takes into consideration Henderson's "collapse point" theory. "The Runner Diet" is also well worth reading. These publications are readily available in local sporting goods stores or by mail order.

The following information is based on the practices by such experienced marathoners as Maj. Don Lynch, stationed at Headquarters, Marine Corps and George Marienthal, Deputy Assistant Secretary of Defense (Environment and Safety). Both of these seasoned marathoners have been very helpful to aspirant marathoners in the Washington, D.C. area.

In planning for your first marathon in particular, use the normal Marine Corps system of selecting D-Day or Marathon Day (M-Day), and back off nine weeks at a minimum or more, depending on the weakness of your running base, to start marathon training. You should be running seven days a week at a minimum of three to four miles a day, at a pace of seven minutes to no more than eight minutes a mile to begin marathon training. Until you reach that running base, you aren't really ready to start marathon training. Fortunately for most Marines intrigued with the aspiration to run a marathon, you are near to or already accomplishing the daily runs at the distance and rate necessary to start.

So your M-Day is 6 November 1977. The first week you back off is your taper down and special diet week just before the big race. The remaining eight weeks are used to build up the training effect of long, slow distance running. Your goal is to extend your collapse point to give you a comfortable cushion over the 26 miles 385 yards in order to account for various temperature/humidity mixes coupled with wind and road surface and grades that steal the marathoner's energy.

An essential training principle to follow is "train don't strain." Listen to your body. Don't let minor aches and pains deter you, but don't let them become aggravated so that they sideline you causing a setback in training or eliminating you from the race entirely. You may develop various aches, pains, blisters and lose toenails in training. And not all medical doctors are familiar with athletic injuries. A good podiatrist who runs for fun or health is a fine friend to have.

Don't be surprised by blood in the urine after prolonged long-distance training. Don't ignore the problems. Have a checkup so that you don't injure yourself. Don't overdo your training. Last-minute increases in distances can only injure without improving your performance. Stick to your training goal.

Warm up well before running with stretching exercises for the achilles tendon. Start off at a *slow* jog and gradually increase the pace. Vary it during the workout. Cool off gradually with more stretching exercises. A small investment will turn into a pair of million-dollar shoes. There are any number of suitable brands on the market. Make sure the shoes fit well.

It is important to run with one partner at a minimum to keep up the spirit when the training gets tough. There may be an experienced marathoner in your area who conducts regular marathon training runs and is happy to set the pace and explain the various methods used by world class runners that can be adopted by newcomers to the marathon. Join them and maintain normal conversation throughout the long, slow-distance runs. That helps keep you in the "train don't strain" window.

What is the collapse point? That's when you "run into the wall" or the "monkey jumps on your back." Your training base has been exhausted and so are you.

How is the collapse point calculated? Divide the total number of miles you run a week by seven to give you your average miles per day. Multiply that average distance by three and you have the "collapse point." There is an assumption here that you are stressing the system at a calculated controlled rate and are not just walking.

How far and how often do you have to run to prepare for a marathon? Eight weeks of running sixty-three miles a week at a seven-to-eight-minutes-a-mile pace will put your collapse point at twenty-seven miles. Ninety-one miles a week at the seven to eight minutes-a-mile pace will put your collapse point at thirty-nine miles. The first collapse point of twenty-seven miles don't give you much room to accommodate heat, cold, wind, loose surface, hills and excitement, but it should get you there in three hours, three minutes and thirty-three seconds (3:03:33) at a seven-minutes-a-mile pace and 3:29:45 at an eight-minutes-a-mile pace if you have been faithful to a seven-days-a-week schedule for eight weeks. The second collapse point of thirty-nine miles should give you a fine cushion for weather and course conditions while allowing you to expend more energy for a personal record in time and not just to finishing.

In the first collapse point of twenty-seven miles, averaging nine miles a day, seven days a week is relatively simple to fit into your work schedule. Averaging thirteen miles a day for the thirty-nine-mile collapse point takes some scheduling and sacrifices that involves you and your family or associates.

Running to and from work is a common solution for those running ninety miles a week or more. Two-a-day runs or seven to nine miles at least three times a week are less taxing on the impact points of feet, ankles, knees and hips while building the cardiovascular training effect in aerobic running you are seeking. Mixing the distances for variety and running less than marathon races of ten, fifteen and twenty miles conducted by local running clubs on weekends provides competitive situations under race conditions that are essential to gauge where you are in training and the race itself.

Table 1 indicates the last portion of six months marathon training that graduated from a sixty-three-mile-a-week average for a first marathon effort of 3:29:58 on 21 February 1977 to a ninety-mile-a-week average in preparation for the Virginia Beach Marathon effort of 3:27:06 on 19 March 1977, followed by the Boston effort of 3:21:28 on 18 April 1977.

TABLE 1.—PREPARATION FOR BOSTON MARATHON, APR. 18, 1977

[Male Marine: age—50; height—6' 2"; weight—174 lb]

[1] Split training session.
[2] Race.
[3] Protein diet.

Depending on your age, fifty in the case, it was not the smartest move to run the second marathon just one month before Boston. However, Joan L. Ullyot, the author of various marathon articles and a marathoner herself, has run two marathons on successive weekends while another, younger woman ran three marathons in fifteen days at a three-hour pace. Be that as it may, don't overdo it.

If the longest distance you run before a marathon is only twenty miles, how do you get the last six miles and 385 yards accomlished? The last portion comes from the aerobic training effect of long, slow distance running built up over a solid eight weeks of marathon training. Your pulse rate is probably down to fifty-six to forty-two beats a minute by that time. You are ready. Have confidence in your equipment. Your machine you have carefully tuned. It is all in your head from twenty miles on. Proper training will take care of the remaining six miles. Believe in it. It will be mind over matter.

Dieting to get the necessary energy from food is a must. Carbohydrates are the word. The rest of the family may get fat on pancakes for breakfast and spaghetti for supper for eight weeks, but you need it. Lose weight. Get well under the norm for your height in order to have a more efficient machine.

The prerace week diet following a long depletion run of eighteen to twenty miles one week before the race is a system used by many marathoners. It is not suited to all marathoners, but merits a test. Following the depletion run which may be done in two increments to save the feet, ankles, knees and hips, come three days of eating proteins: meat, eggs, fish, cottage cheese, cabbage, celery, lettuce, tomatoes and cheeses. Avoid fats. You will feel tired during your taper-off runs. Proteins make your body sugar-hungry in the muscles. Follow your three days of proteins with three days of packing carbohydrates: bread, pancakes, potatoes, beans, peas and spaghetti. Carbohydrates convert to glycogen stored in the muscle at a rate three to four times the normal.

Don't gorge yourself. Race day is runner's choice. Go to the starting line with a super load of stored glycogen but with body waste eliminated. Don't be caught by the proverbial turtle when you have to stop for an emergency comfort stop. The last three days before the race don't eat roughage or other food that might cause gas, cramps or diarrhea. Don't load up on honey just before the race. It may pull water into your stomach from the blood stream causing internal dehydration.

Proper diet must be accompanied by plenty of rest during the prolonged training period. Your social life may require modification.

Take water or special mixtures of fluids containing potassium and other minerals before, during and after the marathon in order to replace some of those burned out during the race. You won't always have a tail wind, downhill grade and temperature of fifty to fifty-five degrees. Avoid salt tablets. On hot days fluid intake is absolutely critical.

Wear a light-colored hat and shirt to reflect the sun's rays. Put ice under your hat frequently and carry it in your hands. Maintain your body temperature down by running through sprinklers. Try to maintain sweating. You will never make up all the liquids and chemicals you lose, but you won't enter exhaustion or shock either.

Drinking large amounts of liquid doesn't help. It can't be assimilated fast enough. It just sloshes back and forth in your stomach and makes you uncomfortable. The secret is to drink two to five ounces of fluid frequently. Pour what remains in the cup on your head, the key to your temperature control mechanism. This takes logistic support so a team effort is needed with pit stops for water, ice and special fluids along the way.

Logistics are more difficult on a point-to-point race as opposed to a repeating loop course. The race committee can only provide a few comfort and aid stations. They are adequate, but not ideal. It's up to you and your team to provide the extra support you need, depending on race conditions. Cold windy days also require protective clothing. Come prepared for all conditions. It's too late, if you guess wrong on the weather.

Marathon Day is Sunday, 6 November 1977. Your eight weeks of long, slow distance marathon training begins 4 September and ends 30 October. Your last long, slow distance run for depletion will be Sunday, 30 October 1977. That is followed by three days (31 Oct–2 Nov) of protein-eating to make the body sugar hungry, and then three days (3–5 Nov) of carbohydrate-packing with little or no training to build up a glycogen reserve in the body muscles of three to four times the normal.

If at this reading you have not reached a training base of three to four miles a day at a seven to eight minutes-a-mile pace seven days a week, you had best get started so you will be ready for marathon training and then the marathon itself.

You have the time. Put your Marine Corps training to good use and accomplish a goal that is one of the least attainable for the true amateur athlete: successfully completing a marathon in fine shape within the time requirements for your age and sex established for the Boston that draws international runners from around the world.

Don't be discouraged, however, if you don't make the qualifying times for Boston the first time you run a marathon. Use that race experience to build for the next one. You need not preoccupy yourself with the front runners who may be world class or nationally ranked marathoners. Remember your first objective is to finish the marathon, and, secondly, not to have collapsed with exhaustion. Your primary competition is yourself. After you . ave dominated the inner self that may want you to drop out or start out too fast, which burns you out in the long haul, then you will have plenty of company around you for your own marathon race.

By the way, there is no great material award for running a marathon. Even the winners of a marathon by age group and sex may receive no more than a symbolic laurel wreath. Your entrance fee pays for the cost of a tee shirt or patch commemorating the event, if that. The great reward is spiritual in the gratification of successfully participating in the marathon while sharing a grueling event with all the ordinary through world class marathoners who each carried their own weight 26 miles and 385 yards.

Make the Second Annual Marine Corps Reserve Marathon a happening where Marines show the way.●

LAWS FOR LAWMAKERS

● Mr. GARN. Mr. President, I am pleased to submit for inclusion in today's RECORD an enlightening and entertaining speech by one of America's foremost lawyers and scholars, Dallin H. Oaks, president of Brigham Young University and president of the American Association of Presidents of Independent Colleges and Universities. Dr. Oaks has distinguished himself as a scholar and leader, but his present activities are perhaps gaining for him an even more impressive reputation. These present activities are often directed toward reversing the powerful encroachments of the Federal Government into the private lives of American citizens and the affairs of private schools.

I think this country and this body are too little concerned with freedom. We appear determined to dominate and control every activity. We want to tax or regulate or legislate about every possible activity. We seek to level the social structure; diversity and private enterprise are enemies to be overcome. Independent, privately funded ventures, particularly it seems if they are motivated by moral or religious motivation, are brought under the most severe pressures to conform or collapse, and at this time the best evidence of this condition may be found among the private colleges and universities. They are fighting for their very independent existence. The Federal pressures are great; the goal is levelling, and if recent history provides any suggestion as to the outcome we must conclude that the levelling will be down rather than up.

This country has some serious education problems. I fear we will meet disaster if we destroy our private educational institutions, for it is these institutions that are providing sanctuary for educational excellence and moral strength. The levellers seek egalitarianism but we are getting a large measure of mediocrity.

We are blessed to have Dr. Oaks and others who so ably represent educational and personal freedom. I ask unanimous consent to have printed in the RECORD an excellent article by Dr. Oaks which was printed by another champion of freedom, Rockford College.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNRULY LAWS FOR LAWMAKERS

(by Dallin H. Oaks)

One of the most important books of the Twentieth Century is *Parkinson's Law*, a 1957 publication of C. Northcote Parkinson, Raffles Professor of History at the University of Malaya. This book is important because it is wise and readable. It is wise because it applies good common sense to questions of public policy. It is readable because of its style: lively, brief, specific, and satirical. *Parkinson's Law* is so interesting that it slips right by the defenses most of us raise against any new insight that threatens our complacency or prejudice.

Parkinson's first law proclaims that "work expands so as to fill the time available for its completion." This first law has two axioms: (1) "An official wants to multiply subordinates, not rivals," and (2) "officials make work for each other."[1]

In 1960 Parkinson published another book containing his second law: "Expenditure rises to meet income." The preface declares that this book was intended to show "that a greatly reduced revenue would bring about an improvement, not a decline in the public services." Parkinson explains this astonishing conclusion as follows:

"It is the paradox of administration that fewer people have less to do and more time, therefore, in which to think about what they are doing. When funds are limitless, the only economy made is in thinking. The worse inefficiencies do not stem from a lack of funds but from an initial failure to decide exactly what the object is. It is this muddled thinking that leads to waste, and often to waste on a colossal scale. Toward eliminating public waste, an essential step is to limit the total revenue."[2]

Inspired by Parkinson's wisdom and by his knack of making his insights memorable, I have sought to apply similar insights to the process of lawmaking and to some current featues of government administration. I have thereby entered upon the formulation of what I have chosen to call Oaks' "Unruly Laws for Lawmakers." So far I have three laws or principles, a number of illustrations, and some asosciated hypotheses.

I. LAW EXPANDS

I evolved my first law or principle for lawmakers by posing variations on Parkinson's first two laws. Thus, if "work expands to fill the time available for its completion," as Parkinson's first law affirms, then this surely implies that as the staff of a department increases, the amount of work accomplished by the average staff member will diminish so that the total work accomplished by the department will not exceed what is necessary to complete its assignment. Similarly, if "expenditures rise to meet income," then it follows, as Parkinson himself explained, that

Footnotes at end of article.

the money bureaucrats save in one direction will surely be wasted in another.[3]

By this process—reasoning from variations on Parkinson—I arrived at my first principle of law-making: *Law expands in proportion to the resources available for its enforcement.* The expanding law referred to in this principle is not limited to the law in the statute books. It includes the regulations of administrative agencies, the rulings of regulatory bodies, and even the individual actions of government servants.

The first principle is verified by the common observation that a government's bureaucratic army is never demobilized. If a government agency is created or a government worker is employed to accomplish a task that is later accomplished, experience teaches that the public employment rolls will not be reduced. The bureaucratic army will be transferred to another front, and if there are insufficient conflicts to justify their continued mobilization, they will start some. When this happens, we realize that the agency's formal goal of giving the service desired by taxpayers and citizens has been displaced by the controlling goal of providing continued employment for the workers and a secure power base for the leaders.[4] All of this assures that law and government activity expand in proportion to the resources available for their enforcement.

The process is not easy to counter, since it seems to rise out of human nature. It exists in private as well as public employment. It is worse in government because government activities are not disciplined by the constraints of a competitive market place. If someone challenges the tendency to put personal goals ahead of public service in government employment, bureaucrats take up the same position as sheep or cattle in the presence of wolves, a position Parkinson described as a tight circle with horns outward and the weakest in the center, "yielding nothing, denying everything, concealing all."[5]

A distinguished British scholar showed this principle in operation in the behavior of what she called "civil servants and academics and all kinds of social experts whose livelihood and advancement depend upon a continuing supply of social problems and deprived citizens." Her study showed these social planners perplexed at the substantial number of deprived individuals who appeared to be unaware of their deprivation and unwilling to claim the social welfare benefits to which they were entitled under British law. As a result, "the government did what any businessman does when sales are flagging. It mounted an expensive advertising campaign begging people to use" their welfare benefits.[6]

When I first read that description I thought it farfetched. Imagine, government workers trying to multiply welfare expenditures! I accepted its accuracy a few months ago when I was exposed to an intensive advertising campaign on commercial radio stations in Salt Lake City urging qualified persons to use federal food stamps and lamenting the fact that this valuable benefit was being used by fewer people than the government planners had estimated. The effort to promote welfarism is surely a successful one. In the decade from 1965 to 1975 the number of participants in the food stamp program increased from 1 in 439 to 1 in 13, and public expenditures have soared from $36 million to 52 billion, 150 times its level 10 years earlier.[7] Truly if resources are available, law or government activity seem inevitable to expand to consume them. I conclude this reference to food stamps with a comment on welfare reform. The rash of proposals to reform our decrepit welfare system seem to confirm what Arthur Bloch has dubbed "Howe's Law: Every man has a scheme that will not work."[8]

Before introducing my second principle I will share three hypotheses I have formulated in connection with my work on the first principle. All are closely related to the matter of lawmaking and government resources, but none has yet been tested sufficiently to be put forward as a full-fledged law or principle.

The first hypothesis states that *the public is easily fooled by government claims of economizing.* Inefficiency is easy to conceal because governments have no competitors in the performance of their functions. The complexity of government also inhibits public understanding. As they say in the nation's capital: "If you're not confused, you're not well informed."

A clear leader can nearly always take public insistance on government economy and turn it to his own advantage. For example, most of us can recall some candidate for public office who has campaigned on a platform of reduced government spending and employment. Elected to office, such a politician may achieve reductions but the more likely outcome is further increase in public employment and spending. The conventional way to promote eocnomy in government is to hire experts to analyze the problems and recommend solutions, hire others to evaluate the suggestions, hire others to write regulations to implement them, hire others to supervise their enforcement, and hire others—public relations sepcialists—to praise the results and persuade the public of their success.

This is the way of most government econcmy drives. A government official makes himself a hero, and the people—both taxpayers and spectators—think they see a great improvement. In fact, there has been an increase in both government regulation and government employment. The process is endless, which brings to mind my favorite aphorism about pointless activity: "When you're doing nothing, you never know when you're through."

As a second hypothesis I suggest that *an uninformed lawmaker is more likely to produce a complicated law than a simple one.* This hypothesis is grounded in the same truth relied on by the man who apologized for writing a long letter and explained that if he had more time he would have written a shorter one. If lawmakers understand a problem and agree on their objective, they may be able to express themselves with an elegant simplicity that is sure to be absent if their lawmaking efforts thrash about in ignorance and discord.

My final hypothesis in this series is a variation of Gresham's law, the well-documented economic principle demonstrating that "bad money drives out good money." By the same token, I hypothesize that *bad or complicated law tends to drive out good judgment.*

One of the principal effects of the private foundation provisions of the Tax Reform Act of 1969 has been to require greater and greater reliance on lawyers in the administration of charitable giving.[9] As this portion of the tax law has increased in complexity and its legal boundary-lines have become less and less distinct, the area for the administrators of charitable funds to exercise their good judgment has diminished. More and more administrative questions must be submitted to lawyers. As lawyers have gained an effective veto power over larger and larger areas of charitable fund administration, these organizations are inevitably less flexible and less venturesome. The legal profession, whose doubts can only be satisfied by precedents, is rarely comfortable with innovation.

Bad laws—especially complicated bad laws—can also cause administrators to be so preoccupied with whether something is *legal* that they wholly neglect to consider whether it is *wise.* Some years ago I was asked to advise on a complicated reorganization of business activities. There were two objections to the proposed reorganization: it was unwise as a matter of business judgment, and it might bring unfavorable tax effects. Unfortunately, the responsible administrators became so preoccupied with the complexities and the challenges of the tax law that they came to see this as the only question. When they received a favorable tax ruling, they treated that victory as having satisfied all doubts. They rushed into a business reorganization they would never have considered if they had not let bad law displace good business judgment. The lesson to be drawn from this experience is that a task not worth doing at all is not worth doing well.[10]

II. SUPPLEMENTING BAD LAW

Oak's second principle or law for lawmakers is that a *bad law is more likely to be supplemented than repealed.* Our statute books contain many bad laws that have been supplemented, but very little evidence of any that have been repealed. The current popularity of so-called sunset laws, which would automatically extinguish government programs or agencies after a certain period of time unless they were deliberately renewed, is welcome evidence of public uneasiness with this situation.

For example, consider the minimum wage. Economists have told us for many years that minimum wage laws increase unemployment, especially among "workers on the lowest rung of the employment-ladder—the very young and old, minorities, and the handicapped."[11] An employer who will hire a marginal worker at $1.50 an hour, will not hire him at $2.65. The employer will try to economize by mechanization or other means, which will increase unemployment among many of the workers the minimum wage law purports to protect. But the favorable political effects of minimum wage laws generally prevail over their unfavorable economic effects.

Instead of being repealed, the bad minimum wage law is supplemented by unemployment and welfare legislation. One law puts the marginal employee out of work, and other laws support him in idleness. Or, the government seeks to offset the unemployment caused by minimum wage laws by increased government employment, as the administration advocated in recent hearings on proposed increases in the minimum wage.[12]

These offsetting laws are reminiscent of the well-meaning federal agency that sought bureaucratic approval to save space and clerical help by destroying outdated files. Permission was granted, but only on condition that the agency make one copy of everything before they destroyed it.

The tendency to supplement a bad law rather than to repeal it is also reminiscent of the two novice businessmen who established a roadside stand. They bought a load of melons from a farmer for $1.00 a melon, trucked them across the valley to their stand, and sold them, for $1.00 a melon. Then a second load was purchased at $1.00 apiece, trucked, and sold for the same. As the partners returned with their third load one observed, "you know, we're not making much

---

Footnotes at end of article.

money in this business." Quickly agreeing and anxious to be helpful, his partner asked, "Do you think we need a bigger truck?"

Laws that were good in their origin and initial effect sometimes accumulate bad effects with the passage of time. But even outdated laws are seldom repealed. The City of Chicago has a ban on sidewalk cafes. At the turn of the century there was a reason for such a rule: Chicago had so many horses that their collective droppings—ground under foot, dried, and sent swirling by the city's famous winds—made outdoor food consumption a significant health hazard.[13] The horses are gone, but the ban remains, and its enforcement and supervision (and that of similar regulations) provides welcome employment—dare one say Daly employment?—for an army of patronage workers. Other rules become unreasonable as one zealous bureaucrat seeks to outdo another, like the storied pentagon executive who coined a security classification more secret than top secret: DBR—"Destroy Before Reading."

Many of you will remember Professor Martin Anderson's demonstration that the effect of urban renewal programs was not to improve the housing of the poor, but rather to pack them into living quarters that were frequently more expensive and less desirable than the slums from which the federal bulldozer had evicted them.[14] In the first 22 years of urban renewal, 1949 to 1971, the federal government spent approximately $11 billion to demolish 538,000 low-income housing units, but only 200,000 were replaced, and only half of these with low- or moderate-income units. The net result of this federal housing program was a *reduction* of about 400,000 low income units in this period, with resultant overcrowding and increased prices for low-income Americans.[15] The damage inflicted by the urban renewal laws during this period had to be remedied with a host of supplementary legislation.

Rent control provides another example. Everywhere it has been tried, the inevitable economic effect of controlling rents has been to inflate demand and diminish supply. Where rents are kept artificially low, consumers use relatively more housing than where housing is priced at a market rate in relation to other needs. At the same time, landlords are deterred from maintaining or renovating old housing and from building new housing because rent control prevents them from obtaining a market return on their investment. As a result, housing shortages and deterioration in the quality of housing always follow rent controls.[16]

I saw this in Sweden. After 30 years of Swedish rent control, the effects of their interference with the market are apparent. A Swedish law professor I met at a professional conference in Stockholm explained how he had just leased quarters for his 3-year-old son to use as a bachelor apartment when he enrolled at the university 15 years later. "Will you rent it in the meantime?" I asked him. "Oh no, I can't do that," he explained, "since our landlord-tenant law makes it virtually impossible to evict a tenant." "Fortunately," he continued, "our rent control keeps the rent so low I can afford to hold the apartment vacant for about 15 years just to have it available when my son needs it." Sweden has a bad housing shortage, as you would expect. But, as always, the needs of those who have close ties to the government bureaucrats are well met, and it is the common people who suffer under the government controls that purport to be for their benefit.

The operation of my second principle, that "a bad law is more likely to be supplemented than repealed," also explains the strong current trend toward socializing major segments of our economy. In brief, the trend works like this: First, a law or government program or agency interferes with the free market in a particular industry, justifying its interference by reference to some abuse or catastrophe like a depression. In time, this government interference with the market causes less efficient allocation of resources and more conditions that merit complaint by consumers. Soon, well-meaning reformers propose government assistance or regulation as the best remedy for ills in the industry. For example, when rent control produces a housing shortage, the government solution is public housing and other tax-supported competition with and regulation of the private housing industry. With government intervention come further difficulties until, in the end, the government proposes to take over the entire industry in order to save it. That sequence of events can be seen in various stages in many major industries in the United States today.

In this strange sequence, the government interference that made the industry sick is proposed in larger doses as the means of making it well again. By this means one bad law supplements another. I know of no instance where the original bad law has been remedied by repealing it and getting back to the free market that has been responsible, more than any other single cause, for the fact that Americans have traditionally enjoyed the greatest political freedom and the highest standard of living of any people in the world.

Government intervention in the market can also provide a pretext for government interference with individual freedom. Consider the example of health care. As long as an individual is primarily responsible for his or her own welfare, bearing the burden of any personal activities that are likely to increase its cost, such as smoking, overeating, reckless recreational activities, and the like, there is no basis for the government to restrict persons in the exercise of their individual choices. Individual high-risk activities impose no cost on other individuals, nor on the government. But once the government assumes responsibility for all health care in the society—as it is doing under the type of socialized medical care toward which we are moving—any high-risk individual activities automatically affect the cost of health care by the responsible government agency and by taxpayers generally. In that situation, anything an individual does to increase the risk and cost of his or her personal health care is of concern to others and provides a theoretical basis for government regulation. By this means government social welfare programs provide a rationale for more government interference with individual freedom.[17] Even in this way a bad law is more likely to be supplemented then repealed.

My reflections on this second principle have also produced a related hypothesis, which, although not fully tested, is offered here in a preliminary way, for whatever illumination it may afford. This hypothesis suggests a vital defect in a representative democracy that is increasingly relying on government by agency decree: elected lawmakers reserve credit and delegate blame.

Like many of us in our private activities, lawmakers tend to be specific about what is welcome, and vague about what is unwelcome. When a law is generally hailed as a great accomplishment, elected lawmakers are resolute about shouldering responsibility for the accomplishment. But the blame for bad laws is generally delegated to the bureaucrats who wrote the regulations. If a lawmaker gets a letter from a voter, he answers it; if he gets a complaint from a taxpayer, he refers it to an agency.

One of the most disturbing recent trends in lawmaking is Congress's tendency to pass vague pronouncements in favor of virtue or in opposition to sin. By this means Congress abdictates its responsibility to formulate specific laws, leaving that function to a regulatory agency. That is what the Congress did in outlawing sex discrimination in Title IX of the Education Amendments of 1972, giving the government regulators 36 words of general condemnation of sex discrimination, on which HEW's Title IX sex discrimination regulations erected approximately 36,000 words of specific prohibitions. For example, Congress was entirely silent on the amount or type of "federal financial assistance" that made private organizations subject to the Title IX regulations. The law on that vital subject was decreed in the regulations.

The same abuse is evident in the Rehabilitation Act of 1973, which contains five lines condemning discrimination against the handicapped, with no legal definition or legislative history to define the "handicapped" who were the subject of the law. The law was decreed in the voluminous regulations recently issued by an executive agency.

Martin H. Gerry, director of HEW's Office of Civil Rights and hardly a natural foe of the bureaucracy, described and criticized this process in these words: "As these 'sense of the Congress' statutes have replaced the more meaningful lawmaking activities which surrounded the passage of Title VI (of the Civil Rights Act of 1964), the real lawmaking activities which surrounded the passage of Title VI (of the Civil Rights Act of 1964), the real lawmaking requirements, of course, have been shifted to the department." He called this a serious problem in terms of the separation of powers."[18]

By writing relatively meaningless laws and effectively delegating the lawmaking function in this manner, an elected lawmaker can escape having to vote on hard questions like the definition of "handicapped," the exceptions to be made to a law outlawing age discrimination, or who shall be subject to a law outlawing sex discrimination. Those vital lawmaking decisions are left to bureaucrats who rule by decree, largely in secret, and without responsibility to the electorate. As for the elected lawmaker, he can claim credit for the good results, but use the Halls of Congress to disclaim responsibility and to condemn the bureaucrats for interpretations that prove bad or unpopular.

III. LEGISLATING NATURE

The third of my three laws for lawmakers is: *social legislation cannot repeal physical laws.* This deceptively simple principle cannot be taken for granted since so many persons apparently disbelieve it, or act as if they do. People are generally too susceptible to gimmicks like the energy conservation measure the dowager who only plugged in her electric clock when she wanted to know what time it was. When Congress passed the law establishing Daylight Savings Time, it changed the time when the sun came up and when the cows gave their milk. But we do well to remember that this law did not change the sun or the cows. It only changed the clock. This simple fact is not understood by persons who believe that social legislation can change physical laws. Thus, a friend told me that when Arizona was considering Daylight Savings Time, some citizens in his neighborhood in Phoenix signed a petition opposing Daylight Savings Time because the extra hour of sunshine would burn up their lawns.

Footnotes at end of article.

President Carter recently proposed what he called the Hospital Cost Containment Act of 1977. This law would, in effect, put a ceiling on the prices hospitals could charge their patients. It should therefore be titled the Hospital Revenue Limitation Act. But if one were determined to title it in terms of its effect on patients in some situations, it could just as well have been titled the "Hospital Quality Reduction Act." Assuming a well-managed hospital that is not in a monopoly position—a frequent but of course not invariable situation in today's health-care market—there is no way to limit the price hospitals can charge without reducing the quality of services they provide. If hospital prices are frozen or held below market levels, the only way hospitals can operate existing services and build facilities for new ones will be to use more and more government assistance. As noted earlier, the effect of such increased government assistance will ultimately be to destroy the private sector of hospital care in our society, giving government a monopoly on hospital ownership and management. That is the inevitable trend promoted by the so-called Hospital Cost Containment Act.

We don't need more sophisticated economics to understand these principles. Basic arithmetic and common sense will do. Sometimes we seem to make some of our most important political and economic decisions on the same primitive level as the Florida draft board that wrote a young man to explain why he has lost his student deferment and been classified 1–A: "To keep your deferment you must be ranked in the top two-thirds of your class, and you are only in the top one-fourth."

In the area of social welfare legislation, my third principle is clearly illustrated by reference to its primary corollary: Law cannot increase resources. Congress can pass a law freezing wages and prices or devaluing currency, but it cannot pass a law that will bring about an increase in the true gross national product of the nation. That is why the Great Society's "war on poverty" had to be a war on taxpayers as well. In this pair of wars it was inevitable, as Parkinson noted, that the war on taxpayers would be the easier war to win.[19]

Social planners cannot be reminded too often that an overall growth in the economy is a sounder means of abolishing poverty than a redistribution of capital or income. The sum total of all resources in the hands of the wealthiest fraction of taxpayers in this country would be insufficient to make any practical dent on poverty even if all of those resources were confiscated and given to the poor. British planners had to learn this lesson. After more than a generation of promoting the myth that you could tax the rich in order to provide social welfare benefits for the poor, the Labour Government conceded last year that this wouldn't work. Wealthy Britons already paid some of the highest taxes in the world, with marginal rates up to 83 percent on earned income and 98 percent on unearned income. If the deficit-ridden British government now confiscated all incomes in excess of $10,000 per year this would provide less than 1 percent of the government's current budget, an amount far less than its continuing deficit.[20]

The taxes necessary to support social welfare programs obviously have to come from the working middle class. But, as the working man's taxes go higher and higher, and as generally available social welfare payments get more and more generous, a worker has less and less incentive to work. Even the British Labour Government was brought to that conclusion. Denis Healey, Chancellor of the Exchequer, conceded during last year's financial crisis that British taxes had reached the point where they were "corroding the will to work." It made more sense for the average British worker to stay home and collect unemployment pay than to work and pay taxes.[21]

All the Acts of Congress, all the rhetoric of bureaucrats, and all the assurances of the Keynesian economists do not seem to make even a tiny modification in the laws of human nature and resource allocation on which the functioning of the market is based. There are social welfare legislative schemes that attempt to increase resources or to repeal physical laws, but typically all they produce is a bad side effect, like the pill that was supposed to make a middle-aged user look like a teenager again. It did: three doses and his face broke out.

And so I have given you my three laws or principles of lawmaking: (1) *Law expands in proportion to the resources available for its enforcement;* (2) *bad law is more likely to be supplemental than repealed;* and (3) *social legislation cannot repeal physical laws.*

In my exposition of these laws I obviously have made no effort to conceal my bias against lawmaking as the solution to every problem. I am not indifferent toward the abundant problems of our society, but only convinced that voluntary is always better than compelled—that the momentum of enlightened self-interest is always better than the compulsion of law. Inherent in our free enterprise system are the natural forces to correct most of its internal irregularities, although these correctives are sometimes slow and unpopular. But free enterprise has no corrective for excessive interference from government. It can only tolerate that interference and pass its cost along to consumers. In time, that cost can rise so high that our people may reject free enterprise because of grievances that should be charged to excessive government interference.

I hope that the love of freedom and the good sense of our people is sufficient for us to provide correctives for excessive government rather than to reject free enterprise. Only by the patient revolution of free enterprise can we be assured sufficient freedom and sufficient resources to find largely voluntary and permanent solutions to the problems that confront our society.

A TIME TO STOP

● Mr. McGOVERN. Mr. President, the Washington Post features an editorial page piece each day, entitled "For the Record." It usually represents a thoughtful observation by someone on current events or the state of our civilization. I find it a most interesting part of the paper.

Today's selection from J. Barnet's article, "A Time to Stop," which appeared in the March Sojourner, is especially provocative. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 17, 1978]

A TIME TO STOP

Humankind is entering a period of unique opportunity and unprecedented danger. The opportunity is the creation of a world community in which the basic economic, political and spiritual needs of every human being on earth can be met. For the first time the idea of a world community has become more than a philosopher's dream.

Statesmen, politicians, economists, indeed almost anyone who thinks about public policy, realizes that the nation-state cannot solve the fundamental political and economic problems facing humanity. No matter how many missiles a great nation amasses, it cannot defend its people. The Pentagon cannot defend the people of the United States if, despite the near certainty of its own destruction, the Soviet Union should decide to attack. The Soviet government cannot defend its vast territory either.

Neither can any nation build prosperity for its people behind the walls of its national frontiers. There is no longer such a thing as a U.S. economy. There is a U.S. branch of a world economy. . . . When unemployment, starvation, disease, war and political repression strike millions in Asia, Africa and Latin America, the consequences increasingly are felt here.

The reality of interconnections is forcing us to think beyond the religion of nationalism and to work toward political structures that are obedient to the biblical injunction that humanity is one. It is only in the last 20 years that the 2 billion or so persons living in the former colonial and dependent world have become subjects rather than objects of history. . . . ●

CHEMICAL WARFARE AND BIOLOGICAL DEFENSE RESEARCH PROGRAMS

● Mr. McINTYRE. Mr. President, Public Law 93–608 requires the Department of Defense to make an annual report on the funds obligated in the chemical warfare and biological defense research programs. I think it is useful to provide this information to the public so that it is available for scrutiny to all who have a concern for their Government's activities in this area.

The obligations for research for chemical warfare and biological defense amounted to $93.6 million in fiscal year 1977, an increase of $30 million over fiscal year 1976. Spending for the research and development in these areas is as follows:

Chemical warfare $36.6 million;

Biological defense research $15.9 million; and

Ordnance programs $12.5 million.

Unfortunately, we have not yet eliminated the potential for use of chemical and biological agents from our concept of war. However, we have shifted our emphasis toward providing adequate defense against their use, as opposed to preparing to use them ourselves. That should continue to be the thrust of our policy.

Mr. President, I ask unanimous consent to print in the RECORD the report on funds obligated for research for chemical warfare and biological defense.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF DEFENSE,
Washington, D.C., February 4, 1978.

HON. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: In accordance with the requirements of section 409, Public Law 91–121, as amended by section 2, (4) of Public Law 93–608, the report on funds obligated in the chemical warfare and biological defense research programs during fiscal year 1977 is enclosed.

The report provides actual obligations through 30 September 1977.

Section 4 of the Army report provides an adjustment summary which reflects change data to the second half, fiscal year 1976 report. This summary will permit the revision of estimated obligations to actual. The Departments of the Navy and Air Force reported no adjustments to their segments for the second half, fiscal year 1976 report.

The enclosed report has also been sent to the Speaker of the House of Representatives.

Sincerely,

——— ———.

DEPARTMENT OF DEFENSE—ANNUAL REPORT ON CHEMICAL WARFARE AND BIOLOGICAL RESEARCH PROGRAM OBLIGATIONS FOR THE PERIOD OCT. 1, 1976, THROUGH SEPT. 30, 1977, RCS DD-DR&E(SA) 1065 (ACTUAL DOLLARS)

	Army	Navy and Marine Corps	Air Force	Total
Chemical warfare program	$57,212,000	$1,284,000	$6,697,000	$65,193,000

DEPARTMENT OF THE ARMY ANNUAL REPORT ON CHEMICAL WARFARE AND BIOLOGICAL RESEARCH PROGRAMS
(OCT. 1, 1976, THROUGH SEPT. 30, 1977) RCS DD-D.R. & E. (SA) 1065

[In conducting the research described in this report investigators adhered to the "Guide for Laboratory Animal Facilities and Care" as promulgated by the Committee on the Guide for Laboratory Animal Resources, National Academy of Sciences—National Research Council]

SEC. 1.—OBLIGATION REPORT ON CHEMICAL WARFARE PROGRAM FOR THE PERIOD OCT. 1, 1976, THROUGH SEPT. 30, 1977

DEPARTMENT OF THE ARMY, RCS DD-D.R. & E. (SA) 1065

OBLIGATION REPORT OF RESEARCH, DEVELOPMENT, TEST, AND EVALUATION FUNDS FOR THE PERIOD OCT. 1, 1976, THROUGH SEPT. 30, 1977; REPORTING SERVICE: DEPARTMENT OF THE ARMY; DATE OF REPORT: SEPT. 30, 1977; RCS: DD-D.R. & E. (SA) 1065

Description of R.D.T. & E. effort	Funds obligated (millions of dollars)		Explanation of obligation	
	Prior year	In-house		
	Current fiscal year	Contract		
Chemical warfare program	1.061	20.593	During the fiscal year 1977, the Department of the Army obligated $26,156,000 for general research investigations, development and test of chemical warfare agents, weapons systems, and defensive equipment. Program areas of effort concerned with these obligations were as follows:	
	25.095	5.163	Chemical research:	
			Basic research	$801,000
			Exploratory development	5,682,000
			Total chemical research	6,483,000
			Lethal chemical program:	
			Exploratory development	1,281,000
			Advanced development	461,000
			Engineering development	59,000
			Testing	24,000
			Total lethal chemical	1,825,000
			Incapacitating chemical program:	
			Exploratory development	711,000
			Advanced development	120,000
			Engineering development	0
			Testing	0
			Total incapacitating chemical	831,000
			Defensive equipment program:	
			Exploratory development	9,457,000
			Advanced development	3,991,000
			Engineering development	2,255,000
			Testing	320,000
			Total defensive equipment	16,023,000
			Simulant test support	994,000

DEPARTMENT OF THE ARMY ANNUAL REPORT ON CHEMICAL WARFARE AND BIOLOGICAL RESEARCH PROGRAMS
(OCT. 1, 1976, THROUGH SEPT. 30, 1977) RCS DD-D.R. & E. (SA) 1065—Continued

SEC. 1.—OBLIGATION REPORT ON CHEMICAL WARFARE PROGRAM FOR THE PERIOD OCT. 1, 1976, THROUGH SEPT. 30, 1977—Continued

DEPARTMENT OF THE ARMY, RCS DD-D.R. & E. (SA) 1065—Continued

OBLIGATION REPORT OF RESEARCH, DEVELOPMENT, TEST, AND EVALUATION FUNDS FOR THE PERIOD OCT. 1, 1976, THROUGH SEPT. 30, 1977; REPORTING SERVICE: DEPARTMENT OF THE ARMY; DATE OF REPORT: SEPT. 30, 1977; RCS: DD-D.R. & E. (SA) 1065—Continued

Description of R.D.T. & E. effort	Funds obligated (millions of dollars)			Explanation of obligation
	Prior year	In-house		
	Current fiscal year	Contract		
1. Chemcal research	.212	5.915		
	6.271	.568		
(a) Basic research	(.000)	(.766)		
	(.801)	(.035)	Basic research in support of chemical materiel:	This basic research included, in the area of medical defense for chemical agents, studies on: Mechanism of action of refractory nerve agents, prophylaxis and therapy, skin protection, DNA repair in human cells and sites of action of incapacitating agents. CB defense research included work on ion-molecule reactions and enzyme induction for use in detection, quantitative structure activity relationship, and chemiluminescence kinetics. Basic research on chemical agents included studies on evaporation and dynamics of agent droplets. In the area of medical defense, the interaction of cyclic adenine methyl phosphonate (cAMP) with acetylcholine (ACh) level was determined. This provides a measure of anticholinesterace poisoning. In the area of chemical defense, it was demonstrated that the ionization detector for chemical agents can be made to respond to mustard (HD). These findings could materially aid in the de elopment of an advanced chemical agent alarm in response to a new joint service operational requirement (JSOR). Also in the defense area it was found that a chemiluminescence kinetics study pointed out the potential application of the XM19 biological alarm to the detection of chemical agents.
b. General chemical	(.212)	(5.149)	Exploratory development effort:	
	(5.470)	(.533)		1. Search for new co· pounds: The primary objecti es of this effort are to conduct initial screening studies in a search for improved leth l, incapacitating, riot ..ntrol, training agents, and simulants, and to determine analytical, chemical and physiochemic l properties of new and standard compounds. The chemical compounds subjected to initial toxicity screening originate from a variety of sources such as in-house research, friendly foreign countries, intelligence reports, industry, universities, medical institutions, and literature surveys. Research on analytical procedures is conducted on all known chemical agents, both domestic and foreign, and for detecting, identifying, and analyzing waste products from the demilitarization of toxic agents. Major accomplishments included the biological screening of 53 new therapeutic formulations for GD poisoning of which 3 showed primose; synthesis and evaluation of four chemical agents of interest from intelligence reports; completion of the investigation of chemical ion mass spectrometry (CI/MS) as a tool for identification of minute quantities of lethal agents; showed CI/MS to be superior to the electron impact mode of identifying V, G, and glycolate agents, their byproducts and intermediates and automated a test for potential respiratory irritants. A variety of initial toxicity studies were conducted on potential lethal, incapacitating and simulant agents; developed atomic absorption techniques for determination of organic arsenic in parts per million-billion, and demonstrated the feasibility of separating and identifying unknown materials in microgram quantities by combined gas chromatograph/infrared spectrometer. The data base being accumulated supports all technology areas in chemical defense, combat support and the design of chemical munitions. It represents the initial step in the determination of biological effectiveness of chemical compounds and is the 1st decision point as to whether chemical compounds have potential as a military agent or whether the compound should be dropped from further consideration. As the chemical compound advances in the exploratory development cycle other factors are considered such as analytical, chemical and physiochemical properties, stability, disseminability and producibility among others. 2. Techniques for evaluating effects of chemicals: Developed techniques to assess the behavioral effects of anticholinergic drugs in developing rodents. Determined that 5 and 10 mg/kg of the anticholinergic benactyzine reduced behavioral latency in adult and neonate rats as young as 5 days of age earlier than other studies reporting the onset of behavioral changes to anticholinergic drugs. Determined that behavioral data were consistent with development of spinal cholinergic system. Developed methods to assess brain and spinal cord cholinergic systems which can be applied in evaluating prophylaxis and treatment. Developed thin layer chromatographic method for identification and quantitation of impurities in the drug TMB-4. Developed an electrophoretic isoelectric focusing technique for separating isoenzymes of cholinesterase. Four isoenzymes have been identified in rat brain tissue. Initiated efforts to develop a rapid immunochemical field test for cholinesterase inhibition by organophosphorus agents. In evaluating a mechanism of organophosphorus agent inhibition, a spectrodensitometric method for measuring triphosphoinositides and diphosphoinositides in mouse brain was developed. 3. Medical effects of chemical agents: (a) Toxicity determinations and evaluations serve a multipurpose role. Chemical compounds are studied in animals to observe behavioral influences, effects on body systems and to estimate the toxicities for man. Data obtained are transmitted to a variety of sources both within the Department of Defense and to outside agencies. The information is used to evaluate medical and physical defensive posture; to obtain approval for use of chemicals in training, riot control or in quelling civil disturbances; to assist the munitions developer in concept studies and to provide those elements producing and/or handling hazardous materials, data to develop safety procedures. Major accomplishments include the acute and chronic evaluation of the chemical components of the M687 155 mm projectile, GB, binary munition; completion of the acute toxicological evaluation of the chemical components of the XM736, 8-in projectile, VX, binary munition and the initiation of chronic studies by all planned exposure routes except inhalation; the development of physiological techniques for evaluating respiratory and cardiovascular effects of chemical agents. The effects of single and repeated (13 weeks) exposures to red-phosphorus-butyl rubber was studied in mice, rats, and guinea pigs. The animals are being held for observation of chronic effects. A tumor sensitive strain of rats was exposed to GB vapors 5 days a week for 6 mo under controlled temperature conditions to study the presence or absence of testicular atrophy. Gross pathology on the exposed rats gave no evidence of testicular atrophy. (b) (1) Developed improved statistical methods to detect and evaluate mutagenic and chromosome damaging properties of chemical compounds. (2) Determined negative findings for 12 compounds and 2 mixtures being considered for use in prophylaxis and treatment of organophosphate poisoning. (3) Discovered that 5 of 10 dyes used by the United States, Canadians, and the United Kingdom had positive indications for mutagenicity on initial testing. Potent mutagenicity occurred with the B-1 dye, a component of the proposed XM 9 liquid agent detector. (4) Applied the signal detection theory to study pain in monkeys and found that the effective dose of diazepam, benactyzine, and scopolamine was equivalent to that which produces analgesia in humans. In previous studies using less sensitive measures of pain, the effective dose for monkeys was several times the human dose. 4. Chemical Dissemination & Dispersion Technology: The military effectiveness of a toxic chemical agent depends upon its toxicity, physical state and the system used to deliver it to the target. These factors dictate the optimal use of agents to produce casualties through the various routes of entry into the body systems; to contaminate terrain and/or equipment so as to restrict traversal or use; to harass personnel and force their survival in a toxic environment. Hence, the possession of a strong technological base for dispersion and dissemination is essential for evaluating the threat and the vulnerability of the armed services to chemical attack; for evaluating the efficacy of defensive countermeasures; to provide guidance for new and/or improved CW deterrent munitions and combat support systems; and to prevent technological surprise. Experimental studies were conducted to characterize the particle size distribution formed from centrifugally case liquid sheets, such as are produced by bulk liquid dissemination from spin-stabilized munitions. A predictive expression was established for Newtonian fluids and studies were begun to describe visco-elastic fluid breakup behavior. The characterization of liquid sheet breakup will be used to predict the performance of artillery projectile systems such as the XM736 8-in. VX, binary projectile. Two aspects of using agent-filled hollow fibers deployed on the ground to create extended duration terrain denial were

DEPARTMENT OF THE ARMY ANNUAL REPORT ON CHEMICAL WARFARE AND BIOLOGICAL RESEARCH PROGRAMS

OBLIGATION REPORT OF RESEARCH. DEVELOPMENT, TEST, AND EVALUATION FUNDS FOR THE PERIOD OCT. 1, 1976, THROUGH SEPT. 30, 1977; REPORTING SERVICE: DEPARTMENT OF THE ARMY; DATE OF REPORT: SEPT. 30, 1977; RCS: DD-D.R. & E. (SA) 1065—Continued

Description of R.D.T. & E. effort	Funds obligated (millions of dollars)		Explanation of obligation
	Prior year	In-house	
	Current fiscal year	Contract	
1. Chemical research—con			
(b) General chemical—con			studied; namely, (a) potential reduction in systems effectiveness due to agent extraction fr m the fibers caused by soil contact, and (b) the ability of the fibers to infiltrate a tracked vehicle traversing fiber-contaminated ground. Laboratory and contractual investigations are being directed at the use of imhibitive polymer beads for controlling the release rate and area coverage of volatile agents when disseminated from munitions. Fundamental studies of the dissemination characteristics of liquids at high agent-to-burster rations were conducted using a controlled, explosive projector/sampling technique. A program was initiated to experimentally establish dissemination criteria for solid materials for use in IR screening applications. 5. Chemical testing and assessment technology: (a) The proper control of physical characteristics (i.e., flow rate, temperature, etc.) of a jet engine chemical decontamination system determines the effectiveness of the system. Laboratory equipment and technology to evaluate these physical characteristics have been developed and tested. (b) The ability of thickened liquid agent drops to penetrate clothing influences the protective capability of clothing systems. Laboratory methods and equipment to evaluate penetration were developed and testing initiated. (c) The pickup and transfer of liquid agents from contaminated surfaces influences the ability to operate in a contaminated environment. Laboratory equipment and methods were developed and tested to evaluate pickup and transfer mechanisms and testing initiated. (d) Controlled dispensing of drops of thickened liquid has been a difficult but necessary part of small-scale testing in many development programs. A thickened liquid dispenser was developed and tested. (e) Test technology and apparatus to measure the internal vapor hazard for externally contaminated vehicles has been developed and tested. (f) Since the advent of restrictions on open-air release of chemical agents, the selection and use of simulants for agents have become increasingly important. An explosive projector has been modified and a test program initiated to select a simulant for the explosive dissemination of mustard and thickened mustard. (g) The addition of thickeners to agents influences the evaporative properties of these liquid agents. A contract, has been let to study the evaporation of thickened liquid drops from a number of different surfaces (cloth, metal, etc.). 6. Technical evaluation of foreign chemical warfare potential: A mathematical model to simulate the dissemination of chemical agents from missile warheads using aerodynamic liquid breakup has been developed. Test firings of representative systems were used to validate the model. A number of developmental detectors and alarms were tested during these validation firings. The resulting model was used in an evaluation of intelligence information. 7. Chemical training agents and equipment investigations: (a) Training and doctrine command (TRADOC) conducted an indepth study of requirements for training in defense against chemical warfare agent attack. The study addresses the need for realistic dissemination devices, proper use of alarms, detectors, protection, and decontamination procedures. (b) The search continues for training agents to meet the criteria established. Meanwhile, persistent and nonpersistent simulant agents were selected to fulfill an urgent requirement to field a dispersing device for simulants in fiscal year 1978 although these simulant agents do not fully meet the criteria desired. Because toxicity information on DMMPA (dimethyl morpholinophosphonate) was incomplete, emphasis was placed on n-butyl mercaptan, trioctyl phosphate (TOF) and polyethylene glycol 200. (c) Major accomplishments include the testing and evaluation of an allied produced Simulant Projectile Airburst Liquid (SPAL), the analysis of improved groundburst and airburst disseminators, the analysis of potential training agents against performance requirements and the preparation of a toxicological data package and approval by The Surgeon General of the Army on the three interim simulant training agents for use in the Chemical Agent Training Equipment System (CATES). (d) The SPAL testing and evaluation will provide a capability for training with an airburst disseminator in FY78. The approval of the interim simulant training agents will permit use in CATES provided several use precautions are incorporated in the training scenarios. The analysis of potential training agents is of longer term, requiring purification, stabilization, and carcinogenicity studies prior to approval. 8. Chemical safety investigations: (a) The objectives of this applied research program are to devise analytical and sampling methods for toxic agents and their residues in soil, water, and in products from demilitarization operations; measure and evaluate ecological effects of Chemical Systems Laboratory operations; and minimize risks and hazards associated with chamber and laboratory testing of toxic agents. (b) Major accomplishments include the publication of an ecological survey of Carroll Island (formerly toxic agent test site) and the successful development of an automatic analysis system for GB. Evaluation of techniques for high volume sampling of air and the elution of agents from solid adsorbents are continuing, as are laboratory evaluations of an automated assay system.
2. Lethal chemical program	.221	1.576	
	1.604	.249	
(a) Agent investigations	(—.002)	(1.258)	Prior year deobligation resulted from withdrawal of residual funds upon completion of effort.
	(1.283)	(.023)	
			Exploratory Development effort: 1. Lethal chemical agent investigations: New chemical intermediates for the EA-5365 binary synthesis were evaluated and stability studies conducted on neat and stabilized samples as well as mixtures of proposed intermediates. A study was conducted on estimated costs to manufacture the EA-5365 intermediates in production quantities. Both insoluble and soluble polymers were assessed via laboratory and field dissemination tests with simulants. 2. Lethal chemical weapons technology: (a) Physical properties of several binary constituents for an intermediate volatility lethal agent were measured including viscosity, flash point, surface tension, and density. A storage stability study was initiated on the same chemicals which showed varying degrees of degradation after 7 months storage at 71¼ C. Several new compounds were preparod and evaluated as possible intermediate volatility agent binary constituents. Reaction temperatures and agent yields for various mixtures of intermediate volatility agent binary constituents were determined. Exploratory development support was provided for the XM-736 VX-2, 8-in projectile for investigation of binary VX reaction. Additives were investigated for reducing the reaction pressure and contents of gases from the binary VX reaction were analyzed revealing the presence of methane, ethylene, and ethane. The auto ignition temperatures of the chemical components of the binary VX system were also measured. Efforts were completed on evaluation of a thickener for binery VX to enhance the efficiency of agent dissemination. (b) A preliminary design of a binary chemical agent system was evolved that is applicable to both the 130 mm/8-in and 155 mm 8-in extended range projectiles. Designs were also prepared of a binary intermediate volatility agent system for the 155 mm projectile and dynamic firings conducted with simulants to evaluate the dissemination characteristics of the liquid payload. Concepts for low-level dissemination of liquid filled 155 mm projectiles were evaluated. Design concepts for application of the binary system to lightweight mobile systems were evolved and tests conducted to assess projectile ballistic dynamic stability for various quantities of liquid fills and mixing characteristics using the 81 mm mortar as a test vehicle. An analytical model and computer logic were developed to refine predictions of chemical agent casualties including the burden imposed by protective requirements.

DEPARTMENT OF THE ARMY ANNUAL REPORT ON CHEMICAL WARFARE AND BIOLOGICAL RESEARCH PROGRAMS
(OCT. 1, 1976, THROUGH SEPT. 30, 1977) RCS DD-D.R. & E. (SA) 1065—Continued

SEC. 1.—OBLIGATION REPORT ON CHEMICAL WARFARE PROGRAM FOR THE PERIOD OCT. 1, 1976, THROUGH SEPT. 30, 1977—Continued

DEPARTMENT OF THE ARMY, RCS DD-D.R. & E. (SA) 1065—Continued

OBLIGATION REPORT OF RESEARCH, DEVELOPMENT, TEST AND EVALUATION FUNDS FOR THE PERIOD OCT. 1, 1976, THROUGH SEPT. 30, 1977: REPORTING SERVICE: DEPARTMENT OF THE ARMY; DATE OF REPORT: SEPT. 30, 1977; RCS: DD-D.R. & E. (SA) 1065—Continued

Description of R.D.T. & E. effort	Funds obligated (millions of dollars) Prior year	In-house Current fiscal year	Contract	Explanation of obligation
				(c) 2 binary lethal agent rocket warhead concepts, one with dual canisters and the other utilizing a pressurized injector, were designed, fabricated, and dynamically evaluated—2 short-term contracts to further evaluate these concepts were let.
				3. Chemical agent process technology: The investigation of alternative syntheses for a VX binary process material was completed and a process was recommended for further development. Kilogram quantities of candidate IVA binary reactants, including EA-5615, EA-5636, and RA, were prepared for system evaluation. Preparation of other candidates continued at end of period. A study of process and equipment problems was made to assess large-scale system production costs, and provide a basis for direction of process scale-up investigations with respect to material recycles and waste disposal problems. Materials were purchased for scale-up process studies of the EA-4923 system but work was deferred due to priority realinement. Analytical support was provided for all operations noted above.
(b) Ageny pilot plant investigations.	(.000)	(.224)	(.224)	Advanced development effort:
	(.224)	(.000)	(.000)	Lethal chemical ageny processes:
				(a) Pilot scale NM runs (100-gal reactor) are being processed to secure material for the 8-in binary development program and to check out the parameters established on the small pilot scale runs. Incineration is currently being studied as a method of waste disposal for all aqueous waste products and intermediates. Ventilation pollution control methods are being studied during the filling operation of the NM canisters.
				(b) Inertia welder and filling equipment for the XM736 projectiles was used to fill and close DT II quantities of XM27 and XM28 canisters. XM736 projectiles were assembled and packed in support of the R. & D. program and DT II testing. Engineering support was furnished to the R.& D. program for fill, close, load, assemble and pack of XM736 projectiles with XM27 and XM28 canister components. The helium insertion and retention study for M20 and M21 canister components for 155mm M687 projectile was completed and final report published.
c. Tactical weapons systems.	(.164)	(.073)	(.073)	Advanced development effort:
	(.073)	(.164)	(.164)	Lethal chemical materiel:
				Development of a binary warhead concept for a rocket system was continued and a successful concept feasibility demonstration flight test was conducted. Design concepts for a follow-on prototype were initiated using the demonstrated technique. Shop drawings were prepared and materials purchased for a full scale dynamic simulant test. A system logistic contract was implemented whereby concepts were provided for handling, storage, packaging, and assembly of the binary rocket. Contractual effort was initiated to study problems of large scale fluid mechanics and for the design of a multiple submunition system.
	(.059)	(−.003)		Engineering development effort:
	(.000)	(.062)		Lethal chemical ground munitions:
				(a) Based on the successful results of development II (DT II) and operational test (OT II) of the XM687E1, GB2, 155mm projectile, the development acceptance in-process (DEVA IPR) was convened. Agreement was reached among the DEVA IPR participants that the projectile was satisfactory for U.S. Army use. Minutes of the DEVA IPR were approved resulting in type classification of the projectile as M687 and the technical data package was finalized to support any future decision for procurement of M687 projectiles.
				(b) A special review was conducted at which the XM736, VX-2, 8-inch projectile was authorized to proceed into the POT-G phase of development test II. Most of the required hardware has been completed and the firing tables and dissemination test phases have been initiated.
(d) Materiel tests in support of joint operational plans and/or service requirement.	(.000)	(.000)	(.000)	No effort expended in this area.
	(.000)	(.000)		
(e) Army materiel development tests.	(.000	(.024)	(.024)	Efforts were directed toward the testing of binary weapon systems. 5 specific test programs were in progress during this report period. Major emphasis was on the testing of the projectile, 8-in, XM736. Engineering design tests with the 8-in projectile were conducted in the area of functional reliability, metal parts integrity, fuze performance and simulant dissemination. 6 dissemination trials were conducted to obtain data on droplet spectra, liquid recovery estimates and area coverage for the simulant of choice. Engineering design testing is essentially completed. Planning for the DT II testing of the XM736 has been completed and testing has been initiated. 2 of 34 scheduled simulant dissemination trials have been conducted to date. 120 of a total of 900 projectiles have been fired to provide data which will be used to produce firing tables. Testing in the area of safety, storage, and transportation, reliability evaluation, adverse environments, chemical simulant dissemination, hazards, soldier evaluation and maintenance evaluation will continue. In addition to the 8-in projectile testing, Dugway conducted 2 dissemination trials with the projectile, 155mm, binary, IVA to determine droplet spectra for a nonvolatile reaction simulant and to obtain area coverage data. Test efforts with the 8-in projectile will continue in fiscal year 1978.
	(.024)	(.000)		
3. Incapacitating chemical program..	.000	.719		
	.831	.112		
(a) Agent investigations and weapon concepts	(.000)	(.599)		Exploratory development effort:
	(.711)	(.112)		
				1. Incapacitating chemical agent investigations:
				The objectives of this research investigation are to evolve incapacitating chemical agents, to study techniques for their dissemination and to establish the feasibility of munition devices for their delivery. Because of the restrictions in testing potential incapacitating agents in man, major emphasis was placed on a review of incapacitants previously tested in volunteers. This review was to select an improved chemical incapacitating agent that causes physical incapacitation through both respiratory and percutaneous routes of entry into body systems, and to develop specific methods for its dissemination so that incapacitating agent munitions can be developed to meet military requirements.
				Significant accomplishments included the preparation of 7 technical reports documenting efforts on a binary reaction for an incapacitating agent, agent sampling devices, and mass spectral studies of potential incapacitating agents. 2 classes of compounds of interest as potential incapacitants were identified and laboratory studies initiated to develop a technology base. Laboratory and field tests were conducted to provide input to the analysis.
				The system analysis study will have a major impact on future Army requirements for incapacitating agent systems. One approach to an improved incapacitant is the mixture of a volatile irritant with a glycolate compound. Initial toxicity screening tests with this mixture are in process using laboratory animals.
				2. Incapacitating chemical weapons technology:
				2 contracts, one dealing with submunition design technology and the other with munitions safety for pyromix munitions were prepared and are scheduled to be let by the end of fiscal year 1977.
				A systems analysis study was initiated to examine proposed incapacitating agent munitions systems offering percutaneous possibilities to help determine the feasibility of such systems.
				Field tests have been initiated to study 2 modes of dissemination of percutaneously effective incapacitating agent solutions explosive and aerodynamic stripping. In the explosive test program a field grid has been constructed, test devices have been fired, and droplet impact cards have been collected for instrumental analysis to determine droplet particle size distributions. Parameters being tested are munition shape, agent to burster ratio liquid viscosity, and length-to-diameter ratio. Significant shifts in particle size distributions as a function of liquid viscosity have been observed. Data is still being reduced. Aerodynamic stripping tests are in extremely early stages and consist of testing equipment designed to insure proper functioning of the test device.

	Prior year / Current fiscal year	In-house / Contract	
3. (b) (b) Agent pilot plant investigations.	(.000) / (.120)	(.120) / (.000)	Advanced development effort: Incapacitating chemical agent processes: (a) The 2 main waste streams produced in the preparation of the incapacitating agent EA-3834A, were simulated without agent contamination. The waste streams were investigated for the feasibility of intermediate recovery, recycling, and volume reduction before detoxification. Detoxification of the simulant waste streams were investigated by incineration and chemical neutralization. (b) A fill and close facility has been established for the 66 mm, XM-96, Rocket Warhead. Engineering support is being furnished for the fill and close of this item. Surplus equipment no longer needed in support of incapacitating program has been cleaned, decontaminated, and prepared for turn-in. Investigation into characteristics of microelectronic, intrinsically safe control systems for fill, close, load, assembly, and pack operations was initiated.
4. Defense equipment program	.438	11.789	
	15.585	4.234	
(a) Physical protection investigations.	(.206)	(3.384)	Exploratory development effort: 1. Chemical agent alarm technology: (a) Parallel studies continued on the ionization detector and enzyme alarm to satisfy the joint service operational requirement (JSOR) for an advanced chemical agent detector alarm (ACADA). The Ionization detector proved feasible as a nerve agent detector. A product improvement program that will save the Government $30,000,000 in 10 yrs was initiated to replace the M-43 sensor of the chemical agent alarm (CAA) with this system. Modifications to the enzyme alarm system have reduced interference responses and new approaches to enzyme immobilization appear to be successful. System analysis studies of the automatic liquid agent detector verified its capability to reduce casualties beyond that of presently planned systems. Field trials were conducted on an allied signaling cartridge as a possible candidate for chemical attack warning system (CAWTS). Action was initiated for the establishment of a development program for a warning cartridge. A nerve agent alarm capable of meeting the stringent Surgeon General requirement for demilitarization operations has been fielded. The effort was funded by the chemical demilitarization program, but is a technology transfer from point sampling studies. (b) The theoretical feasibility of the CO_2 Laser remote sensing technique for the detection of chemical agents was validated. The CO_2 laser system was modified for improved data processing and field measurements were initiated. A study was completed on spectral selection techniques for remote sensing alarms—4 techniques were appraised: inspection correlation, linear programing, and factor analysis. No individual technique was completely adequate, but each did contribute to some aspect of the problem. (c) Studies were concentrated upon obtaining a detector for VX munitions. A dry reagent system, bromophenol blue (BPB), on a lucite plug, gave excellent response and color change to trace vapors above VX liquid. Since BPB is a pH indicator, it is predicated that response is primarily due to low concentrations of amine vapors arising from the decomposition of VX. Glass fiber paper is affixed to a lucite plug which can be threaded into the openings of a shell or munition container. The color of the impregnated paper can be seen by shining a light into the end of the plug. Storage and sensitivity data indicate that BPB is stable for a reasonable length of time.
	(4.487)	(1.309)	2. Chemical detection and identification technology: (a) The accumulation of knowledge for improving chemical agent alarms and detectors is closely allied with information gathered from intelligence sources, friendly foreign countries and in-house research on toxicological compounds that are lethal or produce incapacitation. The objective is to evolve new chemical reactions, principles, and physical, chemical, or biochemical concepts as inputs leading to the development of chemical agent detectors and alarms. The items sought are kits with increased sensitivity and ease of manipulation with decreased logistical burden for the detection of chemical agents in air, in water, and on surfaces; individual detectors for the soldier operating in a contaminated environment; contamination surveillance devices to assess the hazards in traversing or occupying a location and field laboratories to provide rapid means of identifidation of toxic chemical agents. Major accomplishments included: An investigation of the feasibility of using an effervescent technique to evolve toxic agents from water and detect them as vapors, which showed promising results; and investigation of the physical principles to be used in detector kits and the identification of 2 promising approaches; and the initiation of a study of nonmutagenic dyes for detection of liquid chemical agents. Investigations on the differentiation of refractory from nonrefractory nerve agents were terminated after effecting coordination with TSG and TRADOC. Exploratory development efforts reached the point where advanced development will be initiated during fiscal year 1978 on an automatic liquid agent detector, chemical attack warning system, and a detector kit for chemical agents in water. (b) An eel enzyme system has proven to be significantly more sensitive than horse serum enzyme for the detection of nerve agents. It was demonstrated to be stable in storage and a search for a suitable substrate is under way. Exploratory studies have shown that the effervescent displacement of chemical agents from water and subsequent detection as a vapor to be a sensitive approach which will be considered for use in the water kit. A problem has been identified in the engineering development program concerning the XM9 paper, chemical agent detector. It was found that B-1 dye, the active indicator, was mutagenic. The exploratory development program was realigned to investigate other dyes which could be used in the detector paper which are nonmutagenic. 3. Chemical decontamination investigations: (a) Chemical decontamination concepts: In the continued search for removal and destruction of toxic agents on vehicles, equipment and material, utilizing available materials in the field such as water, oxygen of the air and/or moisture, a long chain nitrogen alkyl pyridinium aldoxime was synthesized. This micelle was able to destroy paroxime (a model for hydrolytically resistant organo phosphorus agents) with a half-life of less than 2 minutes at pH 9.3. Extrapolation of this data to VX projects a half-life of VX in this decontaminating solution of approximately 6 minutes at the same pH. This oxime shows promise as a noncorrosive, fast acting, water soluble decontaminant for all organophosphorus esters (including insecticides). (b) Chemical decontamination applications: A study was completed on materials and means for field expedient contamination avoidance and decontamination. The study showed that certain nonporous materials when properly draped over military equipment can eliminate or considerably reduce contamination from liquid chemical warfare agents. The study also showed that certain fuels and solvents available in the field are moderately effective for decontamination of materiel when used with proper procedures. A detailed report for field use by the armed services is being prepared. A contractual effort to develop design criteria to minimize contamination/maximize ease and speed of decontamination on future tactical equipment has concentrated on formulating design guidelines and compatibility information which will be published in a handbook in 1st quarter, fiscal year 1978. The format allows for easy updating as the data gaps identified in this study become closed. An agent impermeable urethane paint in eleven camouflage colors was developed and tested. This particular paint was developed for brush as well as spray application and appears to be within required health and safety limits. MERADCOM is staffing the formal specifications for this paint. Contract negotiations were begun on an effort to fabricate a concept model of a decontamination apparatus based upon jet/turbine engine exhaust. Contract proposals were reviewed, and the contract will be let in the 1st quarter of fiscal

DEPARTMENT OF THE ARMY ANNUAL REPORT ON CHEMICAL WARFARE AND BIOLOGICAL RESEARCH PROGRAMS (OCT. 1, 1976, THROUGH SEPT. 30, 1977) RCS DD-D.R. & E. (SA) 1065—Continued

SEC. 1.—OBLIGATION REPORT ON CHEMICAL WARFARE PROGRAM FOR THE PERIOD OCT. 1, 1976, THROUGH SEPT. 30, 1977—Continued

DEPARTMENT OF THE ARMY, RCS DD-D.R. & E. (SA) 1065—Continued

OBLIGATION REPORT OF RESEARCH, DEVELOPMENT, TEST AND EVALUATION FUNDS FOR THE PERIOD OCT. 1, 1976, THROUGH SEPT. 30, 1977: REPORTING SERVICE: DEPARTMENT OF THE ARMY; DATE OF REPORT: SEPT. 30, 1977; RCS: DD-DR & E. (SA) 1065—Continued

Description of R.D.T. & E. effort	Funds obligated (millions of dollars) Prior year: Current fiscal year	Funds obligated (millions of dollars) In-house: Contract	Explanation of obligation
			year 1978. A report is being prepared on the effects of resin modifications, thermal curing and natura l accelerated weathering of alkyd paints. An automated gas chromatograph, interfaced with a mini-computer system, has been made operational for material compatibility testing with agents and decontaminants in support of triservice requirements. A 2-phase contractual effort is providing a data base for a product improvement program for the standard skin decontamination kit. The improvements include greater ease of use, more rapid use and a multiuse capability. A literature survey was made preparatory to development of a minimally corrosive aqueous decontaminant. The survey revealed no previously unknown decontaminant. An emulsion developed by an allied country was laboratory tested as a part of this effort. Tests showed that the emulsion has an excellent ability to wet surfaces which produces superior cleaning action. However, scrubbing and wiping of contaminated surfaces for physical removal of the contaminating agents appear to be the most important factors irrespective of the water based decontaminant used. A design study was initiated on a decontamination apparatus utilizing vehicular exhaust for power and heat. The design includes a variable frequency pulsation attachment.
			4. Physical protection against chemical agents:
			(a) This technology is to provide for new and improved concepts, methods, and materials for individual respiratory and body protection against all potential threat agents. Laboratory studies on sorbent materials resulted in an improved capability to estimate the residual gas life of charcoal filters in masks and collective protective equipment.
			(b) Emphasis was directed toward the development of nondestructive methods of measuring the protective capacity of charcoal filters. The feasibility of using pilot canisters/tubes in parallel with larger carbon filters to estimate the residual gas life of the larger filters has been demonstrated through experimental testing. The feasibility of an alternate technique, using air sampling probes located in the carbon filter, has also been demonstrated experimentally under a contractual effort. Other techniques, such as, conversion of carbon monoxide (CO) to carbon dioxide (CO_2) and electrical/electronic methods, are being studied for future application as residual life indicators. The techniques which offer the greatest potential for an immediate solution for residual gas life indication are the pilot canister and the probe-in-bed approaches. A prototype pilot canister/tube assembly is currently being fabricated. In addition to testing of the assembly and the pilot tubes themselves, application of the prototype to larger filter units will be accomplished. Application of the probe-in-bed technique to large filters has also been initiated. Testing is in progress to determine the optimum filter location for insertion of the sampling probe. A sampling probe has been designed and fabricated for application to modular collective protection equipment (MCPE) gas filters. Testing to verify the design will be accomplished through in-house experimental effort.
			(c) 2 materials research contracts were in effect during fiscal year 1977, 1 of which was concluded late in fiscal year 1977. The contract calling for a survey of commercially available materials was satisfactorily concluded in September 1977. 2 basic materials were reported which were potentially suitable for the flexible lens area of a protective mask. A contract modification is planned for fiscal year 1978 to develop a 2-piece prototype mask utilizing a flexible lens coupled with a standard rubber faceblank. Other materials will be investigated for potential use as a lens material. A contract modification was made to study the feasibility of using a fluorinated ethylene propylene elastomer as a faceblank material. Progress has been satisfactory and the laboratory samples appear adequate however, more work remains before the material can be produced in sufficiently large quantities for molding studies.
			(d) Cooperative effort has been maintained with U.S. Army Natick Research and Development Command (NARADCOM) on the preparation of an all services chemical protective clothing plan. The 1st draft of this plan which includes the requirements of all services has been issued in draft form for review by the Army, Air Force, Navy, and Marine Corp representatives. A contract was awarded to Southern Research Institute on the development microencapsulated chemical reactants which can be attached to fabric and will neutralize liquid and vapor chemical agents which impinge upon the clothing. Tests were conducted to evaluate the protective efficacy of components of the USAF aircrew protective ensemble. Studies were continued on the conduct of end point tests of the protective efficacy of the suits, chemical protective (overgarments) both before and after wear against the effects of neat and thickened chemical agent. The results of these tests, it is anticipated, will be used to modify the logistic doctrine for wear and replacement of the overgarment.
4. (b) Advanced development defensive systems.	(.102)	(2.724)	Advanced development effort:
	(5.181)	(2.559)	1. Remote sensing alarm: Efforts during the past 2 yr have been limited to intermittent preparation for, and conduct of comparative testing of passive long path infrared (LOPAIR) and FLIR (forward looking infrared). The comparative testing is scheduled for 1st quarter fiscal year 1978 at Dugway Proving Ground.
			2. New protective mask: The new protective mask completed the advanced development phase and entered engineering development (ED) Sept. 19, 1977. Extensive laboratory and field testing comprising DT I have been performed. The Human Engineering Laboratory conducted a 6-week exercise of infantry equipment compatibility, maneuver and individual weapon performance. The conclusion of the test was that the new protective mask is superior when compared to the M17A1 mask. The Aeromedical Research Laboratory, Fort Rucker, performed a visual and optical analysis of the new protective mask versus the M24 aircrew mask. The information derived is being utilized to optimize the lens area design. Frankford Arsenal and Night Vision Laboratory have performed an optical coupling assessment with fire control and night vision devices. Extensive testing has been conducted to determine agent penetration resistance capability and material compatibility with field contaminants. Spectacle development has continued with the objective of providing a combat spectacle which can be utilized with the mask. An intensive effort is being pursued to improve the coatings at the environmental extremes (−25¼° to 125½°F.) with respect to crazing and softening, respectively. Contractual efforts have continued with emphasis being placed in the areas of quality assurance, manufacturing and maintenance engineering. The approval of the memorandum of understanding with Canada for canisters is still pending. Similarly, the joint service operational requirement for multiservice application is still pending.
(c) Collective Protection Systems.	(.000)	(0.55)	
	(0.70)	(0.15)	Engineering development effort:
			Modular collective protective equipment (MCPE): Modular collective protection equipment (MCPE) consisting of filter units, gas-particulate, XM56, XM59 (400 cfm) and XM62 (600 cfm) together with the entrance, protective, XM10 satisfactorily completed basic DT II/OT II. M56 filter unit and M10 protective entrance were type classified for TACFIRE use in March 1976. Compatibility tests of MCPE (collective protection equipment, CB, AN/TSQ-73, 200 cfm, XM17) servicing the AN-TSQ-73 were conducted in June 1977. Based on satisfactory performance, type classification will be sought in 1st quarter, fiscal year 1978. Work continues on the application of MCPE to the Patriot (SAM-D) system.
(d) Warning and detection equipment.	(.010)	(.864)	
	(.883)	(.029)	Engineering development effort:
			1. Chemical Agent Detector Kit, XM256: Phase II operational and developmental tests of the chemical agent detector kit, (XM256) were conducted and completed satisfactorily. The technical data package was updated to include recommendations resulting from the phase II tests. The development engineering verification acceptance review was held and the item was type classified standard. The simulant chemical agent identification and training set M72A2 was also type classified for use with the XM256 kit.

			2. Paper Chemical agent detector, XM9: The B-1 dye, used in the chemical agent detector paper (XM9), was found to be mutagenic by the Ames Assay. A special review was held and it was agreed to continue the development, using OSHA standards, pending medical approval of procedures for phase II development and operational testing. A contract was prepared for bioassay of the dye to determine the extent of mutagenicity/carcinogenicity per the recommendations of the Office of the Surgeon General of the Army. Engineering design tests were completed. An interference problem (false positive) was found with the lubricant, small arms (LSA) and it was proposed to mask the color by inclusion of a blue dye in the LSA. Frankford Arsenal tested 3 dyes submitted by Chemical Systems Laboratory and found that they did not change the lubricant properties of LSA.
(e) Medical defense against chemical agents.	(.120)	(4.442)	Exploratory development effort:
	(4.644)	(.322)	1. Compared two techniques for measuring leaks in protective respiratory equipment mounted on head forms (biological tracer and sodium chloride aerosol).
			2. Published research on respiratory and percutaneous absorption of the nerve agent VX.
			3. Submitted investigative drug applications (IND) for TAB (antidote for nerve agent) to Food and Drug Administration. Approval for testing was granted.
			4. Determined that pyridostigmine has considerable promise for prophylaxis and began preparation of IND.
			5. Curtailed immunoprophylaxis research because methods did not increase protection against candidate nerve agents.
			6. Began animal studies of incapacitating effects of nerve agents at sublethal doses and various therapies and prophylactic regimens.
			7. Initiated screening of new drugs for potential prophylaxis and treatment.
			8. Continued research on mustard (HD) at the molecular and cellular level.
			9. Developed a pathogenetic model for HD-induced skin damage, consisting of amplification of a DNA lesion which progresses to inflammation and vesication.
			10. Negotiated a contract with Johns Hopkins University to study the therapeutic efficacy of specific enzyme inhibitors in HD-induced skin damage.
			11. Investigated the effects of physostigmine on state-dependent learing in trained rats. Dosage of 0.3 and 0.6 mg/kg revealed no adverse effects on the simple acquisition or performance tasks but influenced later performance in their normal state.
			12. Demonstrated the dominant role of physical removal in decontamination of thickened agents. A solution containing acetone was more effective than present decontaminant and other alcohol solutions.
			13. Obtained best results with prophylactic applications of polyglycols, which produced a five-fold increase in the decontamination protection factor.
			14. Suggested use of surgical stockinet mitt for cleansing, instead of gauze squares.
			15. Designed heat sealed packages for improved access to decontaminant materials.
			16. Reduced eye effects of present skin decontaminant by eliminating ammonia and sodium hydroxide.
			17. Improved protection against nerve agent VX with new skin protection films containing liquid fluorochemicals or etylacrylate. Another ointment offered considerable protection against the nerve agent GB.
(f) Materiel tests in support of joint operational plan.	(.000)	(.010)	Efforts were directed toward the field testing of the following:
	(.010)	(.000)	1. Decontamination field expedient: This test was designed to determine: (1) the effectiveness of field expedient decontaminants in removing thickened agents from unpainted metal, canvas, and painted surfaces and (2) the degree of protection provided when vehicles, subjected to thickened simulant agent attack, are covered with materials available in the field. 120 laboratory trials and 8 field trials were conducted. Data analysis has been completed Report is scheduled for completion fiscal yaar 1978.
			2. LOPAIR/FLIR comparison test: This test is designed to obtain data on the relative capabilities of a LOPAIR system and a FLIR system equipped with spectral filters, to detect and to discriminate between simultant chemical agent clouds, various interferences, and clouds containing mixtures of simulant and interferring materials. Planning and coordination has been completed. Testing is scheduled for 1st quarter, fiscal year 1978.
			3. Decontamination capabilities of chemical units and teams (DECAP CHUTE): This test was designed to study the capabilities of U.S. forces to decontaminate equipment which had been subjected to a thickened chemical agent attack, to determine any measures which might be adopted to improve these capabilities, and to determine the relative effectiveness of standard decontamination procedures on specific agent simulants and to establish a standard baseline time required for effective decontamination of standard Army equipment. For this period, the final report was revised based on comments received from the test sponsor and published.
(g) Army materiel development tests.	(.000)	(.310)	Tests were conducted on the U.S. Army's defensive equipment and in the long-term environmental storage and surveillance testing. Test efforts were as follows:
	(.310)	(.000)	1. Chemical agent detector kit, XM256: This test effort is designed to perform a DT II test and to determine: (1) the technical performance; (2) safety of the items; (3) its maintenance test support package; (4) demonstrate whether engineering is reasonably complete; and (5) effects of extreme climatic environments. Testing in the area of safety, reliability, maintenance evaluation, sequential rough handling, adverse environments, interference, sensitivity, transportability and human factors evaluation has been completed. A report covering that aspect of the test effort has been published. Testing in the extreme climatic environments is continuing.
			2. XM9 chemical agent detector paper: This test is designed to determine if the XM9 meets the design requirements, performance standards, and technical characteristics of the SDR, effects of extreme climatic environments on the item, and whether engineering is reasonably complete. For this period, testing is in progress. Test will be completed in fiscal year 1978.
			3. Battery computer system: Test is designed to determine if system components can be successfully decontaminated after CB contamination without damage to the system. All planning has been completed. Testing is scheduled for fiscal year 1978.
			4. Digital message device (DMD): This test is designed to determine if system components can be decontaminated without damage to the system. Test has been completed and a report published.
			5. DT II of common thermal night sight (CTNS): Test is designed to determine if system components can be successfully decontaminated without damage to the system. For the period, the contamination/decontamination test was completed and a report published.
			6. DT II of Patriot air defense system: This test is designed to determine if system components can be successfully decontaminated, if subjected to a chemical attack, without damage to the system. During this period, planning was initiated. Test is scheduled for fiscal year 1980.
			7. Stinger guided missile system: This test was designed to determine if the Stinger system and storage case can be successfully decontaminated with standard decontaminants without deterioration of components or degradation of performance. Testing was completed and a final report published.
			8. M51 CB shelter system: This test is designed to evaluate the performance of the M51 collective protection shelter system to determine if the corrective actions taken relative to deficiencies and shortcomings reported in the DT III testing are satisfactory. During this period, test monitoring at the contractor's plant and Chemical Systems Laboratory was accomplished. Report was published.
			9. Power supply—Chemical agent alarm: This test is designed to evaluate the performance characteristics of the modified power supply for use with a chemical agent alarm. During this period, test monitoring at the contractor's plant and Chemical Systems Laboratory was accomplished. Report is scheduled for com letion in fiscal year 1978.
			10. Environmental surveillance: The long-term environmental storage and surveillance program had a total of 5 items undergoing some phase of testing at 1 or more of the test sites. Items consisted of masks, chemical detectors, and chemical alarm units.

5. Simulant test support	.190	.994	
	.804	.000	
(a) Materiel tests in support of joint operations plans and/or service requirements.	(.190)	(.994)	Efforts were directed toward the planning, conducting, and/or reporting of the following joint operational tests and operations research studies:
	(.804)	(.000)	

1. Thickened agent survey: This study reviewed past and current U.S. and foreign data on thickened chemical agents. Study was completed and was published in fiscal year 1977.
2. Thickened agent investigation: This test is designed to obtain data on the dissemination characteristics of bursting munitions filled with thickened simulant and to estimate dose-casualty relationships for such munitions. 18 field trials using thickened simulants were conducted. Analysis of data is in progress. Report is scheduled for completion in fiscal year 1978.
3. Agent transfer factors: This test is designed to provide data on the transfer factor and pickup associated with the field employment of vehicles and equipment when exposed to thickened agent munitions. Laboratory testing for obtaining transfer function and evaporation rates for selected simulants has been completed. The selection of 2 appropriate simulants for field use has been made. Field test portion of this project is scheduled for fiscal year 1978.
4. Simulant review and selection: This effort is a combination study and laboratory test and is designed to determine from laboratory/chamber experiments the physical/chemical properties most important in simulating thickened agents and to develop a spectrum of chemical agent simulants for use in the field. A complete literature review is being conducted and agent and simulant tables of physical and chemical description properties are being prepared. Compounds for evaluation for decontamination and dissemination testing have been selected and are being evaluated in the laboratory for thickening, vapor pressure, persistence, and reactivity with decontamination materials This study/test is a continuing effort. An interim report covering the fiscal year 1977 work has been published.
5. Effects of chemical attack on tactical staging operations: This effort is a combination study and test and is designed to determine the effects of an attack with chemical agents in tactical staging areas and to provide a data base for an appraisal of the effects of such an attack in tactical operations. The study will analyze, evaluate, and correlate the data from past pertinent studies and tests. The study will identify and validate knowledge gaps wherein the test phase can be designed. During this period, the literature review has been initiated. Study is scheduled for completion in fiscal year 1978.
6. Safety evaluation of the Air Force TMU-28/B spray tank: This test was designed to determine the operational hazards associated with the TMU-28/B spray tank when inadvertently released during takeoff or landing and if damaged from hostile fire—36 trials were conducted. Analysis of data is in progress. Report is scheduled for completion in fiscal year 1978.
7. Decontaminant requirement: This study determined the amounts of standard decontaminants required to decontaminate an Army unit which has been contaminated with persistent chemical agents. Study was completed and published.
8. Protection provided by wet weather gear: This study evaluated the protection afforded by standard Army wet weather gear against chemical agents. A literature review was completed. Laboratory testing was analyzed. A report was completed and published.
9. Vulnerability of the Marine landing vehicle (LVTP-7): This test will determine the vulnerability of the LVTP-7 vehicle when subjected to massive chemical attack. During this period, a test plan has been prepared and was conducted. Testing is scheduled for fiscal year 1978.
10. Capabilities of collective protection: This study will evaluate the CB collective protection facilities for both mobile and permanent structures. During this period, a literature review of past testing associated with collective protection units was in progress. Study is scheduled for completion in fiscal year 1978.

OBLIGATION REPORT OF PROCUREMENT FUNDS FOR THE PERIOD OCT. 1, 1976, THROUGH SEPT. 30, 1977, REPORTING SERVICE: DEPARTMENT OF THE ARMY; DATE OF REPORT: SEPT. 30 1977; RCS DD-D.R. & E. (SA) 1065

Chemical warfare program	10.392	7.414	During the fiscal year 1977, the Department of the Army obligated $31,056,000 for procurement activities associated with chemical warfare agents, weapons systems, defensive equipment, and production base projects. Program areas of effort
	20.664	23.642	concerned with these obligations were as follows:

Lethal chemical program:
- Materiel procurement 0
- Production base projects $10,000
- Total lethal chemical 10,000

Incapacitating chemical program:
- Materiel procurement 0
- Production base projects 0
- Total incapacitating chemical 0

Defensive equipment program:
- Materiel procurement 30,328,000
- Production base projects 719,000
- Total defensive equipment 31,056,000

1. Lethal chemical progarm	.010	.010	
	.000	.000	
(a) Item procurements	(.000)	(.000)	No obligations were incurred for procurement of lethal chemical and items.
	(.000)	(.000)	
(b) Production base projects: Omnibus engineering and design to support 155 mm binary M687.	(.010)	(.010)	Obligations incurred for engineering and design to support 155 mm binary M687 projectile.
	(.000)	(.000)	
2. Incapacitating chemical program.	.000	.000	
	.000	.000	
(a) Item procurements	(.000)	(.000)	No obligations were incurred for procurement of incapacitiatng chemical items.
	(.000)	(.000)	
(b) Production base projects	(.000)	(.000)	No obligations were incurred for production base projects in support of incapacitating chemical programs.

SEC. 2.—OBLIGATION REPORT ON BIOLOGICAL RESEARCH PROGRAM FOR THE PERIOD SEPT. 30, 1976, THROUGH SEPT. 30, 1977,
DEPARTMENT OF THE ARMY, RCS: DD-D.R. & E. (SA) 1065

OBLIGATION REPORT OF RESEARCH, DEVELOPMENT, TEST AND EVALUATION FUNDS FOR THE PERIOD OCT. 1, 1976, THROUGH SEPT. 30, 1977: REPORTING SERVICE: DEPARTMENT OF THE ARMY; DATE OF REPORT: SEPT. 30, 1977; RCS: DD-D.R. & E. (SA) 1065

Description of R.D.T. & E. effort	Funds obligated (millions of dollars)		Explanation of obligation
	Prior year	In-house	
	Current fiscal year	Contract	
Biological research program	1.608	10.159	During the fiscal year 1977, the Department of the Army obligated $15,913,000 for general biological research investigation and the development and test of physical and medical defensive systems. Program areas of effort were as follows.
	14.305	5.754	Biological research:
			Basic research (total biological research) $370,000
			Defensive systems:
			Exploratory systems 10,050,000
			Advanced development 253,000
			Engineering development 5,240,000
			Testing 0
			Total defensive systems 15,543,000
			Simulant test support 0
1. Biological research	.000	.233	
	.370	.137	
(a) Basic research	(.000)	(.233)	Basic research in support of biological defense materiel: This basic research includes studies on remote detection of biological aerosols, biocategorization by chemiluminescence, detection of residual bacteria and virus (all-clear kits), time/intensity chemiluminescence, mass spectrometry (MS) analysis of nucleic acids and disinfection of biological aerosols.
	(.370)	(.137)	In remote detection work, laser-fluorescence from pathogen aerosols was studied for potential as a remote detection concept in a contract with Illinois Institute of Technology. In biocategorization of chemiluminescence bacteria, tissue cells, and pollen were differentiated by this approach. In time/intensity chemiluminescence study, reaction curves were analyzed as a basis for programing computer recognition of biological responses by the XM-19 biological agent alarm. In the mass spectrometry analysis work, it was found that this method did not meet the objectives for sensitivity, rapidity and adaptability for field samples. Further work on this concept has been dropped. In the work on disinfection of biological aerosols, 2 alternatives to lactic acid were discovered.

Description of R.D.T. & E. effort	Funds obligated (millions of dollars) Prior year: Current fiscal year	Funds obligated (millions of dollars) In-house: Contract	Explanation of obligation
2. Defensive equipment program	1.608	9.926	
	13.935	5.617	
(a) Physical defense against biological agents	(.015)	(.754)	Exploratory development effort: Physical defense against biological attack: Evaluations of lactic acid and hypochlorite as aerosol decontaminants proceeded into final phases of testing in chambers in-house and by contract, and plans were finalized for a field test. Screening of commercially available chemicals as replacements for betapropriolactone and formaldehyde continued in the search for decontaminants having more desirable properties as cited in STOG; two of over 20 chemicals screened showed promise as sporacides and will be treated further. The new mask test facility entered the design phase, and the protocol for using volunteers for testing mask leakage completed review, preparatory to Surgeon General review and approval. The fluorescence yields from 5 biological materials tested and the low background fluorescense levels from the atmosphere as measured in contract studies continues to show promise for this LIDAR (laser induced detection and ranging) approach. A new contract was negotiated to explore signal enhancement techniques to optimize LIDAR signal to noise ratios to further upgrade the potential of the approach. Direct chemiluminescence without tape-wash fractionation of the sample and PACT (pattern recognition of stained particles) both showed good probability of success as candidate systems in ambient background tests. Work is proceeding to refine the instrumentation and to measure the sensitivity to aerosolized biological materials. Progress was made in improving the sensitivity and response times of the resazurin reaction for small numbers of bacteria. Viral detection remains an imposing problem; enzyme specific detection of tissue cell material accompanying the virus is being investigated as a likely approach to this objective. Differentiation among groups of biological materials by the time/rate chemiluminescence technique progressed through exploratory development and is being applied in the XM-19 engineering development program. Work continued on the upgrading and evaluation of aerosol assessment techniques. Effort was begun on the development of a method for field calibration of the XM-19 biological alarm with biological simulant aerosols.
	(1.102)	(.363)	
(b) Biological defense materiel concepts.	(.000)	(.000)	No effort expended in this area.
	(.000)	(.000)	
(c) Biological defense materiel.	(1.593)	(2.310)	Engineering development effort: Biological detection and warning system: The multiyear prime contract program for the biological detection and warning system (BDWS) XM-19 detector and XM-2 sampler was started. Conceptual designs were prepared and full mockups fabricated. The configurations emphasize ease of operation and maintenance at the organizational level and a high degree of commonality of major components and subassemblies. A novel wet collector design for use in the XM-2 was developed in-house and experimentally tested. Its performance led to a major redesign of the XM-2 and resulted in lowered unit costs, increased projected reliability and reduced logistics burden. Conceptual models of the XM-19 and XM-2 are currently being fabricated and will be utilized in the execution of engineering design testing. Contract and in-house efforts continued in techniques and methodologies offering improvements for sample concentration and aerosol testing of the system.
	(3.612)	(2.895)	
(d) Medical defense against.	(.000)	(6.685)	The experimental programs of the US Army Medical Research Institute of Infectious Diseases (USAMRIID) are targeted toward: (a) Medical defense against biological warfare (BW); (b) infectious illnesses which pose special problems to our military forces; and (c) the safe study of infectious, highly dangerous microorganisms in the unique and special containment facilities of USAMRIID. During the past year, the research programs of USAMRIID have been revised with work priorities reordered and assigned to some of the most virulent and pathogenic microorganisms known. Agreements were reached with the Center for Disease Control (CDC) for USAMRIID to initiate studies with Lassa fever virus, Ebola virus, Congo/Crimean hemorrhagic fever viruses, and Legionnaire's disease organism. Moreover, studies are now underway on botulism toxins and investigations will be initiates shortly with the toxins of anthrax. Work will continue on Machupo virus, the etiologic agent of Bolivian hemorrhagic fever, as well as Korean hemorrhagic fever and Dengue 1 virus. These organisms or toxins all possess significant BW potential, are lethal for man and present enormous safety problems. Fortunately, USAMRIID is 1 of the few laboratories in the free world where such agents can be studied with minimum risk to the investigator and no risk to the surrounding environment. The goal of this research is to develop safe and effective vaccines or toxoids for these highly dangerous but poorly understood diseases. Work in pathogenesis and immunogenesis will support these vaccine development studies. 2d order priorities include studies on Japanese B encephalitis, Argentine hemorrhagic fever, Rift Valley fever, Chikungunya, and Venezuelan equine encephalitis (VEE). Toxin studies will continue with staphylococcal enterotoxins A, B, and C and Pseudomonas exotoxins A and S. Ricksettsial studies will continue in exogenous tick-borne spotted fevers, epidemic typhus fever and Q fever. The organisms or toxins in his priority are also highly infectious for man, possess significant BW potential and pose special problems of safety; however, at the lower order of magnitude. 3d order priorities include studies on western equine encephalitis, eastern equine encephalitis, meliodosis and tularemia. Of special significance during fiscal year 1977 was the reactivation of a dynamic program with medical research volunteer subjects. USAMRIID lost this resource several years ago with the termination of the draft and Project Whitecoat. The new program, as of Sept. 1, 1977, was comprised of 94 volunteers. Thus, the Institute has regained its unique capability to test experimental vaccines first in small laboratory animals, in larger laboratory animals, in primates, and finally in man, provided the vaccine is determined to be safe and effective at each stage of study. Specific statement of progress are illustrated by but not limited to the following examples: Preliminary development studies are underway to develop a killed Bolivian hemorrhagic fever vaccine. A crude vaccine was prepared from the Malale strain grown in BHK-21 cells, and although this type of product could never be used in man, the validity of the experimental approach was demonstrated. The formalin-killed vaccine was antigenic and protected monkeys from challenge. Future work will center upon the laboratory preparation of a killed vaccine that can be certified as being acceptable for use in man. Chemical and structural characterization of Machupo virus, the etiologic agent of Bolivian hemorrhagic fever, has made significant progress which should facilitate vaccine development. One of the most interesting observations has concerned the great plasticity of this virus and has led go studies comparing the virulent and avirulent members of this group of arenavirus. Biochemical analyses of human pathogenic Machupo and nonpathogenic Pichinde and Tacaribe arenaviruses have revealed anticipated simularities and interesting differences. The 3 viruses exhibited common polypeptides of 70,000, 45,000, and 12,000 daltons, but the patterns of glycosylation differed for each. Glycosylated polypeptides are of major interest because they normally exist near the virion surface and are significant in specifying serologic differences between virus types. The research also showed that an internal 70,000 dalton-structural-protein was common to all 3 virus types and was relatively rich in the amino acid lysine. This reflects that particular protein associated with the ribonucleic acid or genome of the virus. Antibody produced in rabbits to this protein was broadly negative with the 3 viruses by complement fixation. Earlier work had shown the protein to be associated with the ribosomes which are contained in the virus. Thus, there is strong evidence that the 70,000 dalton polypeptide is the nucleocapsid. In addition to the structural proteins of these viruses, evidence is available for the presence of surface glycolipids on the 3 arenaviruses. The glycolipid is almost certainly derived from the host cell in which the virus is grown, and it is well known that antibody raised against cells of a particular species of mammal will possess significant neutralizing activity against arenaviruses grown in that species. Nevertheless, the data shows that glycolipids comprise the major biological role in pathogenesis and immunity. The possibilities are currently being examined. Early development in-house studies are underway to develop an attenuated dengue-1 vaccine. Current studies are designed to select attenuated coloinies of virus grown in cell lines which meet the substrate requirements established by the Bureau of Biologics. Substrains of dengue-1 virus have been isolate which show promise as potential seed stocks for an attenuated vaccine. it is projected that this vaccine will not be ready for attempts at industrial-scale development until fiscal year 1979. USAMRIID's efforts are coordinated with other USAMRDC-sponsored efforts to develop a quadrivalent vaccine to protect against all four serotypes of dengue virus. It was recently discovered that 2 species of monkeys, squirrel and cynomolgus, showed serologic evidence of Korean hemorrhagic fever (KHF) infection when inoculated either intramuscularly or intratracheally with flourescent antibody technique (FAT)-positive Apodemus lung materal provided by Dr. Ho Wang Lee of Korea. 1 cynomolgus and 3 squirrel monkeys became infected. This is an important finding because it is the first time within the United States that any laboratory animal has been infected with an agent that could be etiologic for KHF. Previous transmission of the suspected viral agent has been limited to the natural host rodent reservoir, Apodemus agrariae corea. At the present time, this animal has not been colonized in the laboratory and is available only in Korea. The successful reproduction in this laboratory of the indirect FAT developed by Dr. Lee, and the successful infection of the monkeys not only confirms Dr. Lee's findings but provides the tools necessary to study this militarily important disease at USAMRIID.

Description of R.D.T. & E. effort	Funds obligated (millions of dollars)			Explanation of obligation
	Current fiscal year	Prior year	In-house Contract	
				A critical need arose to develop an effective killed VEE vaccine. One potential danger of the live attenuated TC-83 vaccine was that vaccinated people or horses might become infectious for mosquitoes, which in turn might propagate and transmit VEE virus and establish a new transmission cycle of varients with renewed virulence in geographic areas otherwise free of the disease. Another consideration was the high reactogenicity of the widely used attenuated TC-83 vaccine; moreover, the attenuated live TC-83 vaccine posed an unquantitated threat to pregnant women and other special groups, such as children and the elderly. Studies were initiated to develop a formalin-killed VEE vaccine from the TC-83 attentuated strain of virus. Since a solid base of information was already available for this virus, in-house development costs have been small. Production lots of vaccine have been prepared under contract with Merrell-National Laboratories. Preliminary tests in 18 volunteers demonstrate the killed vaccine to be highly antigenic and safe—14 additional volunteers were inoculated in June 1977 with similar results. This new vaccine will be used to replace the use of TC-83 live attenuated vaccine in laboratory workers, and to provide booster doses in workers previously immunized with live TC-83 vaccine whose residual serological titers are considered inadequate. The new killed vaccine may prove safe enough for use in children, pregnant females and in other unique situations where the live vaccine is contraindicated. Strains of Rickettsia conorii of worldwide distribution have been received and are now being passaged in eggs for initial seed preparation. Studies on biologic markers are also under investigation. Moreover, approval has been granted for initiation of studies leading to the production of a purified, inactivated Rickettsia prowazeki vaccine. While it is still unknown why intravenous injection of staphylococcal enterotoxin B (SEB) (50 ug/kg) kills monkeys and rabbits within hours, present observations support thpe option that development of pulmonary edema is a significant factor. This is based on the finding that water accumulates in the lungs prior to SEB-induced death. Since pulmonary edema is treatable with continuous positive-pressure breathing (CPPB), and has been used effectively for both adults and children in the clinical setting, this approach was pursued. Using the same principle, CPPB (3-4 cm H_2O) was applied to conscious, SEB-inoculated (50-100 ug/kg) monkeys or rabbits. Of major importance is the fact that some of these animals have survived indefinitely. The present technique for applying CPPB is still primitive as applied to this particular experimental procedure and investigations are being conducted to improve the system. Medical research on respiratory infections is significant from the standpoint of both medical defense against biological warfare (BW) and the general health care of military personnel. Respiratory model infections for investigating pathogenesis and physiological alterations seen in the host, and for developing approaches to prophylaxis and therapy, are essential tools of this research. Ideally, these model systems must embrace a broad range of laboratory animals in order that research findings can be extended with confidence to man. Within this frame of reference, Klebsiella pneumonia in the mouse was employed as a model for a bacterial respiratory infection and recently a major breakthrough was made. The host range of K. pneumonia was extended to include rats and subhuman primates, including both squirrel and cynomolgus monkeys. A key factor was the discovery that clinical and generally fatal infections could be produced in all three species when the challenge organisms were introduced intratracheally as a liquid suspension. A challenger 5 x 10^5 K. pneumoniae, contained in 0.1 ml of volume, produced 80-percent mortality in rats within 9 days. Studies in monkeys showed a direct relationship between volume of inoculum and severity of infection. For example, 5 x 10^5 K. pneumoniae, when instilled into the cynomolgus monkey in 0.5 ml, failed to produce clinical illness, whereas the same number of bacteria in 3 ml was lethal. In the smaller squirrel monkey, 5,000 K. pneumonia contained in 0.5 ml produced a mild illness with transient bacteremia, whereas the same number of bacteria contained in either 1.0 or 1.5 ml was uniformly lethal. Dose-volume relationships, common among three species of experimental animals, provide an excellent model to effectively investigate respiratory pneumoniae. Previous studies concerning the host's metabolic response to various infections have clearly demonstrated that infection induces alterations in the availability of substrates and the utilization of metabolic pathways for energy production. For example, infection effectively prevents normal starvation-induced ketosis and instead enhances muscle catabolism to provide amino acids for glucose production via the process of gluconeogenesis. Excessive utilization of amino acids for energy production during an infection can eventually result in muscle wasting, increased output of urinary nitrogen, and subsequent negative nitrogen balance. Therapeutic reversal of nitrogen wasting during bacterial infection by intravenous hyperalimentation techniques have been most encouraging. Using the recently developed rhesus monkey and rat model, it has been possible to significantly mute the nitrogen excretion by providing the infected animal 0.5 gram of nitrogen per kilogram per day (amino acid mixture, BreAmine II), 78 calories per kilogram per day lipid (Intralipid), plus electrolytes and vitamins. Of key importance in these studies was the observation that although the provision of the nitrogen source alone was sufficient to achieve nitrogen equilibrium in noninfected monkeys, it still resulted in an 11-percent loss of body protein and a doubling of nitrogen excretion during illness. By comparison, in those infected animals provided with lipid in addition to the amino acid mixture, only 1 percent of the body protein was lost during the same time interval. Findings with the rat-hyperal-model support the conclusion that the infected host requires amino acids and additional calories to prevent wastage of body proteins during infection. The alveolar macrophage, localized immunoglobulins, and other localized factors including those of cell-mediated immunity, represent first lines of host defense against respiratory infections of significant military and public health importance. While lung lavage of man for purposes of pulmonary specimen collections in clinical studies is not new, the repeated lavage of living nonhuman primates for the collection of research specimens has not been reported. A recent significant accomplishment was the development of techniques to sequentially lavage the lungs of live rhesus monkeys in obtaining respiratory tract specimens of research importance. An average of 85 percent of the wash fluids introduced into the lung were recoverable as final specimens. Cellular component levels in these specimens were clearly adequate for research purposes and recovery of the monkeys following the procedure were uniformly uneventful. The development of this technique opens new avenues for research into the pathogenesis, immunology, and therapy of respiratory infections.
(e) Foreign biological threat	(.000)		(.142)	Operations research studies were conducted to evaluate and assess the biological threat to the United States and to U.S. military forces throughout the world. During this period 5 operation research studies were completed. 8 additional studies were in progress and are scheduled for completion in fiscal year 1978. A description of the studies is as follows: 1. Operations research studies completed in fiscal year 1977: (a) Study 3: Biological defense protocol—the biological preparedness of U.S. Army troops: An assessment was made of current capabilities and of biological defense requirements for the U.S. Army in the field. The estimate of the current capability was based on attitudes regarding biological defense and on training and defense equipment devoted to biological defense. A protocol for suitable biological defense was presented. (b) Study 8: Target vulnerability assessment: An analysis was made of the political, military, technological, and geographical conditions and developments in the target area that could contribute to the use of biological weapons and an assessment was made of the prospect for the use of and conditions for defense against such weapons. (c) Study 15: Biological cloud patterns and profiles; The characteristics and the behavior of biological aerosol clouds in the atmosphere were examined or postulated for a great many meteorological and terrain conditions. The defense requirements for each of these conditions were discussed. (d) Study 17: An evaluation of biological treaties, and some relationships to defense planning: an analysis was made of biological treaties with regard to weaknesses in the treaties, motives for violation of the treaties and the means available for observation of violations. (e) Study 18: Minimum resources for biological weapons capability: The technological capability necessary for the development of biological weapons was assessed. Particular attention was given to the role of biological weapons in the hands of small nations with limited resources for weapons development. 2. Operations research studies in progress and scheduled for completion in fiscal year 1978: (a) Study 6: Concepts of biological weapons development by small organizations: A previous study has assessed the requirement for nations with limited resources to develop a biological weapon. This study will evaluate the ability of trained, but uninformed, individuals to develop a biological weapon that could be used clandestinely against U.S. forces. During this period, an engineer and a biologist, both with no previous exposure to the concepts of biological weapons development and use, are reviewing past and present literature. Based on their review, an attempt to develop a biological weapon for specific uses will be made. Report is scheduled for completion in fiscal year 1978.

DEPARTMENT OF THE ARMY ANNUAL REPORT ON CHEMICAL WARFARE AND BIOLOGICAL RESEARCH PROGRAMS
(OCT. 1, 1976, THROUGH SEPT. 30, 1977) RCS DD-D.R. & E. (SA) 1065—Continued

SEC. 2.—OBLIGATION REPORT ON BIOLOGICAL RESEARCH PROGRAM FOR THE PERIOD SEPT. 30, 1976, THROUGH SEPT. 30, 1977, DEPARTMENT OF THE ARMY, RCS: DD-D.R. & E. (SA) 1065—Continued

OBLIGATION REPORT OF RESEARCH, DEVELOPMENT, TEST AND EVALUATION FUNDS FOR THE PERIOD SEPT. 30, 1976, THROUGH SEPT. 30, 1977, REPORTING SERVICE: DEPARTMENT OF THE ARMY; DATE OF REPORT: SEPT. 30, 1977; RCS: DD-D.R. & E. (SA) 1065—Continued

Description of R.D.T. & E. effort	Funds obligated (millions o dollars): Prior year — Current fiscal year	Funds obligated (millions o dollars): In-house — Contract	Explanation of obligation
			(b) Study 10: Biological detector effectiveness for bomblet attack: This study will evaluate the detection capabilities for an on-target bomblet attack against U.S. military forces based on current detection arrays. During this period the characteristics and the magnitude of a biological bomblet attack were defined. Current biological detector arrays will be positioned in the target area to determine detection capability when subjected to a bomblet attack.
			(c) Study 11: Role of large particles in biological defense: This study will assess U.S. troop vulnerability from biological attack involving large particle size aerosols. During this period aerosols of biological agents composed of particles up to 20 microns in diameter were evaluated as to their role in biological weapons. The implications of large particles to biological defense were examined. Some e perimental work has shown that large particles protect the agent to some extent from environmental effects and provide a larger foci for infection. The basis for the effectiveness of particles less than 5 microns in diameter is being reviewed.
			(d) Study 12: Biological detector criteria for fixed installations: This study will develop procedures to determine the effectiveness of various biological detector criteria in preventing casualties for fixed installations. To date a survey has been made of fixed installations with regard to climate regimes, heating and ventilation characteristics of buildings, biological cloud characteristics associated with representative fixed installations and detector requirements to prevent casualties at fixed installations. Currently a model is being developed for fixed installations.
			(e) Study 19: Refinement of target vulnerability analog: This study will provide for further characterization of target vulnerability parameters which will be adaptable to a number of target sites and larger target areas. During this period, finite meteorogical data has been received for selected climatic regimes. Analog criteria are being evaluated in terms of the meteorological parameters represented by the six regimes.
			(f) Study 22: Biological casualties and attack identification: This study will develop procedures to determine when an undetected biological attack has occurred. A biological attack can be unobserved and undetected and the fact that an attack has occurred may be evident only upon the development of casualties. Certain tactical targets may present a problem because localized casualty concentrations may not readily signal the occurrence of a biological attack. During this period an analysis of tactical target casualty rates and attack identification capability was initiated.
			(g) Study 23: Biological weapons in urban areas: This study will assess the vulnerability of military and civilian personnel in urban areas to biological attack. Doctrine and tactics for urban areas are not well developed; however, some general analyses have shown potential for the effective use of both chemical and biological weapons in these areas. During this period, an examination of the vulnerability of miltary and civilian personnel and of the capability for defense of personnel in such areas when subjected to chemical and biological weapons.
			(h) Study 24: Biological theater conflict: This study is to determine whether biological weapons are of value to nations in a tactical role in support of a predominantly armor invasion. Further development of armored penetration scenarios for NATO Europe is required. During this period, scope of the study has been defined.
(f) Army materiel development tests.	(.000)	(.035)	Modifications were completed on an inclosed test chamber, preliminary checkout trials were conducted in order to validate test procedures prior to testing of the XM19 detector/XM2 sampler system. 14 trials were conducted with the XM2 sampler to determine collection efficiency and to determine the capability of the XM2 biological sampler and collecting fluid to collect and maintain viability during holding. Data forwarded to Chemical Systems Laboratory.

THE HIGH COST OF REGULATION

● Mr. DOMENICI. Mr. President, pollsters have indicated that the American people consider the use of Federal regulation and bureaucracy the major domestic problem.

This problem affects manufacturers, consumers, and all individuals. We have entered the age of Federal regulation and there are few elements of life, commercial or otherwise, where the Federal Government does not have some role to play.

Newsweek magazine in this week's issue carries an article submitted by Henry Ford II which describes the effect of regulation on our free enterprise system and the cost to our society.

I ask unanimous consent that this assessment be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE HIGH COST OF REGULATION

As I look at our country today, I see a powerful but uncertain and unsteady giant being trussed up in a growing web of rules and regulations to the point where it can no longer exert its strength freely and effectively. I am reminded of the story of Gulliver in the land of the Lilliputians.

Perhaps it's only a coincidence that the recent period of rapidly rising government spending and roughshod regulation also has been a time of high unemployment, slow productivity improvement, soaring government deficits and unprecedented peacetime inflation. But I don't believe it's a coincidence at all. Despite a mounting record of failure and frustration, our leaders have failed to grasp the fact that too much government inevitably leads to economic decay.

It is obvious to everyone—or should be—that the more government spends, the less wealth is left for productive investment as well as for private consumption. What is not so obvious—and our lawmakers and regulators apparently choose to ignore it—is that private spending to meet government requirements has similar consequences.

I am not arguing with the need for government action to conserve energy, reduce harmful pollution and protect the health and safety of all of us. But I am arguing with the tendency to sanctify each goal—to seek instant perfection with little regard for costs and consequences. In our national effort to solve common problems caused by our private choices, we have spent too much time on moralistic and ideological disputes and too little time seeking practical compromises. Our real task is to find the best balance between benefits to people as citizens and costs to people as consumers.

DESIRABLE GOALS

I am not at all reluctant to say that some automotive regulations have been needed. The industry simply did not respond quickly and effectively enough to the harmful side effects of vastly increased automotive usage in highly populated areas. And some obviously desirable goals such as reduced emisssion of pollutants and increased passenger protection in the event of accidents could not have been achieved as readily without uniform, across-the-board government mandates. In retrospect, I think it is fair to say also that the law requiring greater fuel economy in motor-vehicle use has moved us faster toward energy conservation goals than competitive, free-market forces would have done.

But the effect of even the most desirable law can be unnecessarily costly and disruptive to both manufacturers and consumers if it is interpreted in a narrow or punitive way by those who enforce the law. Regulatory decisions can have far greater impact than was intended or foreseen by those who enacted the basic legislation. To the extent that those decisions are biased or overzealous, there can be no hope of seeing the law carried out objectively.

INSIDIOUS POWER

There is a real danger that regulation will continue to feed upon regulation and become not so much a means to an end as an end in itself. With the labyrinth of regulations, many in Washington and elsewhere find themselves possessed of a power greater in some respects than that of the Congress or state legislatures.

It is an insidious kind of power. It lacks accountability to the people, has few real restraints and avoids any immediate public outcry because it does not make any direct or substantial demands upon the U.S. Treasury. The staggering cost of meeting regulations falls first upon the affected industry and its customers, and only later does the impact begin to be felt by the society at large in terms of general price rises, slower economic growth and fewer jobs. One of our critical needs today is a "sunset law" for regulations and regulatory agencies.

What the regulators evidently do not recognize is that they are forcing some fundamental changes in the structure of our economy. To the extent that some companies are unable to sustain the level of spending required by government regulation, they could find it necessary to cut back operations, reduce product lines or—at the extreme—simply go out of business. One automobile company has already dropped out of the heavy-truck business because, by its own account, it "could not keep pace with the growing list of government standards." Despite efforts by government throughout the years to prevent concentration in industry, the regulators are fast bringing us to the point where only the largest companies can survive.

What troubles me most about all of this is our apparent inability or unwillingness to recognize that there is something wrong about the way we look at our national problems and the way we try to solve them. We want clean, sparkling rivers and streams wherever we go. But must we close down all the industrial plants along their shores to achieve that goal? We want clean air. But is 90 per cent clean much worse than 99.9 per cent clean? We want safe motor vehicles. But can the vehicle alone guarantee absolute protection from accidents and injuries?

Several years ago, I went to Washington at the invitation of the late Sen. Hubert Humphrey to testify before the Joint Economic Committee. I suggested that this country would be well-served if we introduced into the conduct of our national economy some of the planning concepts that are common in business. We had better know and understand all the factors that must be taken into account when we size up the economy and lay out our course for the future. We cannot have economic growth, balanced or otherwise, if we approach problems narrowly. We must know how each action affects another, and be willing to change or eliminate those that are counterproductive.

INCENTIVES

It seems to me also that we have made too little use of incentives in attempting to resolve many of our most difficult social and environmental problems. That's the essence of this economic system that has served our country so well for so many years. Even a donkey will respond to a carrot as well as a stick. The more we can encourage people—manufacturers and consumers alike—to want to do what should be done because it is demonstrably in their best interest to do so, the less damage will be done to our economy and to the society at large.

That assumes, of course, that we can arrive at some better way of deciding—by consensus—what our national priorities should be. To paraphrase Winston Churchill, never before have so few attempted to speak for so many with such devastating results.●

ENERGY AND JOBS—AN URBAN PERSPECTIVE

● Mr. RIBICOFF. Mr. President, Senator KENNEDY's Joint Economic Energy Subcommittee recently held several hearings on the relationship between energy and employment. These timely and comprehensive hearings have focused on the impact of energy policy on jobs and those steps which can be taken to provide additional employment as energy is produced or saved.

One of the witnesses at the hearings was Hartford Council President Nicholas R. Carbone. Nick Carbone is one of the Nation's most perceptive and respected authorities on urban affairs. His testimony brings a unique perspective to the relationship between the problems of urban America and our country's energy needs. As Councilman Carbone has observed, there must be a partnership between the Federal, State, and local governments to "work together to redefine the impact of energy policy on Americans."

I believe Mr. Carbone's comments are of interest and I ask unanimous consent that his testimony be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

ENERGY AND JOBS

I am pleased to join you today to discuss the role of energy policy in job creation. Our national energy policy is new and incomplete. In two weeks President Carter will announce America's first explicit urban policy. Behind both strategies and programs at the Federal, State, and Local levels must lie a response to our Cities' greatest need: Jobs. Our urban policy must be an investment strategy which creates employment opportunities.

Energy policy must also be shaped to play a central role in the task of urban job creation. As Congress moves closer to the historic adoption of the Humphrey-Hawkins full employment bill, the planning tools to create full employment must be utilized to shape our energy policy as a powerful instrument for economic growth.

The broad principles of an energy/jobs policy must be fashioned at the national level in cooperation between the Congress and the administration. But numerous state and local governments already have developed prototypes of energy programs that are putting people to work. We need to examine those ideas and implement the best of them in other states and local communities. That effort will require a partnership between all three levels of government.

That partnership must work together to redefine the impact of energy policy on Americans. Energy policy has come to imply penalties, sacrifice and prohibitions that affect some people more severely than others. In the atmosphere of mistrust and resentment that follows, it is difficult, if not impossible, to rally public understanding.

Energy policy does not have to mean unequal treatment and an unfair set of per-

sonal sacrifices. Energy conservation can be perceived as a positive step towards eliminating waste and creating jobs for Americans. According to Donald Gilligan, former Assistant Director of the New York State Energy Office: "The Northeast could increase its energy consumption by 40 percent over the next decade without a single new energy source—by simply eliminating waste." Energy conservation offers local officials and individuals opportunities to increase our options to reallocate capital and natural resources away from wasteful energy uses to job creating activities.

There are 3 basic principles which underline this theme—

1. Waste of Energy eliminates jobs;
2. Capital intensive production of energy eliminates jobs;
3. Lack of a comprehensive national and urban growth policy wastes energy and destroys cities.

Energy consumption and energy waste affect job loss.

In order to understand that relationship, let's look at how inflated costs have limited local government's ability to deliver services. Hartford's experience is typical. Since fiscal year '71–'72, Hartford's budget has increased from $94 million to $130 million, during the same period the consumer price index increased 50.5 percent—shrinking the value of today's dollar. Our total current budget would equal only $64 million in 1971–72 dollars, and in 1971–72 we were spending $94 million for city services. We have cut back in several ways. We have cut back through layoffs and attrition; our number of man years has been reduced by 20 percent. We are also delaying replacement of equipment such as street sweepers—which rose in price from $15,000 to $25,000 in five years.

And, at the heart of these inflationary price increases is the rising cost of energy. Since 1971, the cost of fuel oil has gone from 12 cents a gallon to 40 cents a gallon—a 228 percent increase. The price of gasoline has increased by 168 percent and electricity by 71 percent.

As Barry Commoner points out:

"It is no accident that we first experienced double digit inflation when the previous constant price of energy not only drives all prices upwards—it creates uncertainties that delay new industrial investment. It forces economic dislocations that costs jobs. It is a prescription for inflation and unemployment. Here, then is the real meaning of the energy crisis. It is not a distant prospect of someday running out of energy. Rather, it is the immediate prospect of economic catastrophe."

How can we as a nation avoid that economic and social catastrophe? Massive multibillion dollar projects such as the Alaskan Pipeline don't seem to be the answer. Neither do proposals to build networks of huge nuclear power plants. Nuclear power plants, Commoner points out, have had to meet a whole series of new safety and environmental protection requirements that were not built into the original design. These refinements have helped push up the costs of a nuclear power plant by 130 percent in five years. Since waste and reprocessing problems are still unresolved. nuclear power plant costs will continue to increase. In Commoner's words:

"That explains why nuclear power is the most expensive energy source." and "that is why utilities constantly demand higher rates to raise the huge amounts of capital needed to build nuclear power plants."

Our country also faces severe limitations in the availability and cost of capital. Given the shortage, we must make a choice—will we use the bulk of our capital to build costly nuclear power plants to produce costly electrical power? Or will we use our capital in ways that will reduce our energy costs, put our people to work, rebuild our cities and improve the quality of life for most Americans?

If the American people believed that the latter choice were realistic, they would demand that we make it. I believe that that option is realistic, that we can achieve those goals—if we are willing to implement a sensible energy policy.

We must help the American people understand that the lack of a comprehensive national and urban growth policy not only destroys cities, it saps our nation's strength through unnecessary waste of energy. What are the energy costs of unbalanced growth? What are the energy costs of the destruction of our Northeastern and Midwestern cities? In Hartford, we have estimated that the total capital cost of replacing our City is 8–10 billion dollars including private and public buildings, parks, streets, sewers, etc. It is ironic that the lack of a national urban policy is systematically destroying this capital base—by forcing people to leave to seek employment; and by underfinancing local governments so that we are unable to maintain our capital investment.

It is ironic that while we all decry the waste of energy, and while we decry the shortage of capital, we are wasting these resources and harming our environment through the absence of a growth policy.

The cost of new housing is exploding yet as we all know, the cost of rehabilitation is dramatically less than the cost of new construction. We also see a water crisis is developing, which I believe could someday overtake the energy crisis in importance in parts of our country—and coincidentally provide the Northeast with the advantage of an unparalleled natural resource. We also see the crisis in the mushrooming capital budgets in areas of high growth, placing unnecessary demands on local taxpayers. All of these phenomena are due to a lack of a comprehensive national growth policy.

We need a national growth policy not only to save our Northeastern Cities but also to save energy. We must understand that cities are inherently energy conserving. Buildings are closer together, reducing energy costs. Apartment dwellings are lower in energy costs per unit than detached houses. Public transportation is more readily available and financially possible in cities and the commute from home to job is shorter.

Given the principles that wasted energy eliminates jobs, that capital intensive production eliminates jobs, and that the lack of a national urban policy eliminates jobs and hurts our cities, what should we do? Our cities are already taking innovative steps towards a comprehensive energy policy at the local level—but they need assistance from Washington. Unfortunately the Schlesinger plan would shift the emphasis away from local governments, and put the responsibility in the hands of state governments. There is a role for the cities, of course, but local government holds the responsibility for building codes, zoning laws and a variety of regulations that have direct impact on energy conservation.

The Schlesinger plan also would place emphasis on the role of private utility companies in retrofitting, weatherization and financing. There are two major flaws in this. First, it does not recognize the role of public utilities in the delivery of water and sewer services. Secondly, electric and gas utility companies need increased revenues to maintain the debt service on existing and future capital expansions. Conservation efforts that have lowered demand also reduced revenues and utilities have responded with rate hikes. Putting conservation in the hands of utility companies would seem to place consumers in the midst of a no-win conflict of interest.

Further, the present winterization effort, deals primarily with middle and upper income people. Tax credits will help the homeowner conserve energy and save money, but the tax credit will not assist the urban poor and the working poor concentrated in apartment dewellings. As energy costs rose, landlords in Hartford began shifting the cost of energy to their tenants, so that 75 percent of Hartford's tenants now bear the responsibility of paying for their own heat and hot water. This is almost always the case in our poorest neighborhoods. When landlords are not paying heating bills, the tax credit won't motivate them to invest in insulation, storm windows or more efficient boilers. The tenant who is paying the heating bill can't get a tax credit even if he or she can afford to winterize the apartment.

As a result of this situation, at least 50 percent of our multi-family units won't be winterized nor will they utilize new technologies such as solar collectors.

The Community Renewal Team of Hartford, which operates our winterization program for poor people, estimates that we need $10 million to insulate all substandard living units occupied by the poor in the Hartford region. Last year CRT's total budget for insulation was $120,000—approximately 1 percent of the total need.

But, the Schlesinger program is not an energy program for cities nor is it an energy program which places priority on job creation. Let me cite some specific examples of the ways in which energy policy can be used to create jobs. The City of Hartford is establishing a Community Energy Corporation which will hire and train unemployed city residents to retrofit and audit existing structures. We will work on public buildings and hope to branch into homes and apartment buildings in the City and in surrounding suburban communities. We are attempting to change state legislation so that our regional water bureau could contract with the energy corporation to retrofit homes within its jurisdiction. The publicly-managed water bureau can act both as a technical resource and as a capital source for money borrowed at public rates. Secondly, within CEC funds that would be ordinarily considered a profit will be used by the public corporation to conserve energy in poor people's homes and apartments.

It is estimated that the Community Energy Corporation, with a public investment of $125,000, can winterize 1,200 homes on a cost basis. This will create 15 jobs for city residents at a cost per house of $106.00. This results in a total cost per job of public money of $8,400 in the first year. Compare this figure of less than $10,000 per job for C.E.E. with the average cost of job creation for nuclear power. Compare this figure with the $40,000 required in capital to create a manufacturing job. Clearly, energy conservation is job intensive. In addition, the skill profile of winterization makes it a profession accessible to those suffering from structural unemployment.

The second cornerstone of a job creating energy policy must be a massive federal, state, and local partnership to create a solar industry on a job intensive and decentralized basis.

In California, the campaign for economic democracy has sponsored SOLAR cal—a legislative package submitted to the California Assembly, SOLAR cal is a package of 12 bills of which four are central. SOLAR cal would make available, through the utilities, consumer loans at low interest rates. These rates would be set by the public utilities Commission and monthly installments on the loan would be no higher than present monthly utility bills.

SOLAR cal would create a public not-for-profit corporation which would use state and federal dollars to make loans to small businesses for the production and installation of solar energy. The $10 million in equity would

stimulate the growth of solar energy and capital would be made available to small enterpreneurs and community based organizations. Also, SOLAR cal would establish the use of state CETA funds to finance the training of personnel for local community development private corporations that would manufacture and install solar equipment. CETA would be used as a way of allocating jobs in the Solar industry to those who most need them.

Finally, SOLAR cal would create a commission to provide a plan to solarize California. The California Center for Public Policy has estimated the net number of jobs that would be created in California alone, through the promotion of solar energy. Let's assume a 75 percent retrofit of homes for solar space and water heating; and 100 percent solar space and water heating in new residential and commercial construction. It is estimated that the SOLAR cal proposal would create a new number of 378,000 new jobs over a 10-year period beginning January 1, 1981.

CEC and SOLAR cal share two basic assumptions. One, public guidance and public control are the cornerstone of the national energy industry. We cannot afford to have ownership of the sun in the same way we have monopolistic ownership of petroleum by an industry unresponsive to the needs of our people or even the controls of our government. Secondly, SOLAR cal and CEC are based around the principle that energy policy and planning can create jobs for the structurally unemployed.

There are other important national examples. In Springfield, Vt., local officials plan to use seven old mill dams to generate electricity for that town's 10,000 residents. Local officials predict that a series of hydro-electric plants will cut the town's electric bill in half. This plan could be duplicated in small towns and in big cities all across the country. The U.S. Army Corps of Engineers reports that at least 48,000 untapped dam sites could be used to develop electricity. Just 10 percent of the 3,000 dam sites available in New England could supply enough electricity for the entire city of Boston. Hydro-Electric power is safe, non-polluting, relatively inexpensive, produced from a renewable energy source and can reduce the cost of energy for industrial production—helping to hold down inflation.

Wilton, Maine is looking to relatively new technology of solar energy. Wilton is constructing a sewage treatment plant that would use solar energy to heat the building and fuel the process. Methane gas will be produced as a by-product and stored as a back-up fuel. In addition, Portland, Oregon has studied a capital improvement program to see how long-range physical plans for the city could be developed that would accomplish the two goals of reducing city government energy costs while stimulating energy efficient development patterns. Dallas, Texas has developed a set of energy efficient building design standards for all new facilities and structures that are being renovated.

Since energy affects virtually every aspect of our lives—social, economic, political and cultural—a city comprehensive energy plan needs to touch all levels of municipal policy including zoning, land use building codes, transportation, economic development and education. In Hartford we are looking at how we might revise our zoning and land policies. We plan an economic multiple use of structures so that people can work, shop and entertain themselves in the same complex. We are looking at our building codes to determine whether or not the City could require an energy audit on any building that is sold so that energy deficiencies would have to be corrected before transfer of title. The proposal would guarantee that every structure in the city over time would be completely retrofitted.

This City energy policy is being managed by a new standing committee of the Council which involves all nine members. They are actively involved in the study of all aspects of our energy policy including zoning, land use, transportation and job creation.

In conclusion, we must examine what we can do next. What should be the roles of the Federal, State and Local Governments? We need a partnership that involves all three levels of government so that we can create a system which conserves energy, creates jobs and improves the quality of urban life. The National League of Cities has called for federal assistance to cities in the form of direct federal subsidies, and energy extension service, a general revenue sharing plan, and local energy conservation and development banks. The SOLAR cal proposal creates a state role in planning, land use management and a public capital source as an attempt to engage a city in intelligent energy planning. Hopefully, the President's requirement of a State urban strategy as part of the urban policy will create growth policy.

Finally, whatever is done must be based on the following four principles of action. These principles share a common goal. An energy policy should create jobs, not waste capital. An energy policy should create jobs for those in greatest need, the structurally unemployed. These principles for action are:

1. We should utilize energy sources which are job intensive as a strategy for full employment.

2. A new capacity for state and local government to manage an energy service must be created at a level equally important with existing public services, police, fire and education.

3. Energy growth must be based upon the utilization of public capital. Public capital will both lower the cost of energy saving and more importantly public capital will help to decentralize the control of the energy industry.

4. A national growth and urban policy must be made an effective tool of energy. The policy must support the survival of one of our greatest energy resources—our cities.

Thank you very much.●

SOLAR ACCESS LEGISLATION

● Mr. HART. Mr. President, the impressive package of solar legislation that was introduced on Monday is designed to encourage and expand the use of solar energy. I commend my colleagues in both Houses for the many innovative proposals that have been set forth. It must be recognized, however, that the viability of solar energy as an alternative energy resource ultimately depends upon direct access to the Sun's rays.

Although sunlight flows unobstructed through nearly 93 million miles of space, it is often impeded in the final few feet before it touches the Earth. Since most of the Sun's rays that reach a particular piece of land must necessarily strike it at an angle, very little of the sunlight collected by a solar device comes to it from directly above the land on which it rests. In Colorado, for example, the usual angle for a solar collector is roughly 60 degrees above the horizontal. This angle means that, for most installations, the rays reaching the collector will be coming across adjacent properties and may eventually be blocked by buildings, walls, trees, or other construction, not anticipated by the installer of the solar collector.

A homeowner whose solar collector is shaded by a neighboring structure may have no legal redress. A solar energy user's legal right to sunlight varies from State to State and is, for the most part, undefined and unclear. A residential solar energy user may well be hindered by restrictive covenants, building codes, and municipal ordinances, that prevent or discourage rooftop location of solar collectors. The critical question of how sunlight, upon which solar energy is dependent, is to be allocated, is just beginning to be examined. With the emergence of solar energy as an important and increasingly reliable alternative to gas, oil, and coal for heating buildings, the questions regarding legal access to the Sun cry out to be resolved. If they are not, the prospect of legal tangles over denied access is likely to scare both developers and homeowners away from solar heating and cooling.

Measures which help clarify legal access to solar energy can play a vital role in stimulating advances in technology and eliminating institutional barriers. Such measures will serve to protect the solar user from a shadow and avoid litigation between neighbors, while promoting the development and use of solar energy devices.

Legislative initiatives in this area have traditionally been the prerogative of State and local governments and should clearly remain so. The Federal Government can, however, provide the crucial support needed by States and municipalities that seek to press forward and address these emerging problems.

Accordingly, I am preparing legislation which would establish a program of matching Federal grants to States for the purpose of conducting solar access reviews, by which States would identify legal alternatives to assure access to direct sunlight and methods of encouraging adoption of such alternatives. A number of States across the country have already developed solar access planning studies, but some, unfortunately, have not been able to proceed due to the lack of funds. Federal grants earmarked for solar access studies would provide the boost necessary to get many of these State programs off the ground.

I believe this legislation will provide a solid foundation for the growth and expanded use of solar energy throughout our Nation.●

CLUES TO THE EARLY HISTORY OF THE SOLAR SYSTEM

● Mr. LEAHY. Mr. President, yesterday I had inserted into the CONGRESSIONAL RECORD a paper by Alan Rohwer entitled "What Does the Amateur Astronomer Contribute to Scientific Research?" This was one of many papers presented at a recent conference on scientific research in Vermont.

Today I ask that unanimous consent be given to print in the RECORD an equally informative and scientific paper by Dr. John C. Drake entitled "Clues to the Early History of the Solar System."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

METEORITES: CLUES TO THE EARLY HISTORY OF THE SOLAR SYSTEM

(By John C. Drake)

ABSTRACT

Meteorites provide important insight into the early chemical evolution of the solar system. Type 1 carbonaceous chondrites closely approximate the original composition of the solar nebula. The compositional and mineralogical variability of other meteorite groups results from various periods of chemical fractionations occurring during the original condensation process and later events. Radioactive age dates indicate that meteorites formed rapidly approximately 4.5 billion years ago. Although many meteoritic processes are not well understood (for example chondrule formation and orbital perturbations) information gained from their study provides unique insight into evolutionary processes active in the early history of our solar system.

INTRODUCTION

The problem of using meteorites to interpret the early history of the solar system has several facets. First, it is necessary to establish the range of compositional and textural relationships exhibited by meteorites and then to evaluate their significance. The second problem is to establish when meteorites were formed, if in fact they did form during the early history of the solar system rather than at some later date. Thirdly scientists must establish the extent to which meteorites have been altered during their existence. If they have undergone extensive alteration since the time of their formation it becomes much more difficult to unravel their history. Finally it is necessary to ascertain whether or not they have their origins within the solar system, and, if so, in what part.

References to objects falling from the sky exist in the writings of the ancient Greeks and Romans (Krinov, 1960, p. 1–3; Wood, 1968, p. 1–4). It was not, however, until the end of the eighteenth century that the study of these objects was pursued in a scientific manner and an extraterrestrial source generally accepted. In 1794, Chladni, working at the University of Berlin, published a book entitled "Observations on a Mass of Iron found in Siberia by Professor Pallas, and on other Masses of Like Kind, with some Conjectures respecting their Connection with certain natural Phenomena" (Wood, 1968, p. 3) in which he forcefully presents the case for an extraterrestrial origin for these and other similar objects. Howard, an English chemist, discovered nickel in both stony and metallic meteorites, thus leading him to conclude, in 1802, that both types were not terrestrial material (Sears, 1975, 1976; Sears and Sears, 1977). Biot's report of the L'Aigle meteorite shower (April 26, 1803) further substantiated Chladni's and Howard's conclusions and thus the recognition that meteorites were of cosmic origin became established (Mason, 1962, p. 6–7). Until the return of the first lunar samples by Apollo 11 in July, 1968, meteorites were the only material of extraterrestrial origin available for study. The study of lunar samples and data from unmanned space probes has greatly increased the importance of meteorite studies. As more information becomes available, it is increasingly apparent that meteorites are unique in chemistry and texture, and are therefore invaluable clues in deciphering the early history of our solar system. Because of this the study of meteorites continues to be an area of interest for geologists, physicists, astronomers and chemists. Recent literature on meteorites is voluminous and this paper will not attempt a comprehensive survey. Rather, selected topics and controversies will be presented to give some idea of the varied nature of the subject material and the problems associated with using meteorites to interpret the early history of the solar system.

CHEMICAL AND MINERALOGICAL CHARACTERISTICS

Many different criteria, including chemical composition, textural relationships and mineralogy, have been used in attempts to devise a systematic classification of meteorites. In any classification scheme, however, it is important to determine whether the chosen criteria merely establish convenient, but arbitrary, subdivisions on a natural continuum or represent truly distinct groups. It is further necessary to establish whether the parameters upon which a classification system is based represent fundamental differences in origin and evolution or are merely convenient descriptive characteristics. Although there is now general concensus among meteoriticists regarding the format of the classification there are still varied interpretations as to the significance of the divisions.

Meteorites can be conveniently divided into three major groups on the basis of composition and mineralogy; (A) the irons composed primarily of nickel-iron alloys, (B) the stones which contain mostly silicate minerals and (C) the stony-irons which are a mixture of metals and silicates in approximately equal proportions. Although iron meteorites are those most frequently (59%) reported as finds (i.e. those meteorites that are found but not seen to fall), stony meteorites are probably far more abundant in space as indicated by the high percentage (92%) represented by those meteorites actually seen to fall and subsequently collected. The difference between the relative abundances of "falls" and "finds" undoubtedly represents the ease with which metallic meteorites can be distinguished from terrestrial rocks as well as their greater resistance to weathering processes on the surface of the earth. Stony-irons represent only a small percentage of either falls or finds (6% and 2% respectively; Mason, 1962, p. 3).

Iron meteorites are primarily composed of intergrowths of two nickel-iron alloys. Kamacite, a low nickel alloy is generally the predominant phase with taenite, a high nickel alloy, present in lesser amounts. The majority of metallic meteorites (the so-called octahedrites), after being cut, polished and etched with dilute acid, show an oriented intergrowth of these two minerals, known as a Widmanstatten pattern. This results from the alignment of taenite lamellae parallel to specific crystallographic directions within the more abundant kamacite host. These textures are frequently continuous over hundreds of centimeters indicating that many metallic meteorites are giant single crystals of metal. In order for crystals this size to develop, the rate of cooling must have been very slow. Rapid cooling tends to promote the formation of many nuclei rather than continued growth on one or a few crystals. Experimental work has shown that the compositions of both kamacite and taenite systematically change when temperature is lowered. Nickel atoms diffuse through the crystal lattices of these minerals enabling the compositions to re-equilibrate at lower temperatures. By combining appropirate experimental data regarding the rates of diffusion and predicted compositions with analytical data describing the distribution of nickel in the two minerals it is possible to calculate cooling rates for these meteorites (see Wood, 1968, p. 30–39; Wood, 1964; and Goldstein and Short, 1967a, 1967b; for a more detailed discussion of the technique and interpretation of results).

The results of these studies indicate a range of cooling rates from 0.4 degrees centigrade per million years (m.y.) to 500 degree centigrade per m.y., but with most iron meteorites falling in the range 1–10 degrees centigrade per m.y. Because metal is such an efficient conductor of heat these extremely low cooling rates are possible only if the metal were covered with a thick layer of insulation, such as silicate minerals. If, in fact, metallic meteorites represent the cores of parent bodies, it is possible, using conductivity data, to calculate the thickness of rocky material required to produce the measured rates of cooling. Such calculations (Goldstein and Short, 1967a, 1967b; Wood, 1968, p. 39) indicate radii ranging from 70 to 300 kilometers for the parent bodies, which compare favorably with the radii of asteroids, the largest of which is Ceres with a radius of 477 km (Hartmann, 1975), but are substantially smaller than the moon whose radius is 1738 km (Kopal, p. 5, 1969).

Stony-iron meteorites are the least abundant group. But, because they are transitional in mineralogy and texture between the more abundant iron meteorites and stony meteorites, their significant may well exceed their relative abundance. The stony-irons can be sub-divided into the two major groups that differ in chemistry, mineralogy, texture and probably mode of origin. The pallasites consist primarily of olivine, $(Mg, Fe)_2SiO_4$*, nodules or fragments set in a generally continuous matrix of nickel-iron. Investigations by Buseck and Goldstein (1969) suggest that these meteorites formed under conditions of equilibrium crystallization at very slow cooling rates (0.5 to 2 degrees centigrade per m.y.). This low cooling rate may indicate that they came from a deeper, better insulated source than most iron meteorites. These meteorites are products of extreme chemical differentiation resulting in the accumulation of olivine grains. Native metal was either interstitial to or intruded into the olivine rich zones (Buseck, 1977; Scott, 1977). Mesosiderites, the other main group of stony-irons consists primarily of pyroxene, $(Mg, Fe)SiO_3$, calcium-rich plagioclase, $CaAl_2Si_2O_8$, and nickel-iron alloy, with the latter existing as discrete grains rather than a continuous mesh. Texturally, many mesosiderites show evidence of crushing and brecciation (composed of numerous angular rock and mineral fragments) while mineral compositions indicate a lack of chemical equilibration (Powell, 1971). Cooling rates for mesosiderites, determined from nickel diffusion patterns in the metal alloys, are the lowest of any single meteorite group (0.1 degrees per m.y.). This, however, may be indicative of the cooling rate only in the temperature interval 500°C to 350°C. The textures and compositions of silicate minerals in these meteorites indicate a more rapid rate of cooling at higher temperatures. Mineralogical and textural criteria suggest that this group of meteorites has had a complex history including crystallization from an igneous silicate melt (a magma) ". . . brecciation, metal-silicate mixing, . . . burial, metamorphism (recrystallization at elevated temperatures) and ultimately removal from the parent body." (Powell, 1971, p. 5).

Stony meteorites, in which silicate minerals are predominant, are the most abundant groups, as indicated by the relative number of falls (92%). This group has been further subdivided into the chondrites which are meteorites containing small rounded inclusions (chondrules) of glass and/or minerals and the achondrites which lack chondrules. Achondrites, more than any other group of meteorites, resemble many terrestrial igneous rocks in both texture and mineralogy. They consist mainly of plagioclase, $CaAl_2Si_2O_8$, pyroxene, $(Mg, Fe)SiO_3$, and olivine, $(Mg,Fe)_2SiO_4$. The characteristics of these meteorites suggest that they crystallized from magmas formed when some meteorite parent bodies were partially or totally remelted.

---

*In all chemical formulas the numbers indicate the relative number of atoms of the preceding element(s) present in a formula unit.

Chondrites are the most abundant type of meteorite observed as falls. Like the other major groups of meteorites they represent a wide range of texture, mineralogy and bulk composition which has led to numerous classification systems. The one most commonly used currently is that proposed by Van Schmus and Wood (1967) which incorporates both chemical and textural criteria. Major subdivisicns are based upon the following bulk chemical parameters; (A) the ratio SiO_2/MgO, (B) the ratio of metallic iron to total iron, Fe(m)/Fe(t), (C) the ratio of iron to silica $Fe(t)/SiO_2$ and (D) the amount of iron in olivine and pyroxene crystals. These criteria permit five different groups to be distinguished: (A) type E which is characterized by a relatively high SiO_2/MgO ratio and essentially no oxidized iron, hence a high Fe(m)/Fe(t) ratio, (B) the H, L, and LL groups (for high, low, and low low iron content) which comprise the "ordinary chondrites", having SiO_2/MgO ratios of about 1.6 (the ordinary chondrites are differentiated by Fe(m)Fe(t) ratios ranging from 0.6 for H to 0.1 for LL) (C) the "carbonaceous" or C chondrites which have low SiO_2/MgO and contain little or no native metal. These chemical groups are subdivided on the basis of mineralogical and textural (petrologic) characteristics. One extreme (type 6) contains highly recrystallized matrix constituents, with these characteristics; chondrules are poorly defined having been recrystallized in conjunction with the matrix glass is absent having been transformed into more stable crystalline minerals; minerals are in equilibrium with one another, and there is little volatile material (e.g. H_2O, C). The other extreme (type 2) contains well defined chondrules, glass, an opaque unrecrystallized matrix, disequilibrium associations of minerals and a high content of volatiles (H_2O=4–18%, C=0.6–2.8%; Van Schmus and Wood, 1967, p. 757). Type one chondrites, of which only C varieties have been found, are unique in that they contain no chondrules but have high volatile contents ($H_2O \approx 20\%$, $C \approx 2.8\%$) similar to the matrix of type 2 chondrites (which are also all type C).

There are additional chemical differences among the groups that are significant in developing any theory of origin. Many volatile elements (such as Sb, Rb, Cs, Ge, Se, Te, Ag, Bi, In, Tl, Zn, and Cd) in type 2 and type 3 carbonaceous chondrites (C–2 and C–3) are depleted by relatively constant amounts compared to type 1 carbonaceous chondrites (C–2=0.5×C–1; C–3=0.3×C–1; Grossman and Larimer, 1974, p. 85, Fig. 9). Ordinary chondrites are also depleted in volatile elements relative to C–1 but two distinct patterns exist. One group of elements (Cu, Au, Ga, Ge, Sn, Sb, S, and Se) are depleted by a constant factor (0.25×C–1) whereas a second group (Te, Ag, Zn, Cd, Hg, Cl, Br, I, Pb, Bi, In and Tl) show increasing amounts of depletion, up to 0.002×C–1 for In and Tl (Larimer and Anders, 1967). In addition to minor and trace elements (whose cosmochemical importance far outweighs their abundance) many more abundant elements (Al, Ca., Ti, Mg and others) are also depleted in ordinary and E group chondrites relative to carbonaceous chondrites. A fractionation of metal (Fe, Ni, Co) and silicate (correlated with Si) is also indicated by the systematic differences in the Fe/Si ratio among H, L, and LL chondrites. In summary, the chondrites exhibit numerous and complicated chemical and textural differences, the details of which must be considered when formulating any theory of origin. Fractionation among various chondritic meteorites exists for (A) those elements which are present in minerals at high temperatures (e.g. refractory elements), (B) those elements associated with nickel-iron metal, (C) slightly volatile elements showing constant depletion factors and (D) highly volatile elements showing variable depletion patterns. Although there is general agreement on the observational evidence, different interpretations exist as to how and when these variations were established, that have important ramifications on deciphering the evolutionary history of these objects. For example, the origin of chondrules, the small spherical inclusions from which chondrites derive their name, has been particularly enigmatic. The glassy nature or devitrification texture of many of these objects implies that they were at one time liquid and subsequently cooled to a glass. However, at the postulated pressures existing within the primordial solar nebula, gases should condense directly to solid crystalline substances rather than liquids. Hypotheses of origin include: (A) primary condensation during transient high pressure events, (B) metastable precipitation of liquids from super-cooled gases, (C) secondary formation from remelted dust by electrical discharges, (D) remelting caused by high velocity impacts between dust grains and (E) remelting caused by large scale impacts on meteorite parent bodies (Grossman and Larimer, 1974, p. 86; Wasson, 1972, p. 745; Wood, 1968, p. 77–84 and p. 100–107). Because chondrites are the most abundant group of meteorites (falls), any comprehensive discussion of the solar system must consider this group in detail.

AGES OF METEORITES

It is necessary to determine the ages of meteorites in order to assess their genetic significance. In general all dating techniques applied to meteorities rely on the spontaneous decay of radioactive elements with known half-lives (the half-life is the time required for one half of the radioactive atoms originally present to decay). As stated by Anders (1963, p. 402): "Five important events in the history of meteorites can be dated by radioactivity. In somewhat simplified terms they are (A) nucleosynthesis, (B) melting of the meteorite parent bodies, (C) cooling of the meteorite parent bodies, (D) breakup of the meteorite parent bodies and (E) fall of the meteorites." The first of these dates (A) which gives some estimate of the time interval required for the formation of the solar system, depends upon "extinct" radioactivity. This is a radioactive element such as I (129)[1] present in the original solar nebula that has a relatively short half-life. I(129) is converted to Xe (129) with a half-life of about 16 million years (short in terms of geological time!). Because Xe (129) is a gas it will be rapidly lost by diffusion at high temperatures, and will not be retained by a meteorite parent body until the temperature has fallen to 300 degrees Kelvin (0 degrees centigrade=273 degrees Kelvin) (Anders, 1963). Thus, if the original I (129) concentration can be estimated the residual Xe (129) gives an estimate of the time interval between accretion and cooling to 300 degrees K. Such determinations indicate that this length of time was about 100 million years after the cessation of nucleosynthesis reactions creating these elements. This interval is relatively short compared to the age of meteorites.

Meteoritic ages are usually determined using radioactive elements with longer half-lives. Various elements have been used including: Rb (87) to Sr (87); U (235) to Pb (208) + 7He (4); U (238) to Pb (206) + 8He (4); Th (232) to Pb (208) + 6He (4); and K (40) to A (40) + Ca (40). Meteorite ages based upon rubidium (RB) to strontium (Sr) decay relationships cluster around 4.5 billion years indicating that these objects achieved their present chemical identities at about that time. Radioactive age-dates based upon a gaseous decay product such as argon–40 or helium–4, are generally younger ranging from 4.5 billion years to less than 1 billion years. Because the decay product is a gas, these ages (so-called gas retention ages) indicate the time at which the temperature was sufficiently low that the gas could no longer diffuse out of the solid material. Thus the lower ages reflect the cooling interval from the time of formation or, in the case of some of the extremely young sizes, a reheating event that drove off previously formed gas in effect "resetting" the radioactive clock. Radioactive age-dates therefore suggest that meterites formed during a relatively short time interval approximately 4.5 billion years ago, and that some may have been reheated.

CONDENSATION OF SOLAR MATERIALS

In order to understand condensation processes in the primordial solar nebula it is necessary to know the relative abundances of the element prior to and during that event. As has been previously discussed, various classes of meteorites differ from one another by being depleted, or enriched, in a variety of constituents. In order to fully understand the processes of meteorite formation one must determine whether chemical fractionation involved enrichment or depletion. To do this requires quantitative information about the composition of the primordial solar nebula. Is it possible that some group of meterorities is composed of this ancient material? If so which is the best candidate and which groups represent products of various fractionation events that have separated primordial material into chemically distinct entities. Various lines of chemical, mineralogical and textural criteria suggest that type 1 carbonaceous chondrites most closely approximate the average composition of the early solar system, and that with the exception of a few very light elements such as hydrogen and helium this group represents the interstellar gases and dust from which the sun, planets and solar system bodies were formed. Chemical evidence for the primitive nature of type 1 carbonaceous chondrites has been summarized by Anders (1971). The cosmic abundances of individual nuclides in C–1 meteorites varies in a systematic way related to mass, and it is difficult to envision any chemical process that would transform an originally irregular distribution to a regular one. There is a very good correlation between element abundances in C–1 meteorites and both primary cosmic radiation and solar abundances which are thought to have maintained their primordial characteristics. In examining the relative abundances of elements in various meteorite groups it is possible to hypothesize processes leading to depletion of C–1 starting material but difficult to formulate a satisfactory process enriching C–1 relative to other groups. Finally any meteorites containing chondrules are highly suspect as starting materials because the chondrules themselves are depleted in volatile elements indicating a chemical fractionation; C–1 meteorites are the only chondrites that do not contain chondrules. On the basis of mineralogical and textural criteria, C–1 chondrites (as well as other type 2 and 3 chondrites) exhibit no evidence of recrystallization or chemical reaction. They contain many hydrous minerals and organic compounds (non-biogenic) that would be rapidly lost during any reheating or metamorphic event. The minerals present are commonly not in equilibrium with one another, whereas if chemical reactions had taken place they most likely would be.

If in fact type I carbonaceous chondrites do approximate to the composition of the primitive solar nebula it is necessary to determine the processes giving rise to the great diversity of meteorite types that now exist. Within the past decade this problem has been attacked by numerous investigators who have developed theoretical models predicting the sequence of minerals condensing from a high temperature gas (greater than

[1] Brackets following an element symbol enclose the mass (isotope) number.

2000°K of solar composition as it is cooled (for example Blander and Katz, 1967; Larimer, 1967; Larimer and Anders, 1967, 1970; Grossman, 1972, 1975; Grossman and Larimer, 1974). The results of these studies show that there is an orderly sequence in which the elements condense as temperature is lowered. The major elements condensing at high temperatures (the refractory elements) are Ca, Al, Ti and Si which form minerals such as corundum (AL_2O_3 at 1758°K), perovskite ($CaTiO_3$ at 164°K), melilite ($Ca_2Al_2SiO_7$-$Ca_2MgSi_2O_7$ at 1625°K), spinel ($MgAl_2O_4$ at 1513°K), metallic nickel-iron (Fe, Ni at 1473°K) and diopside ($CaMgSi_2O_6$ at 1450°K) (all temepratures in degrees Kelvin at a total pressure of 0.001 atmospheres; Grossman, 1972). Some of the minerals formed at high temperatures actually become unstable and disappear at lower temperatures by reacting to form new substances. For example under the specified conditions corundum becomes unstable at 1513°K, reacting with the remaining gas to form spinel. Between the temperatures of 1400°K and 1200°K many of the major minerals, such as olivine pyroxene and plagioclase condense while at lower temperatures many of the trace metals including Ag, Pb, Bi and Tl, condense. A characteristic pattern throughout the entire sequence is that a given element is almost completely removed from the vapor within a very short temperature interval. In addition various minerals are stable only below specific temperatures. For example magnetite (Fe_3O_4) is stable below 400° and troilite is stable below 700°. This means that within the sequence of condensates are various element and mineral relationships that should provide reasonable estimates of condensation temperatures.

Given this prediction of condensation sequences it is necessary to reexamine the mineral and element associations in meteorites to determine whether or not the predicted relationships are corroborated by natural occurrences. Evidence for the high temperature condensates appeared in a dramatic fashion at 1.05 a.m. on 8 February 1969 when a fireball, visible as far north as Arizona passed over southern Chihuahua, Mexico, and landed near Pueblito de Allende, depositing debris over 300 square kilometers. The Allende meteorite (named, as is customary, after a nearby geographical feature) is a type 3 carbonaceous chondrite containing numerous light-colored inclusions. Detailed examination of these inclusions revealed a variety of the predicted high temperature Ca-Ti-Al minerals including spinel, gehlenite, anorthite, diopside, perovskite, corundum and Ca-Al rich glass. Although spinel and other high temperature minerals had been previously reported in several other meteorites (Grossman and Larimer, 1974, pp. 79–83), the research on Allende drew attention to the significance of these minerals. Marvin, et al. (1970) postulated that they might represent actual samples of the early high temperature condensate, a conclusion subsequently substantiated (e.g. Grossman, 1975). Other geochemical relationships are also explicable in terms of a condensation model. Larimer and Anders (1970) suggest that the compositional relationships among the various chondrite classes can be explained by condensation. Thus the Ca, Al, Mg and Si concentrations in ordinary chondrites (H, L and LL) can be derived by removing 40 percent of the Ca and Al, 23 percent of the Mg and 15 percent of the Si from an original mix having the composition of C–1. This implies that an early, high temperature condensate was not incorporated in ordinary chondrites. Similar controls are postulated by Larimer and Anders for the more volatile elements. They suggest that the observed compositional depletions are related to varying proportions of a high temperature volatile-poor condensate and a low temperature volatile-rich condensate. Although many meteoriticists accept a model containing a mixture of high and low temperature condensates (Wood, 1968; Dodd, 1969) it has been suggested (Van Schmus and Wood, 1967; Dodd, 1969; Wasson, 1972) that the depletion of some volatiles is due in part to subsequent metamorphism (e.g. reheating/recrystallization) of meteorite parent bodies rather than initial condensation temperatures. Correlation between volatile content and petrologic type is cited as evidence for this point of view. In either instance the condensation studies have provided a theoretical model which agrees in many aspects with the evidence observed in meteorites.

Meteorites other than chondrites (the irons, stony-irons and achondrites) represent a far more complicated genetic history. In all instances these latter groups show evidence of severe chemical fractionation, most likely occurring in a meteorite parent body after accretion. Theories of their origin involve additional processes, including melting of parent bodies resulting in the partial or total segregation of metal from silicate minerals and resultant crystallization from igneous magmas.

SOURCE OF METEORITES

The preceding discussion has attempted to indicate some of the applications of meteoritical investigations to the interpretation of solar system evolution. It remains, however, to establish a solar system source for these objects. Several lines of evidence are relevant to this problem: (A) do orbital data suggest a solar system source? (B) are meteorite compositions correlative with other solar system objects? (C) are meteorites ages compatible with a solar system source?

Precise orbital information for meteorites is scanty. In order to make appropriate calculations a meteorite must be photographed from two or more locations. The entries of only three meteorites have been thus documented. In 1959 a meteorite landing near Pribram, Czechoslovakia was simultaneously photographed from several locations. Calculations based upon these photographs indicate that the meteorite had an elliptical orbit with an aphelion (maximum distance from the sun) of 4.05 astronomical units (1 a.u. equals the average distance between the sun and earth, 92,870,000 miles) and a perihelion (minimum distance from the sun of 0.79 a.u.). In order to gain additional information on meteorite orbits the Smithsonian Astrophysical Observatory in Cambridge, Massachusetts, established a series of automatic cameras called the Prairie Network, in the midwest. On the evening of 3 January, 1970, four of these cameras photographed a fireball, pieces of which were subsequently recovered near Lost City, Oklahoma, in the foothills of the Ozark Mountains. One piece was actually found within approximately 700 meters of the predicted impact site. Orbital calculations again indicate an elliptical path with aphelion between Mars and Jupiter (McCrosky et al., 1971). Other fireballs photographed by the Prairie Network and thought to represent unrecovered meteorites also had elliptical paths with aphelia between Mars and Jupiter. Most recently the entry of a meteorites was photographed on February 7, 1977, by the Canadian Meteorite Observation Recovery Project. Fragments were recovered within 0.5 km of the predicted impact location near Innisfree, Alberta, Canada (Anonymous, 1977a, b). Data from these observations indicates that meteorites probably originate within our solar system since objects from without would be expected to have parabolic or hyperbolic orbits (Wood, 1968, p. 8).

The source of meteorites within the solar system is problematic. One potential source is the asteroid belt between Mars and Jupiter. Over 2000 asteroids with well defined orbits have been identified in this region, the largest being Ceres with a diameter of 955 kilometers (Hartmann, 1975). Spectral studies of the asteroids reveal a very close correspondence between them and the various classes of meteorites (Chapman, 1975, 1976) indicating that the surface of asteroids may be similar to analyzed meteorites. The sizes of asteroids (less than 1000 kilometers diameter) correlates well with the size of meteorite parent bodies inferred from cooling rate calculations. A major problem in ascribing an asteroidal source to meteorites is identifying a mechanism which will perturb material from the asteroid belt into an earth crossing orbit. Theoretical calculations by Wetherill (1974) suggest that, on the basis of current knowledge, it is difficult for asteroids to undergo sufficient orbital perturbations within the time period allowed by cosmic ray exposure ages (approximately 10 million years) to achieve earth crossing orbits. Mechanisms proposed for such orbital alterations are associated with perturbations caused by Jupiter. However, the flux of material generated by these effects may not be sufficient to account for the estimated meteorite flux. Apollo objects, asteroids already having earth-crossing orbits, of which 19 have been identified, (Hartmannn, 1975) undoubtedly supply some meteoritic material. But they have a dynamic life expectancy of only 10 million to 100 million years (Wetherill, 1974) so that a continuing supply is still required, which Wetherill, postulates may be, in part, comets. It is difficult, however, to reconcile the mineralogical and textural characteristics of many meteorites with a cometary origin.

The age of meteorites further substantiates a solar system origin. Although it is difficult to determine a precise age of the earth it is 'inferred from multiple and rather complicated observations . . . . that the earth is approximately 4.5 billion years old" (Verhoogen, et al. 1970, p.1). This correlates well with the age of the moon (approximately 4.5 billion years: Burnett. 1975, p. 23) and meteorite ages. This suggests, but does not confirm the possibility that approximately 4.5 billion years ago our solar system was rapidly evolving giving rise to the various bodies present today. The alternate explanation is that the various bodies present today were coincidentally formed at the same time but that their current proximity within the solar system was established at a later date.

Approximately 10 billion grams of extraterrestrial dust strikes the earth each year (Wetherill, 1974) which include approximately 500 "first-sized or larger" meteorites of which only 10 to 20 are recovered and examined by meteoriticists (Wood, 1968, p. 12). Other than the lunar samples returned by the Apollo missions, however, meteorites are our only samples of extraterrestrial material. They have therefore deservedly been studied to an extent far disproportionate to their absolute quantities. These investigations indicate that meteorites formed in the solar system during its early stages of evolution. As the solar gas, initially at a high temperature, cooled various minerals condensed depleting the remaining gas. Theoretical studies have provided detailed insight into the condensation sequence and the nature of the related chemical fractionations. Both high temperature and low temperature condensations are preserved in meteorites, and there is substantial evidence that at least one group of meteorites (C–1 chondrites) closely approximates the composition of the primordial solar gas excluding such extremely volatile elements such as hydrogen and helium. The process of accretion, giving rise to meteorite parent bodies was very rapid (approximately 100 million years) compared to the age of these objects (4.5 billion years). The great diversity of meteorite types is explicable in terms of chemical fractionation of the primitive condensate, chondrule-forming processes (which are

highly speculative), partial melting and associated chemical fractionation and possibly metamorphism in parent bodies. Thus meteorites preserve a record of events occurring 4.5 billion years ago that have been essentially obliterated on earth by subsequent geologic cycles of igneous activity, erosion, sedimentation and metamorphism. They are therefore important clues in determining the early history of the solar system including the earth and other planets.

PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask unanimous consent to have printed in the RECORD at this point the five notifications I have just received. A portion of one of the notifications, which is classified information, has been deleted for publication, but is available to Senators in the office of the Foreign Relations Committee, room S–116 in the Capitol.

There being no objection, the notifications were ordered to be printed in the RECORD, as follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 14, 1978.

In reply refer to: I–14226/77ct.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 78–16, concerning the Department of the Army's proposed Letter of Offer to Canada for major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $11 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA, Director, Defense Security Assistance Agency.

[Transmittal No. 78–16]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Canada.

(ii) Total Estimated Value:

	Million
Major defense equipment*	$11.0
Other	0.0
Total	11.0

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: 123,228 rounds of 81mm ammunition (M374A3) with fuzes.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: March 14, 1978.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 14, 1978.

In reply refer to: I–13467/77 ct.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 78–18, concerning the Department of the Navy's proposed Letter of Offer to the Federal Republic of Germany for major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $7.1 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA, Director Defense Security Assistance Agency.

MR. NICHOLAS CARBONE ON ENERGY AND JOBS

● Mr. McGOVERN. Mr. President, on yesterday the Subcommittee on Energy of the Joint Economic Committee, chaired by Senator KENNEDY, conducted hearings on the relationship of energy development to the creation of jobs.

Testifying before this hearing, which I had the privilege to attend, was Mr. Nicholas R. Carbone, a distinguished member of the Hartford, Conn., city council. Mr. Carbone is one of our most thoughtful urban leaders. He presented a most impressive statement to the committee yesterday, which was interrupted by a rollcall on the Panama Canal treaties.

Since the full text of Mr. Carbone's statement was therefore not given to the committee yesterday, I ask unanimous consent that it be printed in the RECORD so that Members of the Congress will have easy access to this important statement.

There being no objection, the statement was ordered to be printed in the RECORD as follows:

ENERGY AND JOBS

I am pleased to join you today to discuss the role of energy policy in job creation. Our national energy policy is new and incomplete. In two weeks President Carter will announce America's first explicit urban policy. Behind both strategies and programs at the Federal, State, and Local levels must lie a response to our Cities' greatest need: Jobs. Our urban policy must be an investment strategy which creates employment opportunities.

Energy policy must also be shaped to play a central role in the task of urban job creation. As Congress moves closer to the historic adoption of the Humphrey Hawkins full employment bill, the planning tools to create full employment must be utilized to shape our energy policy as a powerful instrument for economic growth.

The board principles of an energy/jobs policy must be fashioned at the national level in cooperation between the Congress and the administration. But numerous state and local governments already have developed prototypes of energy programs that are putting people to work. We need to examine those ideas and implement the best of them in other states and local communities. That effort will require a partnership between all three levels of government.

That partnership must work together to redefine the impact of energy policy on Americans. Energy policy has come to imply penalties, sacrifice and prohibitions that affect some people more severely than others. In the atmosphere of mistrust and resentment that follows, it is difficult, if not impossible, to rally public understanding.

Energy policy does not have to mean unequal treatment and an unfair set of personal sacrifices. Energy conservation can be perceived as a positive step towards eliminating waste and creating jobs for Americans. According to Donald Gilligan, former Assistant Director of the New York State Energy Office: "The Northeast could increase its energy consumption by 40 per cent over the next decade without a single new energy source—by simply eliminating waste." Energy conservation offers local officials and individuals opportunities to increase our options to reallocate capital and natural resources away from wasteful energy uses to job creating activities.

There are 3 basic principles which underline this theme.

1. Waste of Energy eliminates jobs.

2. Capital intensive production of energy eliminates jobs.

3. Lack of a comprehensive national and urban growth policy wastes energy and destroys cities.

Energy consumption and energy waste affect job loss.

In order to understand that relationship, let's look at how inflated costs have limited local government's ability to deliver services. Hartford's experience is typical. Since fiscal year '71–'72, Hartford's budget has increased from $94 million to $130 million. During the same period the consumer price index increased 50.5%—shrinking the value of today's dollar. Our total current budget would equal only $64 million in 1971–72 dollars, and in 1971–72 we were spending $94 million for city services. We have cut back in several ways. We have cut back through layoffs and attrition; our number of man years has been reduced by 20 per cent. We are also delaying replacement of equipment such as street sweepers—which rose in price from $15,000 to $25,000 in five years.

And, at the heart of these inflationary price increases is the rising cost of energy. Since 1971, the cost of fuel oil has gone from 12¢ a gallon to 40¢ a gallon—a 228% increase. The price of gasoline has increased by 168% and electricity by 71%.

As Barry Commoner points out:

"It is no accident that we first experienced double digit inflation when the previous constant price of energy not only drives all prices upwards—it creates uncertainties that delay new industrial investment. It forces economic dislocations that costs jobs. It is a prescription for inflation and unemployment. Here, then, is the real meaning of the energy crisis. It is not a distant prospect of someday running out of energy. Rather, it is the immediate prospect of economic catastrophe."

How can we as a nation avoid that economic and social catastrophe? Massive multi-billion dollar projects such as the Alaskan Pipeline don't seem to be the answer. Neither do proposals to build networks of huge nuclear power plants. Nuclear power plants, Commoner points out, have had to meet a whole series of new safety and environmental protection requirements that were not built into the original design.

These refinements have helped push up the costs of a nuclear power plant by 130% in five years. Since waste and reprocessing problems are still unresolved, nuclear power plant costs will continue to increase. In Commoner's words:

"That explains why nuclear power is the most expensive energy source," and "that is why utilities constantly demand higher rates to raise the huge amounts of capital needed to build nuclear power plants."

Our country also faces severe limitations in the availability and cost of capital. Given the shortage, we must make a choice—will we use the bulk of our capital to build costly nuclear power plants to produce costly electrical power? or will we use our capital in ways that will reduce our energy costs, put our people to work, rebuild our cities and improve the quality of life for most Americans?

If the American people believed that the latter choice were realistic, they would demand that we make it. I believe that that option is realistic, that we can achieve those goals—if we are willing to implement a sensible energy policy.

We must help the American people understand that the lack of a comprehensive national and urban growth policy not only destroys cities, it saps our nation's strength through unnecessary waste or energy. What are the energy costs of unbalanced growth? What are the energy costs of the destruction of our Northeast and Midwestern cities? In Hartford, we have estimated that the total capital cost of replacing our City is 8–10 billion dollars including private and public buildings, parks, streets, sewers, etc. It is ironic that the lack of a national urban policy is systematically destroying this capital base—by forcing people to leave to seek employment; and by underfinancing local governments so that we are unable to maintain our capital investment.

It is ironic that while we all decry the waste of energy, and while we decry the shortage of capital, we are wasting these resources and harming our environment through the absence of a growth policy.

The cost of new housing is exploding yet as we all know, the cost of rehabilitation is dramatically less than the cost of new construction. We also see a water crisis is developing, which I believe could someday overtake the energy crisis in importance in parts of our country—and coincidentally provide the Northeast with the advantage of an unparalleled natural resource. We also see the crisis in the mushrooming capital budgets in areas of high growth, placing unnecessary demands on local taxpayers. All of these phenomena are due to a lack of a comprehensive national growth policy.

We need a national growth policy not only to save our Northeastern Cities but also to save energy. We must understand that cities are inherently energy conserving. Buildings are closer together, reducing energy costs. Apartment dwellings are lower in energy costs per unit than detached houses. Public transportation is more readily available and financially possible in cities and the commute from home to job is shorter.

Given the principles that wasted energy eliminates jobs, that capital intensive production eliminates jobs, and that the lack of a national urban policy eliminates jobs and hurts our cities, what should we do? Our cities are already taking innovative steps towards a comprehensive energy policy at the local level—but they need assistance from Washington. Unfortunately the Schlesinger plan would shift the emphasis away from local governments, and put the responsibility in the hands of state governments. There is a role for the cities, of course, but local government holds the responsibility for building codes, zoning laws and a variety of regulations that have direct impact on energy conservation.

The Schlesinger plan also would place emphasis on the role of private utility companies in retrofitting, weatherization and financing. There are two major flaws in this. First, it does not recognize the role of public utilities in the delivery of water and sewer services. Secondly, electric and gas utility companies need increased revenues to maintain the debt service on existing and future capital expansions. Conservation efforts that have lowered demand also reduced revenues and utilities have responded with rate hikes. Putting conservation in the hands of utility companies would seem to place consumers in the midst of a no-win conflict of interest.

Further, the present winterization effort, deals primarily with middle and upper income people. Tax credits will help the homeowner conserve energy and save money, but the tax credit will not assist the urban poor and the working poor concentrated in apartment dwellings. As energy costs rose, landlords in Hartford began shifting the cost of energy to their tenants, so that 75% of Hartford's tenants now bear the responsibility of paying for their own heat and hot water. This is almost always the case in our poorest neighborhoods. When landlords are not paying heating bills, the tax credit won't motivate them to invest in insulation, storm windows or more efficient boilers. The tenant who is paying the heating bill can't get a tax credit even if he or she can afford to winterize the apartment.

As a result of this situation, at least 50% of our multi-family units won't be winterized nor will they utilize new technologies such as solar collectors.

The Community Renewal Team of Hartford, which operates our winterization program for poor people, estimates that we need $10 million to insulate all sub standard living units occupied by the poor in the Hartford region. Last year CRT's total budget for insulation was $120,000—approximately 1% of the total need.

But, the Schlesinger program is not an energy program for cities nor is it an energy program which places priority on job creation. Let me cite some specific examples of the ways in which energy policy can be used to create jobs. The City of Hartford is establishing a Community Energy Corporation which will hire and train unemployed city residents to retrofit and audit existing structures. We will work on public buildings and hope to branch into homes and apartment buildings in the City and in surrounding suburban communities. We are attempting to change state legislation so that our regional water bureau could contract with the energy corporation to retrofit homes within its jurisdiction. The publicly—managed water bureau can act both as a technical resource and as a capital source for money borrowed at public rates. Secondly, within CEC funds that would be ordinarily considered a profit will be used by the public corporation to conserve energy in poor people's homes and apartments.

It is estimated that the Community Energy Corporation, with a public investment of $125,000, can winterize 1,200 homes on a cost basis. This will create 15 jobs for city residents at a cost per house of $106.00. This results in a total cost per job of public money of $8,400 in the first year. Compare this figure of less than $10,000 per job for CEC with the average cost of job creation for nuclear power. Compare this figure with the $40,000 required in capital to create a manufacturing job. Clearly, energy conservation is job intensive. In addition, the skill profile of winterization makes it a profession accessible to those suffering from structural unemployment.

The second cornerstone of a job creating energy policy must be a massive federal, state, and local partnership to create a solar industry on a job intensive and decentralized basis.

In California, the campaign for economic democracy has sponsored SOLAR cal—a legislative package submitted to the California Assembly. SOLAR cal is a package of 12 bills of which four are central. SOLAR cal would make available, through the utilities, consumer loans at low interest rates. These rates would be set by the Public Utilities Commission and monthly installments on the loan would be no higher than present monthly utility bills.

SOLAR cal would create a public not-for-profit corporation which would use state and federal dollars to make loans to small businesses for the production and installation of solar energy. The $10 million in equity would stimulate the growth of solar energy and capital would be made available to small entrepreneurs and community based organizations. Also, SOLAR cal would establish the use of state CETA funds to finance the

training of personnel for local community development private corporations that would manufacture and install solar equipment. CETA would be used as a way of allocating jobs in the Solar industry to those who most need them. Finally, SOLAR cal would create a commission to provide a plan to solarize California. The California Center for Public Policy has estimated the net number of jobs that would be created in California alone, through the promotion of solar energy. Let's assume a 75% retrofit of homes for solar space and water heating; and 100% solar space and water heating in new residential and commercial construction. It is estimated that the SOLAR cal proposal would create a new number of 378,000 new jobs over a 10 year period beginning January 1, 1981.

CEC and SOLAR cal share two basic assumptions. One, public guidance and public control are the cornerstone of the national energy industry. We cannot afford to have ownership of the sun in the same way we have monopolistic ownership of petroleum by an industry unresponsive to the needs of our people or even the controls of our government. Secondly, SOLAR cal and CEC are based around the principle that energy policy and planning can create jobs for the structurally unemployed.

There are other important national examples. In Springfield, Vt. local officials plan to use seven old mill dams to generate electricity for that town's 10,000 residents. Local officials predict that a series of hydro-electric plants will cut the town's electric bill in half. This plan could be duplicated in small towns and in big cities all across the country. The U.S. Army Corps of Engineers reports that at least 48,000 untapped dam sites could be used to develop electricity. Just 10% of the 3,000 dam sites available in New England could supply enough electricity for the entire city of Boston. Hydro-electric power is safe, non-polluting, relatively inexpensive, produced from a renewable energy source and can reduce the cost of energy for industrial production—helping to hold down inflation.

Wilton, Maine is looking to relatively new technology of solar energy. Wilton is constructing a sewage treatment plant that would use solar energy to heat the building and fuel the process. Methane gas will be produced as a by-product and stored as a back-up fuel. In addition, Portland, Oregon has studied a capital improvement program to see how long-range physical plans for the city could be developed that would accomplish the two goals of reducing city government energy costs while stimulating energy efficient development patterns. Dallas, Texas has developed a set of energy efficient building design standards for all new facilities and structures that are being renovated.

Since energy affects virtually every aspect of our lives—social, economic, political and cultural—a city comprehensive energy plan needs to touch all levels of municipal policy including zoning, land use building codes, transportation, economic development and education. In Hartford we are looking at how we might revise our zoning and land policies. We plan an economic multiple use of structures so that people can work, shop and entertain themselves in the same complex. We are looking at our building codes to determine whether or not the City should require an energy audit on any building that is sold so that energy deficiencies would have to be corrected before transfer of title. The proposal would guarantee that every structure in the city over time would be completely retrofitted.

This City energy policy is being managed by a new standing committee of the Council which involves all nine members. They are actively involved in the study of all aspects of our energy policy including zoning, land use, transportation and job creation.

In conclusion, we must examine what we can do next. What should be the roles of the Federal, State and Local Governments? We need a partnership that involves all three levels of government so that we can create a system which conserves energy, creates jobs and improves the quality of urban life. The National League of Cities has called for federal assistance to cities in the form of direct federal subsidies, and energy extension service, a general revenue sharing plan, and local energy conservation and development banks. The SOLAR cal proposal creates a state role in planning, land use management and as a public capital source. The City of Hartford has created a public capital source as an attempt to engage a city in intelligent energy planning. Hopefully, the President's requirement of a State urban strategy as part of the urban policy will create growth policy.

Finally, whatever is done must be based on the following four principles of action. These principles share a common goal. An energy policy should create jobs, not waste capital. An energy policy should create jobs for those in greatest need, the structurally unemployed. These principles for action are:

1. We should utilize energy sources which are job intensive as a strategy for full employment.

2. A new capacity for state and local government to manage an energy service must be created at a level equally important with existing public services, police, fire and education.

3. Energy growth must be based upon the utilization of public capital. Public capital will both lower the cost of energy saving and more importantly public capital will help to decentralize the control of the energy industry.

4. A national growth and urban policy must be made an effective tool of energy. The policy must support the survival of one of our greatest energy resources—our cities.

Thank you very much.●

SOLAR COALITION LEGISLATIVE PACKAGE

● Mr. HART. Mr. President, I would like to commend to my colleagues the package of legislation which was introduced on Monday by the Solar Coalition, an informal group of Senate and House Members dedicated to the early realization and widespread use of solar energy.

The Solar Coalition compiled an impressive record of legislative successes during its first year. Of nine bills introduced during the last session of Congress, eight have been adopted in whole or in part by both Houses.

In looking at the second coalition package, it would be well to assess where we have been and where we are going in national efforts to promote solar energy.

The United States is a latecomer in harnessing the Sun's power. Many industrialized and lesser developed nations have long used solar energy to compensate for a lack of domestic energy resources. Relatively inexpensive and seemingly inexhaustible supplies of fossil fuels retarded the growth of the solar industry in America.

The Arab oil embargo and the reality of dwindling domestic petroleum reserves compelled us to recognize the tenuousness and vulnerability of a national economy based on limited and interruptible energy sources. This miscalculation was largely responsible for the worst recession this Nation has endured in the post-World War II period.

It was in the crisis atmosphere of 1973–74 that the first landmark solar legislation was enacted into law. The Solar Heating and Cooling Demonstration Act, sponsored in the Senate by the late Senator Humphrey, and the Non-Nuclear Energy Research, Development and Demonstration Act of 1974 established an aggressive Federal program of research, development, demonstration and commercialization of solar technologies. Between 1974 and 1977, the Federal Government commitment to solar energy increased thirtyfold, from $10 to $300 million.

However, there are signs that our national commitment to solar energy is waning. The administration's proposed budget for fiscal year 1979—if adjusted for inflation—actually reduces the national solar effort. Outlays for the various solar technologies still comprise only 3 to 4 percent of the Federal energy budget. Certainly, this level of commitment is not consistent with the realignment of our energy priorities called for by the President in his energy message to the Nation last year.

Mr. President, we stand at a crossroad in determining our energy future. We can continue the "business as usual" approach to the development of solar and other energy alternatives, or we can act now to pre-empt the possibility that interruptions of fossil fuel supplies will cause radical disruptions of the Nation's economy and social fabric. The transition from an economy which is dependent upon depletable fossil fuels to greater reliance on renewable energy technologies will be a monumental undertaking, requiring an unprecedented peacetime investment of the Nation's resources. But a national commitment to solar energy today will ease the transition to a post-petroleum world.

This is the founding premise of the solar coalition. The legislative package which the coalition is introducing today will serve to renew our commitment to the early realization and widespread use of solar energy.

I will be sponsoring several bills in conjunction with the solar coalition in the coming weeks. Among them will be a proposal to promote solar and other renewable energy sources overseas.

Generally speaking, Third World nations are richly endowed with sunlight, have cheaper labor costs and can ill-afford the large capital costs and ongoing currency drain required by conventional energy sources. These nations are ideally suited for the use of appropriate scale solar technologies.

Besides being a benign instrument of U.S. foreign policy, a comprehensive international solar program would also accelerate the development of the domestic solar energy industry.

I will also be introducing legislation to address the issue of solar access. Although sunlight flows unobstructed through nearly 93 million miles of space, it is often impeded in the final few feet before it touches the Earth. Since most of the Sun's rays that reach a particular piece of land strike it at an angle, very little of the sunlight collected by a solar

device comes to it from directly above the land on which it rests.

At the present time, a homeowner whose solar collector is shaded by a neighboring structure may have no legal redress. A solar energy user's legal right to sunlight varies from State to State and is, for the most part, undefined and unclear. A residential solar energy user may be hindered by restrictive covenants, building codes, and municipal ordinances that prevent or discourage the use of solar collectors. The critical question of how sunlight is to be allocated is only now being examined.

Accordingly, I am preparing legislation which would establish a program of Federal matching grants to States for the purpose of conducting solar access reviews, which would permit States to identify legal alternatives to insure access to direct sunlight.

Recent studies have revealed that wind energy is the solar technology with the greatest potential for making an early and significant contribution to the Nation's energy "mix." In the coming week, Senators McINTYRE, DURKIN, and I will be introducing an amendment to the fiscal 1979 Department of Energy authorization bill to greatly expand the present Federal effort to develop this energy source.

Photovoltaics—the conversion of sunlight to electricity—is one of the most promising solar technologies. Despite dramatic reductions in the cost of photovoltaic cells in recent years, they are still too expensive for most common applications. I will be introducing legislation to bring the cost of photovoltaic cells down to a level which would be competitive with utility-generated electricity. Under this proposal, the Federal Government would assist the fledgling photovoltaics industry through systematic purchases of photovoltaic panels for its own uses. If carefully planned, these purchases would create a stable, long-term photovoltaics market which would justify investments in plants and equipment by manufacturers of photovoltaic cells. The Government purchases would be geared to promote competition between different cell designs and production methods so as to continually reduce costs.

Mr. President, these and other proposals should continue the momentum generated by the solar coalition today. It is my sincere hope that Congress will reaffirm its commitment to solar energy through early and favorable consideration of the coalition's legislative package.●

BRIDGEPORT WEATHER STATION—WHAT PRICE ECONOMY?

● Mr. RIBICOFF. Mr. President, in late January the National Weather Service announced that it would close some 19 weather service facilities throughout the country by September 30. This decision was an economy move, a part of a zero base budget effort to reduce Federal expenditures. One of the weather stations to be closed is located in Bridgeport, Conn. Its closing will save six staff positions and an estimated $173,170 annually.

While economy in government is a laudable objective, the closing of the Bridgeport weather station is a particularly ill-conceived move. As the entire Connecticut congressional delegation observed in a letter to Commerce Secretary Kreps, closing this vital weather station on the New England coast will eliminate on-the-scene weather forecasting for the entire Long Island Sound region from Greenwich to Stonington, Conn., and the entire north shore of Long Island.

Other facilities—such as those at Hartford and Boston—cannot properly cover weather forecasting along the Sound. The simple fact is that coastal weather is far different from inland weather. I also understand that the Hartford weather station personnel already have difficulty handling their current assignment and, during weather crises, local officials are unable to communicate with the Hartford station because phone lines are constantly occupied. This is of critical importance as school systems, law enforcement agencies, and other units of local government must depend on the weather forecasts from the Bridgeport weather station, especially during the winter.

The recent winter blizzards which Connecticut has experienced attest to the need for continued, accurate weather monitoring. An inland facility is simply unable to accurately duplicate an on-the-spot installation.

Closing the Bridgeport weather station will be a false economy. I am hopeful, therefore, that the Commerce Department and NOAA will reconsider its decision and maintain this important forecasting activity. In this regard, I am pleased and encouraged to know that the Senate State, Justice, Commerce, Judiciary, and Related Agencies Appropriations Subcommittee will go into weather service reductions at Bridgeport and elsewhere thoroughly when NOAA testifies.

In order that our colleagues may better understand the depth of sentiment in Connecticut on this issue, I ask unanimous consent that two radio editorials broadcast by WELI in New Haven, an editorial from the Bridgeport Post, the Connecticut delegation letter to Secretary Kreps, and statements from two private organizations be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EDITORIAL

What price economy? Back in 1969, the New Haven area lost the weather station located at Tweed-New Haven Airport. We were told then that our weather information thereafter would be coming from the weather bureau at Sikorsky Airport in Stratford. Now we learn that that facility will be closed down at the end of September.

If the events of recent days have demonstrated anything to us it is that the people of Southern Connecticut need a weather station, one that has time and people to accurately report on the weather conditions in our area. We need . . . and will continue to need . . . the up-to-the-minute forecasts . . . that factor in our unique geography, our proximity to Long Island Sound. It is not sufficient to give us forecasts originating from Windsor Locks as the government is proposing. This information misses the target as far as we in the Greater New Haven area are concerned.

We need information that will tell us with precision about the onset of conditions that might require school and commercial closings; information that will enable the boaters in our area to go out on the Sound with confidence in the weather forecasts; information that may be used by pilots who regularly pick the brains of the forecasters at Sikorsky to determine the safety of flying conditions.

It's time to let our elected representatives know that we disapprove of the planned closing of the weather bureau at Stratford; that, as taxpayers, we resent and deplore this shabby treatment.

Write to Help WTLI Save Your Weather, Box 816, New Haven, CT. 06504; we will forward your cards and petitions to our elected officials.

EDITORIAL

Nothing demonstrated more clearly the need for a local weather station than the huge snow storm that struck our area on February 6th.

As motorists struggled to free themselves from mountainous drifts . . . and business and social life virtually came to a standstill . . . as families waited and worried about those who had not yet Made It Home . . . and the collective consciousness of communities dwelled almost totally on the storm and what to do about it . . . decisions had to be made. Informed decisions. Based on fact. Not on conjucture. Not on irrelevant statistics that might be applicable 40 or 50 miles away. Rather . . . the need was for accurate information pertaining to the area in which we live so we could know what to expect from the weather and how to arm ourselves against its onslaught.

No question about it . . . says the city of New Haven's staff meteorologist, Ed Schoonmaker . . . the proximity of the weather bureau at Sikorsky Airport in Stratford was a significant factor in collecting the import data . . . and making the important decisions. And the chief meteorologist at the Stratford facility, Ray Edwards, points out that there are enormous variables between the weather here and the weather in Windsor Locks which would be the source of our reports and forecasts if the government does away with the Stratford bureau. Our position on Long Island Sound causes fluctuations from hour to hour . . . fluctuations which cannot be anticipated, ascertained or forecast from a far-away weather station.

We're sure you share our concern with maintaining the weather bureau in Stratford. Please send your cards, letters and petition in support to: Weather WELI, Post Office 816, New Haven, Connecticut, 06504. This is Frank Moore.

BOATS AND WEATHER

The announcement that the federal government intends to close its weather bureau at Sikorsky Memorial Airport has boat owners up in arms, and for good reason.

Conditions on Long Island Sound can change in a matter of minutes converting a calm sea into churning white water. Without advance warning of impeding storms or changes in the wind, boatmen, be they operators of sailboats or power craft, can be seriously endangered.

The weather bureau provides an invaluable serxice by informing the media of the potential for severe storms, permitting the pru-

dent sailors on Long Island Sound to be informed about weather conditions.

Some of these "salts" have banded together to form "Mariners to Fight to Save the National Weather Service." They join in a common cause with pilots, businessmen, school officials and just plain folk who rely on the weathermen in Stratford to help them plan their daily activities.

Washington continues to say southern Connecticut can depend on weather stations in New York and Windsor Locks for up-to-date forecasts of local conditions.

The boatmen say that's hogwash, and we agree.

The weather station at Sikorsky Airport saves lives and helps mariners protect their property from storm damage, according to the boatmen. Their voice of protest against Washington's verdict joins a loud chorus of petitioners who rightly insist the decision must be reversed.

WASHINGTON, D.C.,
January 31, 1978.

Hon. JUANITA M. KREPS,
Secretary of Commerce, U.S. Department of Commerce, Washington, D.C.

DEAR MADAME SECRETARY: We are deeply concerned with the announcement by Dr. George P. Cressman, Director of the National Weather Service, that the Bridgeport, Connecticut, weather station will be closed no later than September 30, 1978.

Closing this vital weather station on the New England Coast will eliminate on-the-scene weather forecasting for the entire Long Island Sound region from Greenwich to Stonington and the entire North Shore of Long Island. The annual cost for maintaining this station is only $173,170, and it is our firm belief that this is money well spent.

Testifying to its need is the Weather Bureau itself, which stated in 1969 that the Tweed-New Haven Airport weather station was being closed only because Bridgeport's weather station could cover both areas. Currently, Federal Aviation Administration tower personnel at the Tweed-New Haven Airport are required to make 24-hour weather observations. This service will shortly cease.

Elimination of all professional weather services from Bridgeport and New Haven will have a marked negative impact on the entire coastal area described above. We have been informed by Dr. Cressman that the areas in question will be able to rely on the Boston and Hartford weather stations. These two stations constantly rely on updating their forecasts with information received from the Bridgeport meteorologists!

The 1969 closing of the Tweed-New Haven weather station, predicated on maintaining a fully operational Bridgeport weather station, may have been a bureaucratic expedient at the time. However, we will not now be satisfied with the mere explanation that Boston and Hartford will replace Bridgeport's weather station. Those two stations are too geographically remote to provide the type of meteorological service required by the Connecticut and Long Island users who constantly depend on Bridgeport's weather service.

We respectfully request that you look into this situation immediately and that you reconsider the closing of the Bridgeport weather station. Your prompt attention to this very critical matter will be appreciated, and we anxiously await your response.

Sincerely yours,

CONNECTICUT MARINE
TRADES ASSOCIATION, INC.,
March 7, 1978.

MRS. JUANITA M. KREPS,
Secretary, Department of Commerce, Washington, D.C.

DEAR MRS. KREPS: I am writing on behalf of the 200 members of the Connecticut Marine Trades Association to express our strong and total opposition to the proposal to close down the weather station located at Sikorsky Airport in Stratford, Connecticut.

Many of our customers use their boats on Long Island Sound. Many of them are boat owners simply because they are fishermen who enjoy their sport on Long Island Sound. A boat is critical to them if they want to fish. Equally as important to all boat owners using the Sound, given the nature of the weather in this area, is accurate and reliable weather information. If they are out enjoying a day's fishing, they may only have a transistor radio and the weather reports they receive over the radio can be important.

They need accurate information from a relatively local location. The differences between reports from Stratford and those from Bradley Field in Windsor Locks are often significant. Information collected and disseminated from Bradley Field may come too late to the boater on the Sound. On the other hand, information from Stratford can give the boater time to pack up and get safely back to shore before a storm.

Since much of our weather comes from the south and the west, the Stratford location is ideal for covering and warning the Sound, much of which is north of and almost all of which is east of Stratford. For the same reason, weather systems may be on the Sound or close to it before Bradley Field can report them.

In short, a weather station in Stratford is vital to the safety of the thousands of boat owners who use Long Island Sound.

While CMTA applauds the effort to hold the line on government spending, we feel the closing of the weather station at Stratford is both unnecessary and foolish. We urge you to support restoration of the funding for that weather station.

Sincerely,

R. O. PALMER,
Chairman of the Board.

POSITION PAPER TO KEEP BRIDGEPORT WEATHER STATION OPEN

We are surprised and distressed to learn the United States Department of Commerce plans to shut down the Bridgeport, Connecticut weather service station at Sikorsky Airport, as of October 1, 1978. If this decision is to be changed it must be acted upon before March 31, 1978. Budgetary cuts are given as the reason and Windsor Locks (Bradley) as the alternative.

We, the United Boat Owners of America, feel this shut down could be disastrous to the life and property of coastal residents and all mariners using Long Island Sound. We ask you to take the time to read and seriously consider the following.

First, some observations regarding aviation interests.

1. The aviation industry at Sikorsky will not be comfortable at a sub-standard airport. And some may be forced to move to Hartford or, more probably, Westchester.

2. Instrument landings (ILS) will no longer be practical. While this could be overcome by an FAA "observer", it borders on amateurism. and offers no protection for transient recreational and business pilots who would be prohibited from landing if no "observer" were available.

3. Coastal weather is far different from inland weather. There is no way that Bradley can accurately duplicate an on-the-spot installation.

4. Student and "low time" pilots rely heavily on the weather station for planning cross-country flights. They actually visit the station, pore over the weather charts and discuss their flight with the weather personnel. They are very concerned about having a safe flight and many would be in trouble if they encountered bad weather.

But, we are even more concerned about coastal residents, and mariners in particular.

At present, mariners using Long Island Sound do not have access to current weather information. The "stale" weather they do get is usually too general to be reliable. They listen to their household radio and tune in disc jockeys or news programs. Many have purchased a weather radio and listen to NOAA (New York 162.55 FM) and get a 3 to 4 hour old marine report covering 6,000 square miles, from Block Island to Manesquan, that includes Long Island Sound and New York Harbor.

In short, the quality of weather information for mariners is a disgrace. The irony is that the information already exists, but is not accessable to the mariner.

On behalf of our Connecticut and New York members and all mariners and Coastal residents living on or using Long Island Sound, we ask your support to make current weather information available to all.

To this end, UBA proposes the following.

1. Sikorsky (Bridgeport) weather station must remain in operation.

2. Sikorsky (Bridgeport) weather station be included in aviation weather reports.

3. NOAA weather (N.Y.C.) at Rockefeller Center be directed to retape the aviation weather broadcast, add it to their own weather report, and continue to broadcast on 162.55 FM (popular weather band).

4. NOAA weather (N.Y.C.) at Rockefeller Center be directed to upgrade reports hourly between the hours of 6AM and midnight.

The foregoing proposals would cost nothing. NOAA (N.Y.C.) already broadcasts on tape, as does aviation weather. The end result would be hourly weather for all when they need it.

In closing, we again ask your support. The good that will come from keeping this weather station far outweighs the cold indiscriminate decision of a budget cut.■

ALCOHOL FUELS

Mr. BAYH. Mr. President, yesterday I shared with my colleagues my sharp sense of disappointment with the Department of Energy's progress to date in the alcohol fuels area. At that time I included copies of testimony given at Appropriations Committee oversight hearings on alcohol fuels which I chaired on January 31, a copy of the Department of Energy's recently released position paper on alcohol fuels and a copy of S. 2400, my National Alcohol Fuels Commission bill. I inadvertently failed to include a copy of a letter I sent to Secretary Schlesinger which indicated my dissatisfaction with the Department's progress.

Mr. President, I ask unanimous consent that a copy of the letter I sent to Dr. Schlesinger be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON APPROPRIATIONS,
Washington, D.C., March 16, 1978.

Hon. JAMES SCHLESINGER,
Department of Energy, Washington, D.C.

DEAR MR. SECRETARY: I know that you and I share a mutual concern about the very real possibility of a liquid fuels shortage sometime in the 1980's. Last spring when the President unveiled the National Energy Plan, he emphasized the importance of an effective national energy policy and compared the effort needed to meet this challenge with the "moral equivalent of war." I have been encouraged by the high priority placed by the President on resolving our energy problems and have strongly supported most of his efforts over the past year.

One crucial ingredient missing from the National Energy Plan was an accelerated program for introducing a mix of alternative energy sources—especially liquid fuels—into our energy budget in a timely fashion. In light of this earlier omission. I have welcomed the Department's efforts this year to fashion a near-term program to assure development of substitutes for our diminishing fossil fuels.

As we look toward the future, I think it is clear to most of us that there is not going to be one answer to our energy problems, but that future supplies will come from a number of diverse sources. Those of us with responsibility for shaping government policy owe it to the Nation to explore every option available to us as thoroughly as possible.

As you know, I believe that utilization of alcohol fuels in a variety of settings is a near-term option that has not received the attention it merits. I have no doubt that alcohol fuels can become efficient and economical energy supplements with a relatively small federal investment if we apply our best technology to this effort.

In light of this conviction, I am quite disappointed with the Department's efforts to date to explore the potential of this alternative fuel. I have just received the Alcohol Fuel Task Force Position Paper on Alcohol Fuels. The Position Paper contains no information beyond what the Department submitted in response to the alcohol fuels Appropriations Committee oversight hearings which I chaired on January 31. Moreover, it was not accompanied by the revised program plan and budget information associated with it that the Committee requested at that time. It does reflect a lack of effort, commitment, and foresight with respect to this energy source on the part of the Department, which I find disturbing. It also indicates that DOE has made no discernible progress on alcohol fuels since last fall when the Task Force was formed.

I would hope that the Department will, in fact, take a fresh look at this area, as your witnesses in our January hearings indicated. I reiterate my request that DOE move imaginatively and aggressively to tap the energy potential of our most abundant and renewable resources.

I look forward to receiving the remainder of the Task Force Report, which I understand contains a revised alcohol fuels program plan and indicates what resources the Department would need to meet the Task Force goals.

I seek your earliest possible reassurance that the Department will move to meet its responsibilities in this area. I hope that you will construe these comments in the constructive manner in which they are offered. I will do whatever I can on this end to help you out and would like to proceed as allies and not adversaries.

Sincerely,

BIRCH BAYH,
U.S. Senator.●

INDEPENDENCE FOR LITHUANIA

● Mr. RIBICOFF. Mr. President, I join with the more than 1 million Lithuanian Americans across the Nation in celebrating the 60th anniversary of Lithuanian independence.

Lithuania has a rich, vital heritage dating back over 700 years. When independence was declared by the Republic of Lithuania in 1918, it was a testimony to the perservance of the Lithuanian people and the strength of their struggle against foreign domination. The next twenty years saw the Lithuanians thrive in their political freedom. They prospered in the absence of economic oppression, and their culture flourished. The forcible annexation of Lithuania by the Soviet Union in 1940 crushed all apparent signs of independence.

The denial of self-determination and the repression of dissent continue today, and the prospects for change rarely improve from one year to the next. Yet the desire for independence within the hearts of the Lithuanian people has never lessened. Though religious and political freedoms are only a distant goal now, the Lithuanians have never ceased their dedication to that goal. Thousands of Lithuanians last year spontaneously demonstrated in the streets of Vilnius for their basic human rights. Even though Soviet troops crushed this uprising, it was a graphic example that the Lithuanians will never accept repression as a way of life, nor will they let their freedom be compromised. Such determination to maintain their national identity has earned the Lithuanians the respect of free men everywhere. It has also fueled the struggle of Lithuanian Americans who work tirelessly for the establishment of a just society in their homeland.

President Carter and his administration have continued the longstanding U.S. policy of nonrecognition of the forced incorporation of the Baltic States into the Soviet Union. With human rights as a basic point of our foreign policy, those rights recognized by the Helsinki agreements deserve constant attention in Eastern Europe. The legitimate aspirations of the Lithuanian people cannot and will not be satisfied by empty gestures from Soviet leaders. We must insist on the reuniting of families, to urge release of political prisoners, and to permit the practice of religion without the threat of reprisals.

Mr. President, it is fitting that Americans of all heritages join with Lithuanians in proclaiming their proud struggle for self-determination and basic human rights. Their past accomplishments and their present efforts will never be forgotten. With our help and the help of freedom-loving peoples everywhere, their dream will some day be a reality.●

INDEPENDENCE FOR ESTONIA

● Mr. RIBICOFF. Mr. President, I salute the Estonian people and their commitment to self-determination on the 60th anniversary of the Declaration of Independence of Estonia.

After defending their nation against foreign aggressors for nearly 2 years after their independence was declared, the Estonians were finally able to celebrate this freedom in 1920 with the adoption of a democratic constitution and a series of reforms aimed at establishing a democratic society.

Like its Baltic neighbors, Estonia suffered the forcible annexation of its land by the Soviet Union in 1940, never to regain this lost freedom. But no foreign power could deny the Estonians their desire to be free. Though the Soviets have attempted to convince outsiders that Estonians enjoy complete freedom today, their gestures have not subdued Estonian desire for true independence.

Estonians have suffered under Soviet domination—forced relocations to isolated areas, denial of human rights, and attempts to obliterate the last vestiges of the once thriving Estonian culture. In view of this suffering, the courage and determination of Estonian Americans who work to keep alive the Estonian heritage deserve our support.

The history of the Estonian peoples' fight for freedom serves as an inspiration to the entire world. We must continue to voice our concern for the treatment of these people and focus attention on their plight. If others can capture the commitment of the Estonians themselves their struggle may yet be won.●

MACHINISTS' PRESIDENT WINPISINGER ON ENERGY AND JOBS

● Mr. McGOVERN. Mr. President, on yesterday, the Subcommittee on Energy of the Joint Economic Committee, chaired by the distinguished Senator from Massachusetts, Senator KENNEDY, conducted hearings on the relationship of energy policy to the creation of jobs. As a member of the committee, it was my privilege to participate in these important hearings.

One of the witnesses who testified on yesterday was Mr. William Winpisinger, president of the Machinists Union. Mr. Winpisinger is one of our most creative, courageous, and effective labor leaders.

I ask unanimous consent that his provocative statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

DETAILED STATEMENT BY WILLIAM W. WINPISINGER

Mr. Chairman, Members of the Committee: My name is William W. Winpisinger. Since July 1977, I have been privileged to serve as International President of the International Asscciation of Machinists and Aerospace Workers.

IAM membership is found in nearly every sector of the U.S. industrial complex—aerospace, air transport, automotive, construction, electronics, light manufacturing, metals fabrication, machine and machine tool, tool and die, maritime, shipbuilding, nonferrous metals and mining, and railroads.

All these industries are highly sensitive to energy supplies, sources and prices. The nation's energy policies, or lack of them, directly impact the jobs, income and security of IAM members employed in them.

Regrettably, it is not possible to report in any definitive way, or to quantify by sector of Industrial Occupation category, just what the extent of energy impact is on the IAM membership; except in a negative way. We learned, for example, that some 15 to 18 thousand IAM members in Ohio were idled from work for approximately two weeks during the natural gas shut-off in the winter of 1976/77. In 1974 during the oil embargo, we learned that 2000 air transport workers were idled when the airlines used the scare as an excuse to curtail marginally profitable and unprofitable flights and schedules. We also learned during the embargo scare that some 8000 civilian aircraft manufacturing employees suffered reduced worktime, layoffs and loss of income, due to an emergency low priority for fuel for civilian light aircraft aviation purposes.

Not only do we not know the impact of energy inputs and alternative energy sources on employment within industries where we

have members, we are appalled to learn that there is no definitive analysis or study for the nation on a macro basis. The Department of Energy has made no such study. The Office of Management and Budget has made no study. The Commerce Department has no study. The Bureau of Labor Statistics has no study. And the Congressional Research Service has no energy/employment analysis or study.

In effect, Mr. Chairman, what we have is the evolvement of a national energy policy, albeit it is far from coherent, that concerns itself with control, allocation, prices and profits, but utterly fails to take into consideration its impact on the human factor of production.

We can develop the most profuse energy production and utilization program conceivable, but if it results in widespread displacement of human labor, what good will it do?

As Richard Grossman and Gail Daneker have pointed out in their study, *Guide to Jobs and Energy*, industry has historically substituted energy for labor. After substitution for labor in each process of the production chain, the total number of workers needed for production decreases. (See Appendix A.)

This fact alone seems to contradict the current industrial management argument, and of government spokespeople, too, that "more energy leads to more jobs."

According to Grossman and Daneker, greatly increased energy consumption in primary metals; stone, clay and glass; food; chemicals; and paper products has resulted in static or declining employment over the past 20 years. They note the same for steel, aluminum, and agriculture. They also note that between 1961 and 1973, electric utilities increased their kilowatt output by about 130 percent, their revenues by 260 percent, their construction costs by 340 percent. But employment in electric utilities increased only 21 percent.

Indeed, productivity is linked directly to industrial energy consumption. And, herein lies the dilemma of IAM members and working people in general. As the productivity index goes up, jobs and job opportunities appear to decline.

Further, it is no longer safe to say, as we often do, that displaced production workers will find employment in service industries. Will they find employment as supermarket clerks? Boxed beef and packaging machinery are replacing meatcutters and stock room clerks. As bank tellers? Electronic fund transfers and automatic drive-up windows are taking over. Centrex has already replaced telephone operators. So has taped and prerecorded messages. And computerized switching and billing systems are displacing thousands.

In the IAM, direct job loss is coming about in the highly skilled stamping, machine tool and tool and die industries through the Numerical Control (computerized) tools and automated control panels. The energy required to operate these machines is electricity, and electric consumption is on the increase. But the number of jobs decreases.

The point is, increased energy consumption may not create jobs in the economy. There may not be a correlation between energy growth and the economy. Certainly it is true in certain microeconomic instances.

At this stage of the game, on a macro-basis no one knows for certain. But we should know. It is time, perhaps, to begin focusing on energy efficiency, rather than labor efficiency. A good share of the energy supply problem may be found in wasteful, expensive and mismatched uses of energy. Such a focus may save jobs as well as en-energy.

Lack of reliable energy—employment impact data not only inhibits the deliberations and proceedings of this distinguished committee, it also impedes development of a comprehensive national manpower policy and achievement of a full employment economy. The latter, one assumes, is what really matters.

It would seem reasonable to suggest that the Bureau of Labor Statistics in the Department of Labor and the Department of Energy form statistical analysis and support groups to provide the Executive, the Congress and the public with reliable energy impact data.

Similarly, it would seem reasonable to expect that national energy programs emanating from the White House would include employment impact analyses, and that future energy development, conservation and conversion proposals and programs would contain job impact analyses. There is no other way for working people and trade unions to compare the relative merits of one energy source with another.

But working people are not only concerned with their jobs, they are also concerned with the prices they pay for home energy uses. There was a time when nonprofit consumer-owned and publicly-owned power and utility agencies and systems provided a cost yardstick, against which costs and rates of private investor-owned utilities could be measured. In that way consumers and regulatory agencies had some objective means to determine when excessive consumer rates and rate increases were occurring.

That yardstick principle has been seriously eroded over the past two decades, an erosion due in no small part to a lack of access to valid investor-owned cost and financial data. If measurement of energy efficiency is to be realized, if working people are asked to sacrifice their jobs to greater energy inputs and if consumers are to be asked to pay for energy development and conversion projects, then it is only fair that they be given information which comes from a source other than the energy companies and utilities themselves. So we would recommend that Department of Energy or perhaps SEC make this data available on a regular and timely basis.

Working people are also dependent on energy for transportation to and from work. Gasoline and oil prices are a large part of their "costs of doing business." Energy orthodoxy requires them to continue relying on gasoline for the bulk of their transportation needs, at least until the year 2000. Any new technologies with respect to auto fuels is not seriously considered, although conservation measures such as speed limits and fuel consumption (mpg) standards are. Meantime, the petroleum glut has not noticeably reduced gasoline pump prices, which soared 77.4 percent from the beginning of the OPEC embargo through first half of 1977. Profits of leading oil companies during the same period increased an average of 103.4 percent, while average weekly earnings for workers increased 38.5 percent over that nearly six-year period.

It is amazing how the economics of scarcity and the law of supply and demand inevitably redound to the profit ledgers of the energy companies and the glory of free enterprise.

ENERGY OVERVIEW AND COMMENTARY

Growth demand for energy is based on orthodox assumptions related to population and GNP growth. The assumption is that energy demand increases exponentially over time, and must, if the production of goods and services is to keep pace with increases in the number of people and their needs and demands.

In the near future, that is up until the year 2000, it is assumed by orthodox analysts that energy supply will lag behind demand. How they can be certain is questionable. Available figures describing supply and reserves of fossil fuels and uranium appear to be under the control of and dominated by the energy companies. It is to their advantage to understate reserves and current production. It is further assumed that up until the year 2000, the major portion of our energy supply must come from known and developed technologies. This assumption is based on a historical precedent that 20 to 30 years is required from development of a new technology to its commercial application.

Hence, according to the orthodoxy, in the near future, our energy supply must continue to come from fossil fuels, nuclear reactors, and hydro electric power.

The fallacies of these assumptions appear to be several. First, there is currently an oil glut, due to stepped up domestic discovery, Alaska pipeline and North Sea oil production, and the federal strategic petroleum stockpile program. (Energy Preparedness).

Secondly, the production of coal and conversion from natural gas to coal-fired industrial and electric generating plants has increased. Western strip mining of low-sulfur coal has increased and, until the recent strike by coal miners, eastern deep mining operations were on a sharp upswing.

Third, natural gas reserves, according to industry sources, appear to be declining, but, natural gas producers argue, if prices are deregulated, then they can greatly increase their supply. Apparently, the answer to this riddle will become known when Congress makes its decision on deregulation. If natural gas prices are deregulated, then one is left to surmise that the producers will release a new set of supply figures, which will relieve the natural gas shortage. How much natural gas may actually be in the ground, will probably remain a mystery for decades, or until someone other than the producers make the surveys, gather and report the statistics. In any case, following the producer's logic, we should expect increased natural gas production in the near future, if the price they are exacting is met. The issue clearly is one of price in the near term, rather than supply, and the shortage is in the figures, not in the ground.

In the case of nuclear energy, fission currently provides about nine percent (some sources say one percent—it depends upon whose figures one uses) of national needs. Industry and government proponents of nuclear power project that it will provide 20 percent of total electical energy by 1985 and about 50 percent by 2000. These projections are based on the assumption that there are sufficient domestic uranium reserves to feed some 232 planned nuclear plants, an assumption which may be open to doubt, if Canadian sources of uranium cannot be tapped. Again, the energy companies supply their own figures, so there is no objective way of knowing the extent of uranium reserves. Some existing fast breeder reactors are already judged to be technologically outdated, but industry and orthodox experts are touting fission on the basis that, by the time uranium reserves are depleted, a breeder reactor which converts unusable uranium into plutonium, will be on the line in force. In the meantime, the federal government will have to have overcome critical safety and waste disposal problems. This is a little bail-out program destined to cost taxpayers several billion dollars by 1985, the earliest possible date for permanently disposing of nuclear wastes, according to OMB.

But again we have a basic contradiction between the orthodox economic assumption of scarcity on the one hand, and industry assurances of a plentiful supply of nuclear energy on the other.

It is the kind of double-think and contradiction that permeates the economics of the entire energy industry.

As for nuclear fusion, there is no known way to control the one-million degree heat and energy release that would make it useful. For this source, the experts are right. There won't be a significant increase in supply of energy.

Orthodox thinking gives little credence to geothermal, wind, and solar power, in our energy future. Noxious gases, excessive salinity and land surface collapsing are said to prevent substantial geothermal development. Wind once generated electricity and pumped water on millions of American farms, but it is now argued that to generate one megawatt of power requires a windmill of 180 feet in diameter on a 200 foot tower, with an average wind velocity of 30 miles per hour. Thus, thousands of towers would be needed to replace one coal generating plant. Perhaps, but think of the jobs that could be created in manufacturing if farmers went back to using their own individual windmills.

Solar energy gets more attention than geothermal or wind, but even so, it is predicted that by 2000, only one-third of new construction and one-third of old construction will be fitted with solar heating systems. It is conceded by the orthodoxy that solar heating will play an increasingly larger part in meeting future energy needs, but we are cautioned not to be overly optimistic about solar heating systems, since the energy supplied for this purpose would be only about five percent of the national energy need.

There is a curious observation to be made in this survey of the orthodox assumptions underlying our present energy policy. Apparently there is no prospect of supply ever catching up with demand. Of the fossil fuels, it is said the petroleum supply will be exhausted, possibly within 30 to 40 years; natural gas supplies will be exhausted, possibly in 10 to 20 years; coal will be exhausted, possibly within 300 to 500 years. Hence, we can see why the President's National Energy Plan puts so much emphasis on coal.

About nuclear power, it is said that conventional fission reactors will exhaust their low-cost fuel supply (uranium) possibly within 30 to 40 years. Fast breeder reactors are thought to be able to greatly extend the potential fuel supply (plutonium) of fission reactors, but none say it will be low cost and safety and waste disposal problems, as well as the President's non-proliferation desires, must be solved. Fuel supply for fusion reactors is virtually unlimited, at what cost is unknown, but fusion's feasibility is still to be proven.

It is said that the number of sites for future hydroelectric power is extremely limited, but overlooked is the fact that only 800 of 50,000 dams in the U.S. are licensed to produce power. Thus, there would appear to be a great deal of potential if existing dams were to be fitted with turbine generators. That would create a considerable number of jobs in electrical machinery and electrical equipment manufacturing, construction and maintenance. Power generated at small dams could be used for individual industrial units or possible even individual farm needs. Or it could be used as peaking power for larger systems.

Neglected in the orthodox survey of power sources are synthetic petroleum products produced from coal, although a number of energy companies are currently engaged in government-funded synthetic research and development projects. It is conceivable that synthetics will supply a significant portion of not only energy needs, but petrochemical needs in the near future. Coal gasification demonstration projects are already in existence. Synthetic motor oil is on the market in limited supply and petroline, a synthetic gasoline, may be marketed next. DOE Secretary Schlesinger has unofficially put priority on creation of a liquid fuel replacement for the transportation sector.

All liquefied natural gas (LNG) does not have to be imported. There are remote areas of the U.S. where it might be economically feasible to process it, too.

Overlooked also is biomass energy, which could be a significant source of energy on farms and ranches and in small rural communities, assuming they are given the means and initial funding to construct and operate biomass plants. Loans and grants are now available for rural and small community water and sewer systems. Electric generation from biomass and solid waste disposal plants could similarly be funded, thus creating jobs and job opportunities in thousands of depressed rural communities. And the research and development, design and engineering, construction and manufacture of these small generating plants would create thousands of jobs upstream.

But one should focus more closely on the development and utilization of solar energy. There are two basic systems for solar energy production. One is at hand and familiar. That is terrestrial solar power. The second is in the research and development stages and futuristic. That is Solar Power Space Satellites.

First, all the technology necessary is in hand for terrestrial solar power development for hot water and building heat. Many firms are already marketing solar home heating and hot water heating systems. The American Solar Energy Association has outlined a comprehensive federally assisted program to have 11 million homes in America fitted with solar hot water systems by 1985. This contrasts with President Carter's goal of 2.5 million homes by 1985 and DOE Secretary Schlesinger's goal of 1.3 million solar homes by 1985.

The State of California, by the way, is well on the road to solar home heating and will have more solarized homes in 1985 than the entire nation.

In Japan, 2 million homes have solar hot water heating. Israel has 200,000 solar homes. And Australia requires that solar heating units be installed on all new buildings constructed in the energy-short northern provinces.

There is absolutely no reason why technology should be used as an excuse to delay or prevent the installation of solar hot water and building heating systems. It must be promising, for an energy giant such as Exxon to already be in the business. And a giant aerospace firm, Gruman Corp., is on the market with solar passive and active building heat systems. (A passive system stores energy where sunlight strikes building walls or floor or roof and is capable of providing 80 to 100 percent of a structure's space conditioning requirements, but cannot easily be added to existing structures. An active solar system can be bolted onto roofs or walls of existing buildings and can supplement conventional furnaces, by moving, with fans and pumps, solar heated air or liquid to storage areas, from which the heat can be withdrawn as needed).

Solar is also being applied industrially, at a soup canning plant and in laundries and car washes in California; at a fabric drying plant in Alabama; at a concrete block factory in Pennsylvania; and for pasteurization at a brewery in St. Louis.

According to the American Solar Energy Association, the potential for solar application is 45 million homes, 10 million apartment houses and 15 million commercial and farm buildings, which could be retrofitted, and 2 million new structures built each year.

The beauty of solar is that it is renewable, nonpolluting and its installation is labor intensive.

In fact, the Solar Energy Association, in testimony before the House Committee on Small Business, has very forcefully demonstrated that conversion to solar energy can be looked upon as major employment program for the hard core, low and semiskilled unemployed. But a major solar conversion effort would also provide thousands of jobs for skilled carpenters, sheetmetal workers, plumbers and other building tradesmen who are suffering from chronically high unemployment. Upstream from installation, thousands of fabricating and manufacturing jobs would also be created.

The Solar Heating and Cooling Demonstration Act of 1974, has been in operation for three years now. The technology and reliability of solar heating and cooling have been proven. The major barrier to an all-out solar conversion program is front-end money for mass production and marketing and initial installation costs for consumers. In terms of employment, taking the strain off the advertised "shortage" of fossil fuels, and nuclear power, it is sound economics and common sense for the federal government to boost solar power on a massive scale.

There are two precautions that should be taken however. One is that the giant energy companies are already casting a covetous eye upon solar. This is in line with their "total" energy concept. The established energy companies should not be permitted entry into the solar industry. If they are permitted entry, it will be just a matter of time before history repeats itself and the cost of solar power will be pegged to the monopolistic price of petroleum, natural gas, coal and uranium. Solar power must be the people's power. Solar power must restore the low-cost competitive yardstick that has been missing from the energy scene for over two decades.

The second precaution is that, in its infancy, the solar power industry will be highly susceptible to confidence games, quick buck artists, and sham manufacturers and installers. The industry and consumers must be protected against these opportunists and predators, through an enforceable licensing system at the state and local levels. Warranties for work, parts, service system performance and safety must be strict and adhere to standards promulgated and for review by the Consumer Product Safety Commission, Bureau of Standards, and Housing and Urban Development Department.

The far term future for solar power may be further augmented by the Solar Power Satellite. Futuristic in concept and design, the Solar Power Satellite is at least as feasible at this stage, as is nuclear fusion. Simply put, the idea is to put a large satellite in geosynchronous orbit some 22,000 miles above the earth. In that orbit, the satellite is constantly illuminated by the sun. The solar rays are converted to electricity by an array of solar cells or photovoltaic cells, which generate electricity directly when sunlight falls on them. The electricity is then transmitted to an Earth receiving site, from where the power distribution system will fan-out to communities and homes. It can be tied-in with existing transmission and distribution systems. Huge and heretofore unknown amounts of electric power can be generated by this method—several satellites could produce more electricity than all other alternative sources combined now produce.

Barriers to Solar Power Satellites becoming reality are large. The first is a safety and environmental problem stemming from the microwave beam which would transmit the energy from space to the earth collector. Microwaves can be extremely hazardous if not kept within minimal strength tolerances. Microwave environmental-effects experiments have yet to be completed and the danger eliminated. A second barrier is the cost of the program. Such an undertaking is similar in scope and cost to the Apollo program, or from $60 to $80 billion. At this early stage, electric power from the Solar Space Satellite is not cost-competitive with other sources.

Since the technology to develop the system is at hand, and since its development would provide socially useful employment for a large corps of highly trained scientists and engineers and highly skilled technicians and craftspeople, research and development funding by the federal government ought to be encouraged, and expanded. Currently

some 12 or 15 aerospace firms have been or are involved with Solar Power Satellites. However, if solar power is to be the people's power, one would expect such a vast publicly funded program to be federally-owned and operated, rather than the property of a few private corporate giants.

As a general statement, when the survey of growth demand, development status and prospects for future energy from all sources is completed, one can only conclude that all sources must continue to be developed, with as much public benefit emphasis as possible. Until employment impact analyses are made, until supply, demand, reserve and private cost and financial data are reliably reported, then working people have no choice but to accept the assumptions of orthodox economists and energy experts.

For if the lights do go out, or the power is shut off, or the oil does stop flowing, working people will be the last to know and the first to find it out.

CONSERVATION

Meantime, there are certain conservation measures which can be undertaken to prolong the life of nonrenewable resources, and hopefully will delay further increases in energy prices.

A functional definition of conservation is taken from Dr. Duane Chapman, in *Energy Conservation, Employment and Income,* published last year.

"Conservation in a philosophical sense has taken two partly contradictory meanings, one emphasizing the preservation of natural environments and the other giving its concern to the public interest in the proper management and development of natural resources."

Energy conservation, therefore, is not simply a matter of "returning to earth" principles. It is not a no-growth economic principle. It is not a return to the horse and buggy days or some idyllic and pastoral early 18 Century never-never land.

Energy conservation is not abandonment of the nation's technology base, nor the impediment to future technological development. It is not lower living standards or a downgrading of skills and wage and income levels.

It may be development and mass marketing of the electric automobile. It may mean the upgrading of skills and income levels of mechanics, tradespeople and workers in general.

Energy conservation is more than turning off lights, abiding by speed limits, setting the thermostat at 65 degrees and wearing warm woolen sweaters indoors. It is corporate responsibility to refrain from non-competitive and price gouging practices. It is corporate responsibility to serve the consuming public first, at the expense, perhaps, of profit maximization. It is government responsibility to regulate the regulated in the interest of the public and social accounting system.

Energy conservation is a greater sharing of privately held, whether usurped or purchased, resources, with members of the public at large.

CONTROL OF ENERGY COMPANIES

If we are to get a handle on the mind-boggling dimensions of the energy issue, then we must somehow rise above the laws of economics that are distorting the discussion.

We must, instead, raise the issue on ethical grounds. We must infuse and elevate the discussion, to the plane of justice and equity. These human values must become the common denominator in solving the energy crisis.

With that understood, we can then reduce the problem to five manageable components. These five components of the energy problem are: Control, allocation, prices, profits, and sacrifice.

Control is the key to the other four elements.

The energy companies seized control of the oil industry at the turn of the century. That is well known. What may be less well known is that they became multinational oil companies after World War I, when they, with considerable and indispensable help from the U.S. State Department, gained valuable concessions in the Mideast. They were in Mexico before that. One of the historical amazements of that turbulent period in Mexican history is that the American oil interests were able to prevail upon both sides of the Mexican civil war to preserve their oil fields and pipelines. Apparently that is what General Pershing was doing down there. In reality, the Punitive Expedition was an oil preservation operation.

Another measure of the control and power of the oil interests occurred during World War II. Allied forces were alarmed by fuel shortages. The Roosevelt Administration proposed public acquisition of the holdings in Saudi Arabia. That made eminent sense in terms of national security and the war effort. But it didn't make sense to the American oil interests. Operating from within the war councils, they torpedoed that proposal, and another, which called for construction of a government-owned refinery and pipeline in the Middle East. They termed public ownership as "fascist" and argued it would shackle "free enterprise." Standard Oil of California, Texaco, Jersey Standard and Mobil blocked the effort. The concern was not the war effort, rather it was control over the supply of crude and the mischief it might cause to their pricing policy if the government delivered and sold to independents outside the fraternity.

Now Franklin D. Roosevelt was a powerful President. World War II was a powerful cause. But the oil companies were more powerful than all.

These are but two of many historical examples which demonstrate what we mean by control, with control meaning power. The oil companies have it and the government and people do not.

Currently, the multinational energy companies maintain and perpetuate their power through the manipulation of at least five levers of power.

First, Exxon, Mobil, Gulf, Standard of California and Texaco are, for all practical purposes, part and parcel of the OPEC Cartel. Along with British Petroleum and Royal Dutch Shell, they comprise the "seven sisters," who've dictated production, distribution, sales and prices since the 1920s, for Iraq, Iran, Saudi Arabia, and Kuwait.

All are vertically integrated, i.e., they not only drill and pump crude, but they refine, transport and sell petroleum products through their own retail outlets. "From the wellhead to the gas pump" is the common expression.

In spite of the Arab embargo, in spite of the takeover of the oil lands themselves, by the Saudis, the Iranians and others, in spite of the OPEC countries arbitrarily increasing the price of crude fourfold, in spite of all this, Exxon, Mobil, Standard of California, Gulf and Texaco remain in the Middle East doing business as usual and enjoying the new artificially high world prices for oil.

And to remain there, they have had to influence, if not dictate, U.S. foreign policy, while assuaging the chauvinistic temperaments of kings, shahs and sheiks.

The companies are in Venezuela and Canada, too, and in Algeria and Indonesia and Alaska and the North Sea and the Antarctica. But they have used the OPEC Cartel as a scapegoat to absolve themselves from any responsibility for the energy crisis and all the while they are part of it and reaping its benefits.

A second lever of power used by the energy companies is the joint venture. There are domestic joint ventures and foreign joint ventures. There are horizontal joint ventures and vertical joint ventures. There are temporary and permanent joint ventures.

All are used for one primary purpose: to reduce the rigor and risks of competition.

The joint venture is not a subsidiary; it is a step child; it is a separate corporate enterprise in which the bulk of the stock is owned by two or more parent companies.

There are joint venture pipelines; joint venture refineries; joint venture exploration companies and joint venture bidding combinations for offshore and oil shale leases. The Alaska Pipeline is a joint venture.

This joint activity would seem to be prima facie evidence of anti-competitive abuses. Yet Congress and the Department of Justice are amazingly tolerant. No one knows how many joint ventures there are among the oil companies. Experts agree there are hundreds.

Exports also agree that joint ventures avoid competition; provide a common meeting ground for supposedly competitive firms; result in the exchange of information and production and marketing planning; concentrate economic power; and foreclose economic participation on the part of alternative businesses and potential competitors. And, needless to say, joint ventures have not led to lower prices for petroleum products.

Such behavior amounts to merger, which could be prosecuted under the anti-trust laws. In fact, it has become clear, in view of the current energy debate, that we are dealing with one giant petroleum octopus with only its tentacles labeled Exxon, Gulf, Texaco, etc.

The third lever of control and power exercised by the energy industry is the interlocking directorate.

The Clayton Act states, "no person at the same time, shall be a director in any two or more corporations . . ." which are engaged by virtue of their business and location of operations, as competitors.

Tell that to the energy companies.

Primary interlocks occur between oil companies and other energy companies. General Dynamics, you may be surprised to learn, is a major coal producer, and has a director sitting on the board of Diamond Shamrock Oil Company. Republic Steel is also a big coal producer, and shares a director with Standard of Ohio. Republic Steel and Marathon Oil are also interlocked through one director.

In utilities, we find interlocks between Mobil and Consolidated Edison, Standard of Indiana and Commonwealth Edison, Standard of Ohio and Detroit Edison, and Getty Oil and Southern California Edison.

Imagine an environmentalist walking into a Con Ed board meeting and suggesting it switch to solar power, with the Mobil Oil director sitting there!

There's more. The oil companies are locked into uranium mining and milling companies, liquefaction and even solar energy research and development firms. And, to a lesser extent, natural gas.

The glue that binds this welter of corporate relationships together is—money. And money is the fourth lever the energy companies use to consolidate and expand their power.

At last count, fourteen banks were tied to 18 of the largest oil companies, through interlocking directorates. All the big names are involved: Exxon and Morgan Guaranty; Exxon and Chase Manhattan; Exxon and Bank of America; Gulf and Mellon National; Mobil and Chemical Bank; Mobil and First National; Texaco and Continental Illinois; Texaco and Chemical; Atlantic Richfield and Chase; Atlantic Richfield and First Chicago. There are dozens more. A diagram showing the lines running from oil companies to banks and back, looks like a piece of string art.

Banks aren't the only financial tie with the energy companies. Insurance companies, investment companies and foundations are very much a part of the complex, too.

For example, Continental Oil Company (Conoco) has primary interlocks with Bankers Trust Company, Morgan Guaranty and Continental Illinois Bank & Trust. These banks, in turn, have interlocks with insurance, investment, and other energy companies.

In case of the Conoco and Morgan Guaranty tie, secondary interlocks occur with four of the nation's largest insurance companies—John Hancock, Aetna, Metropolitan and Penn Mutual; two coal companies, three other major oil companies, two large utilities, and a gas pipeline.

That's all under the Morgan roof. Conoco has two other banks tied-in, in similar fashion.

Multiply this network by all the major oil companies, and some idea can be had of the enormous concentration of wealth and power centered in the industry.

Interlocking directorates make it all possible.

It is difficult to perceive the lines of distinction and ownership between banks and energy companies. Ordinarily, one might expect it is the banks who ultimately call the shots. But when it is realized that literally millions of dollars in employee benefit funds are deposited by the energy companies, in the major banks, then the lines of authority and distinction become even more blurred. In effect, what we have is a siamese octopus, with the world economy wrapped in its clutches.

There is one more lever of power employed by the companies and banks, virtually invisible, but essential to their economic and political hegemony. It is the accounting firm.

A mere seven firms audit the books of the largest oil companies. The services these firms render go beyond accounting and auditing, to include tax assistance. They perform well in the latter function. The multinational energy companies haven't paid taxes on their foreign profits for years and, in reality do not pay taxes here at home, since they are, in essence, tax collectors, who pass the cost of taxes onto consumers, in the form of prices. They also receive all investment tax credits enjoyed by other members of the corporate world.

The "Big Seven" accounting firms also design data processing and information systems, do consulting, executive recruiting and pension and investment planning for the companies.

The advantages of this concentration are fairly obvious. A uniformity of practices and procedures is established, which tends to reduce the industry to conformity.

Data for revenues, operating costs and other financial figures are closely guarded as inside and proprietary information, not to be divulged for public consumption or government regulatory purposes. There are ample cases where the energy companies and their banking trusts have refused to open their books to the Securities and Exchange Commission and even the Congress.

Finally, there remains the possibility that accounting firms are used as conduits for the flow and exchange of information and policy among and between the members of the energy-financial sodality.

These then are the levers of power used by the energy interests to control and monopolize the industry, victimize the economy and command the government.

To summarize, there are five:

The OPEC Cartel Arrangement;

The Joint Venture;

The Interlocking Directorate;

Banking and Financial Institution Interties, and

The Accounting Firm Fraternity.

Political contributions and the interchange of corporate with federal energy agency personnel are two highly visible abuses of power, but presumably are commonly known. Why belabor the obvious?

We can deduce from this didactic discussion, several generalizations.

The first is that structural challenges to and changes in the private control of energy investment are probably preconditions to the political possibility of solving the energy crisis in an equitable and just manner.

This is why we need continued regulation of natural gas and home heating fuels.

This is why we must insist on full financial disclosure from energy companies.

It is why we must look to the rejuvenation of federal anti-trust prosecutions in the energy industry.

It is why we must insist on horizontal and vertical divestiture of the energy giants.

It is why we must look toward public, as opposed to private development of alternative energy sources.

What has been described in this analysis of corporate control and power is a kind of reactionary socialism, which makes the future of America contingent upon investment decisions by and in behalf of a few corporate entities and extremely wealthy people.

When this or next winter's excessively high fuel bills come rolling in; when the gas pump prices increase and the electric rates soar through the fuel adjustment clause, it won't be the perpetrators of this energy scandal who will sacrifice and suffer.

Since the crisis of 1973/74, average weekly earnings of working people have increased roughly 6 percent per year. Energy company profit increases have outstripped wage increases nearly threefold—averaging 17 percent per year. The inequity for working people is bad enough.

For the seven million or more unemployed it is tragic. And unconscionable.

There is a fundamental and human right to the basic necessities of life. The energy crisis is denying this right to millions of Americans.

It remains for public spirited and progressive citizens to remind the nation's policy makers and the public, that the sun and solar energy belong to the people, not the energy companies; that the waters of the ocean and the rivers belong to the people, not the monopolies; that the children of the ghettos have as much claim to ownership of public lands, oil shale and offshore oil deposits, as do a few private investors.

Thank you.●

ELECTORAL REFORM

● Mr. BAYH. Mr. President, earlier today a task force brought together by the Twentieth Century Fund issued its report on electoral reform and announced its proposal for a national bonus plan for electing the President and Vice President. This proposal calls for retaining the electoral vote system but adding an additional 102 electoral votes to be awarded on a winner-take-all basis to the candidate with the most popular vote nationwide. The task force report says that this national bonus "in essence virtually eliminates the possibility of defeat for a popular vote winner, which was the priority for proponents of direct election, while at the same time preserving those aspects of the existing system that are seen by its defenders as bulwarks of the two-party system and of federalism."

This proposal is very similar to a suggestion put forward by Arnold J. Levin in the May 22, 1977, Washington Post. The Senate Judiciary Subcommittee on the Constitution has examined this proposal and others made previously. At the request of the minority members of the subcomittee, Mr. Levin's version of the national bonus plan was reprinted at page 531 of the Record of Hearings on the Electoral College and Direct Election, July 20, 22, 28, and August 2, 1977.

As a result of the subcommittee's studies over the last 10 years I feel strongly, as I have for some time, that the best way to elect our President and Vice President is through direct popular election, as proposed in Senate Joint Resolution 1. However, it is important for the people of our country and for my colleagues to have before them all proposals that are advanced. With that in mind, I am introducing today the proposed national bonus plan constitutional amendment which was put forward this morning by the Twentieth Century Fund Task Force.●

THE ANNUAL MEETING OF STATE HISTORIC PRESERVATION OFFICERS

● Mr. LEAHY. Mr. President, in late February the National Conference of State Historic Preservation Officers convened in Washington, D.C., for its eighth annual meeting. The State officers, in cooperation with Federal agencies, administer national laws and programs related to preservation in the 50 States, the District of Columbia, and five territories. The conference proceedings reflected the broad impact of the preservation movement on the social and economic development of our country and its communities. It is clear that preservation plays an important role in a broad range of domestic issues of the highest priority to Americans.

My distinguished colleagues are well acquainted with my long interest in the preservation movement and my conviction that we must, as a people, take stock of our cultural heritage and recognize that it is in our best interest to protect and maintain architectural landmarks, archeological properties, and historically significant areas in our cities, towns, and countryside.

The preservation movement is to be commended for its record of accomplishment in thousands of communities across the country where it time and again has proven a key to economic revitalization and civic pride. It also is to be applauded for its determination to participate actively in the public planning process at every level so that preservation is recognized as a promising option as we confront issues bearing fundamentally on the quality of life in America.

I believe that the voice of preservation should be heard clearly in our public and decisionmaking forums. The movement's potential must be firmly articulated.

Secretary of the Interior Cecil D. Andrus and the Director of the Interior Department's recently created Heritage Conservation and Recreation Service, Chris T. Delaporte, both addressed the annual meeting of State historic preservation officers on February 28. Their statements speak eloquently to issues and opportunities for the historic preservation movement today. Mr. Delaporte speaks specifically of an initiative that the new Service is undertaking, with

broad public and private participation, to assess nationwide preservation activity and to add new dimensions to preservation planning and policy formulation. This effort will receive my close attention.

I respectfully commend Secretary Andrus's and Director Delaporte's statements to my colleagues in the Congress and ask unanimous consent to print the texts of their addresses in the RECORD of this day's Senate proceedings.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS BY SECRETARY OF THE INTERIOR CECIL D. ANDRUS

Some of you may be familiar with the joke about the fighter pilot who upon spotting enemy planes said to his co-pilot: "Let's turn 360 degrees and get the heck out of here."

My schedule for today turned 360 degrees, or maybe 720 degrees. At any rate, I am pleased that we were able to reschedule some other obligations so that I could end up here where I wanted to be in the first place.

Our good friend and colleague Merle Wells has kept me informed of the splendid record of accomplishment in our historic preservation partnership and the role of the State Historic Preservation officers in this unique program.

I'm also very enthusiastic about the opportunities I see ahead for this partnership as a result of the President's initiative in calling for the National Heritage program. So, I welcome this occasion to tell you this in person.

When I became Secretary of the Interior, I made it clear that at the core of all of our decisions would be an ethic of conservation.

I am not, nor is this Administration, anti-development. But I think it is accurate to say that we are for wise development and wise utilization of our national resources.

Our decisions on all crucial issues have been guided by the principle of protecting the quality of our environment—the environment in which we, and our children, and their children, must live.

This approach led us to take a strong stand to protect the priceless resources of Redwood National Park—and I'm both proud and relieved that we are about to see congressional action to achieve this goal.

We have likewise taken a strong stand on the completion and protection of the Appalachian Trail. Again, working with Congress, we are approaching successful resolution of this crucial question.

We have approached our national energy crisis with the same principle of conservation in mind—and I believe that we have been able to provide a resource base for energy production without unacceptable environmental costs.

And in our Alaska recommendations we have sought to learn from the mistakes of the past, and to chart a responsible and reasonable course toward the preservation and wise utilization of a tremendous national resource.

But the natural resources of a nation include more than its land and water, more than its mineral and agricultural resources. The most important—and essential—natural resource of any nation is its people, and any "natural resource" decision which ignores this fact is, to that very degree, inadequate.

When one thinks of the strength of a nation it is all to easy to think only in terms in tangibles and quantifiable factors. The importance of these factors—of strategic energy reserves, of available and usable water, of agricultural output—is obvious of course.

But equally important are some intangibles, and some of the most important of these can be summed up in the word "heritage."

It is essential that the citizens of a nation have the sense of belonging and the sense of direction which comes from the knowledge of their "roots."

To know who we are we must have a sense of who we have been.

And we must take steps to preserve the essential fabric of that reality for our own benefit and that of those who come after us. Thus, what you do—and what we do *together*—is of great importance.

The President's recognition of this is reflected in his decisions and policy directives concerning development of a National Heritage program.

What we have been—our common inheritance—is both cultural and natural. To the extent we do not wisely protect either, we as a nation are diminished.

It is this realization that forms the foundation of the President's heritage program.

We also realize that in considering the diverse resources that make up our natural and cultural heritage, it is just as essential to recognize necessary differences in approach as it is to maximize common ground and joint strengths.

The new program and the Heritage Conservation and Recreation Service are structured to take advantage of both.

I know that as this conference progresses, you will be discussing the proposed program in great detail. I do not want to preempt that discussion.

I know that as you have carefully and thoughtfully considered the new program, you have found some points which have pleased and encouraged you—and others which have disappointed you.

Among the latter, I suspect, are the requested funding level of the Historic Preservation Fund, and this year's suggested matching ratio for planning and inventory grants.

In that regard, I will only point out to you what must already be obvious—the competition for the financial resources of the Federal government is intense.

Those of us who fought in the Fiscal Year 79 battle of the budget are not licking our wounds—we are at work on our strategy for FY 80. You can be assured of a strong presentation from those who represent you during the budget formulation process next year. Bob Herbst, David Hales, Chris Delaporte and I have had some discussions on this.

I say this not as a commitment to increased funding, but as assurance that we will do our best in representing the legitimate funding needs of historic and natural preservation.

In this process we will need your help. It is, for example, difficult to defend large funding increases when, all together, you have more than $30 million in unobligated funding from previous years. Let's put that money to work.

On a related point, it is incumbent on all of us to do a better job of demonstrating the importance of what we do, and its relationship to the major issues which concern this nation.

The National Heritage program is going to give preservation a voice and a hearing in the planning and decision-making forum here in Washington that it has not had previously. This is long overdue. It's time that the accomplishments and the proven economic and social benefits of historic preservation are given the credit they merit.

It's time our movement was better understood. But it's up to us to make that happen.

The historic preservation movement in the United States has always been and will always be more than just an administrative initiative or an organizational framework. It is more than funding formulas, more than comprehensive planning, and more than programming and budgeting. All these do is comprise a structure to support something far more vital, far more compelling. That something is an ethic, a philosophy, a commitment to maintain the links essential to civilization.

It is this kind of impetus that lies behind the National Heritage program. It lies behind the legislative and other initiatives we hope to be taking, with your cooperation, to expand consideration of and protection of our Nation's valuable heritage resources.

Our cause springs from the grass roots, from thousands of communities and millions of people in all walks of life who care deeply about the quality of life.

You, the State Historic Preservation Officers, are the key to the movement's success. We in Washington can provide a structure, a national focus and certain incentives, as we have in the past and as we now have with the National Heritage program.

But these initiatives are for naught if they fail to connect with the rising commitment of concerned Americans in their neighborhoods and communities. You provide that link. You are that connection. You are the real producers.

I believe that this Administration holds enormous promise for America. I don't say this because I'm expected to say it.

There are huge problems and challenges facing this country now, and great possibilities. As a Nation, we are taking a closer look than we have in a long time at ourselves, our cities, our communities, our neighborhoods, and our other human and material resources.

I've come here today to express directly to you my commitment to our common effort. I've also come to ask for your support—as well as your continued advice and guidance—on the National Heritage program.

This Administration views this program as a beginning, not an end product, and we look forward to working with you as we guide its development. We need feedback—your constructive criticism when we're wrong and your appraisal of what we are doing right.

As I consider our opportunities—and responsibilities—to preserve and protect our national heritage, I am reminded of one Alaska Native's remarks on our opportunities in Alaska. He said, and I'll paraphrase, that if we do not take advantage of our chance to preserve our national treasures, God will forgive us, for it is his nature to be forgiving—but our grandchildren will never forgive us.

Our joint endeavors are important to the future of this Nation—and I look forward to working with you as we carry out our responsibilities.

REMARKS BY CHRIS THERRAL DELAPORTE

On January 25, as you know, Secretary of the Interior Andrus announced establishment of the Heritage Conservation and Recreation Service. I think it is fortunate that this annual meeting of State Historic Preservation Officers and Federal Representatives is taking place so soon after that announcement. It gives us an opportunity to meet in person during the two to three month period set aside for organizational transition. The effort of the past eight months to keep one another informed of plans for this important step in the Administration's National Heritage Program is no substitute for face-to-face discussion.

Since 1971 the State Historic Preservation Officers have met each winter here in Washington. Many of you, as well as a good number of people with the Office of Archeology and Historic Preservation, have been present at each of eight annual meetings. This continuity—in experience, leadership, and associations—is one of the great strengths in the preservation partnership between the States and Federal Government. It has been and will continue to be very important in the National Heritage Program.

I intend to be candid today. I ask for your candor in return. I needn't dwell extensively here on the events that followed President

Carter's call for a National Heritage Program in his Environmental Message last May, or on the organizational composition of the new Heritage Conservation and Recreation Service. Instead, I want to give you several assurances. Then I want to share with you some thoughts about issues and opportunities I believe we face in America's historic preservation movement.

Here are the assurances.

One, I intend that the organizational structure of the Heritage Conservation and Recreation Service, providing as it does an integrated focal point in the Federal Government for related natural conservation, historic preservation, and recreational concerns, will serve, *without fail*, the best interests of each. I realize there are apprehensions that administrative integration of these functions may create its own imbalances. I respect the depth of commitment behind these apprehensions. It is understandable that major programmatic realignment at the Federal level will generate reservations as well as support. Something would be wrong if it didn't. Let me say simply, however, that I have found, time and time again, that at the local, community, grass-root level—where the real impetus of social movements is born and where action is most immediate and concrete—there is a clear conceptual link drawn among natural conservation, historic preservation, and sensitively planned recreational opportunities for our people. Apprehensions materialize in the more abstract administrative domain, where movements have a way of separating into programs, each with its own managerial, budgetary, and planning apparatus.

Two, I assure you there will be no disruption whatsoever in the impressive record of achievement of the Federal/State preservation partnership as a result of the Office of Archeology and Historic Preservation's transfer to the Heritage Conservation and Recreation Service.

Three, I assure you of my deep personal conviction that the historic preservation movement in this country is fundamentally related to the quality of our national and community life and to the well-being of all the American people.

Four, I assure you of my conviction that the past successes and future accomplishments of our partnership are primarily due to your initiatives as State Historic Preservation Officers. You are the central players and producers, and I will see that this continues, because this movement does not need an overly dominant Federal presence.

I welcome this opportunity to place these assurances in the public record.

Permit me now to address issues and opportunities I see before us.

In his history of the preservation movement in America before Williamsburg, Charles Hosmer traces the movement from its earliest, principally associative, manifestations into its urban phase and its dawning recognition that adaptation of historic resources to imaginative contemporary uses is essential if preservation is to have relevance in the development of our cities, towns, and rural areas. The Historic Preservation Act of 1966 ultimately represented the codification—a coming to fruition—of awareness that preservation is an environmental concern of the first order.

I appreciate and share the sense of achievement that you who have given life to that law must feel in reviewing the record of the past 12 years. Like you, I am prepared to present that record for quantitative and qualitative evaluation in any forum.

Nonetheless, I believe that historic preservation in the United States stands at an important juncture. We may say that preservation has "come of age" but, to draw an analogy in human terms, that means simply that the child has reached the age of 18. The formative years, during which a certain instability and impulsiveness can be tolerated, are suddenly past. A more clearly defined sense of responsibility is expected as the adult assume a full-fledged role in society.

If the preservation movement is at that point, and I suggest that indeed it is, it is implicit upon us to assess the formative years and chart a future course in the context of the movement's full participation in the mainstream of our national life.

I believe we must distinguish at the outset between the performance record of historic preservation and some public perceptions about the movement and its accomplishments.

To be frank, I am concerned that preservation is sometimes perceived as elitist, antiquarian, nonprogressive, and not always relevant to society's broadest goals. You note that I said perceived.

I am concerned that these perceptions, while in no way universal, are still prevalent enough to cause preservation at times to be shut out of the game before the hand is dealt.

I am concerned because I see our movement's contributions in the mainstream of American life, but sense that many preservationists have found themselves in the back seat when major issues are being weighed and resolved.

Why is this so? I don't pretend to have the answer, but I think we must ask the question.

Allow me to speculate that the fault cannot be laid exclusively at the doorstep of people who misperceive the preservation movement. We may have to look closer to home and ask ourselves some tough questions.

Are we doing all we can to articulate preservation's achievements, goals, and potential persuasively in the public forum?

Are we too modest? Or too reticent?

Is preservation to some extent inconsistent in policy and practice?

Do we present a confusing image? Have we made every effort to reconcile conflicting impulses in—and ramifications of—the movement?

Have we squarely confronted the issue of displacement?

I positively reject theories that would place that shoe on any single foot. This serious issue is far too complex for simplistic analysis. Still, Federal and Federally assisted programs are charged by law to assure uniformly fair and equitable treatment of persons who may be victims of displacement. Within the context of the American social conscience, it is implicit upon us to apply our best creative efforts to mitigate socially nonproductive consequences of our movement's involvement in the life of our communities and neighborhoods.

I am not suggesting with these questions that historic preservation is guilty of any unpardonable sin. I only suggest that if in fact we have come of age, the time is ripe to smooth out rough edges.

And to move out.

I believe that preservation, as I have seen it, is doing that. Our Federal/State partnership justly can claim a major role in the process. This is particularly evident in the national perspective so commendably reflected in your national conference's formulation of goals and objectives. I want us to take still more dynamic initiatives together.

To that purpose, I have today asked Dr. Ernest Connally, associate director of the Heritage Conservation and Recreation Service, to begin immediately a comprehensive, and ongoing, assessment of historic preservation activity in America. This initiative, which I am convinced will prove challenging and significant, will employ a systematic policy planning approach that already has proven fruitful in developing nationwide policy for the recreation element of the Heritage Conservation and Recreation Service.

The initial steps will be identification and selection of issues confronting the preservation movement. Task forces then will be established to address specific issues and develop options for Federal action by the Department of the Interior and the Heritage Conservation and Recreation Service. Throughout this process there will be broad public and private participation by agencies and groups with preservation-related interests, as well as full recognition that State historic preservation plans must reflect the diversity of State heritages and the differing contexts in which preservation is carried out.

Once these steps have been completed, the Department will determine options to be implemented. This thorough, nationwide policy planning process must be continuing and keyed to the Federal budget cycle.

I expect this effort to go a long way toward bringing fuller recognition that the preservation movement is a positive force in the mainstream of America's social and economic development.

I believe it will be valuable in shedding light on the movement's relationship to broad national objectives in urban policy, economic realization, neighborhood and energy conservation, rural development, housing, employment, land use, fair treatment of potentially displaced people and business, and public planning in the fullest sense at every level of Government.

And I expect the effort will be productive in defining specific actions the preservation movement should take in respect to identification and evaluation of cultural resources; improved public outreach programs; technical training of preservation craftsmen and professionals; allocation of public monies to projects that exemplify creative funding and adaptive use strategies as well as the highest possible standards of treatment for cultural properties; and the full range of tasks before us. I applaud your president, Frederick Williamson's, emphasis on sound management of State programs and tight administration of Federal grant monies apportioned for Statewide and project activities under the Historic Preservation Fund. The national conference clearly recognizes that the manner in which grant allotments are expended is a major criterion applied in decisions about the future of our cooperative efforts.

Historic preservation in the latter part of the twentieth century is inextricably linked with the validity and promise of our communities. The movement is a part *of*, not apart *from*, America's most compelling social issues and goals. It plays in every game in town. Our partnership has an exciting opportunity, working with local initiatives, to make an extraordinary positive impact on the physical and spiritual quality of life in our country. I know we all welcome the challenge of getting historic preservation on the fast track.●

THE MAINE INDIAN LAND CLAIM

● Mr. MUSKIE. Mr. President, the Passamaquoddy and Penobscot Indian tribes are claiming that millions of acres of land in the State of Maine were originally transferred from them in violation of Federal law. This claim, and its potentially devastating consequences, poses one of the most difficult problems I have encountered during my years in public life.

In recent weeks, a task force appointed by the President has presented a series of proposals which could resolve the Indian land claim, either in the courts or by mutual agreement among the parties, without the hardship and uncer-

tainty which might result from a comprehensive lawsuit against all present owners of land within the claims area. These recommendations have stimulated heated debate, both here in Washington and in Maine.

Because of the complexities of the matter, I would like to include in the RECORD some of the documents which are pertinent to this debate. I would like also to describe the events which took place over the past 2 years leading up to the White House task force proposal in February 1978.

THE POSSIBILITY OF A LAWSUIT

In the fall of 1976, the possibility of a large scale lawsuit against the State and private landowners in roughtly two-thirds of Maine threatened to hamper the ability of public institutions to raise long-term financing through the sale of bonds. It appeared at that time the prospect of serious economic hardship was imminent.

In response to a request for assistance by the Governor and attorney general of Maine, and by all four members of the State's congressional delegation, President Carter set in motion first one, and subsequently a second, effort to find an alternative to prolonged litigation and the associated economic dilemma for our State.

Early in 1977, the President appointed Judge William Gunter, a retired Georgia Supreme Court Justice, to identify a solution to the problem. Judge Gunter's recommendations did not attempt to fix legal responsibility for satisfying the claims, contrary to what some have stated. Rather, he suggested a combination of elements, including a congressional appropriation and a transfer of land, as the basis for either an out-of-court settlement or a court suit limited in scope.

Judge Gunter's proposals, which I ask unanimous consent to have included at the conclusion of these remarks, were rejected last year by both the State and the Indians as a basis of an out-of-court settlement.

In February of 1978, a three-member task force appointed by the President announced that the Indians had agreed they would drop all claims against the bulk of the landowners in return for a Federal appropriation of funds. Any lawsuit, therefore, would be severely restricted in scope. At the same time, the task force passed on to State officials and the remaining landowners separate offers by the Indians to settle the balance of their claims for a State appropriation of funds and private land transfers.

It should be made clear at the outset that President Carter, in responding to requests to assist Maine, did not have the option of ignoring the tribal claims.

Two Federal courts, the district court of Maine and the court of appeals in Boston, have ruled that a formal trust relationship exists between the Federal Government and the Indian tribes in Maine. Consequently, the Federal Government is legally bound to represent the interests of Maine's Indians to the fullest appropriate extent. This could include filing a lawsuit on behalf of the Indians seeking the return of, and/or compensation for, land taken from them in violation of the law. The two courts also ruled that the Federal law in question, the Non-Intercourse Act of 1970 and its successor statutes, did apply to Maine's Indians.

After examination of the land claims, and all the historical and legal documents relating to it, the Justice Department concluded in 1977, that the claims were sufficiently valid to justify legal action.

The Federal Government also has the right to pursue alternatives to extensive litigation. But in view of the obligations of a trustee which the courts have imposed on the Government, and the determination that the claims have legal merit, neither the President nor individual agencies of the Government can ignore the court and refuse to proceed if alternatives are not agreed upon.

Indeed, the Attorney General of the United States is presently subject to an order of the Federal District Court of Maine—an order which has been suspended during the current efforts to work out an acceptable alternative—to tell the court how the Justice Department intends to proceed.

RECENT DEVELOPMENTS

I ask unanimous consent that the latest proposals presented by the White House task force be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MUSKIE. Mr. President, they consist of three recommendations. Only one is endorsed and fully supported by the President. This proposal would give the tribes $25 million in Federal funds in exchange for their dropping their claims to 9.2 million acres of land held by small landowners, small businesses, municipalities, and every other owner up to 50,000 acres of land.

The other two parts of the proposal do not involve any action by the Federal Government and are simply offers by the Indians transmitted by the President to drop their claims against the State and large landowners in return for land and State appropriations.

I view them as a starting point for negotiations, knowing that up to this moment the parties involved have yet to discuss directly the alternatives to a lawsuit.

Clearly, the State and large landowners are free to accept the proposal pertaining to them, make a counteroffer, or reject it altogether. The President confirmed this at a public meeting in Bangor, Maine. He further said he had no preference on their chosen course of action.

The President has indicated that the proposal to relieve claims against the bulk of the land in the claim area could be submitted to the House and Senate at the end of a 4-month review period. If accepted by the Congress, the cloud would be removed from title to 9.2 million acres belonging to the State's small landowners and there could be no further legal action against them.

If the offers made to the State and large landowners are rejected, the Justice Department may be required to commence legal action against them in court. Or, direct negotiations between the primary parties could lead to a resolution of the claims without recourse to the courts.

I have urged all parties to carefully consider the proposed solutions. I wish to add that I will not attempt to force my views on any one, and am looking to the State's leaders and large landowners to decide for themselves on the best course of action to be taken. And, I will support whatever decision the State makes.

EXHIBIT 1

[Nos. 75-1171, 75-1172]

Joint Tribal Council of the Passamaquoddy Tribe et al., Plaintiffs-Appellees, v. Rogers C. B. Morton, Secretary, Department of the Interior, et al., Defendants-Appellees, State of Maine, Intervenor-Appellant.

Joint Tribal Council of the Passamaquoddy Tribe et al., Plaintiffs-Appellees, v. Rogers C. B. Morton, Secretary, Department of the Interior, et al., Defendants-Appellants.

United States Court of Appeals, First Circuit

Argued Sept. 11, 1975.

Decided Dec. 23, 1975.

Action was brought by the joint tribal council of the Passamaquoddy Indian Tribe and the tribe's two governors against federal officials for a declaratory judgment as to the applicability of the Indian Nonintercourse Act to the tribe. The state of Maine intervened as a party defendant. Judgment was given for the Indians in the United States District Court for the District of Maine, Edward Thaxter Gignoux, J., 388 F.Supp. 649, and the state of Maine and federal officials appealed. The Court of Appeals, Levin H. Campbell, Circuit Judge, held that the Nonintercourse Act applies to the Passamaquoddy Tribe and established a trust relationship between the United States and the tribe. No congressional termination of the guardianship role was shown, and neither the tribe nor the state of Maine would have the right to terminate the federal government's responsibility.

Judgment affirmed.

Levin H. Campbell, Circuit Judge.

This is an appeal from a declaratory judgment entered in the District Court for the District of Maine. 388 F.Supp. 649, 667 (D. Me. 1975).

Plaintiffs are, under Maine law, the political representatives of the Passamaquoddy Indian Tribe ("the Tribe"). 22 M.R.S.A. § 4831 (Supp. 1975). They brought this action against the Secretary of the Interior and the Attorney General of the United States after the Secretary refused to initiate a lawsuit against the State of Maine on behalf of the Tribe. Earlier, in a letter to the Commissioner of the Bureau of Indian Affairs, the Tribe had stated the following grievances against Maine and its predecessor, Massachusetts (hereinafter collectively "Maine"): that Maine had divested the Tribe of most of its aboriginal territory in a treaty negotiated in 1794; that Maine had wrongfully diverted 6,000 of the 23,000 acres reserved to the Tribe in that treaty; and that Maine had mismanaged tribal trust funds, interfered with tribal self-government, denied tribal hunting, fishing and trapping rights, and taken away the right of members to vote, from 1924 to 1967. The Tribe had requested the Secretary to sue Maine on its behalf to redress these asserted wrongs before July 18, 1972, the date an action would allegedly be barred.[1] Although the Commissioner of the Bureau of Indian Affairs favored compliance with plaintiffs' request, defendants did not act.

Footnotes at end of article.

On June 2, 1972, plaintiffs filed this action, seeking a declaratory judgment that the Tribe is entitled to federal protection under the Indian Nonintercourse Act, 25 U.S.C. § 177,[2] and a preliminary injunction ordering defendants to file a protective action on the Tribe's behalf against the State of Maine by July 18, 1972. Defendants persisted in their refusal to sue for the Tribe, relying upon the advice of the Acting Solicitor for the Department of the Interior, who stated:

"[N]o treaty exists between the United States and the Tribe and, except for isolated and inexplicable instances in the past, this Department, in its trust capacity, has had no dealings with the Tribe. On the contrary, it is the States of Maine and Massachusetts which have acted as trustees for the tribal property for almost 200 years.

[W]e are aware that the Tribe may thus be foreclosed from pursuing its claims against the State in the federal courts. However, as there is no trust relationship between the United States and this Tribe, the Tribe's proper legal remedy should be sought elsewhere."

After a hearing, the district court ordered defendants to file suit by July 1, 1972, and to include all matters of which the Tribe had complained. In compliance, the instituted *United States* v. *Maine,* Civil No. 1966 N.D. An appeal from that order was dismissed on motion of both plaintiffs and defendants. Civil No. 1966 N.D. has meanwhile been stayed pending final determination of the present action.

Plaintiffs then filed two amended and supplemental complaints herein, abandoning their request for an injunction and seeking only a declaratory judgment. The State of Maine was allowed to intervene. As finally framed and argued in the district court, the issues were,[3] (1) whether the Nonintercourse Act applies to the Passamaquoddy Tribe; (2) whether the Act establishes a trust relationship between the United States and the Tribe; and (3) whether the United States may deny plaintiffs' request for litigation on the sole ground that there is no trust relationship. The district court ruled in plaintiffs' favor on all points. Both the federal defendants and the State of Maine appeal. We affirm, subject to the qualifications hereinafter stated.

I

The issues in this proceeding can best be understood in light of facts about the Tribe appearing in the parties' stipulation and exhibits and in the district court's comprehensive and scholarly opinion.[4]

The Tribe now resides on two reservations in Washington County in Maine. Its members and their ancestors, as was agreed below, have constituted an Indian tribe in both the racial and cultural sense since at least 1776. Plaintiffs allege that until 1794 the Tribe occupied as its aboriginal territory all what is now Washington County and certain other land in Maine. In 1777, the Tribe pledged its support to the American Colonies during the Revolutonary War in exchange for promises by John Allan, Indian agent of the Continental Congress, that the Tribe would be given ammunition for hunting, protection for their game and hunting grounds, regulation of trade to prevent imposition, the exclusive right to hunt beaver, the free exercise of religion, and a clergyman. In adidtion, an agent would be appointed for their protection and support in time of need. Allan, as Superintedent of the Eastern Indian Agency, reported to the federal government on several occasions in 1783 and 1784 that the Passamaquoddy Tribe had greatly assisted the revolutionary cause and urged Congress to fulfill these promises made on the Government's behalf. Allan also transmitted the views of the Tribe in this regard. However, the Continental Congress failed to act on Allan's recommendations. His appointment was revoked in March 1784, under a resolution revoking the appointments of all Indian Superintendents. In 1790, the First Congress adopted the Indian Nonintercourse act.[5]

In 1792, the Passamaquoddy Tribe petitioned Massachusetts for land upon which to settle, and Massachusetts appointed a committee to investigate, one member of which was the same John Allan. Allan reported that during the Revolutionary War the Passamaquoddy Tribe had given up its claims to lands known to be its haunts on the condition that the United States would confirm its "ancient spots of ground" and a suitable tract for the use of both the Tribe and all other Indians who might resort there. Soon after, in 1794, Massachusetts entered into an agreement, also referred to as a treaty, with the Passamaquoddy Tribe by which the Tribe relinquished all its rights, title, interest, claims or demands of any lands within Massachusetts in exchange for a 23,000 acre tract comprising Township No. 2 in the first range, other smaller tracts, including ten acres at Pleasant-point, and the privilege of fishing on both branches of the Schoodic River. All pine trees fit for masts were reserved to the state government for a reasonable compensation. An additional ninety acres at Pleasant-point were later appropriated to the use of the Tribe by Massachusetts in 1801.

Since 1789, Massachusetts and later Maine have assumed considerable responsibility for the Tribe's protection and welfare. Maine was a District of Massachusetts until 1819, when it separated from Massachusetts under the Articles of Separation, Act of June 19, 1819, Mass. Laws, ch. 61, p. 248, which were incorporated into the Maine Constitution as Article X, Section 5. The Articles provided that Maine "shall . . . assume and perform all the duties and obligations of this Commonwealth [Massachusetts], towards the Indians within said District of Maine, whether the same arise from treaties, or otherwise. . . ." Maine was thereafter recognized by Congress and admitted to the Union. Act of March 3, 1820, ch. 19, 3 Stat. 544. The Maine Constitution, with the above quoted provision relating to the Indians, was read in the Senate, referred to committee, and finally declared by Congress to be established in the course of the admission proceedings.

Since its admission as a state, Maine has enacted approximately 350 laws which relate specifically to the Passamaquoddy Tribe. This legislation includes 72 laws providing appropriations for or regulating Passamaquoddy agriculture; 33 laws making provision for the appropriation of necessities, such as blankets, food, fuel, and wood, for the Tribe; 85 laws relating to educational services and facilities for the Tribe; 13 laws making provision for the delivery of health care services and facilities to the Tribe; 22 laws making allowance for Passamaquoddy housing; 54 laws making special provision for Indian indigent relief; 54 laws relating to the improvement and protection of roads and water on the Passamaquoddy reservation; and 15 laws providing for the legal representation of the Tribe and its members.

In contrast, the federal government's dealings with the Tribe have been few. It has never, since 1789, entered into a treaty with the Tribe, nor has Congress ever enacted any legislation mentioning the Tribe. In 1824, the Department of War contributed funds to the Tribe, one-third toward the construction of a school, pursuant to an act for the civilization of Indian tribes. Act of March 3, 1819, 3 Stat. 516. It also gave money annually from 1824 to 1828 under the same act to Elijah Kellogg of the Society for the Propagation of the Gospel Among the Indians, to support a school for the Tribe. The funds were granted at the request of the State of Maine, were channeled through the State, and were subject to State controls. Kellogg, according to one nineteenth century source, was himself sent to the Tribe as a schoolmaster by the State of Maine, and as a missionary by the Missionary Society of Massachusetts. These funds were withheld during 1829 because of intra-tribal differences concerning the religion of the Superintendent of the school and, as a result, two principal men of the Tribe, Deacon Sockbason and Sabattis Neptune, went to Washington to meet with Thomas L. McKenney, Director of the Office of Indian Affairs, and John H. Eaton, Secretary of War, to seek reinstatement of the school funds and additional money to hire a priest and to purchase a parcel of land. Money was again appropriated for the school and the priest in 1830, although discontinued after 1831 on account of the same intra-tribal differences. However, despite a request from President Jackson, Congress failed to appropriate any money to purchase land for the Tribe. After the school funds were again suspended during 1831 because of the same sectarian strife, the Tribe requested that the funding be reinstated and used for the improvement of the Tribe's agriculture; this request was also denied and the funding was never resumed. During the period from 1899 to 1912, five members of the Tribe attended the Carlisle Indian School for short periods of time. A member of the Tribe also graduated from Haskel Indian College in 1970. Since 1965, various federal agencies other than the Department of the Interior have provided funds to the Tribe under federal assistance programs available to all citizens meeting the requirements of the program. Some of these funds were taken from special Indian allocations or were administered by special Indian desks within the various agencies. In 1966, the General Counsel to the Department of Housing and Urban Development, writing to the Commissioner of the Maine Department of Indian Affairs in regard to the establishment of public housing authorities by the governing councils of the Passamaquoddy and Penobscot Tribes, stated in part that "[i]t is our understanding that these tribes do not have any governmental powers in their own right or by virtue of any federal law. . . ."

In 1968, the Tribe brought suit against the Commonwealth of Massachusetts in the Massachusetts state courts alleging that the Commonwealth, with the consent of the federal government, assumed jurisdiction over and responsibility for the Tribe and that by the act admitting Maine into the Union, Congress confirmed and ratified that relationship.

II

The central issue in this action is whether the Secretary of the Interior was correct in finding that the United States has no "trust relationship" with the Tribe and, therefore, should play no role in the Tribe's dispute with Maine. Whether, even if there is a trust relationship with the Passamaquoddies, the United States has an affirmative duty to sue Maine on the Tribe's behalf is a separate issue that was not raised or decided below and which consequently we do not address. The district court held only that defendants "erred in denying plaintiffs' request for litigation on the sole ground that no trust relationship exists between the United States and the Passamaquoddy Tribe." It was left to the Secretary to translate the finding of a "trust relationship" into concrete duties.

Over the years, the federal government has recognized many Indian tribes, specifically naming them in treaties, agreements, or statutes. The general notion of a "trust relationship," often called a guardian-ward relationship, has been used to characterize the resulting relationship between the federal government and those tribes, *see Worcester* v. *Georgia,* 31 U.S. (6 Pet.) 515, 8 L.Ed. 483

Footnote at end of article.

(1832): *Cherokee Nation* v. *Georgia*, 30 U.S. (5 Pet.) 1, 8 L.Ed. 25 (1831); and the cases cited in the district court's opinion, 388 F.Supp. at 662–63. It is the defendants' and the intervenor's contention here that such a relationship may only be claimed by those specifically recognized tribes.

The Tribe, however, contends otherwise. It rests its claim of a trust relationship on the Nonintercourse Act, enacted in its original form by the First Congress in 1790 to protect the lands of "any . . . tribe of Indians." Plaintiffs argue, and the district court found, that the unlimited reference to "any . . . tribe" must be read to include the Passamaquoddy Tribe as well as tribes specially recognized under separate federal treaties, agreements or statutes. As the Act applies to them, plaintiffs urge that it is sufficient to evidence congressional acknowledgement of a trust relationship in their case at least as respects the Tribe's land claims.

Before turning to the district court's rulings, we must acknowledge a certain awkwardness in deciding whether the Act encompasses the Tribe without considering at the same time whether the Act encompasses the controverted land transactions with Maine. Whether the Tribe is a tribe within the Act would best be decided, under ordinary circumstances, along with the Tribe's specific land claims, for the Act only speaks of tribes in the context of their land dealings. If that approach were adopted here, however, the Tribe would be deprived of a decision in time to do any good on those matters cited by the Department of the Interior as reasons for withholding assistance in litigation against Maine. And without United States participation, the Tribe may find it difficult or impossible ever to secure a judicial determination of the claims. Given, in addition, the federal government's protective role under the Nonintercourse Act, see below, it is appropriate that plaintiffs and the federal government learn how they stand on these core matters before adjudication of the Tribe's dispute with Maine.

Yet the resulting bifurcation of decision necessarily restricts the reach of the present rulings. In reviewing the district court's decision that the Tribe is a tribe within the Nonintercourse Act, we are not to be deemed as settling, by implication or otherwise, whether the Act affords relief from, or even extends to, the Tribe's land transactions with Maine. When and if the specific transactions are litigated, new facts and legal and equitable considerations may well appear, and Maine should be free in any such future litigation to defend broadly, even to the extent of arguing positions and theories which overlap considerably those treated here.

Now, however, for purposes of the issues currently existing between themselves and the federal government, plaintiffs are entitled to declaratory rulings on the basis of which courses can be charted and actions planned and taken.

A. Is the Passamaquoddy Tribe a "tribe" within the Nonintercourse Act?

[1] The district court found the Passamaquoddy Tribe to be within the language of the Nonintercourse Act, "any . . . tribe of Indians." It read the quoted language as encompassing all tribes of Indians. The court reasoned that the Act should be given its plain meaning, there being no evidence of any contrary congressional intent, legislative history, or administrative interpretation; that the policy of the United States is to protect Indian title;[6] that there is no reason why the Passamaquoddy Tribe should be excluded since it is stipulated to be a tribe racially and culturally; that there is no requirement that a tribe must be otherwise recognized by the federal government to come within the Nonintercourse Act; and that even if "tribe" is thought to be ambiguous, it should be construed non-technically and to the advantage of Indians so as to include the Passamaquoddy Tribe.

[2, 3] Intervenor and defendants contend that "any . . . tribe of Indians" is ambiguous; that its proper meaning is a community of Indians which the federal government has at some time specifically recognized; and that the Passamaquoddy Tribe is in that sense, not a tribe. "No court", says intervenor, "has ever held a statute regulating trade and intercourse with Indians to apply to a tribe which the Federal Government disavows any relationship with. . . ."

But while Congress' power to regulate commerce with the Indian tribes, U.S. Const. art. 1, § 8, includes authority to decide when and to what exent it shall recognize a particular Indian community as a dependent tribe under its guardianship,[7] *United States v. Sandoval*, 231 U.S. 28, 46, 34 S.Ct. 1, 58 L.Ed. 107 (1913), Congress is not prevented from legislating as to tribes generally; and this appears to be what it has done in successive versions of the Nonintercourse Act. There is nothing in the Act to suggest that "tribe" is to be read to exclude a bona fide tribe not otherwise federally recognized.[8] Nor, as the district court found, is there evidence of congressional intent or legislative history squaring with appellants' interpretation. Rather we find an inclusive reading consonant with the policy and purpose of the Act. That policy has been said to be to protect the Indian tribes' right of occupancy, even when that right is unrecognized by any treaty, *United States v. Santa Fe Pacific R. Co.*, 314 U.S. 339, 345, 347, 62 S.Ct. 248, 86 L.Ed. 260 (1941), *rehearing denied*, 314 U.S. 716, 62 S.Ct. 476, 86 L.Ed. 570 (1942), and the purpose to prevent the unfair, improvident, or improper disposition of Indian lands, *Federal Power Commission v. Tuscarora Indian Nation*, 362 U.S. 99, 119, 80 St. Ct. 543, 4 L.Ed.2d, *rehearing denied*, 362 U.S. 956, 80 Ct.858, 4 L.Ed.2d 873 (1960); *United States v. Candelaria*, 271 U.S. 432, 441, 46 S.Ct. 561, 70 L.Ed. 1023 (1962). Since Indian lands have, historically been of great concern to Congress, *see Oneida Indian Nation v. County of Oneida*, 414 U.S. 661, 667, 94 S.Ct. 772, 39 L.Ed.2d 73 (1974), we have no difficulty in concluding that Congress intended to exercise its power fully.

This is not to say that if there were doubt about the tribal status of the Tribe, the judgments of officials in the federal executive branch might not be of great significance The Supreme Court has said that, "it is the rule of this court to follow the executive and other political departments of the government, whose more special duty is to determine such affairs." *United States v. Sandoval*, 231 U.S. at 47, 34 S.Ct. at 6, *quoting United States v. Holliday*, 70 U.S. (3 Wall.) 407, 419, 18 L.Ed. 182 (1865). But the Passamaquoddies were a tribe before the nation's founding and have to this day been dealt with as a tribal unit by the State.[9] *See* 22 M.R. S.A. ch. 1355. No one in this proceeding has challenged the Tribe's identity as a tribe in the ordinary sense. Moreover, there is no evidence that the absence of federal dealings was or is based on doubts as to the genuineness of the Passamaquoddies' tribal status, apart, that is, from the simple lack of recognition. Under such circumstances, the absence of specific federal recognition in and of itself provides little basis for concluding that the Passamaquoddies are not a "tribe" within the Act.

Intervenor cites two cases dealing with the Pueblo Indians of New Mexico for its contention that "tribe" refers only to tribes that have been federally recognized. *United States* v. *Candelaria, supra; United States* v. *Joseph*, 94 U.S. 614, 24 L.Ed. 295 (1876). In *Joseph*, the Supreme Court found that the Pueblo Indians were not a tribe within the Nonintercourse Act, apparently because of their high degree of civilization and the nature of their earlier relations with the Government of Mexico when they had been under its control.[10] In *Candelaria*, the Court held that the Pueblos did come within the Act, though it did not expressly overrule the *Joseph* view that some tribes, because highly civilized or otherwise, might conceivably be exempt. The Court found that the Pueblos were a simple, uninformed people such as the Act was intended to protect and pointed to federal recognition in the past as evidencing Congress' intention to protect the Pueblos. 271 U.S. at 440–42, 46 S.Ct. 561. These cases lend little aid to intervenor and defendants. The cases do, it is true, suggest that the Act's coverage is limited to tribes consisting of "simple, uninformed people," an interpretation understandable in light of the Act's protective purpose. But it is not claimed that the Tribe and its members are so sophisticated or assimilated as to be other than those entitled to protection. *Cf. Joseph, supra. Candelaria* is cited mainly in support of intervenor's argument that the Act requires federal recognition, but it does not elevate recognition to a *sine qua non;* it merely indicates that if there is a question of inclusion, federal recognition of dependent, tribal status may be helpful evidence of Congress' intent.

[4, 5] Appellants also assert that there is significance to Congress' approval of the Articles of Separation between Maine and Massachusetts, providing that Maine would assume the duties and obligations which Massachusetts owed to the Indians. But, as the district court recognized, Maine's assumption of duties to the Tribe did not cut off whatever federal duties existed. Voluntary assistance rendered by a state to a tribe is not necessarily inconsistent with federal protection. *See State* v. *Dibble*, 62 U.S. (21 How.) 366, 16 L.Ed. 149 (1858). Similarly, Congress' unwillingness to furnish aid when requested did not, without more, show a congressional intention that the Nonintercourse Act should not apply. (*See* Part II, C *infra.*) The reasons behind Congress' inaction are too problematic for the matter to have meaning for purposes of statutory construction. *Cf. Order of Railway Conductors* v. *Swan*, 329 U.S. 520, 529, 67 S.Ct. 405, 91 L.Ed. 471 (1947).

We have considered appellants' remaining arguments carefully and find them unpersuasive. We agree with the district court that the words "any . . . tribe of Indians" appearing in the Act include the Passamaquoddy Tribe.

B. *Is there a trust relationship between the Passamaquoddy Tribe and the federal government?*

[6] The district court found that the Nonintercourse Act establishes a trust relationship between the United States and the Indian tribes, including the Passamaquoddy Tribe. It relied on a series of decisions by the Court of Claims, *Fort Sill Apache Tribe v. United States*, 201 Ct.Cl. 630, 477 F.2d 1360 (1973); *United States v. Oneida Nation of New York*, 201 Ct.Cl. 546, 477 F.2d 939 (1973); *Seneca Nation v. United States*, 173 Ct.Cl. 917 (1965), while also finding support in an extensive body of cases holding that when the federal government enters into a treaty with an Indian tribe or enacts a statute on its behalf, the Government commits itself to a guardian-ward relationship with that tribe. *See e. g., Heckman v. United States*, 224 U.S. 413, 32 S.Ct. 424, 56 L.Ed. 820 (1912); *United States v. Kagama*, 118 U.S. 375, 6 S.Ct. 1109, 30 L.Ed. 228 (1886); *Worcester v. Georgia, supra.*

We agree with the district court's conclusions and in large part with its reasoning and analysis of legal authority. That the Nonintercourse Act imposes upon the federal government a fiduciary's role with respect to protection of the lands of a tribe covered

---

Footnotes at end of article.

by the Act seems to us beyond question, both from the history, wording and structure of the Act and from the cases cited above and in the district court's opinion. The purpose of the Act has been held to acknowledge and guarantee the Indian tribes' right of occupancy, *United States v. Santa Fe Pacific R. Co.*, 314 U.S. at 348, 62 S.Ct. 248, and clearly there can be no meaningful guarantee without a corresponding federal duty to investigate and take such action as may be warranted in the circumstances.

We emphasize what is obvious, that the "trust relationship" we affirm has as its source the Nonintercourse Act, meaning that the trust relationship pertains to land transactions which are or may be covered by the Act, and is rooted in rights and duties encompassed or created by the Act. Congress or the executive branch may at a later time recognize the Tribe for other purposes within their powers, creating a broader set of federal responsibilities; and we of course do not rule out the possibility that there are statutes or legal theories not now before us which might create duties and rights of unforeseen, broader dimension. But on the present record, only the Nonintercourse Act is the source of the finding of a "trust relationship," and neither the decision below nor our own is to be read as requiring the Department of the Interior to look to objects outside the Act in defining its fiduciary obligations to the Tribe.

Once this is said, there is little else left, since it would be inappropriate to attempt to spell out what duties are imposed by the trust relationship. This dispute arises merely from the defendants' flat denial of any trust relationship; no question of spelling out specific duties is presented. It is now appropriate that the departments of the federal government charged with responsibility in these matters should be allowed initially at least to give specific content to the declared fiduciary role.

Thus we are not moved by intervenor's criticism of the lower court's interpretation of cited Court of Claims cases, for those arguments go more to the scope of the federal government's duties under particular circumstances than to the existence of a trust relationship. Nor are we moved by intervenor's other complaint that the judgment below implies some sort of overly "general" fiduciary relationship, unlimited and undefined. A fiduciary relationship in this context must indeed be based upon a specific statute, treaty or agreement which helps define and, in some cases, limit the relevant duties; but, as we have held, the Nonintercourse Act is such a statute.

We affirm, on the basis set forth herein, the finding of a trust relationship and the finding that the federal government may not decline to litigate on the sole ground that there is no trust relationship.

C. Are plaintiffs precluded by acquiescence or by congressional termination of its guardianship role from now asserting a trust relationship with the federal government?

[7] Intervenor also contends that, under general equitable principles, the Tribe should be precluded from now invoking a trust relationship with the federal government because of its long-standing relationship with the State of Maine. However, once Congress has established a trust relationship with an Indian tribe, Congress alone has the right to determine when its guardianship shall cease. *United States* v. *Nice*, 241 U.S. 591, 593, 36 S.Ct. 696, 60 L.Ed. 1191 (1916); *Tiger* v. *Western Investment Co.*, 221 U.S. 286, 315, 31 S.Ct. 578, 55 L.Ed. 738 (1911). Neither the Passamaquoddy Tribe nor the State of Maine, separately or together, would have the right to make that decision and so terminate the federal government's responsibilities.[11]

[8, 9] We turn, then, to whether Congress itself has manifested at any time a determination that its responsibilities under the Nonintercourse Act should cease with respect to the Tribe. The district court cited a rule of construction that statutes or treaties relating to the Indians shall be construed liberally and in a non-technical sense, as the Indians would naturally understand them, and never to the Indians' prejudice. *Antoine* v. *Washington*, 420 U.S. 194, 199–200, 95 S.Ct. 944, 43 L.Ed 2d 129 (1975); *Carpenter* v. *Shaw*, 280 U.S. 363, 367, 50 S.Ct. 121, 74 L.Ed. 478 (1930). We agree with the district court that any withdrawal of trust obligations by Congress would have to have been "plain and unambiguous" to be effective.[12] We also agree that there is no affirmative evidence that Congress at any time terminated or withdrew its protection under the Nonintercourse Act. The federal government has been largely inactive in relation to the Tribe and has, on occasion, refused requests by the Tribe for assistance. Intervenor argues that this course of dealings is sufficient in and of itself to show a withdrawal of protection. However, refusing specific requests is quite different from broadly refusing ever to deal with the Tribe, and, as stated above, there is no evidence of the latter.

[10] Intervenor also points to a decision by the Supreme Judicial Court of Maine, *State* v. *Newell*, 84 Me. 465, 24 A. 943 (1892), which found that the Passamaquoddy Tribe has never been recognized by the federal government, and argues that the federal government's failure to react to that decision by recognizing the Tribe in some way amounts to an acknowledgment of that ruling. However, the federal government had no obligation to respond to the state court's decision, which could not affect federal authority with respect to the Tribe. *See Oneida Indian Nation* v. *County of Oneida, supra.*

We accordingly affirm the district court's ruling that the United States never sufficiently manifested withdrawal of its protection so as to sever any trust relationship. In so ruling, we do not foreclose later consideration of whether Congress or the Tribe should be deemed in some manner to have acquiesced in, or Congress to have ratified, the Tribe's land transactions with Maine.

Judgment affirmed.

FOOTNOTES

[1] 28 U.S.C § 2415(b) sets forth a special statute of limitations for actions seeking damages resulting from trespass on Indian lands. The time for filing such an action was originally July 18, 1972, but has since been extended by Congress to July 18, 1988. Act of October 13, 1972, P.L. 92–485, 86 Stat. 803.

[2] Title 25 U.S.C. § 177 provides as follows:

"No purchase, grant, lease, or other conveyance of lands, or of any title or claim thereto, from any Indian nation or tribe of Indians, shall be of any validity in law or equity, unless the same be made by treaty or convention entered into pursuant to the Constitution. Every person who, not being employed under the authority of the United States, attempts to negotiate such treaty or convention, directly or indirectly, or to treat with any such nation or tribe of Indians for the title or purchase of any lands by them held or claimed, is liable to a penalty of $1,000. The agent of any State who may be present at any treaty held with Indians under the authority of the United States, in the presence and with the approbation of the commissioner of the United States appointed to hold the same, may, however, propose to, and adjust with, the Indians the compensation to be made for their claim to lands within such State, which shall be extinguished by treaty."

[3] Plaintiffs also requested in their second amended and supplemental complaint a declaratory judgment that the U.S. Const. art. I, §§ 8 and 10, and art. II § 2, are applicable to the Tribe. Relief along these lines was not pursued below and is not now an issue.

[4] Plaintiffs' contentions that the Department of the Interior has wrongfully turned its back on the Tribe, and that federal guardianship must replace that of the State, are elaborated in detail in O'Toole & Tureen, *State Power and the Passamaquoddy Tribe; "A Gross National Hypocrisy?"*, 23 Me.L.Rev. 1 (1971).

[5] The first Nonintercourse Act, 1 Stat. 137, 138, provided that "no sale of lands made by any Indians, or any nation or tribe of Indians within the United States, shall be valid to any person or persons, or to any state . . . unless the same shall be made and duly executed at some public treaty, held under the authority of the United States." This was amended in 1793, 1 Stat. 329, 330: "No purchase or grant of lands, or of any title or claim thereto, from any Indians or nation or tribe of Indians, within the bounds of the United States, shall be of any validity in law or equity, unless the same be made by a treaty or convention entered into pursuant to the constitution." Subsequent amendments have made no major changes and the present version was enacted in 1834. (*See* note 2 *supra.*)

[6] Indian title, also called "right of occupancy," refers to the Indian tribes' aboriginal title to land which predates the establishment of the United States. *See e. g., Oneida Indian Nation* v. *County of Oneida*, 414 U.S. 661, 667, 94 S.Ct. 772, 39 L.Ed.2d 73 (1974). The right to extinguish Indian title is an attribute of sovereignty which no state, but only the United States, can exercise, the Nonintercourse Act giving statutory recognition to that fact. *Id.* at 667, 670, 94 S.Ct. 772; *O'Toole & Tureen, supra* note 4, at 25–26.

[7] Congress also has "a right to determine for itself when the guardianship which has been maintained over the Indian shall cease." *United States* v. *Sandoval*, 231 U.S. 28, 46, 34 S.Ct. 1, 6, 58 L.Ed. 107 (1913). On the other hand, Congress' power is limited in the sense that it may not bring "a community or body of people within the range of [its] . . . power by arbitrarily calling them an Indian tribe," and may exercise its guardianship and protection only "in respect of distinctly Indian communities." *Id.* It having been stipulated, however, that the Passamaquoddy Tribe is a tribe in both the racial and cultural sense, there is no question that the Tribe is a "distinctly Indian" community.

[8] In *United States* v. *Candelaria*, 271 U.S. 432, 442, 46 S.Ct. 561, 563, 70 L.Ed. 1023 (1926), the Supreme Court, quoting *Montoya* v. *United States*, 180 U.S. 261, 266, 21 S.Ct. 358, 45 L.Ed. 521 (1901), read "Indian tribe," as used in the Nonintercourse Act of 1834, 25 U.S.C. § 177, to mean "a body of Indians of the same or a similar race, united in a community under one leadership or government, and inhabiting a particular, though sometimes ill-defined, territory." The Tribe plainly fits that definition.

[9] In *State* v. *Newell*, 84 Me. 465, 24 A. 943 (1892), it is true, the Maine court disputed the continued viability of the Tribe, apparently on the grounds that its sovereignty, such as the power to make war or peace, and the like, had vanished, and the political and civil rights of its members were enforced only in the courts of the State. Nonetheless that court did acknowledge the Passamaquoddies' tribal organization for certain purposes, *Id.* at 468, 24 A. 943, and no federal cases hold that the test of tribal existence for purposes of the Act turns on whether a given tribe has retained sovereignty in this absolute sense.

[10] The Pueblos had submitted to all laws of the Mexican Government, their civil rights had been fully recognized, and they had been absorbed into the "general mass of the population." *United States* v. *Joseph*, 94 U.S. 614, 617, 24 L.Ed. 295 (1876).

[11] One might argue that, although Congress has not terminated this relationship, the Tribe's own course of dealings with the State of Maine still prevent it from asking

Congress for assistance. However, the Indians' presumed helplessness is at the heart of the guardian-ward analogy; to deny the ward a right to call upon the guardian for protection would be to deny that he was incapable of looking out for himself.

[12] The Supreme Court has said with respect to the termination of Indian reservations that it will not lightly conclude that a reservation has been terminated and will require a clear indication of that fact. *DeCoteau* v. *District County Court*, 420 U.S. 425, 444, 95 S.Ct. 1082, 43 L.Ed.2d 300 (1975).

KILPATRICK, CODY, ROGERS, MCCLATCHEY & REGENSTEIN,
Atlanta, Ga.

Recommendation to President Carter
From William B. Gunter
Re Passamaquoddy and Penobscot Tribal Claims—Maine

A. My assignment.

My assignment was to examine the problem created by these claims for approximately ninety days and then make a recommendation to you as to what action, if any, you should take in an attempt to bring about a resolution of the problem.

I have not acted as a mediator in this matter; my role has been more that of a judge; I have read the law and examined the facts; I have met and conferred with affected parties and their representatives; I have attempted to be objective, realizing that no one person can ever attain total objectivity; I have tried to come forth with a recommendation that, in my own mind, is just and practical; and I now proceed with a brief statement of the problem and my recommendation.

B. The problem.

The pending court actions based on these tribal claims have the unfortunate effect of causing economic stagnation within the claims area. They create a cloud on the validity of real property titles; and the result is a slow-down or cessation of economic activity because property cannot be sold, mortgages cannot be acquired, title insurance becomes unavailable, and bond issues are placed in jeopardy.

Were it not for this adverse economic result, these cases could take their normal course through the courts, and there would be no reason or necessity for you to take any action with regard to this matter. However, I have concluded that this problem cannot await judicial determination, and it is proper and necessary for you to recommend some action to the Congress that will eliminate the adverse economic consequences that have developed to date and that will increase with intensity in the near future.

I have concluded that the Federal Government is primarily responsible for the creation of this problem. Prior to 1975 the Federal Government did not acknowledge any responsibility for these two tribes. Interior and Justice took the position that these two tribes were not entitled to federal recognition but were "State Indians". In 1975 two federal court decisions, one at the trial level and another at the appellate level, declared that the Constitution adopted in 1789 and a Congressional enactment of 1790 created a trust relationship between the Federal Government and these two tribes. In short, the Federal Government is the guardian, and the two tribes are its wards. After the appellate decision, Interior and Justice concluded that the tribal claims would be prosecuted against private property owners owning property within the claims area and against the State of Maine for the properties owned by it within the claims area. Therefore, we have the unusual situation of the Federal Government being, in my mind, primarily responsible for the creation of the problem, and it is now placed in a position by court decisions of having to compound the problem by court actions that seek to divest private property owners and Maine of title to land that has heretofore been considered valid title. The prosecution of these cases by the Federal Government brings about the adverse economic consequences already mentioned.

I have concluded that the states of Maine and Massachusetts, out of which Maine created in 1820, bear some responsibility for the creation of this problem. The states procured the land in the claims area, whether legally or illegally, I do now decide, and sold much of it. The State of Maine now owns, I am informed, somewhere between 400,000 and 500,000 acres of land in the claims area.

I have concluded that the two tribes do not bear any responsibility for the creation of the problem, and I have concluded that private property owners owning property within the claims area do not bear any responsibility for the creation of the problem.

The problem is complex and does not lend itself to a simple solution because it is old and large. The factual situation giving birth to the problem goes back to colonial times and the early years of our life as a nation under the Constitution. Adding to the complexity is the fact that the problem is social, economic, political, and legal.

Enough about the problem—I move on to my recommended solution.

C. The solution.

I have given consideration to the legal merits and demerits of these pending claims. However, my recommendation is not based entirely on my personal assessment in that area. History, economics, social science, justness, and practicality are additional elements that have had some weight in the formulation of my recommendation.

My recommendation to you is that you recommend to the Congress that it resolve this problem as follows:

(1) Appropriate 25 million dollars for the use and benefit of the two tribes, this appropriated amount to be administered by Interior. One half of this amount shall be appropriated in each of the next two fiscal years.

(2) Require the State of Maine to put together and convey to the United States, as trustee for the two tribes, a tract of land consisting of 100,000 acres within the claims area. As stated before, the State reportedly has in its public ownership in the claims area in excess of 400,000 acres.

(3) Assure the two tribes that normal Bureau of Indian Affairs benefits will be accorded to them by the United States in the future.

(4) Request the State of Maine to continue to appropriate in the future on an annual basis state benefits for the tribes at the equivalent level of the average annual appropriation over the current and preceding four years.

(5) Require the Secretary of Interior to use his best efforts to acquire long-term options on an additional 400,000 acres of land in the claims area. These options would be exercised at the election of the tribes, the option-price paid would be fair market value per acre, and tribal funds would be paid for the exercise of each option.

(6) Upon receiving the consent of the State of Maine that it will accomplish what is set forth in numbered paragraphs (2) and (4) above, the Congress should then, upon obtaining tribal consent to accept the benefits herein prescribed, by statutory enactment extinguish all aboriginal title, if any, to all lands in Maine and also extinguish all other claims that these two tribes may now have against any party arising out of an alleged violation of the Indian Nonintercourse Act of 1790 as amended.

(7) If tribal consent cannot be obtained to what is herein proposed, then the Congress should immediately extinguish all aboriginal title, if any, to all lands within the claims area except that held in the public ownership by the State of Maine. The tribes' cases could then proceed through the courts to a conclusion against the state-owned land. If the tribes win their cases, they recover the state-owned land; but if they lose their cases, they recover nothing. However, in the meantime, the adverse economic consequences will have been eliminated and Interior and Justice will have been relieved from pursuing causes of action against private property owners to divest them of title to land that has heretofore been considered valid title.

(8) If the consent of the State of Maine cannot be obtained for what is herein proposed, then the Congress should appropriate 25 million dollars for the use and benefit of the tribes (see paragraph numbered (1)), should then immediately extinguish all aboriginal title, if any, and all claims arising under an alleged violation of the 1790 Act as amended, to all lands within the claims area except those 400,000 acres of land within the public ownership of the State. The tribes' cases could then proceed through the courts against the state-owned land. If the tribes win their cases they recover the land; but if they lose their cases they recover nothing against the state of Maine. However, in the meantime, they will have received 25 million dollars from the United States for their consent to eliminate economic stagnation in the claims area and their consent to relieve Interior and Justice from pursuing causes of action against private property owners to divest them of land titles that have heretofore been considered valid.

It is my hope that the Congress can resolve this problem through the implementation of numbered paragraphs (1) through (6) above. Paragraphs (7) and (8) are mere alternatives to be utilized in the event consensual agreement cannot be obtained.

Respectfully submitted,

WILLIAM B. GUNTER.

FEBRUARY 6, 1978.

JOINT MEMORANDUM OF UNDERSTANDING

For several months, representatives of the Passamaquoddy and Penobscot Tribes and a White House Work Group comprised of Eliot R. Cutler, Leo M. Krulitz, and A. Stephens Clay have been meeting to discuss the tribes' land and damage claims in Maine and the federal services to be extended to the tribes in the future. These discussions have produced agreement with respect to both a partial settlement of the claims and future federal services. The parties hope that the terms and conditions described here also will serve as a vehicle for settlement of all the tribes' claims.

A. THE BASIC AGREEMENT: A PARTIAL SETTLEMENT

The Administration, through the White House Work Group, agrees to submit to the Congress and to seek passage of legislation which would provide the two tribes with the sum of $25 million in exchange for (1) the extinguishment of the tribes' claims to 50,000 acres per titleholder of such land within the 5 million-acre revised claims area (Area I) [1] to which title is held as of this date by any private individual(s), corporation(s), business(es) or other entity(ies), or by any county or municipality,[2] and (2) for the extinguishment of all their claims in the 7.5

[1] This acreage description of the revised claims area is based on information taken from maps and not from surveys. The final revised claims area, to be determined by the Department of Justice based on information furnished by the Department of the Interior, may vary from this description by ±5%.

[2] For purposes of such extinguishment, titleholding, whether direct or indirect, partial or complete, is deemed to include control, or ability to control, through subsidiaries, partnerships, trusts, or other entities.

million additional acres (Area II) in the claims area as originally defined (Areas I and II). Thus, every landholder within Area I would have his title cleared of all Passamaquoddy and Penobscot land and damage claims up to 50,000 acres,[3] and all titles in Area II would be totally cleared of such claims.

The tribes will execute a valid release and will dismiss all their claims with respect to Area II and with respect to landholders with 50,000 acres or less in Area I. The legislation will not clear title with respect to any of the holdings of any private individual, corporation, business, or other entity which are in excess of 50,000 acres in Area I, nor to any lands in Area I held by the State of Maine.

By preliminary estimate, the $25 million to be paid by the federal government would clear title to approximately 9.2 million acres within the original 12.5 million-acre claims area. All claims against householders, small businesses, counties and municipalities would be cleared. Approximately 3.3 million acres in Area I out of the original 12.5 million-acre claim would remain in dispute. About 350,000 acres of the disputed land is held by the state; the remaining 3.0 million acres is held by approximately 14 large landholders.

B. PROPOSED SETTLEMENT OF THE TRIBES' REMAINING CLAIMS AGAINST THE STATE OF MAINE AND CERTAIN LARGE LANDHOLDERS

The tribes and the White House Work Group recognize the desirability of settling the tribes' entire claim, if possible. However, direct discussions between the tribes and the State of Maine or between the tribes and the large landholders either have not occurred or have not been successful.

In an effort to promote an overall settlement, the White House Work Group has obtained from the tribes the terms and conditions on which the tribes would be willing to resolve their claims against the State of Maine and against the large landholders whose titles would not fully be cleared by the Basic Agreement. The tribes have authorized the Work Group to communicate these terms and conditions to the appropriate representatives of the State and the affected landholders. In this context, the Work Group serves primarily as an intermediary with limited authority to settle the remaining claims on the terms set forth by the tribes.

1. Claims Against the State of Maine.

The tribes have claims against the State of Maine for approximately 350,000 acres of State-held lands in Area I and for trespass damages. Rulings on several of the defenses originally available to Maine already have been made by the courts in the tribes' favor.

The State of Maine currently appropriates approximately $1.7 million annually for services for the Penobscot and Passamaquoddy Tribes. The tribes are willing to dismiss and release all their claims for land and damages against Maine in exchange for an assurance that Maine will continue these appropriations at the current level of $1.7 million annually for the next 15 years. The appropriations would be otherwise unconditional and would be paid to the United States Department of the Interior as trustee for the tribes. Should the State agree to give this assurance, the legislation to be submitted to the Congress by the Administration would provide for the extinguishment of all tribal claims to the affected State-held lands and all trespass damage claims when the last payment is made.

2. Claims Against Large Private Landholders.

In exchange for the dismissal, release and extinguishment of their claims to approximately 3.0 million acres within Area I held by the large landholders as described in the Basic Agreement, and in exchange for a dismissal and release of all trespass claims against said individuals or businesses, the tribes ask that 300,000 acres of acreage quality (approximately $112.50 per acre) timber land be conveyed to the Department of the Interior as trustee for the tribes, and that they be granted long-term options to purchase an additional 200,000 acres of land at the fair market value prevailing whenever the options are exercised. The tribes also ask for an additional $3.5 million to help finance their exercise of these options.

In recognition of the desirability of achieving an overall settlement, the Administration will recommend to the Congress the payment by the federal government of an additional $3.5 million for the tribes, if the affected private landholders will contribute the 300,000 acres and the options on 200,000 acres as set forth in the tribes' settlement conditions. Additionally, the Administration will recommend the payment of $1.5 million directly to the landholders contributing acreage and options to the settlement package. The $1.5 million would be divided proportionately according to the contribution made by the respective landholders.

If a settlement of the tribes' claims against the large landholders can be accomplished on the terms specified above, the Work Group has agreed to use its best efforts to acquire easements permitting members of the tribe to hunt, fish, trap and gather for noncommercial purposes and to obtain brown and yellow ash on all property from the large landholders within Area I. The tribes will be subject to applicable laws and regulations in the exercise of these easement rights. Additionally, it is agreed that the exercise of easement rights shall in no way interfere with the landholder's use of his property, either now or in the future. If the Work Group's efforts to acquire these easements are unsuccessful, the tribes have reserved the right to reject a settlement with the large landholders.

C. OTHER TERMS AND CONDITIONS

(1) Nothing in this agreement is intended by the parties to be an admission with respect to the value of these claims. If settlement can be accomplished, it will reflect a compromise from every perspective. The tribes regard their claims as worth many times more than any consideration to be received under this agreement. The State of Maine, on the other hand, has taken the position that the tribes' claims are without merit.

The Administration has chosen to evaluate the claims not merely on the basis of their merit and their dollar value, but also in light of the facts that the claims are complex; they will require many, many years to resolve; and the litigation will be extremely expensive and burdensome to everyone and could, by its mere pendency, have a substantial adverse effect on the economy of the State of Maine and on the marketability of property titles in the State.

With these considerations in mind, any settlement will reflect a shared understanding of the reality created by the litigation, rather than one party's view of the equity of the claims. The claims are unique, and resolution of them on any basis other than litigation similarly must be unique.

(2) If a settlement can be reached with the State of Maine, with the large landholders, or with both on the terms described above, the White House Work Group has the option of implementing a settlement on those terms, rather than on the terms of the Basic Agreement specified in Section A. The Work Group has agreed to consult with the tribes before choosing any of the alternatives provided by this agreement.

(3) The tribes recognize that in no event shall the federal government's cash contribution to any settlement exceed $30 million; the federal government will pay $25 million to achieve the Basic Agreement, and an additional $5 million to facilitate a settlement of all claims against private landholders.

(4) The location of the 300,000 acres must be satisfactory to the tribes. However, it is agreed that the 300,000 acres may be in several tracts, so long as the timber land is of average quality. It is also agreed that land will be selected in such a manner as to not unreasonably interfere with the large landholders' existing operations.

(5) The cash funds to be obtained in the settlement shall be paid in trust for the benefit of the tribes on terms agreeable to them and the federal government. No part of the capital will be distributed on a per capita basis. The terms of the trust shall not preclude reasonable investment of the principal, nor shall they affect in any way the right of the tribes to dispose of income. The right to dispose of income shall be wholly a matter for tribal discretion.

(6) All property and cash obtained pursuant to this settlement shall be divided equally between the two tribes.

(7) The federal government pledges that the tribes will be considered fully federally recognized tribes and will receive all federal services, benefits and entitlements on the same basis as other federally recognized tribes.

(8) All lands acquired by the tribes and land currently held by the tribes shall be treated for governmental purposes as other federally recognized tribal lands are treated. The consent of the United States will be given to the exercise of criminal and civil jurisdiction by the State of Maine pursuant to 25 USC 1321, 1322, provided that the United States may effect a retrocession within two years upon request of the tribes.

(9) If a settlement can be reached with the State of Maine, the White House Work Group will use its best efforts to obtain for the tribes assured access under mutually agreeable regulations to a designated place in Baxter State Park for religious ceremonial purposes. If the Work Group's efforts to obtain such assured access are unsuccessful, the tribes have reserved the right to reject a settlement with the State of Maine.

(10) With respect to settlement of the tribes' claims against the State of Maine and large landholders within Area I, the White House Work Group has 60 days to accomplish an agreement. If such a settlement cannot be accomplished within that period, the parties will proceed with the Basic Agreement outlined in Section A, above.

(11) The settlement agreement will be executed in a form appropriate to effectuation of the terms of the agreement and will preclude further litigation with respect to all claims settled. Suitable procedural safeguards will be adopted and implemented by court order in the pending litigation to assure that the parties' intent with respect to this settlement agreement is accomplished.

(12) The White House Work Group and this Administration pledge their vigorous support to settlement on the terms and conditions specified in this memorandum.

(13) This agreement is subject to ratification by the tribes on or by February Ninth, Nineteen Hundred and Seventy Eight.●

[3] For any landholder with holdings in excess of 50,000 acres, the 50,000-acre exemption would apply to lands which are representative of the overall holdings of such landholder.

ORDER FOR RECESS UNTIL 11 A.M. ON MONDAY, MARCH 20, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 11 a.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF LEADERSHIP ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Monday the two leaders have their regular time, which they normally have, as in legislative session, but that that time not extend later than 11:15 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF PANAMA CANAL TREATY ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at no later than 11:15 a.m. on Monday the Senate resume consideration of the Panama Canal Treaty, and that an amendment by Mr. DOLE be laid before the Senate at that time.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO CONVENE AT 8:55 A.M. ON TUESDAY, MARCH 21, 1978, AND FOR CONSIDERATION OF FARM BILL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Tuesday next, March 21, 1978, as in legislative session, the Senate convene at 8:55 a.m. following a recess at the close of business on Monday; and that immediately following the prayer the Senate, as in legislative session, then proceed to the consideration of the first farm bill at no later than 9 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF CONFERENCE REPORT ON REDWOOD NATIONAL PARK ON TUESDAY NEXT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on the disposition of the two farm bills, as in legislative session, on Tuesday next, the Senate proceed to the consideration of the conference report on H.R. 3813, the Redwood National Park bill, with the following agreement to obtain at that time: That there be back-to-back votes on the final passage of the two farm bills no earlier than 4 p.m., that the redwood conference report be called up with a time limitation thereon, in its entirety, of 4 hours, and that it be under the control of Mr. ABOUREZK and Mr. HANSEN, as in legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS FROM TUESDAY NEXT UNTIL WEDNESDAY, MARCH 22, 1978 AT 10 A.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business on Tuesday, it stand in recess, and this can be changed later, until the hour of 10 a.m. on Wednesday.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS ON TUESDAY NEXT

Mr. ROBERT C. BYRD. Mr. President, upon the disposition of the redwood conference report on Tuesday, would not the treaty then be automatically back before the Senate?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

AUTHORIZATION FOR COMMITTEE TO MEET

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Armed Services Committee be authorized to meet during the sessions of the Senate on Tuesday, March 21; Wednesday, March 22; and Thursday, March 23, to consider the military procurement authorization bill, which must be reported to the Senate by May 15 under the Budget Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, I would anticipate rollcall votes on Monday on amendments and/or motions in relation to the Panama Canal Treaty.

The first amendment to be called up will be an amendment by Mr. DOLE, which will be called up no later than 11:15 a.m. on Monday, with the Senate to come in at 11 a.m.

So I would anticipate that the Senate would be in no later than somewhere between 6 and 7 p.m. on Monday, and that on Tuesday the Senate would dispose of the two farm bills and the redwood conference report. Then the Senate would be back on the Panama Canal Treaty on Wednesday and on Thursday, with rollcall votes to occur during both days on amendments to the various articles therein.

RECESS TO 11 A.M. ON MONDAY, MARCH 20, 1978

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 11 a.m. on Monday next.

The PRESIDING OFFICER. The question is on agreeing to the motion. As many as are in favor say "aye." Opposed, "no." The ayes have it. The motion is agreed to. Accordingly, the Senate, on this St. Patrick's Day, stands in recess until the hour of 11 a.m. on Monday next.

Thereupon, at 4:44 p.m., the Senate recessed, in executive session, until Monday, March 20, 1978, at 11 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 17, 1978:

DEPARTMENT OF STATE

Alice Stone Ilchman, of Massachusetts, to be an Assistant Secretary of State.

The following-named Foreign Service officers for promotion from class 1 to the class of Career Minister:

Davis Eugene Boster, of Ohio.
Lawrence E. Eagleburger, of Florida.
Donald B. Easum, of Virginia.
Thomas O. Enders, of Connecticut.

INTERNATIONAL ATOMIC ENERGY AGENCY

Roger Kirk, of the District of Columbia, a Foreign Service officer of class 1, to be the Deputy Representative of the United States of America to the International Atomic Energy Agency, with the rank of Ambassador.

INTERNATIONAL COMMUNICATION AGENCY

John E. Reinhardt, of Maryland, to be Director of the International Communication Agency.

Charles W. Bray III, of Maryland, to the Deputy Director of the International Communication Agency.

Alice Stone Ilchman, of Massachusetts, to be an Associate Director of the International Communication Agency.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

RENE A. WORMSER ON THE REAL MEANING OF "TAX REFORM"

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. KEMP. Mr. Speaker, the unnecessarily high rates of taxation in this country confront us with an issue whose importance surpasses that of other domestic, economic or social issues.

There is much evidence to this point.

In day before yesterday's Washington Post, that newspaper's economics reporter, Art Pine, reported that families earning $10,000 a year or more pay 94 percent of all individual income taxes, that families earning $17,000 a year or more pay 70 percent of all such taxes. Those figures shoot through and through the assertion often heard in this Chamber—that tax rate reductions are needed most at the bottom end of the scale. They are in fact needed all across-the-board.

In yesterday's New York Times, Robert D. Hershey, Jr., reported in a major special to that paper that Britain's high taxes are the principal factor in the stagnation of that country's economy.

And in this morning's mail came a very timely and forceful essay on taxes, to the point that the most important tax reform of all is tax reduction and that we ought to rise up in anger over most of what is otherwise being labeled as tax reform.

Presented at the January session of the Estate Planning Institute at the University of Miami by Rene A. Wormser, a noted tax authority, this essay is a stinging analysis of the so-called tax reforms of the Tax Reform Act of 1976.

What Mr. Wormser says here is of particular importance to this Congress as it votes tomorrow on my permanent, across-the-board tax rate reduction goal amendment to the Humphrey-Hawkins bill and as it moves to another round in this tax struggle. I commend it to all of my colleagues, particularly those on the House Committee on Ways and Means, the Senate Committee on Finance, and the Budget Committees. The essay follows:

IT IS TIME WE GOT UP ON OUR HIND LEGS REGARDING TAX REFORM

(By Rene A. Wormser)

It has been said that there are no longer enough angry men. Certainly we who help others with their planning have not been angry enough. Yes, we fulminate among ourselves against the injustices and absurdities of our tax system, but few of us do anything active to press for sensible reform.

Roscoe Pound once said that, in a democracy, government operates through an adjustment of pressures. We have allowed ourselves to be overwhelmed by pressure from those whose concept of tax reform has been to promote egalitarianism. Our opposition has been feeble indeed. Because we have not fought it with sufficient vigor, perhaps we deserve what has been imposed on us.

The pressure toward egalitarianism has come from several groups—from those who simply hate wealth; from idealists who are well-meaning but act in ignorance of economics; from academicians who don't understand the marketplace; from minorities whose understandable personal discontent leads them into dissatisfaction with the operation of our free enterprise system; from some demagogic leaders of organized labor who may or may not represent the true views of members; from some men of political influence who have inherited great wealth and exhibit a sense of social guilt for not having earned their own wealth; and from politicians who wish to be elected and re-elected and who thus operate from a basis of short-term political expediency.

Gradually, over the years, our tax system has been given a new course. It has long since ceased to be devoted solely to the support of government. It has been given a sociological function. The concept of "transfer payments" has been superimposed on it. Its new objective is illustrated by this statement of President Johnson made on January 5, 1964:

"We are going to try to take all the money that we think is unnecessarily being spent and take it from the 'haves' and give it to the 'have nots' that need it so much."

The concept is better known as "soaking the rich". It is a Robin Hood approach.

The concept has accompanied the development of the Welfare State. That development has been a sad mistake. That some welfare measures are desirable there can be no doubt, but our approach to solving social problems has been excessive abortive and wasteful. Whatever "welfare" measures may seem truly necessary or advisable should be paid for through general taxation (a legitimate form of transfer payment). But direct taxation is not popular. The public must be led to think that it is getting benefits without paying for them. So Congress has resorted to deficit financing. This avoids direct taxation, but produces inflation, a form of indirect exaction far more devastating than direct taxation.

But even deficit financing has not provided enough to satisfy the political objective of seeming to grant benefits without cost to the beneficiaries. More and more, Congress has adopted the principle of taxing the so-called rich for the benefit of the so-called poor. There has been a steady increase in this use of the transfer payments system. Driven to an extreme, the use of this mechanism would result in socialism. Indeed, we are approaching it rather rapidly. Are we not close when, as is the case, 37 percent of the gross national product and 43 percent of the per capita national income goes to government!

A basic political objective is and should be to increase the standard of living of the mass of our people. This objective cannot be attained through egalitarianism. There is only one way to achieve it and that is through increases in production. The American Economic Foundation has long promoted this explanatory formula:

$$MMW = NR + HE \times T$$——

That is, *Man's Material Welfare* depends on the use of *Natural Resources* to which *Human Energy* must be applied, and human energy isn't worth much without *Tools*. The more and better tools we have, the more goods and services can be produced, and the more cheaply. So it follows that the formation of capital is essential to the development of our economy.

And how can capital be formed? Only through profits and savings. Of course, if you make profits and save you may get rich. The egalitarian movement which has beset us does not like people to get rich and keep their possessions. Abraham Lincoln knew better. In an address delivered at New Haven, Connecticut, on March 6, 1860, he said:

"It is best to leave every man free to acquire property as fast as he can. Some will get wealthy. I don't believe in a law to prevent a man from getting rich, it would do more harm than good. So, while we do not propose any war on capital, we do wish to allow the humblest man an equal chance to get rich with everybody else."

Congress does not support Lincoln's position. If I recall correctly, he said, on another occasion, that if some get rich it would prompt others to. But many of our legislators seem to believe that getting rich is in itself evil.

What is wrong with getting rich? Was it wrong to allow Henry Ford to acquire great wealth? Was his acquisition of riches antisocial? Or, like so many who followed the American dream of starting at scratch and developing a great enterprise, did he not contribute enormously to employment and to growth and prosperity of the whole society?

Those egalitarians who think of themselves as "reformers" have been able to impose on us legislation like the miserable Tax Reform Act of 1976, and have made it ever more difficult to form and accumulate new capital, so badly needed for our economic progress. Nor has this pressure been directed solely against the truly rich. We have "soaked" not just the rich but also the middle class, the most productive class in our society. Moreover, the drive to egalitarianism has retarded the ability of the young and aspiring, particularly of those of the lower economic classes, to raise themselves into at least the middle class. Remember, Lincoln said: ". . . we do wish to allow the humblest man an equal choice to get rich with everybody else."

Let's see what our tax system has done to the "American Dream" of "rags to riches".

Take the case of one Jones, a "little man", who manages to save $10,000 with which to start a small shop. In the course of time he incorporates his business. Through hard work and frugality he manages to build his venture up until, because of ill health, he decides he must retire, and it is then worth $500,000. So he sells his business at that figure. Under our law he has made a taxable capital gain of $490,000. So what is his tax liability and how much would he have left upon which to retire?

The maximum capital gain tax used to be 25%. That would have cut substantially into his retirement fund. But it was raised not so long ago to a rate of 35% over $50,000 of gain. That would have left him considerable worse off. And now we have tht unconscionable Tax Reform Act of 1976.

It was rushed through Congress without any public hearings. It is lengthy and complex and is hardly and badly designed. Under its minimum tax and preference income provisions, Mr. Jones would be taxed brutally indeed. If he lived in a state with a capital gain tax, the aggregate capital gain tax on his sale might be in excess of $200,000, leaving him only 60 percent of the proceeds of sale as his retirement fund. This is an utterly unconscionable result.

But that is not the end of the story. A considerable part of the growth in value of his business would likely be the result of inflation. The dollar has lost close to 80 percent of its buying power since 1932; one-half since 1967; and one-third since we went off the last tie with gold in August of 1971. Therefore, to the extent Jones is taxed on whatever part of the increase in dollar value of his business represents a mere dollar-value increase and not a true purchasing-power increase in value, part of his principal is actually being confiscated.

An intelligent child could understand that our tax system, in taxing capital gains, is confiscatory when unadjusted for inflation. But Congress closes its eyes and its ears to the injustice involved, though being careful to index Congressional salaries to protect senators and congressmen against inflation.

The extreme egalitarians may be happy to see capital confiscation, as a satisfactory application of the transfer payments principle, for they conceive that it is only the rich who will suffer by it. They seem not aware that confiscating capital affects the middle class as well and, for that matter, the relatively poor, who need tools to work with. Many a "poor" man, for example, has managed, by working hard and saving, to buy a home for a modest price, paying for it, over the years, in installments. He is happy, then, to find that his home, because of inflation, is worth far more than he paid for it. Ah, but when he sells it, the capital gain tax settles on him, taxing also the inflationary increase in dollar value and thus confiscating part of his capital.

How, in good conscience, can Congress possibly justify this monstrous attack on the citizen's capital represented by his home!

The application of capital gain tax at inordinately heavy rates is brutal indeed. When these rates are not adjusted for inflation, the tax has been called a theft by government. It is just that. I have wondered whether a constitutional question may not be involved. Can the government confiscate capital under the guise of an income tax system? That is just what ours does. Wasn't it John Marshall who said "The power to tax is the power to destroy"; Congress has been using its taxing power to destroy capital.

But some egalitarians are not satisfied with this despoiling of the taxpayer. There are strong advocates of taxing long term gains as ordinary income. How pleasant this would be for the Mr. Jones, whose case I described earlier, to tax his entire "gain" of $490,000

as ordinary income! This cannot be defended on any moral basis!

How the egalitarians hate capital formation! There has been pressure, for some time, in favor of taxing unrealized capital gains at death, on the argued theory that it is not fair that a man who sells during life must pay a capital gain tax, while he who leaves his property by will evades such an imposition. Such unrealized capital gains are, in fact, taxed at death—with estate tax. But this was held not to be enough. It did occur to the designers of the 76 Act that there would be hue and cry against taxing gains until they were realized. So the "carryover" mechanism was enacted under which the recipient of property from an estate will be taxed with a capital gain tax, subject to some adjustment for estate tax paid, when he sells.

A concession was made, insofar as the cost basis was to be stepped-up to the value as of December 31, 1976. Thus, only increases in value subsequent to that date would be taxed with capital gain tax. However, inflation will continue until Congress chooses to do what is necessary to stop it, and it shows no disposition to do that. Therefore, the capital-confiscation factor in relation to the after-death taxation of gains will continue.

In establishing the December 31, 1976 values of listed securities, there is no serious initial problem. When it comes to other types of property (real estate, antiques, art objects, closely held securities, etc.), Congress imposed on us a very complex and enormously burdensome formula for ascertaining the December 31, 1976 value. In countless instances, compliance will be utterly impossible. In others, for example in the case of shares in a closely held corporation, the research complexities can be fearsome.

But this is only the beginning of the problem presented to executors (who must provide carryover basis information or be fined for failure to do so). It would take many pages to describe the errors and pitfalls contained in the imposed system. It would take even more pages to outline the complexities of computation necessary to arrive at a (hopefully) final carryover basis. The back-room gnomes who drafted the carryover provisions produced what Frederick S. Lane (Chairman of the Real Property, Probate and Trust Law section of the American Bar Association) has called a "public disaster".

Did even one congressman or senator who voted for the '76 Act understand fully what he was voting for? I doubt it! What a sad commentary on our legislative process!

There is now some hope that the entire carryover concept may be scrapped. We should pray that the realization among some legislators, that a grave error has been made, may spread. Tinkering to try to improve the mechanism might only make it worse. It should be buried—requiescat in pace.

Carryover was another attempt at "loophole-closing". Someone defined "loopholes" as those parts of one's income or wealth which are not confiscated by government. Congress finds more and more so-called "loopholes" to close, often reversing what a previous Congress had introduced for sound reasons. And, in all these "reform" efforts inflation is virtually ignored.

The progressive income tax system may have logical justification, although many doubt this. At any rate, if we are to have it, there should be a periodical adjustment of its rates to operate fairly. "Indexing" may not generally be desirable, but in connection with our tax system, it is essential. The income tax scale rises rapidly in the lower tax brackets, forming a convex curve of rapidly rising rates, whereas it should be concave, that is, it should rise much more slowly in the lower brackets. And, when inflation is present, then in order to try to keep pace with inflation, the taxpayer must try to raise his income at a still higher rate in order to retain the same purchasing power. This, in itself, promotes more inflation and, of course, economic disorganization. While Labor has often pressed excessively for wage increases, it cannot be blamed for its efforts to try to keep pace with inflation. Our progressive rate system, with no adjustment for inflation, has multiplied pressures for rapid increases in labor costs. It has produced wage increases in excess of productivity.

The progressive rate system has been applied with equal soundness to gifts and testamentary dispositions. Until the 76 Act there was no recognition of the extent to which inflation distorts the cost of dispositions of wealth. Even in the 76 Act the adjustments have been far from sufficient to compensate for the inflation which has been imposed on us. The exemption against the new uniform transfer tax, for example, which the Act has granted may seem generous, but it is far from adequate to compensate for inflation, and, being fixed in dollar amount, it will erode with further inflation.

It is difficult to understand why it was held desirable to discourage giving during life. Yet the uniform transfer tax has done this. But the animus of the designers of the 76 Act is shown very clearly in their failure to increase the gift tax exclusion. Instead of being increased, this exclusion has been reduced over the years. It was $5,000 in 1932; it was lowered to $4,000 in 1938, and to $3,000 in 1942; and the 76 Act retained it at that figure. To be fair to the taxpayers, this exclusion, in the face of inflation, should have been raised to some $12,000 or even $16,000.

Not only through the uniform transfer tax "reform" but also through the generation-skipping and other provisions of the Act it was made utterly clear that the purpose was not only to hamper the formation of capital but severely to limit its preservation and disposition. The desire to leave one's heirs some reasonable part of what one has worked to accumulate is a natural and hardly reprehensible motive. So, efforts harshly to limit the amount one can leave to one's family must be considered anti-social. It ignores one of the natural and basic motivations of human action and retards the growth of productive capital so necessary to our economic system.

Our method of taxing corporations and corporate interests obviously has been unsound. Congress likes the corporate income tax because it is a way of taxation which seems to many taxpayers to be painless to them. But it is not painless to the public. Corporations are, in a sense, mere conduits. That is, as a practical matter, the price to the public of product or service produced by the corporation will reflect what taxes it has had to take into account in determining price in order to achieve a fair net return.

The system imposes double taxation in two ways. Let us go back to our small entrepreneur, Mr. Jones, and see how the system operates in his case.

His corporation was subjected to corporate income tax. Then, when part of the net after taxes was paid to him in dividends, this part was taxed again. So, while Jones is building up his business, he is subjected to one form of double taxation. But that is not the end of his trouble. When he sells his business he is double-taxed again. The $490,000 growth in the value of his company consists of an accumulation of net profits after taxes. And so, when he sells out and a capital gain tax is imposed on that $490,000 of added value, he is taxed again—i.e., on what was left after he had already paid income tax on his profits. How can that be defended!

It is truly amazing that these abuses have persisted so long. There is now (belatedly) some recognition among some of our legislators that something should be done about it. Can we hope for a simple and straightforward solution of the problem? We can hope, but, if anything is done about it, it probably will be in the nature of a compromise, giving only partial relief and adding long and complex provisions to the already monumental Code instead of promoting simplification.

Indeed, we may not only get no sensible relief but be subjected to a new and monstrous imposition. The pressure mounts for taxing capital gains as ordinary income! If this should be enacted, what would Jones have left after a lifetime of work building his venture!

The complexity of our tax system (often a mystery even to so-called experts), will continue to impose on the public the waste of billions of dollars and the expenditure of countless hours of unproductive labor.

Aside from the many grave fallacies in the design of our tax system, the aggregate size of the tax burden which we must bear deserves sharp attention. The badly conceived and wasteful Welfare State drift has been largely to blame for the imposition of this huge burden on both poor and rich alike. But another factor bears heavy responsibility. Our government has grown outrageously paternalistic.

Our actions, both in personal and business life, have been restricted progressively. More and more, our independence has been sacrificed to the concept that politicians and bureaucrats know what's best for us and must impose it on us. Unsound as this concept is, its injury to Americans of all types is aggravated by the huge extent to which it has required heavy additions to our tax burden because of the costs of executing it. It has been implemented chiefly through the creation of an endless number of bureaus, commissions and agencies, manned by armies of persons extracted from productive occupations and assigned to unproductive work. The cost has been utterly stupendous and must be paid for in taxes. Nor is it paid for solely by the rich.

Much has been written about the vast number of regulations produced by these agencies of government. In one year, 10,000 new regulations were under consideration. So, in addition to the additional tax burden which these agencies produce, we must consider the even greater cost of complying with the countless regulations. This additional expense is passed on by business to the taxpayers in increased cost of products and services. The poorest man pays, directly or indirectly, for a part of this profligacy.

An enormous section of our law consists of bureaucratic legislation. Almost all of the national bureaus are autonomous, and their regulations are law until or unless they are overturned by a court. So a great many of the rules under which we live and have to do business are enacted not by Congress but by independent agencies—by men whom we have not elected to make law for us.

Many of these regulations are impractical, some ridiculous. And, while large corporations can afford to finance compliance with them (by passing the cost on to their customers), it is the smaller businesses which are most heavily inconvenienced, and even penalized. They often cannot afford to meet even the heavy cost of detemining to what regulations they are made subject, much less the cost of compliance.

What is basically wrong with our tax system is its violation of sound economic prin-

ciples. It should not be used as a vehicle for the reformation of our social structure, for shifting us ever closer to socialism, for impeding the capital formation which is the key to progress for all, epecially for the young who as yet have no capital.

Bad as our system now is, it could get much worse. The egalitarian movement is very strong, allied as it is with politicians who see the personal, political benefit of giving more and more to the public in what has the false appearance of being produced painlessly.

So, we must do what we can to fight against what is now fallacious in our tax system, and to forestall what is likely to menace us further. Much can be done by angry men. The efforts of even a single man can have heavy impact if he is determined enough. Pressure, heavy pressure, must come from advocates of sound economics and from those who understand that our tax system, in many respects, is on the wrong track. If we, who are so intimately involved in taxation, continue to bask in political inertia, the future hardly looks bright.

We must be alert to threatened expansions of the egalitarian movement. Through individual action and through influencing bar associations and other organizations, by every means we can, we must demand reason.

Part of the problem is directly political. Don't neglect primaries! Within a party, we must vote for and support candidates for nomination and for election:

Who believe that the egalitarian movement is fallacious and dangerous;

Who understand that tax measures which tend to destroy incentive are abortive;

Who realize that the progressive formation of new capital is essential to a sound economy;

Who recognize, as Abraham Lincoln did, that encouraging the acquisition of wealth is good for the country;

Who are acutely aware of the devastating impact of inflation and who deem its curbing must be our primary objective;

Who understands that deficit financing in time of peace is unconscionable and is the primary cause of inflation;

Who understand that operating on a fiat money system makes it all too easy for government to be profligate; and,

Above all, who believe that taxation should not be used as a means for affecting egalitarianism.

And when election time comes, we must not vote solely as Democrats or Republicans, but support and vote for those candidates of either party who espouse the principles I have just listed.

But we must not wait for primaries and elections. Sustained pressure is needed—relentless pressure for good sense. We must keep at it—keep at the Press, radio, TV, Congress, the White House, state capitols, mayors, bureaucratic leaders. Long distance telephoning is now cheap. Letters and telegrams may be even better. Seek out the executive assistants who prepare the material on which legislators and others usually make up their minds. Influencing these can influence their principals.

But none of us have all the necessary materials at hand to support our protests. Constant research is needed—more than any individual can hope to undertake by himself. We must have the data and other materials on which to base our positions. And so, support organizations which compile and supply these tools. Get the facts and then keep up unremitting pressure. Persistence can pay off.

If we do not fight for what we believe to be right, the future looks dismal indeed.●

ST. PATRICK'S DAY

HON. JOHN J. CAVANAUGH

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. CAVANAUGH. Mr. Speaker, March 17 is the day of the year when all the world is Irish. One day when America recognizes the great contributions that the Irish have made to build and defend our country. But there is a sadness in that celebration as well, for the deplorable violence in Ireland continues day by day, and the deprivation of human rights continues unabated.

The people of Ulster need to reconcile their differences, but the Governments of Britain and Ireland must act in the best interests of the people of Ulster if the violence is to end. As Americans, we too have an obligation, be Ireland to any one of an ancestral home, an ally or a small nation rich in cultural heritage. We must do all that we can to facilitate the establishment of a permanent peace in Ireland. Every quarter of Irish opinion, Republican, unionist, and moderate, must be cast aside for a future society in establishing a lasting peace.

It is said that there is no present in Ireland, only the past happening over and over again. Looking to the future, however, must be the main concern of all parties involved. The discrimination and violence of the past and present must be cast aside for a future society in which all Irishmen and Irishwomen around the world can look upon with pride.

The land of saints and scholars can once again be foremost among the small nations of the Earth. When the industry of the northerners is again coupled with the artistry of the southerners, then the freedoms we have so well realized in America can be Ireland's as well.

The Gael fought so hard for America's freedom. Several signers of the Declaration of Independence were Ulstermen. The Irish in America have never failed to respond when called to defend this country.

It is in that sense of obligation to all of America's ethnic roots and our firm desire for peace with justice around the world that we cannot ignore Ireland's troubles as we have so often in the past. The beacon of hope that America has been to Ireland's downtrodden should now shine all the brighter to give them the same life, liberty, and equality that American's enjoy and all Irishmen deserve. The Irish are far flung, but they are no transient tribe, no petty people and they should be allowed to live in peace and dignity in their own land.

What a cause for celebration it would be indeed if next Saint Patrick's Day we could sport the green and the orange together, and honor an Ireland no longer rent by destruction and discrimination. An Ireland where Protestants and Catholics could work together in building the future of their own country, as they have so diligently helped to build our own.●

JEFFREY BELL MAKES A CONVINCING CASE FOR PERMANENT TAX RATE REDUCTIONS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 16, 1978

● Mr. KEMP. Mr. Speaker, I read several days ago one of the most convincing cases for permanent tax rate reductions for the American people that I have ever read. It is one of optimism. It makes a point with which I totally agree: If we view off-year congressional elections primarily as verdicts and Presidential years as a combination of verdicts and forecasts, the American electorate knows what it is doing. And, it is calling for, demanding, permanent tax rate reductions something for which I've worked for years.

This article is particularly perceptive, penetrating, because it deals with the impact of that point upon the survival of the two-party system, and it then proceeds to detail a strategy for the survival of that system. The point is well made that the Republican Party has no hope for a future, if it continues to be perceived as the party of tax collectors for Democratic spending programs. His view that we must lower tax rates to restore the incentive so necessary for working and investing in America today underscores what the clear majority in the Republican Party in Congress and a growing majority of all Members of Congress are trying to do.

I commend this important article to the attention of all my colleagues and to our workers and taxpayers concerned for the future of our Nation:

[From the Bergen County/Passaic County, (N.J.) Record, Mar. 7, 1978]

A BRIEF FOR REPUBLICAN OPTIMISM

(By Jeffrey Bell)

If I had to give a single reason for my presence in this year's U.S. Senate race, it's my belief that the electorate may be much smarter than a lot of people think it is.

By "a lot of people," I'm thinking particularly of the elected officials, issue activists, political technicians, and journalists among whom I've spent nearly half my life. The consensus among these folks, whose lives are spent trying to communicate with the people in one way or another, is that the American electorate is shortsighted, selfish, and easily swayed.

As a direct result of this view, the trend of our politics in recent years has been toward manipulation and away from persuasion as it was understood and practiced by, say, Lincoln or Woodrow Wilson—toward changing the voters' "perception" of the world around them, as opposed to changing the actual conditions in which people must live and work.

This is a cynicism about people and a pessimism, therefore, about what democratic politics can accomplish. Nowhere is this pessimism more widespread than in the Republican party.

A casual observer might quickly add that, following the Nixon-Ford years, the Republican party has a lot to be pessimistic about. But my feeling, after full-time involvement in presidential campaigns at each end of that era—the Nixon campaign of 1968 and the Reagan campaign of 1976—is that Republican pessimism led to the failures of the Nixon-Ford years, rather than the other way around.

On taking over the executive branch in 1969, the Nixon administration was so intimidated by the opposition-controlled Congress, press, bureaucracy, and universities that little of importance was offered as an alternative. Republican pessimism became a self-fulfilling prophecy as the anti-Washington mandate of 1968, in which the Democratic presidential vote shrank from 61 to 43 percent in only four years, was dissipated in drift, cosmetics, and overblown rhetoric.

When this mix failed to ignite the electorate, the administration's pessimism caused it to turn its gaze toward supposedly implacable "enemies" as the cause. The whole poisonous cycle that led to Watergate had begun.

Even today, there is a tendency on the part of many Republicans to agonize over the supposed ignorance of the voters. How else, we ask each other, could they pick Carter over Ford and choose a Congress nearly two-thirds Democratic?

The answer, or so it seems to this unrepentant Ford voter, is simple: In eight Republican years, the nation enjoyed two recessions, two presidents, three vice-presidents, four "phases" of economic controls, and the first lost war in our history. Against this background, the miracle of 1976 is not that the "in" party lost at all levels, but that its presidential ticket carried 27 states and nearly ate up a 30-point poll deficit.

For this comeback we have the Carter-Mondale general-election strategy (so different from the Carter primary strategy) to thank. Just as the Democrats' initial 30-point lead was the electorate's considered appraisal of the eight Republican years, so the loss of nearly all that lead was the electorate's forecast (and growing wariness) of the prospective Carter-Mondale years.

In the end, the voters chose to terminate the eight-year GOP incumbency. One can disagree (and nearly half of us did), but is it fair to describe the verdict for Carter as blind or unreasoned? I think not.

From the beginning of this Republic, administrations have been judged by performance in office—particularly by the state of the economy. A party holding the presidency during a recession or panic has invariably been penalized in the next off-year election and unceremoniously ejected in the next presidential year, assuming the slump continued and the "out" party presented viable alternatives.

Contrary to some loose talk, this persistent practice did not start during the rapid centralization of the 20th Century—it has been a hallmark of our politics since the late 18th Century.

If we see the behavior of the electorate in these terms—off-year congressional elections primarily as verdict, presidential years as a combination of verdict and forecast—we begin to arrive at an exhilarating fact: By and large, the American electorate knows what it is doing. Failure is punished, success rewarded, alternative futures assessed—not always accurately, true, but within the scope of the facts available at the time of voting.

A study soon to be published by Edward Tufte of Yale argues that in the case of midterm elections, the "in" party's percentage of the national House vote is so tightly calibrated to the performance of the economy and the popular rating of the president as to be predictable in advance.

If there is one thing in our 200-year history that the national government has always been able to accomplish, it is the dislocation of production and commerce. It is an ability shared by the "small" federal governments of the Jacksonian era as well as the "big" governments of today, because more often than not the government-bred dislocations stem from seemingly "small" or "neutral" political changes in taxes, tariffs, or regulations.

As in the case of the recent Carter payroll tax increase, the incumbents usually make the changes in near-total ignorance of the crippling economic effects to follow.

Instead of the break from the recent past that Mr. Carter seemed to offer during the 1976 Democratic primaries, his Administration is intensifying the mistaken policies that put us where we are. Since around 1965, the national government has been enmeshed in income redistribution at the expense of income growth. As a result of overcentralization, manic regulation, and—above all—prohibitively high tax rates on personal and business income, major sectors of the economy have withered.

The voters sense that it's time to end our obsession with slicing up the pie and resume the task of making the pie bigger. This can be done by increasing the after-tax rewards for all Americans by means of a Kennedy-style tax rate cut of about one third, across the board.

Just as the Kennedy tax cut reduced the top marginal rate from 91 to 70 per cent and the bottom rate from 20 to 14, so we should now reduce the top and bottom rates to 50 and 10 per cent—not the piddling reduction to 68 and 12 per cent that President Carter has proposed, a cut that will hardly begin to atone for the payroll and energy taxes he has inflicted, or is trying to inflict, on the private sector.

Now as in the Sixties, warnings are heard of an impending "revenue loss" to the Treasury if a deep rate cut is enacted. But, now as then, inflation has pushed the real marginal rates so high that cutting the rates would certainly mean more revenue for the Treasury.

Instead of collecting its revenue by means of high tax rates on low production, Washington could be collecting the same amount by low tax rates on high production. For the first time since the early 1960's our economy could enter a period of expansion that would mean more jobs and higher after-tax incomes for all Americans.

For nearly a decade and a half, under the four presidents starting with Johnson, the electorate has observed the effects of income redistribution, and it has drawn negative conclusions. In the past, Republicans like Senator Case have used redistributionist policies to reach out to blacks, union members, and others largely outside GOP ranks, But today these voters, the ones most hurt by economic stagnation, are the least likely to want more of the same.

As the recent NAACP report on energy suggests, blacks are on the brink of making a commitment toward private-sector growth as the way out of the present morass. They see that such Carter-Case solutions as busing, quotas, and anti-poverty funding have been accompanied by a doubling of inner-city unemployment and increased family breakup. They are drawing the proper conclusions.

Now is precisely the time for Republican candidates to make clear that the approach we offer is different and has a future.

The years 1969–76 were not successful ones for Republicans, and here in New Jersey we've suffered the added indignity of a frustrating, needless defeat in 1977. If there is any comfort in these setbacks, it is the knowledge that, by and large, we brought them on ourselves.

Rather than blame the voters for changing unsuccessful governments and spurning poor campaigns, we should move swiftly to position ourselves as an alternative to the crippling tax and regulatory policies in Washington that (for better or worse) once again have an exclusively Democratic cast.

If in 1978 we emerge persuasively as the party of tax reduction and income growth for all Americans, we Republicans will be back on our feet so fast it'll make the Democrats' heads swim.●

A WELCOME TO THE SOLDIERS HOME, AMPUTEE VOLLEYBALL TEAM FROM TEL AVIV WHICH WILL TOUR THE UNITED STATES IN APRIL

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, March 17, 1978

● Mr. KEMP. Mr. Speaker, it is my pleasure and privilege to announce to my colleagues the tour of a unique team of athletes from Israel.

The volleyball team from Beit Halochem, which is Soldier's House, near Tel Aviv, will be conducting a 2-week competitive trip through several east coast cities. The team, comprised of disabled Israeli war veterans, captured the gold medal in the 1976 World Handicapped Games held in Toronto, Canada. The players, who are arm and leg amputees, are now fully equipped with artificial limbs and similar apparatus. They are very mobile on—and off—the volleyball court and play according to international rules, the olympic rules.

Under the auspices of the U.S. Committee Sports for Israel, Inc., the volleyball team will appear in Washington, D.C., Wilmington, Del., Philadelphia, Pa., Yonkers, N.Y., Norwalk, Conn., and Marblehead, Mass. The team will play exhibition matches against the regular teams which represent the Jewish Community Centers in those communities.

The volleyball team from Beit Halochem will be arriving in New York City on April 23, 1978. On the following day, Monday, the 24, I will have the honor of hosting these athletes at a luncheon here at the Capitol. I hope to have the opportunity to show this group the facilities of the House of Representatives and to leave them with a positive and lasting impression of one of our country's oldest and most cherished institutions of democracy.

I am in whole-hearted agreement with Mr. Nat Holman, president of the U.S. Committee Sports for Israel, in his description of the members of this team as "quite remarkable and courageous people."

I am certain that these athletes, who have overcome serious injuries sustained in combat, will be as a group, an unforgettable source of inspiration to those with whom they will come in contact during their stay.

I look forward with great anticipation to their visit to the Nation's Capitol and wish them a most successful and rewarding experience in the United States.●

HOUSE OF REPRESENTATIVES—*Monday, March 20, 1978*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Blessed be His glorious name forever: and let the whole Earth be filled with His glory.—Psalms 72: 19.

Eternal God, our Father, as we enter Holy Week grant unto us a genuine sense of Thy presence. Come into our hearts and make them pure. Come into our homes and make them sanctuaries of love. Come into our churches and make them shrines of Thy grace. Come into this House of Representatives, and make it reflect Thy glory with high morality and deep devotion. Come into our offices and our shops and make honesty rule every endeavor. Come into the hearts of our people and make us a nation fervent in faith, strong in spirit, lovers of liberty, and pursuers of peace. So may justice and freedom, love and truth, come to rule the hearts of people and nations everywhere.

In the spirit of the Prince of Peace we offer this our morning prayer. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate disagrees to the amendment of the House to the bill (S. 9) entitled "An act to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. JACKSON, Mr. CHURCH, Mr. JOHNSTON, Mr. ABOUREZK, Mr. BUMPERS, Mr. HANSEN, Mr. MCCLURE, and Mr. BARTLETT to be the conferees on the part of the Senate.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE REPORT ON HOUSE JOINT RESOLUTION 796, MAKING SUPPLEMENTAL APPROPRIATIONS FOR DISASTER RELIEF FOR FISCAL YEAR 1978

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight to file a report on House Joint Resolution 796, making supplemental appropriations for disaster relief for the fiscal year 1978.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar day. The Clerk will call the first bill on the Consent Calendar.

AUTHORIZING RETIREMENT OF CERTAIN RESERVE ENLISTED MEMBERS AFTER 20 YEARS OF SERVICE

The Clerk called the bill (H.R. 10341) to amend title 10, United States Code, to authorize Reserve enlisted members of the Army and the Air Force to retire with 20 years of service.

Ms. MIKULSKI. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

RECALCULATING THE RETIRED PAY OF CERTAIN SENIOR ENLISTED ADVISERS OF THE MARINE CORPS

The Clerk called the bill (H.R. 10343) to provide for recalculation of the retired pay of individuals who served as sergeant major of the Marine Corps before December 16, 1967.

Ms. MIKULSKI. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

A MESSAGE THE RUSSIANS UNDERSTAND

(Mr. SIKES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SIKES. Mr. Speaker, at Wake Forest University in Winston-Salem on Friday, President Carter said the United States is determined not only to maintain a strategic balance with the Soviets, but also in developing forces to counter any threats to our allies and our vital interests in Asia, the Middle East, and other regions of the world.

He stated further,

We will match, together with our allies and friends, any threatening power through a combination of military forces, political efforts and economic programs. We will not allow any other nation to gain military superiority over us.

This is a welcome statement. I applaud the President for his forthright stand. Regretfully, it is one that is long past due. It expresses an attitude which is not borne out in the fiscal year 1979 budget now before us, nor in the Defense budget for the current year. Nevertheless, if vigorously followed through by appropriate action in the administration and in Congress, it will place our Nation again in position to earn the respect of the free world and to provide the leadership which is so desperately needed. Expanding areas of Communist control throughout the world must be encountered and contained.

The President's statement got the attention of the Soviets. It is language they understand. Their quick response through the Soviet news agency Tass demonstrates their concern about the ability of the United States to be strong and to act strong, and our willingness to use procedures more effective than the unheeded notes which heretofore have been our characteristic response to Soviet aggression.

It is also very important that specific proposals for strengthening America's military defenses be taken now. Paper airplanes that schoolchildren manufacture from note paper are not formidable weapons. Speeches not backed by action are like paper airplanes.

MIDDLE-INCOME STUDENT ASSISTANCE ACT

(Mr. COUGHLIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COUGHLIN. Mr. Speaker, I rise in anger to warn my colleagues of the Carter-Califano chicanery that if successful would, in fact, rob Members of their right as elected U.S. Representatives to vote on an issue crucial to the educational fortunes of millions of taxpaying Americans—education tax credits.

By now, I am sure you all are aware of the blatant political manuever to bypass usual House rules and procedures, and bring the mislabeled Middle Income Student Assistance Act to the floor today under suspension of the rules. This would permit a vote on the Carter-Califano education bill, but not on an amendment for education tax credits.

To those of us used to being violated by the House leadership, this should come as no surprise.

To the many of my colleagues who believe the House should make its own rules and abide by them, this may come as a shock. I hope it does.

In addition to the House leadership dictating to the majority, we find that the President—who cannot even run the White House—wants to intrude into the legislative branch and make the House violate its own rules.

Mr. Carter is joined by the omnipotent master of our citizen's health, education, and welfare—Joseph Califano—in trying this out-of-bounds end run to prevent the elected Representatives from voting on education tax credits.

For the record—the Senate has voted

six times in the past 9 years for higher education tax credits.

You and I have been denied—by hook, crook, or legislative hanky-panky—from ever voting on the merits of education tax credits whether elementary, secondary, or higher.

Just last Thursday, I was scheduled to testify before the Rules Committee on procedures for debate and voting on the Carter-Califano education bill. The flurry of heavyweight Congressmen bursting in and out of the hearing should have alerted me to something unusual.

I did not testify, but was promised I would when the Rules Committee convened again on Monday.

At 6 last Friday evening, I received a call from a staff assistant. She had been informed by a staffer to a senior Republican on Education and Labor that our distinguished colleague and Post-Secondary Education Subcommittee chairman, the Honorable WILLIAM FORD, had been to the White House on a St. Patrick's Day visit.

The decision had been made to dispense with notification to what Mr. FORD must view as two very dispensable committees—Rules and Budget—that the Carter-Califano bill would be called up today under suspension. This neatly relieves Rules from deciding whether the Frenzel amendment—the House version of the Senate compromise on education tax credits—is germane. In doing so, however, it confirms what a lot of us knew. It is germane as germane can be.

I make quick note—because it deserves so little consideration—of Attorney General Bell's Saturday statement that the Justice Department views education tax credits as unconstitutional. I hesitate to impugn the Attorney General's credibility any more than the recent performances of Mr. Bell and his department lawyers have done by themselves.

It just seems to me that the waterboy is not going to dispute the coach.

I, therefore, urge you in good conscience to vote against considering the so-called Middle Income Student Assistance Act under suspension. Do not give away your individual choice to consider and vote on so vital an issue.

Perhaps, the voice of the turtle is now being heard throughout the land. So is the voice of your constituents.

MIDDLE-INCOME STUDENT ASSISTANCE ACT

(Mr. ERLENBORN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ERLENBORN. Mr. Speaker, later today under the call of the Suspension Calendar, I understand it is now the intention of the leadership to call up H.R. 11274, the Middle-Income Student Assistance Act. Mr. Speaker, this comes as quite a surprise to most of us. First of all, the leadership, the Democratic leadership, last week when announcing the business for today did not list this bill. As late as Saturday when we called the recording to find out what the schedule of business was for today, this bill was not included. It is now included, even though the Committee on Rules was meeting last week and intended to meet again this week on the question of a rule for the consideration of this bill.

Mr. Speaker, I voted against this bill when it was reported by our committee, not because I am against middle income student assistance, but I think there is a better way of doing it. I think that the House ought to be given the opportunity to choose between the concept embodied in this bill, which is asking the taxpayer to come hat in hand to the Federal Government and ask for the largess of the bureaucrats in giving some aid to the families of students and the better way.

That better way to do it, in my opinion, and the way that this House ought to have an opportunity to choose, would be through tax credits where as a matter of right the parents of students attending schools will know that they may have help in the cost of higher education.

Mr. Speaker, choosing this route to bring the bill up stealthily today with little or no warning denies the Members of the House an opportunity to choose between these two methods of middle income student assistance. I hope that the leadership will change their mind, withdraw this bill from the calendar, and wait for a rule that will give us an opportunity to choose between the two routes.

MIDDLE-INCOME STUDENT ASSISTANCE ACT

(Mr. FRENZEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FRENZEL. Mr. Speaker, I rise to second the remarks of the distinguished gentleman from Pennsylvania (Mr. COUGHLIN) and the distinguished gentleman from Illinois (Mr. ERLENBORN) in objecting to the procedure under which we are going to handle H.R. 11274 today.

This is a bill that is going to be handled under suspension, but it is hardly noncontroversial since it authorizes the expenditure of $1.5 billion of the taxpayers' money. It has also been objected to by the Committee on the Budget because it is contrary to the Budget Act.

More importantly, as was pointed out earlier, it will foreclose the ability of the House to consider at the same time the tuition tax credit.

If the House, indeed, plans to pass the Middle-Income Student Assistance Act, it ought to coordinate it with the tuition tax credit, because it is likely that that bill will be passed as well. It would be a bad mistake if both were passed separately and were not coordinated.

I urge all Members of the House to vote no.

Mr. CONABLE. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from New York.

Mr. CONABLE. I thank the gentleman for yielding.

I would like to associate myself with the remarks of the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman, and urge the Members to vote no on the second, or no on the final vote on suspension.

EDUCATION TAX CREDITS

(Mr. CORCORAN of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORCORAN of Illinois. Mr. Speaker, President Carter and the majority leadership are trying to pull a fast one on Congress and the American people.

This all started when some of us began to make progress in our attempt to enact education tax credits. The administration and the leadership quickly came up with a plan to circumvent this. They have rammed this plan through the Education and Labor Committee and it went to the Rules Committee. I joined other Members in an effort to persuade the Rules Committee to allow an amendment to the Carter plan which would provide tax credits.

Today, even before the House Rules Committee has had a chance to hear all the arguments and reach a decision, the administration with the cooperation of the majority leadership, has proposed to bring the Carter plan to the floor under a suspension—meaning that the Members of the House will be asked to vote on a $1½ billion program, which has many serious flaws—after only 20 minutes of debate and with no amendments. I repeat with no amendments allowed. This is a calculated affront to the over 200 Members who support tax credits.

This whole effort by the administration is a denial of the open, honest approach to government that the President and his supporters promised us. It is a return to the old style "change the rules to fit the score" politics we have been trying to get rid of.

For that reason, I urge my colleagues to defeat this unjustified move for suspension of the rules to consider H.R. 11274.

NEED FOR IMMEDIATE FARM LEGISLATION

(Mr. LEACH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEACH. Mr. Speaker, American farmers are confronted with difficult spring planting choices. Unless we clarify the farm program many will be forced to make important economic decisions without knowledge of governmental intentions.

An emergency farm bill is imperative, particularly for corngrowers since neither the Congress nor the USDA have provided meaningful incentives for farmers to participate in a set-aside program. Unless adequate incentives are immediately enacted, corngrowers will be forced to plant an extraordinary acreage with no income protection.

Immediate clarification of the farm program is also vital for southerners who have already begun to plant this season's crops. As has been evidenced by the hundreds of farmers who have visited our offices in recent weeks, farmers are in an explosive mood. While there is little likelihood of agricultural violence in my home State, it is clear that in several

Southern and Southeastern States the possibility is real.

Under these circumstances it would be unconscionable for Congress to adjourn as planned this Wednesday unless an emergency farm bill is passed. We need to get a farm bill ready for Presidential signature before the end of the month. April consideration is simply too late to provide farmers opportunity to apply rational judgment on planting decisions. It may also be too late to deter violence born out of governmental neglect.

THE SENSELESS SLAUGHTER IN JAPAN

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, today I am introducing a resolution expressing the strong disapproval of this body to the recent senseless killings of over 1,000 innocent dolphins on the beaches of the Japanese island of Iki. I spoke out against this brutal activity a few days ago, in the hope that the increased public awareness of this bloody activity would result in the Japanese Government's announcement to employ more humane approaches in the future. Unfortunately, the Japanese have yet to respond, constructively, to the mounting world outcry.

Mr. Speaker, this resolution places this body on record in opposition to the senseless slaughter of these intelligent sea mammals. It is ironic, that at a time when mankind is beginning to understand these extraordinary mammals, and at a time when we read of the dolphin's heroic activities in saving humans who find themselves drowning, that the Japanese fishermen turn around and savagely slaughter them, in order to enhance their domestic fishing industry. It is also ironic, that another Japanese fishing industry, located just 300 miles from this bloody site, had at the same time of this slaughter, employed a more humane means of protecting their domestic fishing industry. They have captured some of these mammals they call a nuisance, and sold them to foreign interests who will provide for these mammals, and use them for the betterment of mankind. The Japanese Government is at fault for this savage incident on Iki, since they both provided the permit for this "kill" and also subsidized the fishermen engaged in this brutal activity.

Through this resolution, we again call upon the Japanese Government to offer the world its reassurances that such inhumane activities will not be permitted, nor subsidized in the future.

As one Member of this body, I can assure the Japanese officials that I will not let this issue subside until the positive response is received.

Thank you, Mr. Speaker.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 11518, DEBT LIMITATION EXTENSION

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 95-987) on the resolution (H. Res. 1092) providing for consideration of the bill (H.R. 11518) to extend the existing temporary debt limit, which was referred to the House Calendar and ordered to be printed.

RESOLUTION OF THE JOINT COMMITTEE ON PRINTING

(Mr. THOMPSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. THOMPSON. Mr. Speaker, the Joint Committee on Printing, at its meeting on Thursday, March 16, 1978, adopted unanimously a resolution regarding the implication and effect of marking certain material in the CONGRESSIONAL RECORD with a "bullet."

The resolution makes it clear that the purpose of the "bullet" mark is simply to distinguish the manner of delivery of statements or insertions, and that the intent of the Joint Committee on Printing in prescribing the use of the "bullet" marking is in no way to limit the protection afforded Members of Congress under the speech or debate clause of the Constitution.

As vice chairman of the Joint Committee on Printing, and on behalf of the committee, I include the text of the resolution adopted by the Joint Committee at this point in the RECORD, as follows:

RESOLUTION OF THE JOINT COMMITTEE ON PRINTING

Whereas, effective March 1, 1978. the Joint Committee on Printing amended the Rules for Publication of the CONGRESSIONAL RECORD to identify statements or insertions in the RECORD where no part of them was spoken;

Whereas, unspoken material in the CONGRESSIONAL RECORD will be preceded and followed with a "bullet" symbol, i.e., ●;

Whereas, the Joint Committee. after consulting with the leadership of both Houses, instituted these changes only to make the CONGRESSIONAL RECORD a more precise history of the actual proceedings taking place on the House and Senate floors;

Whereas, the Joint Committee determined that these changes are the most effective means to inform other Members of Congress of their colleagues' views and proposals;

Whereas, the Joint Committee made such changes knowing that delivered and inserted statements are part of the official record as Congressional Speech and Debate and are fully protected under Article I, Section 6 of the Constitution of the United States: Now, therefore, be it

Resolved, That paragraph 3 of the Rules for Publication of the CONGRESSIONAL RECORD is amended to read as follows:

"3. Only as an aid in distinguishing the manner of delivery in order to contribute to the historical accuracy of the RECORD statements or insertions in the RECORD where no part of them was spoken will be preceded and followed with a 'bullet' symbol, i.e., ●.".

SEC. 2. The Joint Committee directs its Chairman and Vice-Chairman to insert copies of this resolution into the permanent record of the House and Senate.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 3(b) of rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to, under clause 4 of rule XV.

After all motions to suspend the rules have been entertained and debated and after those motions to be determined by "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

RAIL PASSENGER SERVICE RESOLUTION

Mr. ROONEY. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 494) expressing the sense of Congress regarding the operation of certain rail passenger service by the National Railroad Passenger Corporation.

The Clerk read as follows:

H. CON. RES. 494

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that, for the purpose of maintaining the present service over the basic system routes, National Railroad Passenger Corporation may, notwithstanding the pendency of the route reexamination study presently being conducted by the Secretary of Transportation and without regard to the Criteria and Procedures adopted pursuant to section 404(c) of the Rail Passenger Service Act, undertake the provision of any basic system intercity rail passenger service pursuant to section 404(a) by contracting with a railroad filing for the discontinuance of such service.

The SPEAKER. Is a second demanded?

Mr. SKUBITZ. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Pennsylvania (Mr. ROONEY) will be recognized for 20 minutes, and the gentleman from Kansas (Mr. SKUBITZ) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Pennsylvania (Mr. ROONEY).

Mr. ROONEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution is relatively simple and straightforward.

The resolution was brought about because the Southern Railway desires to discontinue the passenger train, the "Southern Crescent." Southern has asked the Interstate Commerce Commission for permission to discontinue this train. However, in order that continued service can be preserved, it has been proposed that this train be operated by Amtrak.

It is believed that after a number of conditions are satisfied, an agreement can be reached between Amtrak and Southern Railway for the operation of this train. One of the conditions, however, set forth by Amtrak is that as a condition precedent to an agreement would have to be congressional concurrence for it to operate the train. Thus, this resolution is merely satisfying a request of the Amtrak Board.

So that there is no misunderstanding, let me make it clear that we are not requiring Amtrak to take over the service, nor are we prohibiting Amtrak from taking over the service. Similarly, we are not expressing an opinion as to whether

Southern Railway should operate the service. Rather, we are merely stating that we have no objection if Amtrak and Southern Railway can come to an amiable agreement for the operation of this service.

Also, it should be understood that Congress is in no way attempting to influence ICC's decision as to whether it should accept or reject Southern Railway's petition to discontinue the service.

Simply put, the Amtrak Board asked if Congress would object to its assuming this service. The answer is emphatically no. Nothing more should be read into this resolution.

Mr. SKUBITZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in May of 1971, when Amtrak took over most of the intercity rail passenger service in the country, it did not take over passenger trains run by the Southern Railroad. The Southern had decided not to join Amtrak because historically their passenger service had been important to the people of their region and important to them as a symbol of their company.

As a result of not joining Amtrak, the law required Southern to operate its passenger service until January 1, 1975. In fact, Southern has continued the Southern Crescent, its main passenger train, until this very moment. Several weeks ago, they filed a discontinuance petition with the Interstate Commerce Commission. At the same time, Southern began negotiations with Amtrak so that service could be continued as a part of Amtrak.

I think it is perfectly understandable that Southern Railroad went as far as it could in supporting economically unsound intercity rail passenger service. In the beginning, their losses were a little over a million dollars. Today, the loss on the Southern Crescent is $6.7 million. That is an avoidable loss of $6.7 million. What does that mean? It means that if the train is taken off, the Southern Railroad saves $6.7 million. It is not a figure that includes any of the overhead or the maintenance of way costs in how much the train is losing.

Of course, inflation and increased fuel costs account for some of the increased losses. For example, since 1971, fuel costs have gone up 230 percent. Other costs including material and supplies have gone up 89 percent and labor costs have increased by 99 percent. This resolution does not force Amtrak to take over the train. It simply says that if they want to, they can as far as Congress is concerned. To be quite candid, I am sure that Amtrak will lose more money than Southern has if it should decide to take it over. The big problem with Amtrak is that its officials will not or seem incapable of going after business in an aggressive manner. Revenue from the Post Office, for example, is practically nonexistent, and yet the Post Office has provided most of the revenue to the railroads prior to assumption of service by Amtrak.

The railroad brotherhoods are not without fault. As a matter of fact, the discontinuance of this train by Southern Railroad will mean practically no labor cost savings because of the job protection arrangements available for those employees.

When Amtrak takes over the train, it will still require a number of crews and a great deal of featherbedding in order to get the train from Washington to Atlanta to New Orleans. Obsolete work rules exist throughout the Amtrak system and unless the brotherhoods quickly begin to do their part in cutting costs for Amtrak, I am afraid we will see the end of intercity rail passenger service in this country. As you know, I have been a strong supporter of Amtrak and continue to offer my support during the rest of my congressional career. I cannot see how my colleagues will continue their support unless the brotherhoods in good faith attempt to give Amtrak more for its money than existing work rules.

I have no objection to taking up House Concurrent Resolution 494 under suspension. I believe its adoption will expedite the matters now involving the Southern Crescent intercity rail passenger service.

Mr. Speaker, I yield 1 minute to my colleague, the gentleman from Ohio (Mr. DEVINE).

Mr. DEVINE. I thank the gentleman for yielding.

Mr. Speaker, as a cosponsor I rise in support of this House concurrent resolution. It is simply a sense of Congress resolution that will permit a contracting operation between Amtrak during the pendency of an application for discontinuance by Southern.

Mr. Speaker, I favor the resolution and I urge its adoption.

Mr. ROONEY. Mr. Speaker, I yield such time as he may consume to the gentleman from West Virginia (Mr. STAGGERS), the distinguished chairman of the committee.

Mr. STAGGERS. I thank the gentleman for yielding, and I want to congratulate him and the other members of the committee, both the minority members and the majority members, for bringing this bill out.

Mr. Speaker, House concurrent resolution 494 was unanimously reported out of the Committee on Interstate and Foreign Commerce. It expresses the sense of the Congress that Amtrak may contract to provide intercity rail passenger service with a railroad filing with the Interstate Commerce Commission for discontinuance of such service. The resolution does not mandate Amtrak to undertake to provide the service but leaves the decision whether to do so to Amtrak.

Southern Railway system presently operates a passenger train known as the "Southern Crescent" daily between Washington and Atlanta and triweekly between Atlanta and New Orleans. This Washington to New Orleans route is an important segment of Amtrak's New York to Los Angeles route which, I have been informed, has the third highest ridership in the Amtrak system.

Southern Railway, which elected not to turn this service over to Amtrak in 1971 and again in 1975 when it had another opportunity to do so, has incurred losses of approximately $30 million in operating the Southern Crescent since 1971, when Amtrak was formed. Had Southern contracted with Amtrak for discontinuance of the service at that time, the price of discontinuance for this train under the Statutory formula would have been about $6.2 million. Because of mounting losses on this service, Southern has filed for discontinuance with the Interstate Commerce Commission. It has also engaged in active negotiations over the last several months with Amtrak to arrive at a mutually acceptable contract whereby Amtrak would undertake to provide the service.

However, in the conference report accompanying the supplemental appropriations bill last fall, the conferees instructed the Secretary of Transportation, in cooperation with Amtrak, to conduct a comprehensive re-examination of Amtrak's route structure and to submit recommendations to the Congress for an optimal national railroad passenger system. The Secretary intends to submit recommendations by May 1 of this year. Under proposed legislation, these recommendations will then be the subject of public hearings, and the Secretary's final recommendations will be submitted to the Congress for its approval later this year. In any event, the Congress will thoroughly review the Secretary's recommendations and determine what type of passenger system the Nation should have. Amtrak has interpreted congressional action on last year's supplemental appropriation bill to mean that the route system it presently operates is frozen—that it can neither add nor drop routes from the system.

However, it seems rather foolish to have this route be arbitrarily dropped from the national rail passenger system prior to congressional action on the Secretary's recommendations. Of course, the decision whether to provide service over the route now being served by Southern must be Amtrak's and Amtrak should not be directed to operate over this route. House Concurrent Resolution 494 merely expresses the sense of the Congress that Amtrak in its discretion may contract with Southern to provide the service for which Southern has filed for discontinuance. It is my understanding that Southern has proposed a contract whereby it would pay Amtrak $6.7 million, $2.7 in cash and 4 million cash or equipment, at Amtrak's option, to assume the service. The total amount should certainly be sufficient to cover Amtrak's cost of operating the service until the Congress has had an opportunity to review the Secretary's recommendations.

For these reasons, I urge passage of House Concurrent Resolution 494.

Mr. ROONEY. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is on the motion offered by the gentleman from Pennsylvania (Mr. ROONEY) that the House suspend the rules and agree to the concurrent resolution (H. Con. Res. 494).

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Concurrent Resolution 494 just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

AMENDING THE SMALL BUSINESS ACT AND THE SMALL BUSINESS INVESTMENT ACT OF 1958

Mr. ADDABBO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 11318) to amend the Small Business Act and the Small Business Investment Act of 1958.

The Clerk read as follows:

H.R. 11318

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—AMENDMENTS TO THE SMALL BUSINESS INVESTMENT ACT OF 1958

SEC. 101. Section 303(c)(1) of the Small Busness Investment Act of 1958 is amended to read as follows:

"(1) shares of nonvoting stock (or other corporate securities having similar characteristics), provided—

"(i) dividends are preferred and cumulative to the extent of 3 per centum of par value per annum;

"(ii) on liquidation or redemption, the Administration is entitled to the preferred payment of the par value of such securities; and prior to any distribution (other than to the Administration) the Administration shall be paid any amounts as may be due pursuant to subparagraph (i) of this paragraph;

"(iii) the purchase price shall be at par value and, in any one sale, $50,000 or more; and

"(iv) the amount of such securities purchased and outstanding at any one time shall not exceed—

"(A) from a company having a combined private paid-in capital and paid-in surplus of less than $300,000 and licensed on or before October 13, 1971, 200 per centum of such capital and surplus invested after such date,

"(B) from any company having a combined private paid-in capital and paid-in surplus of $300,000 or more but less than $500,000, 200 per centum of such capital and surplus in excess of $300,000, or

"(C) from any company having a combined private paid-in capital and paid-in surplus of $500,000 or more, 200 per centum of such capital and surplus.

The amount of such securities purchased by the Administration in excess of 100 per centum of such capital and surplus from any company described in clause (A), (B), or (C) may not exceed an amount equal to the amount of its funds invested in or legally committed to be invested in equity securities. For the purposes of this subsection, the term 'equity securities' means stock of any class (including preferred stock) or limited partnership interests, or shares in a syndicate, business trust, joint stock company or association, mutual corporation, cooperative or other joint ventures for profit.".

SEC. 102. The last sentence of section 308 (b) of the Small Business Investment Act of 1958 is amended to read as follows: "Such companies are authorized to invest funds not reasonably needed for their operations in direct obligations of, or obligations guaranteed as to principal and interest by, the United States, or in certificates of deposit maturing within one year or less, issued by any institution the accounts of which are insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation, or in savings accounts of such institutions.".

SEC. 103. The last sentence of section 317 of the Small Business Investment Act of 1958 is repealed.

SEC. 104. Section 301(d) of the Small Business Investment Act of 1958 is amended by inserting "or formed as a limited partnership," immediately after "statutes,".

TITLE II—AMENDMENTS TO THE SMALL BUSINESS ACT

Chapter 1

SEC. 201. (a) The Congress finds—

(1) that the opportunity for full participation in our free enterprise system by socially and economically disadvantaged persons is essential if we are to obtain social and economic equality for such persons and improve the functioning of our national economy;

(2) that many such persons are socially and economically disadvantaged because of their identification as members of certain groups that have suffered the effects of discriminatory practices or similar invidious circumstances over which they have no control;

(3) that such groups include, but are not limited to, Black Americans, Hispanic Americans, and other minorities;

(4) that it is in the national interest to expeditiously ameliorate the conditions of socially and economically disadvantaged groups;

(5) that such conditions can be improved by providing the maximum practicable opportunity for the development of small business concerns owned by members of socially and economically disadvantaged groups;

(6) that such development can be materially advanced through the procurement by the United States of articles, equipment, supplies, services, materials, and construction work from such concerns; and

(7) that such procurements also benefit the United States by encouraging the expansion of suppliers for such procurements, thereby encouraging competition among such suppliers and promoting economy in such procurements.

(b) It is, therefore, the purpose of the amendment made by this chapter to section (8)(a) of the Small Business Act to—

(1) foster business ownership by individuals who are both socially and economically disadvantaged;

(2) promote the competitive viability of such firms by providing such available contract, financial, technical, and management assistance as may be necessary; and

(3) clarify and expand the program for the procurement by the United States of articles, equipment, supplies, services, materials, and construction work from small business concerns owned by socially and economically disadvantaged individuals.

SEC. 202. Section 8(a) of the Small Business Act (15 U.S.C. 637(a)) is amended to read as follows:

"SEC. 8. (a)(1) It shall be the duty of the Administration and it is hereby empowered, whenever it determines such action is necessary or appropriate—

"(A) to enter into contracts with the United States Government and any department, agency, or officer thereof having procurement powers obligating the Administration to furnish articles, equipment, supplies, services, or materials to the Government or to perform construction work for the Government. In any case in which the Administration certifies to any officer of the Government having procurement powers that the Administration is competent and responsible to perform any specific Government procurement contract to be let by any such officer, such officer shall let such procurement contract to the Administration upon such terms and conditions as may be agreed upon between the Administration and the procurement officer. If the Administration determines that it and such officer have failed to agree on such terms and conditions, the officer shall promptly notify, in writing, the head of the department or agency having such procurement powers. The head of such department or agency shall have five days (exclusive of Saturdays, Sundays, and legal holidays) to establish the terms and conditions upon which such procurement contract may be let to the Administration, and shall communicate in writing to the Administration the terms and conditions so established. Within five days (exclusive of Saturdays, Sundays, and legal holidays) after the receipt of such written communication, the Administration shall decide whether to perform such procurement contract or withdraw its prior certification that the Administration is competent and responsible to perform such contract; and

"(B) to arrange for the performance of such contracts by negotiation or otherwise letting subcontracts to socially and economically disadvantaged small business concerns for construction work, services, or the manufacture, supply, assembly of such articles, equipment, supplies, materials, or parts thereof, or servicing or processing in connection therewith, or such management services as may be necessary to enable the Administration to perform such contracts.

"(2) Notwithstanding subsections (a) and (c) of the first section of the Act entitled 'An Act requiring contracts for the construction, alteration, and repair of any public building or public work of the United States to be accompanied by a performance bond protecting the United States and by additional bond for the protection of persons furnishing material and labor for the construction, alteration, or repair of said public buildings or public work,' approved August 24, 1935 (49 Stat. 793), no small business concern shall be required to provide any amount of any bond as a condition of receiving any subcontract under this subsection if the Administration determines that such amount is inappropriate for such concern in performing such contract: *Provided,* That when exercising the authority granted by this paragraph the Administration shall—

"(A) take such measures as it deems appropriate for the protection of persons furnishing materials and labor to a small business receiving any benefit pursuant to this paragraph; and

"(B) assist, insofar as practicable, a small business receiving the benefits of this paragraph to develop, within a reasonable period of time, such financial and other capability as may be needed to obtain such bonds as the Administration may subsequently require for the successful completion of any program conducted under the authority of this subsection.

"(3) Any small business concern selected by the Administration to perform any Government procurement contract to be let pursuant to this subsection shall, when practicable, participate in any negotiation of the terms and conditions of such contract.

"(4) For purposes of this section, the term 'socially and economically disadvantaged small business concern' means any small business concern—

"(A) which is at least 51 per centum owned by a member or members of socially and economically disadvantaged groups or by a socially and economically disadvantaged individual or individuals; or, in the case of any publicly owned business, at least 51 per centum of the stock of which is owned by a socially and economically disadvantaged

group member or members or by a socially and economically disadvantaged individual or individuals; and

"(B) whose management and daily business operations are controlled by such person or persons.

"(5) The Administration shall presume that socially and economically disadvantaged groups and group members include, but are not limited to, Black Americans and Hispanic Americans. The presumption established in the preceding sentence may be rebutted with respect to any individual if the Administration finds, on the basis of substantial evidence, that such individual has not experienced impediments to establishing, maintaining, or expanding a small business concern as a result of being a member of a group presumed by this paragraph to be socially and economically disadvantaged.

"(6) Notwithstanding the provisions of paragraph (5), an individual not a member of a group presumed to be socially and economically disadvantaged may establish such disadvantage upon demonstrating to the Administration's satisfaction, that such individual has experienced impediments to establishing, maintaining, or expanding a small business concern which are not generally common in kind or degree to all small business persons and which result from both social and economic causes over which such individual has no control.

"(7) No small business concern shall be deemed eligible for any assistance pursuant to this subsection unless the Administration determines that it is able to provide the small business with such contract, financial, technical, and management support as may be necessary to promote the competitive viability of the small business concern within a reasonable period of time.

"(8) Within ninety days after the effective date of this paragraph, the Administration shall publish in the Federal Register rules setting forth those conditions or circumstances pursuant to which a firm previously deemed eligible by the Administration may be denied assistance under the provisions of this subsection: *Provided*, That no such firm shall be denied total participation in any program conducted under the authority of this subsection without first being afforded a hearing on the record in accordance with chapter 5 of title 5, United States Code.".

Chapter 2

SEC. 211. Section 8(d) of the Small Business Act is amended to read as follows:

"(d)(1) It is the policy of the United States that small business concerns and, in particular, small business concerns owned and controlled by socially and economically disadvantaged individuals, shall have the maximum practicable opportunity to participate in the performance of contracts let by any officer or agency of the United States or financed in whole or in part by the United States.

"(2) The clause stated in paragraph (3) shall be included in all contracts let by any officer or agency of the United States except any contract which—

"(A) does not exceed $10,000;

"(B) including all subcontracts under such contract will be performed entirely outside of any State, territory, or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico; or

"(C) is for services which are personal in nature.

"(3) The clause required by paragraph (2) shall be as follows:

"'(A) It is the policy of the United States that small business concerns and, in particular, small business concerns owned and controlled by socially and economically disadvantaged individuals shall have the maximum practicable opportunity to participate in the performance of contracts let by any officer or agency of the United States or financed in whole or in part by the United States.

"'(B) The contractor hereby agrees to carry out this policy in the awarding of subcontracts to the fullest extent consistent with the efficient performance of this contract. The contractor further agrees to cooperate in any studies or surveys as may be conducted by the United States Small Business Administration or the awarding agency of the United States as may be necessary to determine the extent of the contractor's compliance with this clause.

"'(C) As used in this contract, the term "small business concern" shall mean a small business as defined pursuant to section 3 of the Small Business Act and relevant regulations promulgated pursuant thereto. The term "small business concern owned and controlled by socially and economically disadvantaged individuals" shall mean a small business concern—

"'(i) which is at least 51 per centum owned by a member of members of socially and economically disadvantaged groups or by a socially and economically disadvantaged individual or individuals; or, in the case of any publicly owned business, at least 51 per centum of the stock of which is owned by a socially and economically disadvantaged group member or members, or by a socially and economically disadvantaged individual or individuals; and

"'(ii) whose management and daily business operations are controlled by such person or persons.

The contractor shall presume that socially and economically disadvantaged group members include Black Americans, Hispanic Americans, and other minorities, or any other individual found to be disadvantaged by the Administration, pursuant to section 8(a) of the Small Business Act.

"'(D) Contractors acting in good faith may rely on written representations by their subcontractors regarding their status as either a small business concern or a small business concern owned and controlled by socially and economically disadvantaged individuals.'.

"(4)(A) It shall be a condition of the solicitation of any offer for a contract let by any officer or agency of the United States and which is required to include the clause stated in paragraph (3) which may exceed $500,000 in amount (except those contracts which may be let to the Administration pursuant to subsection (a) of the section) that the offering company submit a summary subcontracting plan simultaneously with its offer for such contract. Such summary subcontracting plan shall include—

"(i) the estimated dollar value of all subcontracts which may be let under such contract;

"(ii) the estimated dollar value of all subcontracts which may be let under such contract to small business concerns; and

"(iii) the estimated dollar value of all subcontracts which may be let under such contract to small business concerns owned and controlled by socially and economically disadvantaged individuals as defined in paragraph (3) of this subsection.

The summary subcontracting plan and the offering company's compliance with other such plans (including final plans required by subparagraph (B)) shall be considered by the procuring authority in determining the responsibility of such offering company for the award of the contract: *Provided*, That, notwithstanding any other provision of law, every procurement authority of the United States, in order to encourage subcontracting opportunities for small businesses and small businesses owned and controlled by the socially and economically disadvantaged as defined in paragraph (3) of this subsection, is hereby authorized to provide such incentives as such authority may deem appropriate in order to encourage such subcontracting opportunities as may be commensurate with the efficient and economical performance of the contract.

"(B) Before the award of any contract let by any officer or agency of the United States (i) which is required to include the clause stated in paragraph (3)(ii) which may exceed $1,000,000 if for the construction of any public facility or $500,000 if for any other purpose, and (iii) which offers subcontracting possibilities, the apparent successful offering company shall negotiate with the procurement authority a final subcontracting plan. Such plan shall include—

"(i) percentage goals for the utilization of small businesses and small businesses owned and controlled by the socially and economically disadvantaged as subcontractors;

"(ii) the name of an individual within the offering company who will administer the firm's subcontracting program and a description of such individual's duties;

"(iii) a description of how the firm will provide adequate and timely consideration of the potentialities of small businesses and small businesses owned and controlled by the socially and economically disadvantaged in all make or buy decisions to provide materials or services;

"(iv) a representation that the successful offering company will notify the procuring authority prior to entering into any subcontract in excess of $50,000 with any company other than a small business concern to the extent to which small businesses and small businesses owned and controlled by the socially and economically disadvantaged have been considered for such subcontract;

"(v) a description of what efforts the successful offering company will take to assure that small businesses and small businesses owned and controlled by the socially and economically disadvantaged will have an equitable opportunity to compete for subcontracts, particularly by arranging solicitations, time for the preparation of bids, quantities, specifications, and delivery schedules, so as to facilitate the participation of small businesses and small businesses owned and controlled by the socially and economically disadvantaged;

"(vi) a recitation of the types of records the successful offering company will maintain to demonstrate procedures which have been adopted to comply with the requirements and goals set forth in this plan, including the establishment of source lists of small businesses and small businesses owned and controlled by the socially and economically disadvantaged; and efforts to identify and award subcontracts to such businesses;

"(vii) a representation that the successful offering company will include the clause required by paragraph (2) of this subsection in all its subcontracts which offer further subcontracting opportunities, and that the successful offering company will require its subcontractors (other than small business concerns) receiving subcontracts of $1,000,000 or more if for the construction of any public facility or $500,000 or more if for any other purpose, to adopt a plan similar to the one required by this subparagraph (B);

"(viii) a representation that the successful offering company will cooperate with the contracting agency and the Administration in any studies or surveys of its subcontracting program; and

"(ix) a representation that the successful offering company will submit such periodic reports as may be required by the procurement authority or the Administration to determine the extent of its compliance with the plan.

The provisions of this subparagraph (B) shall not apply to apparent successful offering companies which are also small business concerns.

"(5)(A) Any plan required by this subsection shall be included in and made a material part of the contract to which it ap-

plies: *Provided*, That in those cases where a successful offering company has submitted both a summary and a final plan only the final plan shall be so included in the contract.

"(B) No contract shall be awarded to any offering company unless the procurement authority determines that the plan, required by this subsection to be submitted by such company, provides the maximum practicable opportunity for small businesses and small businesses owned and controlled by the socially and economically disadvantaged to participate in the performance of the contract.

"(C) The Administration is authorized, in its discretion, to participate in the negotiations of any final subcontracting plan as may be formulated pursuant to the requirements of this subsection. If the Administration determines that any such plan negotiated by the offering company and the procurement authority fails to provide the maximum practicable opportunity for small businesses and small businesses owned and controlled by the socially and economically disadvantaged to participate in the performance of the contract, the Administration shall appeal for modification of the plan to the Secretary or the head of the appropriate Department or agency, who shall have the authority for rendering a final decision. No such contract shall be let until such final decision has been rendered.

"(6) The failure of any contractor or subcontractor to comply in good faith with—

"(A) the clause contained in paragraph (3) of this subsection, or

"(B) any plan required of such contractor pursuant to the authority of this subsection to be included in its contract or subcontract, shall be a material breach of such contract or subcontract.

"(7) The procurement authority shall encourage expeditious payment of any small business subcontractor performing any work on any contract governed by this subsection. If any small business is not paid expeditiously, the procuring authority may withhold payments to any contractor which does not so pay such small business concern: *Provided*, That, if the contractor is a small business concern the authority granted by this paragraph may be exercised only upon the expressed written concurrence of the Administrator.

"(8) Nothing contained in this subsection shall be construed to supersede the requirements of Defense Manpower Policy Number 4A (32A CFR chap. 1) or any successor policy.".

Chapter 3

SEC. 221. Section 8 of the Small Business Act (15 U.S.C. 637) is amended by adding at the end thereof the following new subsection:

"(f)(1) Except as provided in paragraph (2), no agency or department of the United States shall provide financial assistance (including any grant, loan, insurance or guarantee) for any applicant (including any business concern, organization, person, State, State agency, political subdivision or agency of a political subdivision) if any funds obtained pursuant to such assistance are used for the procurement of articles, equipment, supplies, material, or construction work unless such applicant agrees, as a condition of receiving such assistance—

"(A) to utilize small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals as defined by subsection (d)(3) to the maximum extent practicable for such procurement; and

"(B) if any subcontracts are to be let, to incorporate in any contract for such procurement the subcontracting clause contained in subsection (d)(3) of this section.

"(2) Paragraph (1) shall not apply to—

"(A) any applicant for Federal financial assistance which is also a small business concern; or

"(B) any contract for such procurement paid for in part or in whole with such assistance which, including all subcontracts under such contract, is—

"(i) not in excess of $500,000 in amount;

"(ii) to be performed entirely outside the United States, the territories and possessions of the United States, and Puerto Rico; or

"(iii) for services which are personal in nature.

"(3) If an applicant—

"(A) agrees, as a condition of receiving an amount of financial assistance, to comply with paragraph (1)(A) and (1)(B), and

"(B) willfully fails to comply with such condition, such amount of financial assistance shall be terminated.

"(4) Each agency or department of the United States Government which provides financial assistance subject to compliance with any condition under paragraph (1) shall submit to the Administrator such periodic reports as the Administrator may deem necessary to determine the extent of such compliance.".

SEC. 222. Section 15 of the Small Business Act is amended by adding at the end thereof the following:

"(g) No award of any contract referred to in subsection (d) shall be construed as being made for the purpose of relieving economic dislocations.".

SEC. 223. Section 15(f) of the Small Business Act is amended by striking out "September 30, 1979" and inserting in lieu thereof "September 30, 1980".

SEC. 224. There is authorized to be appropriated for the period beginning September 30, 1978, such sums as the Small Business Administration may need to carry out the amendment made by this title to the Small Business Act: *Provided*, That no funds may be expended by the Small Business Administration for the implementation of this title unless specifically appropriated therefor.

The SPEAKER. Is a second demanded?

Mr. STANTON. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from New York (Mr. ADDABBO) and the gentleman from Ohio (Mr. STANTON) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa (Mr. SMITH), the chairman of the full committee.

Mr. SMITH of Iowa. Mr. Speaker, I rise in support of the bill, H.R. 11318.

I ask unanimous consent to revise and extend my remarks.

This bill is the result of some 11 days of hearings by Representative ADDABBO's Subcommittee on Minority Enterprise and General Oversight which considered some four major proposals to provide additional assistance to small business concerns and help assure that they receive a fair share of Federal program money.

Basically this bill would:

MESBIC'S

Allow corporate minority enterprise small business investment companies, or MESBIC's—private companies incorporated to provide venture capital to disadvantaged businesses—to obtain additional capital from SBA by selling an additional tier of preferred securities to the agency. This new tier of preferred stock would not be greater than the amount that the MESBIC has invested in equity financings to socially or economically disadvantaged businesses.

SBA 8(a) CONTRACTS

Substantially revise SBA's 8(a) contract program through which SBA contracts to supply Federal departments and agencies with goods and services and then subcontracts with disadvantaged small businesses to perform the contract. These 8(a) contracts would be let only to the economically and socially disadvantaged providing that disadvantaged individuals own at least 51 percent of the business and are responsible for day-to-day business operations. Disadvantaged individuals would be presumed to include, but are not limited to black Americans, Hispanic Americans, and other minorities, and such other individuals as demonstrate impediments in establishing, maintaining, or expanding small business, provided that the impediments are not generally common in kind or degree to all small business and result from social and economic causes over which the individual has no control.

SMALL BUSINESS PARTICIPATION IN FEDERAL CONTRACTS

Require that a Government contractor or subcontractor whose contract exceeds $1 million for the construction of a public facility or $500,000 for any other purpose include in the contract provisions which would promote the equitable consideration of small and disadvantaged businesses as subcontractors.

SMALL BUSINESS PARTICIPATION IN FEDERAL GRANTS

Provide as a condition of most forms of Federal financial assistance that the recipient agree to utilize small and disadvantaged businesses in any procurements over $500,000 paid for with such assistance.

MISCELLANEOUS PROVISIONS

The bill also authorizes small business investment companies to deposit temporarily unneeded funds in institutions insured by the FSLIC to the same extent as they may in institutions insured by the FDIC; allows MESBIC's to be formed as limited partnerships; authorizes SBA to waive bonding requirements on 8(a) contracts; and extends for 1 year the sunset provision for labor surplus program established last August by Public Law 95–99.

The subcommittee and others worked long and hard to draft this bill and I want to particularly compliment the subcommittee chairman, JOE ADDABBO, the ranking Republican on the subcommittee, JOE MCDADE, and other members such as Mrs. FENWICK and Mr. MITCHELL, for their efforts.

I believe that this bill will help achieve the objectives of providing greater assistance to small concerns, promoting competition, and insuring that the Federal Government is able to ob-

tain needed goods and services at fair and reasonable prices.

I urge immediate passage of this legislation.

Mr. ADDABBO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 11318, and urge the immediate passage of this proposed legislation. I will limit my remarks to the purpose and need for this bill and a description of what, in specific, the bill will do. I commend and thank the staff for their expertise and untiring efforts. I thank the members of my subcommittee for their diligence and time in the many days of hearings and especially by cooperation and contributions of the minority. I thank our colleague, Mr. Parren, for his outstanding help and leadership.

THE PURPOSE OF THE BILL

The bill, H.R. 11318, is divided into two titles. Title I of the bill amends the provisions of the Small Business Investment Act of 1958. Its purpose is to provide additional incentives for investment of private capital in section 301(d) SBIC's—those small business investment companies which provide financial assistance to socially or economically disadvantaged—so that they, in turn, may provide an increased source of equity capital for small businesses owned by the disadvantaged.

Title II of the bill amends the Small Business Act and is divided into three chapters. Chapter 1 amends the section 8(a) procurement program by increasing SBA's ability to develop small firms owned by the disadvantaged and by imposing various controls on program implementation. Chapter 2 improves the subcontracting program for both small and disadvantaged business concerns so as to enable such concerns to be considered fairly as subcontractors and suppliers to Federal prime contractors. Chapter 3 adds a new section to the Small Business Act and makes it a condition of most forms of Federal financial assistance that the recipient of such assistance utilize small businesses and small businesses owned by the disadvantaged, to the maximum extent practicable in most procurements paid for with such Federal aid.

This chapter also amends the labor surplus procurement program and provides authorization for SBA to effectuate the provisions of title II of the bill.

THE NEED FOR LEGISLATION

MESBIC's: The committee has found that section 301(d), small business investment companies, oftentimes referred to as minority enterprise small business investment companies or MESBIC's, are severely undercapitalized and, as such, are not fulfilling the intended statutory purpose of providing a source of equity capital for disadvantaged business. Very few pure equity investments are made, and those made are of relatively small amounts not adequate in size to effect meaningful business growth. The size of the program should be increased, as well as the size of the individual MESBIC, in order for economies of scale to be achieved.

SBA's 8(a) program: Section 8(a) of the Small Business Act authorizes the SBA to enter into contracts with Federal procuring agencies or departments for the purchase of articles, equipment, supplies, or materials for the Government. For the performance of such contracts, SBA is empowered to let subcontracts to business concerns by negotiation or otherwise.

Since 1968, this authority, by administrative regulation, has been used to channel Federal purchase requirements to the economically or socially disadvantaged. Between fiscal year 1968 and fiscal year 1977, $2.2 billion of contracts were awarded through this program to a total of 3,726 firms. At present, about 1,500 businesses participate in the program and in fiscal year 1977, these firms received contracts totaling approximately $533 million.

Congress has never extended legislative control over the activities of the 8(a) program save through indirect appropriations, thereby permitting program operations. Reports prepared by the General Accounting Office and numerous investigations by both the executive and legislative branches, have found that the program is not as successful as it could be. This program is the most significant effort of the Government resulting in awards of Federal contracts to minority individuals. Yet, the problems of program administration have resulted in part from the lack of legislative direction, and this must be corrected.

Small business participation in Federal contracts: Small Businesses, and in particular small businesses owned by the disadvantaged, have not been considered fairly as subcontractors and suppliers to prime contractors performing work for the Government. This situation can be greatly changed by creating a subcontracting program which, if properly enforced, will result in increased subcontract awards to small and disadvantaged concerns. In order to accomplish this, the Federal buying agencies should know, in advance of the award of most contracts, what the prime contractor intends to subcontract to small firms. The estimates of the prime should be taken into account when determining its responsibility as a Federal contractor. Moreover, prior to the award of large contracts to big business, a detailed final subcontracting plan should be negotiated and included in the contract as a material term. By taking such measures, it is believed that the legitimate interests of small and disadvantaged concerns wil be recognized, thereby resulting in increased competition and its concomitant economic benefits.

Grants and other Federal assistance: The Federal Government provides billions of dollars in grants to businesses and other institutions. There is, however, no requirement under existing law that the recipient utilize small concerns or disadvantaged small concerns if it subcontracts part of the work. Thus, very little Federal grant money finds its way to such concerns. In order to provide a share of Federal grants to small concerns and disadvantaged small concerns similar to that supplied under Federal contracts, it should be made a requirement of most forms of Federal financial assistance that the recipient (if it is other than a small business) promise to utilize small and disadvantaged concerns in most types of procurements paid for with such assistance. In order to monitor this "promise" SBA should be authorized to gather such reports or records from Federal agencies or departments as may be necessary.

Labor surplus area contracts: The House and Senate debate on the conference report accompanying H.R. 692 (now Public Law 95–89) contains explicit mention of the so-called Maybank amendment routinely contained in the various Defense Appropriations Acts since 1953. That language prohibits DOD from paying any price deferential to relieve "economic dislocations." As construed, this amendment has been used as justification for DOD's refusal to participate in the labor surplus program—which is intended to channel Federal purchase requirements to high-unemployment areas, provided the costs are reasonable.

On August 4, 1977, Public Law 95–89 was enacted into law and provided for a labor surplus program "notwithstanding any other provision of law." House and Senate debate on H.R. 692 contains statements by Members clearly indicating the intent to override the Maybank amendment and thereby make the program applicable to military purchases.

On September 2, 1977, Public Law 95–111, the Defense Appropriations Act, was enacted into law, once again containing the Maybank amendment.

On October 31, 1977, the Comptroller General ruled that the Maybank amendment contained in the fiscal year 1978 Defense Appropriations Act—Public Law 95–111—in effect superseded the clear language of Public Law 95–89, floor statements to the contrary, notwithstanding. In a clarifying letter dated November 3, 1977, the Comptroller General explained his October 31 decision by holding that the Maybank amendment in the fiscal year 1978 (Public Law 95–111) was, indeed, operative, but that the Maybank amendment in previous Appropriations Acts had been overuled by Public Law 95–89. The result of this situation is that the military is required to implement the labor surplus program for purchases financed only with nonfiscal year 1978 appropriated funds, and to use regular procurement methods for fiscal year 1978 financed purchases. DOD estimates that it has approximately $15.6 billion in unobligated nonfiscal year 1978 funds which are available for procurements. At present, DOD is devising two different sets of procurement regulations—one for fiscal year 1978 financed purchases and one for nonfiscal year financed purchases. Not only has this caused an administrative burden on DOD, but Congress, in effect, voted for a bill believing it would do something which the GAO has, by nonreviewable fiat, precluded.

This conflict should be resolved and the law clarified to insure that DOD utilizes the labor surplus program for future procurements regardless of the fiscal year in which the appropriation was made. Public Law 95–89 contains a sunset provision to permit proper evaluation

of the program by the Congress. The delay in implementing the law's provisions necessitates extension of the program for an additional year.

Title II authorizations: An authorization for salaries and expenses for the SBA is needed to properly effectuate these provisions of title II.

WHAT THE BILL WOULD DO

MESBIC preferred stock: Title I allows section 301(d) small business investment companies, or MESBIC's, formed as corporations, to sell twice as much preferred stock to SBA as is presently allowed. However, the amount of this second tier of preferred stock would not be greater than the amount the MESBIC has invested in equity financings of disadvantaged businesses. This title also allows a MESBIC which has received financing from SBA to make distributions to its shareholders provided it is current on all obligations owing to SBA.

Deposits in savings and loans: Present law allows SBICs to invest their idle funds in FDIC insured institutions in any amount, but restricts such investments in savings and loans to the amount of the FSLIC insurance—that is, $40,000. In addition, present regulations allow SBIC's to invest idle funds in certificates of deposit, maturing within 1 year or less. This title allows small business investment companies to invest their idle funds in insured savings and loan associations to the same extent they can invest such funds in FDIC insured banks.

MESBIC limited partnerships: Title I also allows MESBIC's to form as limited partnerships. However, read in conjunction with section 101 of the bill, it is clear that a MESBIC formed as a partnership cannot receive 3 percent equity financing from SBA, but such a company would be entitled to financing through Government purchase or guarantee of its debentures—a source of Federal funding available to all SBIC's.

8(a) program: The bill authorizes SBA to choose any procurement requirement from a Federal department or agency for use in the 8(a) program upon such terms and conditions as may be negotiated. If the negotiations are stalemated, appeal can be made to the head of the buying activity. The head of the buying activity sets terms and conditions and SBA can either accept or reject the contract based on such terms and conditions.

SBA in its discretion can waive part or all of the Miller Act or other bonding requirements. Basically the Miller Act of 1935 requires the contractor to post both a performance and payment bond on most Federal contracts in excess of $2,000 for the repair, alteration, or construction of public facilities. If SBA does so, it must: First, take appropriate measures to protect the suppliers to the 8(a) company, and second, help the 8(a) company to eventually become "bondable" in its own right.

In addition, 8(a) companies are to participate in the negotiations of 8(a) contracts.

The 8(a) contracts can be let only to the economically and socially disadvantaged, who own at least 51 percent of the business, and who are responsible for day-to-day business operations.

SBA is to presume that socially and economically disadvantaged groups and group members include, but are not limited to, black Americans and Hispanic Americans. However, SBA is authorized to rebut this presumption with respect to an individual applicant if it can prove that such person has not experienced any impediments in establishing, maintaining or expanding a small business as a result of being a member of a group presumed to be disadvantaged.

There is sufficient discretion under the provisions of the proposed paragraph (5) of section 8(a) and section 201 of the bill to allow SBA to designate any other additional minority group of persons it believes should be afforded the presumption of social and economic disadvantage. However, before SBA exercises its discretion pursuant to this paragraph, the agency should compile such evidence as may be necessary to support its conclusion and present it to the Committee on Small Business for its review prior to taking final action.

A person not belonging to a group presumed to be disadvantaged, can also establish social and economic disadvantage if the applicant can demonstrate impediments in establishing, maintaining or expanding a small business, not generally common in kind or degree to all small business and which result from social and economic causes over which the individual has no control.

In order to admit someone into the program, not only is a finding of social and economic disadvantage needed, but SBA must also determine that it has the requisite contract, financial, technical, and management support needed for successful program participation.

Ninety days after the bill is enacted, SBA must publish regulations specifying when an eligible 8(a) company may be denied any assistance under this subsection. However, before SBA can terminate, graduate, or fail to "recertify" a company previously found eligible, it must afford it a hearing on the record in accordance with the Administrative Procedure Act.

Small business participation in Federal contracts: Chapter 2 of title II contains a recitation of policy that "small business, and, in particular, small businesses owned and controlled by the economically and socially disadvantaged, be given the maximum practicable opportunity" to participate in the performance of contracts let by the United States or financed in whole or in part by the United States. This chapter in effect establishes a "best efforts" type of subcontracting clause be inserted in all Federal prime contracts exceeding $10,000 in amount.

Moreover, it provides that it is a condition of the solicitation of an offer for any Federal contract that may exceed $500,000 in amount that the offering company submit a summary subcontracting plan which contains:

First, an estimate of total subcontracts;

Second, an estimate of subcontracts to small business; and

Third, an estimate of subcontracts to disadvantaged businesses.

The summary plan and the offering company's compliance with previous plans are to be taken into account when determining the responsibility of the offering company.

The buying activity is authorized in its discretion to give incentives to prime contractors in order to encourage them to subcontract with small and disadvantaged business "commensurate with the efficient and economical performance of the contract."

Before a prime contract exceeding $1 million if for the construction of any public facility or exceeding $500,000 if for any other purpose, can be awarded to a big business, that business and the buying activity must negotiate a final subcontracting plan. This final plan requires the prime contractor to do at least nine different things to promote the equitable consideration of small and disadvantaged businesses as subcontractors, including the negotiation of percentage goals for both small and disadvantaged businesses as subcontractors. The summary plan in the case of a small business, and the final plan in the case of a large business, must be included in and made a material part of the contract. A breach of the plan or subcontracting clause, in bad faith, is considered a material breach of the contract.

SBA is authorized to participate in its discretion in the negotiation of all final plans. If it disapproves the plan, it may appeal to the head of the buying activity for modification and the contract is suspended, pending a final decision by the head of the activity.

Grants and other Federal assistance: Chapter 3 of title II provides that it is a condition of most forms of Federal financial assistance that the recipient—if other than a small business—agree to utilize small and disadvantaged business in any procurements paid for with such assistance, and to insert the subcontracting clause found in chapter 2 in its prime contract if any subcontracts are to be let. This condition does not apply if the total purchase does not exceed $500,000 in amount. A willful failure by the recipient to abide by these conditions is grounds for terminating the assistance. In addition, SBA is authorized to collect such data from Federal agencies and departments as it deems necessary to monitor compliance.

Labor surplus area contracts: This chapter provides further that labor surplus contracts are not to be interpreted as being made for the purposes of relieving "economic dislocation." It also extends the sunset provision for the labor surplus program from September 30, 1979, to September 30, 1980.

Title II authorization: Finally, the last section of the bill contains authorizing language for salaries and expenses of SBA to carry out provisions of title II.

CONCLUSION

The bill is the result of extensive hearings conducted by the Subcommittee on Minority Enterprise and General Oversight of the House Committee on Small Business, over a 1-year period in the

95th Congress. It was considered and unanimously ordered favorably reported to the House by the members of the committee who were in attendance at the meeting.

The provisions of this encompassing bill are needed by the Nation's small businesses, and particularly those owned by socially and economically disadvantaged individuals, if a climate is to be provided in which they may prosper and obtain a fair share of Federal money spent for procurements and other purposes. This bill represents a reasonable, adequate, and inexpensive means of helping small businesses throughout the Nation. The development of viable small businesses as a source of goods and services to both private industry and to the Federal, State, and local governments will provide an increase in competition and result in lower prices to these purchasers.

Mr. STANTON. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I rise in support of this bill, H.R. 11318. I am pleased to report that it has strong bipartisan support and was ordered reported favorably by a unanimous recorded vote by our Committee on Small Business.

This bill is the result of a year's work of hearings by the Subcommittee on General Oversight and Minority Enterprise. It was carefully considered and amended during three markup sessions by the full committee. It represents the end product of much hard work, careful deliberation, and precise draftmanship by members of the subcommittee and the full committee.

I would like to commend the chairman of the subcommittee (Mr. ADDABBO) and the subcommittee's ranking minority member (Mr. MCDADE) for their leadership and fine work in formulating this bill. I would also like to recognize the contributions of the gentlewoman from New Jersey (Mrs. FENWICK), a member of the committee, and the gentleman from Maryland (Mr. MITCHELL) a former member of the committee. Their valuable insight and input helped us avoid the controversy that could have arisen from a bill of this type.

I will not repeat the explanations of this bill that have already been presented here on the floor and in the committee report. I would, however, like to emphasize one particular concept which has been incorporated into this bill—the concept of insuring that Federal policy follows the Federal dollar.

Just as I have recently introduced legislation to require that our buy American requirements be extended to Federal grantees, I wholeheartedly support the provisions of this bill which require that Federal prime contractors abide by the long established Federal commitment to foster the growth of small businesses and disadvantaged businesses.

The concept of requiring recipients of Federal money to abide by Federal policy is nothing new in the procurement area. Federal prime contractors have long been obligated, by regulation, to use small and disadvantaged business subcontractors whenever possible.

Unfortunately, the regulations have too often been ignored or poorly enforced. I might be able to understand why a small firm does not have the ability to perform as a prime contractor on a defense contract, but I cannot accept the poor record of defense contractors in utilizing small firms in their subcontracts. In fiscal 1976, less than 38 percent of military subcontracts went to small business. Disadvantaged firms won less than 1 percent of those subcontracts. This record can and must be improved.

I would like to stress, Mr. Speaker, that our bill does not require subcontracting set-asides, nor does it establish quotas. We carefully avoided the situations which arose from the automatic set-aside provisions of the Public Works Employment Act. Under our bill, if a prime contractor does not have a small or disadvantaged firm available for subcontracting, the prime contract bidder needs only to identify this lack of availability to the contracting officer. A contractor will not be precluded from bid or award because the firm happens to be located in an area where no capable small or disadvantaged firms are available.

Finally, Mr. Speaker, I would like to express my firm support for section 201 of the bill, which extends legislative control over the Small Business Administration's 8(a) program. With congressional blessings, expressed through the appropriations process and oversight hearings, the SBA has used section 8(a) of the Small Business Act to funnel subcontracts to disadvantaged firms. The language of section 8(a), however, remains very vague. It sets no guidelines for the SBA to follow, nor does it establish a basis for effective congressional scrutiny. Just last week, the Administrator of the SBA, Vernon Weaver, informed me that he desperately needs statutory guidance in implementing the program. He sincerely desires to avoid the controversy and abuse that have marked the program in the past; and so do we.

We believe section 201 of our bill provides the guidance and legislative control needed—needed by the Congress, the Small Business Administration, and the constituencies of both.

Thank you.

I yield such time as he may consume to the distinguished ranking minority member of the subcommittee, Mr. MCDADE.

Mr. STANTON. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. MCDADE).

Mr. MCDADE. Mr. Speaker, I also rise in support of H.R. 11318. I will not recite a full description of the bill which has already been provided by my colleagues, Mr. ADDABBO and Mr. CONTE. I would rather dwell for a moment on the process by which the bill was developed. This bill is the result of extensive hearings. The Minority Enterprise and General Oversight Committee heard testimony from 29 different witnesses during 11 days of hearings representing all interested agencies including the Administrator of the SBA, the Secretary of Commerce, and citizens associations. Many Members of the House, private citizens, association officers, and Federal executives have helped the subcommittee with the legislative language we present here today. The bill has seen substantial revision with expansion in some areas and severe trimming in others. The members of the subcommittee have expended great effort to reach a compromise.

The bill does strike a balance between the well-recognized needs of the business community and Government. The goals of increasing opportunities for small business and the requirement of Government purchasing flexibility have been equitably considered.

The bill will provide the Small Business Administration with new tools for practical aid for small businessmen throughout the Nation. The bill contains provisions which will not only increase participation of all segments of our society in business life but will help to provide new opportunities for their products and services. I feel that this bill will go a long way toward making business ownership—a big part of the American dream—a reality for more Americans and helping those already established businesses to grow and prosper.

Mr. Speaker, the entire business community will benefit from this legistion. I urge its unanimous passage.

Mr. ADDABBO. Mr. Speaker, I have no further requests for time, and I move the previous question on the bill. The previous question was ordered.

The SPEAKER. The question is on the motion offered by the gentleman from New York (Mr. ADDABBO) that the House suspend the rules and pass the bill, H.R. 11318.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

CALL OF THE HOUSE

Mr. ADDABBO. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 165]

Akaka	Clay	Drinan
Alexander	Cleveland	Evans, Ga.
Anderson, Ill.	Collins, Ill.	Fary
Andrews, N.C.	Conyers	Findley
Archer	Cornwell	Fisher
Armstrong	Daniel, Dan	Flood
Boland	Davis	Flowers
Burke, Calif.	Dellums	Foley
Chappell	Dent	Fowler
Clausen, Don H.	Dickinson	Fraser
	Diggs	Frey

Gonzalez	Pike	Teague
Gudger	Price	Thone
Harrington	Pursell	Thornton
Harsha	Quie	Tucker
Holland	Rhodes	Udall
Jenkins	Richmond	Ullman
Krueger	Risenhoover	Van Deerlin
Leggett	Roncalio	Walsh
McClory	Runnels	Waxman
McKinney	Ryan	Whitley
Madigan	Sarasin	Wilson, Tex.
Mathis	Scheuer	Winn
Metcalfe	Shipley	Wolff
Mikva	Shuster	Wright
Montgomery	Skelton	Young, Alaska
Moorhead, Pa.	Skubitz	Young, Tex.
Nichols	Steiger	Zeferetti
Patten	Stratton	

The SPEAKER pro tempore (Mr. KAZEN). On this rollcall 349 Members have recorded their presence by electronic device, a quorum.

By uanimous consent, further proceedings under the call were dispensed with.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO SIT DURING 5-MINUTE RULE TODAY

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries may be permitted to sit during the 5-minute rule today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, can the gentleman from New York tell us, will he just be having hearings?

Mr. MURPHY of New York. If the gentleman will yield, this is an oversight hearing, and we have had witnesses come in from across the country.

Mr. ROUSSELOT. The gentleman can assure us that no bill will be marked up?

Mr. MURPHY of New York. There will be no legislative action.

Mr. ROUSSELOT. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

MIDDLE-INCOME STUDENT ASSISTANCE ACT SUPPORTED

● Mr. EVANS of Delaware. Mr. Speaker, the crushing burden of education costs on middle-income taxpayers is of great concern to me. With the increased tax burden which the Congress placed on our middle-income taxpayers in the form of higher social security and energy taxes, we have made it even harder for most Americans to send their children to college. I have long been a supporter of increased relief for educational costs. For this reason, I support the Middle-Income Student Assistance Act as part of the assistance which the Federal Government must provide to enable more Americans to obtain a college education at an affordable cost.

However, I am voting against the second on the motion to suspend the rules. Assistance for middle-income taxpayers to meet increasing educational expenses is one of the most important issues facing the Congress. To bring such an important measure up under a suspension of the rules is a simple attempt by the administration to "ramrod" this approach through the Congress without an adequate opportunity for full and open debate. American families need relief from mounting educational costs, but in not providing the opportunity for full discussion, we are further corrupting the deliberative legislative process.●

MIDDLE-INCOME STUDENT ASSISTANCE ACT

Mr. FORD of Michigan. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 11274) to amend title IV of the Higher Education Act of 1965 to increase the availability of assistance to middle-income students and to amend section 1208 of such act, as amended.

The Clerk read as follows:

H.R. 11274

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Middle Income Student Assistance Act".

SEC. 2. (a) (1) Section 411(a) (3) (B) of the Higher Education Act of 1965 (hereinafter in this Act referred to as the "Act") is amended by adding at the end thereof the following new division:

"(iv) (I) Except as provided in subdivision (II), in determining the expected family contribution under this subparagraph for any academic year after academic year 1978–1979, an assessment rate of not more than 10.5 per centum shall be applied to parental discretionary income.

"(II) For any academic year after academic year 1978–1979 for which funds available for payments under this subpart are not sufficient to satisfy fully all entitlements under this subpart determined in accordance with subdivision (I), an assessment rate of 12 per centum shall be applied to such income.".

(2) Section 411(b) (3) (B) (i) of the Act is amended by inserting "determined on the basis of the assessment rate specified in subsection (a) (3) (B) (iv) (II)" immediately after "under this subpart".

(b) Section 411(a) (3) (C) of the Act is amended by adding at the end thereof the following: "In addition, such regulations shall—

"(i) provide that the portion of assets which shall be exempt from assessment for contribution for an independent student who has one or more dependents shall be the same as the portion so exempt for the family of a dependent student;

"(ii) provide that the rate of assessment for contribution on that portion of assets of such an independent student which is not exempt from subdivision (i) shall be the same as the rate applied to the comparable portion of assets of the family of a dependent student; and

"(iii) in establishing a portion of effective family income which shall be exempt from assessment for contribution by reason of subsistence requirements of independent students who have no dependents, use the same method for computation of such portion for such students as is used for dependent students and for independent students who have dependents.".

(c) Section 411(b) (3) (B) (i) is amended—

(1) by redesignating subdivisions (II), (III), and (IV) as subdivisions (IV), (V), and (VI), respectively; and

(2) by striking out subdivision (I) and inserting in lieu thereof the following:

"(I) the full amount in the case of any entitlement which exceeds $1,600;

"(II) in the case of any entitlement which exceeds $1,200 but does not exceed $1,600, 90 per centum thereof;

"(III) in the case of any entitlement which exceeds $1,000 but does not exceed $1,200, 75 per centum thereof;".

(d) Section 411(b) (5) of the Act is amended—

(1) by striking out "$130,093,000" in subparagraph (A) and inserting in lieu thereof "$340,093,000"; and

(2) by striking out "$237,400,000" in subparagraph (B) and inserting in lieu thereof "$520,000,000".

(e) Section 411(b) of the Act is amended by adding at the end thereof the following new paragraph:

"(6) No payment may be made on the basis of entitlements established under this subpart during the fiscal year ending September 30, 1980, if, for such fiscal year—

"(A) the appropriation for making grants under subpart 2 of this part does not at least equal $450,000,000;

"(B) the appropriation for work-study payments under section 441 of this title does not at least equal $600,000,000; and

"(C) the appropriation for capital contributions to student loan funds under part E of this title does not at least equal $286,000,000.".

SEC. 3. Paragraph (5) of section 415C(b) is amended to read as follows:

"(5) provides that—

"(A) in any fiscal year for which the total appropriation for this program does not exceed $75,000,000, the payment of the non-Federal portion of such grants from funds supplied by such State shall represent an additional expenditure for such year by such State for grants for students attending institutions of higher education over the amount expended by such State for such grants, if any, during the second fiscal year preceding the fiscal year in which such State initially received funds under this subpart;

"(B) in the first fiscal year in which the total appropriation for this program equals or exceeds $75,000,000, the amount of funds expended by each State for the non-Federal portion of awards from allotments based on the entire amount appropriated shall be governed by subparagraph (A), and in any subsequent fiscal year in which the amount appropriated equals or exceeds $75,000,000, the amount of funds expended by each State for the non-Federal portion of awards made from allotments based on funds appropriated in excess of $75,000,000 (exclusive of funds required for purposes of section 415E) shall represent an additional expenditure for that year by such State over the amounts, if any, expended by such State for student grants during the second fiscal year preceding the fiscal year in which such State initially received funds under this subparagraph (B); and

"(C) the amount of funds expended by the State for the non-Federal portion of grants made pursuant to section 415E shall also be governed by subparagraph (A); and".

SEC. 4. Section 417B(b) of the Higher Education Act of 1965 is amended by inserting immediately after paragraph (5) the following new sentence:

"No individual who is an eligible veteran, as that term is defined by section 1652(a) of title 38, United States Code, shall be deemed ineligible to participate in any program under this subsection by reason of such individual's age.".

SEC. 5. Paragraph (3) of section 420(a) of the Act is amended to read as follows:

"(3) With respect to any academic year beginning on or after July 1, 1978, and ending on or before September 30, 1980, each institution which has qualified for payment under this section for the preceding year shall be entitled during such period, notwithstanding paragraph (1)(A), to a payment under this section, if the Commissioner de-

termines that such institution is making a good faith effort to continue to enroll veterans in the educational programs of that institution.".

SEC. 6. (a) Section 422(c)(5) of the Act is amended by striking out "the effective date of this subsection" each place it appears in subparagraphs (A) and (B) and inserting in lieu thereof "the date of enactment of this subsection".

(b)(1) Section 427(a)(2)(C)(i) of the Act is amended by striking out "or" and by inserting immediately after "Commissioner," the following: "or pursuant to a rehabilitation training program for disabled individuals approved by the Commissioner,".

(2) Section 428(b)(1)(M)(i) of the Act is amended by striking out "or" and by inserting immediately after "Commissioner," the following: "or pursuant to a rehabilitation training program for disabled individuals approved by the Commissioner,".

(c)(1) Section 428(a)(2) of the Act is amended by redesignating subparagraph (C) as subparagraph (B), by striking out subparagraph (D), and by striking out subparagraphs (A) and (B) and inserting in lieu thereof the following:

"(2)(A) Each student qualifying for a portion of an interest payment under paragraph (1) shall have provided to the lender a statement from the eligible institution, at which the student has been accepted for enrollment, or at which he is in attendance in good standing (as determined by the institution), which—

"(i) sets forth such student's estimated cost of attendance, and

"(ii) sets forth such student's estimated financial assistance.".

(2) Section 425(a)(1)(A) of the Act is amended by striking out "section 428(a)(2)(C)(i)" and inserting in lieu thereof "section 428(a)(2)(B)(i)".

(3) Section 428(a)(2)(B) (as redesignated by subparagraph (A) of this paragraph) of the Act is amended by striking out the semicolon at the end of clause (iii) and inserting in lieu thereof a period and by striking out clause (iv) of such section.

(4) Section 428(a) of the Act is amended by striking out paragraph (9).

(5) Section 428(b)(1)(A)(i) of the Act is amended by striking out "section 428(a)(2)(C)(i)" and inserting in lieu thereof "section 428(a)(2)(B)(i)".

(d) Section 438(b)(2) of the Act is amended—

(1) by striking out "3.5 per centum from such average" in subparagarph (A)(ii) and inserting in lieu thereof "3 per centum from such average for any loan which was in a period of repayment or subtracting 3.5 per centum from such average for any other loan";

(2) by striking out "(i)" in subparagraph (B);

(3) by striking out subparagraph (C) and inserting in lieu thereof the following:

"(C) Except as provided in paragraph (4), if the special allowance computed according to subparagraph (A) would (i) cause the special allowance for any twelve-month period to exceed 5.5 per centum in the case of loans which were in a period of repayment or to exceed 5 per centum in the case of any other loans, the special allowance rate to be paid for such three-month period shall be reduced to the highest one-eighth of 1 per centum rate which would not cause such excess; or (ii) cause such allowance for any such three-month period to be less than 1.5 per centum in the case of loans which were in a period of repayment or less than 1 per centum in the case of other loans, the special allowance rate to be paid for such three-month period shall be increased to the lowest one-eighth of 1 per centum rate which would not cause such difference.

"(D) For purposes of this paragraph, the term 'period of repayment' means any period during which any installment of principal has become due in accordance with section 427(a)(2)(B) or 428(b)(1)(E) and such installment is not deferred pursuant to section 427(a)(2)(C) or 428(b)(1)(M).".

(e) Section 439(d)(2) of the Act is amended by striking out "80 per centum" and inserting in lieu "100 per centum".

SEC. 7. Section 491(b)(3) of the Act is amended by inserting immediately after the first sentence thereof the following new sentence: "Such term also includes a proprietary educational institution in any State which, in lieu of the requirement in clause (1) of section 1201(a), admits as regular students persons who are beyond the age of compulsory school attendance in the State in which the institution is located and who have the ability to benefit from the training offered by the institution.".

SEC. 8. Section 497 of the Act is amended by adding after subsection (c) thereof the following new subsection:

"(d) Any determinations of need made for the purposes of part C or part E of this title shall include considerations of the factor described in section 413C(a)(2)(v). Nothing in this subsection shall be deemed to prohibit the taking into account for the purposes of such parts of other factors used for the determination of need under other parts of this title.".

SEC. 9. (a) Section 1208 of the Act is amended by striking out ", part C of title VII," each place it appears in subsections (a) and (b).

(b) Sections 1208(b) of the Act is amended by striking out "$215,000,000" and inserting in lieu thereof "$50,000,000".

SEC. 10. The amendments made by this Act shall take effect upon enactment, except that—

(1) the amendments made by subsections (a), (b), and (c) of section 2 shall be effective with respect to periods of enrollment beginning on or after August 1, 1979;

(2) the amendments made by subsections (d) and (e) of section 2 shall be effective October 1, 1978;

(3) the amendment made by section 3 shall be effective October 1, 1979;

(4) the amendments made by subsection (c) of section 6 shall become effective with respect to loans disbursed on or after October 1, 1978, to cover the costs of education for periods of enrollment beginning on or after August 1, 1978; and

(5) the amendments made by subsection (d) of section 6 shall become effective with respect to fiscal quarters beginning on or after October 1, 1978.

PARLIAMENTARY INQUIRY

Mr. COUGHLIN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state the parliamentary inquiry.

Mr. COUGHLIN. Mr. Speaker, the consideration of this bill was not printed in the RECORD and not announced by the leadership last week. Could I ask what notification the Members have had?

The SPEAKER pro tempore. The gentleman is not asking a parliamentary inquiry. There is nothing in the rules that requires that the bill be listed on suspension.

Mr. COUGHLIN. Mr. Speaker, a further parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. COUGHLIN. Mr. Speaker, the so-called Gross rule, which is a tradition in which the House is required to have 24 hours advance notice, is that not being complied with in this case?

The SPEAKER pro tempore. There is no such rule.

Mr. COUGHLIN. Mr. Speaker, I cite the RECORD of March 5, 1974, in which that rule was cited.

The SPEAKER pro tempore. As far as the Chair is concerned, there is no such rule under the suspension of the rules. There was no such requirement then, when the Chair refused on that occasion to recognize a certain former minority Member to suspend the rules.

Is a second demanded?

Mr. ERLENBORN. Mr. Speaker, I demand a second and I demand the majority by tellers.

The SPEAKER pro tempore. The question is, Will a second be ordered?

Tellers were ordered, and the Speaker appointed as tellers, Mr. ERLENBORN and Mr. FORD of Michigan.

The House divided, and the tellers reported that there were—ayes 28, noes 63.

Mr. PERKINS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 156, nays 218, answered "present" 1, not voting 59, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Wright for, with Mr. Ertel against.
Mr. Akaka for, with Mr. Nichols against.
Mrs. Collins of Illinois for, with Mr. Chappell against.
Mr. Dellums for, with Mr. Dent against.
Mr. Shipley for, with Mr. Stratton against.
Mrs. Burke of California for, with Mr. Teague against.
Mr. Krueger for, with Mr. Dan Daniels against.
Mr. Flood for, with Mr. Young of Alaska against.
Mr. Patten for, with Mr. Madigan against.
Mr. Risenhoover for, with Mr. Dickinson against.
Mr. Leggett for, with Mr. Walsh against.
Mr. Van Deerlin for, with Mr. Sarasin against.
Mr. Diggs for, with Mr. McKinney against.
Mr. Jenkins for, with Mr. Pursell against.

Until further notice:

Mr. Fary with Mr. Anderson of Illinois.
Mr. Price with Mr. Frey.
Mr. Alexander with Mr. Scheuer.
Mr. Cornwell with Mr. Runnels.
Mr. Drinan with Mr. Findley.
Mr. Fisher with Mr. Flowers.
Mr. Fowler with Mr. McClory.
Mr. Harrington with Mr. Gudger.
Mr. Fraser with Mr. Quie.
Mr. Richmond with Mr. Holland.
Mr. Ryan with Mr. Thone.
Mr. Charles Wilson of Texas with Mr. Whitley.
Mr. Tucker with Mr. Steiger.
Mr. Thornton with Mr. Winn.
Mr. McCormack with Mr. Roncalio.

Mr. ERTEL. Mr. Speaker, I have a live pair with the gentleman from Texas (Mr. WRIGHT). If he had been present he would have voted "yea." I voted "nay." I withdraw my vote and vote "present."

Ms. MIKULSKI and Mr. GONZALEZ changed their vote from "nay" to "yea."

Mr. ERTEL changed his vote from "nay" to "present."

Mr. BEARD of Rhode Island and Mr. RAHALL changed their vote from "yea" to "nay."

So the second was not ordered.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

(Mr. MAGUIRE asked and was given permission to revise and extend his remarks.)

Mr. MAGUIRE. Mr. Speaker, in this, and in the past Congress, I and a number of other Members have been interested in an approach to the student loan program which could provide flexibility in the repayment of student loans to minimize the loss to the Government from unrepaid claims on defaults, and to encourage broader use of the program.

Therefore, I shall urge on Wednesday that the House take the first step by tying repayment to the Government by a student who has defaulted to the student's ability to pay as evidenced in his taxable income. If this procedure works as well as I expect, it should be extended as an option to all student borrowers.

This approach will significantly lessen bankruptcy which is often used as a way of avoiding the ultimate obligation.

Mr. Speaker, I voted not to allow consideration of the Middle Income Assistance Act (H.R. 11274) under suspension of the rules for several reasons. First, the Education and Labor Committee failed to review alternative and more equitable payback procedures. While my amendment is a beginning, this whole area should be high on the committee's agenda next session.

Finally, the act does not offer the substantial financial reform of student assistance programs essential to assure all students the ability to choose the best higher education for which they qualify and to which they aspire.

PERSONAL EXPLANATION

(Mr. BINGHAM asked and was given permission to address the House for 1 minute.)

Mr. BINGHAM. Mr. Speaker, on March 16, rollcall No. 164, passage of the Humphrey-Hawkins bill, I was on the floor during the vote, intended to vote "aye," and to the best of my recollection did so. Apparently my vote was not recorded by the computer.

I understand that there is no way the record of the vote can be corrected. Accordingly, I ask unanimous consent that this statement be printed in the permanent edition of the CONGRESSIONAL RECORD.

The SPEAKER pro tempore (Mr. KAZEN). Is there objection to the request of the gentleman from New York?

There was no objection.

AUTHORIZING FUNDS FOR THE STANDING AND SELECT COMMITTEES OF THE HOUSE OF REPRESENTATIVES

Mr. ANNUNZIO. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution (H. Res. 1070) continuing funding authority for certain committees in the 95th Congress, 2d session, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1070

Resolved, That, notwithstanding the provisions of House Resolution 879, adopted on November 2, 1977, the period during which payments may be made from the contingent fund of the House of Representatives in accordance with such resolution, to any standing committee or select committee referred to in the first section or section 2 of such resolution, is hereby extended to the close of April 30, 1978.

Mr. ANNUNZIO (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ANNUNZIO) will be recognized for 1 hour.

Mr. ANNUNZIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1070 is a simple continuing resolution, and is identical to House Resolution 879, which was adopted on November 2, 1977. This resolution provides that committees of the House may continue with their business of this Congress until the adoption, by the House, of their respective funding resolutions. Further, this resolution specifies that House committees are entitled to continue their business in the second session at the expenditure rate of one-twelfth per month of the total amount authorized for their use during the first session of the 95th Congress. In addition, the resolution is effecting only through April 30, 1978, and any funds expended under this resolution will be deducted from the committee's 1978 funding. Mr. Speaker, this resolution is necessary so that the committees of the House may continue their business, and I urge its adoption.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. ANNUNZIO. I yield to my distinguished friend, the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I thank the distinguished chairman of the subcommittee for yielding to me.

Mr. Speaker, this bill was approved in our full committee by a unanimous vote and the chairman was directed to bring it to the floor.

I hope it will be promptly accepted.

Mr. ANNUNZIO. Mr. Speaker, I have no further request for time.

I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FUNDS FOR THE EXPENSES OF THE INVESTIGATION AND STUDY AUTHORIZED BY A RESOLUTION ADOPTED ON FEBRUARY 3, 1977, BY THE COMMITTEE ON INTERNATIONAL RELATIONS

Mr. ANNUNZIO. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 996 to provide funds for the expenses of the investigation and study authorized by a resolution adopted on February 3, 1977, by the Committee on International Relations, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 996

Resolved, That effective from January 3, 1978, the expenses of the investigation and study to be conducted by the Committee on International Relations, acting through its Subcommittee on International Organizations, pursuant to the resolution adopted on February 3, 1977, by the Committee on International Relations, not to exceed $412,935, including expenditures for the employment of investigators, attorneys, individual consultants or organizations thereof, and clerical, stenographic, and other assistants, shall be paid out of the contingent fund of the House on vouchers authorized by said committee, signed by the chairman of said committee, and approved by the Committee on House Administration. However, not to exceed $9,000 of the amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof, pursuant to section 202(i) of the Legislative Reorganization Act of 1946 (2 U.S.C. 72a (i)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House, and the chairman of the Committee on International Relations shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by this resolution shall expire at the close of October 31, 1978.

SEC. 4. Funds authorized by this resolution shall be expanded pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. ANNUNZIO (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMMITTEE OBJECTION

The SPEAKER pro tempore. The Clerk will report the committee amendment.

The Clerk read as follows:

Strike all after the resolving clause and insert in lieu thereof:

That effective from January 3, 1978, the expenses of the investigation and study to be conducted by the Committee on International Relations, acting through its Subcommittee on International Organizations, pursuant to the resolution adopted on February 3, 1977, by the Committee on International Relations, not to exceed $375,000 including expenditures for the employment of investigations, attorneys, individual consultants or organizations thereof, and clerical, stenographic, and other assistants, shall be paid out of the contingent fund of the House on vouchers authorized by said committee, signed by the chairman of said committee, and approved by the Committee on House Administration. However, not to exceed $9,000 of the amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof, pursuant to section 202(i) of the Legislative Reorganization Act of 1946 (2 U.S.C. 72a(i)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditures in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House, and the chairman of the Committee on International Relations shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by this resolution shall expire at the close of October 31, 1978.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. ANNUNZIO (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore, The gentleman from Illinois (Mr. ANNUNZIO) is recognized for 1 hour.

Mr. ANNUNZIO. Mr. Speaker, the request of the Subcommittee on International Organizations was for $412,935. The House Committee on Administration, after considerable deliberations, with the approval of the minority, approved $375,000.

I would like to inform the Members of the House that this committee expires on October 31, 1978.

I yield now to the gentleman from Illinois (Mr. DERWINSKI) if he wishes time.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. ANNUNZIO. I yield to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, could my friend, the gentleman from Illinois, advise me whether or not any minority staff requirements are provided for in this resolution?

Mr. ANNUNZIO. Mr. Speaker, I would like to respond to my friend, the gentleman from Illinois (Mr. MICHEL) by stating that the ranking minority member of this committee, the gentleman from Illinois (Mr. DERWINSKI), appeared before the committee and stated that as far as minority staffing was concerned that he was satisfied. He is here with us this afternoon and I will yield to that gentleman for the purposes of debate only so that he can reply to the question put to him by me in the committee and now before the House.

Mr. MICHEL. I thank the gentleman.

Mr. DERWINSKI. Mr. Speaker, first may I say to the gentleman from Illinois (Mr. ANNUNZIO) that I am pleased that the reduction from the request was minimal in this case and I thank the gentleman and his colleagues on the committee for their interest in the continuation of this investigation. The minority is still negotiating with the chairman for one additional staff assistant and at a later date, possibly in a month or two, for clerical help. Except for those matters which are still being, as I say, negotiated for the purpose of resolving them, I hope we do not have any problems.

I would like to point out that notwithstanding the controversial nature of the investigation I believe there has been excellent cooperation and there has been effective staff work within the committee although, as I say, with the understanding that from time to time we have honest differences of opinion, and I commend the gentleman for the interest he has had in this committee. Before closing, however, I would like to reiterate my request for additional minority staff. I specifically addressed my concern before the Subcommittee on Accounts of the Committee on House Administration and Chairman FRASER indicated he would support additional minority staffing.

Mr. ANNUNZIO. Mr. Speaker, I thank the gentleman from Illinois (Mr. DERWINSKI).

Mr. THOMPSON. Mr. Speaker, will the gentleman yield for the purpose of debate only?

Mr. ANNUNZIO. I would be delighted to yield to the chairman of the full committee, the gentleman from New Jersey (Mr. THOMPSON) for the purpose of debate only.

Mr. THOMPSON. Mr. Speaker, this matter has been gone over very thoroughly and I appreciate the assistance given by the gentleman from Illinois (Mr. DERWINSKI). It is my view and also the view of the committee that it is well justified.

I thank the gentleman from Illinois (Mr. ANNUNZIO) for yielding to me so that I might express my support for it.

Mr. ANNUNZIO. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the committee amendment.

The committee amendment was agreed to.

Mr. ANNUNZIO. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution, as amended.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. DERWINSKI. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 367, nays 13, not voting 54, as follows:

Mr. BOB WILSON changed his vote from "yea" to "nay."

So the resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. McCORMACK. Mr. Speaker, I was inadvertently absent during the vote on ordering a second on H.R. 11274, the Middle Income Student Assistance Act, which immediately preceded the business just concluded. If I had been present, I would have voted "yea" on ordering a second or on any procedural motion to bring the bill before the House.

GENERAL LEAVE

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolutions just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

POSTAL SERVICE ACT OF 1977

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1078 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1078

Resolved, That upon the adoption of this resolution it shall be in order to move, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7700) to amend title 39, United States Code, to establish congressional review of postal rate decisions, to increase congressional oversight of the United States Postal Service, to abolish the Board of Governors of the United States Postal Service, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Post Office and Civil Service, the bill shall be read for amendment under the five-minute rule. All points of order against the amendment in the nature of a substitute recommended by the Committee on Post Office and Civil Service now printed in the bill for failure to comply with the provisions of clause 7, rule XVI are hereby waived. It shall be in order to consider an amendment printed in the Congressional Record of March 14, 1978, by Representative Hanley of New York if offered as an amendment in the nature of a substitute for the bill, said substitute shall be read for amendment under the five-minute rule as an original bill, and all points of order against said substitute for failure to comply with the provisions of clause 7, rule XVI are hereby

waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendments in the nature of a substitute made in order by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from California (Mr. SISK) is recognized for 1 hour.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1078 provides for the consideration of H.R. 7700, the Postal Service Act of 1977.

This is an open rule providing 2 hours of general debate with the time equally divided and controlled by the chairman and ranking minority member of the Committee on Post Office and Civil Service.

The rule provides that the bill, as is customary, shall be read for amendment under the 5-minute rule. Printed in the bill is an amendment in the nature of a substitute. The rule, however, provides that an amendment printed in the CONGRESSIONAL RECORD (pp. 6899–6902) of March 14, 1978, by Mr. HANLEY of New York may be offered as an amendment in the nature of a substitute, and if such substitute is offered, it shall be considered as an original text for the purposes of amendment. This procedure is provided to expedite consideration of the bill by the House. Mr. HANLEY's substitute amendment represents the Post Office and Civil Service Committee's most recent attempt to achieve a compromise on the issue, and, thus, logically, should be the starting point for consideration of the measure.

The rule further allows any Member to demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or the amendments in the nature of a substitute. A motion to recommit with or without instructions is also provided.

The rule also grants waivers of points of order in three instances. The first is a waiver of section 402(a) of the Congressional Budget Act. This waiver is actually technical in nature. Section 402 (a) of the Budget Act prohibits the consideration of a bill authorizing new budget authority for a fiscal year unless the bill has been reported by May 15 prior to the start of the fiscal year. H.R. 7700 as introduced contained an authorization for fiscal year 1978 but was not reported until October 18, 1977. The authorization for fiscal year 1978 is something of a moot point at present since the committee substitute does not contain the fiscal year 1978 authorization. Nonetheless, the waiver is necessary since a point of order could still be raised against the bill.

The other two waivers provided by the rule pertain to germaneness. All points of order pursuant to clause 7, rule XVI (germaneness) are waived in regard to the committee amendment in the nature of a substitute recommended by the Committee on Post Office and Civil Service and now printed in the bill. The waiver is necessary because section 14 of the substitute amendment relating to congressional review of changes in postal services was not included in the bill as introduced, and since it involves the rulemaking authority of the House, would not be germane to the bill.

A waiver of germaneness is also granted to the amendment in the nature of a substitute which was printed in the CONGRESSIONAL RECORD of March 14, 1978, by Mr. HANLEY. This substitute amendment likewise contains the provision for congressional review of changes in postal services and, consequently, would not be germane to the bill.

Mr. Speaker, the purpose of H.R. 7700 is to make certain revisions to the Postal Reorganization Act of 1970. As my colleagues know, that act was designed to create a virtually self-sustaining postal system which would operate more efficiently and at less cost once it was isolated from political pressure. While the goals of efficiency and reduced costs have not been met, the postal service has become splendidly isolated from any type of political restraint.

One objective of H.R. 7700 is to insure greater accountability on the part of the Postal Service by increasing the authority of the President and the Congress over postal operations. Another objective of the bill is to provide a sound financial base for the future of the Postal Service.

The Hanley substitute for the bill includes provisions to reinstate presidential authority to appoint the Postmaster General with the advice and consent of the Senate. It also provides greater congressional control over the budget of the Postal Rate Commission, the closings and consolidations of post offices, changes in postal services, and the review of proposed capital investments. The substitute also authorizes $800 million in appropriations for each of the fiscal years 1979, 1980, and 1981.

In addition, the Postal Service is required to expend at least one percent of its total budget for research and development with particular emphasis on improving the technology for mail transfer.

In regard to this particular section, the Committee on Rules did hear testimony that the development by the Postal Service of a system for the electronic transmission of mail would also come within the jurisdiction of the Committee on Interstate and Foreign Commerce. The Rules Committee members were assured that satisfactory amendatory language would be offered to the bill to accommodate the jurisdictional concerns of both committees.

Mr. Speaker, H.R. 7700 is an important bill to all of us Our colleagues on the Committee on Post Office and Civil Service have worked diligently on this legislation and have persevered through several draftings of the bill. I urge my colleagues to adopt House Resolution 1078 so that we may proceed to the consideration of H.R. 7700.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a 2-hour, open rule providing for the consideration of H.R. 7700, the Postal Service Act of 1977. Section 402(a) of the Congressional Budget Act, which imposes the May 15 deadline for reporting legislation authorizing new budget authority, is waived. I am advised, however, that the authorizing committee will offer a floor amendment to cure the Budget Act violation.

Clause 7, rule XVI, the germaneness rule, is waived, permitting consideration of the amendment in the nature of a substitute recommended by the Post Office and Civil Service Committee now printed in the bill. The rule resolution further makes in order an amendment printed in the CONGRESSIONAL RECORD of March 14, 1978, by Representative HANLEY of New York, if offered, as an amendment in the nature of a substitute for the bill. This substitute is to be open to all germane amendments as an original bill. All points of order against the substitute for not complying with clause 7, rule XVI, the germaneness rule, are waived.

There is a motion to recommit with or without instructions.

As reported, H.R. 7700 contains the following principal provisions:

First. Subjects postal rate changes to congressional veto by concurrent resolution and authorizes funds to compensate for disapproval of a postal rate increase.

Second. Limits the contingency reserve to 2 percent of the annual budget.

Third. Sets a maximum of 60 percent of total costs which may be attributed to a class of mail or type of postal service, except for parcel post. Nonprofit and preferred mailers are not required to pay more than the 60 percent attributable costs. Revenue loss is made up through appropriations.

Fourth. Authorizes annual public service appropriations for fiscal year 1979 and fiscal year 1980 for maintaining small post offices, R. & D. programs, and 6-day delivery.

Fifth. Lowers parcel post rate from 10 to 7 percent below the rate which would exist if no appropriation were made.

Sixth. Removes the Postal Rate Commission from Postal Service control and places the Commission under the appropriation process.

Seventh. Abolishes the Board of Governors of the Postal Service and transfers its powers to the Postmaster General and Postal Rate Commission. Gives the President power to appoint the Postmaster General with the consent of the Senate. Fixes the pay of Postmaster General at $66,000 and places a ceiling on other salaries of $47,500.

Eighth. Requires the Postal Service to hold a public hearing any time it proposes to close a post office.

Ninth. Provides for congressional review of nationwide changes in postal services.

Tenth. Requires that career employees who are residents of a post office delivery area be given preference in appointment to postmaster vacancies and that nonpostal employees who are residents of an area be given preference over nonresidents.

The total cost of the reported version of the bill is estimated to be approximately $2.57 billion in each of fiscal years 1979 and 1980. This cost estimate includes the $920 million and $832 million authorized under existing law for fiscal years 1979 and 1980, respectively. The net cost increases, then, for those fiscal years are about $1.65 billion and $1.74 billion.

The substitute to be offered by Representative HANLEY makes some significant changes in the bill as reported. Instead of the cost increases contemplated, the substitute proposes to authorize only $800 million for 3 fiscal years. The current $920 million authorization would be maintained through fiscal year 1984. The Postmaster General would be appointed by the President for a term concurrent with the President's. The Board of Governors would be retained in a primarily advisory capacity. The Postal Rate Commission, not Congress, would have final authority to approve postal rates. Finally, the amount the Postal Service is required to spend for R. & D. would be reduced from 2 to 1 percent by fiscal year 1982, or to a total of $180 million.

Mr. Speaker, when this bill came before the Rules Committee on Tuesday, March 14, each member of the committee found a copy of a letter addressed to the chairman from Stuart Eizenstat, Assistant to the President for Domestic Affairs and Policy. The committee soon realized that what had been perceived as a compromise with the White House, as embodied in the Hanley substitute, was not that at all. The letter is three pages long and indicates numerous sections in the legislation which the administration finds objectionable.

I bring this to the attention of the Members so that all of us will be aware of the confused state in which we are being asked to pass this bill. Although I intend to support the rule and am generally in favor of this legislation, I do not believe this House should be subjected to these chaotic conditions.

Mr. CHARLES H. WILSON of California. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield.

Mr. CHARLES H. WILSON of California. The gentleman said that this bill was coming before the House in a peculiar way. What is peculiar about the manner in which the bill is coming before the body?

Mr. LOTT. Well, the peculiar part of it is that we have one bill reported from the Committee on Post Office and Civil Service. It came to the Rules Committee and stayed there for a while. Now, we have made in order a substitute offered by the gentleman from New York (Mr. HANLEY), which we will be considering if it is offered—and I am sure it will be—for the original H.R. 7700.

It is not clear to me exactly where the White House stands on this legislation. It is clear to me that there are going to be a number of amendments offered to this Postal Service legislation. So, I think that it is somewhat of a peculiar or confusing situation to bring it before us today. I want to emphasize to the gentleman that I am not speaking against this bill or the rule, but I am trying to point up the fact that there are some differences of significance in what we are going to be considering this afternoon.

Mr. CHARLES H. WILSON of California. There certainly have been some differences of significance. I intend to make reference to some of them when I get the opportunity. I would say that it is not uncommon, however, for a substitute bill to be offered after a bill has come from the Rules Committee. This is not an unusual procedure.

The fact that the bill was bottled up in the Rules Committee for some time was rather peculiar also, and we hope that we have made the necessary changes that will remedy the reasons for it having been bottled up. We think a lot of it was caused by misunderstanding, but as we proceed with the debate I think we will find that it is a different bill and will accomplish what the constituents of the Members of this body have been asking for for some time.

Mr. LOTT. I know the gentleman is interested in this legislation and I hope he will help us to clear up some of the questions that still exist.

Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Speaker, like the gentleman from Mississippi, I am not opposing the rule but I think we all ought to understand the complexities before us. First, I would like to remind the Members that in a widely publicized press conference on the 10th of February, in answer to a question about postal legislation, the President stated:

> My hope is that the Postal Reform Bill as presently drafted will not get out of the Rules Committee, and if it does, it won't pass.

Later on in that press conference the President also went on to say, and I quote again our beloved President:

> It is a very complicated bill and far-reaching in its impact. It would have a very adverse effect on the Federal budget. I think that in general—I do not want to say conclusively—but in general, the Congress and the President ought to stay out of the administration of the Post Office itself.

Then as I understand the situation, the Speaker was told to keep a hold on the bill. Due to circumstances I am not privy to, probably polite pressure from certain members of the majority, the Speaker released his hold. The word then went on that the administration, that is the White House, had reached an agreement with the committee majority.

Then the White House issued a letter of March 14, signed by Mr. Eizenstat, Assistant to the President for Domestic Affairs and Policy, which discussed modifications of the agreement that was reached. I quote from that letter:

> While we believe that each of the modifications has improved the legislation, we continue to have a number of serious reservations and objections to the bill. The President has indicated—

Listen carefully now—

> that he will not commit himself to signing postal legislation until he has had an opportunity to review it in its final form.

So I asked a knowledgeable Member: What does that language mean, "the President will not commit himself until he has an opportunity to review"?

It was indicated that this was White House language for threatening a veto. Then we were told that really was not so, that this letter was a mistake and we received a followup letter from Eizenstat, which was even more interesting, and I read from that letter of March 15:

> Although the Administration cannot support H.R. 7700 on the floor, we will not oppose it at that time nor do we intend to introduce or support amendments to it, other than those supported by Congressmen WILSON (CHARLES H. WILSON of California) and HANLEY.

But then the letter went on to say:

> We hope to be able to resolve any problems we now have with the proposed postal legislation during the balance of the legislative process.

So again having difficulty understanding the White House language, I asked someone what was meant. I was told that the phrase "during the balance of the legislative process" meant that the bill would be rewritten in the Senate.

So for practical purposes here is what we have: We have a bill with a number designated H.R. 7700, postal reform, in which the House has been told the White House does not like it, but pass it anyway because we have a deal in the Senate. There we will polish it up, rewrite it and revamp it, and so the House exercise is merely a technical step.

I ask Members about the precedent: If that is the case, why do we not take every bill, every budget measure, every appropriate measure, every education measure, just attach a number, pass it in any form we want, adding amendments helter-skelter, and the White House and the other body will work it out? Because that is what is really happening in this bill.

I feel like a prophet without honor, since a year ago I predicted that if this passed the Senate the sponsors would not recognize it.

By the time the distinguished Members of the other body and Mr. Eizenstat and his White House tacticians finish rewriting the bill it will be interesting to compare it to what was originally the House measure. But, not being privy to the strategy, not being privy to the relations, good or bad, between House Democrats and the administration, it strikes me as much ado about nothing. I really do not understand why we in the House are merely a technical vehicle when the real work, the real

thing, the final deals are all to be made in the Senate.

Mr. HANLEY. Mr. Speaker, will the gentleman yield?

Mr. DERWINSKI. Of course I yield to the distinguished gentleman from New York (Mr. HANLEY).

Mr. HANLEY. I thank the gentleman for yielding.

Let me say to my very distinguished member of the committee I think the gentleman will agree that this is probably not the first time that an administration has had a difference of opinion with that of the legislative body.

We anticipate today that because this is such a highly responsible piece of legislation——

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. DERWINSKI. Will the gentleman yield me some additional time?

Mr. LOTT. I yield two additional minutes to the gentleman from Illinois (Mr. DERWINSKI).

Mr. HANLEY. Mr. Speaker, if the gentleman will yield further, let me finish what I was saying: We anticipate today because, in that this is such a highly responsible piece of legislation.

Mr. DERWINSKI. Will the gentleman permit me to interrupt for just a minute. I understand what the gentleman is getting to, but that is not the point at all. The point is a little item of some $720 million.

Mr. HANLEY. But the gentleman sought clarification and that is the only purpose for the response. So what we intend to do here today is to overwhelmingly pass this legislation here in the House which, in essence, will transmit another message to the White House.

Mr. DERWINSKI. I understand.

Mr. HANLEY. Hopefully, along with the results of the three previous votes on the subject matter.

Mr. DERWINSKI. I understand the motive in sending a message to the White House, but what if the White House on this measure, knowing better, does not really respond to the message? Then where is the gentleman from New York? He is where I think he is, with the Senate rewriting his bill.

Mr. HANLEY. Our counterparts in the Senate have been totally responsive to what we have been doing here in the House and we anticipate expedient action over there. If we had the good fortune to have passed this in the House last year the Senate, in all probability, would have been in the process of disposing of it using similar language.

So we are very optimistic. We do not worry about what the administration might or might not do now or in the future because we will transmit a very strong message from the House and from the Senate which will conclude any further thinking on the part of the administration that this is less than good for the national interests.

Mr. DERWINSKI. That leads me to two conclusions: First, the next Postmaster General should come from Syracuse, N.Y., and second, that the President——

The SPEAKER pro tempore. The time of the gentleman has again expired.

Mr. DERWINSKI. May I have 30 additional seconds?

Mr. LOTT. I yield 1 additional minute to the gentleman from Illinois.

Mr. DERWINSKI. I thank the gentleman again for yielding me the additional time.

Mr. Speaker, the point I want to make to my dear friend from New York is that when the White House gets this message, then they will send a message to the Speaker saying, "This time we mean business." And then I presume if the gentleman from New York (Mr. HANLEY) moves to override the veto in the House that this body will support our noble President and will sustain the veto.

If this bill had passed last year, the President would now be slightly grayer and more ulcer prone.

Mr. HANLEY. It was my intent that when the President gets around to appointing a Postmaster General that his selection would be the highly distinguished gentleman from Illinois (Mr. DERWINSKI).

Mr. LOTT. Mr. Speaker, will the gentleman yield for a couple of brief questions?

Mr. DERWINSKI. Anything the gentleman says.

Mr. LOTT. I am a little bit confused.

Mr. DERWINSKI. Join the crowd.

Mr. LOTT. Is the gentleman in the well (Mr. DERWINSKI) speaking on behalf of the administration on this legislation?

Mr. DERWINSKI. Yes.

The SPEAKER pro tempore. The time of the gentleman has again expired on that one.

Mr. LOTT. I will yield my own time.

Mr. DERWINSKI. I thank the gentleman for not cutting me off.

Mr. LOTT. I would just like to ask one additional question. Is there any significance to the yellow coat that the gentleman has on?

Mr. DERWINSKI. Yes, the yellow coat indicates springtime is here, postal reform is here, and support of our noble President is in order.

Mr. LOTT. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. For my colleagues' benefit, I would like to review the exact remarks of the President of the United States on February 10 in answer to a question. Mr. Grunfeld of New York asked the President:

> I would ask you to give the bill (the postal reform bill) every consideration and perhaps you would give us some comment on how you feel about the postal reform bill at this time.

The President, in his normal, very straightforward manner, said:

> My hope is that the postal reform bill as presently drafted will not get out of the Rules Committee, and if it does, it won't pass.

Then he gave a list of things that he thought were wrong, and one was that the bill is a budget buster.

I wonder if my distinguished colleague, the gentleman from New York, or the gentleman from California could tell us about the rule and why the President opposed the rule. Could either of the gentlemen tell us? I will yield to either one who wants to undertake to explain why the President opposed the rule for considering of this bill.

Mr. HANLEY. If the gentleman will yield, all I can say at this point in response to the President is that already we have proven the President wrong. At that time he said that it would not get out of the Committee on Rules.

Mr. ROUSSELOT. No. He said he would prefer that it not come out.

Mr. HANLEY. In essence he would prefer, so it is the same thing. The fact of the matter is that it sailed through the Committee on Rules, probably unanimously.

Mr. ROUSSELOT. No, I do not think it was unanimous.

Mr. HANLEY. Close to it, close to it. We will not clutter it up with detail. The fact of the matter is that it is on the floor.

Mr. ROUSSELOT. What did the President object to?

Mr. HANLEY. I cannot account for the misunderstanding on the part of the President. All we know is that we have a highly responsible piece of legislation that is embraced by virtually every knowledgeable entity in the United States of America.

Mr. ROUSSELOT. But the President does think it is responsible. Let me quote another statement.

Mr. CHARLES H. WILSON of California. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. The gentleman from California wants to respond as to why the President is opposed to the rule. I yield to the gentleman.

Mr. CHARLES H. WILSON of California. I think the President was opposing the rule because he was writing a letter to the Committee on Rules through Mr. Eizenstat expressing reservations that he still had about the bill. He was not opposed to the bill, because representations were made to us that they would not oppose the bill.

The principal reason is that the President still does not understand this legislation. He has been so distant.

Mr. ROUSSELOT. As he was with the B–1 bomber.

Mr. CHARLES H. WILSON of California. He has not really had a chance to study this legislation.

Mr. ROUSSELOT. The two of you are trying to educate him?

Mr. CHARLES H. WILSON of California. We are, yes.

Mr. ROUSSELOT. The President also said, and I quote the President at this press conference:

> It is a very complicated bill and far reaching in its impact. It would have a very adverse effect on the Federal budget.

Then he went on to say that the bill would throw the budget out of kilter even more than it already is by almost $800 million.

I saw our budget chairman wandering around here a minute ago. I just wonder if somebody could talk about the adverse effect of this bill on the budget.

Mr. JOHN L. BURTON. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I will always yield to my distinguished colleague from California.

Mr. JOHN L. BURTON. I thank the gentleman for yielding.

Under the Rousselot-Burton immediately balanced budget provision, it would have had an adverse effect; but under the Ashbrook compromise that gave the President until 1983 to balance the budget, this really will not have any effect at all.

Mr. ROUSSELOT. I appreciate the gentleman's comments.

Mr. JOHN L. BURTON. It will have much more effect than the Saturday mail delivery that the gentleman voted for.

Mr. ROUSSELOT. Not me.

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Arizona who helped create this wonderful Postal Act that we now operate under.

Mr. UDALL. I thank the gentleman for that kindness and for his support of the President. I hope he will continue his support of the President.

I cannot let this moment pass, there having been placed in nomination as the next Postmaster General of the United States the gentleman from Illinois (Mr. DERWINSKI). I think that is a serious mistake.

Mr. Speaker, I want to place in nomination the name of a great patriot, the gentleman from California, Mr. JOHN ROUSSELOT. I think the appointment of the gentleman from California as Postmaster General would simultaneously improve the quality of our Postal Service and also our deliberative process here in the House.

Mr. ROUSSELOT. What can I say on both counts? There is really not much response to that.

I see that the chairman of the Budget Committee has returned. The President mentioned this would have a very adverse effect on the budget.

The SPEAKER pro tempore. The time of the gentleman from California has expired.

Mr. LOTT. Mr. Speaker, I yield 2 additional minutes to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I wonder if the Budget Committee chairman could respond to the President's statement that this bill would have a very adverse effect on our budget.

Mr. GIAIMO. Mr. Speaker, if the gentleman will yield, I believe I would concur in what the gentleman says.

Mr. ROUSSELOT. No. This is what the President said.

Mr. GIAIMO. Well, this is no question it will have an additional effect.

I cannot resist the gentleman's invitation, I must say to the gentleman from California, but there is no question as to what the gentleman says, that this legislation provides for assistance increases in an already crowded deficit and budget, to say the least.

What disturbs me about this bill, quite frankly, is that neither the Postal Corporation nor the President of the United States seem to favor it. I do not know why we are forcing that upon them, that being the case.

Mr. HANLEY. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I would be glad to yield to my distinguished colleague, the gentleman from New York, who I am sure opposes deficits.

Mr. HANLEY. Mr. Speaker, the gentleman—well, he is a gentleman—the President in the state of the Union message a month or two ago stated that it was the goal of this administration to avoid crisis management. That is what this measure is all about, to avoid crisis management.

Mr. ROUSSELOT. By creating more deficits?

Mr. HANLEY. May I continue?

Mr. ROUSSELOT. Why, certainly. I want to know how that avoids crisis management.

Mr. HANLEY. The gentleman will remember that in the previous Congress we passed a measure known as H.R. 8603. What was the purpose of that measure? To provide the ailing almost bankrupt U.S. Postal Service with an additional billion dollars just to provide some glue to hold the institution together, so that it would not go bankrupt in October of that year. That is what we are doing here, so the taxpayers had to pick up the tab for that billion dollars.

Mr. ROUSSELOT. For that Postal Service?

The SPEAKER pro tempore. The time of the gentleman from California has again expired.

Mr. LOTT. Mr. Speaker, I yield 1 additional minute to the gentleman.

Mr. ROUSSELOT. Mr. Speaker, I yield to the gentleman from New York for a further explanation as to why after adding $1 billion to the debt we have to add another $800 million to the debt?

Mr. HANLEY. We are making this investment to negate the necessity of poor investments on the part of taxpayers in the future.

The $1 billion spent in the last Congress, unfortunately, as I said, was just to provide the glue to hold the institution together.

Mr. ROUSSELOT. We need some more glue.

Mr. HANLEY. All the provisions in this bill will tend to have the effect to mandate efficiencies by the U.S. Postal Service.

Mr. ROUSSELOT. How is this going to mandate efficiency?

Mr. HANLEY. Apparently the gentleman has not read this bill.

Mr. ROUSSELOT. Oh, I have read it very carefully. I have listened to the President. I have listened to many people who feel that H.R. 7700 is not the right kind of glue to help hold the Postal Service together. In the February 10 press conference, President Carter agreed with my assessment of this bill:

> My own concern, among others, is that if the bill is approved and another one and a half or two billion dollars is allocated to the Post Office, that this might be an encouragement to channel that money not into better services necessarily, but into immediate additional increases in salaries for postal employees.

The President went on to say:

> In general, the Congress and the President ought to stay out of the administration of the Post Office itself.

President Carter may be prophetic.

It is going to mean more deficit for the Federal taxpayers to pick up.

Mr. HANLEY. Mr. Speaker, let me say to the gentleman that I suggest upon the completion of his remarks here that he sit back at the table and give that another reading. If he does that I believe then he will come over here and say to me, "By golly, you're right."

Mr. ROUSSELOT. Mr. Speaker, I seriously doubt that, but I will give it a try.

Mr. LOTT. Mr. Speaker, I yield back the balance of my time.

Mr. SISK. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, I think the discussions of the last few minuts have made it very clear as to why we have this resolution before us here. We are doing this in order that we may enable the Committee on Post Office and Civil Service to take the floor and explain this bill. I understand that it has been somewhat controversial.

I want to take this opportunity to express my deep appreciation to the members of the committee on both sides of the aisle for their cooperation and their work in this matter. Certainly this whole issue of the Postal Service is a very controversial issue. I think in the last 7 or 8 years we have all had more mail on this subject than any other. It is evident to me that we need to debate this issue and debate it from the standpoint of the recommendations of the committee.

Mr. Speaker, I would hope, of course, that the resolution will be adopted.

Mr. Speaker, I yield 5 minutes to the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Speaker, if the Postal Service were a public corporation, it would, in sales, rank about No. 11 on the chart of corporate giants—right after General Electric and right above Chrysler Corp. More money passes through the hands at the Postal Service each year than through the hands of four of the largest oil companies. It sells twice the dollar amount in stamps each year than United States Steel sells in steel. Those nickels and dimes add up.

The Postal Service is probably the best, cheapest, and most efficient postal operation in the world. It supplies a tremendous number of jobs to the national employment rolls. It is the only contact that most Americans have on a continuing daily basis with the Federal Government.

While the Postal Service is outstanding among postal services, we cannot say it is outstanding among American enterprises. Wherever it meets competition it is blown away. The record of its battles with United Parcel Service (UPS) over package mail best illustrates this: After billions down the drain to build bulk mail centers to emulate the UPS parcel delivery system, the Postal Service finds itself carrying less parcels, and

breaking more, while UPS continues to expand services.

Second, the reason the Postal Service is a large employer is the labor intensive nature of its operations. For fiscal year 1979, for example, about $14.7 billion of the $18.8 billion the Postal Service expects to spend will be spent in wages and benefits for about 524,000 employees. This is a wad of money and a lot of jobs but it does not mean that the average postal worker is on the gravy train. In fact, he or she is making a little less than the median national income.

Third, the Postal Service is the only contact which most Americans have, a day in and day out, with the Federal Government. That daily contact is why none of us, come October, will be campaigning on the steps of the Nation's many post offices.

In 1970, Congress tried to make the Postal Service into a business and insulate it from politics. There were and remain good reasons for transformation, but there is a big problem in turning a Government agency into a quasi-private corporation. One ends up with a corporation with private managers but no stockholders. One ends up with a management run amuck with no corporate gadflies or Securities and Exchange Commission around to bring the appropriate lawsuits to keep it in line.

An easy answer to this problem might be to pass a law authorizing, upon a certain day, that each citizen of the United States be given a share of stock in the Postal Service. We could then let the courts begin processing the torrent of stockholders derivative suits which would soon be filed. Frankly, however, such a procedure ignores the matter of congressional responsibility for permitting the irresponsibility of Postal Service management to persist for so long.

Another answer would be to turn the Postal Service back into a Government department.

We might make it more responsible but I sense many of us do not want to return to the days before the Postal Act of 1970 and the politics of those days?

A third approach lies in H.R. 7700. This bill would make the Postmaster General a Presidential appointee subject to Senate confirmation. This should make the Postal Service more responsive to the political officers of the Government and to the people who elect them without politicizing the whole agency. Second, the bill forthrightly recognizes that the Postal Service is not and cannot be a breakeven business, at least without large postal rate increases, and curtailments of service which we in Congress have generally agreed should not occur within the only Federal agency which has constant day-to-day contact with the public. A couple of amendments to be offered today—to dump the Postal Service Board of Governors and to require line item appropriations to the Postal Service—would strengthen the changes made.

Mr. Speaker, even though there are some very good changes in H.R. 7700, they are accompanied by some very bad provisions. The worst of these are in section 2 of the Hanley-Wilson substitute.

Section 2, as written, is, I believe, going to immediately justify the 16-cent first-class stamp. It will do this by assuring that first-class mail users pick up nearly 40 percent of the costs of other mail classes. This is because there will be a 60-percent cost gap placed on any costs which are directly attributable to a class of mail.

Section 2 of the bill, as now written, is a disaster to the first-class mailer. Nobody has done a study of its effects upon first-class mail rates, but my own educated guess is that this section alone will jack up rates for first-class mail by at least 2 cents a stamp. This increase will have nothing to do with rising costs of mail handling. It will have nothing to do with inflation. It will come about as the result of a statutory juggling of the books at the Postal Service.

The following is an example of how section 2 would work: Let us suppose that the Postal Service sends a truck to a magazine company once a week to pick up its latest issue for mail. The magazine company would only have to pay for 60 percent of the costs of that truck. First-class mail users would pick up most of 40 percent left. However, if a like truck were being sent to the Bank of America each week to pick up first-class Bankamericard bills, 60 percent of the costs of that truck would be charged to first class. But, because this is first-class mail, the other 40 percent left would also mostly be paid by first class. It is not sensible to think that BankAmericard may view electronic fund transfer systems as a godsend.

In other words, section 2 of the bill would put into statute form a concept which Marie Antoinette would have loved. Those who eat bread—all of us first-class users—would be forced to subsidize those who eat cake.

It is the same as lowering the cost to upper income people and putting it on lower income people, because a lot of people who cannot use telephones, et cetera, have to use first-class mail. By passing this bill we are guaranteeing first-class rates are going up, because we are mandating first-class money can bail out other classes and give them lower rates.

Mr. MAZZOLI. Mr. Speaker, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Speaker, I was listening with great interest to the gentlewoman's statement. The gentlewoman touched on a point that concerns me. I was not in the committee and was, therefore, not available for answer by way of debate.

The SPEAKER pro tempore. The time of the gentlewoman from Colorado (Mrs. SCHROEDER) has expired.

Mr. SISK. Mr. Speaker, I yield 2 additional minutes to the gentlewoman from Colorado (Mrs. SCHROEDER).

Mr. MAZZOLI. Mr. Speaker, if the gentlewoman will continue to yield, if I understood the gentlewoman correctly, she said that under the bill only 60 percent of the cost can be attributable to each class and, therefore, first class can in fact, and does, subsidize other classifications of mail, including parcel post. I was curious. What is the justification for that type of subsidy?

Mrs. SCHROEDER. It beats me. I can find no such justification. That is why I am offering an amendment saying we should not do that.

As I read the Postal Reform Act that we passed in 1970, it said there should be full allocation of costs to each class of mail. Obviously, there are some costs you cannot allocate. But you can allocate many more costs than the Postal Service is now. Those of us who challenged the rate base and accounting system in the courts said we did it on the basis, that 1970 act held all costs should be allocated if possible to each class. The courts agreed with my position. As the Members know, there was no way for the court to roll back the rate increase so winning meant nothing.

What worries me is that we are undoing the court decision by enacting section 2 of this legislation and saying what the Postal Service was doing in the past and the courts held was wrong—is now right.

Mr. MAZZOLI. It seems to me there is some justification for subsidizing small mailers and charity mail. I do not see that thread connected with the parcel post or connected with the big magazine mailers.

Mrs. SCHROEDER. That is right. In my amendment we leave in the small mailer's exclusion. But for large mailers and everything else, we do not.

Mr. MAZZOLI. If we were to campaign on the steps of our post office in the November election, it would be very hard to explain for the folks who send two or three letters a week at 13 cents a crack—soon to be 16 cents—that they are in fact subsidizing these multibillion-dollar operations.

Mrs. SCHROEDER. Yes. I think we in the Congress will probably continue to subsidize many of the people who need it, such as charities and nonprofits.

Mr. MAZZOLI. That would not be affected by the gentlewoman's amendment.

Mrs. SCHROEDER. But we need to know that.

Mr MAZZOLI. I thank the gentlewoman.

Mr. LOTT. Mr. Speaker, I have no further requests for time.

Mr. SISK. Mr. Speaker, I urge adoption of this resolution in order to permit the committee to explain its position. It certainly is an open rule. I would urge the Members to vote for it.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LOTT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic de-

vice, and there were—yeas 387, nays 0, not voting 47, as follows:

The Clerk announced the following pairs:

Mr. Akaka with Mr. Anderson of Illinois.
Mrs. Burke of California with Mr. Erlenborn.
Mr. Shipley with Mr. Harrington.
Mr. Flood with Mr. Young of Alaska.
Mr. Jenkins with Mrs. Collins of Illinois.
Mr. Chappell with Mr. Frey.
Mr. Risenhoover with Mr. Weiss.
Mr. Dellums with Mr. Dickinson.
Mr. Krueger with Mr. Winn.
Mr. Fowler with Mr. Madigan.
Mr. Fary with Mr. Quie.
Mr. Gudger with Mr. Findley.
Mr. Teague with Mr. McClory.
Mr. Cornwell with Mr. Charles Wilson of Texas.
Mr. Dent with Mr. Roncalio.
Mr. Hawkins with Mr. Whitley.
Mr. Nolan with Mr. Sarasin.
Mr. Rangel with Mr. Pursell.
Mr. Van Deerlin with Mr. Thone.
Mr. Thornton with Mr. Scheuer.
Mr. Runnels with Mr. Tucker.
Mr. Ryan with Mr. Fraser.
Mr. Flowers with Mr. Steiger.

Mr. McDADE changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. NIX. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7700) to amend title 39, United States Code, to establish congressional review of postal rate decisions, to increase congressional oversight of the U.S. Postal Service, to abolish the Board of Governors of the U.S. Postal Service, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Pennsylvania (Mr. NIX).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 7700, with Mr. PATTISON of New York in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Pennsylvania (Mr. NIX) will be recognized for 1 hour, and the gentleman from Illinois (Mr. DERWINSKI) will be recognized for 1 hour.

The Chair recognizes the gentleman from Pennsylvania (Mr. NIX).

Mr. NIX. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I will be brief because the two subcommittee chairmen who have guided this bill through our committee from the very beginning will lead the debate for the proponents to H.R. 7700 today, but I would like to say a few words in support of the bill.

The basic thrust of H.R. 7700 is to finance the current postal deficit through appropriations rather than facing the unpleasant prospect of another postal rate increase just as soon as the current postal rate increase is approved by the Postal Rate Commission.

To avoid this, the committee amendment, which Mr. HANLEY will introduce in a few moments, will authorize an additional public service appropriation of $800 million for each of the next 3 fiscal years. That is a reasonable figure. It is half as much as the bill originally proposed to authorize, and almost exactly the amount necessary to bail the Postal Service out of its current annual deficit. So an easy way to vote on this is as follows: If you want to balance the postal budget and avoid an 18-cent stamp next winter, vote for the committee amendment; if you want to increase the postal deficit, close small post offices, end Saturday mail delivery, and have an 18-cent stamp next year, vote against the committee amendment.

A second major feature is to restore to the President the authority to appoint the Postmaster General, as he did for about 150 years. Under the Postal Reorganization Act, the Postmaster General is appointed by the Governors of the Postal Service, and although I am sure that the gentlemen who have served as Postmaster General since then have all been faithful public servants. I believe I am accurate in saying that the Congress has not been particularly pleased by the Postal Service's failure to respond to congressional interest. By restoring the Postmaster General's status to the control of the President, which President Carter has requested, we believe that the Chief Executive Officer of the Postal Service will be more responsive to the public interest than he is when isolated by a Board of Governors which meets 1 day a month.

Finally, in the last few days, there has been quite a bit of talk about what the President's position is on H.R. 7700. A letter, which was addressed to me, and which was delivered to many others before it was delivered to me, and which was signed by Stuart Eizenstat, has been construed by some to support opposition to H.R. 7700. Such an interpretation is incorrect. Mr. Eizenstat has provided me with a clarification of his letter, which states specifically that the President will not support or propose any amendments to H.R. 7700, except the amendment proposed by Mr. HANLEY today, which was the basis of our understanding with Mr. Eizenstat earlier this month.

I insert in the RECORD at this point Mr. Eizenstat's letter of March 15, which makes the President's position crystal clear.

THE WHITE HOUSE,
Washington, March 15, 1978.

Hon. ROBERT N. C. NIX,
Chairman, Post Office and Civil Service Committee, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: As a follow-up to my letter of March 14, 1978, dealing with the Administration's substantive views on H.R. 7700, permit me to indicate our position when it reaches the floor.

Although the Administration cannot support H.R. 7700 on the floor, we will not oppose it at that time nor do we intend to introduce or support amendments to it, other than those supported by Congressmen Wilson and Hanley.

We hope to be able to resolve any problems we now have with the proposed postal legislation during the balance of the legislative process.

Very truly yours,

STUART E. EIZENSTAT,
Assistant to the President for Domestic Affairs and Policy.

Mr. Chairman, I yield to my distinguished colleague and most able subcommittee chairman, Mr. HANLEY, and yield the control of the time to him for the remainder of general debate.

Mr. HANLEY. I thank the very distinguished gentleman for yielding.

Mr. Chairman, it is a pleasure to rise in support of H.R. 7700, the Postal Service Act of 1978. This bill is strongly dedicated to the principle that a Government agency charged with service to the people cannot function properly, isolated from the elected leaders of Government. The substitute I and the gentleman from California (Mr. CHARLES H. WILSON) are offering contains modifications reached after some consultations with administration officials subsequent to the passage of the bill.

The consultations were held at the request of the Speaker who was responding to some disagreement with provisions of the bill. After modifications were made, although they did not change the basic thrust of H.R. 7700, the administration agreed not to oppose consideration of the measure by the House. Since the passage of the Postal Reorganization Act of 1970, this committee through its two Postal Subcommittees has closely monitored the operations and policies of the U.S. Postal Service.

H.R. 7700 is largely a result of these studies conducted by my Subcommittee on Postal Operations and Services and the Subcommittee on Postal Personnel and Modernization, chaired by the gentleman from California (Mr. CHARLES H. WILSON), who is a cosponsor of H.R. 7700. We did many things right in 1970 and H.R. 7700 does not move to change them. We establish a modern system of labor relations, allowing the Postal Service to borrow money for capital projects, revise and modernize contracting procedures, remove postmasterships from the clutches of political patronage and establish a more objective method for establishing rates; but we let our enthusiasm for creating something new get out of hand. We created an organizational monster, which in a real sense was accountable to no one. It was not accountable to the President, because it was run by a Postmaster General appointed by a very part-time board of governors, appointed for 9-year terms. It was not accountable to the Congress because it did not rely on Congress for the bulk of its operating funds. Those appropriations which were authorized permanently were scheduled to be eliminated over a period of years. Of course, it was not accountable to any stockholders, as it would have been if we had turned our mail delivery over to a private corporation. The result has been well documented here in the Congress. Suffice it to say that it has fostered arrogance and insensitivity which has cast a tall aura of unreality over the actions and pronouncements of top Postal management.

This is the distinct impression I get from Members of Congress, who tend to get upset when they are ignored by Government agencies. It is also a distinct chorus from major mail users, contractors who deal with the Postal Service, publishers and organizations which have become enmeshed in often meaningless redtape and postal employees, from mail handlers to and above postmasters.

Above all, it comes from our constituents. The Postal Service says surveys show that the majority of citizens are reasonably satisfied with mail delivery. That may be so, but the mail to our offices and meetings back home indicates that Americans of all kinds are more fed up with mail delivery and the Postal Service now than ever, ever before.

This, let it be said, is a fact of political life that no responsible elected official can or should ignore in a democracy.

The major features of the bill are well known. It provides for Presidential appointment of a Postmaster General and places policymaking authority in the hands of the Postmaster General. It eliminates the break-even concept. It authorizes appropriations for public service to the Postal Service. It reiterates the congressional intent of 1970 that postal rates should be more closely related to cost, but that important noncost factors also be considered. It gives a stronger role to Congress in setting postal financial and service policies.

Since H.R. 7700 was under the jurisdiction of both subcommittees, I will concentrate on those provisions under the jurisdiction of the Postal Operations and Services Subcommittee.

Section 3 of the substitute is extremely important for several reasons. First, it establishes firmly the principle of Postal Service performed, a vast public service which should be financed in part from the Treasury.

It eliminates the break-even concept which has caused an erosion in the principles of service. Second, it provides an additional $800 million public service authorization over and above the current $920 million. This is not as much as we would have liked or as was included in H.R. 7700, but it will help to reduce substantially the relentless pressure to raise postal rates and reduce services.

Finally, by authorizing the increased amount for only 3 years rather than the permanent authorization contained in current law, we give Congress a far larger role in establishing and overseeing financial policy through the vehicle of periodic authorization.

Section 2 of the substitute is equally important. It clarifies our intent in 1970 by more precisely stating that the principles which should be used in setting postal rates for recovery of cost is of paramount importance, but so are important noncost factors such as the educational, cultural, scientific, and informational benefit of mail matter, the effect of the proposed rates on the public, and the quality of services afforded any particular class of mail.

The provision placing a 60-percent cap on attributable cost assures that these important principles will be given sufficient weight in the setting of rates. This is of particular importance to the Nation's nonprofit mailers. In 1970 we required them to pay only attributable costs, at that time considered to run about 50 percent of total cost. Since then the increase in the percentage of attributable cost has placed in severe jeopardy the historic principle that charitable organizations should be encouraged through lower postal rates.

Section 2 also provides a measure of rate relief for small magazines and newspapers, publications which have been severely hurt by the massive rate increases during the past several years.

Finally, this section will give final decisionmaking authority to the Postal Rate Commission. Under current law that Commission makes recommended decisions and transmits them to the Board of Governors. The Board has the authority to accept or reject the decision and may ultimately change the decision by unanimous vote. H.R. 7700 removes the anomaly of the regulated body having final authority over the regulator.

This principle is carried further in section 4, which gives the Postal Rate Commission a budget separate from Postal Service control.

Two other sections deserve special mention because they address concerns which have been expressed by so many of us. Section 8 requires the Postal Service to hold a community hearing prior to making a decision to close or consolidate a post office. This, combined with the extensive procedures for post office closing we adopted in Public Law 94–421, should provide great protection against arbitrary post office closings and consolidations.

Section 13 gives either House the power

to veto proposed nationwide changes in service policies. This is immediately important because of the current debate over 6-day-a-week delivery. The Postal Service would not be able to cut the number of delivery days without coming to Congress first.

Other sections of H.R. 7700 under the jurisdiction of my subcommittee will allow the Postal Service and the Postal Rate Commission to represent themselves in court without prior permission of the Attorney General in cases arising from Postal Rate Commission decisions and classification matters pending before the Postal Rate Commission establishing uniform weight and size limitations for all classes of post offices.

There are a number of other excellent provisions in this bill, fundamental of which is to restore the requirement of the responsiveness on the part of those who lead this agency. Unfortunately, all of us know over the past 7 years that the agency has become virtually totally unresponsive to the will of the majority of the American people.

As I said to the President some time ago—

> The people have lost control of the United States Postal Service, the Congress has lost control of the United States Postal Service and, respectfully, Mr. President, you have lost control of the United States Postal Service.

One point I want to make before I conclude is that the measure that is pending before us today has absolutely no bearing whatsoever on the pending proposal before the Postal Rate Commission. I would judge that by late May the Postal Rate Commission will be coming back with its decision. And I can only assume, given the fiscal plight of the agency, that the Postal Rate Commission has no alternative other than to agree to that proposal which will have the effect of increasing the 13-cent stamp to 16 cents, and all other classes of mail will go up accordingly.

Mr. BURKE of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. HANLEY. I yield to the gentleman from Massachusetts.

Mr. BURKE of Massachusetts. I thank the gentleman for yielding, and I want to commend him for his remarks.

Mr. Chairman, I would like to have the gentleman's assurance that we will not have a repetition of what I had in my district, where the Post Office Department came in and very arbitrarily planned the closing down of many post offices in my district, planned a complete change of distribution of mail, planned to build an incoming mail facility at the very end of the district, at an inconvenient place where the traffic jammed, and that the public would have some input into these questions and that the Congressman would be able to have some say in the matter. I was shocked to find out that a piece of land was purchased back in 1975 in my district for an incoming mail facility, and I knew nothing about it until late last year. Then I found out about the main post office in Quincy, the post office in Wollaston, the post office in North Quincy, the post office and the substation in Milton, and they were going to open up storefronts in areas where there are no parking facilities, no place for the public to be served, and the public not even being consulted about it. When I raised questions about it, the Post Office said there had been local officials consulted. But a letter by me to the local officials had indicated that 99 percent of them had not been consulted.

Can the gentleman give me assurance that under this legislation a repetition of that will not occur in the future?

Mr. HANLEY. Mr. Chairman, I appreciate the gentleman's comments. The example the gentleman has set forth here is parallel throughout this Congress. I would say that over the course of the last 7 years most congressional districts in the country have been confronted with similar problems, whereas the majority of the people of that community think in terms of what is best for them, you as their elected Representative convey that message to the Postal Service. But unfortunately under present law as it has been, your transmittal has fallen on the proverbial duck's back, with nothing in the way of response, or very little in the way of response.

Embodied in the language of this measure is the authorization process, the appropriations process, the requirement that, whereas the President himself will appoint that Postmaster General, we feel—the authors and those who have put together this piece of legislation—that it is good to again in the tradition of the past make that agency responsive to the will of the majority of the American people. There is also an important provision requiring congressional review of major building programs which would cover the situation described by the gentleman from Massachusetts.

Therefore, when complaints of the nature of the one which the gentleman just described are passed on to him, he is going to be able to bring them in here and talk with the congressional liaison people from that agency and his position, hopefully, is going to be upheld.

That is the intent of this legislation.

Mr. BURKE of Massachusetts. Mr. Chairman, I thank the gentleman.

Mrs. SMITH of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. HANLEY. I yield to the gentlewoman from Nebraska.

Mrs. SMITH of Nebraska. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, it has been a privilege to work with the distinguished chairman of this committee, Mr. HANLEY.

I would like to state my position of support for the bill now before us, H.R. 7700, to reorganize the U.S. Postal Service. The current situation is intolerable. Top Postal Service management has not been fair to any section of our country—rural or urban. But most of all, many of the recent actions or attempted actions of the Postal Service management in Washington have been blatantly discriminatory against small communities and sparsely populated rural areas.

Attempts have been made to arbitrarily close down small town post offices, consolidate badly needed rural routes, eliminate Saturday mail delivery and not replace postmasters. Technically, Congress has been powerless to stop all of these events from occurring. Only some strong words, spurred by public reaction, and timely resolutions have made the Postal Service management back off of some of these controversial schemes.

All of these actions, the Postal Service management says, are being accomplished in the name of economy and efficiency. These are words that spur the same reaction as motherhood and apple pie. But we must look behind the rhetoric and emotion and see what is really meant. To my constituents this means that they will continue to pay Federal taxes but will lose one or more of the following: daily mail delivery, conveniently located post offices, adequate mail service, their hometown identity, and regular communication with neighboring communities, and people in other parts of the State, the country, and the world.

For much of rural America, Postal Service management's statements for economy and efficiency are a sham. It is just another example of the attempt by the Federal Government to make these hard-working, patriotic citizens pay more and more for less and less service. They are tired of it. They want it stopped.

H.R. 7700 will go a long way to bring about these desired changes. It will once again give the Congress some legal recourse to stop some of the insensitive and inept actions proposed by Postal Service management in recent years. This legislation is needed. Only recently Postmaster General Bailar announced he was retiring. But his successor brought no words of encouragement for the people of small communities and rural areas. He used the words "economy" and "efficiency" in his public statements just as Mr. Bailar had done before him.

As I read the legislation now before us, Mr. Chairman, there are several questions which come to my mind and several concerns that arise about the scope and intent of H.R. 7700. I feel that these must be cleared up.

As my colleagues know, I have sponsored a bill—H.R. 8048—the Rural Postal Service Protection Act. It was designed to insure that rural areas and small towns are fairly and equally treated by the Postal Service.

Briefly, it would:

Mandate a public hearing and a vote by Postal Service patrons before any existing post office with 30 or more boxes could be closed or rural route consolidated;

Require 6-day delivery service to small towns and to rural areas;

Insure that each county seat of government has a post office, and

Require an accounting of all Postal Service funds spent on mail services to rural areas and small towns.

I testified in behalf of this bill before the subcommittee chaired so ably by my distinguished colleague from New York (Mr. HANLEY). In light of this, I would like to ask the following questions about the intent and content of H.R. 7700:

First. This bill states that the Postal Service shall conduct a hearing within 60 days after announcing that it plans to consolidate or close a post office. It

also sets out some of the things that the Postal Service shall consider when contemplating such action. Is it the intent of this bill that the opinions of the patrons of such post offices be the deciding factor in whether or not the post office is closed or is allowed to remain open?

Mr. HANLEY. Mr. Chairman, I appreciate the very fine comments from my very dear friend, the gentlewoman from Nebraska.

I want to give the gentlewoman the assurance that the language of this bill intends, again, that that agency, the U.S. Postal Service, respond to the will of the majority of the people in the communities which the gentlewoman has referred to. As the gentlewoman knows, we have built into this measure the hearing process so that, with respect to an attempted closing or a suggested closing, there has to be notification given 60 days prior to it, and there has to be a public hearing. If the majority of the people in that particular service area want the continuation of that small post office, they transmit that ambition or that desire to their Representative. The Representative then takes it up with the leadership of the Postal Service; and I feel constrained to say that they are going to accept the Representative's position.

That is the intent of Congress. We have more stringent language in this measure with respect to rural post offices than the Department of Defense has in its language relating to military base closings. Therefore, we can appreciate the importance of this matter to the gentlewoman from Nebraska, and I can only assure the gentlewoman that that is the intent of the authors of this bill.

Mrs. SMITH of Nebraska. Mr. Chairman, I appreciate that answer very, very much.

Would the gentleman yield for three more questions, or could I get time to ask three more brief questions?

Mr. HANLEY. Mr. Chairman, I would be delighted to yield further to the gentlewoman from Nebraska.

Mr. DERWINSKI. Mr. Chairman, I would like to yield 5 minutes to the gentlewoman from Nebraska so that the time will not come out of that of the gentleman from New York (Mr. HANLEY).

Mr. HANLEY. Mr. Chairman, I thank the gentleman.

Mr. DERWINSKI. Therefore, if I may, Mr. Chairman, I at this point yield 5 minutes to the gentlewoman from Nebraska (Mrs. SMITH).

Mrs. SMITH of Nebraska. Mr. Chairman, I thank the gentleman for yielding very much.

In many cases in our rural areas, the elimination or consolidation of rural or star mail routes is just as harmful to postal patrons as the closing or consolidation of the post office.

Is it the intent of this bill that a notification, public hearing and a seeking of the opinions of the patrons be carried out by the Postal Service before such an act is accomplished?

Mr. HANLEY. That is the intent of the legislation.

Mrs. SMITH of Nebraska. Mr. Chairman, I thank the gentleman very much.

Is it the intent of this legislation that each county seat of government have a post office? In many rural areas there is great fear that the post office in a county seat may be closed. This would be intolerable because of the hardship it would impose on the county government, the residents of the county, and of the surrounding area. Some protection for post offices in these unique circumstances is needed.

Mr. HANLEY. If the gentlewoman will yield, Mr. Chairman, actually, I believe that the matter of logistics as to where in that general service area the office itself should be maintained is a matter for consideration. That would be a logistical matter.

When we talk about the county seat, I suppose that the geography of the area becomes a determining factor; but I sense that we revert to the fundamentals here where if, in the judgment of the people of that community, it should be located in a certain area, then, hopefully the agency is going to concur with that judgment. Certainly, in that event, they are going to be listening to the gentlewoman from Nebraska (Mrs. SMITH), the Representative of those people.

As I mentioned, I am very hopeful that those who are in a position of leadership are going to recognize the essentiality of their being responsive to a Member of Congress.

Mrs. SMITH of Nebraska. I thank the gentleman very much. I have just one more area that concerns us.

There is a provision in this bill that requires the Postal Service to submit to the Congress any change of the level or types of postal service that would have a nationwide, or substantially nationwide, impact. One House of the Congress could stop the proposed change by passing a resolution within 60 days. But, my concern is this term "nationwide" and the ease with which it could be circumvented.

For instance, the Post Office could pick off, one by one, rural routes in certain areas of the country, or reduce the number of days of mail delivery in certain areas of the country; or, it could make other changes in its services in a specific area, wait for a period of time, then make the same changes in other areas, and before we know it a nationwide change could have been made, but not have been made on a nationwide basis according to the words of the bill.

My question is, what is to prevent the Postal Service, for example, from consolidating many, many rural routes in my congressional district, or stopping Saturday delivery, and then moving over to Kansas and stopping it there, and so on and on. This would not be a nationwide impact, as I understand the bill, but in the long run it would have the same disastrous effect on our country.

Mr. HANLEY. At the risk of sounding repetitious, I do have to relate again to the fundamental intent expressed in the language of the bill, that the leadership of that agency be responsive to the will of the majority of the gentlewoman's people. So, should there be a consolidation suggested, they are going to confer with us. They are going to confer with the people who are involved, and unless they are in a position to rationalize that overture to your satisfaction as a representative of the people in that general service area, then they will not follow through on the overture that they initiated.

Mrs. SMITH of Nebraska. I thank the gentleman very, very much. I thank our ranking minority member very, very much.

Mr. HANLEY. I thank the gentlewoman from Nebraska for her interest and her support.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. HANLEY. I am delighted to yield to the gentleman from Maryland.

Mr. BAUMAN. I am very much concerned about section 3 of the substitute, page 6, and the manner in which it deals with funding over the next several years. Quite frankly, I am wondering whether or not the gentleman would be disposed toward some sort of amendment, perhaps the one to be offered by the gentleman from Illinois (Mr. CORCORAN), which authorizes funds on a year-to-year basis, providing for congressional review of the exact amounts both in the authorizing committee and in the Appropriations Committee.

Absent that, I have a great deal of fear that these sums the substitute authorizes over a several year period, may be far too large. Certainly we ought to retain the congressional prerogative of appropriating and authorizing on an annual basis.

Mr. HANLEY. I have great respect for Mr. CORCORAN and for his input in this measure, which has been immeasurable. We gave his proposition, when it was offered in committee, a great deal of consideration, and concluded that it would be far better to use the language which we have in the bill because it is so difficult for that agency to allocate on a line item basis. The agency itself asked to be free of that requirement. OMB did not think it was a very good idea and—not that I am sustaining the position of the administration—but the administration asked again for the language of this bill.

I remind the gentleman that we will have an excellent handle cn that agency through the authorizing process and through the appropriations process. Each time the leadership of that agency marches up here, they had better be in a good position to rationalize the allocation of these moneys within that agency. Thev have got to do that to the satisfaction of this body, and we feel that by providing them with some flexibility as opposed to boxing them in with a line-for-line situation, thev can effect greater efficiencies. Again, one of the fundamentals here is that the agency will, through the years ahead, effect efficiencies that will have the ultimate effect of bringing down that budget.

So we have given it a great deal of thought. I would like to find myself in a position of being supportive of the gentleman's amendment, but for the reasons I have attempted to describe we will have to oppose it.

Mr. BAUMAN. If the gentleman will yield further, I will say I am sure every

agency of the Federal Government, quasi-independent or otherwise, would love to enjoy the luxury of a multiyear authorization on which they can depend to some degree, but whether line item authorization is the approach or not I feel a great deal of reluctance in supporting a bill that allows a blank check for 3 years in effect. It would be a much greater control if the committee chaired by the gentleman reviewed fund requests on an annual basis and gave the agency subsequent authority to spend. I hope the gentleman will consider that if he feels he needs the support of a great many of us

Mr. HANLEY. It is not the intention to hand this agency a blank check and we intend to ride herd closely on the activities of this agency through the authorization process.

Mr. ALLEN. Mr. Chairman, will the gentleman yield?

Mr. HANLEY. I yield to the gentleman from Tennessee.

Mr. ALLEN. Mr. Chairman, will the distinguished gentleman from New York explain to me just how under this bill a Member of Congress is going to have any more influence on the conduct and actions of postal officers than the Members now have. That is nothing at all, no input. If indeed the only individual who is appointed is appointed by the President for a specified length of time and if the Postal Service does not have to come back to the Congress for any appropriation except once every 3 years—How do we expect, in those circumstances, for the Members of Congress to really gain the ear of the local postmasters or postal employees? Up until now we have been severely circumscribed by law in what we can even communicate to any member or employee of the Postal Service. In what way does this bill make any change at all that would give the Members of Congress some influence with the operation of the Post Office Department?

Mr. HANLEY. Yes, I can appreciate the gentleman's concern and the gentleman's frustration over these past 7 years. Generally speaking, the Congress is not interested in getting back into the matter of recommending postmasters. I think that at least our poll suggests that.

Short of that we do believe that by having the President appoint that Postmaster General, that Postmaster General then has to be responsive to the Congress, responsive to the gentleman as a Member of the Congress. And if he is not responsive, then the gentleman may take it up with the executive branch and let his complaint be known.

Then beyond that, the agency recognizes that it is going to have to march up in the Hill for the authorization process and for the appropriations process, and it is going to be fine tooth combed in each instance, and if the consensus is that the agency is not being resposive I would venture to guess that those who lead the agency would find themselves hard pressed with both the authorization process and the appropriations process.

Mr. ALLEN. If the gentleman would yield further, I would like to ask him another question.

Mr. HANLEY. I yield to the gentleman from Tennessee.

Mr. ALLEN. Would that more nearly be the case if they had to come back to us at least once every year, as other departments do, and not be assured of an authorization for 3 long years?

Mr. HANLEY. If the gentleman will permit me, initially we provided for but 2 years in the way of authorization. It is very difficult for an agency of this scope to pre-plan on the basis of a 1- or 2-year authorization. I would remind the gentleman we are dealing with one of the largest industries in the world, I guess second perhaps only to General Motors and maybe one or two others, and he will agree that in the private sector they take 5 to 7 years in the way of a projected budget and they look down the track that far. So actually we are limiting to but 3 years the authorization, so that the agency can procure and do all of the other things vital to implementation of this agency in an appropriate and responsible way.

Unfortunately, if you do it on a 1-year basis—and you know, I would be delighted to have them march up here every year—but when you are trying to run a business that way where you are unaware of what you are going to have to work with just a few months later, it is awfully difficult to attempt to run a business that way. For that reason we concluded that 3 years would be fair.

But again, I repeat that this institution and this committee is going to keep a very firm finger on the pulse of those activities as is the subcommittee headed by the gentleman from Oklahoma (Mr. STEED). The gentleman from Oklahoma (Mr. STEED) and his team are equally uptight as you and I are about what the agency has done during the recent years. It is our intent that they are not going to be able to do that once this measure is enacted into law.

Mr. ALLEN. If the gentleman will yield further: You have properly described what so many of us have found today about the deficiencies of the Postal Service and the arrogance of many postal officials and employees through the letters that we have received as Members of Congress. Quite frankly there may be something in this feeling and that this bill will change that attitude, so that it will change at least with respect to the President, himself. But, so far as Members of Congress are concerned, it has not yet been explained to me what provision of this bill will give us any more influence in trying to straighten out the problems of the Postal Service, to get the complaints of our constituents handled, complaints about the poor mail service and poor deliveries. There are many other complaints that they continue to address to the Members of the Congress, and our constituents do not seem to understand why we cannot do something about it.

Mr. HANLEY. We all have the exact same frustrations, your frustrations, my frustrations, Mr. WILSON'S frustrations, and every member of the committee, I dare say, shares your frustrations. We have tried hard to put together what we feel is a highly responsible measure that will serve the purpose that you are seeking. We ask for your confidence today. We assure you that we are going to keep a very firm finger on the pulse of this agency which under the current law we cannot do but that we are going to do once this measure is enacted. That is what the bill is all about and we seek your confidence and your support today.

Mr. ALLEN. I will be following this debate with great interest.

Mr. HANLEY. I thank the gentleman.

Mr. Chairman, I reserve the balance of my time.

Mr. DERWINSKI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, after that great commentary by the gentleman from New York (Mr. HANLEY), I think I should just throw up my hands and surrender but, having prepared for battle, I am going to go on and undo, if possible, the effects of the devastating remarks of the gentleman.

Mr. HANLEY. Mr. Chairman, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from New York.

Mr. HANLEY. The gentleman has rendered a most responsive statement; why does not the gentleman throw it in now and let us vote?

Mr. DERWINSKI. Because we have so many Members who are anxious to help us in our fight regarding the ramifications of the Postal Service, and I would not want to deprive them of something that they have been looking forward to for some time.

Mr. Speaker, because of unusual and chaotic circumstances surrounding this bill, I want to make sure all Members understand what is transpiring. Despite the substantial retreat by the sponsors of H.R. 7700, the bill does not enjoy the support of our beloved administration. As a matter of fact, the White House has objections to six major sections in this bill.

The White House objections were spelled out in a March 14 letter from Stuart E. Eizenstat, a Presidential assistant. The President's man reinforced and went considerably beyond the September 20, 1977, White House testimony in opposition to H.R. 7700 when it still was in its so-called pure and unadulterated form.

Among the sections in the drastically revised bill which continues to cause concern for our President is the one dealing with funding. It leaves the President and the chief sponsors of this bill separated by a $720 million chasm. The administration would prefer to increase the public service subsidy for fiscal year 1979 by only $80 million—from the current $920 million to $1 billion. The sponsors want to add an additional $80 million to the $920 million public service subsidy. Because of the difference between $80 million and $800 million, it can be said that the dispute on public service funding turns on a cipher.

It is obvious why the White House is troubled with the sizable increase in the public service subsidy. It has immediate concerns with increasing the debt limita-

tion and the budget resolution. Also pressing in on the administration from a half dozen directions is the need for decisions which could have a major impact on inflation. Just last week, the President's Director of the Council on Wage and Price Stability warned if postal rate increases or Treasury subsidies are approved in the next few months, they could provide "up-front funding for wage increases above those that would otherwise occur".

There still is another side to this complex story. We might very well be experiencing the initiation of a new White House procedure for processing legislation. After its March 14 bombshell which left the sponsors shellshocked, the White House, the very next day, reaffirmed its opposition to H.R. 7700, but said it would not support or introduce amendments which did not bear the good housekeeping seal of approval of the sponsors. The White House also made it clear it would prefer to place its faith and confidence in the other body to rewrite this legislation.

I for one, do not think our distinguished Speaker deserves that type of treatment. Is this the thanks he gets? Evidently, he is to be deprived of his leadership role in casting postal legislation into an acceptable White House mold.

If we follow the White House lead on this bill, we will pass all subsequent legislation, regardless of what exaggerated form it takes, and then leave it up to the administration to do business with the other body.

Regardless of what happens here today, it is safe to say the sponsors of this bill will have a hard time recognizing their product after it is worked over on the other side of the Capitol. The sponsors will have achieved some small measure of accomplishment. They will have provided the other body with a bill number.

First of all I would like to get to the now famous Eizenstat letter because it contains specific comments on particular sections of the bill which the White House found objectionable.

Those specific objections were to section 3 which would place:

> A limitation of 2 percent of the postal budget for contingency allowances. . . . Although the administration is sympathetic to the recent rate increases absorbed by the users of second through fourth class mail, we do not believe that reducing the Postal Rate Commission's authority to attribute costs that are reasonably and fairly associated with specific classes of mail is an improvement over the current practice.

Then the administration also expressed concern over the fact that the provisions of the bill will lead to greater postage increases for first class mail users.

Regarding section 4, the administration is specifically concerned with provisions that would apply to allocating 2 percent of the postal budget for research and development. At the moment the postal budget has $59 million for R. & D. Under the mandatory provisions of the bill it would rise to $320 million. The administration points out that to increase the budget allocation five times without the benefit of specific projects or programs can only result in waste, inefficiency, and questionable practices.

Section 6: The Department of Justice strongly opposes this provision which would allow the Postal Service and Postal Rate Commission to represent themselves in litigation.

Section 10 would amend the Surplus Property Act. Here the administration opposes the committee language and notes that the effect of this section would be to seriously reduce the ability of the Postal Service to offset the total costs of new, modern facilities by applying the proceeds from the sale of obsolete or outmoded facilities or stations. Then they say, "We fail to see how the committee's traditional support for an efficient Postal Service squares with the shackles of section 10."

Section 12 draws the wrath of the administration. This is the section that relates to international sea transportation.

Section 14, which provides for a legislative veto of service changes, also draws the administration's objections. I make these points from the letter from Mr. Eizenstat that was referred to earlier in its, say, political or strategic context, but in this case it was also a technical fact as well.

Mr. Chairman, modesty requires me to note that I wish I had a greater audience at this time, but at least the Members in the Rayburn Building have their TV sets on so they can listen in the comfort of their offices.

Earlier in the day the distinguished chairman of the subcommittee, the gentleman from New York (Mr. HANLEY) pointed out that if his leadership had been followed, this bill could have been passed last summer. Presumably then the other body would have acted, and the President would now be equipped with the muscle and the new genius found in H.R. 7700.

Really, when I rise to defend the administration in this postal debate, I admit that occasionally I may be facetious, but down deep in my heart, as a patriotic American, I hate to see the President's own party inflict this monstrosity upon him. It pains me to see this happening. But let me tell the Members what would happen. If some of us had not been a bit stubborn and procrastinated and delayed it, the President would now be equipped with H.R. 7700. In its original form, what would it have done? It would have provided that the President appoint the Postmaster General. It would have done away with the Board of Governors, and done away with a number of other reforms that gave the Postal Service independence.

Some Members say this would be good—but not the present occupant of the White House, because there is a rate increase going into effect in June. It is going into effect because of the wheels that were put into motion last fall. If by this time we had equipped the President with the authority to appoint the Postmaster General, and by abolishing the Board of Governors given the President's Postmaster General full responsibility, authority, and the recognition of running the Postal Service, we would have Mr. Carter saddled with the new rate increase, because then it would be the Carter rate increase, not the Postal Service rate increase.

Then we would also have said to Mr. Carter and his Postmaster General, "You are now totally responsible, and come the middle of April, you start negotiating with the postal unions for the next labor-management agreement."

Now, the President has just barely survived negotiations with the mine workers union. What would he do if he was responsible for negotiations with the Postal Union?

In his state of the Union message he made reference to a voluntary wage restraint in the private sector. What would he do as a matter of policy and as a matter of fiscal restraint if through his appointed Postmaster General he was responsible for the postal negotiations that will be a major settlement.

So I submit that those of us who have something to do with slowing up this legislation, which emasculates postal reform, would not have been serving the President's interest.

I might suggest, it does not do any President any good or any Congress any good to again be involved in the operations of the Postal Service. If we get our hands on the ratemaking machinery then we had better start negotiating with the employees for their wages.

Do we want it? No.

Do they want it? No.

The present system is preferable.

Does the President want to be responsible for every mail increase? No. The present system is preferable.

The attempt to equate this grotesquely shaped bill with postal reform is a sham. There is very little in H.R. 7700 which miraculously will cure some of the real and imagined ills of the U.S. Postal Service.

Certainly, the Postal Service is far from perfect. By the same token, the attempt to create the impression the Postal Service is a failing institution does not square with the facts. If the many wild charges hurled at the Postal Service were true, it would have been forced to cease operations. Instead, it has continued to demonstrate, on a daily basis, it is a working, viable entity. It is one of the largest public service organizations in the world.

Since postal reorganization, there has been a gradual improvement in service performance. Productivity has increased. There has been a marked improvement in working conditions and wages. Politics, which permeated the old Post Office Department, have been eliminated.

Meeting the mail needs of a nation as big and as diverse as ours is a complex, complicated undertaking. While self-styled expected abound, there really is a lack of genuine expertise on the subject. No other area of Government generates as much ill-conceived legislation.

Unfortunately, those in the best position to be rallying to the defense of the Postal Service are among its foremost critics. We have been told about low morale in postal installations across the country. Rank and file employees have a

very good contract, and their improved status can be traced directly to the 1970 Postal Reorganization Act. Under the authorized collective bargaining process, postal employees have achieved sizable wage gains. The average annual salary for clerks, letter carriers, and vehicle drivers now is over $17,000. For mail handlers, it is in excess of $16,000.

Then there are the postal supervisors. They have had difficulty accepting the prescribed role which makes them an integral part of postal management.

Finally, there are the local postmasters and their rival organizations. The postmasters too often have been caught up in the intramural strife of their respective organizations, instead of concentrating on ways to improve mail service.

What I am saying is that there is real need for genuine cohesiveness inside the Postal Service. Everyone should be pulling together to continue to improve our Nation's mail system.

Quite obviously, Postal Service management is not blameless. Some mistakes have been made. One of the most serious errors was the decision to invest $1 billion in a huge national bulk mail system network. It seems highly unlikely the Postal Service will ever recapture enough parcel post merchandise to make the bulk mail system cost effective.

While the Postal Service has succeeded in taking politics out of the system, there have been occasions where cronyism has figured in the hiring and promoting of top postal managers. All promotions should be on the basis of merit. The Postal Service is not the appropriate entity to be used in the attempt to correct social problems.

Finally, postal management must never lose sight of the fact that its first and primary function is to deliver the Nation's mail. It is a public service rather than a civil service organization.

Mr. Chairman, I reserve the balance of my time.

Mr. Chairman, I yield 7 minutes to the gentleman from Missouri (Mr. TAYLOR), a member of the committee.

Mr. TAYLOR. Mr. Chairman, this bill makes what I believe are several major changes in the Postal Reorganization Act of 1970 that I hope will increase the authority of the President and the Congress in postal operations and should provide a better financial base for the future of the Postal Service.

Through the efforts of the chairman, the gentleman from New York (Mr. HANLEY) and the chairman, the gentleman from California (Mr. CHARLES H. WILSON), coupled with the leavening guidance of the ranking Member, the gentleman from Illinois (Mr. DERWINSKI) and with the on-and-off support of the administration, the committee brings forth to the floor a bill that reaches toward the goal of returning accountability to the President and the Congress for the operation of the U.S. Postal Service.

Whether or not we like it, Mr. Chairman, the Congress is held accountable by the public for the operation of the Postal Service. While we may not actually set the rates for postage, the public expects us to be responsible and insure the continued operation of the Nation's Postal Service.

A lot of us get more mail concerning the U.S. Postal Service than any other Federal agency. Most people seem to think that the Congress can react to their complaints and correct various situations. I dare say that many of the Members receive dozens of letters each week asking questions about our Postal Service.

The U.S. Postal Service is as old as the Nation itself. This bill is a step in the right direction, I believe, of assuring that as the Service moves into the 1980's, it will not lose sight of this tradition of "service" to all people across this land to which they are accustomed and entitled in urban and rural America.

There are several areas of the committee's reported bill that are to be changed under a series of amendments proposed by the chairman, the gentleman from New York (Mr. HANLEY) and the chairman, the gentleman from California (Mr. CHARLES H. WILSON), and I support these changes.

In one instance the committee's reported bill calls for an additional public service appropriation of up to $1.6 billion—that is in fiscal year 1979—and up to $1.8 billion in fiscal year 1980. The amount of authorization was too large to suit the administration, and I can certainly understand its budgetary concerns. The proposed Hanley-Wilson amendment is a more modest approach to the vexing problem of how to finance Postal Service operations, since the Postal Service is not able to pay its own way.

This revision calls for continuation of the $920 million authorization through fiscal year 1980 and an additional $800 million for the next 3 years.

The bill also returns to the President the responsibility to appoint the Postmaster General, retains the Board of Governors, and gives the President the ability to select a Chairman from among those he appoints to serve on the board. I frankly see no reason to maintain the Board of Governors with no meaningful function.

The committee's reported bill calls for a congressional veto of increased postal rates, as recommended by the Postal Rate Commission. This aspect of the bill was of concern to me and to other Members, as well as to the administration. Under the proposed amendments, this idea of congressional veto of rate increases is eliminated, and the Postal Rate Commission would retain final authority to approve postal rates.

I support an amendment that will be offered by my colleague, the gentleman from Illinois (Mr. CORCORAN) that I think is very important. This amendment will require a full accounting to the Congress and the American people of the performance of every class of mail. This will give the Congress an opportunity to monitor equitable allocation of costs within the service relating to the various classes of mail.

As many Members of the House know, Mr. Chairman, nothing touches the lives of individual Americans as often as does the Postal Service. In the last 8 years of operation under the Postal Reorganization Act, the Postal Service has been left to its own devices as far as delivery services, post office closings and changes in the level of services are concerned.

During the past 8 years this Congress has created, Mr. Chairman, many new Federal agencies. We have given older agencies new and far-reaching programs to carry out, and we have forced all these programs upon the American people. An ever-growing bureaucracy of red-tape, rules and regulations has followed these actions, and in most instances they are expensive and unresponsive to the needs of the American people.

As one example of the kind of activity in the Postal Service that has gone on during the past 8 years with which the public finds fault, I would cite the selection and appointment of postmasters.

When the Congress changed the law in 1970, it called for officers and employees to be in the career postal service. That sentence in the law has led to 12 pages of regulations on how postmasters will be appointed, and no one can now be appointed unless he or she is a postal employee. I think this might be of interest and certainly might address itself to some of the concerns that were raised by my colleague, the gentleman from Tennessee (Mr. ALLEN).

The committee's reported bill deals with the selection and appointment of postmasters and opens up competition for appointment to private citizens, giving first priority to employees within a local post office. Beyond that, it mandates that local postmasters must be selected from the communities in which the post office is located.

Mr. Chairman, I believe that this committee has in a bipartisan manner addressed itself as well as it can to this problem. It is a tough problem. It is one that will not be solved wholly by the content of this legislation.

There are some meaningful amendments that will be offered, some that I feel should be supported, especially one to be offered by my friend, the gentleman from Illinois (Mr. SIMON), dealing with parcel post rates, as well as the one I mentioned before that will be offered by the gentleman from Illinois (Mr. CORCORAN). That amendment, I think, is very important, because it gives us an overview of how the various classes of mail are doing financially.

The leadership has tried hard in this legislation, Mr. Chairman, to cooperate with the White House. Unable to do so, I think that it has come to the conclusion that the time has come for this Congress to act.

The bill was reported out of committee by a vote of 18 to 4. Thirty-six Presidents have accepted the responsibility of appointing Postmasters General; that has been true since the inception of the Postal Department. That system has served this Nation very well.

Mr. Chairman, with the forthcoming amendments that will be offered and hope will be adopted by the House, I think we have an opportunity here to move forward and to deal with a very

plaguing problem that concerns 220 million Americans, that of providing efficient mail service to our Nation.

Mr. HANLEY. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. CHARLES H. WILSON).

Mr. CHARLES H. WILSON of California. Mr. Chairman, I do not really need to tell my colleagues that the American public places a high degree of importance on efficient postal service. Every congressional office receives a substantial number of inquiries every month about problems they are having with their mail.

The fact is there are some very serious problems facing the U.S. Postal Service as a result of deficiencies in the Postal Reorganization Act of 1970, and also because an inevitable loss of volume to new technology and rising labor costs appear to jeopardize the system's financial prospects.

H.R. 7700 addresses the most fundamental of questions about the future of this agency: Are we to continue the nationwide postal system as a service to the American public, and is this system to be responsive to the people? With this legislation, we clearly reestablish service as the primary goal for the service, and move away from the ill-considered "break even at any price" philosophy embodied in the 1970 Postal Reorganization Act.

In 1970 we made the mistake of giving a pseudobusinesslike mission to the newly created U.S. Postal Service. Unfortunately, the new postal managers saw this as a mandate to disregard the public's needs.

In discussing the management of a public service institution, Peter Drucker, the well-known author, has observed that what service institutions need is not to be more "businesslike," but rather to be more "hospital-like" or "Government-like," and so on. In other words, according to Drucker, "they need to think through their own specific function, purpose, and mission."

I believe that it is clearly the mission of the Postal Service to maintain our postal system and continue to provide a reasonable level of service. The public wants this kind of service continued including a viable parcel post operation, despite the efforts of some during the development of this bill to cut the USPS parcel capability.

And let me just say in this regard that we have worked long and hard to develop a fair parcel post provision, and the language in the bill today reflects a fair and equitable approach to the question. This has been attested to by a number of independent postal rate setting experts, despite United Parcel Service's claim to the contrary. It would be tragic if we adopted, as some have proposed, an amendment to this section which would, in the words of Postal Rate Commission Chairman Clyde Dupont, be "unfair and potentially disastrous to parcel post and the millions of citizens who use it."

Through direct appointment of the Postmaster General by the President with Senate confirmation, H.R. 7700 insures that postal decisionmaking will once again have some degree of public accountability. Specifically the Postmaster General would be appointed by the President for a 4-year term, concurrent with the President's, with Senate confirmation. This is a provision which I know has universal support in the House.

The Board of Governors, in this revised bill, will be retained, but only as an advisory and oversight body without the responsibility for directing postal policies.

The veto authority over service cuts provided under the bill would give the Congress a proper opportunity to evaluate whether such modification would be appropriate from a public policy standpoint. Specifically, if within 60 days, either House adopts a resolution of disapproval of the change, the change cannot become effective. This provision is identical to the Nix bill which was passed by the House on March 13, by a 371 to 6 vote.

The provision in the bill providing for congressional review of major capital investment projects is also significant. A public airing of the weak justification for the billion-dollar national bulk mail system in the early part of this decade might well have averted implementation of that costly white elephant. The new procedure will require the Postal Service, any expenditure exceeding $9 million, to present to the Congress a detailed description of the project.

Mr. Chairman, in summary let me just say that every Member of Congress is anxious to take some positive action to correct the deficiencies of the Postal Service.

This bill represents a golden opportunity to put the system on a proper course for the future. Many months, and indeed years, of investigation has gone into the careful preparation of this package. This revised version is the result of countless hours of discussion with top administration officials, and others involved in postal reform.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. CHARLES H. WILSON of California. I yield.

Mr. DERWINSKI. I would like to point out to my dear friend from California that we live in a world of necessary international relations, and my support of the United Nations is not intended in any way to deprive the Postal Service of adequate funds. But, I wish the gentleman would explain to the House the fact that we have a situation where the administration does not want this additional funding, and the Postal Service, the particular entity of government involved, does not want it. Why is the gentleman insisting on ramming this $720 million down the throats of the Postal Service administrators?

Mr. CHARLES H. WILSON of California. I will be happy to try and explain to the gentleman. In the first place, the administration does not understand the bill, and they are using all types of reasons for opposing it; one of them happens to be the funding.

As far as the Postal Service is concerned, naturally they are opposed because the Postmaster General is going to lose his job, because the Postmaster General will be appointed by the President. I think the fact that only the Postmaster General, the Postal Service, and the President—who has not had an opportunity to completely understand the bill—are the only ones who are opposed to the legislation speaks highly for the legislation. It is all the more reason why we should pass it by a very strong vote this afternoon, and give the American people what they really want.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. CHARLES H. WILSON of California. I will be happy to yield to my colleague.

Mr. ROUSSELOT. I appreciate my colleague yielding to me. Did I understand my colleague from California to say that he does not now favor the concept of Congress regaining some input by, say, veto provisions over the postal rate increases?

Mr. CHARLES H. WILSON of California. No, that is going to be included——

Mr. ROUSSELOT. You do favor that?

Mr. CHARLES H. WILSON of California. I am opposed to the congressional veto of postal rate increases.

Mr. ROUSSELOT. That kind of surprises me because I know both the gentleman and I have discussed what we consider some of the problems that have come up in the Postal Service as a result of that bad act of 1970, which I did not support. I was sure the gentleman supported a postal rate veto measure by Congress.

Mr. CHARLES H. WILSON of California. And I mistakenly voted for. I have to apologize.

Mr. ROUSSELOT. And one of the things we thought we could do is to reestablish congressional input on the issue of postal rate increases, since we get blamed for the increases all the time anyway. Our constituents always ask us every time postal rates go up, "Congressman, what are you doing about it?"

I would think, on the basis of our past personal conversations, that this would be another area that should be returned to Congress, the right to veto increases. I thought the gentleman would favor that concept.

Mr. CHARLES H. WILSON of California. Originally, as the gentleman knows, I did support it. In fact, I was in favor of abolishing the Rate Commission at one time.

Mr. ROUSSELOT. I remember that.

Mr. CHARLES H. WILSON of California. During the markup of the legislation in our two subcommittees, I suggested that it probably would be bad for us to keep the congressional rate veto in the bill because I did not think the Congress would appropriate the necessary funds to make up for this deficit that the lack of would cause. Now, if I felt that the Congress would assume its responsibility, when they veto a rate increase.

But I do not think the Congress is prepared at this time to assume that responsibility. That is the reason I feel that we have to continue with the Rate Commission at this time.

Mr. ROUSSELOT. I am not sure I would totally agree. I did not vote for the Social Security increase in taxes which will occur over the next 10 years with the result of what I consider will create a high inflationary impact, on all American working people. But in future times if the Congress vetoed postal rate increases I believe we would step forward to make up the difference.

Mr. CHARLES H. WILSON of California. That is one of the worst bills we passed.

Mr. ROUSSELOT. I agree, but the Congress did that, and I would think that under the Democratic leadership would want to cover any shortfalls because of rate increases rejections, now I understand we are going to repeal part of the new social security taxes, because it was too much.

Mr. CHARLES H. WILSON of California. I did not think that was responsible legislation.

Mr. ROUSSELOT. But my point is that the House has been willing on other occasions to assume the cost responsibilities on issues in which it had a part in causing, by writing new legislation to cover the same.. I would think that by reestablishing the gentleman's concept it would be a most effective way to have the Congress participate. That is why I supported portions of the previous recommendations made by the gentleman in the well, one of which was to take back or recover some of our input as it related to postal rate increases. So, I was surprised that Mr. HANLEY's substitute, or committee amendment in fact changes that proposal; and I was somewhat disappointed, because I think it is a good idea.

Mr. CHARLES H. WILSON of California. If the gentleman will allow me—he has been here a little while and I have been here a little while—we both realize that we cannot accomplish all of the things we want in each piece of legislation. It is necessary sometimes to go slowly and sometimes leave out things that later on we may have the opportunity to pass. I think we have a tremendous vehicle at this time. If there are needs for improvement, why the gentleman and I can work together on this and try to help the American people once more.

Mr. ROUSSELOT. Does the gentleman happen to know whether anyone from his side will reoffer that amendment to have a line item veto of postal rate increases?

Mr. CHARLES H. WILSON of California. The amendment the gentleman from New York (Mr. HANLEY) is going to introduce, the committee substitute, does not refer to line item vetoes as far as I know. It does not give us the congressional veto over rate increases.

Mr. ROUSSELOT. Does the gentleman know whether anybody is going to offer that?

Mr. CHARLES H. WILSON of California. No. I think there are already too many amendments that have been suggested. I would hope not.

Mr. ROUSSELOT. Would the gentleman support that if someone is going to offer it?

Mr. CHARLES H. WILSON of California. I do not know. I am going to have to listen to the debate and hear the discussion on it before I decide on that.

Mr. ROUSSELOT. I thank the gentleman. I hope he will continue to support his own congressional postal rate increases veto when it is offered.

Mr. HANLEY. Mr. Chairman, I reserve the balance of my time at this point.

Mr. ROUSSELOT. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Illinois (Mr. CORCORAN), a very active participant in the committee and a very dedicated member.

Mr. CORCORAN of Illinois. Mr. Chairman, I thank the gentleman very much for yielding.

Mr. Chairman, I rise in support of H.R. 7700, the Postal Service Act of 1977. I appreciate the opportunity to speak on behalf of H.R. 7700, which I voted for both in subcommittee and full committee. I feel that this legislation is necessary in order to restore accountability to the Postal Service.

I am sure, however, that all of my colleagues are aware of the controversy surrounding this bill. Although I voted to report H.R. 7700 out of the Post Office and Civil Service Committee, I did so with reservations about the bill. Today, as we are considering a substitute for that bill, my reservations are even greater. This controversy has, in fact, confirmed and strengthened my view that what is needed is even greater accountability.

The administration has indicated that it may not agree with Mr. HANLEY's assessment of the amount of postal subsidy needed, and Mr. HANLEY's amendment is a far cry from the original formula as reported by committee. All three figures have this in common, however. All of them constitute congressional guesswork as to the cost of maintaining vital public services that the Postal Service provides which are not profitable or self-sustaining.

These public services are not a regional issue; they affect every U.S. citizen. They include accommodations as common as placing post offices in accessible locations, on main streets, in suburbs, even though out-of-the-way locations would be less expensive. These services include accessible drop boxes and stamp vending machines and, of course, these services include 6-day mail delivery.

The difficulty lies in determining how much of a subsidy is sufficient, but not excessive; how much money is conducive to good service but not wasteful spending. No one agrees on how much is required, and there is no reason that anyone should agree, because no one has a basis for assessing how much these services actually cost.

During the 5-minute rule, I will offer an amendment to require that the U.S. Postal Service submit to Congress an account of public funds spent, by public service function, each fiscal year, and a projection of public funds to be spent in the next fiscal year for the various public service functions to be defined by the Postmaster General. I feel that this will, finally, end the guessing game that Congress has been forced to play to keep the Postal Service afloat. We will no longer have to wonder where this money is being spent, whether it is necessary, and whether it is sufficient.

I have not set an artificial ceiling on the public subsidy, a ceiling that again would be guesswork. Rather, my amendment would authorize the present $920 million and such other sums as are necessary, subject to delineation of public service uses by the Postal Service.

This is a sunshine amendment offered in the hope that we will no longer be forced to authorize appropriations on speculation, and offered in the spirit of a compromise that everyone who truly seeks good, efficient operation of the Postal Service can support.

My second reservation concerning H.R. 7700 involves not fiscal accountability, but accountability for postal policy. H.R. 7700 as reported by the committee eliminated the Board of Governors. It was felt that inasmuch as the Postmaster General would be appointed by and responsible to the President, there was no need for a Board of Governors. They have been notoriously unresponsive to the President, to Congress, and most important of all, to the people, in the recent past, as has the Postmaster General. Making the Postmaster General a Presidential appointee will restore the Postmaster General to a position of responsibility to the people, through the President and Congress of the United States. I believe this can lead to policies that reflect the will of the consumers and supporters of the Postal Service.

Reinstating the Board of Governors, as Mr. HANLEY's amendment would do, simply adds an overlay of bureaucracy, including an unspecified number of staff supported by an unspecified amount of money, all of which will carry out functions that can be performed as well by the Postmaster General. Therefore, I will be offering a second amendment that will abolish the Board of Governors, which was the intent of H.R. 7700 as reported out of committee.

I respectfully urge your support of these two amendments to increase fiscal and policy accountability in the U.S. Postal Service.

Having expressed some of my reservations about H.R. 7700, I would like to assure you that I do support the concept of the bill. It has many good points, of which I would like to single out a few in particular.

H.R. 7700 is consistent with and marks a return to the idea that the Postal Service is a public service. As such, it should not be expected that all of the services it provides should be self-supporting, or

that the Postal Service as a whole should be self-supporting.

This bill acknowledges the shortcomings of the experiment begun in 1970, leading to declines in service, increases in rates, and no hint of real self-sufficiency. H.R. 7700 acknowledges our obligation to support the public service aspects of the Postal Service.

The second major aspect of H.R. 7700 that I applaud is the requirement that the Postmaster General be a Presidential appointee. This stipulation reaffirms the right of the consumers and supporters of this public service to determine the policies of this vital public service.

I would also like to voice my general support for the research and development program established by H.R. 7700 although I will be offering an amendment to speed up the electronic transmission of the mails. Private industries engage considerable sums of money in research and development programs because they are subject to competition and face elimination if they do not keep up with the most modern and efficient methods of operation. Being a monopoly, the Postal Service has had no need to engage in such programs to avoid elimination, but in H.R. 7700 we have recognized the fact that, notwithstanding the lack of competition, it is to the benefit of the Postal Service to support such a program. It is time for the Postal Service to look at electronic communications as they will affect the future of the Postal Service, to study management policy, to evaluate their internal and external environment and respond to it.

Mr. Chairman, members of the committee, I hope you will support H.R. 7700 and the constructive amendments which will be offered to it during the 5-minute rule.

Mr. ROUSSELOT. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Ohio (Mr. WHALEN).

Mr. WHALEN. Mr. Chairman, there are many aspects of this legislation that merit comment, but I wish to zero in and ask the gentleman from New York (Mr. HANLEY) a few questions about a subject of special interest to me—electronic mail. This legislation does much to force the Postal Service into research and development of a public system of electronic mail.

I wish to make several points about this.

First, I want to observe that the Postal Service is quite a late comer to the subject of electronic message service systems (EMSS). As I have noted in several statements in the CONGRESSIONAL RECORD, private enterprise has produced a variety of functioning, competing electronic mail systems. Several different kinds, including communicating typewriters and telecopiers, are available to and used by many of us in the Congress.

Moreover, thousands of EMSS units have already been sold to offices and commercial users throughout the country. This is projected to be an area of great growth for office equipment suppliers.

Second, I wish to reiterate my concern that the Postal Service, in its efforts to date, has shown an almost total disregard for the need to design into any public EMS system safeguards for the confidentiality of the messages being transmitted. I have made my views known on this subject on previous occasions, so I will not belabor the point at this time.

What I wish to discuss now with my colleague from New York (Mr. HANLEY) is the issue of competition in the electronic mail marketplace. This third and final item on my list of concerns is of great importance to our future communications policies, I believe.

For the past several years we have witnessed a sometimes heated debate over the issue of competition in the telecommunications marketplace, particularly with regard to the sale of telephone equipment and business communications services. I think it is clear now that our public policy has been firmly resolved on the side of responsible competition.

Now I see that just a week ago the Federal Communications Commission authorized a staff study of the near monopoly on telegraph services that is currently enjoyed by the Western Union Co. A point of particular relevance is the fact that the Commission intends to look at the growing role of private EMSS as a part of its inquiry.

Given this trend in public policy toward competition in various communications media, and given the strong role in EMSS development being played by smaller, aggressive suppliers of business communications equipment, I think that we need to clarify several issues.

I would like to ask the gentleman from New York (Mr. HANLEY) a few questions that might help our understanding of how the pending legislation, H.R. 7700, would affect the electronic mail marketplace. First, I wonder would the gentleman state approximately how much money he expects the Postal Service would spend on electronic mail research and development if this bill is enacted. As I understand it, the legislation would make available over a quarter billion dollars for this purpose.

Mr. HANLEY. If the gentleman will yield, the original language of the bill required that the agency spend 2 percent of its budget on research and development, including exploration of electronic communications. We amend that figure and reduced it to 1 percent for research and development, striking from the language reference to electronic communications. Our intent is that in no degree will the agency invade an area of private enterprise with respect to electronic communications. We are saying to the agency: Develop your program of research and development which will allow you the opportunity to sophisticate the methodology used in the processing of mail, whether it be facilities automation, inhouse automation, et cetera. Take a reading, perhaps, on electronic communications. Determine if under the authority granted the agency within the private express statute they have a prerogative. Fine. But in no degree do you step 1 inch beyond the authority allowed you per the private express statute. So essentially we are saying: Look, we do not want you to get into a field that is already covered in the private sector. If there is something electronically that you may apply under your existing authority, fine.

I might add that we covered this ground with the chairman of the Communications Subcommittee of the Committee on Interstate and Foreign Commerce, the gentleman from California (Mr. VAN DEERLIN) assuring him that it was not our intent that the Postal Service invade the prerogative of those presently engaged in electronic communications, and agreed with Mr. VAN DEERLIN to strike reference out of electronic communications in the R. & D. provision.

Mr. WHALEN. Speaking of the R. & D., I wonder if the gentleman can explain how this money will be spent. Will most of it be inhouse work done by the Postal Service, or will it be contracted out; and if it is to be contracted out, will it be by competitive bid?

Mr. HANLEY. If the gentleman will yield further, I would assume that most of it would be contracted out by competitive bid, yes.

Mr. HANLEY. Mr. Chairman, I would assume most of it would be contracted out and by competitive bidding.

Mr. WHALEN. Now, pursuing this point about competition with the private sector, I know that the bill states that the Postal Service need not charge for a particular service more than 60 percent of the cost of that service. The remaining 40 percent of the cost can be charged off to general overhead and thus allocated to the fee schedules for other services offered.

Now, bearing this in mind, the problems we have seen with this kind of budget juggling in the telephone industry, I am wondering if the gentleman would comment on how this policy might impact on future competition between public and private EMSS?

Mr. HANLEY. The judgment of the Postal Commission is that the 60 percent attributable cap is a fair and equitable way to establish the rates. As you know, it is a highly technical subject matter. The Rate Commission actually works completely independent of the U.S. Postal Service. It recognizes the prerogative of the private sector.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. ROUSSELOT. Mr. Chairman, I yield 3 additional minutes to the gentleman from Ohio.

Mr. HANLEY. Mr. Chairman, if the gentleman will yield further, in my judgment it tries hard to be very fair; so we essentially do not want that agency to enjoy competition advantage over any entity in the private sector. We have spoken out very strongly on this already and I think they understand what we mean.

Mr. WHALEN. Finally, I note that the pending legislation would remove from the Justice Department its jurisdiction over mail classification legal disputes. I am curious to know, then, how we can expect complete coordination between the various Government offices and agencies with respect to the controversial issue of competition in communications.

Mr. HANLEY. It would appear to me and others who have studied this part of the legislation that within the Postal Rate Commission itself problems will be resolved avoiding the necessity of a Justice Department action.

Mr. WHALEN. Well, I thank the gentleman for these informative replies. I believe that electronic mail will eventually have an enormous impact on the Postal Service and, indeed, on basic patterns of commerce in this country. The information provided by the gentleman from New York will provide an important part of the public record of consideration of the increasingly important subject of electronic mail.

Mr. ROUSSELOT. Mr. Chairman, I yield 3 minutes to the distinguished gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I thank my colleague for yielding.

I am concerned about this. I was alerted when the chairman of the subcommittee said something about the electronic devices that might be used. I see these things very much from the working level. In talking to employees who work in the Post Office and to consumers and others who have received parcels that have been through some of these electronic marvels, I really would like to question whether we are wise in encouraging the Post Office to buy machines that were tested and discarded by the taxpaying very efficient United Parcel Service. The people who try to deal with these machines in the Post Office say they just tear things up. That is why the packages arrive all damaged.

Mr. CHARLES H. WILSON of California. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I would be delighted to yield to the gentleman.

Mr. CHARLES H. WILSON of California. Mr. Chairman, we have been very critical of the operation of the bulk mail system. We feel there is great room for improvement. One of the criticisms we have had is that the Postal Service has not utilized the techniques and knowledge that UPS has.

I am later going to oppose the UPS amendment. I hope this will not be justification for supporting the amendment that the gentleman from Illinois (Mr. SIMON) will offer, but I have to give all the credit in the world to the UPS for running a good operation.

Mrs. FENWICK. Mr. Chairman, I would like to reclaim my time in order to make my point.

This was tried. This new equipment was tried by the UPS and found wanting, but the Post Office went right ahead and bought it anyway; they said they could save hiring a lot of people. They bought many machines, and those machines mangled the packages. After what the machines did to those poor packages, the Post Office Department did not save anything anyway.

Mr. Chairman, I am wondering very much if we may have had some misdirection and mismanagement here.

Mr. CHARLES H. WILSON of California. Mr. Chairman, if the gentlewoman will yield further, we have had misdirection and mismanagement.

The principal purpose of this bill is to see if we can get better management. There has been bad management right along.

We had difficulty trying to find out who was responsible for the bulk mailing system.

There is no question but what they will have to improve their method of handling parcel post packages if they are going to ask us to let them continue delivering parcel post and if they are going to ask us to oppose the UPS amendment.

The UPS is entitled to all the credit in the world for having a wonderful outfit, one that delivers the packages promptly and safely and without them being broken. I hope we can utilize some of their methods in the Postal Service.

Mrs. FENWICK. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The time of the gentlewoman from New Jersey (Mrs. FENWICK) has expired.

Mr. DERWINSKI. Mr. Chairman, I yield 2 additional minutes to the gentlewoman from New Jersey (Mrs. FENWICK).

Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, let me point out for the benefit of the gentlewoman from New Jersey (Mrs. FENWICK) one of the problems in this parcel post area. The problem was that it is a massive operation, and it took awhile to integrate.

In fact, there are still bugs in the system, and mechanically there was an element of imperfection that was tolerated for too long a time. Also I think, as the gentlewoman knows, it is true in the business world that when one loses a customer, it takes a lot of effort to get the customer back. The Postal Service has lost customers, and it does not have them back yet.

Mrs. FENWICK. Mr. Chairman, I think an awful lot is to be gained by talking to the people who are working in the business. When we talk to postal workers and ask what is going on and why, they tell us they are not fooled and they are not foolish either. They are aware of what the troubles are.

They say they knew that these machines had been tried by UPS and discarded as useless and in fact as damaging to packages.

Then one wonders why we kept on with them. Why did we ever get them if they proved to be bad? Why did we keep them when they were found to be bad?

Mr. DERWINSKI. Actually, with the new building they built and with the machinery that was installed, at least in theory the system should have been absolutely perfect and efficient in their operation. However, as I say, there were bugs in the system, and they have not completely whipped them yet.

Mrs. FENWICK. Mr. Chairman, I am really more interested in practice than in theory. That seems to be a safer position if we are concerned about the people's money.

Mr. Chairman, I thank the gentleman.

Mr. DERWINSKI. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Texas (Mr. COLLINS).

Mr. COLLINS of Texas. Mr. Chairman, I thank the chairman of the Post Office Subcommittee for his efforts and I thank the ranking Republican member of the committee on our side, the gentleman from Illinois (Mr. DERWINSKI), who has taken such a firm stand and brought out so many questionable points in this legislation.

I appreciate the fact that we are bringing this bill to the House floor, so as to give us an opportunity to review all of the problems and all of the conflicts that the postal system has—and there are so many of them.

When I was home this weekend, I was talking to people who are in the direct selling business. They are in a business where they sell direct in a person's home and this is how it works: After a person has made a direct sale, the company ships the order from the factory in Ohio or wherever it might be. They package it up and send it to the customer. At the time they send it they include a little printed literature with it. That causes all kinds of mailing problems when they do that, because if they put anything in the box, then the question is: Is it first-class mail or not?

We have got so many privileges and exclusives set up for the Postal Service, so they have not had to compete. This has, I think, tended to make them very soft.

But now they have had to compete with the United Parcel Service. I think most of us have seen the statistics showing that the parcel post business has got to where they were doing only 20 percent of what they used to do in parcel post, and the UPS has just skyrocketed every year they have done business. The reason UPS has gained is because the do not have all these little rules about "You do this through the mail" and "You cannot do that." They operate based simply on service.

The best thing, I believe, that could happen to the post office would be to get them completely out of the parcel business. That would simplify it for them. Parcel Post is definitely one of the hardest phases of their operation.

Mr. CHARLES H. WILSON of California. Mr. Chairman, will the gentleman yield?

Mr. COLLINS of Texas. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. Mr. Chairman, when we held our hearings and the United Parcel Service came in and tried to write a particular section of the bill for us that would give it some advantage—and that is an advantage they do not need, because of the fine job they do—I asked them if they would like to handle all the parcel post business. I said, "Let us just take it away from the U.S. Postal Service, and you folks handle everything."

They said no, they do not want it, because they are not prepared yet to go into the rural areas completely, and they are not prepared to have a universal system which we have to have in the Postal Service, and that is why we have to protect the parcel post business of the Postal Service and not let it deteriorate any greater than it has already. They are not prepared to deliver out in

the Indian reservations. They are not prepared to deliver over all the country the way the USPS is. We cannot think seriously about trying to let them have all of the service. They do not want it.

Mr. COLLINS of Texas. I wanted to recognize the gentleman because I think the gentleman from Illinois (Mr. SIMON) proposes an excellent recommendation. But just in answer to what the gentleman from California (Mr. CHARLES H. WILSON) said, first, I can see why the UPS wants to have the Postal Service as a competitor rather than have another competitor come in. The Postal Service is an efficient business competitor.

Mr. CHARLES H. WILSON of California. The UPS has a sweetheart labor contract, too, that helps them.

Mr. COLLINS of Texas. The whole argument that we have regards why we should keep the Postal Service so that they can deliver parcel packages to the rural areas. The gentleman from California and I are in metropolitan areas, and I do not think that it is the responsibility, in this changing country we have, to provide day-to-day delivery in rural areas for packages every day. In other words, today everybody gets in their car and they drive to town. If they do not get to town once every day, they go at least twice a week, and it would be very simple for them to go by the post office and pick up what they have or pick up from United Parcel. To think you can have a package delivered to a farm 20 miles out of town is absolutely ridiculous. Think of all the advantages the farmers have. They have a horse out in the back yard. They can ride horseback when they want to. They have fresh air. We who live in the metropolitan areas have to suffer from a lack of fresh air. They can grow their own vegetables. They have a whole lot of advantages. With the advantages of living that they have, I think they could have the handicap of picking up their packages. We should not subsidize them and pay about five times more than is necessary.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. COLLINS of Texas. I yield to the gentleman from Illinois.

Mr. SIMON. I thank the gentleman for yielding.

Mr. Chairman, I would like to say, if I may, that I disagree a little with both of my colleagues, the gentleman from Texas (Mr. COLLINS) and the gentleman from California (Mr. CHARLES H. WILSON).

First of all, those farmers have a little bit of a disadvantage of having a hard time making a living these days. I think we have to keep that in mind. That is a minor disadvantage in the rural areas. I would disagree with my colleague when he says that the Postal Service should not be in the parcel post business. I think that alternative has to be there.

The CHAIRMAN. The time of the gentleman from Texas (Mr. COLLINS) has expired.

Mr. DERWINSKI. Mr. Chairman, I yield 3 additional minutes to the gentleman from Texas.

Mr. SIMON. If the gentleman will yield further, the Postal Service, I think we should know, delivers more than 1 billion packages a year. The 338 million figure the gentleman has seen is only for parcel post. It does not count priority mail and third-class mail and a lot of other things. I would differ with my colleague from California when he mentions that United Parcel Service does not deliver in rural areas. They come right to the homes, unlike leaving it in the mailbox. It is true they do not do this in all sections of Alaska, but in the other 49 States they cover all of the States completely.

I would point out, also, there are a number of other firms, Greyhound, and a number of others, some 62 firms that are in intrastate business delivering packages. So I do not think we ought to be putting those firms out of business.

Mr. COLLINS of Texas. Mr. Chairman, I appreciate the fact that the gentleman from Illinois (Mr. SIMON) has brought out one very important point. United Parcel is not without competition today. Greyhound and Continental Trailways consider it an excellent part of their business to be able to deliver these packages, and they give very fast service, in delivering packages. You have to go to the station and pick it up yourself. The real consideration is when Postal Service gets it to the area post office, they still have to distribute it out. Home delivery is the most expensive part of the whole service.

One other point I want to mention. I did not hear the other part of the debate, but another part of this bill which disturbs me is this request for $800 million more which, as I understand it, is not in the budget and President Carter has not requested it.

Where did this increased money come into the action?

Mr. HANLEY. If my very good friend will yield, Mr. Chairman, actually, as the gentleman knows, we have decreased the dollar figure in this legislation, dropping it from the original language, which required 15 percent of the budget; we have essentially halved it. In the legislation the provision now is for but $800 million over a 3-year authorization period.

Take a look at the fiscal plight of the agency, if you please. The 1977 fiscal year deficit is about $670 million. The 1978 fiscal year deficit, the projected deficit, is something like $900 million. It goes up to a projected deficit, under present circumstances, of about $1.3 billion in 1980. Add to that the accumulated obligation of the agency, which add up to about $4.5 billion, which suggests to anybody that we are on a collision course with bankruptcy.

The CHAIRMAN. The time of the gentleman from Texas (Mr. COLLINS) has expired.

Mr. DERWINSKI. Mr. Chairman, I yield 3 additional minutes to the gentleman from Texas (Mr. COLLINS), since I believe the gentleman from New York (Mr. HANLEY) has not finished his answer.

Mr. HANLEY. Mr. Chairman, will the gentleman yield further?

Mr. COLLINS of Texas. I yield to the gentleman from New York.

Mr. HANLEY. To continue, Mr. Chairman, the agency is on a collision course with bankruptcy.

In the latter part of May the Rate Commission will come back with its ruling on the pending rate-hike proposal. Given the fiscal situation I have attempted to describe, it has no alternative other than to approve the pending rate hike, which will have the effect of sending the 13-cent stamp up to 16 cents and all other classes of mail will go up accordingly about June 1 of this year.

Void this particular legislation and we can count on another rate-hike proposal right on the heels of the one that will be approved in the latter part of May.

We proceed with this, and we are not at all providing anything in the way of medicine to the fundamental problem of the agency. We are trying to incorporate in this agency efficiency that, hopefully, will have the effect that, through attrition, the labor intensity aspect of the agency will begin to decline. Mr. Chairman, 87 percent of the current budget is spent for labor and fringe benefits.

Mr. COLLINS of Texas. Mr. Chairman, if I may, let me go further into labor costs.

I appreciate what the gentleman from New York (Mr. HANLEY) is saying, and he is right. Postal costs all get back to the specific 87 percent labor cost. Congress has been very reticent about making suggestions as to how the post office could efficiently use their labor better.

One example, Mr. Chairman, is the way I get my mail at home. I have a box out in front of my house on the street side, and I walk out to the box and I get the mail.

When that suggestion was made, many Members of Congress objected and said they thought everyone should have mail delivered at the door. Door delivery is costly and does not expedite the handling of mail.

The suggestion of post office box clusters was made. Congress again objected. Congressmen wanted door-to-door delivery. The suggestion of not delivering mail on Saturdays was made. Again Congress objected and wanted 6 days delivery.

How can the Post Office reduce their costs if we take the political expediency position here in Congress?

Mr. HANLEY. If the gentleman will yield further, Mr. Chairman, the Congress, I believe, is responding to the will of the majority of the people.

Through the last year we have had three votes on the general subject matter. At one time we came back with 399 yeas to but a handful of nays. In another instance some months later, we came back with 377 yeas to but a handful of nays; and just last week, on another similar vote, we came back with 378 yeas to 6 nays.

The Members of Congress, I believe, respond to their responsibility to their constituents. I know I do not, and certainly the gentleman does not, do things that are unpopular with our own constituents.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. DERWINSKI. Mr. Chairman, I yield 4 additional minutes to the gentleman from Texas.

Mr. COLLINS of Texas. Let me at this time sum up something. The gentleman from New York is really getting down to cases. I agree with the gentleman from New York that Congressmen are responsive to our constituents and make things very difficult for the Post Office to operate on a profitable basis. We are overresponsive. We are ready to provide every service in the world, and yet we do not want folks to pay for it. We are trying to stand on both sides of the issue. They are being required to provide these services, and we are saying, "Do not increase the rates."

Somewhere down the line we have got to start talking about keeping down costs. I remember the vote we had last week, and there were just six of us voting on that. I know that Congress would not back up the Post Office on any cuts in service.

Where they were trying to put in something efficient, or trying to reduce costs, if we had told folks, "Do you want to get this service or do you want your rate to go up," but we never put it that way. We will always say, "Do you want the service," and discuss the rate at a separate time. They are correlated; they are definitely related.

Somewhere, somehow, we have got to get back to basics and we in the Congress are going to have to be stronger in backing post office management any time they suggest these cost-saving ventures.

Mr. HANLEY. If the gentleman will yield further, would it not be fair to say that the American people are attuned to a tradition when it comes to Postal Service It has been traditional in this country that they enjoy door-to-door delivery; that they enjoy Saturday delivery, and they are wedded to that concept, as is evidenced every time the agency moves in the direction of cutbacks. Well, that brings on an onslaught of complaints from people, and the Congress reacts in support of the people's position. Essentially, that is what we are doing here today. The self-sustaining concept, as well intended as it might have been back in 1969, has proven to be impossible.

Let me make one other point, if I can mention one other factor which, in my judgment, has led to the fiscal distress of the agency. Back in the act of 1970, the provision had it that it would enjoy public service costs up to 10 percent of that particular fiscal year budget. So, by that language the agency was locked into a situation whereas it was going to enjoy 10 percent of the budget for that year, going back to 1970. The budget was then $920 million.

Unfortunately, had the Postmaster General—the first one under this new concept—come back to the Congress and said, "Wait a minute, friends, what you should do is have that apply to the current fiscal year budget," had he done that back 7 years ago, I do not think the agency would have been in the jackpot it is in today. Unfortunately, they lived in that terrible fiscal situation, giving no consideration at all to the inflationary factor. As we have said many times, like gasoline alone, every time the cost of gasoline increased by 1 cent per gallon, it added $300 million to the annual budget of the Postal Service.

Mr. COLLINS of Texas. Let me just add that the gentleman has done a wonderful job in answering me. I understand all that he is saying, but I just want to state during the last minute I have that every poll in this country shows that the biggest problem in America is inflation. Everyone objects to inflation, and it starts right here in these seats we have here in Congress. We are the ones who are causing inflation in this country because of the spending we are doing.

We are running a $100 billion deficit this year, spending and more deficit spending, causing this country to issue more money, more money, and causing the value of the dollar to drop to the point where a dollar is worth 50 cents, and it takes $2 to buy what $1 bought in the better days.

What we need is more postal service like the postal carriers with their enthusiasm and strong sense of duty and responsibility.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. DERWINSKI. Mr. Chairman, I yield 1 additional minute to the gentleman from Texas.

Mr. COLLINS of Texas. We never stop spending on a deficit basis. Let us start with the post office. Remember $100 billion of Government spending was Congress budget in 1962; 10 years later we reached $200 billion, in 1972. Congress is now spending $500 billion per year.

We talk about service, but what we ought to talk about is inflation, and inflation is simply spending money we do not have. Whether it is the post office or whichever Department in the Government is spending money we do not have, we ought to start changing right now. The American people do not need all the service. Americans can provide a few things for themselves. But they do want to end inflation, and if we can plan, economize and get to a balanced budget we can end inflation.

Mr. HANLEY. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. WHITE).

Mr. WHITE. Mr. Chairman, I thank the gentleman from New York for yielding.

At this time I want first to commend the committee, both the chairman of the full committee and the chairman of the subcommittee for having done an excellent job.

I remind the House the present Postal Service was initiated as an experiment in 1970 and operated since then in an effort to try to bring greater efficiency to the postal system. It was done at the urging of the American people and the business interests of this Republic, but it did not work.

At that time a number of people expected the Postal Service would be self-supporting, but some of us on the committee realized the Postal Service could not be self-sustaining. The only place in the world a postal system is self-sustaining is where both the telegraph and telephone and postal service are incorporated, and we certainly did not want to do that in this country.

My colleague was correct in indicating that when he was home his people were asking him to do something about the postal service. We have heard about that a great deal. This bill does exactly that. We have provided oversight and a veto over the policies of the system, and the President will have the opportunity to appoint the Postmaster General, and we will have subsequently the opportunity to have tremendous oversight to be sure the policies are appropriate to bring service to the public.

We have seen instance after instance where the Postal Service has attempted to cut back the service to the public. The latest example is the attempt to cut back the 6-day service by eliminating Saturday delivery. The American people and the Congress have said no, we want that delivery. The Service had previously cut back the three-times-a-day delivery to once-a-day delivery.

I ask the Members to support the bill and this effort to restore oversight and authority over the Postal Service.

Mr. HANLEY. In conclusion, Mr. Chairman, I just want to say we are dealing with a highly complicated subject matter. In recent years, there have been two Commissions appointed to deal with it in an effort to resolve the problems of the U.S. Postal Service. One was headed by the very eminent Fred Keppel, former chairman of the A.T. & T. Unfortunately the result of this Commission was not that productive. Most recently the study Commission instituted after passage of H.R. 8603 was headed up by a group of illustrious people chaired by Gaylord Freeman, a group of very intelligent people who have delved heavily into the matter and spent a great deal of time in trying to resolve the problems of this agency. Unfortunately they produced little in the way of constructive results.

The measure we are considering today is, in the collective judgment of many people in and out of the Government, one that hopefully will provide the solution to the problems of the U.S. Postal Service, if there is a solution to them. So we ask for your confidence on this legislation.

Like the gentleman from Texas (Mr. COLLINS), we do not like to spend any more money than is absolutely essential. We are trying hard to be responsible. We are trying hard to provide some direction for this gigantic agency in recognition of our responsibility as Members of the Congress. So I hope very much that a good majority of the Members of the House today will express their position on this subject matter once again as they have done three times in the recent past.

Mr. Chairman, I yield back the balance of my time.

Mr. ROUSSELOT. Mr. Chairman, I yield such time as he may consume to

the distinguished gentleman from California (Mr. DON H. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Chairman, I completely support the provision in H.R. 7700 which calls for congressional review and veto power over proposed changes in national postal standards. For example, it would prevent the Postmaster General from eliminating Saturday mail delivery unless Congress concurred.

As many of my colleagues may remember, last September we passed House Concurrent Resolution 277, expressing the sense of Congress that the Postal Service should not eliminate Saturday mail delivery. Saturday mail service is a historic public service of the American postal system and, as a service, simply curtailing operations is not the proper approach to dealing with postal financial difficulties.

In my district, the discontinuance of Saturday service would completely disrupt the Saturday delivery of our weekly newspapers. It would hit especially hard our small businesses which depend on a reliable mail service and it could add at least 1 more day's delay to those older citizens waiting for a social security check.

Every Monday the backlog of mail in our small post offices would be mammoth, and, it is unlikely that the entire 3 day buildup of mail could be processed in just 1 day. On Monday the letters that should be delivered may well have to wait until Tuesday or even Wednesday. And, when one of the six Monday holidays occurs the entire mail schedule could be disrupted for the entire week.

With this in mind, I must commend my colleagues on the Post Office Committee for including this congressional review provision. Because we in Congress must be responsive to our constituents, this provision will allow us to keep the Postal Service equally as responsive and is a major step in working for true postal reform.

I am also pleased to see the provision in H.R. 7700 calling for public hearings in any community where the Postal Service is considering closing or consolidating a post office. It also would require the Service to consider the social effect of a post office closing on a community. As a Representative of a predominantly rural district I know from first-hand experience that the continuation of our small rural post offices is of utmost importance. In many areas these offices serve as community meeting places and have social and cultural impacts that cannot be measured in dollars and cents. This provision will insure our rural areas that they will have a direct input in any Postal Service decision affecting their areas and that all factors involved—financial, social, and cultural—will be considered in a possible closing or consolidation.

Furthermore, I am pleased to see that postal rate principles are clarified in the bill for nonprofit mailers. Our time honored tradition of keeping the mails open to small magazines and newspapers—which are now in danger of being priced out of the mails, and therefore out of existence—is strengthened by providing that the first 250,000 pieces of an issue be mailed at a reduced rate.

Finally, I plan to support the amendment which will be offered to preserve existing parcel post ratemaking rules. The Simon amendment would simply specify that parcel post rates should cover the costs of the service. Figures show that the margin of profit of the private carriers of parcels is small and that a major shift in subsidies, as proposed by H.R. 7700, could hurt the private sector.

The public should be allowed a choice between parcel post and a private sector firm—and that choice is in real danger should the Congress grant more taxpayer subsidies to the Postal Service in the form of higher rates on other classes of mail to undercut rates of private sector services.

The Simon amendment would simply require parcel post to pay its own way—as it should—and it is imperative that we adopt it if we want to continue the long stated principle of fair competition between public and private parcel delivery.

Mr. ROUSSELOT. Will the gentleman yield?

Mr. DERWINSKI. I yield such time as he may consume to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Chairman, I think the Members of the House should be aware that one reason many of us in this body have great concern about adding another $800 million to the deficit of this postal organization is because it already has had $17 billion to spend this year and they will probably spend $18 billion in 1979. Most organizations could make ends meet on that kind of a budget or on that kind of revenue. It seems unwarranted and wrong for us to add to a Federal deficit that is already too big, another $800 million.

We are not talking just about pin money, we are talking about big dollars. The American people are tired, they are sick and tired of constantly watching their Government going further and further into debt to pay for so-called service organizations that cannot get the local mail deliever on time in many cases.

Mr. HANLEY. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. My colleague, the gentleman from Illinois (Mr. DERWINSKI), has control of the time.

Mr. DERWINSKI. Mr. Chairman, if the gentleman promises to try to control himself I will be happy to yield further to the gentleman from California.

Mr. ROUSSELOT. It is very difficult for me not to get excited about big Federal deficits. The American people do not understand our lack of any fiscal restraint.

I yield to the gentleman from New York.

Mr. HANLEY. Mr. Chairman, once again I reiterate that I share the concern of the gentleman for the dollar figure associated with this legislation; however, the gentleman should not forget that contained in the bill there are mandates that are going to require efficiencies within that agency that have not prevailed for the past 7 years. So we have high hopes that as a result of the overall provisions of this legislation we are going to enjoy efficiencies, subject to the enactment of this legislation, that will lead to many improvements from the standpoint of the taxpayers.

The CHAIRMAN. All time has expired.

Mr. DERWINSKI. Mr. Chairman, in view of the debate we have had and in view of the tremendous attendance we have had this afternoon, I must, of necessity, make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

The CHAIRMAN. A quorum of the Committee of the Whole has not appeared.

The Chair announces that a regular quorum call will now commence.

Members who have not already responded under the noticed quorum call will have a minimum of 15 minutes to record their presence. The call will be taken by electronic device.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 169]

Akaka	Findley	Rahall
Anderson, Ill.	Fish	Risenhoover
Andrews, N.C.	Flood	Rosenthal
Archer	Fowler	Runnels
Armstrong	Fraser	Ryan
Blouin	Frey	Santini
Boggs	Goldwater	Sarasin
Bolling	Goodling	Scheuer
Broomfield	Gudger	Shipley
Burke, Calif.	Harrington	Shuster
Burton, John	Harsha	Skubitz
Burton, Phillip	Heckler	Solarz
Byron	Jenkins	Teague
Cederberg	Krueger	Thone
Chappell	Leggett	Thornton
Collins, Ill.	McClory	Tucker
Cornwell	McCloskey	Udall
Davis	Madigan	Ullman
Dellums	Mathis	Van Deerlin
Dickinson	Meeds	Volkmer
Diggs	Mitchell, Md.	Waxman
Drinan	Moffett	Whitley
Eckhardt	Murphy, N.Y.	Wiggins
Edwards, Calif.	Nolan	Wilson, Tex.
Erlenborn	Pepper	Wright
Evans, Ga.	Pursell	Young, Alaska
Fary	Quie	Young, Tex.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. PATTISON of New York, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H.R. 7700, and finding itself without a quorum, he had directed the Members to record their presence by electronic device, whereupon 353 Members recorded their presence, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

The CHAIRMAN. Pursuant to the rule, it shall be in order to consider an amendment printed in the CONGRESSIONAL RECORD of March 14, 1978, by Representative HANLEY of New York if offered as an

amendment in the nature of a substitute for the bill, said substitute shall be read for amendment under the 5-minute rule as an original bill, and all points of order against said substitute for failure to comply with the provisions of clause 7, rule XVI, are hereby waived.

At the appropriate time the Chair will recognize the gentleman from New York (Mr. HANLEY) to offer his amendment.

At this time the Clerk will read.

The Clerk read as follows:

SHORT TITLE

SECTION 1. This Act may be cited as the "Postal Service Act of 1977"

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. HANLEY

Mr. HANLEY. Mr. Chairman, pursuant to the rule, I offer an amendment in the nature of a substitute for the bill.

The CHAIRMAN. The Clerk will report the amendment by sections.

The Clerk read as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Postal Service Act of 1978".

Mr. HANLEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. DERWINSKI. Mr. Chairman, reserving the right to object, as I understand the parliamentary procedure, this is the famous or infamous substitute that has drawn so much wrath from the White House. It is 35 pages long but if the gentleman from New York could explain it and especially the parts that the White House objects to, I think we would all feel much better.

Mr. HANLEY. Mr. Chairman, if the gentleman will yield, as the gentleman points out, this amendment contains provisions which will lower appropriations from 15 percent of the postal budget to a dollar amount or $800 million for the next 3 fiscal years. It also provides for the appointment of a Postmaster General by the President and for a term of 4 years, and it strikes out the provisions of H.R. 7700 providing for congressional review of postal rate increases. The remainder of the substitute is the same as the bill reported out of committee.

Mr. DERWINSKI. Mr. Chairman, I believe this is the same amendment that is covered by the White House letter of March 14 from a distinguished public official by the name of Stuart E. Eizenstat, Assistant to the President, in which he outlines objections to six specific sections of the bill. This is the same amendment, is it not?

Mr. HANLEY. The gentleman is right. I give the gentleman the absolute assurances that the administration is in concurrence.

Mr. DERWINSKI. In which of the hands of the administration, left or right?

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. ASHBROOK. Mr. Chairman, reserving the right to object, I am constrained to point out that some very strange things seem to be happening. I have in my hand H.R. 7700. It has the first 22 pages stricken and a bill following that, which I assumed was H.R. 7700, a bill that was part of the one we had last October. I have now been handed a 30-odd-page bill that is supposed to be a substitute. I have a report that does not relate to the October bill, to the original bill. It is almost 5:30 p.m. We were going to rise at 5:30. So I am going to object. I am not going to object tomorrow, but I certainly will today. I object to dispensing with the reading of the amendment in the nature of a substitute for the bill.

The CHAIRMAN. Under the rule, the amendment in the nature of a substitute is to be read by sections.

Are there amendments to section 1?

Mr. ASHBROOK. Mr. Chairman, am I to understand that this section of which the Chair is speaking is not to be read? The gentleman from New York (Mr. HANLEY) asked unanimous consent that it be considered as read.

Mr. HANLEY. Mr. Chairman, if the gentleman will yield, essentially we are dealing with the same bill. Four points have been changed, the four that I described in the amendment in the nature of a substitute.

The CHAIRMAN. The Chair will again state that, under the rule, the amendment in the nature of a substitute is to be read by sections as an original bill.

Mr. SIMON. Mr. Chairman, will the gentleman from Ohio (Mr. ASHBROOK) yield?

Mr. ASHBROOK. I yield to the gentleman from Illinois.

Mr. SIMON. If I might just point out, and the gentleman from New York (Mr. HANLEY) may correct me, it is unlikely that we are going to vote on final passage tonight. The amendment the gentleman is objecting to is an amendment in the nature of a substitute. What we would like to do is to get some of the amendments taken care of in the very near future, one of which I would like to offer in the very near future. But if we have to have the bill read it will be difficult to take care of those amendments.

PARLIAMENTARY INQUIRY

Mr. ASHBROOK. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. ASHBROOK. Mr. Chairman, do I understand the ruling of the Chair to be that the substitute can be offered and does not have the requirement that it be read?

The CHAIRMAN (Mr. PATTISON of New York). The Chair will state that the requirement of the rule is that the amendment in the nature of a substitute be read by sections.

Mr. ASHBROOK. Why cannot the first section be read in its entirety?

The CHAIRMAN. The Chair will state that the first section has been read.

Mr. ASHBROOK. The first section of the amendment in the nature of a substitute has been read?

The CHAIRMAN. That is correct, the first section of the amendment in the nature of a substitute has been read.

PARLIAMENTARY INQUIRY

Mr. CHARLES H. WILSON of California. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. CHARLES H. WILSON of California. Mr. Chairman, in the event we read the amendment in the nature of a substitute by sections, does this require, then, that amendments must be placed in at the particular section, or can they be placed in at any time? The intention of the gentleman from New York (Mr. HANLEY) was to ask unanimous consent that the amendment in the nature of a substitute be considered as read and be open for amendment at any time. What is the parliamentary situation so long as we are reading it by sections?

The CHAIRMAN (Mr. PATTISON of New York). The Chair will state that as each section is read, amendments will be in order to that section.

AMENDMENT OFFERED BY MR. SIMON TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. HANLEY

Mr. SIMON. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. SIMON to the amendment in the nature of a substitute offered by Mr. HANLEY: Page 4, line 2, insert:

POINT OF ORDER

Mr. ASHBROOK. I have a point of order, Mr. Chairman. Is this an amendment to section 1?

The CHAIRMAN. This is an amendment to section 1.

Mr. ASHBROOK. I have a point of order, Mr. Chairman. This is an amendment to section 2, Mr. Chairman.

The CHAIRMAN. An amendment to section 2 is not in order.

The Clerk will read section 2.

The Clerk read as follows:

CHANGING RATES AND FEES

SEC. 2. (a)(1) Section 3621 of title 39, United States Code, is amended to read as follows:

"§ 3621. Authority to fix rates and fees

"The Postal Rate Commission shall establish rates of postage and fees for postal services in accordance with this chapter. Postal rates and fees shall be reasonable, equitable, and sufficient to enable the Postal Service under honest, efficient, and economical management to maintain and continue the development of postal services of the kind and quality to meet the needs of the United States. Postal rates and fees shall provide sufficient revenues so that the total estimated income and appropriations to the Postal Service will equal, as nearly as practicable, the total estimated costs of the costs' includes—

"(1) operating expenses;

"(2) depreciation on capital facilities and equipment;

"(3) interest on debt and amortization of debt discount and expenses; and

"(4) a provision for contingencies, not to exceed 2 percent of an amount equal to the total of those items referred to in paragraphs

(1)-(3) of this section, for unforeseeable and uncontrollable occurrences;
but does not include a provision for repayment of past losses.".

(2) The item relating to section 3621 in the table of sections for subchapter II of chapter 36 of title 39, United States Code, is amended by striking out "classes" and inserting in lieu thereof "fees".

(b) Section 3622 of title 39, United States Code, is amended to read as follows:

"§ 3622. Rates and fees

"(a) The Postal Service shall propose to the Postal Rate Commission changes in a rate or rates of postage or in a fee or fees for postal services when the Postal Service determines that each such change would be in the public interest and in accordance with the policies of this title.

"(b)(1) Upon receiving any proposal from the Postal Service, the Commission shall make a decision on the request for changes in rates or fees in each class or subclass of mail or type of postal service in accordance with the policies of this title and the requirements of this subsection.

"(2) Each class or subclass of mail or type of postal service shall bear those postal costs attributable to that class, subclass, or type. Attributable costs shall be those costs which vary with the volume of the class or subclass of mail or type of postal service over a period of not more than 3 years. If the Commission determines that attributable costs exceed 60 percent of total estimated costs, the attributable costs of each class, subclass, or type shall be reduced to an amount that is determined by multiplying the attributable costs of the class, subclass, or type by a fraction whose numerator is 60 and denominator is a whole number equal to the percentage of total estimated costs determined to be attributable. Revenues received from zone-rated parcels shall recover attributable costs determined under this section without regard to the provisions of the preceding sentence, plus a fair share of all other costs.

Mr. HANLEY (during the reading). Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. ROSTENKOWSKI) having assumed the chair, Mr. PATTISON of New York, Chairman of the Committe of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7700) to amend title 39, United States Code, to establish congressional review of postal rate decisions, to increase congressional oversight of the U.S. Postal Service, to abolish the Board of Governors of the U.S. Postal Service, and for other purposes, had come to no resolution thereon.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 11315, FEDERAL ELECTION CAMPAIGN ACT AMENDMENTS OF 1978

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95-991) on the resolution (H. Res. 1093) providing for consideration of the bill (H.R. 11315) to amend the Federal Election Campaign Act of 1971 to make certain changes in the reporting and disclosure requirements of such act, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PERMISSION FOR SUBCOMMITTEE ON AVIATION OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO MEET FOR MARKUP TOMORROW, TUESDAY, AND WEDNESDAY OF THIS WEEK DURING 5-MINUTE RULE

M. ANDERSON of California. Mr. Speaker, I ask unanimous consent that the Subcommittee on Aviation of the Committee on Public Works and Transportation may be permitted to meet for markup tomorrow and Wednesday of this week during the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, which bill is the gentleman talking about?

Mr. ANDERSON of California. Mr. Speaker, if the gentleman will yield it is the Aviation Subcommittee. We are meeting on the regulatory reform bill. We have been going for several days.

Mr. ROUSSELOT. Is that the only bill?

Mr. ANDERSON of California. It is the only bill.

Mr. ROUSSELOT. Is it hearings or marking up the bill?

Mr. ANDERSON of California. We have been marking up for the last week, and we have been continuing because of the schedule here, working 2 or 3 hours at a time.

Mr. ROUSSELOT. The gentleman can assure us only that bill will be handled?

Mr. ANDERSON of California. Only that bill will be handled, yes.

Mr. ROUSSELOT. Mr. Speaker, I yield to the gentleman from Kentucky (Mr. SNYDER).

Mr. SNYDER. Mr. Speaker, we have been marking up the bill, and we have an understanding that if things gets hectic here, we will shut down. We have been cooperating along that basis.

Mr. ROUSSELOT. Mr. Speaker, on that basis, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PERSONAL EXPLANATION

(Mr. GILMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GILMAN. Mr. Speaker, I was granted a leave of absence for Friday, March 10, 1978, to attend hearings in California conducted by the Subcommittee on Census and Population of the House Committee on Post Office and Civil Service. I thus missed the legislative session of that day. Had I been present, I would have voted in the following manner: H.R. 10982, first budget rescission bill, fiscal year 1978, rollcall No. 129; "yes."

CONCURRENT RESOLUTION PROTESTING SENSELESS PALESTINIAN TERRORIST ATTACK

(Mr. YATES asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous material.)

Mr. YATES. Mr. Speaker, I am pleased today to submit the remaining names of the cosponsors of the concurrent resolution I introduced condemning the PLO attack a week ago Saturday on unarmed Israeli men, women and children and to commend the governments of Israel and Egypt in their attempt to bring peace to the Middle East. There are now some 403 cosponsors on the concurrent resolution.

Mr Speaker, it is now clear that one of the purposes of the PLO attack in Israel was to disrupt the peace negotiations between Egypt and Israel. Let us hope that this effort by the PLO will fail, and that President Sadat of Egypt and Prime Minister Menachem Begin will continue in their efforts to resolve their differences and bring peace to that troubled area.

The list of names of the Members is as follows:

ALPHABETICAL LIST OF COSPONSORS OF CONCURRENT RESOLUTION

Addabbo, Akaka, Alexander, Allen, Ambro, Ammerman, Glenn Anderson, John Anderson, Ike Andrews, Mark Andrews, Annunzio, Applegate, Archer, Armstrong.

Ashbrook, Ashley, Aspin, Aucoin, Bafalis, Barnard, Baucus, Bauman, Edward Beard, Robin Beard, Berkley Bedell, Beilenson, Benjamin, Bennett, Bevill.

Biaggi, Bingham, Blanchard, Blouin, Boggs, Boland, Bolling, Bonior, Bonker, Bowen, Brademas, Breckinridge, Brinkley, Brodhead.

Broomfield, Clarence Brown, Garry Brown, George Brown, Broyhill, Buchanan, Burgener, Herbert J. Burke, James Burke, Yvonne Burke, Omar Burleson, John Burton, Phillip Burton, Butler, Byron.

Caputo, Carney, Carr, Carter, Cavanaugh, Cederberg, Chappell, Chisholm, Don Clausen, Del Clawson, Clay, Cleveland, Cochran, Cohen.

James Collins, Conable, Conte, Conyers, Corcoran, Corman, Cornell, Cornwell, Corrada, Cotter, Coughlin, Crane, D'Amours, Robert W. Daniel, Jr., Dan Daniel.

Danielson, Davis, de la Garza, Delaney, Dellums, de Lugo, Dent, Derrick, Derwinski, Devine, Dickinson, Dicks, Diggs, Dingell, Dodd.

Dornan, Downey, Drinan, John Duncan, Robert Duncan, Early, Edgar, Don Edwards, Jack Edwards, Mickey Edwards, Eilberg, Emery, English, Erlenborn.

Ertel, Billy Lee Evans, David Evans, Frank Evans, Thomas Evans, Fary, Fascell, Fauntroy, Fenwick, Findley, Fish, Fisher, Fithian, Florio, Flowers.

Foley, Harold Ford, William Ford, Forsythe, Fountain, Fowler, Fraser, Frenzel, Frey, Fuqua, Gammage, Garcia, Gaydos, Gephardt.

Giaimo, Gibbons, Gilman, Ginn, Glickman, Goldwater, Gonzalez, Goodling, Gore, Gradison, Grassley, Green, Gudger, Guyer, Hagedorn.

Hall, Hammerschmidt, Hanley, Hannaford, Hansen, Harkin, Harrington, Harris, Harsha, Hawkins, Heckler, Hefner, Heftel, Hillis.

Holland, Hollenbeck, Holt, Holtzman, Horton, Howard, Hubbard, Huckaby, Hughes, Hyde, Ichord, Ireland, Jacobs, Jeffords, Jenkins.

Jenrette, Harold Johnson, James Jones, Walter Jones, Jordan, Kasten, Kazen, Kelly, Kemp, Ketchum, Keys, Kildee, Kindness, Kostmayer.

Krebs, LaFalce, Lagomarsino, Latta, Leach, Lederer, Le Fante, Leggett, Lehman, Lent, Levitas, Livingston, Jim Lloyd, Marilyn Lloyd, Clarence Long.

Gillis Long, Lott, Lujan, Luken, Lundine, McClory, McCloskey, McCormack, McDade, McDonald, McEwen, McFall, McHugh, McKay.

McKinley, Madigan, Maguire, Mann, Marks, Mathis, Mattox, Mazzoli, Metcalfe, Meyner, Michel, Mikulski, Mikva, Clarence Miller, George Miller.

Mineta, Minish, Donald Mitchell, Parren Mitchell, Moakley, Moffett, Mollohan, Montgomery, Moore, Carlos Moorhead, William Moorhead, Moss, Mottl, Austin Murphy.

John Murphy, Morgan Murphy, Murtha, Gary Myers, John Myers, Michael Myers, Natcher, Neal, Nedzi, Nichols, Nix, Nolan, Nowak, Oberstar.

O'Brien, Ottinger, Panetta, Patten, Patterson, Pattison, Pease, Pepper, Perkins, Pettis, Pickle, Pike, Pressler, Preyer, Price.

Pritchard, Pursell, Quayle, Quie, Quillen, Railsback, Rangel, Regula, Reuss, Rhodes, Richmond, Rinaldo, Risenhoover, Roberts.

Robinson, Rodino, Roe, Rogers, Roncalio, Rooney, Rose, Rosenthal, Rostenkowski, Rousselot, Roybal, Rudd, Runnels, Ruppe, Russo.

Ryan, St Germain, Santini, Sarasin, Satterfield, Scheuer, Schroeder, Schulze, Sebelius, Seiberling, Sharp, Shipley, Shuster, Sikes.

Simon, Sisk, Skelton, Skubitz, Slack, Neal Smith, Snyder, Solarz, Spellman, Spence Staggers, Stanton, Stark, Steed, Steers.

Steiger, Stockman, Stokes, Stratton, Studds, Stump, Symms, Taylor, Thompson, Thone, Traxler, Treen, Tsongas, Tucker.

Udall, Ullman, Van Deerlin, Vander Jagt, Vanik, Vento, Volkmer, Waggonner, Walgren, Walker, Walsh, Wampler, Watkins, Waxman, Weaver.

Weiss, Whalen, White, Whitehurst, Whitley, Whitten, Wiggins, Bob Wilson, Charles Wilson of Texas, Charles Wilson of California, Winn, Wirth, Wolff, Won Pat.

Wright, Wydler, Wylie, Yates, Yatron, C. W. (Bill) Young, Don Young, John Young, Robert Young, Zablocki, Zeferetti.

RATINGS BY SOME ORGANIZATIONS ON CONGRESSIONAL VOTING ARE BIASED AND MISLEADING

(Mr. WHITEHURST asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WHITEHURST. Mr. Speaker, each year an increasing number of groups, representing a wide range of interests and political points of view, issue ratings of Members of Congress based on a selection of votes of particular concern to the individual group or organization. Many of these ratings are compiled in a highly responsible manner, with great care taken to give careful scrutiny to the full voting records of Members of the House and Senate. Unfortunately, however, it has been my experience that some organizations' ratings are biased and misleading.

One such arbitrary and unfair rating was recently published by the National Council of Senior Citizens. This group gave a "zero rating" to me and four of my colleagues from Virginia, as well as to a number of other Members, for votes we cast during the last session of Congress. The press release announcing this rating was published in a newspaper in my district, giving my constituents the impression that I am totally insensitive to the needs of the elderly.

Since the American people have traditionally been sympathetic to the plight of the elderly, nearly all public officials, myself included, like to think of themselves as being responsive to the concerns of older Americans. Consequently, I was shocked to receive such a negative rating from an organization purporting to represent senior citizens, and I immediately began to look into the votes upon which the rating was based. What I found was truly astonishing. In some instances, the National Council of Senior Citizens took positions on issues which were directly contrary to the stands taken by every other organization representing the elderly, and in complete opposition to the common perception of what would be in the best interests of senior citizens. Some other votes cited by the National Council had little, if any, significance for older Americans.

One example of the curious positions taken by the National Council of Senior Citizens is its opposition to the Ketchum amendment to the social security financing bill. Under existing law, social security recipients cannot earn more than $3,000 annually without suffering a major cutback in their social security benefits. The Ketchum amendment phased out the earnings limitations over a 5-year period. Ever since I have been in Congress, senior citizens in my district have asked me to support elimination of the earnings test. These individuals are still active and capable of productive work, but they simply cannot afford to continue working under the present limitations on income. Because of the strong feelings expressed to me by senior citizens on this issue, I have for many years sponsored legislation to repeal the earnings test. In my view, this limitation on earnings robbed our society of a great reservoir of knowledgeable, experienced, and valuable workers. It also seemed to me that the earnings limit symbolized an arbitrary and condescending attitude toward the elderly.

On a bipartisan basis, the House last year finally passed the Ketchum amendment repealing the limit on outside income. Much of the credit for the passage of the amendment should go to the American Association of Retired Persons, the largest group representing the elderly, with over 11 million members. Despite the support given the amendment by the AARP and other organizations representing senior citizens, the National Council of Senior Citizens strongly opposed the Ketchum amendment. Indeed, to demonstrate the depth of the national council's feelings on this issue, it actually chose the Ketchum amendment as 1 of the 10 votes on which to base its rating, out of the hundreds cast by Congressmen last year. Since no senior citizen has ever asked me to continue the earnings limit and many have asked me to vote to repeal it, I was flabbergasted to learn that my vote in favor of repeal was actually construed as a wrong vote by the national council, which is an organization purporting to represent senior citizens.

The strange machinations of the National Council of Senior Citizens did not end with their opposition to the Ketchum amendment. I have also learned that this organization did not so much as lift a finger to support the bill passed by the House last year to raise the mandatory retirement age to 70. The AARP, the National Council on the Aging, and other senior groups considered this the most important legislation affecting the elderly last year. These fine organizations worked for years to set the stage for its passage. Indeed, it is considered by most of the elderly in this country to be a fundamental aspect of their human rights. While the national council did not oppose this bill, its lack of interest in such a basic matter of senior citizens' rights leaves one with the clear impression that the national council would just as soon have seen the matter die. Raising the age limit to 70 was not 1 of the 10 votes they took into account in rating the Members. One wonders why.

At the same time that the National Council was opposing or ignoring legislation to allow senior citizens to lead fuller and more productive lives, it was hard at work promoting big spending measures to put the unemployed younger workers back to work. As 1 of the 10 votes which I cast which the National Council did not like was my vote in support of the Coughlin amendment to cut $382.5 million from the $22.6 billion economic stimulus appropriations bill. This measure was essentially designed to create Government-sponsored jobs, many for construction workers who were unemployed. Few, if any, elderly individuals obtained jobs under this program. Nevertheless, this was one of the key issues in the eyes of the National Council of Senior Citizens.

After reviewing these votes, I asked a number of knowledgeable people why the National Council would object to allowing senior citizens the right to work while at the same time it devoted so much energy to the passage of legislation providing jobs for younger workers. The answer I received from officials of other senior citizens groups, among others, was that the National Council of Senior Citizens has close ties to organized labor. Nelson Cruikshank, the former head of the National Council, was an official with the AFL–CIO for 21 years. Its current leaders are also closely attuned to the wishes of labor. Organized labor still holds to the 1930's view that older workers should retire at an early age in order to diminish the supply of workers and thereby raise wages for the younger workers. I believe that this is a misguided notion in

our modern economy. Nevertheless, I can understand the motivation of the labor movement in holding to this view. What I cannot understand is the motivation of a group like the National Council of Senior Citizens, which masquerades as the voice of older Americans and yet supports legislation which is much more in tune with the views of organized labor than with the needs and desires of the elderly.

In my judgment, inflation is this Nation's single most serious domestic problem. The Wholesale Price Index rose by 1.1 percent in February alone, raising the specter of another round of double-digit inflation. G. William Miller, the new Chairman of the Federal Reserve Board, and other public officials have recently been pressing for more effective anti-inflation measures by the Federal Government. Ironically, in the same week that the administration recognized that inflation is a major problem, the House passed the Humphrey-Hawkins Full Employment and Balanced Growth Act of 1978 without effective provisions to control inflation. Both economists and politicians generally agree that severe inflation hits hardest at the elderly, many of whom are forced to live on fixed incomes. Yet one would never know that inflation was a probem from the positions taken by the National Council of Senior Citizens calling for massive increases in deficit spending, often for programs with little relevance to the elderly.

One vote to which the national council objected was my support for the Mathis amendment to put a cap of $5.847 billion on this year's food stamp program. This amount was $300 million higher than the administration's own estimates of the cost of the food stamp program, so this amendment would in no way have meant the loss of food stamps for any needy individual. However, the Congress had not previously placed any limit on food stamps, and the general feeling among the Members was that we needed at least a modicum of fiscal discipline in this program, which had grown from a small demonstration program to an uncontrolled, multibillion dollar program in a decade. Even this minimal attempt at fiscal restraint was too much for the National Council of Senior Citizens.

The most inflationary legislation passed during my 9 years in the Congress clearly is the social security financing bill passed last year. This bill will raise taxes by $200 billion over the next decade, the largest peacetime tax increase in our Nation's history. Half of these taxes will be paid by workers and half by businesses which will pass on their share of these taxes to consumers in the form of higher prices. The National Council of Senior Citizens supported this massive tax increase and put a black mark next to my name for voting against it. Let me make clear that every Member of Congress is absolutely committed to maintaining adequate social security benefits for the elderly. But there are other steps, aside from a huge tax increase, which can and should be taken to place the social security system on a sound footing.

As a matter of fact, the public outcry against the increased taxes is already causing many of the erstwhile supporters of the tax to backtrack and look at alternatives. One of my concerns about the social security tax increase, aside from its inflationary aspect, is that it could set generation against generation in this country. If the tax burden on current workers becomes too heavy, a taxpayers' revolt could ensue which would threaten the social security benefits which the elderly need and deserve. The AARP recognizes this fact and is seeking alternative means to finance social security. I have sponsored legislation calling for a Special Advisory Council to investigate alternative means of funding social security, to insure that the benefits will not be lost and that funding will be on an actuarially sound basis instead of being based on a crippling and inflationary tax increase. The National Council of Senior Citizens, however, thinks the $200 billion tax increase is just fine.

In summary, then, I can only conclude that the ratings issued by the National Council of Senior Citizens are based more on ulterior political motives than on any desire to serve the best interests of the elderly in this country.

DEATH OF FORMER U.S. SENATOR JOHN MARSHALL BUTLER OF MARYLAND

(Mr. BAUMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BAUMAN. Mr. Speaker, it is my sad duty to inform the House of the passing of the Honorable John Marshall Butler of Maryland, who served as a Member of the other body from 1951 to his retirement in 1963. Senator Butler died last week at the age of 80.

Senator Butler's political career in Maryland was unusual in that as an avowed conservative who supported the late and great Senator Robert Taft of Ohio for President, he also attained a large following among blue-collar workers and union members appreciative of his unstinting work for the Port of Baltimore and the maritime industry.

Mr. Speaker, I knew John Marshall Butler as a friend and as my sponsor when I served as a page in the other body during the special session on 1954 which considered the censure of the late Senator Joe McCarthy of Wisconsin. I worked with Senator Butler in his 1956 reelection campaign and on many subsequent occasions. He will certainly be missed by me and many other Marylanders who remember his faithful service to Maryland and the Nation. I extend my condolences to his wife and family.

At this point in my remarks I include editorials from the Baltimore Sun concerning the Senator's career which, while normally condescending in tone, at least recognizes the unquestionable integrity of John Marshall Butler.

[From the Baltimore Sun]

JOHN MARSHALL BUTLER

John Marshall Butler's record as a United States senator is forever colored by what happened before he took office. The 1950 campaign in which he unseated Millard E. Tydings was a low point in Maryland political history. A Senate subcommittee subsequently concluded that Mr. Butler engaged in a "front-street" campaign while his campaign apparatus took to the "back street." The subcommittee called the campaign's tactics, including a faked photograph of Mr. Tydings and a Communist leader, "destructive of fundamental American principles," yet found that some of what occurred did so without the Senator's knowledge.

It would be unfair to Mr. Butler if that regrettable campaign obscured his broader record. He was a conservative, blunt-spoken Republican whose consistent principles were never in doubt. His lawyerly conservatism was the type that allowed him to support a voting rights act because he believed the Constitution guaranteed everyone the right to vote, yet oppose a broader civil rights act because he believed it also gave everyone the right to discriminate. He worried about U.S. "integrity" in the world and that the nation was being "completely federalized."

But Senator Butler's real public service lay in protecting his constituents' interests, not in the great national and international issues of his day. He was a "service" senator, a man who paid close attention to the interests of his state, particularly its economic linchpin, the port of Baltimore, its shipyards, and the American merchant marine. Therein lies John Marshall Butler's record of service to Maryland.

MAN OF THE RIGHT

Maryland's sharp tilt toward registered Democrats tends to produce a breed of Republicans necessarily ambivalent about party labels—a McKeldin and an Alton, a Mathias and two Bealls. John Marshall Butler was not one of these. He was a Republican's Republican, dutiful party loyalist, unswerving soldier even of the GOP right wing, a lawyer who took the Constitution to mean precisely what it says. As spokesman for Maryland in the United States Senate, John Butler made bosoms swell with pride in private clubs and in boardrooms, in the banking world and stockbrokers' offices throughout the state. Here, at last, arose one of their own.

Historically, John Butler leaves a revealing picture. It is commonly argued that he first lucked into the United States Senate in 1950 on the strength of (a) a shamefully manufactured smear against Millard E. Tydings and (b) the first true Democratic blood drawn in the then-new era of Joseph McCarthy. That was correct. But what is not often noted is that, as a Senator, Mr. Tydings had dangerously neglected his Maryland political roots. Also that, in 1956, John Butler had secured his own constituency sufficiently, Democratic tilt or not, to face down a serious Democratic challenge from the always redoubtable George Mahoney. He won that one on his own. Many Marylanders then showed a taste for the outright right, and Senator Butler touched a responsive nerve.

Personally, not even liberals who knew John Butler could bring themselves to dislike him. His opinions were rigidly orthodox, his creativity limited: this newspaper frequently fought him. What he could also demonstrate, however, was a warm human touch and a personal straightforwardness which caught and held the affection even of those profoundly in disagreement. For John Butler was transparently a man of principle, a man who said what he believed, a man unswayed by popular winds. Winning politics and flinty honesty do not often go together. John Butler managed both.

IN DEFENSE OF APPROPRIATION RIDERS

The SPEAKER pro tempore (Mr. ROSTENKOWSKI). Under a previous order of the House, the gentleman from Min-

nesota (Mr. HAGEDORN) is recognized for 15 minutes.

Mr. HAGEDORN. Mr. Speaker, as we all know, the House of Representatives recently devoted considerable time and effort to determining what should be the proper role, if any, of the Federal Government in financing abortions. This debate extended over several months, during which final action was delayed on appropriations for the Departments of Labor, and Health, Education, and Welfare.

In reaction to the difficulties experienced in resolving so emotional and divisive an issue, some of our colleagues now propose that the rules by which this House operates be changed so that such contentious matters can be avoided in the future. In addition, the majority leadership is reported to be studying means of limiting riders to appropriation bills.

At issue is clause 2 of rule XXI, the second sentence of which prohibits provisions of, and amendments to general and supplemental appropriations bills which alter existing law, except germane amendments which would be certain to reduce Federal expenditures. This exception, popularly known as the "Holman rule," was first included in the House rules more than a century ago and has been in consecutive force for more than 60 years.

Until 1837, the separation of authorizations from appropriations had been an informal custom. Increasingly, however, Members of the House had seen bills delayed because of the practice of including matters of legislation in appropriations bills. These legislative clauses were being rejected repeatedly by the other body or by the President, thus stalling appropriations. In response, the House passed the first part of the first sentence of the present clause 2 which reads—

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law.

Thus, the practice was eliminated altogether.

The House was forced to reconsider the rule the very next year, however. In 1838, during consideration of the civil and diplomatic appropriation bill, the chairman of the Committee of the Whole was forced to rule out of order, because of the newly passed rule, an amendment concerning the salaries of customs officials, and refurnishment of the White House. As a result, the House was unable to provide for the continuation of public works, and for the carrying-on of the departments of the Government (in this case, the salaries of Government officials in those departments).

The next day, the House amended the rule to remedy this oversight. The first sentence of clause 2 was changed to allow for unauthorized appropriations—

In continuation of appropriations for such public works and objects as are already in progress and for the contingencies for carrying on the several departments of Government.

Today, this has been modified to read—

In continuation of appropriations for such public works and objects as are already in progress.

With this amendment, the rule remained in operation for 38 years, until 1876, when the House decided to attend to another problem that had become an unfortunate custom under the rule. The rule had been construed by the Chair to permit increases of salaries, but not decreases, hindering House efforts to control Federal spending. In defense of his amendment to rule XXI, Representative Holman stated on the floor of the House—

Now, it is very clear that this vast increase of expenditures during the last 12 years has been effected by means of appropriation bills under the operation of the Rules of the House . . . During the last 4 years, I have felt very much embarrassed by the fact that here on floor amendments increasing salaries must necessarily under the rule be declared in order, while any amendments to reduce salaries would be ruled out . . . The only effect of the propositions now submitted is that we shall be able to retrench expenditures on an appropriation bill.

With the adoption of the Holman language, the rule has remained the same since 1876, although there has been tinkering. The "Holman rule" was dropped altogether from the 54th to 61st Congresses (1895–1911), but readopted after a comprehensive review of the Rules of the House in 1910–11. An equally conprehensive review of the rules in 1946 in preparation for the Legislative Reorganization Act of that year left the rules unchanged.

The present rule thus is the product of nearly 150 years of legislative experience.

Over the years, rule XXI has also been interpreted by a long succession of presiding officers to permit amendments to appropriation bills which do not make affirmative changes in existing law, but which do impose certain types of "limitations" on how appropriations may be expended by the executive branch. An extensive, and admittedly complex body of precedents has evolved to insure that such limitation amendments permit the will of the house to prevail, without undermining the dual system of authorization and appropriation by which Congress has traditionally exercised its power of the purse.

These limitation amendments are premised on the right of the House not to appropriate. The power of limitation is so obvious that it is not even mentioned in the rules of the House. It does not involve changes in the law so much as it involves restrictions on the use of funds.

Now it is proposed that these rules be discarded. The sponsors of legislation (such as H. Res. 1007 and H. Res. 1035) urge that we strike the Holman rule, and that we prohibit limitation provisions and amendments. These resolutions would contain the proviso that germane retrenchment amendments changing existing law would be in order only if offered at the direction of the authorizing committee with appropriate jurisdiction. Virtually the only amendments, however, that individual Members could offer on the floor to appropriations measures would be amendments either to increase or decrease amounts of money already in the bill in the form of express line items, or to include funds for authorized purposes or programs for which no provisions are made.

The "bias" of House rules in behalf of reduced Government spending would be replaced by a bias in behalf of increased spending.

Mr. Speaker, I believe that these proposals are fundamentally misguided in that they constitute a serious overreaction to the recent abortion controversy, and that they represent a continuation of an unfortunate trend to limit the ability of all Members to participate in the legislative decisions of the House.

Clearly, the impetus for changing rule XXI is the amendment to the Labor-HEW appropriations bill for fiscal year 1978 which prohibited these departments from using appropriated funds to finance abortions. This amendment was adopted by the House and reaffirmed on numerous occasions during a long and difficult conference with the Senate.

It is ironic, therefore, that the sponsors of these resolutions would strike from rule XXI a provision—the Holman rule—which was not involved in any way during the abortion controversy, and which has not been the source of any significant delay or difficulty during this Congress. The Holman rule has neither been controversial nor abused.

In "Deschler's Procedure" for the 94th Congress, there are only seven references to rulings arising under the Holman rule since 1959. The Hyde amendment controversy would have been raised whether or not there had been a Holman rule.

The burden of proof must rest with those who contend that the established procedures of the House are in need of change. No evidence has been offered that the Holman rule is detrimental to the legislative process in any respect. Nothing could be more consistent with the congressional power of the purse than the right of this body and its Members to eliminate wasteful expenditures. To advocate repeal of this rule is to ignore the wise advice of former OMB Director Bert Lance commenting on earlier reform legislation, "If it ain't broke, don't fix it."

It is apparent from the statements offered in support of resolutions such as House Resolution 1007 and House Resolution 1035 that they should be addressed exclusively to the wisdom of permitting limitation amendments to appropriation bills. This is the crux of the matter: Whether or not the opportunity to offer such amendments contributes to sound legislative policy and practice, not the Holman rule.

I contend that it would be a serious mistake for the House to accept restrictions on its freedom of action in the form of outlawing limitation amendments. Such amendments serve a valuable function in enabling the House to act in a timely fashion when time is of the essence, and even to act at all on matters which might otherwise never reach the floor for decision.

The premise underlying limitations, as noted earlier, is a simple one: If the

House may appropriate, it may also choose not to appropriate. Although a purpose or program may be authorized by law, the House is under no obligation to fund it if we determine that it is no longer desirable or necessary.

No Member contests the right of the House to amend an appropriation bill by striking out an amount of money which the bill would appropriate for a specific program or purpose. Yet, limitation amendments have precisely that same goal—to prohibit appropriated funds from being spent for purposes or programs when they are not itemized, specifically or separately, in appropriations bills; or when their costs to the Federal Government cannot be predicted with precision, as in the case of Federal payments for abortions under medicaid.

If appropriations bills were more detailed and precise than they are at present, many, if not most, limitation amendments could be offered instead as amendments to reduce or to strike specific itemized appropriations in the bills. There is no reason in logic or legislative practice to make the ability of the House to control Federal spending dependent on the specificity with which different appropriation measures happen to be drafted.

The argument of principle which is most often made against limitation amendments is that they inevitably do change existing law, however subtly or indirectly, and that consequently they violate the procedure of separating authorizations and appropriations. Thus, critics of limitation amendments contend that these should be offered solely through legislation by the appropriate authorizing committees. However, this argument is not as compelling as it might seem.

Even it is true that limitation amendments sometimes do have an incidental effect on existing laws and how these laws are administered, the same can be said for congressional decisions generally to fund programs and the administration of programs at less than their authorized levels. An amendment to cut an appropriation in half, or to remove it from a bill altogether certainly has as much effect on the interpretation and implementation of existing law as do most limitation amendments, but no one argues that it should be ruled out of order for this reason.

The simple fact is that program costs are a critical factor in determining the substantive content of public policy. All amendments impacting upon cost have legislative effects.

Moreover, the separation of authorization and appropriation decisions, no matter how desirable, is not so sacrosanct a principle that it should subordinate the obligation of the entire membership of the House to consider the merits of legislation in as precise a manner, and as expeditiously as possible. The contention that the separation of authorizing and appropriation legislation is a primary and fundamental principle of constitutional government is an exaggeration, and is disproved by the success of our Nation during its first half century, as well as by the experience of Great Britain—admittedly without a written constitution—and Canada which do not maintain this strict division.

As a practical matter, annual appropriations bills are often the only legislative vehicles that are available for making changes in the law, usually modest in scope and effect, that are necessitated by unanticipated developments, or by evidence that executive branch officials are misinterpreting the intent of Congress as expressed in authorizing statutes.

With respect to the Hyde amendment, for example, the fact is that medicaid abortions have never been expressly authorized by this body. Indeed, when the proposed prohibition on medicaid funds was first offered during the last term of Congress, many Members of this body were not even aware that abortions were being funded publicly. The decision to fund abortions was made entirely by HEW. In the absence of the opportunity to offer a limitation amendment to the Labor-HEW appropriation, there would have been no alternative means for Congress to express its opposition to HEW's policies of appropriating funds on its own.

Many programs and agencies are authorized for 3 to 5 years or longer, while others are not subject to periodic reauthorization at all. Given the number of major bills considered by each authorizing committee every year, it is not always possible for these committees to report, and for the House to consider, separate bills imposing the restrictions on executive branch action that are normally embodied in limitation amendments.

Perhaps most importantly, when limitation amendments have had a major effect on public policy—and, after all, these are the cases which have stimulated the current interest in "reform"—it is generally because the authorizing committees have failed to act. Limitation amendments on abortion and on American bombing in Indochina, for example, would have been unnecessary if the authorizing committees with jurisdiction had been prepared to bring these issues to the floor.

In such cases, it is disingenuous at best to contend that limitation amendments deprive the House of the expert judgment of its standing committees. It is only when these committees have failed to respond to the demand for participation in major policy decisions by other Members of Congress that limitation amendments have resulted. While granting that it would be preferable for the House to act on bills reported by authorizing committees, acting on limitation amendments is certainly better than not being able to act at all.

When limitation amendments are offered, there is usually adequate opportunity for the Members to listen to the objections of members of the authorizing committees, and to determine for themselves whether there is justification for considering the amendments, or whether further hearings and study are needed. When the House is convinced that legislative action is timely and necessary, it should not be hamstrung by the intransigence of a committee majority.

It should be remembered that congressional committees are creatures of this body as a whole, that they were created as a convenience for this body as a whole, and that their judgment is not invariably meant to substitute for the judgment of this body as a whole.

Particularly when we consider the disproportionate representation of special interests on certain committees, and the resultant lack of representativeness of these committees, we should remind ourselves of the proper relationship between Congress and its committees.

In the absence of rule XXI, Members would find themselves reduced to exculpatory laments directed at committee inaction, and recourse to the demonstrably ineffective discharge petition procedure. While some Members might prefer having to avoid certain divisive and emotional issues (a sentiment that also motivates some of the opposition to "legislative vetoes"), the rules of this body should not be modified for their protection. It is our responsibility to act when action is required, and limitation amendments help to insure that opportunity.

So long as the Federal Government involves itself in matters traditionally outside its purview, this body will be dealing in controversial issues.

Mr. Speaker, I believe that rule XXI as it now exists constitutes a reasonable and practical balance between two primary requirements of responsible lawmaking: That this body acts responsively and expeditously, yet at the same time thoughtfully and deliberately. The number and complexity of the precedents which have evolved in interpretation of this rule are evidence of a continuing effort to adjust this balance to meet changing situations and needs. It would be a profound mistake to jettison a century of evolutionary development and adjustment because of a handful of instances in which limitation amendments have presented the house with controversial issues which have not been easy to resolve.

It bears emphasizing that there are limitations to limitation amendments (see, e.g., Hinds and Cannon, IV, 3942–52; VII, 1655; 1676; IV, 3953–9, 3975; VII, 1443; IV, 3862–3; VII, 1675; IV, 3956). There are examples too numerous to mention in which proposed limitations have been ruled out of order because they would have effected affirmative changes in existing law.

There is no better example of the constraints on these amendments already in existence than the Hyde amendment itself which ironically is now offered in support of the desirability of abandoning the present rule.

The bill reported to the House originally by the Appropriations Committee contained a limitation on funds which was ruled out of order on the grounds that it imposed new duties and determinations on the executive branch. An amendment then offered by my distinguished friend and colleague from Illinois (Mr. HYDE) also fell to a similar point of order. Both of these amendments prohibited the use of funds in the bill for abortion except under certain limited conditions. The inclusion of these

exceptions made them unacceptable under rule XXI.

It was only under these parliamentary circumstances that my colleague (Mr. HYDE) offered his amendment prohibiting the use of funds "to pay for abortions or to promote or encourage abortions." Because this amendment was a limitation in the most restrictive sense of the term, it was not subject to a point of order, and it was this language that the House carried into conference with the Senate.

It is quite possible, and to my mind likely, that, had rule XXI been interpreted more liberally, different language would have been adopted from the start by the House, and the prolonged impasse with the Senate would have been largely avoided. Rather than demonstrating a need to prohibit limitations altogether, the history of the Hyde amendment suggests that the House might be well advised even to relax existing restrictions so that the true sentiment of the House could be expressed with greater precision.

As the following table suggests, limitation amendments have been offered by Members of both parties—and of all political beliefs:

TABLE I.—LIMITATION AMENDMENTS—DEMOCRATS VERSUS REPUBLICANS

Years	Total offered	Total adopted	Democrats offered	GOP offered	Democrats adopted	GOP adopted
1963–70	116	(28)33	(27)31	(73)85	(18)6	(82)27
1971–77	225	(39)87	(57)129	(33)96	(59)51	(41)36
1963–77	341	(35)120	(47)160	(53)181	(47)57	(53)63

Note: The figures in parentheses indicate the percentage that the number is of the total—i.e. 33 is 28 percent of 116.

If there are Members who are tempted to support a change in the rules because they disagree with the position of the House on abortion or busing, I hope that they will recall that it was also through adoption of a limitation amendment that the Congress ended all American combat activity in Indochina.

Nor should a fundamental and sweeping rule change be made to deal with a single issue. An interesting historical parallel can be drawn. In the first half of the 19th century, slavery provoked much the same sort of bitter debate as does abortion today. Glyndon G. Van Deusen, in his work "The Jacksonian Era," describes the situation in the House between the year 1824–40:

In his speech on Calhoun's resolution, Clay had remarked that the abolitionist movement was spreading, and that one reason for its spread was the arbitrary way in which anti-slavery petitions were being tabled by the Senate. This was a statement of fact, not only for the Senate but for the House, but southern control of Congress prevented any improvement in the situation. In December 1838, the problem of handling such petitions was again debated in the House of Representatives. A New Hampshire democrat presented a resolution directing that all anti-slavery petitions should, on their presentation, be laid on the table "without being debated, printed, or referred." The House passed this gag, divided chiefly along sectional lines. A year later (January, 1840), by a vote of 114 to 208, a resolution was adopted to the effect that anti-slavery petitions should not even be received by the House. Here again the vote was markedly sectional rather than partisan. In all, five successive gags were passed by the House during this controversy.

The failure of the Congress to deal deliberately with the issue of slavery during those years and later years would be resolved only by a civil war.

The rules of this body should not be made and unmade to suit the policy preferences as a transitory majority, despite occasional "inconvenient" results. Rule XXI has served the House well for many years and has been finely tuned and adjusted as circumstances have dictated. It should not be discarded spasmodically. The implications for the balance of power existing between the House and the Senate, between Congress and the executive, between Congress and the judiciary, and between individual Members of this body are too substantial and uncertain to justify this.

The partisan implications of the elimination of limitation amendments should also be of concern, and not simply to the minority. As observed by the Democratic study group in a recent special report—

A prohibition against riders would not mean that one favored by a majority of the the majority could not be considered. The rules committee would always be able to waive the prohibition and make a rider to an appropriation bill in order. Also, the Democratic caucus could instruct the rules committee to make a rider in order or instruct the authorizing committee to report legislation concerning the issue involved.

Either a change in rule XXI is justified or it is not: To suggest that it can be effectively turned on and off by a rules committee doing the bidding of a partisan majority is hardly a compelling argument in opposition to the rule.

One final observation: during the past few years, we have witnessed in the House an emerging trend toward limiting the opportunities for all members to participate freely and actively in shaping the legislation we enact. On more days than ever before, legislation is being considered and passed under suspension, and "modified" closed rules are increasingly more commonplace.

At the same time, (as illustrated by the following table), members have made growing use of limitation amendments to appropriation bills:

TABLE II.—APPROPRIATION AMENDMENTS OFFERED—1963–77

Year	Total amendments	Limitation amendments	Percent of total amendments	Other amendments
1977	107	44	41	63
1976	122	33	27	89
1975	106	34	32	72
1974	109	34	31	75
1973	99	31	31	68
1972	89	26	29	63
1971	83	23	28	60
1971–77	[1] 715	[2] 225	31	490
1970	51	13	25	38
1969	89	20	22	69
1968	75	20	27	55
1967	70	16	23	54

Footnotes at end of table.

TABLE II.—APPROPRIATION AMENDMENTS OFFERED—1963–77—Continued

Year	Total amendments	Limitation amendments	Percent of total amendments	Other amendments
1966	56	8	14	48
1965	26	11	42	15
1964	27	11	41	16
1963	47	17	36	24
1963–70	441	116	26	325
Total	1,156	341	29	815

[1] This represents 62 percent of all amendments offered to appropriations bills 1963–77.
[2] This represents 66 percent of all limitation amendments offered to appropriations bills 1963–77.

It is also noteworthy—as illustrated by the next table—that the percentage of these amendments agreed to by the House has increased over the years:

TABLE III.—APPROPRIATION AMENDMENTS AGREED TO, 1963–77

Year	Total amendments	Limitation amendments	Other amendments
1977	50(54 of 107)	55(24 of 44)	48(30 of 63).
1976	56(68 of 122)	39(13 of 33)	62(55 of 89).
1975	49(52 of 106)	35(12 of 34)	56(40 of 72).
1974	49(53 of 109)	44(15 of 34)	52(39 of 75).
1973	31(31 of 99)	39(12 of 31)	28(19 of 68).
1972	17(15 of 89)	32(5 of 26)	16(10 of 63).
1971	41(34 of 83)	30(7 of 23)	45(27 of 60).
1971–77	43(307 of 715)	39(87 of 225)	45(220 of 490).
1970	22(11 of 51)	8(1 of 13)	26(10 of 38).
1969	30(27 of 89)	50(10 of 20)	25(17 of 69).
1968	32(24 of 75)	35(7 of 20)	31(17 of 55).
1967	21(15 of 70)	25(4 of 16)	20(11 of 54).
1966	18(10 of 56)	12(1 of 8)	19(9 of 48).
1965	35(9 of 26)	9(1 of 11)	53(8 of 15).
1964	32(9 of 27)	18(2 of 11)	44(7 of 16).
1963	32(15 of 47)	41(7 of 17)	33(8 of 24).
1963–70	27(120 of 441)	28(33 of 116)	27(87 of 325).
Total	37(427 of 1,156)	35(120 of 341)	38(307 of 815).

Source: Democratic study group special report, Feb. 14, 1978.

Rather than striking at the symptoms of what might someday pose a problem for the House, and limiting opportunities for legislative participation offered to Members under rule XXI, I believe that the integrity of the congressional process could be promoted far better by analyzing the reasons why so many Members increasingly have felt the need for recourse to appropriation riders.

REINTRODUCTION OF THE RURAL COMMUNITY DEVELOPMENT ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. GRASSLEY) is recognized for 5 minutes.

Mr. GRASSLEY. Mr. Speaker, today, I am pleased to reintroduce with 38 cosponsors the Rural Community Development Act, first introduced by myself and Mr. NOLAN in November of last year. This legislation is a response to the frustration expressed by small rural communities all over the country who have concluded, as have the 38 now cosponsoring this measure, that rural America is getting a raw deal in Washington.

In the Nation's housing programs, in

community development, in revenue sharing and a host of other Federal endeavors, smaller rural communities receive less than their fair share of Federal dollars, and more than their fair share of application and paperwork requirements. The philosophy of our Federal agencies and, I am afraid, all too many Members of this Chamber is to design programs for urban communities, which have multiple resources to apply for and administer Federal funds and to deal with Federal paperwork requirements, and to let rural communities fit themselves into these requirements as best they can.

The attitude in HUD, certainly is that, so far as the community development program goes, communities of under 50,000 should be glad they have a reservation of 20 percent of block grant expenditures. The unfortunate fact is that, if these funds were distributed according to criteria established by HUD for need, these communities would receive a third of overall expenditures.

I suppose, too, that smaller rural communities should be thankful that Secretary Harris, who is chairing a task force that has spent a year developing a national policy for urban areas, appointed a task force to take a look at how HUD might improve its administration of programs in rural areas, and gave it a meager 7 weeks to file its report. This deadline was extended, when HUD realized that the special problems of rural areas could not be compacted into a 7-week study.

In the meantime, smaller rural communities are confronted with small city regulations, and action grant regulations which clearly impose stiffer eligibility requirements on these communities than on large cities. Only a lawsuit convinced HUD not to exclude communities of under 2,500 from its small cities comprehensive program. These communities are still ineligible for funding under the action grant program, despite the intent of my amendment to the Housing and Community Development Act of 1977, to provide assistance to all smaller communities through a 25-percent allocation for those under 50,000 in population. This amendment, of course, HUD was adamantly opposed to.

I have spoken with a number of groups who express the reservation that if a rural community development program is established, these communities will no longer benefit from the concentrated lobbying efforts of big city representatives whose successes boost funding for all small communities, due to the 20-percent set-aside. I personally cannot agree with this assessment of the situation: When smaller communities should be getting 34 percent of block grant funds, when regulations are consistently promulgated which can only frustrate the efforts of smaller communities to obtain block grant funding, when the representation of rural areas on the Housing and Community Development Subcommittee, an urban-oriented subcommittee consists of just a handful of members, I think it is time that rural areas no longer remain dependent on the good will of urban-oriented legislators. Unfortunately, rural areas have gained little from this dependency.

That there are now 38 cosponsors of the Rural Community Development Act, from both parties, from all sections of the country, and of both a liberal and conservative philosophy that rural communities are demanding programs tailored to their particular problems and needs and want these programs now.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. McKINNEY) is recognized for 5 minutes.

● Mr. McKINNEY. Mr. Speaker, because I thought I would be back before the first vote on suspension business, I was downtown discussing the proposed District of Columbia reciprocal nonresident income tax on local television when the vote on H.R. 11274 was taken. Had I been here, I would have voted "no" on ordering the second to consider the Middle-Income Student Assistance Act.

I am pleased to join my colleagues in successfully defeating the motion because I believe that alternatives to the present Federal student aid program should be discussed. With more than half the Members of both Chambers supporting some form of tax credit legislation, and in light of House passage of the Frenzel amendment to the budget resolution providing $175 million for a limited credit plan, I think suspension of normal House procedures inappropriate and a denial of the proper airing these widely supported proposals deserve. I must stress that in casting this vote, I express no opposition to increased student aid. But in good conscience, I must preserve my right, and that of the House of Representatives to debate and decide what form that augmented student assistance will take.●

MIDDLE-INCOME STUDENT ASSISTANCE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRENZEL) is recognized for 30 minutes.

● Mr. FRENZEL. Mr. Speaker, today the House defeated an attempt to suspend the rules to pass H.R. 11274. The defeat of the second of was the first in at least a couple of decades, and was wholly justified.

The following statement is one prepared for floor delivery had there been any debate:

I rise in strong opposition to the motion to suspend the rules and pass H.R. 11274, the Middle-Income Student Assistance Act. I do not ask a vote against the substance of the bill. It is the procedure which must be defeated.

The leadership, today, is asking the Members of this body to suspend the rules and support a bill that authorizes the expenditure of $1.5 billion—a bill that makes substantial changes in the substance of basic education opportunity grants and the guaranteed student loan program. H.R. 11274 is a major education bill of overriding importance.

It is unconscionable to allow this bill to be ramrodded through the House under a gag rule that allows only the most perfunctory review by the Members before they are asked to cast their votes. A bill of this magnitude demands to be considered under the proper procedures that allow Members the right to propose amendments, or to be debated under the 5-minute rule.

The real reason for justifying this suspension is that the leadership does not trust its own Rules Committee to act responsibly. H.R. 11274 is still under consideration by the Rules Committee. Just last Thursday, the Rules Committee was considering my request to adopt a rule making in order a tuition tax credit amendment. The Rules Committee is scheduled to resume debate on Tuesday, March 21, 1978. The amendment being considered is the very bill which was passed by the Senate Finance Committee on a vote of 14 to 1 and shares the sponsorship of the majority of our Senate colleagues. Sidestepping the Rules Committee and avoiding further committee consideration of my amendment is a clear indication that the leadership is deathly afraid to bring tuition tax credits to the House floor.

Bringing this bill up under suspension is yet the latest in a long list of maneuvers to block House floor debate on tuition tax credits. Shortly after President Carter introduced his fiscal year 1979 budget on January 21, 1978, Secretary Califano, in derisively describing tuition tax credits, said:

> We cannot afford poverty programs for people who are not poor.

By sharp contrast on February 9, the administration proposed the Middle Income Student Assistance Act. In his testimony before education committees, Secretary Califano stated,

> President Carter is committed to increasing student financial aid for middle income families with children in college.

As originally proposed by the administration, the Middle Income Student Assistance Act was an admitted attempt to head off tuition tax credits. In a confidential memo—entitled "alternatives to Tuition Tax Credit Proposals"—Secretary Califano urged the President "* * * to propose an increase in existing student aid programs to counter congressional proposals for tuition tax credits advanced by Senator ROTH and by Senators PACKWOOD and MOYNIHAN." Continuing, he said,

> *We must move quickly if we are to seize the initiative on this very hot issue.* (Italic included in original text.)

The administration and the leadership have continued in their attempt to grasp the initiative by successfully bottling up tuition tax credit proposals in the Ways and Means Committee—where it is still on dead center in spite of 5 full days of public hearings. Today's motion to suspend the rules is the result of a hastily called White House meeting last Friday in a desperate bid to avoid the

possibility of favorable action by the Rules Committee—allowing tuition tax credits to be offered on the House floor as an amendment to H.R. 11274.

The administration did not even take the weekend off on this issue. On Saturday at the request of Secretary Califano, Attorney General Bell "coincidently" released a statement with the clear political intent to raise questions and prejudge the constitutionality of tuition tax credits. The opinions expressed in the statement are directly opposite of the opinions expressed by several constitutional experts who testified before the Ways and Means Committee. The Supreme Court is the proper body to decide this question.

The leadership and the administration are clearly attempting to thwart the will of the majority of the House of Representatives. Providing for tuition tax relief to students and parents at all educational levels has received considerable bipartisan support. In the House, over 170 bills have been introduced on this subject with over 250 individual Members sponsoring or cosponsoring some form of tuition tax relief.

Tuition tax credits are not new to Congress. The Senate has passed such legislation in four out of the past five Congresses. The House, however, was provided with the first opportunity to vote on education tax credits just this past September. The House strongly supported Mr. COUGHLIN's amendment to the fiscal year 1978 second concurrent budget resolution to insure the availability of $175 million for higher education tax credits. This vote demonstrated a strong—311 to 76—bipartisan support for tuition tax relief.

The members of the Education and Labor Committee and the Ways and Means Committee have demonstrated their own support for tuition tax credits. One-third of the Ways and Means members have shown their support through sponsorship of a tax treatment approach for tuition relief. A majority of the members of the Education and Labor Committee have signed supplemental views on H.R. 11274 indicating their support for both tax credits and increased student aid. Further, they hope that Congress will find a way to merge these two approaches.

I applaud the administration for recognizing that a definite need exists to assist middle-income families with education costs. Tuition costs are skyrocketing. The College Entrance Examination Board found that over the past 5 years, the average tuition and fees at private 4-year institutions rose by 54 percent, at public 4-year institutions by 57 percent, at private 2-year institutions by 52 percent, and at public 2-year institutions by 130 percent.

Unfortunately, the administration's bill overlooks the plight of low- and middle-income families who have children in nonpublic elementary and secondary schools—the very group to which candidate Carter made a firm commitment in 1976. Private schools primarily educate lower- and middle-income students. In fact, 51.4 percent of children attending private elementary and secondary schools come from families with incomes below $15,000. These lower- and middle-income families need help if private education is going to continue to be accessible to their children.

Private elementary and secondary schools play a very useful role in educating our children. In cities like Milwaukee, Chicago, New Orleans, New York, Boston, and San Francisco, private schools educate approximately one-fourth of all elementary and secondary students. In Cleveland and Philadelphia, 30 percent of students are educated in private schools.

Many low- and middle-income parents whose children attend nonpublic schools bear a very heavy financial burden. The cost of nonpublic elementary and secondary education has increased substantially in recent years, and it is expected that this increase will continue. At the same time, the cost of public schools also is rising substantially, and taxes keep increasing to meet these costs. As a result, nonpublic school parents must pay for the increased costs of both public and nonpublic schools, even though they relieve the public schools of the cost of educating their children. This financial burden is an important factor in accounting for the declining enrollment and the closing of nonpublic schools. In 1984, the U.S. National Center for Education Statistics projects that 4.2 million students will attend nonpublic elementary and secondary schools—a drop of 2.1 million students since 1965. The closing of many nonpublic schools would increase taxes significantly. The President's Commission on School Finance estimated that, if many nonpublic schools closed, public school's capital costs would increase from $4.7 to $10 billion (Schools, People, and Money, p. 55, 1972).

Some concern has been raised that tuition tax credits might deepen the problem of racial segregation in private elementary and secondary schools by providing aid for students to attend schools that discriminate. To prohibit this and to provide a clear incentive for integration in our private institutions, my amendment provides tax credits only for attendance at schools that are tax-exempt under section 501(c)(3) of the Internal Revenue Code. The courts have held that such institutions cannot have a discriminatory policy with regard to race and still maintain their tax-exempt status.

The Senate Finance Committee passed bill, which I have asked the Rules Committee to make in order as an amendment to H.R. 11274, is estimated to benefit more than 16 million students. According to the Joint Committee on Taxation, 85 percent of the total benefits will accrue to families with adjusted gross incomes below $30,000. Approximately 75 percent of the benefit from this amendment will accrue to postsecondary students and their families, while about 25 percent will accrue to those in elementary and secondary schools.

Before we make a final judgment on this issue, we must consider the political realities. It seems inevitable that the Senate will pass tuition tax credits and it may also be inevitable that the administration's Middle Income Student Assistance Act will also be passed, but without coordination. By coupling tuition tax credits with the administration's bill, the conference committees will at least be given an opportunity to coordinate the two.

Finally, if the House is to have the opportunity to work its will on tuition tax relief measures, it is vitally important that the Members be permitted to address these matters in conjunction with the administration's Middle-Income Student Assistance Act. I strongly urge a "no" vote on the motion to suspend the rules so that H.R. 11274 will be considered under normal House rules procedures as originally scheduled for this Wednesday. The high cost and substantial changes contained in this bill demand careful scrutiny and the opportunity to offer amendments, to finally arrive at an education assistance package that reflects the will of the majority of the House of Representatives.●

THE NEED FOR HUMPHREY–HAWKINS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 15 minutes.

● Mr. WHALEN. Mr. Speaker, last week the House passed H.R. 50, the Full Employment and Balanced Growth Act. In taking up this legislation, Congress faced a most fundamental issue: what is the role of the Federal Government in putting people to work?

The Full Employment Act of 1946 holds the Government responsible for fighting unemployment. No one can deny that the jobless rate is directly or indirectly affected by a plethora of decisions formulated by the Congress, the President, and the Federal Reserve Board.

It also is clear that these three institutions have not always used effectively their power to put people to work. In recent years we have seen the worst unemployment since the Great Depression; indeed, the jobless rate has not fallen below 5 percent since 1973. During this period, our economic policymaking too often has been one of fits and starts, often without consideration of long-term consequences. Yet our recent economic troubles have not led to any change in our ways of making economic policy. Our approach has been of cautiously bailing out the economy instead of plugging the leaks.

The resulting unemployment can only be termed catastrophic. In the last quarter century more than $5.2 trillion worth of GNP—in 1977 dollars—and 72 million man-years have been lost due to this Nation's failure to achieve full employment; the figures for 1977 alone were $357.8 billion and 5.3 million man-years. The potential for future loss is also grim: if the unemployment rate is 5.5 percent instead of 2 percent over the next quarter century, the U.S. economy would lose $6 trillion in GNP.

No so easily calculated is the terrible toll that unemployment inflicts on people's daily lives. Studies point to connections between unemployment and family tensions, alcoholism, infant mortality, heart disease, mental illness, and crime. Most chilling is a study by Dr. Harvey Brenner of Johns Hopkins University who found that a 1.4-percent rise in unemployment in 1970 was responsible for 51,570 deaths.

While our economy grew during 1977, over 6 million people were still without work. If dependents are included, approximately 60 million people suffered from the pain of unemployment last year. Nor should we forget that unemployment strikes those hardest who have the least: minorities, the poor, unskilled workers, women, youth, and the elderly. To cite just one example, in 1977 the jobless rate for whites fell from 7 percent to 6.5 percent; for blacks, it stayed at 13 percent. For black young people between the ages of 16 and 21, the ranks of the jobless has increased by over 100,000 in the last 2 years; today, more than 1 out of every 3 is without a job.

Our unemployment problem is so acute that countries we criticize for violations of human rights point to the plight of our jobless as evidence of our callousness. Without bold action, we risk creating, in the words of the late Hubert Humphrey, a "permanent underclass of unemployed Americans." In short, unemployment remains a critical national problem, one that demands prompt and effective action.

The Humphrey-Hawkins Full Employment Act is an economic policy bill which consolidates Government efforts to put people to work by amending a law already on the books: the Employment Act of 1946. When President Truman signed that act into law, he noted that the bill committed the Federal Government to work for "maximum employment" and declared that it represented "not the end of the road, but the beginning." Humphrey-Hawkins continues the journey by establishing economic policymaking procedures that go further toward putting people to work. It recognizes that there is no simple path to full employment through a single bill or program. Instead, the Full Employment Act proposes a general economic policy framework with a package to give that new structure direction and meaning.

The amendments that were added to the Humphrey-Hawkins bill last week did little to change the major provisions of the act, which fall into three categories. The first consists of policy declarations. Most importantly H.R. 50 declares it to be Federal policy to use all practicable means, consistent with other essential national goals, to promote full employment, balanced growth, and price stability. It further states "the right of all Americans able, willing, and seeking work to useful paid employment at fair rates of compensation" and declares inflation to be "a major national problem requiring improved Federal policies."

New procedures for economic policymaking comprise the second category. The President is required to submit an annual economic report giving numerical targets for employment, unemployment, production, real income, price stability and productivity. The legislation sets an interim goal of 4 percent unemployment for all workers—aged 16 and older—and 3 percent unemployment among adults—aged 20 and over—to be achieved within 5 years of enactment. It permits the President, with the approval of Congress, to change unemployment goals or timetables if, at least 3 years after enactment, any of them appear unreasonable. The President must also submit a Federal budget compatible with the yearly targets. The bill would compel the Federal Reserve Board to explain how its monetary policies and plans will help achieve these goals.

The third component of H.R. 50 outlines the programs that the President can recommend in order to achieve full employment. It requires the President to develop, where appropriate, supplemental employment programs to reach the established targets. Among the tools recommended are public works programs, public service jobs, antirecession aids to States and cities, programs for depressed areas, training, counseling, and special youth projects. If other efforts fail to achieve the unemployment targets, the Federal Government would be required to create additional public service jobs through new or existing programs. H.R. 50 also assures that jobs made available through the programs set up by the bill would pay at least the minimum wage and no less than the amount earned by others doing the same work for the same employer.

I opposed previous versions of the Humphrey-Hawkins bill because I felt that it did not properly address the other major economic concern in our country: inflation. However, in addition to the provisions already mentioned, the bill includes a number of anti-inflation safeguards. H.R. 50, besides providing for more coordinated use of fiscal and monetary policies, would give the President the authority to recommend structural policies to limit inflation. While the bill stipulates that "reasonable price stability" should not be sought through any weakening of the goals and timetable relating to the reduction of unemployment," it does state that the means chosen to achieve reasonable price stability be "mutally reinforcing" so as not to sacrifice one goal for the sake of achieving the other. This bill does not authorize expensive new programs nor would it increase the budget automatically. Public service jobs are called for only as a last resort, and then only for those "which Congress authorizes and provides funds for."

Mr. Speaker, I believe that our Nation must put itself back on the road toward full employment. There is, in the words of Hubert Humphrey, a critical need "for new policymaking machinery to insure that all Americans share in the prosperity which has been synonymous with America since its founding." I voted for the Full Employment and Balanced Growth Act because I believe it establishes an effective framework for boldly confronting our unemployment dilemma.●

ENERGY POLICY FOR THE FUTURE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maine (Mr. COHEN) is recognized for 20 minutes.

Mr. COHEN. Mr. Speaker, there is no greater problem facing America today than our current energy situation. The viability of our economy and the very survival of our Nation depend upon our setting a rational, straightforward energy policy.

Nearly 4½ years have now lapsed since the Arab oil embargo against the United States. This dramatic event made explicit a critical national problem which had been simmering for years, largely out of the public eye.

Since the embargo, we have all undergone a crash course which has stressed the severe penalties inherent in the widening gap between energy consumption in America and domestic production. Let us take stock of what we have learned:

First, and perhaps most importantly, we have learned that an unbalanced energy budget leaves us politically and economically exposed—hostage to policy decisions and arbitrary judgments made external to our borders and contrary to our best interests;

We have learned that despite our national wealth in energy supplies, the transition to alternatives to oil and gas will be neither easy nor inexpensive;

We have learned that price stability will be achieved only when we have an effective energy policy in place, and not a moment sooner;

We have learned that the problem will not go away if left unattended. It will only get worse—making the eventual solution even more painful;

We have learned that we cannot "go it alone" on energy, for we live in an interdependent world in which our actions profoundly affect the economies and security of our allies, and vice versa;

We have learned that the energy crisis is not just an abstract playground for specialists, and that every citizen of the Nation must contribute to its solution;

We have learned that the environmental costs of profligate energy use are severe and, in many instances, irreversible;

Last, we have learned that the future strength and vitality of our society will be determined by the energy policies we adopt today.

By any objective assessment, the United States still lacks a clearly enunciated and cohesive national energy strategy. Today, we remain a divided and uncertain Nation on this vital issue, seemingly unwilling to abandon the status quo and confront reality. With each passing day, the costs of indecision mount, eroding away our freedom and independence both at home and abroad.

In 1973—the year of the embargo—we imported just over a third of the oil we consumed. Today, that figure has risen to nearly 50 percent. The dollar drain for imported oil has soared from $8.4 billion

in 1973 to over $45 billion last year—or more than $200 per American. That is $45 billion that did not stay at home to create jobs for the unemployed, stimulate alternative energy development in our own country, and improve the standard of living for every American.

Additionally, the dollar is severely weakened in international markets because of our inability to bring energy supply and demand into balance. This jeopardizes our economy, causes unemployment, and raises prices. OPEC prices are set in dollars, so as the value of the dollar declines in world markets, the oil producing nations have a greater incentive to increase their prices.

Clearly, we are courting disaster. During the embargo, a drop of only 10 percent of our imported oil, lasting less than 6 months, cost Americans half a million jobs and over $10 billion of national output. The massive price increases of 1973 added at least 5 percentage points to the price index, contributing to our worst inflation since World War II. It set the stage for a serious recession from which we are only now recovering.

If Arab oil producer nations today completely cut off crude oil exports to the United States, our Nation would experience a loss of about 3.7 million barrels of oil a day. This would represent nearly 57 percent of our crude oil imports and some 21 percent of total domestic petroleum consumption. It is obvious that such a cutoff would have a staggering impact on the Nation's well-being and threaten our national security.

It is appropriate to ask why it has proven so difficult for our Nation to face up to this critical problem in light of its profound effect on our economy and national security?

Why have we largely ignored the dire warning of three Presidents who have sought to mobilize an effective public response to the energy crisis?

To a considerable extent, the answer lies in the realization that energy is an exceeding complex problem of unprecedented dimensions. No single policy, program, or prescription can alone ameliorate our difficulties in this area. There are no quick fixes, no painless alternatives, no magical solutions. What is involved is nothing less than a wrenching change in all our pattern of energy use, both in the kinds of fuels to be used and the levels at which they must be consumed.

For more than half a century, during which U.S. industries grew at remarkable rates, per capita incomes rose—unevenly but ever up—as the entire economic base became increasingly dependent on a depletable and rapidly diminishing resource, petroleum. Domestic production of crude oil peaked in 1970. Even with the Alaskan supplies—which will aid us over the next 10 years—U.S. domestic oil production last year was 16 percent below the 1970 level. Natural gas production was 22 percent below 1970 levels.

Virtually the entire transportation system, three-quarters of industrial heating requirements, half of the electric power generation, and 80 percent of all residential and commercial energy use in the United States depends on oil and natural gas. A country which envisions for its citizens and their children a great and increasingly affluent future has allowed itself in nearly every facet of its life to be locked into finite energy supply which is now running out.

As a consequence, the task now facing Congress and the country as a whole is both vast in scope and historically decisive in consequences—reshaping transportation modes, retooling and redesigning industrial plants and homes, choosing new objectives to guide the allocation of capital resources, in short, overturning the whole spectrum of expectations on energy price, supply, and use. To determine new choices when the basis for choosing has been so radically altered is no easy task.

But choose we must—and soon. Four years of debate on the problem is enough. The time is at hand to brush away the webs of uncertainty and division that have resulted in near national paralysis on this critical issue. It is time to halt the search for scapegoats and accept our share of the responsibility for the problem. It is time to recognize that we can recapture our energy destiny if we are willing, individually and collectively, to place the national well-being above our own narrow parochial interests.

As former Secretary of State Kissinger observed in a 1975 speech on energy, "History has given us a great opportunity disguised as a crisis." Our task is to seize the opportunity while it is still available, and mold a comprehensive, farsighted energy policy for the United States.

What are the essential elements of an effective national energy strategy? What goals and objectives should we set for ourselves? Where should our priorities lie in the energy area?

In order to promote steady economic growth with full employment and low inflation, our first priority must be energy conservation Something like a third of the energy we consume is wasted—it produces absolutely nothing. That means we, as a nation, burn the equivalent of over 12 million barrels of oil a day, which is more than we import, and receive nothing in return. It is apparent to anyone who has analyzed the energy problem that the largest, cheapest and cleanest source of new energy we can tap immediately is "conservation energy"—the energy produced by cutting waste.

"Conservation energy" is, of course, not free. But is a banner bargain in today's market. On the average, it costs $3 to $5 a barrel to save, compared to $14 a barrel or more required for new production. Only a fool would pass up such a bargain. Certainly, not the thrifty person from Maine.

Additionally, using our energy more efficiently will help limit environmental damage that results from oil spills, strip mining and disposing of large quantities of nuclear waste. It can also reduce our vulnerability in foreign affairs and improve our declining balance of payments position. Finally, a strong energy conservation program would save beleagured consumers billions of dollars each year.

The opportunities for saving energy are enormous, and can be found in every consuming sector of the U.S. economy—in agriculture, in transportation, in industry, in residences, in schools and hospitals, and in commerce. Let me illustrate by citing a few examples.

Two years ago, the American Society of Heating, Refrigeration, and Air-Conditioning Engineers (ASHRAE) developed recommended standards based on energy efficiency using current technology systems and materials. They are now reflected in a model building code which is available for adoption around the country.

Two significant aspects of the ASHRAE standards, and the model code based on it, are the reduction in energy requirements and the investment cost to achieve these savings.

An Arthur D. Little study of the impact of the new ASHRAE building standards for new construction found that when compared to typical conventional buildings, those built to the new standard would save energy as follows:

[In percent]

Single family residence	11.3
Low-rise apartment building	42.7
Office building	59.7
Retail store	40.1
School building	48.1

Adoption of the ASHRAE standards—applied only to new buildings—would save an estimated 500 million barrels of oil by 1990. To illustrate the magnitude of that savings, 500 million barrels is the amount of energy that can be produced by 120 thremal electric powerplants of 1,200 megawatt capacity, costing approximately $1 billion each. We would have to build one plant every 36 days to match these savings.

An educational facilities laboratories study of America's school buildings has found an energy waste of 30 percent—that's 1 percent of the Nation's entire school budget. Reclaiming this waste energy would save: $15 per pupil per year; $375 per classroom, or, $655 million—annually.

Finally, a recent study jointly funded by the Brookhaven National Laboratory, Harvard University and the Maine Office of energy resources found that if all housing in Maine were brought up to a weatherization level similar to that in newly constructed housing, the State could save 41 percent of residential energy consumption and almost 10 percent of total State energy consumption. Imagine what this savings would mean to consumers in Maine who have seen their energy bills triple since the beginning of the decade.

At the individual homeowner level, insulation may well provide a higher rate of return than any other investment available to the average citizen. Common stocks, corporate bonds, and savings accounts pay interest rates of 5–10 percent—often at some degree of risk. Home insulation may earn 20–40 percent in saved fuel costs at little or no risk. Moreover, investments in home insulation will raise property values.

Given the economic inability of many homeowners to make energy saving improvements to their residences, it seemed clear to me that the Federal Government must develop incentives to assist those in need. With this in mind, I introduced legislation back in November 1973 which would permit homeowners to take a tax credit for a percentage of amounts paid for insulation and other devices designed to improve the energy efficiency of individual residences. I am pleased that the omnibus energy bill now in conference contains a provision which, when enacted, will provide a maximum $400 tax credit for individuals who install insulation, caulking, weatherstripping, furnace replacement burners and other energy saving devices in their homes.

This important legislation also extends and expands a present program which provides grants to low-income families to make their homes weathertight. It also authorizes a program of conservation renovation grants for public and private schools, as well as hospitals.

Given the high cost of energy, conservation is clearly in the self-interest of every hardheaded businessman and every cost-conscious homeowner. It is, as others have observed, a classic example of how the national interest can be exactly consistent with self-interest. Conservation is not a new burden to be imposed on our pocketbooks (or lifestyles); it is the discipline and effort required to ease the burden of energy costs on the national economy and on individual families.

The second essential element of an effective national strategy is the development of new and alternative energy supplies. Conservation alone, as crucial as it is, simply cannot alone get the job done. If there is no supply, there is nothing to conserve.

It is a great irony that the United States currently relies most on the least plentiful domestic sources—oil and natural gas—and least on the most abundant resources, such as coal, wood, the winds, the tides, and the very sunshine itself. Maine is almost totally dependent on energy sources which are not native to the State. Only 12.3 percent of our energy requirements in Maine are supplied by two native sources, hydropower and wood.

We in New England are paying clearly for the lack of energy diversity in our region. According to the Department of Energy, in 1976, the price paid for major forms of energy was 26 percent higher in New England than in the United States as a whole. At 42 cents more per million Btu's, New England consumers paid about $1.4 billion more than if our energy prices were equivalent to the rest of the United States.

Without question, we in the United States are in the fortunate and unique position to remove the shackles of oil dependency. Few other nations are as richly endowed as we are in native energy resources. The Office of Technology Assessment recently estimated that about 300 billion barrels of discovered oil remain in the United States. However, conventional techniques of extraction can deliver only 10 percent of that oil economically. U.S. coal resources are estimated to be about 4 trillion tons, with currently recoverable reserves about 217 tons. That's enough coal to meet projected demand over 100 years into the future. We have the technical ability to extract oil from shale, to tap the wind and the Sun for energy, to convert agricultural, municipal and industrial solid waste to power. We have light water nuclear reactors which can be used to bridge the transition from a fossil-fuel based economy to one more heavily dependent on renewable energy resources.

In Passamaquoddy Bay, we have the best potential site for a tidal power project in the United States. Throughout Maine and the Nation, there are thousands of existing small dams which can be economically put to work, almost doubling U.S. hydroelectric capacity and slashing electric bills for many hard-pressed American consumers.

In Maine, there are nine sites, excluding Dickey-Lincoln, which have a combined capacity potential of 675 megawatts and 1.3 billion kilowatt hours of energy annually. At current prices, these sites have the potential to save Maine consumers tens of millions of dollars in energy costs each year.

Our great forests in Maine are another vast untapped source of energy for both home consumption and as fuel for powerplants. I recently met with Harold Young, professor of forest resources at the University of Maine and an acknowledged expert in biomass and nutrient studies. Dr. Young informed me that based on 19 years of research, he has found that by utilizing forest residuals, such as tops, small trees and stumproot systems, Maine could produce nearly 1,700 megawatts of power annually. If these figures are valid, it is approximately equivalent to the total installed electrical capacity in Maine, including new generating facilities which will be brought on line by the end of this year.

Consider another fact. If only 1 percent of our forest potential in Maine could be converted to methanol, it could satisfy 2 percent of our total energy demand by 1985. At 50 cents a gallon for No. 2 heating oil, the energy contribution of methanol would have a value of approximately $33.3 million annually in terms of replacement oil costs.

Notwithstanding the favorable supply picture which I have just painted, we would be wise to keep our optimism in check. For there are massive price, environmental and institutional barriers which must be overcome if these energy sources are to be developed. The recent labor difficulties in the coal industry should serve as a vivid reminder to all of us that our efforts to develop alternatives to oil and gas will frequently be buffeted by the crosswinds of unforeseen controversy.

Before I conclude, I would like to briefly address what is perhaps the core issue in the energy debate, namely, what is the proper role for Government in promoting greater conservation and alternative supply development.

That the Federal Government is massively involved in energy supply and demand decisions is an indisputable fact. The Department of Energy alone employs approximately 20,000 workers and has an annual budget exceeding $10 billion. At the State level, energy offices are increasingly asserting their presence in supply and conservation decisions.

It is the view of many that this growing dominance of Government has done more to impede than promote responsible policies to address our Nation's energy problems. To the degree that low regulated prices discourage conservation and the development of new energy sources, this assertion is valid.

Moreover, it is clear that excessive regulatory requirements have, in many instances, frustrated efforts to bring on line additional energy generating facilities.

The fact remains that, despite its inherent limitations, the Federal Government will bear a large measure of responsibility for America's energy future.

As a recent newspaper editorial observed, this is not an enviable task. If the President and the Congress push through all the severe and unwelcome measures needed to reduce oil imports and promote greater energy efficiency, maybe this country can avoid the dire consequences of a future embargo and OPEC's extortionist pricing policies. In this event, no Congressman or public official ever have prove that this insurance policy had been necessary. It is like taking a flu shot. You always remember the sore arm, but never the case of flu that you did not get. Nobody can count the people who did not die in the epidemic that did not happen. Nobody can reckon the cost of an oil shortage that wise public policy prevented.

Indeed, the task ahead is formidable. What we need is a basic readjustment of our way of life and thinking to conform to the stringent realities of our current energy situation.

For far too long, we have operated under the illusion that our mineral resources were infinite.

For far too long, we have embraced the notion that it is every person's inalienable right to consume as much as he wants for as long as he wants.

For far too long, we have fought against the limits of nature, rather than learning to live comfortably within them.

And, for far too long, we have failed to understand that "progress" and "growth" do not necessarily equal improvement in the quality of life.

It would be irrational too refuse to move off dead center on energy out of fear of what is on the other side of the line. "History has indeed given us a great opportunity in the guise of a crisis." Let us not squander this opportunity.

MIDDLE-INCOME STUDENT ASSISTANCE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BOB WILSON) is recognized for 5 minutes.

● Mr. BOB WILSON. Mr. Speaker I am generally supportive of measures to aid middle income students in their efforts to attain a higher level of education and

believe that H.R. 11274 contains elements which have much merit.

However, I do not feel that this legislation belongs on the suspension calendar today. Suspension of rules is a parliamentary device designed to expedite passage of noncontroversial measures to which amendments are not anticipated. It is my understanding, though, that several Members had planned to offer amendments of some substance to H.R. 11274. By switching the bill from regular House consideration on Wednesday to suspension today, we are being given no choice but either accepting or rejecting H.R. 11274, a choice I consider highly arbitrary. In consideration of H.R. 11274 under suspension of the regular rules of the House, we are being asked to make a decision on a matter of great importance without opportunity for any discussion or amendment.

I think it a disservice to the citizens of our country to legislate in this fashion and would therefore hope we would not order a second on this measure today so that it may be brought up again in the near future for proper consideration.●

THE CONNECTION BETWEEN UNEMPLOYMENT AND ENVIRONMENTAL CONCERNS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. APPLEGATE) is recognized for 5 minutes.

Mr. APPLEGATE. Mr. Speaker, I would like to bring to the attention of my colleagues in the House and to the general public of these United States, a very serious matter with which we are all becoming more familiar. The primary cause of our high unemployment is not necessarily large quantities of imports, even though they are a contributing factor, it is not the result of a slow economy where people do not have enough to spend; but rather, I believe a greater share of the fault lies with the U.S. Environmental Protection Agency and its overzealous, regulation making bureaucrats. It is this agency, created in part by this body, that is quickly becoming a rather large thorn in our side.

As the Representative of Ohio's 18th Congressional District, an area heavily reliant and renowned for steel and coal production, I am quick to see the effects of some of the environmental standards handed down by the EPA. If the current trend is not slowed to reasonableness, heavy industrial areas of our Nation, and my district in particular, are destined for economic ruin.

Let me say at this point, that neither I, the people and businesses of my district, nor any of us here today, are opposed to clean air and water. I believe we all recognize the necessity of these resources in order to maintain our physical health and well being. But, by the same token, the EPA must realize that our economic health and well being is also at stake.

In order to demonstrate the crippling effect that the imposed air and water standards have had on the upper Ohio Valley, I offer the case of Wheeling-Pittsburgh Steel. During calendar year 1977, this corporation, which is the ninth largest steel firm in America, lost nearly $25 million. They have spent nearly $120 million in attempting to comply with present standards; but yet, this is not enough. They must spend an additional $80 million to reach a point of full compliance with present law and must do so in the next 2 years. One need not be an accountant to realize that this is not feasible.

As each compliance date for different types of pollution control becomes a reality, Wheeling-Pittsburgh faces the likely possibility of heavy fines and penalties. This does not help their cause; it only adds to their problems. The money is simply not there.

This is not an isolated instance. North American Coal Co. has several mines in my district. Near the beginning of this month, North American announced the forthcoming closure of one of these mines, the Jensie Mine, in northwest Jefferson County, Ohio. According to those people involved with the decision, the mine was closed due to sulphur dioxide emission standards imposed on Cleveland Electric Illuminating in northeast Ohio. CEI was the sole buyer of the coal from Jensie mine.

What we are talking about here is nearly half a million tons of coal, and more importantly, nearly 250 jobs. If this were to be the only mine to shut down, it might be different, but I greatly fear it is only the tip of the iceberg. It will be very difficult for Ohio, which is the biggest producer and consumer of coal in the country, to help meet the coal supply requirements of the future as outlined by President Carter last year, if present trends continue.

Mr. Speaker, I am suggesting that a more practical approach be taken in the area of cleaning the environment and maintaining that quality. We must realize that the current economic trend must dictate how fast we progress in this area. We cannot continue to expect businesses to make the type of expenditures necessary to meet compliance standards if the capital is not there or if it means a definite loss of jobs. We must realize the importance of jobs in our country while, at the same time, retaining our sights on a clean environment.

INTERNATIONAL ECONOMIC POLICY SUBCOMMITTEE ANNOUNCES JAPAN TRADE HEARINGS IN WASHINGTON, D.C., AND OLYMPIA, WASH.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 10 minutes.

● Mr. BINGHAM. Mr. Speaker, on behalf of the Subcommittee on International Economic Policy and Trade, which I chair, I wish to announce two hearings on U.S. trade with Japan.

The first, a general overview of United States-Japan trade issues with particular reference to U.S. efforts to secure greater access to the Japanese market, will be held in Washington, D.C., on April 4. The second, a hearing on log exports to Japan, with specific reference to H.R. 7972, the Public Lands Timber Export Act introduced by Mr. BONKER, will be held in Olympia, Wash., on April 21.

Last year this Nation ran a trade deficit of $26.6 billion. A great deal of this imbalance is due to excessive oil imports and the absence of a national energy policy. But a significant part of the problem can also be attributed to lagging U.S. exports.

Three reasons for these lagging exports stand out. The first is insufficient demand for U.S. products abroad due to the failure of our customers to stimulate their economies as rapidly as we would like. The second is tariff and nontariff barriers to entry of our products erected by other countries. The third, in all candor, is a certain lack of aggressiveness and imagination on the part of our own businessmen in penetrating and capturing some foreign markets and, at least in some instances, inadequate export promotion activities by the U.S. Government.

These problems are brought out in stark relief with respect to our economic relations with one of our major trading partners, Japan, with which this country is running a substantial trade deficit. The overriding importance to our economy and foreign policy of United States-Japan trade relations has led Ambassador Strauss, the President's Special Representative for Trade Negotiations, to engage in comprehensive negotiations with the Japanese, both bilaterally and in the context of the Tokyo round of multilateral trade negotiations, designed to induce the Japanese to achieve higher rates of economic growth and to reduce or eliminate barriers to the entry of U.S. products. These negotiations have already resulted in one bilateral agreement in the nature of a statement of Japanese intentions.

One direct result of the bilateral negotiations has been the formation of a joint United States-Japan Trade Facilitation Committee, chaired at the United States and by Assistant Secretary of Commerce Frank Weil. The Committee is designed to promote U.S. trade missions to Japan and Japanese purchasing missions to the United States, to seek removal of Japanese trade barriers to U.S. products, and in other ways to seek to facilitate United States-Japan trade.

On April 4, the Subcommittee on International Economic Policy and Trade will hold an oversight hearing on United States-Japan trade negotiations and U.S. export promotion activities with respect to Japan. Mr. Allan W. Wolff, Deputy Special Representative for Trade Negotiations, will brief the subcommittee on the status of negotiations for obtaining increased access to the Japanese market for U.S. exports, on what this country hopes to accomplish through these negotiations, and on how we propose to accomplish those objectives. Hon. Frank A. Weil, Assistant Secretary of Commerce for Industry and Trade, will explain the activities, objectives, and prospects of the Trade Facilitation Committee. Mr. Robert D. Hormats, Deputy Assistant Secretary of State for Economic and Business Affairs, will place

our trade relations with Japan in an overall foreign policy context. The hearing will take place at 2 p.m. in room 2172 of the Rayburn House Office Building.

On April 21, the subcommittee will hold an all-day hearing in Olympia, Wash., on one aspect of the United State-Japan trade problem—log exports to Japan. Timber and timber products happen to be one of the commodities for which there seems to be great potential for increased export to Japan. We have an abundance of timber, while Japan's resources are limited and its needs great. The form in which we export timber and timber products, however, has a considerable impact upon the timber-supplying regions of this country, particularly the Pacific Northwest. While the Japanese have long been important customers for our timber, the volume of their imports has not come close to its potential, from our point of view. In the context of our current severe trade deficit with Japan, dissatisfactions from both the U.S. viewpoint and the Japanese viewpoint with our timber trade have become an important foreign policy issue.

The subcommittee has before it H.R. 7972, which would prohibit the export of unprocessed timber from public lands in the Western United States and the substitution of such timber for unprocessed timber from private lands which is exported or sold for export. At the same time, as a followup to the recent Strauss-Ushiba bilateral agreement, detailed discussions have been initiated with officials of the Japanese Government and lumber industry concerning how problems in this area might be solved, and a Japanese timber trade delegation is scheduled to visit the United States in the near future.

Testimony by a representative of the Office of the Special Trade Representative on the status of these detailed discussions of timber trade with Japan, which will hopefully result in improved access of processed lumber from the United States to the Japanese market, will be a major part of the subcommittee's April 21 hearing.

Any person wishing to present testimony at the April 21 hearing should submit a request to testify as soon as possible, and in no case later than April 7, to: Victor C. Johnson, staff associate, Subcommittee on International Economic Policy and Trade, room 707, House Office Building Annex No. 1, Washington, D.C. 20515, telephone (202) 225-3246. The subcommittee will hear as many witnesses as possible in the time available; others may submit written statements. Time for oral presentations will be strictly limited, with the understanding that a more detailed statement may be submitted in writing. Persons and organizations having a common position are urged to make every effort to designate one spokesman to represent them.

Each witness appearing on April 21 must arrange for six copies of his statement to arrive at the subcommittee office no later than April 17. A minimum of 50 additional copies must be submitted to the district office of Hon. DON BONKER, 209 Federal Building, Olympia, Wash., 98501, no later than April 19, for the use of the subcommittee and for distribution to the press and the public. Congressman BONKER's office will handle the forwarding of the six copies to the subcommittee, if witnesses so request and if the statements are submitted early enough.●

IT'S TIME FOR PUBLIC FINANCING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. KOSTMAYER) is recognized for 5 minutes.

● Mr. KOSTMAYER. Mr. Speaker, tomorrow the House is scheduled to consider H.R. 11315 the Federal Election Campaign Act and Amendments of 1978.

An amendment to be offered by our colleagues, Mr. FOLEY and Mr. CONABLE, will publicly finance all House races this year.

I strongly support the legislation even though it is unfortunately limited to general election campaigns only and not to primaries and even though it does not go nearly far enough.

My predecessor and my friend, the Hon. Edward G. Biester, Jr., discussed the urgent need for such legislation in yesterday's Philadelphia Inquirer.

I hope Members on his side of the aisle will be persuaded by his eloquent statement and will adopt the rule, the bill, and the amendment now that the majority has yielded on the issue of contributions by political parties.

Mr. Speaker, tomorrow could be the beginning of the end for the special financial interests who control the Congress.

If we act we can make this truly the people's House.

[From the Philadelphia Inquirer, Mar. 20, 1978]

IT'S TIME FOR PUBLIC FINANCING

(By Edward G. Biester)

The House of Representatives is about to consider partial public financing of congressional elections, a measure whose cleansing impact on our national political system cannot be over-estimated. It would be a reform, sweeping and wholesome in its effect on Congress; it dwarfs all other recent so-called reforms of that body.

Those of us who support public financing believe that America is greater than the sum of its special-interest parts; and that the decisions America makes on the great and troubling issues of the next quarter century must do more than simply resolve certain conflicting special interests in our society. Their solutions demand creativity and breadth of vision. That is one reason why public financing is so important. There are other reasons.

The concept of public financing is a natural extension of the concept of one-person/one-vote. If one-person/one vote is one valid definition of American democracy, it means that no one American should have any greater political clout than any other American with the President or other elected officials. Obviously any individual American can increase his or her political clout by activity on behalf of a political party or an individual candidate. That activity, however, is open to all and there is no financial threshold which inhibits it.

But some Americans can, by using their greater financial resources, meet the needs of candidates for political office and thereby achieve for themselves a substantially greater political clout than other individual American citizens. To the extent that happens, our democracy has been diminished.

Some people complain that they don't want to see their tax money used to support candidates with whom they do not agree. Their point of view may represent a natural reluctance, but the difficulty with their position is that under our present system their money is already being used to support candidates with whom they do not, would not, could not and never will agree. Their money is frequently being used directly against their own interests.

For example, when a major American industry pools its financial resources and supports candidates for Congress, it does so not out of a sense of charity but because it expects to protect its long-term or short-term financial position. And who pays for that financial position?—we all do, whether we are taxpayer or consumer, whether we are investor or borrower—all of us pay for these contributions now, under the present system.

There is not and never has been a free lunch and we only deceive ourselves in believing that all of us are not now paying for the American political process. The difference between public financing and the present system is not that we shall, under public financing, start paying, but rather under public financing we will pay less and begin to protect ourselves against the impact of the special interests themselves.

The measure to be considered by the House will encourage small campaign contributions by many thousands of average Americans. The bipartisan-sponsored legislation to be proposed by Representatives Thomas Foley (D., Wash.) and Barber Conable (R., N.Y.), is based on a bill which has more than 140 House cosponsors. It calls for public funds to match small private contributions of up to $100.

It is based on the public financing system for Presidential elections that is already in effect. Each year American taxpayers by the millions voluntarily check off a box on their income tax returns that earmarks $1 of the tax they already owe for assignment to the Presidential Election Fund in the Treasury.

In its initial test in 1976, public financing worked very well. My former colleague, Senator Charles Mathias (R., Md.), has said that in the 1976 Presidential election, "to a rare degree in American politics, the average voter was the millionaire's equal" because both the Carter and Ford campaigns in the general election were financed entirely from the voluntary tax check-off fund.

That system can turn around the way we finance political campaigns. When candidates know that small contributions they receive will be matched equally from voluntary checked-off dollars, they will have every incentive to seek much wider support for their campaigns.

Very few candidates really want to rely for their campaign funds on "fat cats" or groups with axes to grind. As Hubert Humphrey once said, going hat in hand to potential large contributors is a "degrading, demeaning experience." Without public financing, however, candidates in tough races often feel they have no alternative.

I'd like to say something as a partisan Republican. The present "system" favors incumbents and as a Republican one cannot fail to miss that special interests must love the Democrats in Congress, they have made so many of them; and they keep them there.

This issue is not and should not be a partisan one.

However, as a former Republican member of Congress, I guess my message is directed especially to other Republicans. We ought not to miss the importance to our party in giving more of our challengers a chance to defeat incumbent Democrats. Public financing will help Republicans at least as much as Democrats.

The Democrats have been the majority party in Congress almost steadily since Franklin D. Roosevelt's election in 1932. Once someone is elected U.S. Representative, he or she is almost certain of re-election. In the five House elections from 1968–1976, well over 90 percent of representatives who sought re-election won. In 1976, 385 incumbents ran and only 12 were defeated in the general election, a re-election percentage of 96 percent.

Seventy-one years ago a Republican President, Theodore Roosevelt, first urged Congress to adopt public financing for election campaigns. If he were alive today I believe he would be leading the charge for congressional public financing.●

AMENDMENT TO FEDERAL ELECTION CAMPAIGN ACT AMENDMENTS ESTABLISHING A SYSTEM OF PARTIAL PUBLIC FINANCING OF HOUSE GENERAL ELECTIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. FOLEY) is recognized for 5 minutes.

● Mr. FOLEY. Mr. Speaker, today I am placing in the RECORD an amendment to provide for partial public financing of House general elections which Representative BARBER CONABLE and I intend to offer during House consideration of H.R. 11315.

Our amendment is the product of many months of effort. It contains what we believe are the best elements of previous proposals, plus several new features.

Basically, the system we are proposing is similar to the Presidential primary public financing system, and like the Presidential system the main purpose of our amendment is to reduce the dependence of congressional candidates on special interest money to fund their campaigns.

Under our proposal small individual contributions of up to $100 would be matched with funds from the voluntary dollar tax checkoff fund. A candidate would qualify to receive a $10,000 matching fund payment by raising $10,000 in small contributions. Each candidate would be eligible to receive up to five $10,000 matching payments. All matching funds would come from moneys voluntarily checked off by taxpayers; none would be taken from general tax revenues.

Candidates who accept public financing would have to agree to limit their total spending in the campaign to $150,000 and the use of their own personal funds to $25,000. (The 1976 Supreme Court decision in Buckley against Valeo has made clear that such limits can only be established as part of a public financing system.) The $150,000 overall figure consists of a $125,000 base amount plus an additional 20 percent (that is, $25,000) for any fundraising related expenses. This approach is exactly parallel to that used in the overall spending limit for Presidential primaries (in 1976, for example, that limit was $12 million, consisting of a $10 million base amount plus another 20 percent or $2 million, for fundraising related expenses).

Mr. Speaker, in addition to the full text of our amendment, I am placing in the RECORD the "Dear Colleague" letter that Mr. CONABLE and I recently circulated in support of the amendment as well as a summary of the amendment's key provisions. I urge my colleagues to review these materials carefully and hope they will then choose to support the amendment when it is offered on the floor later this week.

HOUSE OF REPRESENTATIVES,
Washington, D.C., March 15, 1978.

DEAR COLLEAGUE: The Federal Election Campaign Act Amendments of 1978, H.R. 11315, is scheduled to come to the House floor next week. We intend to offer an amendment to establish a system of partial public financing of House general elections.

The system we are proposing envisions a major role for small individual contributors, a major role for the political parties, and a diminished role for special interest groups in funding Congressional campaigns.

We believe that one of the main reasons for the decline of public confidence in the Congress is a growing public perception that there is too much special interest money in Congressional campaigns and that it unduly influences legislative decisions.

Public financing provides an alternative means of financing campaigns by doubling the importance of small contributions from people in our own states and districts.

We believe this is essential if we are to reduce public cynicism and begin rebuilding confidence in the Congress.

Basically, our amendment would permit candidates to receive up to five $10,000 matching payments from the voluntary dollar check-off fund, each matching individual contributions of $100 or less. No matching payments would be made for amounts less than $10,000. In addition, our proposal would limit total spending and use of candidate's personal funds. Attached is a summary of the basic provisions.

Thank you for your consideration. We hope we can count on your support.

Sincerely,

THOMAS S. FOLEY.
BARBER B. CONABLE, Jr.

SUMMARY OF FOLEY-CONABLE CAMPAIGN FINANCING PROPOSAL

(1) The proposed public financing system would cover general elections only and would prohibit a candidate from spending more than $25,000 in personal funds or more than $150,000 overall (including fund raising costs) in a House general election contest.

(2) Authorizes candidates to receive up to five $10,000 payments, each matching individual contributions of $100 or less received after January 1st of the election year. In other words, a candidate would be required to raise $10,000 in small contributions in order to receive each $10,000 matching payment. Matching fund payments would come from the voluntary dollar check-off fund.

(3) Requires that 80% of the contributions used to obtain matching funds must come from residents of the state involved.

(4) Requires candidates who wish to receive matching funds to sign an agreement within 10 days after being nominated for election that they will comply with the personal and overall spending limits. Candidates also would be required to apply for $1,000 in matching funds at this point in order to make the agreement binding in the eyes of the court.

(5) Provides that if a candidate does not opt into the public financing system and chooses instead to spend substantial sums of personal funds and private money, the overall spending limit is removed for his opponent in the system and the opponent is eligible for additional matching funds.

(6) Simplifies the procedure for obtaining matching payments in order to reduce the administrative burden on the Federal Election Commission and in order to expedite payments to candidates within 48 hours after making proper application.

(7) Protects against excessive independent expenditures by waiving the spending limit if the aggregate of independent expenditures and internal communication expenditures against a candidate exceed $33,000.

(8) Permits candidates to receive matching payments for contributions, even if the contributions have been expended at the time the candidate makes application for matching funds. Matching funds could not be obtained until after the primary election and could be used only for general election purposes.

(9) Prohibits matching fund payments to any candidate who is unopposed in the general election.

(10) Prohibits use of matching funds to repay loans or to make payments to the candidate, to the candidate's immediate family, or to any organization 10% of which is owned by the candidate or members of his immediate family.●

MIDDLE-INCOME STUDENT ASSISTANCE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. GLICKMAN) is recognized for 5 minutes.

● Mr. GLICKMAN. Mr. Speaker, my vote against bringing H.R. 11274, the Middle-Income Student Assistance Act, to the House floor today is not an indication of my opposition to that legislation. I agree wholeheartedly with the President's idea of providing expanded financial assistance to middle-income families trying to educate their children. But I also have indicated my support for a version of the tuition tax credit as a means of assuring access to higher education.

What led me to oppose the second was the belief that both of these proposals should be fully debated and subject to amendment. Either way we go, we are talking about a considerable amount of money. And the House should not put itself in the position of approving either program in a matter-of-fact way. We need to do something; there is no question about that. But I am sure my colleagues will agree that we should handle this issue in a responsible manner. That certainly would not have been the case if this had come up under suspension, but I am looking forward to full floor consideration at an early date.●

AMENDMENT TO H.R. 11315

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from New Jersey (Mr. THOMPSON) is recognized for 5 minutes.

● Mr. THOMPSON. Mr. Speaker, as you know, H.R. 11315 reduces party contributions and expenditures on behalf of a House candidate from the $50,000 authorized by existing law to $15,000. I think this is a needed change.

However. because this change is obscuring the issue of public financing, I issued a statement on Saturday whereby I indicated my intention to offer an amendment, following the adoption of the rule on H.R. 11315 tomorrow, to restore the amendment of party contributions and expenditures to $50,000. I reiterated my offer again today before the Committee on Rules. Consequently, Mr. Speaker, I am printing the amendment in the RECORD.

The issue is now squarely drawn on the issue of public financing. I hope my Republican colleagues will join me in supporting the rule in order that all of our colleagues might have the opportunity to adopt or reject public financing.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. WHITLEY (at the request of Mr. WRIGHT), for March 20, 21, and 22, on account of a slight physical illness.

Mr. DELLUMS (at the request of Mr. WRIGHT), for March 20, 21, and 22, on account of illness in the family.

Mr. YOUNG of Alaska (at the request of Mr. RHODES), for today, on account of illness.

Mr. AKAKA (at the request of Mr. WRIGHT), for March 20, 21, and 22, on account of a death in the family.

Mr. RISENHOOVER (at the request of Mr. WRIGHT), for today, on account of official business of the Subcommittee on Mines and Mining of the Interior Committee.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HOLLENBECK) to revise and extend their remarks and include extraneous matter:)

Mr. HAGEDORN, for 15 minutes, today.
Mr. GRASSLEY, for 5 minutes, today.
Mr. MCKINNEY, for 5 minutes, today.
Mr. FRENZEL, for 30 minutes, today.
Mr. WHALEN, for 15 minutes, today.
Mr. COHEN, for 20 minutes, today.
Mr. BOB WILSON, for 3 minutes, today.

(The following Members (at the request of Mr. YOUNG of Missouri) and to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. APPLEGATE, for 5 minutes, today.
Mr. BINGHAM, for 10 minutes, today.
Mr. KOSTMAYER, for 5 minutes, today.
Ms. HOLTZMAN, for 5 minutes, today.
Mr. BAUCUS, for 10 minutes, today.
Mr. FOLEY, for 5 minutes, today.
Mr. GLICKMAN, for 5 minutes, today.
Mr. DIGGS, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. EVANS of Delaware, to revise and extend his remarks prior to recorded vote on ordering seconds.

Mr. MAGUIRE, to revise and extend his remarks immediately following vote on H.R. 11274.

(The following Members (at the request of Mr. HOLLENBECK) and to include extraneous matter:)

Mr. DERWINSKI.
Mr. RUPPE.
Mr. STEERS in two instances.
Mr. RHODES.
Mr. HYDE.
Mr. WHITEHURST.
Mr. LAGOMARSINO.
Mr. COLLINS of Texas.
Mr. RUDD.
Mr. STOCKMAN.
Mr. TREEN.

(The following Members (at the request of Mr. YOUNG of Missouri), and to include extraneous matter:)

Mr. ANNUNZIO in six instances.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. BROWN of California in 10 instances.
Mr. EDWARDS of California in two instances.
Mr. MINETA.
Mr. WEAVER.
Mr. BINGHAM in five instances.
Mr. MURPHY of Illinois.
Mr. LEVITAS.
Mr. GIAIMO.
Mr. MILLER of California.
Mr. GEPHARDT in two instances.
Mr. BLANCHARD.
Mr. HARRIS.
Mr. MAGUIRE.
Mr. ROSENTHAL.
Mr. STOKES.
Mr. MCDONALD.
Ms. HOLTZMAN.
Mr. MURPHY of New York.
Mr. ROGERS.
Mr. DRINAN.
Mr. TUCKER.
Mr. PATTISON of New York.
Mr. WAXMAN.
Mr. WALGREN.
Mr. RICHMOND.
Mr. BALDUS.
Mr. RANGEL.
Mr. FOLEY.
Mr. SOLARZ.
Mr. LUKEN in two instances.
Mr. PATTEN.
Mr. HOLLAND.

ADJOURNMENT

Mr. YOUNG of Missouri. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 45 minutes p.m.), the House adjourned until tomorrow, Tuesday, March 21, 1978, at 12 o'clock noon.

CONTRACTURAL ACTIONS, CALENDAR YEAR 1977, TO FACILITATE NATIONAL DEFENSE

The Clerk of the House of Representatives submits the following report for printing in the CONGRESSIONAL RECORD pursuant to section 4(b) of Public Law 85–804:

DEPARTMENT OF ENERGY,
Washington, D.C., March 14, 1978.

Hon. THOMAS P. O'NEILL,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: The following information is submitted pursuant to the provisions of Public Law 85–804, and implementing instructions contained in Federal Procurement Regulation 1–17.000.

For the calendar year ending December 31, 1977, the following actions, under the subject Act, are reported for the Department of Energy:

1. *Actions Approved*

Contractual fairness—Correction of mistake

(1)	Amount requested	$28,463
	Amount approved	28,463

2. *Actions Denied*

Contractual fairness—Formalization of informal commitment

(1)	Amount requested	$25,000,000
	Amount denied	25,000,000

The above actions were taken prior to October 1, 1977.

Sincerely,

(S) JOHN E. REID,
Director, Office of Procurement Management, Procurement and Contracts Management Directorate.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3595. A letter from the Board of Governors of the Federal Reserve System, transmitting the Board's position on the proposed International Banking Act of 1978; to the Committee on Banking, Finance and Urban Affairs.

3596. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–156, "To amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries, and for the purposes," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

3597. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–158, "To amend the Air Quality Control Regulations of the District of Columbia relating to particulate emissions from fuel-burning equipment," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

3598. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notice of proposed changes in two existing Navy records systems, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

3599. A letter from the Director, Office of Procurement Management, Department of Energy, transmitting a report on extraordinary contractual actions taken by the Department during calendar year 1977, pursuant to section 4 of Public Law 85–804; to the Committee on Government Operations.

3600. A letter from the Administrator of General Services, transmitting the 1977 annual report of the General Services Administration, pursuant to section 212 of the Federal Property and Administrative Services Act of 1949, as amended; to the Committee on Government Operations.

3601. A letter from the Comptroller General of the United States, transmitting a report on the system of information and referral for people needing human services (HRD–77–134, March 20, 1978); to the Committee on Government Operations.

3602. A letter from the Secretary of Commerce, transmitting the annual report of the Department's activities during fiscal year 1977 under the Fair Packaging and Labeling Act, pursuant to section 8 of the act; to the Committee on Interstate and Foreign Commerce.

3603. A letter from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to revise and reform the Federal law applicable to drugs for human use and to establish a National Center for Clinical Pharmacology within the Department of Health, Education, and Welfare; to the Committee on Interstate and Foreign Commerce.

3604. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Federal Railroad Safety Act of 1970 and the Rail Passengers Service Act to authorize additional appropriations and for other purposes, and to amend other rail safety acts, the Railroad Revitalization and Regulatory Reform Act of 1976, and the Department of Transportation Act; to the Committee on Interstate and Foreign Commerce.

3605. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting a copy of the order entered in the case of an alien found admissible to the United States, pursuant to section 213(a)(28)(I)(ii) of the Immigration and Nationality Act; to the Committee on the Judiciary.

3606. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, pursuant to section 212(d)(6) of the act; to the Committee on the Judiciary.

3607. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a draft of proposed legislation authorizing additional appropriations for prosecution of projects in certain comprehensive river basin plans for flood control, navigation, and for other purposes; to the Committee on Public Works and Transportation.

3608. A letter from the Secretary of Transportation, transmitting the annual report on the highway safety improvement programs, covering fiscal year 1977, pursuants to section 203(e) of the Highway Safety Act of 1973 and sections 151(g), 152(e), and 153(e) of title 23, United States Code (H. Doc. 95–305); to the Committee on Public Works and Transportation and ordered to be printed.

3609. A letter from the Administrator of General Services, transmitting a report on the building project survey for Lansing, Mich., pursuant to section 11(b) of Public Law 86–249; to the Committee on Public Works and Transportation.

3610. A letter from the Secretary of the Treasury, transmitting the seventh quarterly report of the East-West Foreign Trade Board, pursuant to section 411(c) of the Trade Act of 1974; to the Committee on Ways and Means.

3611. A letter from the Secretary of the Treasury, transmitting the eighth quarterly report of the East-West Foreign Trade Board, pursuant to section 411(c) of the Trade Act of 1974; to the Committee on Ways and Means.

3612. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to authorize the establishment of an international emergency wheat reserve, and for other related purposes; jointly, to the Committees on Agriculture and International Relations.

3613. A letter from the Chairman, Federal Deposit Insurance Corporation, transmitting the third annual report of the Corporation's Office of Consumer Affairs and Civil Rights, pursuant to section 18(f)(5) of the Federal Trade Commission Act (88 Stat. 2197); jointly, to the Committees on Banking, Finance and Urban Affairs and Interstate and Foreign Commerce.

3614. A letter from the Chairman, Board of Governors of the Federal Reserve System, transmitting the third annual report on the Board's activities under section 18(f) of the Federal Trade Commission Act, pursuant to section 18(f)(5) of the act (88 Stat. 2197); jointly, to the Committees on Banking, Finance and Urban Affairs and Interstate and Foreign Commerce.

3615. A letter from the Comptroller of the Currency, transmitting the annual report of his Consumer Affairs Division for calendar year 1977, pursuant to section 18(f)(5) of the Federal Trade Commission Act (88 Stat. 2197); jointly, to the Committees on Banking, Finance and Urban Affairs, and Interstate and Foreign Commerce.

3616. A letter from the Comptroller General of the United States, transmitting a report on the need for consistent and uniform treatment of inflation in program cost estimates provided to the Congress (PSAD–78–8, March 20, 1978); jointly, to the Committees on Government Operations, and Appropriations.

3617. A letter from the Comptroller General of the United States, transmitting a report on the Army's acquisition of electronic warfare equipment (PSAD–77–157, March 20, 1978); jointly, to the Committees on Government Operations, and Armed Services.

3618. A letter from the Comptroller General of the United States, transmitting a report on the role of Government in international air transport (ID–77–50, March 17, 1978); jointly, to the Committees on Government Operations, Public Works and Transportation, and International Relations.

3619. A letter from the Secretary of Energy, transmitting a draft of proposed legislation to amend the Atomic Energy Act of 1954, as amended, to improve the nuclear siting and licensing process, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[*Pursuant to the order of the House on Mar. 16, 1978, the following reports were filed on Mar. 17, 1978*]

Mr. ULLMAN: Committee on Ways and Means. H.R. 11518. A bill to extend the existing temporary debt limit (Rept. No. 95–984). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE: Committee on Science and Technology. H.R. 11302. A bill to authorize appropriations for environmental research, development, and demonstrations for the fiscal year 1979, and for other purposes; with amendment (Rept. No. 95–985). Referred to the Committee of the Whole House on the State of the Union.

[*Pursuant to the order of the House on Mar. 16, 1978, the following report was filed on Mar. 18, 1978*]

Mr. FOLEY: Committee on Agriculture. H.R. 11504. A bill to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the United States, and extend the Emergency Livestock Credit Act; with amendment (Rept. No. 95–986). Referred to the Committee of the Whole House on the State of the Union.

[*Submitted Mar. 20, 1978*]

Mr. SISK: Committee on Rules. House Resolution 1092. Resolution providing for the consideration of H.R. 11518. A bill to extend the existing temporary debt limit (Rept. No. 95–987). Referred to the House Calendar.

Mr. ULLMAN: Committee on Ways and Means. H.R. 2984. A bill to amend the Internal Revenue Code of 1954 to exempt from the excise tax imposed on trailers any trailer designed to be used with light-duty vehicle for framing purposes or for transporting horses or livestock (Rept. No. 95–988). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 7684. A bill to amend the Flammable Fabrics Act to require the Secretary of Commerce to study the necessity and feasibility of establishing Federal standards relating to fire prevention and control; with amendment (Rept. No. 95–989, Pt. I.). Ordered to be printed.

Mr. MAHON: Committee on Appropriations. House Joint Resoluion 796. Joint resolution making an urgent supplemental appropriation for disaster relief for the fiscal year ending September 30, 1978 (Rept No. 95–990). Referred to the Committee of the Whole House on the State of the Union.

Mr. BOLLING: Committee on Rules. House Resolution 1093. Resolution providing for the consideration of H.R. 11315. A bill to amend the Federal Election Campaign Act of 1971 to make certain changes in the reporting and disclosure requirements of such act, and for other purposes (Rept. No. 95–991). Referred to the House Calendar.

Mr. TEAGUE: Committee on Science and Technology. H.R. 11291. A bill to authorize appropriations for the Federal Fire Prevention and Control Act of 1974, and to change the name of the National Fire Prevention and Control Administration to the U.S. Fire Administration (Rep. No. 95–992). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE: Committee on Science and Technology. H.R. 11400. A bill to authorize the appropriation of specified dollar amounts for each of the National Science Foundation's major program areas (and certain subprograms), and to provide requirements relating to periods of availability and transfers of the authorized funds. (Rept. No. 95–993). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER:

H.R. 11636. A bill to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the United States, and extend the Emergency Livestock Credit Act; to the Committee on Agriculture.

By Mr. AuCOIN (for himself, Mr. AKAKA, Mr. BAUCUS, Mr. CARR, Mr. CORNELL, Mr. DORNAN, Mr. DOWNEY, Mr. EDGAR, Mr. EILBERG, Mr. HARRINGTON, Mr. HUGHES, Mr. JENRETTE, Mr. LEGGETT, Ms. LLOYD of Tennessee, Ms. MIKULSKI, Mr. NOLAN, Mr. SANTINI, Mr. SIMON, Ms. SPELLMAN, Mr. TRAXLER, Mr. VENTO, Mr. YOUNG of Missouri, Mr. WAXMAN, Mr. CHARLES WILSON of Texas, and Mr. WINN):

H.R. 11637. A bill to amend the Internal Revenue Code of 1954 to allow a charitable deduction for certain crops furnished by farmers to certain tax-exempt organizations; to the Committee on Ways and Means.

By Mr. BAUCUS:

H.R. 11638. A bill to amend and supplement the acreage limitation and residency provisions of the Federal reclamation laws, as amended and supplemented, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 11639. A bill to amend the Internal Revenue Code of 1954 to provide for automatic cost-of-living adjustments in the income tax and withholding rates; to the Committee on Ways and Means.

H.R. 11640. A bill to repeal the carryover basis provisions added by the Tax Reform Act of 1976; to the Committee on Ways and Means.

H.R. 11641. A bill to eliminate tax loss farming; to the Committee on Ways and Means.

H.R. 11642. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide that disability insurance benefits and the medicare program shall be financed from general revenues (pursuant to annual authorizations) rather than through the imposition of employment and self-employment taxes as at present, and to adjust the rates of such taxes (for purposes of financing the OASI program) accordingly; to the Committee on Ways and Means.

H.R. 11643. A bill to amend the Internal Revenue Code of 1954 to provide tax relief to small businesses by establishing a graduated income tax rate for corporations; to the Committee on Ways and Means.

By Mr. BOWEN:

H.R. 11644. A bill to establish an executive department to be known as the Department of Education, and for other purposes; to the Committee on Government Operations.

By Mr. CORRADA (for himself, Mr. BLANCHARD, Mr. LLOYD of California, Mr. DE LA GARZA, and Mrs. SCHROEDER):

H.R. 11645. A bill to amend the Bilingual Education Act, and for other purposes; to the Committee on Education and Labor.

By Mr. DUNCAN of Tennessee:

H.R. 11646. A bill to amend the Internal Revenue Code of 1954 to encourage the targeting of manufacturing-related investments in labor surplus areas by providing, with respect to property placed in service in such areas, an additional depreciation deduction and an additional investment tax credit, and by providing, with respect to real property located in such areas, an additional deduction for State and local real property taxes; to the Committee on Ways and Means.

By Mr. EDWARDS of Alabama:

H.R. 11647. A bill to reinstate the tax treatment with respect to annuity contracts with reserves based on a segregated asset account as they existed prior to issuance of Revenue Ruling 77–85; to the Committee on Ways and Means.

By Mrs. FENWICK (for herself, Mr. SIMON, and Mr. ALLEN):

H.R. 11648. A bill to increase alternatives to institutionalization for senior citizens; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. FOLEY:

H.R. 11649. A bill to bolster farm income by providing emergency assistance for producers of wheat, feed grains, upland cotton and soybeans, and for other purposes; to the Committee on Agriculture.

By Mr. GRASSLEY (for himself, Mr. NOLAN, Mr. AKAKA, Mr. AMMERMAN, Mr. BAUCUS, Mr. BEDELL, Mr. BEVILL, Mr. BREAUX, Mr. BROYHILL, Mr. BYRON, Mr. COHEN, Mr. COLEMAN, Mr. CORCORAN of Illinois, Mr. CORRADA, Mr. DUNCAN of Tennessee, Mr. ENGLISH, Mr. HAGEDORN, Mr. HIGHTOWER, Mr. HUCKABY, Mr. HUGHES, Mr. JENKINS, Mr. JONES of Tennessee, Mr. KINDNESS, Mr. LOTT, and Mr. MARLENEE):

H.R. 11650. A bill to establish a separate community development program for units of general local government which have a population of 20,000 or fewer individuals and are located in non-metropolitan areas; jointly to the Committees on Agriculture, and Banking, Finance and Urban Affairs.

By Mr. GRASSLEY (for himself, Mr. NOLAN, Ms. MEYNER, Mr. MURPHY of Pennsylvania, Mr. PANETTA, Mr. PERKINS, Mr. RAILSBACK, Mr. SANTINI, Mr. SEBELIUS, Mr. SMITH of Iowa, Ms. SMITH of Nebraska, Mr. STANGELAND, Mr. STEIGER, Mr. VANDER JAGT, Mr. WHITE, and Mr. WAMPLER):

H.R. 11651. A bill to establish a separate community development program for units of general local government which have a population of 20,000 or fewer individuals and are located in non-metropolitan areas; jointly, to the Committees on Agriculture, and Banking, Finance and Urban Affairs.

By Mr. HARRINGTON (for himself, Mr. MITCHELL of Maryland, Mr. EDWARDS of California, Mr. EILBERG, Mr. JOHNSON of Colorado, Mr. STEERS, Mr. BONIOR, Mr. HARKIN, Mr. BAUCUS, Mr. BROWN of California, Mr. PHILLIP BURTON, Mr. BINGHAM, Ms. KEYS, Mrs. MEYNER, Mr. SIMON, and Mr. WEISS):

H.R. 11652. A bill to allow the President to waive certain prohibitions on the furnishing of food assistance to foreign countries if he determines that such assistance would help needy people; to the Committee on International Relations.

By Mr. MARTIN (for himself and Mr. BROYHILL):

H.R. 11653. A bill to continue the present income tax treatment of nonqualified deferred compensation plans established by State and local governments and other employers; to the Committee on Ways and Means.

By Mr. MATHIS (for himself, Mr. POAGE, Mr. WAMPLER, and Mr. FRASER):

H.R. 11654. A bill to strengthen the economy of the United States through increased sales abroad of American farm products; jointly, to the Committees on Agriculture, and International Relations.

By Mr. MEEDS (by request):

H.R. 11655. A bill to amend the Water Resources Planning Act (75 Stat. 244, as amended); to the Committee on Interior and Insular Affairs.

By Mr. MITCHELL of New York (for himself, Mr. KETCHUM, Mr. NEAL, Mr. MCDONALD, Mr. LEGGETT, Mr. LOTT, Mr. WALSH, Mr. TRIBLE, Mr. MANN, and Mr. WHITEHURST):

H.R. 11656. A bill to amend the Federal Civil Defense Act of 1950 to authorize appropriations for the purposes of such act for fiscal years 1979 through 1985; to the Committee on Armed Services.

By Mr. MURPHY of New York:

H.R. 11657. A bill to authorize appropriations to carry out the Central, Western, and South Pacific Fisheries Development Act until the close of fiscal year 1983; to the Committee on Merchant Marine and Fisheries

By MURPHY of New York (for himself, Mr. ASHLEY, Mr. DINGELL, Mr. LEGGETT, Mr. EILBERG, Mr. OBERSTAR, Ms. MIKULSKI, Mr BONIOR, Mr. AKAKA, and Mr. RUPPE):

H.R. 11658. A bill to amend title XI of the Merchant Marine Act, 1936, to permit the guarantee of obligations for financing Great Lakes vessels in an amount not exceeding 87½ percent of the actual or depreciated actual cost of each vessel; to the Committee on Merchant Marine and Fisheries.

By Mr. ROE (for himself, Mr. COHEN, Mr. SEBELIUS, Mr. SKUBITZ, and Mr. WINN):

H.R. 11659. A bill to amend section 218 of the Social Security Act to require that States having agreements entered into thereunder will continue to make social security payments and reports on a calendar-quarter basis; to the Committee on Ways and Means.

By Mr. ROGERS:

H.R. 11660. A bill to amend the Drug Abuse Office and Treatment Act of 1972 to extend the programs of assistance under that act for drug abuse prevention, education, treatment, and rehabilitation, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. RUPPE:

H.R. 11661. A bill to amend the Great Lakes Pilotage Act of 1960 in order to relieve the restrictive qualifications standards for U.S. registered pilots on the Great Lakes; to the Committee on Merchant Marine and Fisheries.

By Mr. TSONGAS (for himself, Mr. WRIGHT, Mr. UDALL, Mr. REUSS, Mr. SEBELIUS, Mr. RODINO, Mr. MOAKLEY, Mr. DRINAN, Mr. BURKE of Massachusetts, Mr. CONTE, Mrs. HECKLER, Mr. BOLAND, Mr. MARKEY, Mr. HARRINGTON, Mr. EARLY, Mr. STUDDS, Mr. MILLER of California, Mr. BINGHAM, Mr. MITCHELL of Maryland, Mr. PATTISON of New York, Mr. WAXMAN, Mr. MOFFETT. Mrs. FENWICK, Mr. NEAL, and Mr. DODD):

H.R. 11662. A bill to provide for the establishment of the Lowell National Historical Park in the Commonwealth of Massachusetts, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. WHITEHURST (for himself, Mr. ROBERT W. DANIEL, Jr., Mr. EDWARDS of Oklahoma, Mr. FISHER, Mr. HARRINGTON, Mr. HARRIS, Mr. SATTERFIELD, and Mr. STARK):

H.R. 11663. A bill to designate certain lands within the national forest system as wilderness; and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BALDUS (for himself, Mr. ADDABBO, Mr. AKAKA, Mr. JOHN L. BURTON, Mr. CARNEY, Mr. CORNELL, Mr. DINGELL, Mr. DOWNEY, Mr. EDWARDS of California, Mr. EILBERG, Mr. EVANS of Georgia, Mr. GINN, Mr. GORE, Mr. HUCKABY, Mr. JENKINS, Mr. JOHNSON of California, Mr. KASTEN, Ms. KEYS, Mr. KILDEE, Mr. LEDERER, Mr. LE FANTE, Mr. LEHMAN, Mr. MINETA, Mr. MOSS, and Mr. MURPHY of Pennsylvania):

H.R. 11664. A bill to authorize the Small Business Administration to make grants to support the development and operation of small business development centers in order to provide small business with management development, technical information, product planning and development, and domestic and international market development, and for other purposes; to the Committee on Small Business.

By Mr. BALDUS (for himself, Mr. OBEY, Mr. OTTINGER, Mr. RANGEL, Mr. REUSS, Mr. RICHMOND, Mr. SIKES, Mr. STEIGER, Mr. WHALEN, Mr. YATRON, Mr. YOUNG of Missouri, and Mr. ZABLOCKI):

H.R. 11665. A bill to authorize the Small Business Administration to make grants to support the development and operation of small business development centers in order to provide small business with management development, technical information, product planning and development, and domestic and international market development, and for other purposes; to the Committee on Small Business.

By Mr. JONES of Tennessee (for himself and Mr. MOORE):

H.R. 11666. A bill to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the United States, and extend the Emergency Livestock Credit Act; to the Committee on Agriculture.

By Mr. LUKEN (for himself, Mr. MURPHY of Illinois, Mr. MURPHY of Pennsylvania, and Mr. HEFTEL):

H.R. 11667. A bill to amend the Buy American Act to require that certain Federal contracts be made with the lowest domestic bidder, and for other purposes; to the Committee on Government Operations.

By Mr. MOORHEAD of Pennsylvania:

H.R. 11668. A bill to expand and facilitate urban lending investment by Federal savings and loan associations, and to simplify section 5(c) of the Home Owners' Loan Act of 1933; to the Committee on Banking, Finance and Urban Affairs.

By Mr. PRESSLER:

H.R. 11669. A bill to provide grants to elementary and secondary schools for the purpose of identifying gifted and talented children and providing special educational opportunities for such children; to the Committee on Education and Labor.

By Mr. TUCKER:

H.R. 11670. A bill to insure price and market protection for domestic tomato producers; and for other purposes jointly, to the Committees on Agriculture and Ways and Means.

By Mr. WAMPLER:

H.R. 11671. A bill to designate a certain Federal building in Big Stone Gap, Va., the "C. Bascom Slemp Building"; to the Committee on Public Works and Transportation.

By Mr. CLAY:

H.J. Res. 802. Joint resolution to authorize and request the President to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A."; to the Committee on Post Office and Civil Service.

By Mr. LUKEN:

H.J. Res. 803. Joint resolution to authorize and request the President to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A."; to the Committee on Post Office and Civil Service.

By Mr. RAILSBACK (for himself and Mr. WHITEHURST):

H.J. Res. 804. Joint resolution designating the composition known as "The Stars and Stripes Forever" as the national march of the United States; to the Committee on Post Office and Civil Service.

By Mr. CONTE:

H. Con. Res. 538. Concurrent resolution condemning the slaughter of dolphins by Japanese fishermen; to the Committee on International Relations:

By Mr. YATES (for himself, Mr. PATTISON of New York, Mr. PRESSLER, Mr. HARSHA, Mr. EVANS of Georgia, Mr. WALKER, Mr. MATHIS, Mr. WEAVER, Mr. LEGGETT, Mr. GAMMAGE, and Mrs. COLLINS of Illinois):

H. Con. Res. 539. Concurrent resolution relative to condemning terrorist activities of the Palestine Liberation Organization; to the Committee on International Relations.

By Mr. ZABLOCKI (for himself, Mr. FASCELL, and Mr. BUCHANAN):

H. Con. Res. 540. Concurrent resolution praising the head of the United States delegation to the Belgrade meeting of the Conference on Security and Cooperation in Europe, Ambassador Arthur J. Goldberg, for his efforts on behalf of human rights, and urging the President to continue to express U.S. opposition to representative actions and to violations of basic human rights which are contrary to the Helsinki Accords; to the Committee on International Relations.

By Mr. McDONALD (for himself, Mr. MARKS, Mr. SCHULZE, and Mr. QUIE):

H. Res. 1094. Resolution to amend the Rules of the House of Representatives to establish the Committee on Internal Security, and for other purposes; to the Committee on Rules.

By Mr. QUIE (for himself and Mr. McDONALD):

H. Res. 1095. Resolution to amend the Rules of the House of Representatives to establish the Committee on Internal Security, and for other purposes; to the Committee on Rules.

By Mr. TUCKER:

H. Res. 1096. Resolution expressing the sense of the House of Representatives that the study provided for by section 4(d) of the International Investment Survey Act of 1976 be completed not later than December 31, 1978; to the Committee on International Relations.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

336. By the SPEAKER: A memorial of the Senate of the Commonwealth of Pennsylvania, relative to the Cyprus conflict; to the Committee on International Relations.

337. Also, memorial of the Legislature of the Commonwealth of Virginia, relative to the Cyprus conflict; to the Committee on International Relations.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. LATTA introduced a bill (H.R. 11672) for the relief of Dr. Ka Chun Wong, and his wife, Marilyn Wong; which was referred to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

416. By the SPEAKER: Petition of Harrison J. Goldin, Comptroller of the City of New York, N.Y., relative to Federal guarantees of New York City securities; to the Committee on Banking, Finance, and Urban Affairs.

417. Also petition of Mr. and Mrs. Michael D. Masich, Fresno, Calif., relative to redress of grievances; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 7700

By Mr. CORCORAN of Illinois:

Page 6, strike out line 8 and all that follows through line 17 and insert in lieu thereof the following:

SEC. 3. (a) Section 2401(b) of title 39, United States Code, is amended to read as follows:

"(b)(1) As reimbursement to the Postal Service for public service costs incurred by it in providing a maximum degree of effective and regular postal service nationwide, there are authorized to be appropriated to the Postal Service, for each of the fiscal years ending September 30, 1979, through September 30, 1984, an amount equal to $920,000,000 plus the amount by which the sum of all proposed expenditures of public service funds, as detailed by function under paragraph (2), exceeds $920,000,000.

"(2) It shall not be in order in either the House of Representatives or the Senate to consider any bill, or amendment thereto, appropriating funds authorized under paragraph (1) of this subsection unless the Postmaster General submits to the Congress no later than February 1 of each year a report detailing by function the expenditure of public service funds during the immediately preceding fiscal year and the proposed expenditure of public service funds, by function, for the fiscal year beginning in the year of the submission of such report.

"(3) Expenditures which may be made by the Postal Service funds appropriated under paragraph (1) of this subsection shall be limited to expenditures for public service functions identified by the Postmaster General in the report submitted under paragraph (2) of this subsection.

"(4) The provisions of paragraph (2) of this subsection are enacted by the Congress—

"(A) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, and such rules shall supersede other rules only to the extent that they are inconsistent with such other rules; and

"(B) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.".

Page 6, strike out line 18 and insert in lieu thereof "(b) Subsections (d), (e), and (f) of section 2401 of".

And redesignate the following subsections accordingly.

Page 6, strike out line 22 and insert in lieu thereof "subsections '(d)', '(e)', and '(f)'.".

Page 6, line 23, strike out "(f)" and insert in lieu thereof "(e)".

Page 7, line 1, strike out "(g)" and insert in lieu thereof "(f)".

Page 7, line 7, by striking out "G" and inserting in lieu thereof "(G)" and by striking out the period at the end thereof and inserting in lieu thereof "and by striking out 'percentage'.".

Page 9, strike out line 11 and all that follows through page 10, line 23.

And redesignate the following sections accordingly.

Page 11, strike out line 3 and all that follows through page 13, line 5, and insert in lieu thereof the following:

SEC. 8. (a)(1) Section 202 of title 39, United States Code, is amended to read as follows:

"§ 202. Postmaster General

"The chief executive officer of the Postal Service is the Postmaster General, who shall be appointed by the President, by and with the advice and consent of the Senate, who shall serve for a term of four years, which shall coincide with the term of office of the President. A Postmaster General appointed to fill a vacancy shall serve for the remainder of the term to which his predecessor was appointed. A Postmaster General may con-

tinue to serve after his term expires until his successor has qualified.".

(2) The table of sections for chapter 2 of title 39, United States Code, is amended by striking out the item relating to section 202 and inserting in lieu thereof the following new item:

"202. Postmaster General.".

(b)(1) Section 203 of title 39, United States Code, is amended to read as follows:

"§ 203. Deputy Postmaster General

"The deputy chief executive officer of the Postal Service is the Deputy Postmaster General, who shall be appointed by, and serve at the pleasure of, the Postmaster General.".

(2) The table of sections for chapter 2 of title 39, United States Code, is amended by striking out the item relating to section 203 and inserting in lieu thereof the following new item:

"203. Deputy Postmaster General.".

(c)(1) Section 205 of title 39, United States Code, is amended to read as follows:

"§ 205. General authority of Postmaster General

"The Postmaster General shall direct and control the expenditures and review the practices and policies of the Postal Service and perform other functions and duties prescribed by this title.".

(2) The table of sections for chapter 2 of title 39, United States Code, is amended by striking out the item relating to section 205 and inserting in lieu thereof the following new item:

"205. General authority of Postmaster General.".

(d)(1)(A) Section 102 of title 39, United States Code, is amended to read as follows:

"§ 102. Definition

"As used in this title, 'Postal Service' means the United States Postal Service established by section 201 of this title.".

(B) The table of sections for chapter 1 of title 39, United States Code, is amended by striking out the item relating to section 102 and inserting in lieu thereof the following new item:

"102. Definition."

(2) Section 204 of title 39, United States Code, is amended by striking out "Board" and inserting in lieu thereof "Postmaster General".

(3) Section 207 of title 39, United States Code, is amended by striking out "Board" and inserting in lieu therof "Postmaster General".

(4)(A) Title 39, United States Code, is amended by striking out section 402.

(B) The table of sections for chapter 4 of title 39, United States Code, is amended by striking out the item relating to section 402.

(5) Section 1001(d) of title 39, United States Code, is amended by striking out "of the Board or."

(6) Section 1002(a) of title 39, United States Code, is amended by striking out "Governor or".

(7) Section 1011 of title 39, United States Code, is amended by striking out "Board'" and inserting in lieu thereof "Postmaster General".

And redesignate the following paragraphs accordingly.

Page 33, line 15, strike out "1982" and insert in lieu thereof "1981".

Page 33, lines 23 and 24, strike out "December 31, 1979." and insert in lieu thereof "September 30, 1979."

By Mr. LEVITAS:

Page 33, insert the following new section after line 5 and redesignate the following sections accordingly.

DELIVERY OF MAIL MATTER BY CANDIDATES FOR PUBLIC OFFICE AND BY NONPROFIT ORGANIZATIONS

SEC. 18. (a) Chapter 6 of title 39, United States Code, is amended by adding at the end thereof the following new section:

"607. Delivery of mail matter by candidates for public office and by nonprofit organizations

"(a) Subject to subsection (b), any individual who is a candidate for any public office, any person authorized by such individual, or any charitable or civic nonprofit organization may deposit any mail matter in any letter box if such individual, person, or organization has obtained written approval to deposit any such mail matter from the postmaster for the district in which such mail matter will be deposited.

"(b)(1) With respect to any individual who is a candidate for public office or any person authorized by such individual, subsection (a) shall apply only to any mail matter regarding the candidacy of such individual for such public office.

"(2) With respect to any charitable or civic nonprofit organization, subsection (a) shall apply only to any mail matter regarding the activities or functions of such charitable or civic nonprofit organization.

"(c) Any mail matter which is deposited in accordance with subsection (a) may be deposited without the payment of any postage on such mail matter.

"(d) For purposes of this section—

"(1) the term 'letter box' mean any letter box established, approved, or accepted by the Postal Service for the receipt or delivery of mail matter on any mail route; and

"(2) the term 'charitable or civic nonprofit organization' means any charitable or civic organization which is not organized for profit and in which none of the net income of such organization inures to the benefit of any private stockholder or individual."

(b) The table of sections contained at the beginning of chapter 6 of title 39, United States Code, is amended by adding at the end thereof the following new item:

"607. Delivery of mail matter by candidates for public office and by nonprofit organizations.".

(c) Section 1725 of title 18, United States Code, is amended by striking out "Whoever" and inserting in lieu thereof "Except as provided in section 607 of title 39, whoever".

H.R. 11274

By Mr. QUILLEN:

SEC. 9. CREDIT FOR POST SECONDARY EDUCATIONAL EXPENSES

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting before section 45 the following new section:

"SEC. 44C. POST SECONDARY EDUCATIONAL EXPENSES.

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this subtitle for the taxable year an amount equal to 50 percent of the educational expenses paid by him during the taxable year to one or more eligible educational institutions for himself, his spouse, or any of his dependents (as defined in section 152).

"(b) LIMITATIONS.—

"(1) MAXIMUM DOLLAR AMOUNT.—The amount of educational expenses taken into account under subsection (a) for any taxable year with respect to any individual may not exceed—

"(A) $500, in the case of educational expenses incurred before August 1, 1980, and

"(B) $1,000, in the case of educational expenses incurred after July 31, 1980.

The $1,000 limitation contained in subparagraph (B) for any taxable year shall be reduced by the amount of educational expenses described in subparagraph (A) which are taken into account for that taxable year.

"(2) CERTAIN PAYMENTS EXCLUDED.—

"(B) GRADUATE AND PART-TIME STUDENTS.—Educational expenses paid or incurred.—

"(i) attributable to courses of instruction which are not general courses of instruction, or

"(ii) with respect to any individual who is not a full-time student,

shall not be taken into account under subsection (a).

"(C) GENERAL COURSES OF INSTRUCTION—For purposes of this paragraph, the term 'general courses of instruction' means courses of instruction for which credit is allowable toward a baccalaureate or associate degree by an institution of higher education or toward a certificate of required course work at a vocational school but does not include any course of instruction which is part of the graduate program of the individual.

"(D) FULL-TIME STUDENT.—For purposes of this paragraph, the term 'full-time student' means any individual who, during any 4 calendar months during the calendar year in which the taxable year of the taxpayer begins, is a full-time student at an eligible educational institution.

"(c) DEFINITIONS.—For purposes of this section—

"(1) EDUCATIONAL EXPENSES.—The term 'educational expenses' means tuition and fees required for the enrollment or attendance of a student at an eligible educational institution, including required fees for courses. Such term does not include any amount paid, directly or indirectly, for—

"(A) books, supplies, and equipment for courses of instruction at an eligible educational institution,

"(B) meals, lodging, transportation, or similar personal, living, or family expenses, or

In the event an amount paid for tuition or fees includes an amount for any item described in subparagraph (A) or (B) which is not separately stated, the portion of such amount which is attributable to such item shall be determined under regulations prescribed by the Secretary.

"(2) ELIGIBLE EDUCATIONAL INSTITUTION.—The term 'eligible educational institution' means—

"(A) an institution of higher education; or

"(B) a postsecondary vocational school.

"(3) INSTITUTION OF HIGHER EDUCATION.—The term 'institution of higher education' means an institution described in section 1201(a) or 491(b) of the Higher Education Act of 1965 (as in effect on January 1, 1978).

"(4) POSTSECONDARY VOCATIONAL SCHOOL.—The term 'postsecondary vocational schools' means an area vocational school as defined in section 195(2)(B) and (2)(C) of the Vocational Education Act of 1963 (as in effect on and after October 1, 1977).

"(5) MARITAL STATUS.—The determination of marital status shall be made under section 143.

"(d) SPECIAL RULES.—

"(1) ADJUSTMENT FOR CERTAIN SCHOLARSHIPS AND VETERANS BENEFITS.—The amounts otherwise taken into account under subsection (a) as educational expenses of any individual for any taxable year shall be reduced (before the application of subsection (b)) by any amounts received with respect to such individual for the taxable year as—

"(A) a scholarship or fellowship grant (within the meaning of section 117(a)(1)) which under section 117 is not includible in gross income,

"(B) an educational assistance allowance under chapter 32, 34, or 35 of title 38, United States Code, or

"(C) a payment (other than a gift, bequest, devise, or inheritance within the meaning of section 102(a)) for educational expenses, or attributable to attendance at an eligible educational institution, which is exempt from income taxation by any law of the United States.

"(2) TAXPAYER WHO IS A DEPENDENT OF ANOTHER TAXPAYER.—No credit shall be allowed to a taxpayer under subsection (a) for amounts paid during the taxable year for educational expenses of the taxpayer if such taxpayer is a dependent of any other person for a taxable year beginning with or within the taxable year of the taxpayer.

"(3) SPOUSE.—No credit shall be allowed under subsection (a) for amounts paid during the taxable year for educational expenses for the spouse of the taxpayer unless—

"(A) the taxpayer is entitled to an exemption for his spouse under section 151(b) for the taxable year, or

"(B) the taxpayer files a joint return with his spouse under section 6013 for the taxable year.

"(e) DISALLOWANCE OF CREDITED EXPENSES AS CREDIT OR DEDUCTION.—No deduction or credit shall be allowed under any other section of this chapter for any educational expense to the extent that such expense is taken into account (after the application of subsection (b)) in determining the amount of the credit allowed under subsection (a). The preceding sentence shall not apply to the educational expenses of any taxpayer who, under regulations prescribed by the Secretary, elects not to apply the provisions of this section with respect to such expenses for the taxable year.".

(b) REFUND OF EXCESS CREDIT.—Subsection (b) of section 6401 of such Code (relating to excessive credits)is amended—

(1) by striking out "and 43 (relating to earned income credit)," and inserting in lieu thereof "43 (relating to earned income credit), and 44C (relating to credit for educational expenses),", and

(2) by striking out "39 and 43" and inserting in lieu thereof "39, 43, and 44C".

(d) DISREGARD OF REFUND.—Any refund of Federal income taxes made to any individual, and any reduction in the income tax liability of any individual, by reason of section 44C of the Internl Revenue Code of 1954 (relating to credit for educational expenses) shall not be taken into account as income or receipts for purposes of determining the eligibility of such individual or any other individual for benefits or assistance, or the amount or extent of benefits or assistance, under any Federal program of educational assistance or under any State or local program of educational assistance financed in whole or in part with Federal funds.

(f) CONFORMING AMENDMENTS.—

(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting immediately before the item relating to section 45 the following:

"Sec. 44C. Postsecondary educational expenses.".

(2) Subsection (c) of section 56 of such Code (defining regular tax deduction) is amended by striking out "credits allowable under—" and all that follows and inserting in lieu thereof "credits allowable under subpart A of part IV other than under sections 31, 39, and 43.".

SEC. 10. Effective Date.

The amendments made by section 9 of this Act shall apply to taxable years ending after July 31, 1978, for amounts paid after such date for educational expenses incurred after such date.

H.R. 11315

By Mr. BADHAM:

On page 80, line 17, strike the word "all" and insert "a" and strike the word "committees" and insert "committee".

On page 81, line 4, strike the word "all" and insert "a" and strike the word committees" and insert "committee".

On page 81, line 16, after the words "Payment by" add the words "a national, or".

On page 81, line 23, after the word "organized" insert a semicolon and strike all through page 82, line 3.

On page 89, line 12, after the word "organized," strike all that follows through line 17.

On page 88, line 19, strike the word "all" and insert in lieu thereof "a" and strike the word "committees" and insert in lieu thereof the word "committee".

On page 89, line 3-4, strike the word "all" and insert in lieu thereof "a" and strike the word "committees" and insert in lieu thereof "committee".

On page 89, line 6, after the phrase "the payment by" insert the following "National or".

On page 92, line 13, after the word "by a" insert the word "National,".

Page 99, line 1, strike "identification:" and insert in lieu thereof "name and address".

Page 99, line 2, after the word "the" and before "date" insert "identification".

On page 138, line 15, strike the figure $10,000 and insert in lieu thereof $20,000.

By Mr. BAUMAN:

On page 115, line 4, delete subsection (6) of section 105(b).

On page 140, line 3, strike "4" and insert in lieu thereof "5".

On page 140, line 10, strike "(5)" and insert in lieu thereof "(6)".

On page 140, line 25, strike "(6)" and insert in lieu thereof "(7)".

On page 142, line 7, strike "(7)" and insert in lieu thereof "(8)".

On page 142, line 13, strike "(8)" and insert in lieu thereof "(9)".

On page 143, line 9, strike "(9)" and insert in lieu thereof "(10)".

On page 143, line 18, strike "(10)" and insert in lieu thereof "(11)".

On page 140, line 2, after "$5,000" insert the following new subsection: "(4) Notwithstanding the limitations on contributions in subsection (a)(2)(A) separate, segregated funds established by membership organizations, if said separate, segregated funds are qualified committees, may make contributions to the authorized committees of a candidate with respect to any election for federal office which does not exceed $5,000."

By Mr. EDWARDS of Oklahoma:

On page 97, strike lines 3 through 6 and insert in lieu thereof the following: "notwithstanding the provisions of subsection ("B") a membership relationship exists if the only requirement for such membership relationship is a contribution to such membership organization or to its political committee."

On page 97, lines 7 through 9, strike the words "factors sufficient to demonstrate a membership relationship shall include—" and insert in lieu thereof the words "a membership relationship shall exist only if one of the following requirements is satisfied".

And on page 97, line 17 strike "and" and insert in lieu thereof "or".

On page 97, line 20 strike subsection (c).

Page 98, line 2, after the word "affiliated" insert the following new section:

"(D) Nothing in this Act prohibits a membership organization from making a disbursement for the purposes of increasing its membership."

On page 149, strike lines 17 through 19 and insert the following new paragraph:

(1) in subsection (b)(2)(C) thereof, after "membership organization", insert, "trade association".

On page 150, strike line 7 through 11 and insert the following new subsection:

"In subsection (b)(4)(C) thereof after "membership organization" or "organization" each place those words appear therein insert the following; "trade association".

On page 76, after line 9, add a new title as follows:

Mr. Mr. FOLEY:

TITLE I—FINANCING OF GENERAL ELECTION CAMPAIGNS FOR THE HOUSE OF REPRESENTATIVES

FINANCING PROVISIONS

SEC. 101. (a) The Act is amended by adding at the end thereof the following new title:

"TITLE V—FINANCING OF GENERAL ELECTION CAMPAIGNS FOR THE HOUSE OF REPRESENTATIVES

"DEFINITIONS

"SEC. 501. When used in this title—

"(1) the term 'Account' means the House of Representatives Campaign Account established in section 507(a);

"(2) the term 'eligible candidate' means a candidate who is eligible under section 502 for payments under section 504;

"(3) the term 'election' means any regularly scheduled, special, or runoff election which directly results in the election of a person to the office of Representative in, or Delegate or Resident Commissioner to, the Congress; and

"(4) the term 'immediate family' means a candidates' spouse, and any child, parent, grandparent, brother, half-brother, sister, or half-sister of the candidate, and the spouses of such individuals.

"ELIGIBILITY TO RECEIVE PAYMENTS

"SEC. 502. (a) To be eligible to receive payments under section 507, a candidate shall, with respect to an election, in such form and manner as the Commission may prescribe by regulation, and within 10 days after such candidate qualifies for the election ballot under the law of the State involved, or by August 1, 1978 whichever is later—

"(1) agree—

"(A) to furnish campaign records, evidence of contributions and expenditures, and other appropriate information to the Commission;

"(B) to cooperate in the case of any audit and examination conducted by the Commission under section 508;

"(C) that such candidate and his authorized committees will not accept any contribution in violation of section 316(a);

"(D) that such candidate and his authorized committees will not make any expenditure which exceeds the limitation established in section 316(b)(2); and

"(E) that such candidate will comply with the limitation on expenditures of personal funds established in section 503;

"(2) certify to the Commission that such candidate and his authorized committees have received contributions aggregating not less than $1,000; and

"(3) apply to the Commission for the initial matching payment of $1,000 referred to in section 504(a)(1)(A).

"(b) For purposes of subsection (a)(2) and section 504(a), in determining the amount of contributions received by a candidate and his authorized committees—

"(1) no contribution received as a subscription, loan, advance or deposit, or as a contribution of products or services, shall be taken into account;

"(2) no contribution received from any person other than an individual shall be taken into account, and no contribution received from an individual shall be taken into account to the extent that such contribution exceeds $100 when added to the amount of all other contributions made by such individual to or for the benefit of such candidate during the applicable period specified in paragraph (3); and

"(3) in the case of a general election, no contribution received before January 1 of the year in which such election is held, or received after the date on which such elec-

tion is held shall be taken into account, and in the case of a special or runoff election, no contribution received more than 90 days before such election or received after the date on which such election is held shall be taken into account.

"LIMITATION ON EXPENDITURES OF PERSONAL FUNDS

"SEC. 503. No candidate who is eligible under section 502 to receive payments under section 507 shall make expenditures from the personal funds of such candidate, or the funds of any member of the immediate family of such candidate, aggregating in excess of $25,000, with respect to the election involved.

"ENTITLEMENT OF ELIGIBLE CANDIDATES TO MATCHING PAYMENTS

"SEC. 504. (a)(1) Subject to section 502 (b), any eligible candidate shall be entitled to—

"(A) an initial payment under section 507 of $1,000 to match the contributions certified under section 502(a)(2);

"(B) not more than 5 matching payments of $10,000 under section 507, if, with respect to each such payment, the eligible candidate and his authorized committees have received contributions aggregating $10,000, which have not been matched under this section; and

"(C) in the case of an eligible candidate for whom the limitation on expenditures established in section 316(b) is made inapplicable under section 505(a), not more than 5 additional matching payments of $10,000 under section 507, if, with respect to each such payment, the candidate and his authorized committees have received contributions aggregating $10,000, which have not been matched under this section, except that any contribution which is received after the date on which the limitation on expenditures is made inapplicable shall be matchable under this subparagraph, whether or not the individual making such contribution has made any contribution that has been matched under subparagraph (A) or subparagraph (B).

"(2) No payment shall be made under paragraph (1)(B) or paragraph (1)(C) with respect to an election unless—

"(A) at least two candidates have qualified for the election ballot under the law of the State involved; and

"(B) the candidate seeking such payment certifies to the Commission that the conditions for such payment described in such paragraph and in subparagraph (A) have been met.

"(3) No contribution received from any individual who resides in a State other than the States in which the election is held shall be matched under paragraph (1)(B) to the extent that such contribution when added to all other contributions received from such individuals exceeds 20 percent of the aggregate of contributions otherwise matchable under paragraph (1)(B).

"(4) The aggregate payments to all candidates in an election shall not exceed $150,000.

"(5) All payments received under this section shall be deposited at a national or State bank in a separate checking account which shall contain only funds so received. No expenditures of funds received under this section shall be made except by checks drawn on such account.

"(b) Payments received under this section shall be used only to defray election campaign expenses incurred with respect to the period beginning on the day after the date on which the candidate qualifies for the election ballot under the law of the State involved and ending on the date of the election, or the date on which the candidate withdraws from the campaign or otherwise ceases actively to seek election, whichever occurs first. Such payments shall not be used (1) to repay any loan to any person, or (2) to make any payments, directly or indirectly, to such candidate or to any member of the immediate family of such candidate.

"INAPPLICABILITY AND SUSPENSION OF EXPENDITURE LIMITATION

"SEC. 505. (a)(1) If any candidate who is not eligible to receive payments under section 502 makes expenditures from his personal funds or from the personal funds of any member of the immediate family of such candidate aggregating in excess of $25,000, receives total contributions aggregating in excess of $75,000, or makes total expenditures aggregating in excess of $75,000, the limitation on expenditures established in section 316(b)(2) shall not apply to any eligible candidate in the election involved.

"(2) Any candidate who is not eligible to receive payments under section 502, and who exceeds any amount specified in paragraph (1) relating to personal expenditures, total contributions, or total expenditures, shall so notify the Commission not later than 48 hours after the amount involved is exceeded. The Commission may determine upon its own initiative, or upon the request of any candidate in an election, whether any such amount has been exceeded.

"(b)(1) If, with respect to an election, independent expenditures, as defined in section 301(23), are made, or costs of communication, required to be reported under section 301(11)(B)(iii), are incurred, aggregating more than $50,000, the Commission shall, with respect to such election, suspend the limitation on expenditures established in section 316(b)(2) at the request of any candidate in such election who is eligible to receive payments under section 502, and who has received the benefit of no more than one-third of such independent expenditures or costs of communication.

"(2) Any person who makes independent expenditures, as defined in section 301(23), or incurs costs of communication, required to be reported under section 301(11)(B)(iii), shall notify the Commission not later than 48 hours after such person first makes such independent expenditures or incurs such costs of communication aggregating more than $5,000 and thereafter shall so notify the Commission each time such person makes any additional independent expenditure, or incurs any additional such cost of communication, aggregating $2,500 or more.

"CERTIFICATION BY COMMISSION

"SEC. 506. (a) No later than 48 hours after a candidate files a request with the Commission to receive payments under section 504, the Commission shall certify such eligibility to the Secretary of the Treasury (hereinafter in this title referred to as the "Secretary") for payment in full of the amount to which such candidate is entitled. The request, to the best of their knowledge, is corshall contain—

"(1) such information, and be made in accordance with such procedures, as the Commission may provide by regulation; and

"(2) a verification signed by the candidate and the treasurer of the principal campaign committee of such candidate stating that the information furnished in support of the request, to the best of their knowledge, is correct and fully satisfies the requirements of this title.

"(b) Initial certifications by the Commission under subsection (a) and all determinations made by the Commission under this title, shall be final and conclusive, except to the extent that they are subject to examination and audit by the Commission under section 508 and judicial review under section 511.

"(c) Any candidate who submits false information to the Commission under this section shall be subject to section 309.

"ESTABLISHMENT OF ACCOUNT; PAYMENTS TO ELIGIBLE CANDIDATES

"SEC. 507. (a) The Secretary shall maintain in the Presidential Election Campaign Fund, established by section 9006(a) of the Internal Revenue Code of 1954, in addition to any other accounts maintained under such section, a separate account to be known as the House of Representatives Election Campaign Account (hereinafter in this title referred to as the 'Account'). The Secretary shall deposit, into the Account, for use by candidates eligible to receive payments under this title, the amount available after the Secretary determines that the amounts to be available for the fund will be adequate to meet the payments under subtitle H of such Code (relating to financing of presidential election campaigns) except that, in a biennial general election year, other than a presidential election year, the Secretary shall deposit into the Account no later than May 15 for use by candidates eligible to receive payments under this title, the amount available after the Secretary determines that the total amount to be available in the fund by the end of such year will equal 60 percent of the payments made during the past presidential election under such subtitle. With respect to candidates who are eligible for payments in 1978, the May 15 deadline shall not apply and the Secretary shall make available to the Account from the Presidential Election Campaign Fund such amounts as may be necessary, and shall, from the moneys paid into the fund in 1979 and 1980, reimburse the funds for the amounts made available in 1978 to the Account. The moneys in the Account shall remain available without fiscal year limitation.

"(b) Not later than May 15 of each biennial general election year except 1978, the Secretary shall notify the Commission of the amount to be available in the Account for payments with respect to such year. Within 30 days after such notification, the Commission shall determine whether such amount will be sufficient to satisfy the estimated full entitlements of eligible candidates for such year. If the Commission determines that such amount will not be sufficient, the Commission shall transmit to the Secretary, not later than June 15 of such year, a formula for the ratable adjustment of such entitlements. The Commission shall make such changes in the ratable adjustment formula as may be necessary during the year and shall notify each eligible candidate by registered mail of any adjustment in entitlement of such candidate under this paragraph.

"(c) Upon receipt of a certification from the Commission under section 506, but not earlier than the date on which the candidate involved has qualified under the law of the State involved to have his name on the election ballot in a general election or the 60th day before a special or runoff election, the Secretary shall pay the amount certified by the Commission to the candidate, subject to any ratable adjustment formula, established under subsection (b).

"EXAMINATION AND AUDITS; REPAYMENTS

"SEC. 508. (a)(1) After each general election, the Commission shall conduct an examination and audit of the campaign accounts of eligible candidates designated by the Commission through the use of an appropriate statistical method of random selection to determine whether the contributions certified for matching payments and the expenditures made from such matching payments complied with this title.

"(2) After each special election or runoff election the Commission shall conduct such an examination and audit of the campaign accounts of each eligible candidate in such election.

"(3) Before any general election, special election, or runoff election, the Commission may conduct such an examination and audit of the campaign accounts of any eligible

candidate in such election if the Commission, by an affirmative vote of 4 members, determines that there exists reason to believe that such candidate has violated any provision of this title.

"(b)(1)(A) If the Commission determines that any portion of the payments made to an eligible candidate under section 507 was in excess of the aggregate amount of the payments to which such candidate was entitled, the Commission shall so notify such candidate, and such candidate shall pay to the Secretary an amount equal to such excess amount.

"(B) If the Commission determines that any portion of the payments made to a candidate under section 507 was not used in compliance with section 504(b), the Commission shall so notify such candidate and such candidate shall pay to the Secretary an amount equal to twice the amount of the misused funds.

"(C) Any amount received by an eligible candidate may be retained for a period not exceeding 60 days after the date of the election for the liquidation of all obligations to pay election campaign expenses incurred during the period specified in section 504(b). At the end of such 60-day period that portion of any unexpended balance remaining in the accounts of the candidate's authorized committees which bears the same ratio to the total unexpended balance as the total amount received from the Account bears to the total of all deposits made into the accounts of the candidate's authorized committees shall be promptly repaid to the Secretary.

"(c) All repayments received by the Secretary under subsection (b) shall be deposited in the Account.

"REPORTS TO CONGRESS

"SEC. 509. Not more than 6 months after the end of each calendar year, the Commission shall submit to the House of Representatives a report setting forth for such calendar year—

"(1) the expenditures made by eligible candidates, and their authorized committees, receiving payments under section 507;

"(2) the amounts certified by the Commission under section 506 with respect to such candidates;

"(3) the amounts of repayments, if any, required from such candidates under section 508, and the reasons for each payment required; and

"(4) the balance in (A) the Presidential Election Campaign Fund, and (B) each account maintained in such fund, at the end of such calendar year.

Each report submitted under this section shall be printed as a House document.

"PARTICIPATION BY COMMISSION IN JUDICIAL PROCEEDINGS

"SEC. 510. (a) The Commission may appear in and defend against any action filed under this title, either by attorneys employed in its office or by counsel whom it may appoint without regard to the provisions of title 5, United States Code, concerning appointments in the competitive service, and whose compensation the Commission may fix without regard to the provision of chapter 51 and subchapter III of chapter 53 of such title.

"(b) The Commission may appear, through attorneys and counsel described in subsection (a), in the district courts of the United States to seek recovery of any amounts determined to be payable to the Secretary as a result of any examination and audit made under section 508.

"(c) The Commission may petition, through attorneys and counsel described in subsection (a), the courts of the United States for declaratory or injunctive relief concerning any civil matter arising under this title. Upon application of the Commission, an action brought under this subsection shall be heard and determined by a court of 3 judges in accordance with the provisions of section 2284 of title 28, United States Code, and any appeal from the determination of such court shall lie to the Supreme Court. It shall be the duty of the judges designated to hear the case to assign the case for hearing at the earliest practicable date, to participate in the hearing and determination thereof, and to cause the case to be in every way expedited.

"(d) The Commission may, on behalf of the United States, appeal from, and petition the Supreme Court of the United States for certiorari to review, judgments or decrees entered with respect to actions in which the Commission appears under the authority provided in this section.

"JUDICIARY REVIEW

"SEC. 511. (a) Any certification, determination, or other action by the Commission made or taken under this title shall be subject to review by the United States Court of Appeals for the District of Columbia upon petition filed in such court by any interested person. Any petition under this section shall be filed within 30 days after such certification, determination, or other action involved.

"(b)(1) The Commission, the national committee of any political party, and any individual eligible to vote for any Representative in, or Delegate or Resident Commissioner to, the Congress, are authorized to institute any action under this section, including an action for declaratory judgment or injunctive relief, as may be appropriate to implement or construe any provision of this title.

"(2) The district courts of the United States shall have jurisdiction of proceedings instituted under this subsection and shall exercise such jurisdiction without regard to whether a person asserting rights under the provisions of this subsection shall have exhausted administrative or other remedies provided by law. Such proceedings shall be heard and determined by a court of 3 judges in accordance with the provisions of sections 2284 of title 28, United States Code, and any appeal shall lie to the Supreme Court. It shall be the duty of the judges deignated to hear the case to assign the case for hearing at the earliest practicable date, to participate in the hearing and determination thereof, and to cause the case to be in every way expedited.

"PARTIAL INVALIDITY

"SEC. 512. If any provision of this title, or the application thereof to any person or circumstance, is held invalid, the validity of the remainder of the title and the application of such provision to other persons and circumstances shall not be affected thereby.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 513. There are authorized to be appropriated to the Commission, for the purpose of carrying out its functions under this title, such sums as may be necessary.".

LIMITATIONS ON CONTRIBUTIONS AND EXPENDITURES

SEC. 102. (a)(1) Section 316(b) of the Act as so redesignated in section 105(a)(4), is amended by redesignating paragraph (2) as paragraph (3) and inserting after paragraph (1) the following new paragraph:

"(2) Except as otherwise provided in section 505(b)(1), no candidate for the office of Representative in, or Delegate or Resident Commissioner to, the Congress who establishes eligibility under section 502 to receive payments from the Secretary under section 507 may make expenditures in excess of $125,000, in the case of a campaign for election to such office.".

(b) Section 316(c)(2)(B) of the Act, as so redesignated in section 105(a)(4), is amended by inserting after "calendar year 1974" the following: "; except that, with respect to the limitation established in subsection (b)(2), such term means the calendar year 1976".

APPLICABILITY OF AMENDMENTS

SEC. 103. The amendments made by this title shall apply to any election to the office of Representative in, or Delegate or Resident Commissioner to, the Congress held after the date of enactment of this Act, provided that no payment under this title shall be distributed under section 507 prior to August 1, 1978.

And redesignate the following titles and sections accordingly.

By Mr. FRENZEL:

Strikes lines 20–25 on page 78, and lines 1–4 on page 79 and insert in lieu thereof the following:

"(B) has received contributions from more than 50 persons;

(C) except for any State political organization, has made contributions to 5 or more candidates for Federal office;

On page 81, line 13, strike the word "all" and insert "a" and strike the word "committee" and insert "committee".

On page 81, line 14, strike "$500" and insert "$750".

On page 86, line 3 and on page 98, line 9, after the word "payment" add the following, ", except that such payments shall be reported in accordance with section 304".

On page 88, lines 3 through 5, strike the words "(other than a communication primarily devoted to subjects other than the express advocacy of the election or defeat of a clearly identified candidate)".

On page 88, line 6, strike "$2,000" and insert in lieu thereof "$100".

Page 88, line 9, after "304(a)(2)(A)(iii)" insert ", and in accordance with section 304(a)(2)(B)."

On page 89, line 4, delete "$500" and insert "$750".

On page 114, lines 3–5, strike the present language and insert in lieu thereof the following:

"(1) in subsection (a)(1) thereof by striking out "the Secretary of the Senate and the Clerk of the House of Representatives, ex officio and without the right to vote, and".

Strike the language beginning on page 138, line 3 through page 149, line 12.

On page 141 after the word "party" on line 7 insert a period and strike the remainder through line 15.

On page 148, line 7, insert the following new paragraph:

"(4) Notwithstanding any provision of law with respect to limitations on expenditures or limitations on contributions, any committee of a national political party which accepts contributions only from persons who are individuals may make any expenditure on behalf of any candidate for Federal office."

On page 161, line 9, after "Section 301" strike "(a)" through "(c)", on line 10; and on line 13, strike all through line 7 on page 162.

By Mr. LOTT:

Strike lines 24–25 on page 79, and lines 1–3 on page 80.

By Mr. MIKVA:

Page 141, line 7, delete the word "except"; and page 141, delete lines 8 through 15 inclusive.

By Mr. GARY A. MYERS:

Page 140, line 2, after "$5,000" insert "in the case of an incumbent candidate, and $10,000 in the case of a nonincumbent candidate".

Page 147, line 24, after "1 cent" insert "with respect to an incumbent candidate, and 2 cents with respect to a nonincumbent candidate,".

Page 148, line 5, after "$2,500" insert "with respect to an incumbent candidate, and $10,000 with respect to a nonincumbent candidate".

By Mr. STOCKMAN:

On page 114, line 9, following "Members shall be" insert the following words: "chosen

on the basis of their maturity, integrity, impartiality, good judgment, and experience; and shall be".

Page 110, line 2, delete "$250" and insert in lieu thereof "$100".

On page 139, line 25, after the clause "with respect to" strike the words "elections held in any calendar year" and insert in lieu thereof the following "any elections held".

On page 147, line 24 strike the figure "1" and insert in lieu thereof "2".

On page 148, line 5, strike the figure "$2,500" and insert in lieu thereof "$10,000."

Offered by Mr. THOMPSON:

On page 139, line 25, after the word "to" delete all through "$5,000" on page 140, line 2, and insert in lieu thereof: "any election for Federal office which, in the aggregate, exceeds $5,000".

On page 140, line 16, strike out subsection a(5)(B) thereof and redesignate subsection (a)(5)(C) as (a)(5)(B).

On page 141, line 8, after the word "between" insert "or among", and on line 9, strike "(including the House and Senate congressional campaign committees of such party)" and insert in lieu thereof: ", the House and Senate congressional campaign committees of such party".

On page 148, line 5, strike "$2,500" and insert in lieu thereof "$10,000."

By Mr. VANDER JAGT:

On page 148, after line 7, insert the following new section:

"(4)(A) The House Congressional Campaign committee of a national political party may make expenditures in connection with the general election campaign of a candidate for election to the office of Representative, if the candidate is not an incumbent, in an amount not to exceed 2.5% of the average cost of preparation, printing and mailing of a newsletter as determined by the House Administration Committee multiplied by the number of newsletters sent by the incumbent.

"(4)(B) The Senate Campaign committee of a national political party may make expenditures in connection with the general election campaign of a candidate for election to the office of Senator, if the candidate is not an incumbent, in an amount not to exceed 2.5% of the average cost of preparation, printing and mailing of a newsletter as determined by the Senate Committee on Rules and Administration multiplied by the number of newsletters sent by the incumbent."

By Mr. WIGGINS:

On page 79, line 20, after the word "person" insert ", other than a national, including the Congressional or Senatorial Campaign Committees, state or local committee of a national political party,".

On page 82, line 7, strike ";" and insert ", except such payment shall be reported in accordance with section 304".

On page 87, line 10, after the clause "registered to vote" add the following new language ", except such disbursements over $100 shall be reported in accordance with section 304;".

On page 87, line 12, after "mittee" insert the following words "the congressional and senatorial campaign committees" and on page 87, line 13 after the words "individuals to" insert the words "vote or."

On page 88, line 5, after the word "candidate)" insert the following "or costs directly attributable to any communication designed to encourage individuals to vote or to register to vote,".

On page 89, line 20, strike "316" and insert "317".

On page 89, line 21, strike ";" and insert ", except such payment shall be reported in accordance with section 304".

On page 115, strike lines 23–25 and on page 116, lines 1–6 and insert the following:

"(6) to initiate (through civil actions for injunctive, declaratory, or other appropriate relief), defend or appeal to Federal Court of Appeals civil actions in the name of the Commission for the purpose of enforcing the provisions of this Act and Chapter 95 and Chapter 96 of Title 26 through its general counsel."

On page 157, line 24, insert the following new section:

"Section 9010(d) of the Internal Revenue Code of 1954 (relating to participation by the Federal Election Commission in judicial proceedings) is amended as follows:

(d) The Commission is authorized on behalf of the United States to appeal from judgments or decrees entered with respect to actions in which it appears pursuant to the authority provided in this section.

On page 120, line 17, following "Commission" insert the following: "Within 20 days of receipt of such complaint the Commission shall vote as to whether or not it has reason to believe that a person has violated this Act or Chapter 95 or Chapter 96 of the Internal Revenue Code of 1954."

On page 121, strike lines 13 through 15 and insert in lieu thereof the following:

"(4)(A)(i) In any written response filed pursuant to paragraph (3) the respondent may request a hearing before a hearing examiner appointed by the Commission. A hearing officer shall be appointed by the Commission and the hearing shall convene no later than 15 days after receipt of such written response. A hearing examiner shall be assigned in rotation so far as practicable and may not perform duties inconsistent with their duties and responsibilities as hearing examiners. The functions of hearing officers shall be conducted in an impartial manner. A hearing officer may at any time disqualify himself or herself. On the filing in good faith of a timely and sufficient affidavit of personal bias or other disqualification of a hearing officer the Commission shall determine the matter as a part of the record in the case.

"(ii) Hearings officers presiding at hearings may:

"(a) administer oaths and affirmations;

"(b) issue subpenas authorized by the Commission pursuant to the Act;

"(c) rule on offers of proof and receive relevant evidence;

"(d) take depositions or have depositions taken when the ends of justice would be served;

"(e) regulate the course of the hearings;

"(f) dispose of procedural requests or similar matters; and

"(g) make or recommend decisions in accordance with subparagraph B of this title.

"(iii) Except as otherwise provided by statute, the proponent of a rule or order has the burden of proof. Any oral or documentary evidence may be received, but the Commission as a matter of policy shall provide for the exclusion of irrelevant, immaterial or unduly repetitious evidence. A procedural ruling may not be issued except on consideration of the whole record or those parts thereof cited by a party and supported by and in accordance with the reliable, probative, and substantial evidence. A party is entitled to present his case or defense by oral or documentary evidence, to submit rebuttal evidence, and to conduct such cross-examination as may be required for a full and true disclosure of the facts.

"(iv) The transcript of testimony and exhibits, together with all papers and requests filed in the proceedings, constitutes the exclusive record for decision in accordance with subparagraph B of this title and, shall be made available to the respondent.

"(B) Within 10 days of the termination of the hearing the hearing officer shall certify the entire record, together with the recommendation of the hearing officer to the Commission for decision pursuant to paragraph (5).

"(C) Before a recommendation by the hearing officer to the Commission the parties are entitled to a reasonable opportunity to submit for the consideration of the hearing officer—

"(i) proposed findings and conclusions and briefs in support thereof; and

"(ii) exceptions to the procedural rulings of the hearings officer;

"(5)(A)(i) Within 30 days of receipt of the recommendation of the hearing officer, pursuant to paragraph (4); or within 30 days of the receipt of written response pursuant to paragraph (3) which did not request a hearing pursuant to paragraph (4); or within 30 days after expiration of the right of a respondent to file a written response with the Commission pursuant to paragraph (3) (such respondent having failed to so file) and except as provided in clause (ii), the Commission shall vote to determine whether or not there is probable cause to believe that any".

"On page 139, line 2, strike the figure "$1,000" and insert in lieu thereof "$5,000".

On page 139, line 6, strike the figure "$2,500" and insert in lieu thereof the figure "$5,000".

On page 139, line 11, strike the figure "$10,000" and insert in lieu thereof "$15,000".

On page 139, line 20, strike the figure "$2,500" and insert in lieu thereof "$5,000".

On page 139 strike lines 21 through 25 and on page 140 strike lines 1 and 2 and insert the following new section:

"(3) Notwithstanding the limitations on contributions in paragraph (2)(A), the National Committee, the Congressional Campaign Committee and the Senatorial Campaign Committee of a national political party and a State Committee of a political party may each make contributions to the authorized committees of a candidate with respect to any election for Federal office which in the aggregate does not exceed $5.000."

And on page 140 strike lines 16 through 24.

On page 154 after line 2 add the following:

SEC. 117. Section 310 of the Act as so designated in Section 105(a)(3) is amended by striking out subparagraph (a) and inserting in lieu thereof the following new subsection (a):

"(a) The Commission, the national committee of any political party, any political committee, candidate, or any individual eligible to vote in any election for the office of President may institute such actions in the appropriate district court of the United States, including actions for declaratory judgment and injunctions, as may be appropriate to construe the constitutionality of any provision of this Act or of Subtitle H of the Internal Revenue Code of 1954 (26 U.S.C. 9001 et seq.). The district court immediately shall request the convocation of a three-judge district court pursuant to 28 U.S.C. 2202."

(b) by striking out the words "the court of appeals" from subsections (b) and (c) and inserting in lieu thereof: "the three-judge district court."; and

(c) by striking out the word "certified" from subsection (b) and inserting in lieu thereof "instituted,".

On page 160, line 22, insert after the word "committee" the first time it appears on said line the words "the national committee, the congressional campaign committee, the senatorial campaign committee and" and after the word "committee" the second time it appears on said line, the words "including any district, local or subordinate committees thereof".

And on page 160, line 22, after the word party insert "each".

SENATE—*Monday, March 20, 1978*

(Legislative day of Monday, February 6, 1978)

The Senate met at 11 a.m., on the expiration of the recess, in executive session, and was called to order by Hon. PAUL G. HATFIELD, a Senator from the State of Montana.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

"Holy, Holy, Holy, Lord God of Hosts;
Heaven and earth are full of Thy glory:
Glory be to Thee, O Lord most high."
—Sanctus.

Eternal God, as we enter this Holy Week, enable us to meditate reverently upon those mighty acts by which Thou didst bring redemption to Thy people. Search us and know our hearts and see if there be any evil way in them. Show us the meaning of the cross where Thy love met our sins and life was outpoured for our redemption. May America and its leaders become captive to that love made known in the first Holy Week. Help us to make every day a holy day because it is lived in service to Thee. And when the week is done, grant that we may know the glory of the resurrected life and the power of Thy living presence.

We pray through Him who lived and died and rose again for our salvation. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 20, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable PAUL G. HATFIELD, a Senator from the State of Montana, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. PAUL G. HATFIELD thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, the distinguished Senator from Georgia (Mr. TALMADGE) has asked for 3 minutes of my time. I yield it to him.

Mr. TALMADGE. I thank the distinguished majority leader.

EMERGENCY AGRICULTURAL ACT OF 1978

Mr. TALMADGE. Mr. President, on Tuesday, March 21, 1978, the Senate will consider H.R. 6782, the Emergency Agriculture Act of 1978.

The Senate will have an opportunity to vote for a solution rather than a slogan.

The economic distress that grips our Nation's farmers and drives them to seek relief from Washington is easy to understand. Farm surpluses mean low prices. Low farm prices and skyrocketing costs of production add up to an economic disaster for farmers.

However, the solution to the farm problem is much harder to understand.

This is why that in advance of floor consideration, I want to share with my colleagues the compelling reasons why I believe this bill provides the most direct, immediate, and achievable method for providing urgently needed financial assistance for severely distressed farmers and for attacking the most pressing farm problems.

I also wish to share with my colleagues a comparative analysis prepared by the USDA for the Committee on Agriculture, Nutrition, and Forestry of my bill, H.R. 6782, and S. 2481, the flexible parity bill sponsored by the distinguished ranking minority member of the committee, Senator DOLE.

The Senate will consider the flexible parity bill also on Tuesday, although separately from my bill. There has been some confusion and misunderstanding of these bills which I think should be clarified before the Senate considers them tomorrow.

Mr. President, the emergency farm bill that I have sponsored with 20 other Members of the Senate simply provides for an additional voluntary set-aside program under which farmers would be paid to take 31 million acres of wheat, feed grains, cotton, and soybeans out of production this year. The bill anticipates the retirement of an additional 15 million acres of wheat, 10 million acres of feed grains, and 3 million acres each of cotton and soybeans. I believe there are urgent and compelling reasons for the passage of this bill before Congress recesses for the Easter break at the end of this week.

Indeed, if it is not passed this week, it will be too late for many farmers to participate—especially in the southern regions of the country. They will have already planted this year's crop.

Farmers will be left with a slogan—not a solution.

That is why time is of the essence.

That is why it is imperative that the Congress pass a bill before the Easter recess that the President can sign into law now.

Mr. President, here are the salient reasons why I recommend my bill to the Members of the Senate and ask for their support on Tuesday.

First, it means that farmers will have $8 billion more money in their pockets and products in their bins after paying their cash costs of producing wheat, feed grains, cotton, and soybeans than current programs would give them.

Under the current programs, USDA projects that farmers are going to pay out more to produce their crops than they are going to get back. They predict that farmers will suffer out-of-pocket losses amounting to $411 million in the production of these crops. That is the red ink that will remain after cash operating costs are deducted from the value of production plus deficiency payments.

If my bill is passed, this $411 million out-of-pocket loss will be eliminated, plus farmers will have another $7.532 billion. The bottom line, therefore, is that my bill will put $8 billion more into the farm economy than will be the case without this legislation.

The USDA comparative analysis estimates that the flexible parity bill would result in an increased return to farmers of $5.725 billion if the bill is passed and signed by the President. This is almost $2 billion less than my bill would provide.

Mr. President, the second compelling advantage of my bill is that it would put over $2.1 billion into the hands of farmers now.

This will occur because my bill specifies half of the diversion payments would be made to participating farmers at the time of signup. The Department has informed the committee that it could quickly implement the additional set-aside program and that regulations and administrative machinery could be in place by early April. Thus, diversion checks could be flowing into farm communities in the Nation within a matter of days. This money is sorely needed to help the farmers make this year's crops. As matters now stand, many of them are without cash or credit resources.

On the other hand, the Department states that the flexible parity bill could not be implemented until after most crops have been planted. Growers would be making planting decisions without knowing whether S. 2481 would be enacted into law.

More important, the deficiency payments that would be made to farmers under the flexible parity bill would not be made until 1979 in the case of cotton

and corn. In the case of wheat, payments would be made in November and December, 1978.

The third compelling reason for the Talmadge bill is that it would directly and effectively reduce the present huge carryovers of grain and cotton, which have severely depressed market prices and caused increased farm program costs through large deficiency payments.

If my bill becomes law, supplies of those commodities now in greatest surplus would be brought more into line with our requirements. This should be accomplished within the 1 year life of the bill.

The fourth overwhelming advantage of the bill is that it would have an immediate impact on market prices of covered commodities.

Prices bear a direct relationship to supplies. Reduced production of those commodities in surplus is certain to be reflected in higher prices for those commodities. As a matter of record, both futures and cash prices reacted favorably on last Monday, March 13, when the committee approved H.R. 6782.

The minimum market price objectives of the additional set-aside bill are reasonable and modest. These objectives are $3.50 per bushel for wheat, $2.50 per bushel for corn, $6 per bushel for soybeans, and 60 cents per pound for cotton.

The fifth advantage of my bill is that according to USDA estimates, it is the most cost effective program being considered. In fact, they estimate a net savings of about $90 million from the current program for fiscal years 1978 and 1979.

It is obvious that the Talmadge bill is by far the quickest and most cost effective means of providing relief to farmers from low prices and overproduction.

These then are the principal reasons why I am convinced that my bill should be approved by the Senate on Tuesday without being encumbered by killer amendments. I hope that favorable action will then follow quickly in the House so that congressional action can be completed before the Easter recess.

Time is running out.

We are now at the moment of decision.

We must now decide whether we want to pass legislation to help farmers before their planting preparations are completed and the crops are in the ground.

We must decide whether we want to help the farmers or whether we want to keep the farm issue alive.

I have stated repeatedly my conviction that my emergency bill is the only real option that we have in order to get a bill on the President's desk before Easter that he hopefully will sign.

I do not profess to know what action the President might take on my bill or the flexible parity bill if and when either one or both reaches him.

But it is crystal clear the USDA comparative analysis of the two bills that the administration considers the Talmadge bill as the more feasible and workable approach.

I want to make it clear that I have not focused on the USDA analysis of the flexible parity bill and the Talmadge bill in an invidious manner.

Indeed, I believe the flexible parity approach merits study. I voted to report that bill in order that the Senate might have an opportunity to consider it as well as my own bill. But I think it is imperative that S. 2481 be considered separately from H.R. 6782.

I think it is extremely important also that the Senate, the House, the Nation, and especially the Nation's farmers understand that the single best opportunity we have to help American agriculture now is through the passage of my bill.

Senator DOLE has advised me that he will not attempt to offer his bill as an amendment to or substitute for my bill. He is willing for his proposal to be considered separately on its own merits. I commend the Senator from Kansas for this. It again demonstrates the bipartisan attitude that members of the Senate Committee on Agriculture, Nutrition, and Forestry traditionally have taken on farm matters.

I am sure the Senator from Kansas realizes that an attempt to substitute his bill for mine could well result in no bill at all. That would be a grave disservice to American agriculture and would serve to fan the fires of farmer frustrations to an even greater heat.

However, neither the Senator from Kansas nor I can control the actions of any other Member of the Senate. It is possible that someone else will offer an amendment that would result in either the defeat of the legislation in Congress or a veto by the President.

I sincerely and devoutly hope that this will not happen.

I hope the Senate will act responsively and constructively on Tuesday.

I am well aware that some self-appointed farmer spokesmen are opposed to my bill. Some have even said it would be worse than no bill at all.

I believe the great body of decent, hardworking, responsible American farmers understand the realities of the situation that we face even if some who profess to speak for them in Washington do not.

I think a great majority of farmers want legislation, not political issues.

I think they want action now, not promises of pie in the sky by and by.

The American people generally—and farmers particularly—have grown tired of promises that cannot be delivered and pledges that are not fulfilled. In my judgment, this is one of the underlying reasons why there is so much distrust, disenchantment, and frustration with the Government in this country today.

I hope the Senate will not add to the frustration and disenchantment of the farmers by failing to pass the Talmadge bill on Tuesday.

I hope that the Members of the Senate will be able to return home to their farm constituents during the Easter recess with the knowledge that they have given their farmers a solution, not a slogan.

Mr. President, I ask unanimous consent that the USDA comparative analysis of the Talmadge and Dole bills with current legislation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

A COMPARATIVE ANALYSIS OF THE TALMADGE AND DOLE BILLS WITH CURRENT LEGISLATION

1. Assumptions:

A. The Dole bill:

It could not be implemented until after most crops had been planted. Growers would make planting decisions without knowing whether it would be enacted into law.

Set-aside would be based on 1978 planted acreage for harvest.

Payment limitation of $40,000 per person would be effective.

Most growers will withdraw from the grain reserve rather than face a release level at parity prices.

To receive program payments, growers could not exceed their normal cropland acreage.

B. The Talmadge bill:

It would be implemented quickly under current authority and program regulations would be in place in county offices in early April.

Program would be operated to achieve the specified price objectives of: corn, $2.50; soybeans, $6.00; cotton, $.60, and wheat, $3.50.

To receive program payments, growers would not exceed their normal cropland acreage.

2. Government Costs:

A. Dole:

Budget outlays for FY 1978 and FY 1979 combined at $12.2 billion, about $1.5 billion above current legislation and the Talmadge Bill. Outlays would be substantially higher if the program could be implemented before the spring crops are planted.

Deficiency runs higher than under the Talmadge Bill or Current Legislation.

Loan and inventory outlays are higher than under the Talmadge Bill because of increased loan rates.

B. Talmadge:

Budget outlays would be moderately less than current program.

Loan and reserve repayments would provide a sizeable credit to FY 1979 program.

Direct payments to growers would total about $6.2 billion for the two years. This compares with $3.4 billion under Current Legislation and $6.3 under the Dole Bill.

3. Acreage Shifts:

A. Dole:

For designated crops there would be strong incentive for growers to maximize returns by utilizing as much of their NCA for plantings and set-aside as possible. Thus there would be an acreage reduction of oats at the expense of wheat and barley; a cutback in soybeans at the expense of corn; and flax and sunflowers at the expense of wheat and barley; and potential cutbacks in dry beans, peas, and lentils at the expense of wheat and barley.

B. Talmadge:

Set-aside payments for designated crops would be based on a rate of returns that would be on par with their expectations if they produced. Thus, among designated crops the return to equity would likely keep plantings in balance with recent relationships.

Payment rates would definitely be attractive enough for growers to utilize non-designated crop acreage for the program as under the Dole Program. Thus, this would result in cutbacks in oats, oilseeds other than soybeans, and some minor NCA crops.

4. Farm prices:

A. Dole:

For designated set-aside crops, season average farm prices for the respective marketing years would be above the Current Legislation

but somewhat under the Talmadge price objectives.

The fact that growers would have already planted and for some crops have already sunk a sizeable investment will reduce the participation in an otherwise extremely attractive set-aside program.

For non-designated crops such as oats, oilseeds, and dried beans and peas, cutbacks in acreage are likely as growers respond to the incentive to set-aside at levels with target prices near parity. Therefore, there is the potential for relatively tight supplies, particularly for some minor crops that are included in the NCA, and higher prices than under the Talmadge or Current Legislation programs.

B. Talmadge:

Farm prices in 1978/79 will average around the price objectives.

Prices are apt to strengthen earlier than under Dole since the market can assess weekly the progress of set-aside signup. It would be well into the growing season before there would be much certainty about participation in the Dole program.

5. Food Prices:

A. Dole and Talmadge:

Higher feed prices translated through adjustments in the livestock and poultry sectors would result in all food prices averaging about 1 to 1.5 percent greater than under the current program. Consumer food expenditures would be $2.0–3 billion higher.

6. Returns to Producers:

A. Dole:

Returns to growers would be greater than Current Legislation but less than Talmadge. Most of the gain over Current Legislation is in larger direct payments.

B. Talmadge:

Would yield the greatest returns to growers. Larger direct payments and lower costs account for this position. With all set-aside payments for 1978 adjustments included, direct payments are about $3 billion more than Current Legislation and slightly less than Dole. With plantings down 35–40 million acres, cash costs are about $2 billion less than Current Legislation.

7. Other Impacts and Concerns Under Both Bills:

The level of exports would be curtailed somewhat by the higher prices of the Dole and Talmadge. Under the Dole Bill, higher loan rates for grains would make it difficult for the U.S. to compete in world trade. Also there will likely be pressure and there may be cause to reintroduce export payments (subsidies) in order to avoid substantial slippage of world market shares.

The U.S. position in the negotiation of an International Wheat Agreement would be eroded.

Provides a clear signal to other major grain and cotton exporting nations that the United States unilaterally will take actions to correct the world supply imbalances.

Sharp acreage and supply adjustment will be disruptive to the farm supply and commodity handling and processing industries. Adverse impacts will be greater in rural communities.

Substantially higher feed costs will cause the feeding sector to curtail their operations. Adjustments would begin in 1978 but the impacts of smaller meat supplies would not be felt until 1979.

The reduced acreage under both bills would leave the United States extremely vulnerable in the event of poor weather during the 1978 growing and harvesting season. While soil moisture conditions are vastly improved from a year ago, it is well to remember that the current situation is not much different than it was in 1974 which turned into a disastrous production season.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. The Senator from Texas.

Mr. TOWER. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged equally to the majority and minority leaders.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

U.S. DEFENSE POLICY AND SOVIET TIES

Mr. ROBERT C. BYRD. Mr. President, on Friday, President Carter made a significant and timely address on U.S. foreign and defense policy at Wake Forest University in Winston-Salem, N.C.

In his address, President Carter dealt with many of the major issues currently confronting the United States. In particular, he focused on our relations with the Soviet Union.

President Carter said that we would continue to seek the cooperation of the Soviet Union and other nations in reducing areas of tension. Likewise, while assuring our military capabilities, we will seek security through dependable, verifiable arms control agreements.

However, the President made clear that current Soviet policies may imperil cooperation. He noted the "ominous inclination" on the part of the Soviet Union to use its military power to intervene in local conflicts, such as that in the Horn of Africa.

Further, the President pointed out the continuing increase in Soviet military strength.

These developments demand that the United States maintain adequate responses—diplomatic, economic, and military—and President Carter affirmed that we will take steps to assure the preservation of our national security.

Mr. President, the speech by President Carter was strong but it was not provocative. It was balanced, but it emphasized the U.S. security interests. It was hopeful but also realistic. I strongly support the position the President has taken.

This important address deserves widespread attention. I ask unanimous consent that excerpts from the President's speech of March 17, as published in the New York Times of March 18, be printed in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

EXCERPTS FROM CARTER'S SPEECH ON DEFENSE POLICY AND SOVIET TIES

(WASHINGTON, March 17.—Following are excerpts from a speech on United States defense policy and policy toward the Soviet Union given by President Carter today at Wake Forest University in Winston-Salem, N.C.:)

Let me deal at the beginning with some myths.

One myth is that this country somehow is pulling back from protecting its interests and its friends around the world. That is not the case, as will be explained in this speech and demonstrated in our actions as a nation.

Another myth is that our defense budget is too burdensome and consumes an undue portion of our Federal revenues. National defense is, of course, a large and important item of expenditures; but it represents only about 5 percent of our gross national product and consumes approximately one-fourth of our current Federal budget.

It also is a mistake to believe that our country's defense spending is mainly for interncontinental missiles or nuclear weapons. About 10 percent of our defense budget goes to strategic forces for nuclear deterrence. More than 50 percent of it is simply to pay and support the men and women in our Armed Forces.

Finally, some believe that because we possess nuclear weapons of great destructive power, we need do nothing more to guarantee our security. Unfortunately, it is not that simple. Our potential adversaries have now built up massive forces armed with conventional weapons—tanks, aircraft, infantry and mechanized units. Those forces could be used for political blackmail and could threaten our vital interests—unless we and our allies and friends have our own conventional military strength as a counterbalance.

CHANGES OVER TWO DECADES

Let us review how national security issues have changed over the past decade or two.

The world has grown both more complex and more interdependent. There is now division among the Communist powers; the old colonial empires have fallen, and many new nations have risen in in their place; old ideological labels have lost some of their meaning.

There have also been changes in the military balance among nations. Over the past 20 years the military forces of the Soviets have grown substantially—both in absolute numbers and in relation to our own. There also has been an ominous inclination on the part of the Soviet Union to use its military power to intervene in local conflicts with advisers, with equipment and with full logistical support and encouragement for mercenaries from other Communist countries, as we can observe today in Africa.

This increase in Soviet military power has been going on for a long time. Discounting inflation, since 1960 Soviet military spending has doubled, rising steadily by 3 to 4 percent every year, while our military budget is actually lower than it was in 1960.

The Soviets, who traditionally were not a significant naval power, now rank No. 2 in the world in naval forces.

In its balanced strategic nuclear capability the United States retains important advantages, but over the past decade the steady Soviet buildup has achieved functional equivalence in strategic forces with the United States.

These changes demand that we maintain adequate responses—diplomatic, economic and military.

PRESERVING NATIONAL SECURITY

We have recently completed a major reassessment of our national defense strategy and out of this process have come some overall principles designed to preserve our national security during the years ahead.

We will match, together with our allies and friends, any threatening power through a combination of military forces, political efforts and economic programs. We will not allow any other nation to gain military superiority over us.

We shall seek the cooperation of the Soviet Union and other nations in reducing areas of tension. We do not desire to intervene militarily in the domestic affairs of other countries or to aggravate regional conflicts, and we shall oppose intervention by others.

While assuring our military capabilities, we shall seek security through dependable, verifiable arms-control agreements where possible.

We shall use our great economic, technological and diplomatic advantages to defend our interests and to promote our values. We are prepared, for instance, to cooperate with the Soviet Union toward common social, scientific and economic goals—but if they fail to demonstrate restraint in missile programs and other force levels and in the projection of Soviet or proxy forces into other lands and continents, then popular support in the United States for such cooperation will erode.

MODERNIZATION AND REVITALIZATION

These principles mean that, even as we search for agreement on arms control, we will modernize our strategic systems and

revitalize our conventional forces. We shall implement our policy in three ways:

By maintaining strategic nuclear balance;

By working closely with our NATO allies to strengthen and modernize our defenses in Europe; and

By maintaining and developing forces to counter any threats to our allies and our vital interests in Asia, the Middle East and other regions of the world.

Our first and most fundamental concern is to prevent nuclear war. The horrors of nuclear conflict, and our desire to reduce the world's arsenals of fearsome nuclear weapons, do not free us from the need to analyze the situation objectively, and to make sensible choices about our purposes and means.

Our strategic forces must be—and must be known to be—a match for the capabilities of the Soviets. They must never be able to use their nuclear forces to threaten, coerce or blackmail us or our friends.

Our continuing major effort in the SALT talks now under way in Geneva are one means toward the goal of strategic nuclear stability. We and the Soviets already have reached agreement on some basic points, although still others remain to be resolved.

We are not looking for a one-sided advantage, but before I sign a SALT agreement on behalf of the United States, I will make sure that it preserves the strategic balance, that we can independently verify Soviet compliance, and that we will be at least as strong relative to the Soviet Union as we would be without an agreement.

But in addition to the limits and reductions of a SALT II agreement, we must take other steps to protect the strategic balance. During the next decade improvements in Soviet missiles can make our land-based missile forces increasingly vulnerable to a Soviet first strike. Such an attack would amount to national suicide for the Soviet Union, but, however remote, it is a threat against which we must constantly be on guard.

RAPID EFFORT ON CRUISE MISSILES

We have a superb submarine fleet which is relatively invulnerable to attack, and we have under construction new Trident submarines and missiles which will give our submarine ballistic-missile force even greater range and security. I have ordered rapid development and deployment of cruise missiles to reinforce the strategic value of our bombers. We are working on the M–X intercontinental ballistic missile to give us more options to respond to Soviet strategic deployments. If it becomes necessary to guarantee the clear invulnerability of our strategic deterrent, I shall not hesitate to take actions for full-scale development and deployment of these systems.

Our strategic defense forces are a triad—land-based missiles, sea-based missiles and air-breathing systems such as bombers and cruise missiles. Through the plan I have described, all three legs of the triad will be modernized and improved. Each will retain the ability to impose devastating retaliation upon an aggressor.

For 30 years and more we have been committed to the defense of Europe—bound by the knowledge that Western Europe's security is vital to our own. We continue to cooperate with our NATO allies in a strategy of flexible response, combining conventional and nuclear forces, so that no aggressor can threaten the territory or freedom which, in the past, we have fought together to defend.

For several years we and our allies have been trying to negotiate mutual and balanced reductions of military forces in Europe with the Soviets and the other Warsaw Pact nations, but in the meantime the Soviets have continued to increase and to modernize their forces beyond a level necessary for defense. In the face of this excessive Soviet buildup, we and our NATO allies have had to take important steps to cope with short-term vulnerabilities and to respond to long-term threats. We are significantly strengthening the United States forces stationed in Western Europe and improving our ability to speed additional ground and air reinforcements to the defense of Europe in time of crisis.

For many years the United States has been a truly global power. Our longstanding concerns encompass our own security interests and those of our allies and friends beyond this hemisphere and Europe.

RESPONSIBILITIES FOR PEACE

We have important historical responsibilities to enhance peace in East Asia, the Middle East, the Persian Gulf and in our own hemisphere. Our preference in all these areas is to turn first to international agreements that reduce the overall level of arms and minimize the threat of conflict. But we have the will, and we must also maintain the capacity, to honor our commitments and to protect our interests in these critical areas. In the Pacific we are protected, and so are our allies, by our mutual defense treaties with Australia, New Zealand, Japan and cooperation with other Pacific nations.
